SUBJECT: FY 2007 IHS Outpatient Statistics with Comparison to FY 2006

This memorandum provides statistical data on FY 2007 outpatient visits (OPVS) and primary care provider visits (PCPVS) in comparison to FY 2006. Some of the increases or decreases can be attributed to facilities reporting for the first time into the NPIRS NDW databases. Tables A and C describe OPVS for IHS and Tribal Facilities by Areas, whereas Tables B and D show PCPVS for the same facilities. Some service units or facilities had significant variances in their workload compared to the prior fiscal year.

OUTPATIENT VISITS (OPVS)

When compared to FY 2006, OPVS for IHS facilities fell slightly by 1.0 percent in FY 2007. Among the IHS facilities, Nashville Area showed the largest increase with 57.0 percent, having gone from 5,465 to 8,578 OPVS in a single year. This was mostly due to continuing expansion of workload at the Catawba facility. This was followed by Tucson Area with 9.1 percent and Bemidji Area with 5.9 percent. IHS facilities OPVS in Oklahoma Area decreased by 9.1 percent and Albuquerque by 2.3 percent. See Attached Table A.

When compared to FY 2006, OPVS for Tribal facilities increased by 10.5 percent in FY 2007. The Nashville Area posted the largest increase of 48.0 percent. Other than the Nashville Area, the Tribal facilities of the Billings and Bemidji Areas demonstrated the greatest gains, 36.1 percent and 26.9 percent, respectively. Albuquerque Area's tribal facilities experienced an 11.2 percent decrease, and Tucson, a 5.3 percent decline. See attached Table C.

PRIMARY CARE PROVIDER VISITS (PCPVS)

When compared to FY 2006, PCPVS for IHS facilities decreased by 3.8 percent in FY 2007. The IHS facilities in Nashville showed the largest increase with 34.3 percent, having gone from 4,515 to 6,872 PCPVS in one year. As stated above, the continuing expansion in workload at the Catawba facility appears to have caused this rise in PCPVs. Bemidji and Tucson Areas experienced the second and third largest increases of 7.5 and

PRIMARY CARE PROVIDER VISITS (PCPVS) - CONTINUED

5.2 percent, respectively. The PCPVS of the Portland Area IHS facilities declined by 16.7 percent, and Oklahoma Area facilities decreased by 13.9 percent. In addition, Billings Area facilities decreased by 6.2 percent. See attached Table B.

When compared to FY 2006, PCPVS for Tribal facilities increased by 1.4 percent in FY 2007. The greatest increase, 41.7 percent, in PCPVS occurred in the Nashville Area. Bemidji and Billings Area's Tribal facilities also gained in PCPVS by 19.0 and 16.9 percent, respectively. Aberdeen, Alaska, and Tucson Areas' Tribal facilities showed the greatest declines with 11.9, 6.8, and 5.8 percent, respectively. See attached Table D.

Additional OPVS and PCPVS statistical data for FY 2007 are provided in the attached detailed tables. Tables 1 and 2 provide OPVS and OCPVS for IHS and Tribal facilities by Area and service unit, respectively. Tables 3 and 4 provide OPVS and PCPVS for IHS and Tribal hospitals and health centers by Area, respectively.

If you have any questions about the outpatient statistics, please contact Ms. Edna Paisano, Director, Division of Program Statistics, at (301) 443-1180 (Edna.Paisano@ihs.gov) or Mr. Kirk Greenway, Patient Care Statistics Team Leader, at (301) 443-1180 (Kirk.Greenway@ihs.gov).
