

Colposcopy Training

To make colposcopic follow-up of an abnormal Pap test more readily available to American Indian and Alaska Native women, the IHS Division of Epidemiology and Disease Prevention (DEDP) continues to sponsor basic and advanced colposcopy training for primary care providers (including physicians, nurse practitioners, physician assistants, and certified nurse midwives).

The teaching format includes lecture, case and small group discussions, slide reviews, and some hands-on with patient models. The Basic Colpo workshop is offered every other year while the Refresher/Advanced Colpo workshop is offered every year. Please call Roberta at 505-248-4132 for more info.

2011 Training in Albuquerque, NM

Refresher Colposcopy: 2 days - usually in Spring
