Influenza Surveillance Report
IHS Influenza Awareness System (IIAS)
(Week 25: June 15, 2020 - June 21, 2020)

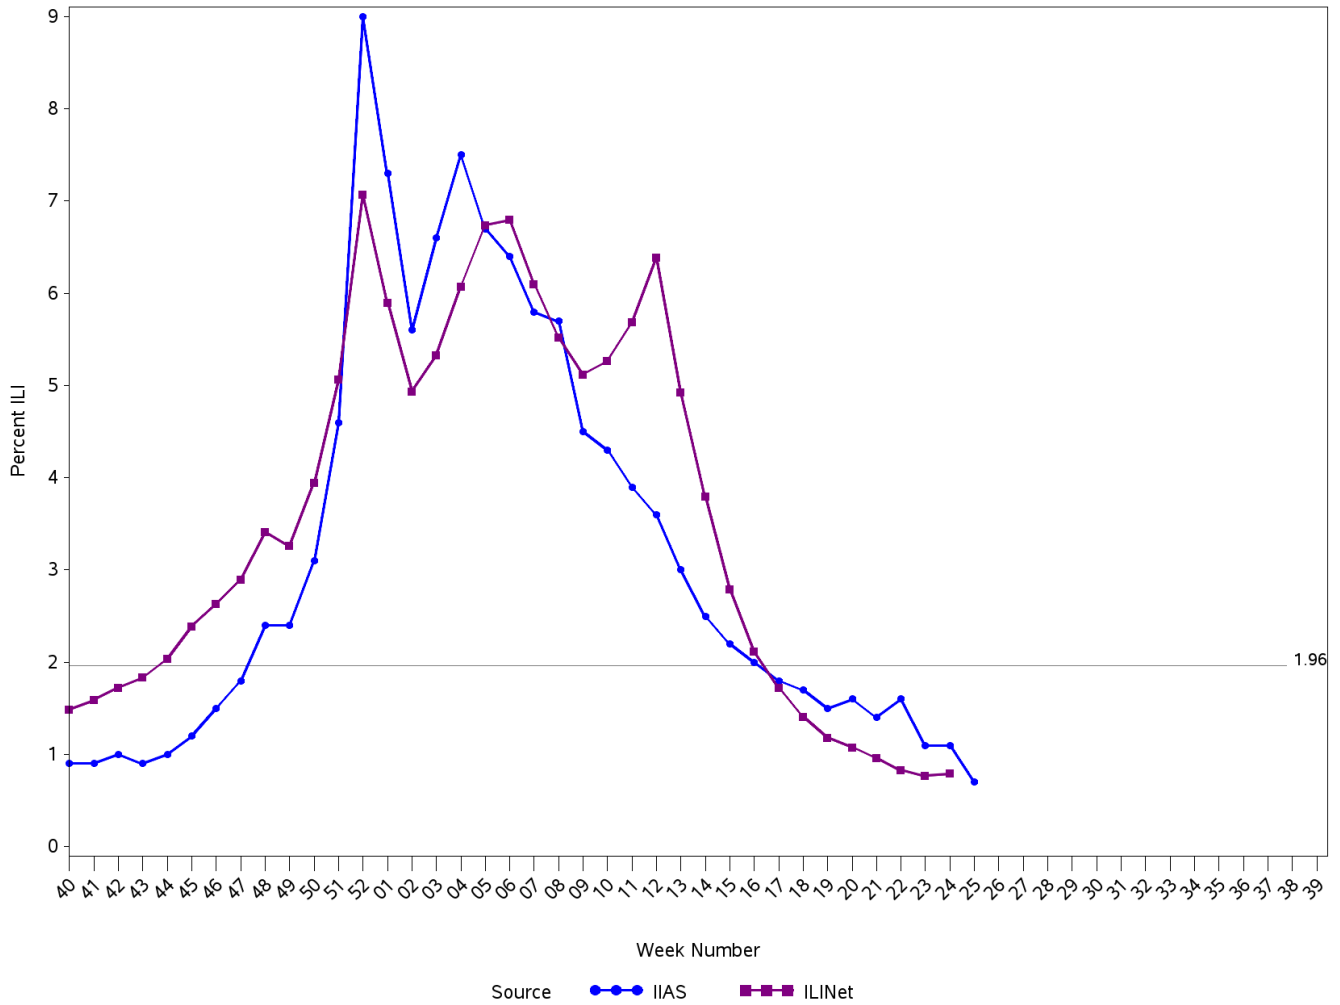

- Influenza-like-illness (ILI) activity in IHS is low at 0.7%, below the IHS baseline of 1.96%
 - All IHS Areas besides for Bemidji reported having lower ILI activity
- National ILI activity reported by CDC is low
 - CDC's ILINet ILI activity for week 25 was 0.8%, below the ILINet baseline (2.4%) and the IHS baseline.
- To date, IHS has administered 292,503 doses of influenza vaccine.
- Overall, 37.0% of the IHS Active Clinical population received an influenza vaccine this season.

All IHS Areas
Influenza-Like Illness (ILI) for Current Surveillance Year and Previous Six Surveillance Years
Percentage of Visits for ILI per week
09/29/2013 to 06/20/2020

