

FY 2018 GPRA/GPRAMA IDCS National Results

INDIAN HEALTH SERVICE (IHS) GPRA PERFORMANCE RESULTS

Introduction

Beginning with FY 2018, IHS clinical GPRA results are calculated from the Integrated Data Collection System (IDCS), a data mart within the National Data Warehouse (NDW) General Data Mart. Service unit/health program data is exported to the NDW by reporting sites for inclusion in GPRA results.

The measure logic is programmed centrally within the IDCS data mart and mimics the CRS measure logic, which is located [here](#)

Each clinical measure has two graphs:

- IHS national performance result and historical data
- IHS Area graphs comparing the current reporting year to the previous year for each of IHS's twelve Area Offices.
- FY 2018 National results include data from IHS, Tribal, and Urban Indian health programs (prior to FY 2018 urban results were posted separately).
- FY 2017 IDCS data is shown for informational use only. These are NOT the official 2017 results. Official 2017 data was reported via the Clinical Reporting System and are not shown in these charts.
