

EHR Solution Benefits

The enterprise EHR solution places the patient at the center of care, leading to:

-  Enhanced user experience for patients and providers
-  Rapid, responsive support from technology experts
-  Increased continuity of care to enhance patient outcomes
-  Improved system stability and faster incident resolution
-  Streamlined access to patient data across facilities

Health Information Technology (IT) Modernization Program

*Serving Future Generations
Through IT Modernization*

Program Overview

The Indian Health Service (IHS) Health IT Modernization Program envisions providing the best possible electronic health record (EHR), managed **by its users, for its users**, that will drive high-quality health care through sustainable, modern, and easy-to-use tools.

The IHS selected **General Dynamics Information Technology, Inc.** to build, configure, and maintain the new IHS enterprise EHR solution utilizing Oracle Health technology.

Implementation of modern technology **enhances user experience** for patients and providers, centralizes the solution for **rapid, responsive support** from technology experts nationwide, and bolsters disaster recovery and **continuity of care**.

Get Involved

Focus Groups

Focus groups provide forums for participants with health IT experience and other relevant domains to share information on issues of interest to all IHS/tribal/urban Indian organizations, regardless of their selected EHR solution. Participation is not limited to a single group. Additional focus groups may be created as the need arises.

Initial focus groups include:

Health IT Implementation

Interoperability

Data Management & Analytics

To participate in a focus group, submit your **name, title, credentials, Tribe or urban Indian organization, email address**, and the **focus group(s)** you are interested in.

Email Modernization@ihs.gov to participate in a focus group.

Statement of Interest

The IHS hopes to learn which tribal and urban health care entities have an interest in participating in the shared system. Submit a **Statement of Interest (SOI)** to participate in planning the new enterprise EHR solution.

The **non-binding** SOI connects partners to support system configuration, organizational assessment, and implementation planning. Federal sites are **not required** to complete the SOI.

The IHS will contact sites with more information.

Are you a leader within a tribal/urban Indian organization?

Fill out the Statement of Interest and email it to **Modernization@ihs.gov**

**There is no deadline for submission*
