

DEPARTMENT OF HEALTH & HUMAN SERVICES

Public Health Service

Indian Health Service
Rockville MD 20852

November 21, 2007

TO: Deputy Assistant Secretary
Office for Facilities Management and Policy

FROM: Director
Division of Facilities Operations

SUBJECT: FY-2007 Energy Report

I am responding to your request for the FY-2007 Energy Report.

Per your direction, these reports are being sent electronically to Mr. Pete Aitcheson, Department of Health and Human Services Energy Officer. The report is organized in the following manner:

- I. IHS Annual Energy Narrative Report
 - A. FY-2007 OPDIV Energy Management Data Report
 - B. FY-2007 OPDIV Excluded Facilities Inventory

If you have any questions regarding the report, please contact CDR Gordon Delchamps, P.E., Division of Facilities Operations, at (301) 443-1367.

/ James R. Biasco /

James R. Biasco P.E.
Director, Division of Facilities Operations

IHS Annual Energy Narrative Report

I. Management and Administration

A. Energy Management Infrastructure

1. Senior OPDIV Official

The senior Agency Official is the Director, Division of Facilities Operations. This person supervises the Agency's Energy Coordinator.

2. OPDIV Energy Team

The Agency Energy Team consists of 12 Area Offices (Aberdeen, Albuquerque, Alaska, Bemidji, Billings, California, Nashville, Navajo, Oklahoma, Portland, Phoenix, Tucson) and 2 Regional Offices (Engineering Service (ES) in Dallas and Seattle). The 12 Area Offices and 2 Engineering Services Offices each have a designated Energy Coordinator who is supervised by the applicable Area Facility Engineer or ES Director.

Area	Energy Coordinator
Aberdeen	Monica Macek
Albuquerque	Deanne Waconda
Alaska	Gary Kuhn
Bemidji	Peter Hartmann
Billings	Robert Biddle
California	Phil Church
ES-Dallas	Suresh Shah
ES-Seattle	Pedro Valverde
Headquarters	Gordon Delchamps
Nashville	George Styer
Navajo	Nate Morris
Oklahoma	Ken McKenzie
Phoenix	Mike Jensen
Portland	Mathew Martinson
Tucson	Jennifer Proctor

Aberdeen: Kathy Mercure, P.E., together with input from Delton Woodford, P.E., and Monica Macek, provide guidance to the Project Engineers and Facility Managers at the service unit level to achieve the requirements of E.O. 13423 and EPA Act 2005. The Aberdeen Area is preparing a recruit for an Energy Engineer to lead the effort in 2008 and will form an Energy Team following placement of the Energy Engineer.

Alaska: Alaska employs an Area energy coordinator to collect and report data to the Tribal Health Organizations (THO's) and IHS Headquarters. The coordinator seeks energy saving program and project opportunities and works directly with the THO Facility Managers through the Maintenance and Improvement Resource Allocation Committee (MIRAC) to implement energy conservation measures and training. The Alaska Area has concluded six energy audits out of the seven hospital campuses serving American Indians and Alaska Natives in Alaska. The MIRAC determined that funding for completion of energy audits and up-dates and leaves projects up to the individual THO's to address energy conservation in their hospitals. The collective magnitude of cost needed to address energy needs, approximately \$2.4 million reported in 2006 for the audited hospitals, is now required to be sought outside of the IHS M&I Project Pool, or at least supplemented. But of course this does not address all healthcare facilities, but only a fraction of them in Alaska. To a large degree, the ECM's we continue to implement just offset the major increased energy requirements for providing the proper patient environment.

Albuquerque: The Area Energy Manager coordinates the energy program with the District Facility Engineers and Project Managers under the supervision of the Area Health Facilities Director. The Energy Manager is responsible for preparing all reports, maintaining the utility database, and coordinating projects and activities with the Facility Engineers and Project Managers. The Facility Engineers are responsible for managing their energy consumption and reporting any improvements, recommendations, or fluctuations. The Project Managers are responsible for coordinating energy and energy-related projects with the Facility Engineers.

November 21, 2007

- Bemidji:** Bemidji Area Energy Team is comprised of 4 members. Bemidji Area Facility Engineer is responsible for entering data compiled by facility managers at Red Lake, White Earth and Cass Lake.
- Billings:** Burke Helmer, P.E., CFM, Energy Coordinator, assists the facility managers at the service unit level to achieve the requirements of E.O. 13423 and EAct 2005.
- California:** There are no Federally-owned facilities in this Area.
- Nashville:** The Nashville Area team consists of George Styer and Allen Bollinger. Energy saving projects are suggested when there are renovations being made to buildings.
- Navajo:** Members of the Areas energy team include Nathaniel Morris, Navajo Area Office, Jonathan Flannery, Gallup Indian Medical Center, Ricardo Murga, Fort Defiance Indian Healthcare, and Orson Quoshena, Navajo Area Office. The team provides monthly highlights to other service units that also have established an energy team to distribute any energy information.
- Oklahoma City:** Members of the Area's team include a General Engineer, a Staff Facilities Engineer, three Facility Engineers, three Facility Managers along with Maintenance Mechanics and Electricians.
- The team's responsibilities include advocacy for energy conservation and implementation of measures that conserve electricity, natural gas, and water.
- An example of part of the team's interactions with cross-functional teams designated to expedite the implementation of E.O. 13423 and EAct 2005 include work with architects and engineers and contractors on pursuit, and attainment, of LEED Silver certification on a project at the Lawton Indian Hospital.
- An overview of the building-related aspects of E.O. 13423 was forwarded to members of our energy team.
- Highlights of E.O. 13423 Implementing Instructions (that are applicable to health facility engineers and managers) were forwarded to members of our energy team. These highlights are listed below.
- Ensure that major renovations comply with
http://www.energystar.gov/ia/business/Guiding_Principles.pdf (Federal Leadership In High Performance and Sustainable Buildings Memorandum of Understanding).
- Report the Lawton Expansion project to the High Performance Federal Buildings Database (<http://www.eere.energy.gov/femp/highperformance/index.cfm>).
- Maintain waste prevention and recycling programs in a cost-effective manner.
- Designate a recycling coordinator at each facility.
- Document proper recovery of refrigerants and become more aware of the EPA Significant New Alternative Policy program (<http://www.epa.gov/ozone/snap/fact.html>) and review and perhaps revise our policies on personal property and building service equipment that contain refrigerants.
- Reduce water consumption intensity (intensity meaning gallons per gross square foot of building space and surrounding land) 2% annually and try to document or estimate the quantity.
- Purchase WaterSense labeled products (<http://www.epa.gov/watersense/basic/index.htm>).
- Reduce energy consumption intensity (intensity meaning energy consumption per gross square foot of building space) 3% annually.
- Consider use of the ENERGY STAR Portfolio Manager rating tool (http://www.energystar.gov/index.cfm?c=evaluate_performance.bus_portfoliomanager) to track energy and water use.
- Estimate geothermal savings from the Pawnee Health Center Life Cycle HVAC Comparison since this is an on-site thermal renewable.
- Continue to implement an EMS at Tahlequah and work towards achieving full implementation by Dec. of 2008.
- Facilities personnel, whose actions are affected by this E.O., receive initial awareness training and refresher training.
- Submit nominations for worthy awards.

Conserve gasoline when driving a GSA vehicle.

Phoenix: The Energy Officer responsibility has changed hands during 2007. The current task is to coordinate the annual energy report that is sent to the service units in template form and completed by each of the twelve service unit facility managers. The facility managers are advised of training and webinars when appropriate.

Portland: Team Members:
Brian Daily – Energy Coordinator
Mat Martinson - Acting Director Facilities
PAO Engineering Staff (Facility Managers, Facilities Engineers)
Portland Area Facilities Board

The Energy Coordinator has the responsibility to understand E.O. 13423 and EPAAct 2005 requirements and to convey the requirements to all other parties. Energy Coordinator carries the responsibility to track energy use and goal achievements. During project development the PAO facility engineering staff will identify future projects to reach energy goals and accomplishments. Approvals of projects are granted by the Facilities Board.

Tucson: The Energy Management Officer works under the direct supervision of the Area Facilities Engineer. Efforts are coordinated thru periodic meetings with the Facility Managers. Throughout the year awareness e-mails and flyers were broadcast Area-wide in an attempt to reduce energy and water consumption. No formal energy team exists.

