

RESOURCE AND PATIENT MANAGEMENT SYSTEM

Patient Registration

(AG)

Installation Guide

Version 7.1
August 2005

Office of Information Technology (OIT)
Division of Information Resources
Albuquerque, New Mexico

Preface

The Indian Health Service (IHS) Patient Registration application is the basis of most RPMS software, providing for the entry of new patients and editing of those already registered at a facility. Patient registration is very important to third party billing of patient care. Appropriate caution and checking should be employed to ensure that accurate data is maintained by patient registration and, subsequently, transmitted to the National Patient Information Resource System (NPIRS).

This software application will work in conjunction with the existing Resource and Patient Management (RPMS) applications. The distribution of the package will be IHS-wide.

Security

This package does not impose any additional legal requirements on the user, nor does it relieve the use of any legal requirements. Names and social security numbers used in the examples are fictitious.

This package requires access and verify codes to access the system. These can be obtained from your supervisor or site manager. In addition, security keys are assigned with your access codes. They are required to perform certain options in the Patient Registration application. Some options within the application are “locked”, i.e., the user is unable to access the option without the appropriate security key. A list of the security keys new to version 7.1 can be found in section 4.1.

1.0 Introduction

This guide contains complete instructions for installing the Patient Registration program version 7.1 and setting up the initial parameters for operation. Please refer to the AG technical manual, reference guide, and user's manual for further information about this program.

1.1 General Information

Please print and read all notes/ read me files before installing this software.

We recommend capturing terminal output during the installation using an auxport printer attached to the terminal on which you are performing the software installation. This will ensure a printed audit trail if any problems arise.

A screen capture of a sample install is at the end of these notes. Note that this capture is from a pre-release build, and dates, times, and comments will differ from what you actually see during install. A screen capture of the components and fields included in the KIDS BUILD is at the end of these notes.

Many new functions and features have been added to Patient Registration v7.1. Among these are changes to field definitions and requirements, automatic error checking of fields as they are displayed on the edit screens, site specific designation of mandatory fields, verification tracking, detailed and summary error reports, MSP forms and interview options, display of eligibility dates etc

1.2 Contents of Distribution

- ag__0710.k - KIDS formatted distribution file
- ag__071i.pdf - Installation Guide
- ag__071t.pdf - Technical Manual
- ag__071u.pdf - User Manual

1.3 Requirements

- Kernel (XU) v8.0 Patch 1009 or later
- FileMan (DI) v21 or later
- Patient Registration (AG) v7.0 through patch 5
- AUT v 98.1 through patch 15
- AUPN v 99.1 through Patch 15

2.0 Installation Instructions

In all UCI's running IHS Patient Registration:

1. Ensure no one is using any PtReg option. Option AGMENU will be disabled during the install, and restored to its existing configuration during the post-install.
2. Save the existing AG* routines for backup.
3. Load the distribution (ag__0710.k) into KIDS and install. An example screen capture of a typical install is included in section 3.0.

3.0 Screen Capture of Sample Installation

4.0 Post-Installation and Setup

4.1 Security Key Setup

The revised Edit Patient File option contains security keys based on the type of information on the Edit Patient File pages. You will need to assign security keys to users based on the type(s) of information they should be able to access. If a user attempts to access an Edit Patient File page he/she does not have a security key for, an alert message will appear on the screen and the user will be returned to the page selection screen.

Page	Name	Key
Page 1	Elig/Identifiers	AGZEDITPAGE1
Page 2	Religion/Tribal data/Employment	AGZEDITPAGE2
Page 3	Emerg Contact/Parents/Next of Kin	AGZEDITPAGE3
Page 4	Insurance Summary Medicare Medicaid Railroad Retired Private Insurance	AGZEDITPAGE4
Page 5	Benefits Coordination	AGZEDITPAGE5
Page 6	Veteran's Information	AGZEDITPAGE6
Page 7	Death Info/Other Names	AGZEDITPAGE7
Page 8	Additional Registration Information	AGZEDITPAGE8
Page 9	Document Summary	AGZEDITPAGE9

Note: It is highly recommended that the **AGZTXALL** key be removed from all users until such a time as exercise of the option is directed. This key controls the AGX → ALL menu option (Export All Patients for Data Repository), an option that should only be used at the request of a site's Area, National Programs, or HQ offices.

5.0 Contact Information

If you have any questions or comments regarding this distribution, please contact the OIT Help Desk (IHS).

Phone: (505) 248-4371 or (888) 830-7280 (toll free)