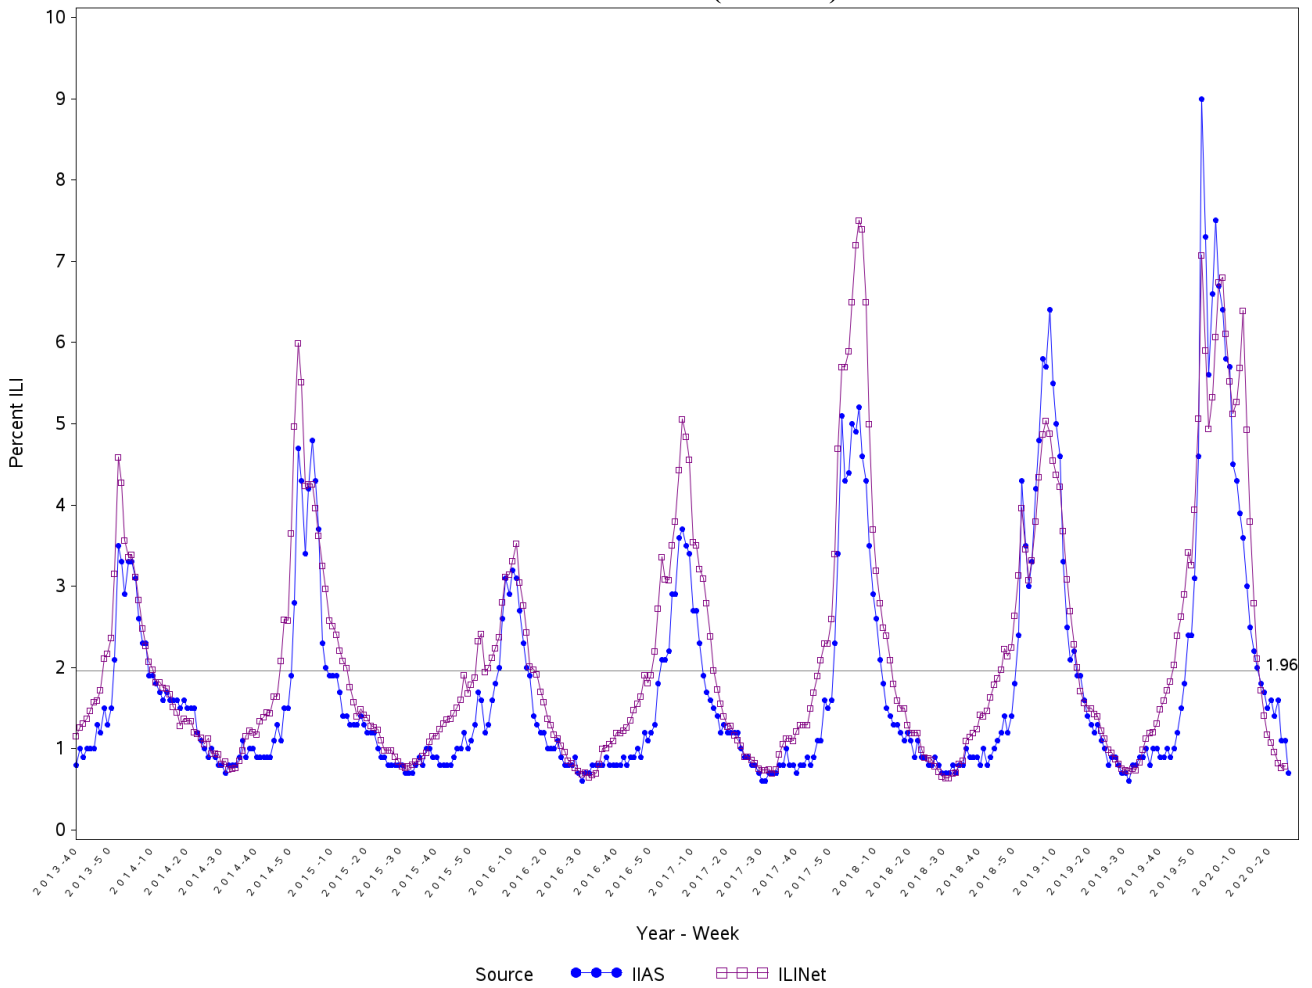

Percent ILI visits is number of ILI visits divided by total number of daily outpatient visits.
 The horizontal line is the 2019-2020 IIAS baseline. The ILINet baseline value for 2019-2020 is 2.4.
 Baselines are computed as the mean percentage of ILI patient visits during non-influenza weeks for the previous three seasons, plus two standard deviations.
 Sources: ILINet - CDC Sentinel Surveillance System for Influenza-Like Illness, IIAS - IHS Influenza Awareness System

Percentage of Outpatient Visits for Influenza-Like Illness (ILI)
Percent ILI for Flu Year 2019 - 2020
IIAS vs. ILINet
09/29/19 to 06/20/20

Percent ILI visits is number of ILI visits divided by total number of daily outpatient visits.
 The horizontal line is the 2019-2020 IIAS baseline. The ILINet baseline value for 2019-2020 is 2.4.
 Baselines are computed as the mean percentage of ILI patient visits during non-influenza weeks for the previous three seasons, plus two standard deviations.
 Sources: ILINet - CDC Sentinel Surveillance System for Influenza-Like Illness, IIAS - IHS Influenza Awareness System

**Influenza-Like Illness (ILI) for Current Surveillance Year and Previous Six Years – Continuous
Percentage of Visits for ILI per week
IIAS vs. ILINet
09/29/13 to 06/20/20 (Week 25)**