B. Management Tools

1. Awards (Employee Incentive Programs)

HHS Individual Energy Efficiency/Energy Management Award –

Dr. Michael Alpert, Network Administrator, Oklahoma City Area Office

Dr. Michael Alpert is the Network Administrator at the Oklahoma City Area Office. Dr. Alpert realized there was a large amount of energy wasted in the office by computer monitors being left on 24 hours per day that could be prevented by using the EPA EZSave software, a government designed and supported program that adjusts monitor settings to the most energy efficient level. After downloading and installing the software to test two offices, he determined substantial savings could be realized by using the power management tool, particularly across the entire Area Office. The estimated electricity cost savings was \$15,707 per year for Area Office computers. The savings increase to \$98,169 per year for the estimated 2435 computers in the entire Oklahoma City Area. Therefore, the Area Office strongly recommended and advocated that all Area Site Managers and Network Administrators implement EZSave at their locations based upon Dr. Alpert's procedures for installation, configuration, download, and activation of the utility via secure Internet file transfer site.

HHS Small Group Exceptional Service Award –

Lawton Indian Hospital Health Facility Expansion

Ken McKenzie, General Engineer
Bobbie Gonzalez, Acting Director, DFACM
Mitch Baroff, Architect
Hickory Starr, CEO
Harry Taylor, Planning Officer
Bonnie Hicks, Contracting Officer

This group from the Oklahoma City Area Office and the Lawton Indian Hospital has worked diligently to expand the primary care clinical space at Lawton Indian Hospital and meet the energy conservation and environmental stewardship attributes set forth under the Leadership in Energy and Environmental Design (LEED) rating system. In early FY-2003, the engineers and architects collected information on the LEED certification and strongly advocated compliance with the rating criteria for the pending expansion project to the contracting officer and CEO of the Lawton Indian Hospital. The small group became aware of the advocacy at higher levels within the government to include sustainable design features when constructing capital assets as outlined in the Sustainable Buildings Memorandum of Understanding. The group decided that the 3340 gross square meter expansion at the Lawton Indian Hospital should pursue LEED Silver certification. The annual energy savings of the proposed sustainable design over the standard baseline design is an 11.9 percent reduction for electricity and a 41.6 percent reduction for natural gas.

HHS You Have the Power Energy Champion –

Ken McKenzie, General Engineer, Oklahoma City Area Office

Twenty-First Century Citizenship is being championed by general engineers like Ken McKenzie of the Oklahoma City Areas Office who, by reducing consumption of potable water, is helping HHS save more than 3,282,000 liters of water per year.

The following two projects were nominated for, but did not receive, Presidential Awards for Leadership in Federal Energy Management:

Energy Efficiency/Energy Management Award for a small group - Yakima IHS Energy Conservation Project.

Energy Efficiency/Energy Management Award for an individual - Ken McKenzie - Replace One Steam Boiler and Two Water Heaters.

- Aberdeen: The Area submitted one Engineer for a DOE Federal Energy Management Award and is currently evaluating the performance at 17 IHS operated facilities to determine which facility experienced the most reduction in energy use for FY-07. Two small cash awards will be provided.
- Alaska: ANTHC and associated Tribal managers are beginning to look at employee incentive programs for energy conservation; no significant action has been undertaken to date.
- Albuquerque: Departmental awards, the annual Area Director's Awards Program, and Certificates of Appreciation are used to recognize individuals and/or programs instrumental in energy efficiency and energy programs. An energy component has been included in designated employee's performance appraisals.
- Bemidji: The Bemidji Area did not distribute awards for energy during 2007.
- Billings: The Billings Area Office has continued with the Energy Awards Program open to all employees within the Billings Area. The program has four different award categories that either an individual or a group of individuals can submit a project for. Three of the awards are cash awards and the fourth is a Service Unit Award that can receive \$25,000 of M&I money to supplement their facility program. All potential award nominations are submitted to the Area Office for review by a registered engineer and must have an attractive Life Cycle Cost Analysis. The projects must then be initiated by the service unit with cooperation by the Area Office. Nominations for the annual HHS Energy and Water Management Awards and DOE's Federal Energy Management Awards are available to all employees for submission.
- California: There are no Federally-owned facilities in this Area.
- Nashville: None
- Navajo: N/A
- Oklahoma City: The OKC Area IHS had a small group receive a HHS Energy and Water Management Award. The OKC Area IHS had an individual receive a HHS Energy and Water Management Award. The OKC Area IHS had an individual receive, in 2007, an HHS 2006 Energy Champion Award from the Federal Energy Management Program.
- Two facilities management employees at the Lawton Indian Hospital were nominated as a group for the IHS National Director's Award for their initiative on installing a waterless urinal in support of E.O. 13423 but they did not receive the award.
- A team nomination (for pursuit of LEED Silver certification for the Expansion project at the Lawton Indian Hospital) was submitted for a White House Closing the Circle Award but the team did not receive the award.
- Phoenix: The Area currently has no employee incentive program unique to energy. We rely on Commissioned Corps or Civilian Personnel awards for exceptional performance.
- Portland: Awards for facilities management and energy efficiency efforts are encouraged and sought. The Performance Management Appraisal System (PMAP) is the civil service evaluation system that provides awards for exceptional performance. Energy savings is a consideration at all times because saved energy equates to reduced operating costs and increased resources for mission delivery.
- Tucson: None to report.

2. Performance Evaluations

- Aberdeen: The PMAP for the Director, Division of Facilities Management contains criteria for Greening the Government and Energy Management on which he is evaluated within the standard performance process. At least two Facility Managers have similar language in their PMAPs.
- Alaska: All energy managers are nationally certified and given continuous education to maintain their certification(s).
- Albuquerque: A component has been added to the Facility Engineers duties. Responsibility for the energy program is also included in the performance evaluation of the designated Area Energy Manager.
- Bemidji: Energy management and reporting is included in the position description of the Assistant Area Facility Engineer for the Bemidji Area. Evaluations are then based on the performance of those items as listed in the position description.
- Billings: The Deputy Director of Facilities Management currently has the responsibility of Energy Coordinator and all the duties associated with it. The performance of those duties are evaluated by the Director of Facilities Management during his/her annual review.
- California: There are no Federally-owned facilities in this Area.
- Nashville: None
- Navajo: Currently, there is no position description/evaluation on a senior energy official. It was appointed to me by my director. What I have completed was implemented members to serve as lead energy members at the Area level. We have had monthly conference calls during the beginning of the year. We also established teams at the service unit level to be aware of the energy usage, goals, plans, info, etc.
- Oklahoma City: The Area Energy Coordinator has energy conservation and sustainability as critical elements in his HHS Employee Performance Appraisal Plan.
- Phoenix: The Energy Officer is currently the responsibility of the Chief of the Operations Branch. The implementation of the program is considered in his evaluation.
- Portland: All elements of Real Property Asset Management (including energy efficiency) are cascaded.
- Tucson: None to report.

3. Training and Education

The Indian Health Service provided the Association of Energy Engineers' Comprehensive Energy Management Course to 14 IHS and one tribal staff. At the end of the course, thirteen IHS and the one tribal employee took the Certified Energy Manager (CEM) exam. Six IHS employees and the one tribal employee passed. With these newly certified energy managers, there are now eight IHS CEM's and two tribal CEM at various levels of the organization.

- Aberdeen: The Project Engineer and one Facility Engineer attended Comprehensive Energy Management Training from the Association of Energy Engineers in July, 2007. Both were certified.
- Training is encouraged for all Facility Managers and lead technicians. Staff attended various JCI Metasys system training and electrical and mechanical courses throughout the year.
- Alaska: Continuous education through Indian Health Service trainings, AEE, and other training organizations are encouraged for ANTHC and Tribal facility staff. The Area-wide energy manager maintains certification as a Certified Energy Manager (CEM) by direct funding of continuous education programs and industry conferences supported by ANTHC.
- Albuquerque: Training is encouraged and provided to all Health Facilities staff. Staff attended various DDC, Commissioning, Electrical, and Mechanical courses throughout the year. Staff also participated in a series of one day courses offered through the PNM Energy Academy.
- Information from the Department and various sources on ENERGY STAR and overall energy efficiency are disseminated to the Facility Engineers and Area employees. The DOE and FEMP packets, flyers, and posters are provided to the service units for their use.
- Bemidji: Energy training opportunities are announced to staff. Department of Energy on-line training has been utilized. Energy training programs offered by the local utilities are also utilized.

