1.0 Introduction

Please review these changes and add a copy of them to any printed documentation your site may be using for Patient Registration (AG) v7.1. These changes will be integrated into future versions of the software and user manuals and will no longer be considered an addendum at the time of the next release.

The addendum only provides guidance on changes made in the patch that are relevant to the user. To see a list of all changes made in a patch, please refer to the patch notes for each of the respective patches.

1.1 Background

The Medicare Access and CHIP Reauthorization Act (MACRA) of 2015 requires removal of the Social Security Number (SSN)-based HICN from Medicare cards. Provided are some facts regarding the new Medicare Beneficiary Identifier (MBI) card:

- Fraud preventative initiative to combat identity theft
- Removal of the gender and signature line
- A new MBI will replace the SSN-based HCIN
- The MBI will replace HICN for Medicare transactions such as billing, processing claims and determining eligibility for services across multiple entities (examples include: Social Security Administration (SSA), Railroad Retirement Board (RRB), States, Medicare providers, and health plans).
- Centers for Medicare and Medicaid Services (CMS) to begin mailing out new Medicare cards in April 2018. Medicare beneficiaries may start using their new Medicare cards as soon as they receive them.
- MBI will not change Medicare benefits.

1.2 MBI Characteristics

The new MBI will have the following characteristics:

- The same number of characters as the current HICN (11), but will be visibly distinguishable from the HICN
- Contain uppercase alphabetic and numeric characters throughout the 11-digit identifier
- Occupy the same field as the HICN on transactions
- Be unique to each beneficiary (e.g., husband and wife will have their own MBI)

- Be easy to read and limit the possibility of letters being interpreted as numbers (e.g., alphabetic characters are upper case only and will exclude S, L, O, I, B, Z)
- Not contain any embedded intelligence or special characters
- Not contain inappropriate combinations of numbers or strings that may be offensive

Note: Remind people with Medicare that the CMS will never contact them and request personal information. They should protect their new MBI like a credit card and only share it with those they trust. CMS anticipates that the MBI will not be changed for an individual unless the MBI is compromised or other limited circumstances are still undergoing review.

1.3 Summary of Changes

Patch 13 provides enhancements and software fixes to V7.1 of the Patient Registration application:

- Added MBI data entry field on the Medicare and Railroad Retirement Insurance page 4.
- Added six (6) APIs for MBI validation, retrieval, and edits.
- Updated the Face Sheet to include when the MBI is entered.
- MBI entry conforms to format of 11 digits, uppercase alphabetic and numeric characters. Alphabetic characters exclude S, L, O, I, B, Z. See Appendix B.

2.0 Patch 13 Changes

2.1 Add a New Patient (ADD) Option Includes New Medicare Beneficiary Identifier (MBI) Field

A new field for the MBI has been added to the patient registration add a new patient for Medicare coverage.

```

Does this patient have MEDICARE COVERAGE? (Y/N) NO// Y

Figure 2-6: Example of New Railroad Retirement Eligibility and entry of a new MBI

2.3 Page 4 (P4) – Insurance Summary Edit Option

The P4 option allows the user to update the new MBI fields directly to the Medicare and Railroad Retirement Insurance page. The user can add a new MBI entry or add to an existing HICN entry.

2.4 Face Sheet (FAC) – Update to Include New MBI Entry

The face sheet has been updated to display/print the new MBI.
