## 2007 Health Summit Goals

The 2007 Phoenix Area Indian Health Service Health Summit will focus on the impact of methamphetamine on our families, community, and environment. The summit presents the latest data on national and local trends and highlights best practice prevention strategies, research, and treatment.

- Understand the extensive impacts of methamphetamine in Indian country.
- Exchange collaborative efforts/dialogue to address methamphetamine issues.
- Stimulate partnerships to address meth at local, state, and national levels.
- Share best practices and innovative prevention strategies against methamphetamine use.

## Topics

- What is methamphetamine? The Clinical Implications and A General Overview
- Psychological Impacts of Methamphetamine Addiction and Treatment
- Tribal Perspective on Methamphetamine in Indian Country
- The Judicial System and Juvenile Courts
- Methamphetamine Abuse and Adolescents
- Environmental Issues and Methamphetamine Labs
- Tribes Taking Action
- Native Traditional Approaches to Healing or Spiritual Issues in After Care
- Schools and Education
- The Next Steps & Connecting to Resources

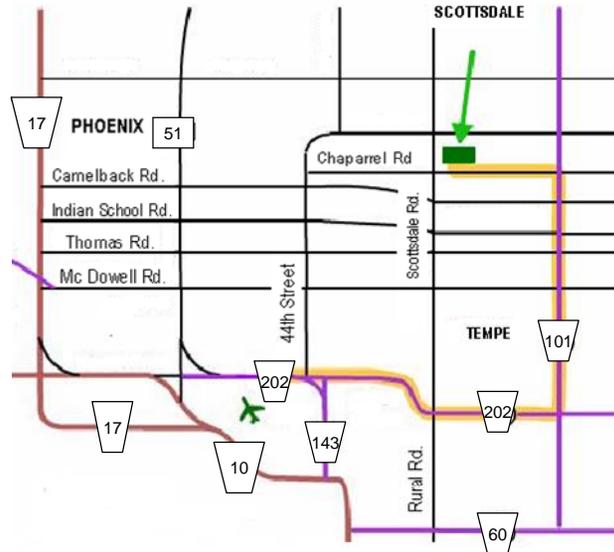

## Who Should Attend?

The target audience for this event includes: youth, families, community members, physicians, nurses, behavioral health providers, tribal health directors, tribal leaders, and other health professionals.