November 21, 2007

- Billings: Training is available to all service unit facilities staff and provided through the National Environmental Health Support Center in addition to the numerous third party training courses available nationally. Facilities personnel are encouraged to attend energy management training.
- California: There are no Federally-owned facilities in this Area.
- Nashville: All new maintenance employees are briefed in energy saving efforts by the Nashville Area Energy team.
- Navajo: No action has been taken for appropriate personnel to receive training. Nathaniel Morris and Jonathan Flannery have received training for CEM course.
- Oklahoma City: Activities undertaken to ensure that all appropriate personnel receive training for energy management requirements included 11 people attending a DHHS sponsored Facility Energy Management Training course on October 12, 2006. The intended audience included Building Engineers/Operations, Building Managers, and Facilities Mechanical/Electrical Engineers. Topics included Sustainability, Energy Policy, and Goals; Sustainability Rating Systems; Technologies and Practices for Sustainability in New Buildings; Planning and Programming Design Approaches; Renewable Energy; Retro-commissioning for Energy Efficiency, and Building Commissioning.
- Another activity included Comprehensive Energy Management Training from the Association of Energy Engineers in July of 2007 for two Area Office engineers, one facility engineer, and one facility manager.
- Enhanced Commissioning (via an Energy and Atmosphere Credit under LEED Version 2.2) training was provided to six people as part of our pursuit of LEED Silver certification on a project. Topics included HVAC Fundamentals, Fans, Air Systems, Pumps, Hydraulics, and Control Systems.
- An updated fact sheet ENERGY STAR Quantity Quotes (formerly named The ENERGY STAR Bulk Purchasing Tool) was shared with contracting colleagues in September of 2007.
- Information on the 2008 ENERGY STAR Award application packages being due December 14, 2007 was shared with colleagues.
- One Area Office engineer attended a one-day energy training course entitled "A Focus on E.O. 13423 and ESPC" that was sponsored by the Office for Facilities Management and Policy.
- Phoenix: Three individuals were sent to the Certified Energy Management training during 2007. Certification as a CEM was awarded to one of the individuals. Numerous Webinars were attended by staff throughout the Area. ENERGY STAR products are specified in renovations projects and equipment purchases. The Area is encouraging the use of motion sensor light switches and programmable thermostats.
- Portland: Facility Managers, Energy Coordinators, and Facility Maintenance Staff are encouraged to enroll in training that is applicable to energy conservation. The training may be technical hands-on training, energy manager training, energy savings performance contracts, metering training, etcetera. Annual facility training hosted by the Area Office is conducted in the spring, and a component regarding energy conservation is usually incorporated into the training. In 2007, the facility managers requested a presentation by the U.S. Green Building Council or the Green Building Initiative. Portland Area Indian Health Service was able to secure a speaker from the Green Building Initiative (i.e. Green Globes). Additionally, at the 2007 workshop, one of the facility engineers provided a presentation on his efforts to implement solar lighting in the Service Unit parking lot.
- Tucson: One Facility Manager received training from the Association of Energy Engineers and received the CEM.

II. Energy Efficiency Performance

A. Energy Intensity Reduction Performance

1. Goal Subject Buildings

Per EPAAct 2005, IHS is required to report on energy consumption and the progress toward meeting the two percent per year consumption reduction goal from an FY-2003 baseline. In FY2003, IHS consumed a total of 1,311,076 MMBTU or 199,616 BTU/GSF. In FY-2006, IHS consumed a total of 1,183,000 MMBTU or 179,697 BTU/GSF. In FY-2007, IHS consumed a total of 1,216,500 MMBTU or 180,287 BTU/GSF if renewable energy credits are not factored in and 177,377 BTU/GSF if renewable energy credits are factored in.

Including Renewable Energy Credits –

Baseline Year: IHS has reduced usage from 199,616 BTU/gsf in FY-2003 to 177,377 BTU/gsf in FY-2007. This represents a reduction of 11.1 percent.

Previous Year: IHS has reduced usage from 179,475 BTU/gsf in FY-2006 to 177,377 BTU/gsf in FY-2007. This represents a reduction of 1.2 percent.

Excluding Renewable Energy Credits –

Baseline Year: IHS has reduced usage from 199,616 BTU/gsf in FY-2003 to 180,287 BTU/gsf in FY-2007. This represents a reduction of 9.7 percent.

Previous Year: IHS has increased usage from 179,697 BTU/gsf in FY-2006 to 180,287 BTU/gsf in FY-2007. This represents an increase of 0.3 percent.

Some fluctuation may be due to several facilities entering and leaving the inventory during the year and these facilities are not included in the reporting data. Also, there are several new staff gathering and reporting data from Area Offices and there may be some differences in methodology from previous gathering and reporting methods.

The FY-2003 baseline was mutually agreed upon by IHS and DHHS.

2. Excluded Facilities

See Attachment B for a listing of excluded facilities with their associated exclusion codes.

3. Non-fleet Vehicle and Equipment Fuel Use

All fuel consumption data is collected by GSA through the use of their FAST program.

B. Renewable Energy

1. Self-generated Renewable Energy

- | | |
|--------------|--|
| Aberdeen: | The new Sisseton Health Center is heated and cooled primarily using a closed loop ground source system. This increases the efficiency of the system and enables a reduction in the use of fossil fuels. |
| Alaska: | ANTHC has assisted tribal managers to conduct energy audits, wind studies, and co-generation studies looking at alternative energy sources for incorporation into the hospital utility systems on an annual basis. |
| Albuquerque: | No facilities to report that meet the requirements. |
| Bemidji: | The White Earth Health Center generates electricity on-site with a diesel generator during peak electrical load periods. |
| Billings: | None to report. |
| California: | There are no Federally-owned facilities in this Area. |

Nashville:	None
Navajo:	Currently the new design of the Kayenta healthcare facility will incorporate LEED principles.
Oklahoma City:	Area efforts to encourage generation of electricity from renewable energy sources included the purchase of 735 MWh of renewable energy certificates. Area efforts to optimize generation of thermal energy from renewable energy sources include improvements to a geothermal heat pump system at a health center.
Phoenix:	The Area does not currently use electricity from self-generated or renewable sources.
Portland:	Options for renewable energy sources rely primarily with solar energy. Due to the small size of the clinics and property in scattered locations primarily within rural towns, wind power is not possible at a large scale. Life Cycle Cost for Photovoltaics is high due to cost of current PV technology. There is a possibility of great benefit from solar water heating at facilities that use hot water for showering. Portland Area invested in a feasibility study for geothermal application on the east side of the Cascade Mountains on the Yakama Indian Reservation. Investment payback period was well beyond 30+ yrs, and capital costs were prohibitive without special energy funding.
Tucson:	None to report.

2. Purchased Renewable Energy

Aberdeen:	The Aberdeen Area continues to purchase 20% of their electrical usage from hydroelectric sources and 3% of their electrical usage from wind turbine sources.
Alaska:	The Alaska tribes are beginning to pursue renewable energy. The Maniilaq Health Center in Kotzebue, AK, purchases electrical power from a local utility that produces electricity with wind generators. About 10% of the utility power available is wind generation for users of the electric utility system. This represents about 700 MBTU's of the over 3000 MBTU's consumed at the hospital are from renewable wind sources.
Albuquerque:	The Albuquerque Indian Health Center and Santa Fe Indian Hospital continue to purchase 10% of their electrical usage from wind energy.
Bemidji:	The Bemidji Area did not purchase any renewable energy directly. However, local utilities are receiving portions of their power from wind turbine farms.
Billings:	The Billings Area purchased renewable energy certificates representing 3% of the Area's electrical consumption. The certificates were issued by 3 Phases Climate Solutions, Inc. and procured through the Defense Energy Support Center.
California:	There are no Federally-owned facilities in this Area.
Nashville:	None
Navajo:	Local utility does not have any areas supporting purchases through REC.
Oklahoma City:	The OKC Area purchased renewable energy in the form of Renewable Energy Certificates. The approach taken was to have the solicitation issued by the Defense Energy Supply Center along with the contract award.
Phoenix:	The Area does not currently use electricity from self-generated or renewable sources.
Portland:	No renewable energy purchases occurred in FY-2007. Currently, it appears that purchase of renewable energy options would increase operating costs at service units and federal facilities, and in an extremely resource-constrained environment, such purchases would compromise the environment of care associated with our health care mission. We are committed to continuing to look at this requirement, and we are currently looking for creative ways to purchase renewable energy in 2008.
Tucson:	None to report.

