

**PCC+ Templates**

Although one of the strengths of the PCC+ application is the ability to fully customize new integrated forms, it has been recognized that certain data fields and formats are most effective. Implementing a new process is difficult enough for a facility without having the added burden of designing a new form from scratch.

Beta sites strongly recommended that basic forms, or templates, be provided for the initial PCC+ implementation. Template development is being sponsored by the CIMTAC (Clinician Information Management and Technology Advisory Council), a clinical advisory group to ITSC. A panel of clinical and business specialists will identify and review a variety of existing forms for each of the topics. The panel will ensure that the final form design complies with clinical guidelines, billing requirements, recommended minimum data fields, reporting requirements, and other considerations.

Several templates have been in development since August 2001. Additional templates will be identified by user request and prioritized from CIMTAC recommendations to ITSC.

| Template Name                     | Status/Comments (as of 3/19/02)                 | Release Date |
|-----------------------------------|---|--------------|
| Ambulatory Care                   | Released  | 12/10/01     |
| Women's Health                    | Released  | 12/10/01     |
| Diabetes Foot Exam, Annual        | Released  | 3/14/02      |
| Diabetes Foot Exam, Comprehensive | Released  | 3/14/02      |
| Physical Exam                     | Released  | 3/19/02      |
| Elder Care                        | In draft – under review by Elder Care Workgroup | Est. 3/30/02 |
| Diabetes                          | Released  | 3/19/02      |
| ER                                | Form returned to developer for further work     | TBD          |
| Optometry                         | In final production                             | Est. 3/30/02 |
| Pharmacy                          | In draft – under review by Pharmacy PSG         | Est. 3/30/02 |
| Well baby                         | In design                                       | TBD          |

Proposed additional templates:

- |                                   |                        |                                  |
|-----------------------------------|------------------------|----------------------------------|
| Adult History and Physical        | Field Health           | Prenatal                         |
| Allergy                           | Gastroenterology       | Public Health Nurse              |
| Audiology (with audiograms etc.)  | Genetics/Dysmorphology | Pulmonary (Adult and Pediatric?) |
| Cardiology (Adult and Pediatric?) | Mental health          | Rheumatology                     |
| Case Management                   | Nephrology             | STD                              |
| Chronic Disease – generic         | Neurology              | Surgery                          |
| Dental                            | Nutrition              | Urology                          |
| ENT (with diagrams)               | Orthopedics            | Visit-Planning                   |
|                                   | Phone Call             |                                  |
|                                   | Physical Therapy       |                                  |

Templates as well as recommended data fields for any customized PCC+ form can be found at [www.ihs.gov/CIO/pccplus](http://www.ihs.gov/CIO/pccplus).