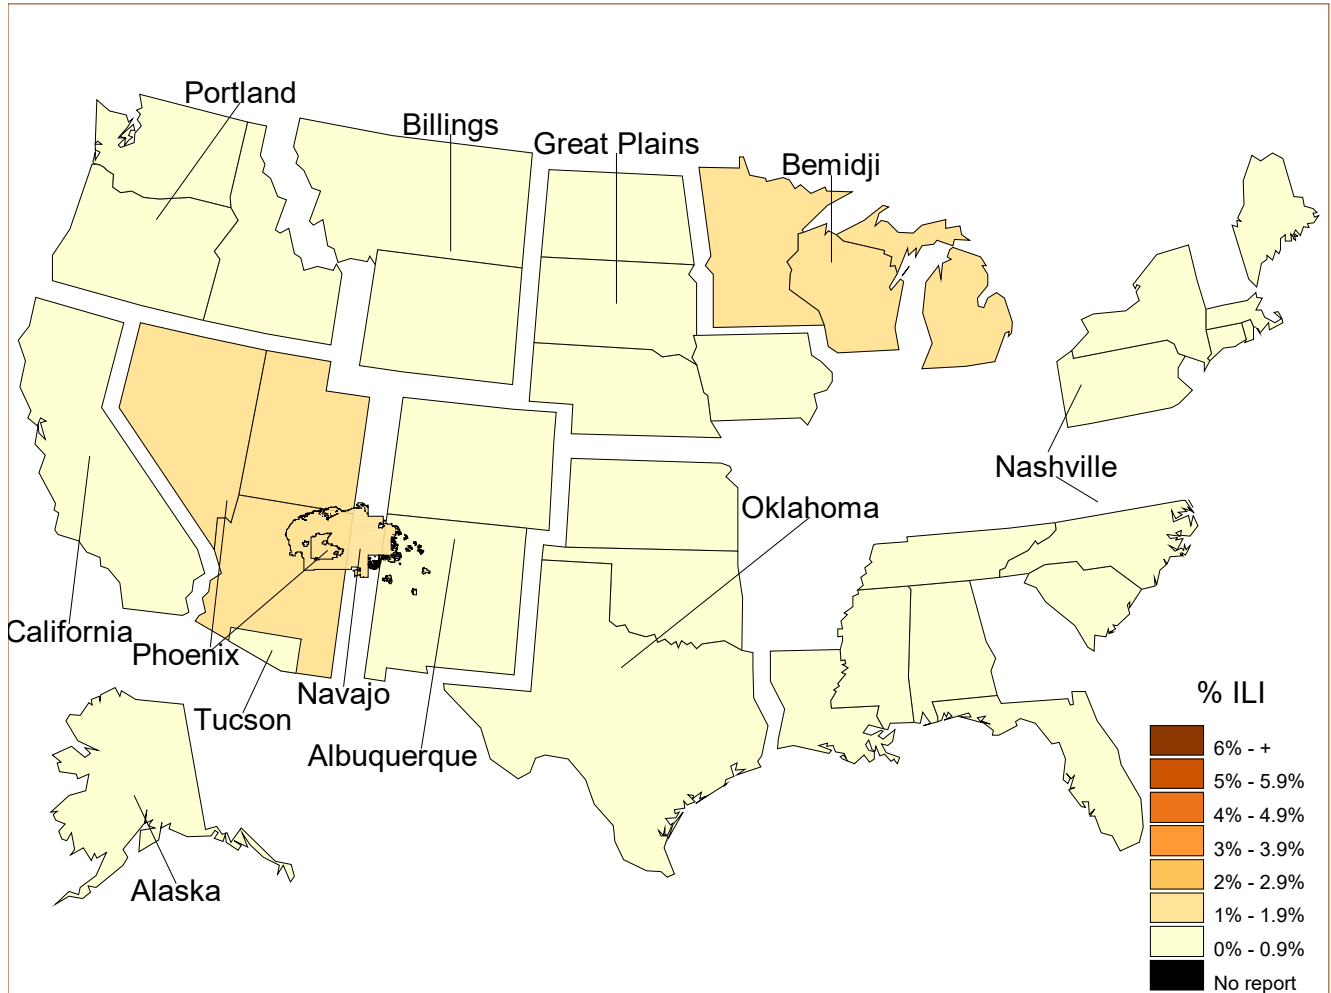

Percent ILI visits is number of ILI visits divided by total number of daily outpatient visits.

The horizontal line is the 2019-20 IIAS baseline. The ILINet baseline value for 2019-20 is 2.4.

Baselines are computed as the mean percentage of ILI patient visits during non-influenza weeks for the previous three seasons, plus two standard deviations.

Sources: ILINet - CDC Sentinel Surveillance System for Influenza-Like Illness, IIAS - IHS Influenza Awareness System