C. Water Conservation

The Indian Health Service has developed a draft water management plan. It is being updated to reflect new requirements and when revised will be sent out for review and comment.

- Aberdeen: The Area used an estimated 38M gallons in 2007. Currently there are very few facilities with usage tracking capabilities. Funding was provided to meter 1/3 of the staff quarters with a plan to meter the remainder in the next 2 years. Low-flow products are being utilized in all upgrades. Best Management Practices are encouraged of all facilities.
- Alaska: Alaska THO's are beginning to collect water consumption data and address water efficiency projects at the hospitals, in one instance in Dillingham, AK. At the Kakanak Hospital a study and design is underway to improve the water production process and reduce the water discharge through improvements in the backwash water treatment process. This facility develops and produces its own water for consumption at the hospital as does the YKHC hospital in Bethel. Facility managers in Bethel are pursuing similar steps this next fiscal year.
- Albuquerque: The cost for water for 2007 amounted to \$143K for an estimated 19 million gallons. Water data is available for the Area's facilities that are the largest users. However, the Zuni Hospital's water data was not available for a four month period while the tribe upgraded their utilities. Water is estimated for several small clinics on tribal land. Water cost is negotiated at these facilities with the designated tribal entities. Most of these are at a set cost regardless of usage. The Santa Fe Hospital replaced all their toilets/urinals/faucets with low flow and/or waterless products.
- Bemidji: The Bemidji Area has a water management plan, and utilizes meters to track water usage. Water using devices in the facilities are reviewed to identify leaks or other problems that could increase water usage.
- Billings: The Area spent approximately \$93,000 on water and sewer costs but water is not currently metered on most facilities and therefore the actual consumption figure is an unknown. Best Management Practices are encouraged to be used at the service units including the installation of water efficient devices.
- California: There are no Federally-owned facilities in this Area.
- Nashville: Water consumption data has been included with the Energy Data.
- Navajo: Information was provided to all service units to incorporate water efficiency.
- Oklahoma City: An activity undertaken to improve water efficiency included installation of a waterless urinal at the Lawton Indian Hospital.
- Facility Management staff at the W.W. Hastings Indian Hospital installed 2 additional touchless water faucets and 2 automatic flushing fixtures.
- Our facility management employees at hospitals and health centers are aware that per E.O. 13423 we are to reduce water consumption intensity (relative to our FY-2007 water consumption baseline) by 2% annually beginning in FY-2008 through the end of FY-2015 (or by 16% by the end of FY-2015).
- Our facility management employees at hospitals and health centers are aware of a device that recycles "greywater" for reuse in toilet flushing so that water that goes down a bathroom sink can be filtered, disinfected, and used to flush a toilet (with a supplement of fresh water if needed) and not be cross connected to fresh water or inhibit a backflow prevention device.
- Phoenix: One of the service units has installed waterless urinals and will report on the effectiveness in the upcoming year.
- Portland: Most water utilities are provided on a lump sum basis.
- Tucson: Meters at San Xavier were removed for repair and the meter at Sells Hospital does not function properly. Water use data cannot be collected at this time. The Tucson Area is charged a flat monthly rate for each Installation regardless of water use. Low water (Xeriscape) landscape plants were utilized at the facilities. New landscape plans were developed to minimize water consumption through utilizing native desert plants. Implementation of the plan is dependent on funding from the Area.

D. Metering of Electricity Use

The completed IHS Metering Plan was submitted to the Department as were the IHS Advanced Electrical Metering Specifications. All standard meters required by the plan have been installed. Advanced meters are installed in 29.76 percent of the required space exceeding the required five percent goal. Five additional advanced meters are scheduled to be installed in FY-2008. One hundred percent of IHS electrical consumption is metered.

E. Federal Building Energy Efficiency Standards

Aberdeen:	Design was initiated in 2006 for a replacement facility at Eagle Butte, South Dakota. The building is expected to exceed Federal building efficiency standards. It is planned to utilize a closed loop ground source system for heating and cooling. The Winnebago Drug Dependency Unit design was also initiated/completed in 2007 and was designed to meet or exceed the Federal building efficiency standards.
Alaska:	Not Applicable.
Albuquerque:	No facilities to report that meet this requirement.
Bemidji:	No Federal buildings in the Bemidji Area were designed during FY-2007.
Billings:	The housing project at Fort Belknap for 25 new residential units is currently being designed and the units are expected to meet the Federal building efficiency standards.
California:	There are no Federally-owned facilities in this Area.
Nashville:	No new buildings.
Navajo:	N/A
Oklahoma City:	No new buildings (Federally owned) in the OKC Area had designs beginning in FY-2007 and therefore there aren't any expected to meet or exceed the Federal building efficiency standards.
Phoenix:	The Area has not started design of new federally owned buildings in 2007.
Portland:	Not applicable to Portland Area. Portland Area looks forward to the opportunity to apply the Commissioning Process (ASHRAE Guideline 0-2005) to new construction, thereby optimizing efficiency and effectiveness of the facility.
Tucson:	None to report.

III. Implementation Highlights of FY 2007

A. Life-Cycle Cost Analysis

Aberdeen:	A Life-Cycle Cost Analysis was performed to determine the best system for heating and cooling the Eagle Butte replacement facility. The Project Engineers perform a life cycle cost analysis when designing projects.
Alaska:	All hospital energy audits include a life-cycle analysis of all proposed energy conservation measures. This information is used to assist the Tribal Management staff with the knowledge to select the best projects and prioritize their implementation.
Albuquerque:	The Project Managers perform a life-cycle cost analysis when reviewing projects and services.
Bemidji:	Best management practices are utilized to conserve water. Low-flow fixtures and ENERGY STAR products are reviewed when purchasing. Life-cycle cost analysis was utilized to determine payback period for lighting fixture ballast replacement at the Red Lake Hospital.
Billings:	Life-Cycle Cost Analysis is required on any project being nominated under the Area's Energy Awards Program and is used on an as needed basis.
California:	There are no Federally-owned facilities in this Area.

Nashville:	Energy improvements are performed based on the life-cycle cost. Any items with short pay back periods are strongly encouraged.
Navajo:	Currently GIMC boilers will be monitored for steam generated and the actual building usage. Life-cycle cost analysis will be used to determine if current boilers are over-sized.
Oklahoma City:	<p>A procedure in place to ensure the use of life-cycle cost analysis in making investment decisions about construction includes a requirement for LCCA in scopes of work for engineering design services such as for a boiler replacement. An example where life-cycle cost analysis was used in capital budgeting decisions concerning energy efficiency included a decision on the type of new chiller plant.</p> <p>Challenges of implementing life-cycle cost effective energy conservation projects that will pay back investment costs within 10 years include time constraints, budget constraints, and changing priorities.</p>
Phoenix:	The Area is not using life-cycle cost analysis in making investment decisions. The Area is inventorying the real property equipment and encouraging the service units to replace equipment that has exceeded the estimated useful life.
Portland:	<p>Portland Area has undertaken a strategic approach to investment decisions in our federal facilities. The Portland Area Indian Health Service drew upon input from stakeholders at service units and in the Area Office to develop the FY-2008 Facility Engineering Program Plan. This plan specifically identifies four initiatives aimed at ensuring that investments are made in a manner that clearly demonstrates a return on those investments and alignment with Mission. Life-cycle costs are considered.</p> <p>The 2008 Facility Engineering Program Plan for Portland Area contains a 1-page "Portland Area M&I Investment Plan". The Program Plan and the Investment Plan were formally presented to the Portland Area Facilities Board on July 31, 2007. The "Portland Area M&I Investment Plan" was justified to the Board in terms of life-cycle cost thinking and strategic investment. The "Portland Area M&I Investment Plan" includes an efficiency evaluation projects, a test and balance/commissioning project and a sustainability study project - all which will include ROI and/or payback period considerations/thinking.</p>
Tucson:	No report.

