

INSTALLATION NOTES FOR LABORATORY SERVICE PATCH 17 KIDS FORMAT

PREFIX: LR, LA, AND BLR
CURRENT VERSION: 5.2 KIDS PATCH 17 10/14/2003

*****NOTE*****NOTE*****NOTE*****NOTE*****NOTE*****NOTE*****NOTE*****
* READ THE ENTIRE NOTES FILE PRIOR TO ATTEMPTING ANY INSTALLATION! *
*****NOTE*****NOTE*****NOTE*****NOTE*****NOTE*****NOTE*****NOTE*****

1. GENERAL INFORMATION

- a). Print all notes/readme files. Users may remain on the system during the installation. The installation time should take only a few seconds while routines are being restored. We always recommend a complete backup before any patches are installed. Verify that you have a current backup. Laboratory Patch 16 (LR*5.2*1016) must have previously been installed to install this patch. The PCC link (BLRLINK) will NOT need to be stopped. This patch is NOT cumulative. If you receive a <CLOBR> error during the install, the patch may not have installed correctly. If so reinstall the patch.
b). It is recommended that the terminal output during installation be captured using an auxport printer attached to the terminal where you are performing the patch installation. This will ensure a printed audit trail if any problems should arise.
c). This install fixes a cache error which occurred only on cache systems which had micros rejected. This patch fixes an error occurring when cancelling a CREATININE test that had the GFR calculation attached to it. This patch also contains a fix to an error which occurred when exiting the POV prompts while deleting a test.
d). The following routines are included with this patch:
BLRLINKP
BLRDIAG
BLREXECU

2. CONTENTS OF DISTRIBUTION

- a). lr_0520.17n - Notes file for installation of this patch.
b). lr_0520.17k - Kids Patch routines. Note: This patch will install 3 routines.

3. REQUIREMENTS

LR*5.2*1016
FileMan 21
Kernel 8.0

4. INSTALLATION INSTRUCTIONS

- a). Log in as a system manager and go to programmer mode. D ^XUP and choose the option KERNEL INSTALLATION AND DISTRIBUTION
b). Choose option INSTALLATION, and LOAD the kids patch lr_0520.17k
c). Install the patch choosing LR*5.2*1017 See example process below.

***** Example Installation Script: *****

[PRD, DHC]>D ^XUP

Setting up programmer environment
Terminal Type set to: C-VT100

Select OPTION NAME: XPD MAIN Kernel Installation & Distribution System
 Edits and Distribution ...
 Utilities ...
 Installation ...

Select Kernel Installation & Distribution System Option: INStallation

- 1 Load a Distribution
- 2 Verify Checksums in Transport Global
- 3 Print Transport Global
- 4 Compare Transport Global to Current System
- 5 Backup a Transport Global
- 6 Install Package(s)
- Restart Install of Package(s)
- Unload a Distribution

Select Installation Option: L0ad a Distribution
Enter a Host File: c:\lr__0520.17k

KIDS Distribution saved on Oct 22, 2003@06:48:02
Comment: minor fixes

This Distribution contains Transport Globals for the following Package(s):
LR*5.2*1017

Want to Continue with Load? YES//
Loading Distribution...

Want to RUN the Environment Check Routine? YES//
LR*5.2*1017
Will first run the Environment Check Routine, BLRPRE17

Hello, TIM FRAZIER

Checking Environment for Patch **1017** of Version 5.2 of LR.

Need at least FileMan 21.....FileMan 21.0 Present

Need at least Kernel 8.0.....Kernel 8.0 Present

Patch 1016 of version LR 5.2 Has Been Previously Installed.....OK to continue

ENVIRONMENT OK.

Has a SUCCESSFUL system backup been performed??? NO// y YES

BACKUPS CONFIRMED BY FRAZIER, TIM ON OCT 22, 2003 AT 07:32
Use INSTALL NAME: LR*5.2*1017 to install this Distribution.

- 1 Load a Distribution
- 2 Verify Checksums in Transport Global
- 3 Print Transport Global
- 4 Compare Transport Global to Current System
- 5 Backup a Transport Global
- 6 Install Package(s)

lr_0520_17n.txt

Restart Install of Package(s)