Percentage of Influenza-Like Illness Visits by Region For Week: 25

% Visits for ILI Compared to Previous Week

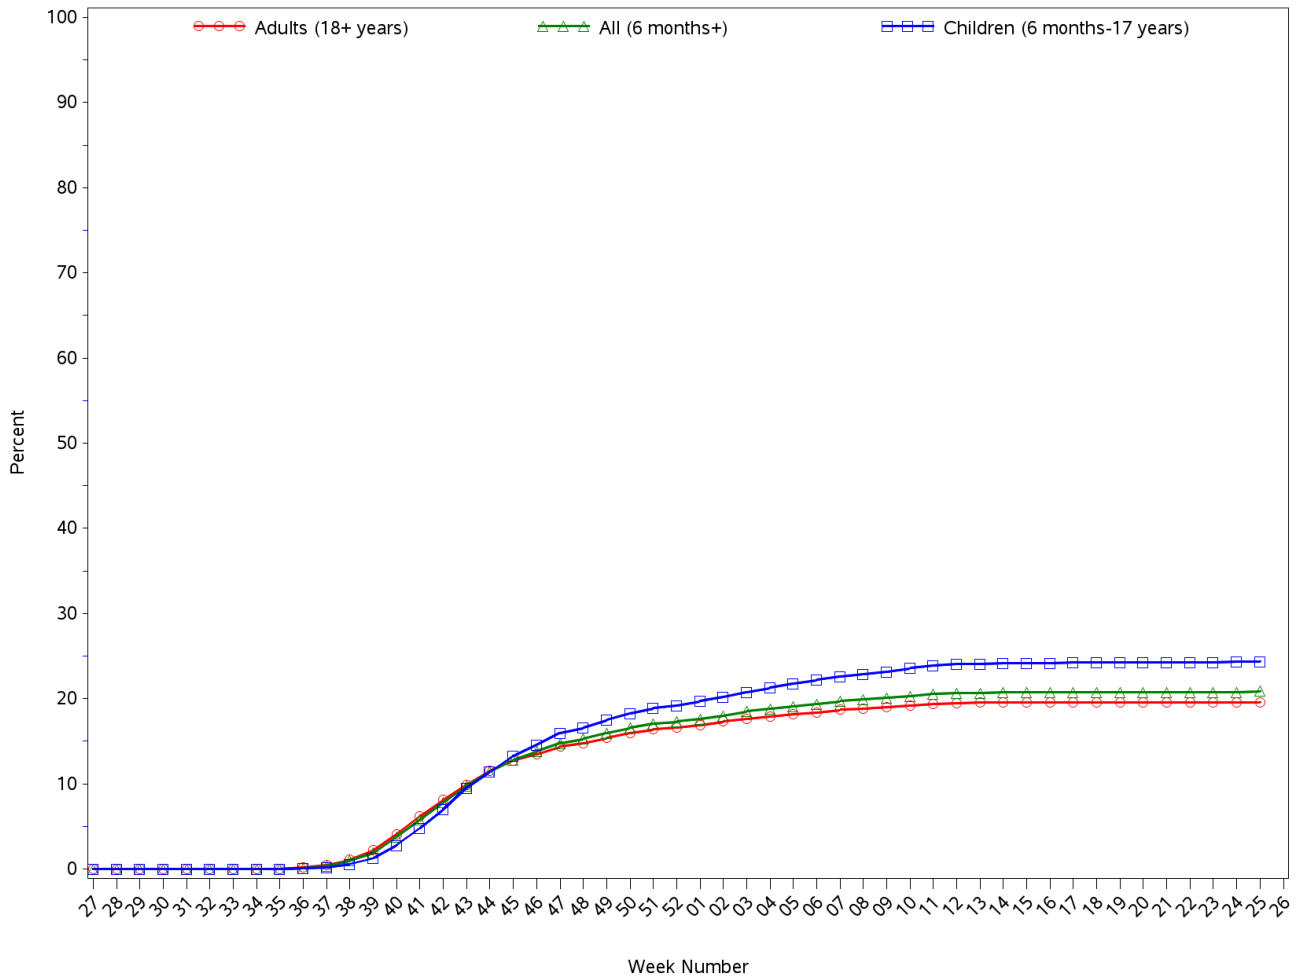

IHS Areas	Previous Week (24)	Current Week (25)

All (6 months+)	771,127	285,689	37.0	5,605	0.7	292,503

* Limited to sites that exported both doses administered along with accompanying Active Clinical population data.

** Active Clinical is defined as patients who have had at least 2 visits in the last 3 years.

*** Number of unique patients with at least 1 dose.

**** Total # Doses Administered = All doses administered to patients including doses not included in coverage calculation due to lack of Active Clinical Population data.