B. Retrofits and Capital Improvement Projects

Aberdeen:	<p>Installation of new boiler modules at Wagner and Ft. Thompson; Installation of new controls at Ft. Thompson; Implementation of Service Contract with Rasmussen Mechanical Services for Life-Cycle Analysis, PM and calibration of boilers, chillers, HVAC equipment at 5 hospitals; Implementation of Service Contract for Metasys system PMI to ensure effectiveness and efficient operations at Eagle Butte, Belcourt, Kyle, Pine Ridge, Rapid City, Rosebud, Ft. Thompson, and Sisseton; Installation of closed loop ground source heatpump to provide heating and cooling in the Lower Brule clinic; Repair by Replacement of inefficient Mental Health Building in Ft. Totten; Repair by Replacement of inefficient staff quarters in Ft. Yates; Replaced inefficient cooling compressors in Belcourt; Replaced inefficient windows in 39 staff quarters at Rosebud; Replaced roof/increased insulative value at Wagner Health Center; Replaced roof/increased insulative value at Ft. Thompson Health Center.</p>
Alaska:	In the Alaska Area a new boiler plant at the Kakanak Hospital is under way which, with the energy efficiency improvements alone, will reduce fuel oil consumption used to produce heating for the hospital by 6 to 9 percent as soon as the plant comes on-line in 2009.
Albuquerque:	An Area-wide reroofing project was conducted throughout the year that included increasing the R-value of each roofing system. Although some facilities were limited by architectural/engineering constraints, all roofs should provide better efficiency. DDC systems have been provided and/or enhanced at several facilities. As major components (boilers, pumps, etc.) were replaced or retrofitted, the appropriate controls to add to the DDC systems were also provided. Five facilities now have DDC systems.
Bemidji:	The Bemidji Area continually seeks projects to reduce energy consumption. Life-cycle cost analysis is utilized during project planning to identify energy reduction and payback periods.
Billings:	Installed new boiler controls at the Blackfeet Community Hospital and installed a new gas water

- heater at the Fort Washakie Health Center.
- California: There are no Federally-owned facilities in this Area.
- Nashville: The Unity Healing Center is currently undergoing a major renovation. Old inefficient fuel oil fired boilers are being replaced with higher efficiency Natural Gas Boilers. All exterior walls were previously un-insulated and consisted of rock and brick. All exterior walls will be furred out to accommodate R-19 insulation. Old recessed incandescent light fixtures are being replaced with fluorescent lights. Old Storefront glass panels are being replaced with thermally broken panels.
- Navajo: N/A
- Oklahoma City: An Area effort to improve energy efficiency and reduce energy consumption with a capital improvement project included installing an ENERGY STAR labeled Roof on the Expansion project at the Lawton Indian Hospital along with pursuit of LEED Silver certification of this project under version 2.2 of LEED which required compliance with ASHRAE Standard 90.1-2004.
- Facility Management staff at the W.W. Hastings Indian Hospital installed 30 T-8 light fixtures that replaced T-12 light fixtures.
- Department of Energy software programs (A Chilled Water System Analysis Tool, a Steam System Scoping Tool, and a Steam System Analysis Tool) were used at the Claremore Indian Hospital and the Lawton Indian Hospital.
- Phoenix: The Area is inventorying the real property equipment and encouraging the service units to replace equipment that has exceeded the estimated useful life. The Area is encouraging the use of motion sensor light switches and programmable thermostats.
- Portland: Portland Area has projects underway as follows:
- An insulation project at the Wellpinit Service Unit (Installation 11553, Building 0006).
- DDC controls retrofit at the Western Oregon Service Unit (Installation 11540, Building 00022)
- Attic Fans to reduce summer cooling loads at the Yakama Service Unit (Installation 19712, Building 00027)
- Existing Building Commissioning at the Yakama Service Unit (Installation 19712, Building 00027)
- Tucson: None to report.

C1. Energy-Savings Performance Contracts (ESPCs)

- Aberdeen: Previous ESPC contract was not successful.
- Alaska: Not Applicable. ANTHC and tribes do not use ESPC's.
- Albuquerque: No ESPC's to report. Energy audits are planned for the fiscal year. The FEMP SAVEnergy Audits for Santa Fe and Mescalero were not completed. No new information from DOE on the status of the final reports. New audits will be conducted for these two facilities.
- Bemidji: The Bemidji Area does not currently have any ESPC's.
- Billings: None to report.
- California: There are no Federally-owned facilities in this Area.
- Nashville: No ESPC's.
- Navajo: N/A
- Oklahoma City: None
- Phoenix: No ESPC's are used within the Area.
- Portland: PAO facilities are below the size range of applicable benefit for ESPC's.
- Tucson: N/A

C2. Utility Energy Services Contracts (UESCs)

Aberdeen:	None to report.
Alaska:	Not Applicable. ANTHC and tribes do not use UESC's.
Albuquerque:	No UESC's to report.
Bemidji:	The Bemidji Area does not currently have any UESC's.
Billings:	None to report.
California:	There are no Federally-owned facilities in this Area.
Nashville:	No UESC's.
Navajo:	N/A
Oklahoma City:	None
Phoenix:	The Area did not use Utility Energy Services Contracts.
Portland:	Benefits of UESC's are being explored. No special funding for energy audits or surveys has been received in FY-2007 nor has any been requested in FY-2008. Energy Audits or efficiency evaluations are proposed for Colville Service Unit, Warm Springs Service Unit, and the Healing Lodge of the Seven Nations using Maintenance and Improvement funds.
Tucson:	N/A

D. Use of ENERGY STAR® and Other Energy-Efficient Products

Aberdeen:	All procurement staff have been instructed to ensure that the use of ENERGY STAR and energy efficient products are purchased when replacement or upgrades are needed. CHEMS training was provided and is currently utilized at Pine Ridge, Rosebud, Rapid City and Eagle Butte to varying degrees.
Alaska:	All design reviews orchestrated through ANTHC have an operational and energy efficiency review effort conducted on the plans and specifications through their development. This insures that ENERGY STAR, National Energy Policy objectives and energy efficient products and processes are incorporated into the building designs.
Albuquerque:	The procurement and specification of ENERGY STAR and energy efficient products are recommended and included by the HF project managers and engineers. Information is made available to all and is updated as necessary.
Bemidji:	The Bemidji Area promotes the use of ENERGY STAR products and uses product energy ratings to assist in product selection. Product energy ratings are included in project specifications.
Billings:	The Area promotes the purchase of ENERGY STAR products through the specifications used on all design and procurement projects.
California:	There are no Federally-owned facilities in this Area.
Nashville:	When making purchases ENERGY STAR products are reviewed.
Navajo:	All purchases through procurement on all equipment have the ENERGY STAR label.
Oklahoma City:	An updated fact sheet on ENERGY STAR Quantity Quotes (formerly named The ENERGY STAR Bulk Purchasing Tool) was shared with contracting colleagues in September of 2007. Information on the 2008 ENERGY STAR Award application packages being due December 14, 2007 was shared with colleagues. A link (http://www1.eere.energy.gov/femp/newsevents/fempfocus_subscribe.cfm) to subscribe to the FEMP Focus Newsletter was forwarded to members of our energy team.
Phoenix:	The ENERGY STAR products are incorporated in the standards specs.
Portland:	Energy efficiency criteria will be incorporated into renovation projects in 2008. No ENERGY STAR equipment was purchased in 2007.
Tucson:	None to report.

E. Sustainable Building Design and High-Performance Buildings

IHS incorporates the principles of the Federal Leadership in High Performance and Sustainable Buildings Memorandum of Understanding. The design of the Kayenta replacement facility began in FY-2007 and when constructed will be both LEED and Green Globes certified. All buildings whose designs started in FY-2007 will meet or exceed the Federal building efficiency standards. A listing of buildings whose designs began in FY-2007 can be found in Attachment A.

