
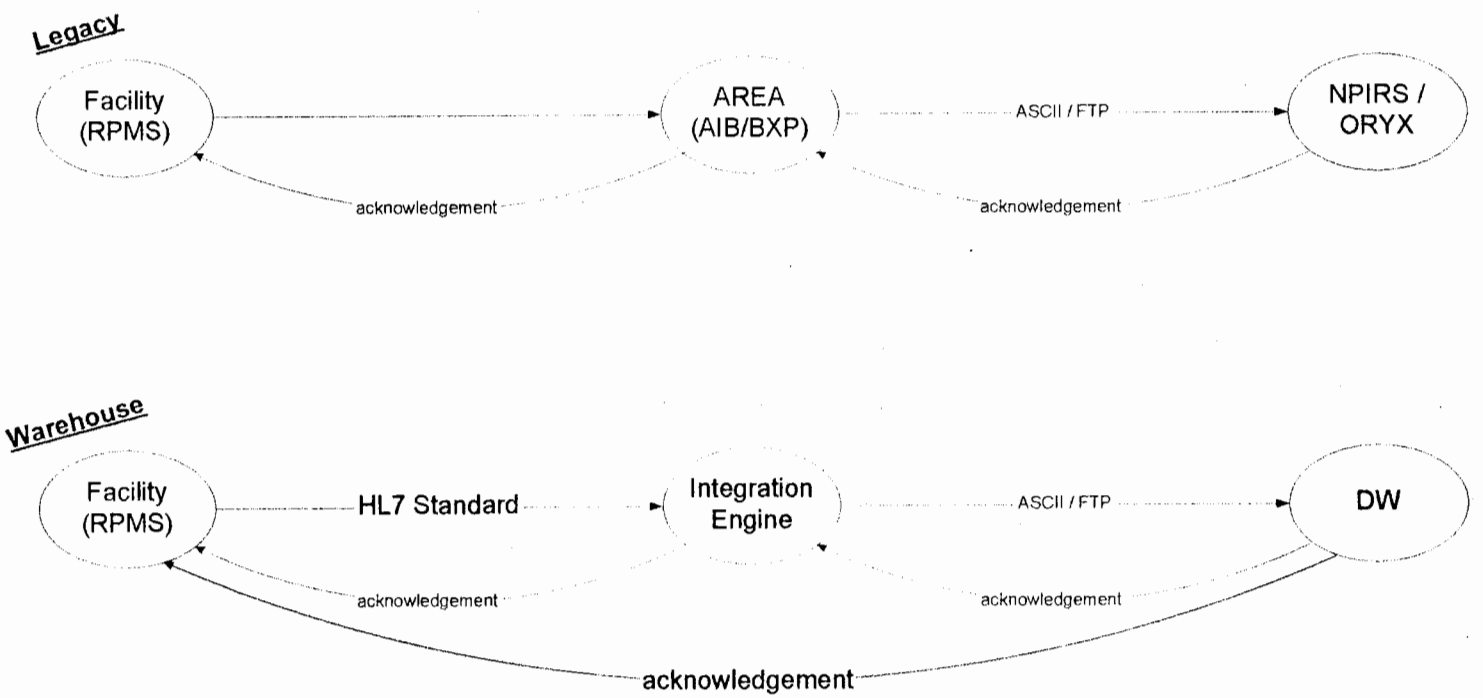
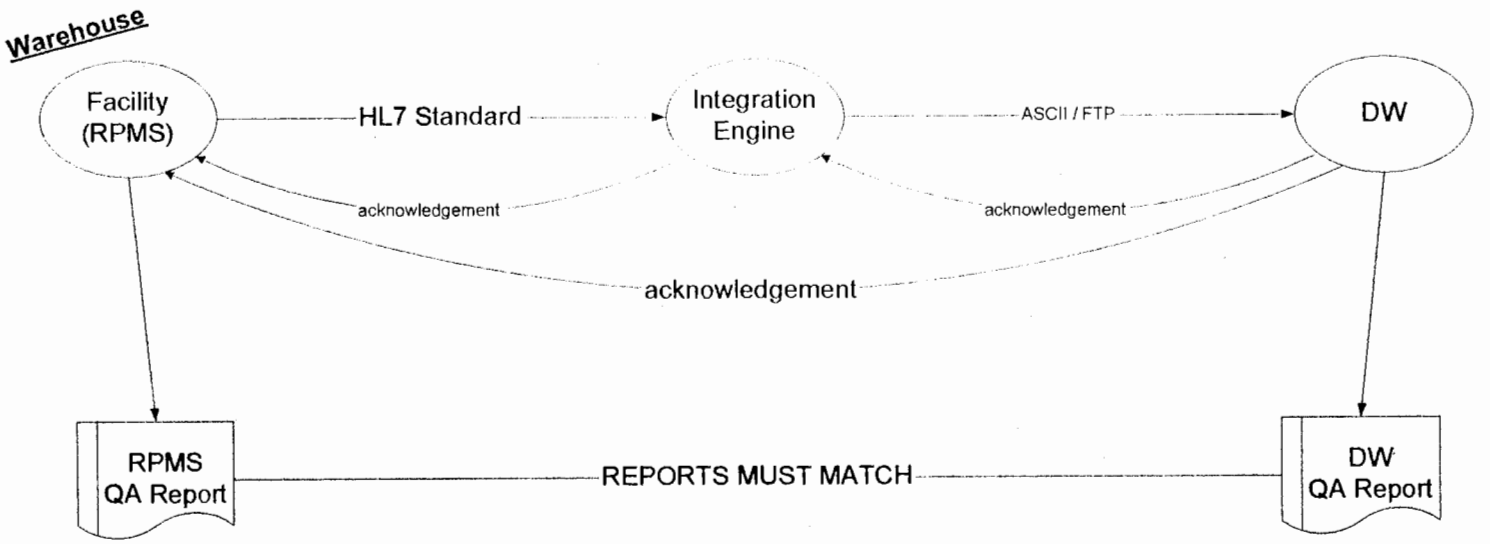
- Each Area's load schedule is dependant upon the successful completion of the previous Area's data load.



- Data will be exported and transmitted using HL7 standards.
- Data will no longer be transmitted to the Area Office.
- AIB / BXP processing is no longer necessary.
- Export processing will continue to be supported by Cimarron Medical Informatics.
- Preliminary checks on the file will be performed when the file arrives at the DW. An acknowledgement will be sent to the originating facility to "close the loop."



- Initial Data Load will be verified at the facility level by using the QA Reports.
- Error reporting, data tracking, and integrity checking will be performed and reported via the web site.
- Data will be processed as close to original format as possible.
