

REMEMBER TO REUSE

Give your things a second life or give someone else's things a try!

- Get creative! For example, try using plastic bottles to make bird feeders, garden planters, or even storage containers
- Try your hand at repairing products, like clothing, tires, and appliances to extend their lifespan and save you money. There are many online resources that have tutorials available.
- Buy clothing second-hand at thrift stores and donate the clothing you no longer need
- Keep an eye out for and purchase products that are designed to be reusable