- Aberdeen: Sustainable building design principles have been incorporated into the siting, design, and construction of new facilities and expansions in:
Pine Ridge: hospital expansion;
Eagle Butte: replacement facility;
Sisseton: replacement facility;
Winnebago: drug dependency unit;
Lower Brule: addition/renovation;
Ft. Thompson: vestibule addition;
Ft. Yates: hospital expansion/renovation.
- Alaska: All building designs have an operational and energy efficiency review effort conducted on the plans and specifications through their development to ensure their sustainability. This makes sure National Energy Policy objectives and energy efficient and sustainable products and processes are incorporated into the building designs.
- Albuquerque: PSD's for two proposed new facilities within the Albuquerque Area include language and cost estimates regarding energy efficiency as required.
- Bemidji: The Bemidji Area did not have any Federal Buildings constructed or designed during FY-2007.
- Billings: None to report.
- California: There are no Federally-owned facilities in this Area.
- Nashville: No New Facilities.
- Navajo: New Kayenta design will incorporate LEED.
- Oklahoma City: Sustainable building design principles were incorporated into the siting, design, and construction of an Expansion project at the Lawton Indian Hospital. This project sought, and has now obtained in FY-2008, LEED Silver certification. Credits earned on this project include: Construction Activity Pollution Prevention, Site Selection, Brownfield Redevelopment, Alternative Transportation - Bicycle Storage & Changing Rooms, Alternative Transportation -Low-Emitting and Fuel-Efficient Vehicles, Alternative Transportation - Parking Capacity, Site Development - Maximize Open Space, Heat Island Effect - Roof, Light Pollution Reduction, Water Efficient Landscaping -Reduce by 50%, Water Efficient Landscaping - No Potable Use or No Irrigation, Water Use Reduction - 20% Reduction, Fundamental Commissioning of the Building Energy Systems, Minimum Energy Performance, Fundamental Refrigerant Management, Optimize Energy Performance modeling results that demonstrated a 12.1% savings relative to an ASHRAE 90.1-2004 Appendix G baseline building, Enhanced Commissioning, Enhanced Refrigerant Management, Green Power -two-year contract showing a purchase of 735,000 kWh of renewable energy over two years would provide 72% of the 510,470 kWh annual electricity use as estimated by the revised energy modeling results which satisfied the minimum 35% needed to earn this credit, Storage & Collection of Recyclables, Construction Waste Management - Divert 50%, Construction Waste Management -Divert 75%, Recycled Content - Specify 10% with a combined recycled content value of 10.3% of the total materials by cost, Local/Regional Materials - 10% Extracted, Processed & Manufactured Regionally with the overall submittal demonstrating that 22.5% of the total project's materials by cost were manufactured and extracted within 500 miles of the project site, Local/Regional Materials - 20% Extracted, Processed & Manufactured Regionally, Minimum IAQ Performance, Environmental Tobacco Smoke Control, Outdoor Air Delivery Monitoring, Construction IAQ Management Plan During Construction, Construction IAQ Management Plan Before Occupancy, Low-Emitting Materials - Paints and Coatings, Low-Emitting Materials - Carpet, Indoor Chemical & Pollutant Source Control, Controllability of Systems - Lighting with individual lighting controls provided for 91.2% of the building occupants, Thermal Comfort Design, Thermal Comfort - Monitoring, Innovation in Design -Green Education, Innovation in Design - Green Housekeeping, Innovation in Design -Exemplary Performance, 70% Green Power with 72% of the building's regulated electric usage being supplied by renewable power that meets the definition of Green-e, Innovation in Design - Low-Emitting Furniture, and a LEED Accredited Professional.
- Phoenix: None to report.
- Portland: A common set of performance objectives essential to creating high-performance sustainable buildings has been identified and will provide a consistent set of criteria for the Portland Area Health Facility Program as new facilities are planned, designed and constructed.

These objectives, in addition to existing legislation and Executive Orders, will help to:

- Reduce the total ownership cost of facilities through life-cycle costing;
- Encourage energy efficiency and water conservation;
- Enhance energy security;
- Provide safe, healthy, productive work environments;
- Promote environmental stewardship.

Many of these performance criteria build on the US Green Building Council's LEED™ rating system (Leadership in Energy and Environmental Design). In our view, they represent best-practice approaches for implementing LEED in the Federal sector.

Integrated Design Practices –

Use a collaborative, integrated design approach that:

- Encompasses energy, water, siting, materials, and indoor environmental goals;
- Involves all relevant parties working together from the start;
- Establishes and documents comprehensive design goals at the beginning of the project.

Optimize Energy Performance –

Energy Efficiency: Set a design target to reduce the energy cost budget by 20% compared to the levels required by the current ASHRAE/IESNA Standard 90.1. Energy use in renovations of existing buildings should be reduced by 10%.

Commissioning: Employ total building commissioning practices starting in the pre-design phase of projects to establish clear Owner's Project Requirements that serve as a compass through design, construction, start-up, testing, training and operations.

Measurement and Verification: Install continuous metering equipment on major HVAC, lighting, and water-using equipment to track and optimize performance.

After one year of occupancy, verify that all new or renovated buildings earn a score of 75 or higher using the ENERGY STAR® Benchmarking Tool (for all building or space types covered by ENERGY STAR®).

Indoor water: Employ strategies that in aggregate use 30% less water than the water use baseline calculated for the building (not including irrigation) after meeting the Energy Policy Act of 1992 fixture performance requirements.

Outdoor water: Use native plants and Xeriscaping, high-efficiency irrigation technology, captured rainwater, or recycled site water to reduce potable water consumption for irrigation by 50% over conventional means.

Enhance Indoor Environmental Quality –

Thermal Comfort: Meet the current ASHRAE Standard 55, Thermal Environmental Conditions for Human Occupancy, for thermal comfort standards including humidity control within established ranges per climate zone.

Daylighting: Achieve a minimum Daylight Factor of 2% (excluding all direct sunlight penetration) in 75% of all space occupied for critical visual tasks.

Indoor Air Quality: Meet the minimum requirements of the current ASHRAE 62, Ventilation for Acceptable Indoor Air Quality and approved addenda, using the Ventilation Rate Procedure.

Reduce Entryway Contaminants: Employ permanent entryway systems (grills, grates, etc.) to capture dirt, particulates, etc. from entering the building at all high volume entryways.

Low-Emitting Materials: Specify materials that are low in volatile organic compounds (VOC) in construction and operation documents, for adhesives and sealants, paints (under coatings and topcoats), carpet systems, and furnishings, based on LEED credit guidelines, SMACNA recommendations, ASHRAE Standard 52, and other relevant criteria as determined by each agency.

Protect Indoor Air Quality during Construction –

During construction, meet or exceed the recommended Design Approaches of the Sheet Metal and Air Conditioning Contractors' National Association (SMACNA) IAQ Guideline for Occupied Buildings under Construction, 1995, Chapter 3. After construction ends and prior to occupancy, conduct a minimum three-day building flush-out at 100% outside air (or maximum outdoor air while achieving a relative humidity not greater than 60%).

Materials –

Recycled Content. Use materials with recycled content such that post-consumer recycled content constitutes at least 10% of the total value of the materials in the project or combined post-consumer and ½ post-industrial recycled content constitutes at least 20%.

Waste Management During Construction. Recycle or salvage at least 50% of construction, demolition and land clearing waste where a market exists.

Tucson: None to report.

F. Energy Efficiency/Sustainable Design in Lease Provisions

Aberdeen: None to report.

Alaska: Not Applicable.

Albuquerque: Tribes were encouraged to utilize sustainable building design and incorporate energy efficiency in the construction of two new facilities.

Bemidji: The Bemidji Area utilizes leased office space for the field offices. Sustainable building principles are reviewed and considered when choosing space.

Billings: None to report.

California: There are no Federally-owned facilities in this Area.

Nashville: When selecting a site to lease newer buildings are preferred over older buildings as they are more energy efficient.

Navajo: N/A

Oklahoma City: Instructions for Implementing Executive Order 13423 (along with specific reference to Page 26) was provided and advocated for during the revision of Chapter 33-12 on Lease Management. GSA included a clause in the Solicitation for Offer for our new OKC Area Office building that addresses energy cost savings and water conservation and offerors were encouraged to use Energy Savings Performance Contracts to maintain or exceed the ENERGY STAR Building Benchmark score of 75.

Phoenix: ENERGY STAR compliance is included in new leases.

Portland: Portland Area's leases are primarily through GSA. Portland Area has little ability to select the leased property, as GSA manages placement. Furthermore, GSA handles the Real Property Asset Management of the GSA Buildings.

The Nespelem (Colville) clinic was leased in March 2007. It is not a certified ENERGY STAR Building.

The Warm Springs Health and Wellness Center is leased through a Joint Venture Agreement. The Confederated Tribes of the Warm Springs are the Asset Manager of this facility.

Tucson: No report.

G. Distributed Generation, including combined cooling, heating, and power systems

Aberdeen: New generators were provided for Wanblee and Newtown to allow capabilities for peak load shedding as well as the provision of continual utilities. The generator for the Sisseton facility (BOC 4/2007) was sized to allow full standby power. An agreement was reached to allow for discontinuation of normal power when needed, lowering the cost from \$0.085/kWh to \$0.024/kWh.

