

4-1.3 DECISION NO. D-15

TRANSIENT VOLTAGE SURGE SUPPRESSION

Issue:

Guidelines are needed for design and installation practices which will assure reliable, cost effective, and quality facility electrical power for sensitive electronic equipment in Indian Health Service and Tribal Facilities. Technologically advanced electronics, communications equipment, and devices which are now routinely incorporated in facilities must be operationally dependable.

Decision:

The draft technical handbook chapter , "Electrical Power Quality," was introduced and approved subject to editorial revision.

Reference:

Copies of the draft chapter can be obtained from the Office of Environmental Health and Engineering, Division of Facilities Planning and Construction. This document will be issued as Chapter 3 - Electrical Power Quality, Part 7, Volume III, of the Technical Handbook for Health Facilities.

Adopted by HFAC on April 5, 1995.

Gary K. Radtke, P.E.
Chairman, HFAC