Alaska: The facility staff at the Bethel, Kakanak and Manillaq hospitals have engaged studies in wind generation alternatives to look at projects that can directly benefit the healthcare delivery system by becoming more sustainable by using alternative generation sources, and less fossil fuel dependent.

Albuquerque: Solar outdoor lighting was installed at the San Felipe Clinic for the parking area.

Bemidji: No new generation technologies were installed in the Bemidji Area during FY-2007.

November 21, 2007

Billings:	None to report.
California:	There are no Federally-owned facilities in this Area.
Nashville:	None.
Navajo:	N/A
Oklahoma City:	N/A
Phoenix:	None to report.
Portland:	Yakama Indian Health Center (Yakama Service Unit) is in the process of installing solar-powered outdoor parking lights.
Tucson:	None to report.

IV. Data Tables and Inventories

A. FY 2007 Annual Energy Management Data Report

See Attachment A.

B. Excluded Facilities Inventory

Attachment B is a listing of excluded facilities with their associated exclusion codes.

Attachment A

FY 2007 OPDIV Energy Management Data Report

Indian Health Service FY 2007 Energy Management Performance Summary

Goal Performance

Energy Management Requirement	FY 2003 Btu/GSF	FY 2007 Btu/GSF	Percent Change 2003 - 2007	FY 2007 Goal Target
Reduction in energy intensity in facilities subject to the EPACT and E.O. 13423 goals	199,616	177,377	-11.1%	-6.0%

Renewable Energy Requirement	Renewable Electricity Use (MWH)	Total Electricity Use (MWH)	Percentage	FY 2007 Goal Target
Eligible renewable electricity use as a percentage of total electricity use	3,109.2	161,548.0	1.9%	3.0%

Water Intensity Reduction Goal	FY 2007 Gallon/GSF	FY 2007 Goal Target	Baseline Status
Reduction in potable water consumption intensity	35.8	NA Base Year	Preliminary

Metering of Electricity Use	Cumulative # of Buildings Metered	Cumulative % of Electricity Metered	FY 2012 Goal Target
Standard Electricity Meters in FY 2007	832	86.8%	100%
Advanced Electricity Meters in FY 2007	Reporting Begins FY 2008	Reporting Begins FY 2008	Maximum Extent Practicable
Percentage of agency metering plan milestones met in FY 2007:	100%		

Federal Building Energy Efficiency Standards	Percent of New Building Designs	FY 2007 Goal Target
Percent of new building designs started in FY 2007 that are 30 percent more energy efficient than relevant code, where life-cycle cost effective:	100%	100%

Investments in Energy and Water Management

Sources of Investment	Investment Value (Thou. \$)	Anticipated Annual Savings (Million Btu)
Direct obligations for facility energy efficiency improvements	\$1,828.3	4,042.8
Investment value of ESPC Task/Delivery Orders awarded in fiscal year	\$0.0	0.0
Investment value of UESC Task/Delivery Orders awarded in fiscal year	\$0.0	0.0
Total	\$1,828.3	4,042.8

	Percentage
Total investment as a percentage of total facility energy costs	8.3%
Financed (ESPC/UESC) investment as a percentage of total facility energy costs	0.0%

FY 2007 OPDIV ENERGY MANAGEMENT DATA REPORT

OPDIV Indian Health Service

Prepared by: CDR Gordon Delchamps, P.E., CEM

Date: 21-Nov-07

Phone: 301-443-1367

PART 1: ENERGY/WATER CONSUMPTION AND COST DATA

1-1. EPACT/E.O. 13423 Goal Subject Buildings

Energy Type	Consumption Units	Annual Consumption	Annual Cost (Thou. \$)	Unit Cost (\$)	Site-Delivered Btu (Billion)	Est. Source Btu (Billion)	Est. GHG Emissions (MTCO _{2e})	
Electricity	MWH	161,548.0	\$13,668.0	\$0.08 /kWh	551.2	1,914.3	106,884	
Fuel Oil	Thou. Gal.	1,241.0	\$3,325.0	\$2.68 /gallon	172.1	172.1	12,626	
Natural Gas	Thou. Cubic Ft.	396,678.0	\$3,659.0	\$9.22 /Thou Cu Ft	409.0	409.0	21,737	
LPG/Propane	Thou. Gal.	766.0	\$1,213.0	\$1.58 /gallon	73.2	73.2	4,560	
Coal	S. Ton	0.0	\$0.0	#DIV/0! /S. Ton	0.0	0.0	0	
Purch. Steam	BBtu	0.0	\$0.0	#DIV/0! /MMBtu	0.0	0.0	0	
Other	BBtu	11.0	\$252.0	\$22.91 /MMBtu	11.0	11.0	0	
		Total Costs:	\$22,117.0		Total:	1,216.5	2,579.6	145,806
Goal Subject Buildings (Thou. Gross Square Feet)		6,747.3			Btu/GSF:	180,287	382,313	
					Btu/GSF w/ RE Purchase Credit:	177,377	372,209	
					Btu/GSF w/ RE & Source Btu Credit:	177,377	372,209	

1-2. EPACT/E.O. 13423 Goal Excluded Facilities

Energy Type	Consumption Units	Annual Consumption	Annual Cost (Thou. \$)	Unit Cost (\$)	Site-Delivered Btu (Billion)	Est. Source Btu (Billion)	Est. GHG Emissions (MTCO _{2e})	
Electricity	MWH	0.0	\$0.0	#DIV/0! /kWh	0.0	0.0	0	
Fuel Oil	Thou. Gal.	0.0	\$0.0	#DIV/0! /gallon	0.0	0.0	0	
Natural Gas	Thou. Cubic Ft.	0.0	\$0.0	#DIV/0! /Thou Cu Ft	0.0	0.0	0

Other	BBtu	0.0	\$0.0	#DIV/0! /MMBtu	0.0	0
		Total Costs:	\$0.0		0.0	0

Optional 1-3a. Fleet Vehicle Consumption and Costs Captured by the FAST System

(Input reflects format of Section IV, Part C, Annual Fuel Consumption Report, by Fuel Type of FAST SF 82 - Aggregate Combined Report)

Description	Consumption Units	Annual Consumption	Annual Cost (Actual \$)	Btu (Billion)
Biodiesel	GEG	0.0	\$0.0	0.0
Diesel	GEG	0.0	\$0.0	0.0
Electric	GEG	0.0	\$0.0	0.0
E-85	GEG	0.0	\$0.0	0.0
Gasoline	GEG	0.0	\$0.0	0.0
Hydrogen	GEG	0.0	\$0.0	0.0
M-85	GEG	0.0	\$0.0	0.0
LPG	GEG	0.0	\$0.0	0.0
NG	GEG	0.0	\$0.0	0.0
Other	GEG	0.0	\$0.0	0.0
TOTAL	GEG	0.0	\$0.0	0.0

1-4. RENEWABLE ENERGY GENERATED ON FEDERAL OR INDIAN LAND WHERE RECS ARE RETAINED BY THE GOVERNMENT

(New renewable energy is from projects placed in service after January 1, 1999)

Renewable energy project types in service during FY 2007, by age and source	Number of Projects	Annual Energy Produced	Energy Produced on Federal or Indian Land and Used at a Federal Facility
Electricity from <i>New Solar</i> projects (MWH)	0	0.0	0.0
Electricity from <i>New Wind</i> projects (MWH)	2	286.0	0.0
Electricity from <i>New Biomass</i> projects (MWH)	0	0.0	0.0
Electricity from <i>New Landfill Gas</i> projects (MWH)	0	0.0	0.0
Electricity from <i>New Geothermal</i> projects (MWH)	0	0.0	0.0
Electricity from <i>New Hydro/Ocean</i> projects (MWH)	0	0.0	0.0
Electricity from <i>Old Solar</i> projects (MWH)	0	0.0	0.0
Electricity from <i>Old Wind</i> projects (MWH)	1	600.0	600.0
Electricity from <i>Old Biomass</i> projects (MWH)	0	0.0	0.0
Electricity from <i>Old Landfill Gas</i> projects (MWH)	0	0.0	0.0
Electricity from <i>Old Geothermal</i> projects (MWH)	0	0.0	0.0
Electricity from <i>Old Hydro/Ocean</i> projects (MWH)	1	4,000.0	4,000.0
Natural Gas from Landfill/Biomass (Million Btu)	0	0.0	0.0
Renewable Thermal Energy (Million Btu)	0	0.0	0.0
Other Renewable Energy (<i>Specify Type</i>) (Million Btu)	0	0.0	0.0
Total New Renewable Electricity (MWH)	2	286.0	0.0
Total Old Renewable Electricity (MWH)	2	4,600.0	
Non-Electric Renewable Energy (Million Btu)	0	0.0	
Total Renewable Energy Generation (Million Btu)	4	16,671.0	

1-5. ON-SITE RENEWABLE ENERGY GENERATION WHERE RECS ARE NOT RETAINED BY THE GOVERNMENT

(This energy is only counted toward the renewable energy goal if the OPDIV has enough new RECs to qualify for the on-site bonus.)

	Amount Produced or Used	Amount Qualified for Goal
Renewable energy reported here comes from projects: 1) placed in service after 1/1/1999 (New) ; 2) where RECs have not been retained by the government; 3) where the amount has not been reported elsewhere on this data report; and 4) where the energy or RECs have not been sold to another agency that is counting it toward their renewable energy goal. (MWH)	0.0	0.0
Renewable energy reported here must come from projects: 1) placed in service before 1/1/1999 (Old) ; 2) where RECs have not been retained by the government; 3) where the amount has not been reported elsewhere on this data report; and 4) where the energy or RECs have not been sold to another agency that is counting it toward their renewable energy goal. (MWH)	4,600.0	0.0

1-6. RENEWABLE ENERGY/RENEWABLE ENERGY CERTIFICATE PURCHASES IN FY 2007

(New renewable energy is from resources developed after January 1, 1999)

Description of <i>Each</i> Renewable Energy Purchase (examples below, insert additional rows as necessary for each separate purchase. Insert rows after the first row of each color-coded category.)	Total Amount Purchased (MWH)	Total Amount Purchased (Million Btu)	Portion of Total Purchased from Federal or Indian Lands	FY 2007 Goal Application Renewable Energy Goal (RE) Energy Efficiency Goal (EE) Credit	End Use Category (Goal or Excluded)	State or Region of Generation or Source
Electricity from <i>New</i> Renewable Source	200.0		200.0	RE: 100% EE-Credit: 100%	Goal	AK
RECs from <i>New</i> Renewable Source	0.0		0.0	RE: 100% EE-Credit: 100%	Goal	
Electricity from <i>Old</i> Renewable Source	4,600.0		4,600.0	RE: Up to 1.5% of total electricity use EE-Credit: 100%	Goal	ND, SD
RECs from <i>Old</i> Renewable Source	953.0		0.0	RE: Up to 1.5% of total electricity use EE-Credit: 100%	Goal	IN, MI, NC
Gas from Renewable Source		0.0	0.0	RE: no contribution to goal EE-Credit: 100%	Goal	
Thermal Energy from Renewable Source		0.0	0.0	RE: no contribution to goal EE-Credit: 100%	Goal	
Total Purchases of <i>New</i> Renewable Electricity or RECs	200.0					
Bonus for Purchases from New Projects on Federal or Indian Land	200.0					
Total Purchases of <i>Old</i> Renewable Electricity or RECs	5,553.0					
Purchases of Non-Electric Renewable Energy		0.0				
Total Purchases for Goal Buildings	5,753.0		0.0			
Total Purchases for Excluded Facilities	0.0		0.0			
Total All Purchases	5,753.0		0.0			

1-7. GOAL-ELIGIBLE RENEWABLE ENERGY USE AS A PERCENTAGE OF FACILITY ELECTRICITY USE

(Calculated from input above per FEMP Renewable Energy Guidance)

Components of Eligible RE Use	Renewable Electricity Use (MWH)	Total Facility Electricity Use (MWH)	RE as a Percentage of Electricity Use
Eligible RE Total	3,109.2	161,548.0	1.9%
New RE (without Bonus)	486.0		
Bonus, Federal or Indian Land	200.0		
Eligible Old RE	2,423.2		

1-8. ALL RENEWABLE ENERGY USE (INCLUDING NON-ELECTRIC) AS A PERCENTAGE OF FACILITY ELECTRICITY USE

(Calculated from input above for information only)

All Renewable Energy Use (Billion Btu)	Total Facility Electricity Use (Billion Btu)	RE as a Percentage of Energy Use
10.6	551.2	1.9%

1-9. WATER USE INTENSITY AND COST

Potable Water	Annual Consumption (Million Gallons)	Annual Cost (Thou. \$)	Facility Gross Square Feet (Thou.)	Gallons per Gross Square Foot
Buildings & Facilities Subject to Water Goal	241.4	\$1,172.3	6,747.3	35.8
				Percent
Approx. percentage of reported water consumption that is estimated:				42%
Is the FY 2007 agency water intensity baseline preliminary or final?				Preliminary

PART 2: ENERGY EFFICIENCY IMPROVEMENTS

2-1. DIRECT OPDIV OBLIGATIONS

	FY 2007		Projected FY 2008	
	(Million Btu)	(Thou. \$)	(Million Btu)	(Thou. \$)
Direct obligations for facility energy efficiency improvements, including facility surveys/audits		\$1,828.3		\$1,930.0
Estimated annual savings anticipated from obligations	4,042.8	\$370.5	6,540.0	\$401.9

2-2. ENERGY SAVINGS PERFORMANCE CONTRACTS (ESPC)

	Annual savings (Million Btu)	(number/Thou. \$)
Number of ESPC Task/Delivery Orders awarded in fiscal year & annual energy (MMBTU) savings.	0.0	0
Investment value of ESPC Task/Delivery Orders awarded in fiscal year.		\$0.0
Amount privately financed under ESPC Task/Delivery Orders awarded in fiscal year.		\$0.0
Cumulative guaranteed cost savings of ESPCs awarded in fiscal year relative to the baseline spending.		\$0.0
Total contract award value of ESPCs awarded in fiscal year (sum of contractor payments for debt repayment, M&V, and other negotiated performance period services).		\$0.0
Total payments made to all ESPC contractors in fiscal year.		\$0.0

2-3. UTILITY ENERGY SERVICES CONTRACTS (UESC)

	Annual savings (Million Btu)	(number/Thou. \$)
Number of UESC Task/Delivery Orders awarded in fiscal year & annual energy (MMBTU) savings.	0.0	0
Investment value of UESC Task/Delivery Orders awarded in fiscal year.		\$0.0
Amount privately financed under UESC Task/Delivery Orders awarded in fiscal year.		\$0.0
Cumulative cost savings of UESCs awarded in fiscal year relative to the baseline spending.		\$0.0
Total contract award value of UESCs awarded in fiscal year (sum of payments for debt repayment and other negotiated performance period services).		\$0.0
Total payments made to all UESC contractors in fiscal year.		\$0.0

2-4. METERING OF ELECTRICITY USE

FY	Standard Meters		Advanced Meters	
	Cumulative # of Buildings Metered	Cumulative % of Electricity Metered	Cumulative # of Buildings Metered	Cumulative % of Electricity Metered
2007	832	86.8%	13	14.1%
2008 planned	832	85.9%	13	14.1%
				Percent
Percentage of agency metering plan milestones met in FY 2007:				100%

2-5. FEDERAL BUILDING ENERGY EFFICIENCY STANDARDS

	Number of New Building Designs
Total new building designs started in FY 2007:	26
Total new building designs started in FY 2007 that are expected to be 30 percent more energy efficient than relevant code, where life-cycle cost effective:	26
Percent	
Percent of new building designs started in FY 2007 that are expected to be 30 percent more energy efficient than relevant code, where life-cycle cost effective:	100%

2-6. TRAINING

	(number)	(Thou. \$)
Number of personnel	61	\$70.0

Indian Health Service
List of New Federal Building Designs and Construction

New Construction Project Information			Design			Completed New Construction	
Project ID	Building Name	Location (City, State)	Design Started (FY)	Percentage below ANSI/ASHRAE/IESNA Standard 90.1--2004 in terms of energy use	If not at least 30% below ANSI/ASHRAE/IESNA Standard 90.1--2004, will design achieve maximum level of energy efficiency that is life-cycle cost- effective?	Date Construction Completed (FY)	In terms of energy use, percentage below ANSI/ASHRAE/IESNA Standard 90.1--2004 achieved
