bmc_0400.15k	KIDS build for BMC Version 4.0 Patch 15 (RPMS)
bmc_0400.15i.pdf	Install Guide for RPMS-RCIS and Referred-RCIS tabs (EHR) components
bmc_0400.15o.pdf	Addendum to RCIS User Manual

2.0 Required Resources

1. REFERRED CARE INFO SYSTEM (BMC) v4.0 patch 13
2. VA FileMan (DI) v22 or higher
3. VA Kernel v8 or higher
4. IHS ICD/CPT Lookup & Grouper (AICD) v4.0
5. IHS Patient Registration (AG) v7.1 patch 15
6. IHS Dictionaries (Pointers) (AUPN) v99.1 patch 29
7. Taxonomy Package V 5.1 patch 5
8. IHS Dictionaries (Pointers) (AUT) v98.1 patch 31
9. Lexicon (LEX) v2.0 patch 1003
10. Order entry (OR) v3.0 Patch 190
11. IHS Standard Terminology (BSTS) v1.0
12. If using PCC:
 - IHS PCC SUITE (BJPC) v2.0 patch 10
13. If using EHR:
 - EHR (BGO) v1.1 patch 13

3.0 RPMS RCIS

3.1 Installation Notes

Prefix: BMC

Current Version: Version 4.0 Patch 15

3.1.1 General Information

1. Make a copy of this distribution for off-line storage.
2. Print all notes/readme files.
3. Create a successful backup of the RPMS database.
4. It is recommended that the terminal output during the Installation be captured using an auxport printer attached to the Terminal where the installation is being performed OR that it be captured using a host file. This will ensure a printed audit trail if any problems should arise.
5. Ensure no processes other than the installer are utilizing the BMC files during the install process.
6. This patch contains changes to support the Social Security Number Fraud Prevention Act of 2017 and the Social Security Number Reduction Act.
7. This application uses the AUPN DISPLAY PPN parameter functionality and is defaulted to OFF until Patient Preferred Name (PPN) is available across the enterprise.

Note: While this parameter is turned off, the Patient Preferred Name will not display in this application. This allows the Patient Preferred Name display to be turned on at once without requiring a coordinated release of all applications. Once all applications support the display of the PPN, instructions will be sent out on how to enable this parameter system-wide.

Note: This release is cumulative from Patch 13, Version 4.0 patch 13 is required.

8. Description of Changes:
 - a. 82837 Added CHS PO Type to Search/Sort/Print screens to the General Retrieval Report

- b. 73949 Added cell phone number to referral letters
 - c. 75608 Added the site specific text to Secondary referral letters
 - d. 76176 Auto update new FY and auto assign previous FY referral numbers
 - e. 77891 Implement PPN on screen banners
 - f. 82840 Close Inpatient Referrals when denied in CHS. A new parameter was added to control this feature
 - g. 86488 Include Referral updates with as a new index for date last modified for CCDA (BMC side)
 - h. 85111 SSN Removal from reports
 - General Ret Selection criteria
 - Referral at an Outside Facility (Call In's)
 - Referral Review Report by Time Period
 - Referral Review Report by Facility/Time Period
 - Secondary Referral Report
 - Print Case Review Comments (By Date/Facility)
 - i. 75139 Updated API for CCDA to include TX date and time
 - j. 73357 GUI-Change Vendor/Provider field to read-only instead of text boxes
 - k. 73362 GUI-Add Case notes
 - l. 73364 GUI-Add provisional DX
 - m. 75814 GUI-Control characters causing error in RCIS GUI
 - n. 75976 GUI-Referral Status display
 - o. 76156 GUI-Displaying incorrect eligibility status
 - p. 77890 GUI-PPN Application banner in GUI
9. Typical time for the installation is 5 minutes.

3.2 Installation Instructions

1. This is a KIDS Install. Use the Installation options on the KIDS menu.
2. Load the Distribution into KIDS using option 1 on the KIDS Installation menu. The distribution was released in a file named bmc_0400.15k.
3. Verify the load using option 2 on the KIDS Installation menu.
4. Consider using options 3 and 4 on the KIDS Installation menu to print and compare the Transport.

5. Install the distribution using option 6 on the Installation menu.
6. For results, read the generated MailMan message, or use the KIDS "Install File Print" option to view/print the "BMC*4.0*15" entry.
7. The post-install routine, BMC4P15, will deliver a patch installation mail message to local users that hold the BMCZMENU, XUMGR, XUPROG, or XUPROGMODE security key.

3.3 Example of installation

Figure 3-1: Example Installation

4.0 Referred-RCIS tabs (EHR)

4.1 Installation Notes

Prefix: BMC

Current Version: 4.0 Patch 15

4.1.1 Before You Begin

All EHR and Resource and Patient Management System (RPMS) users should be logged off the system during the installation process.

Installation will require administrator access to the VueCentric System Management Utility (VcManager).

Note: If you have already installed the RCIS components in EHR at your site and are now installing a patch or updated version, refer to Section 4.2.1 in this manual for instructions. If you are installing the RCIS component in EHR for the first time at your site, refer to Section 4.2.2 of this manual for full installation instructions.

4.2 Installation Instructions

4.2.1 EHR-Referred Care Component – Existing Install

The EHR installation procedure includes these two stages:

1. Adding two dll files to the lib folder on the EHR network share:
 - a. IHSReferredCare.PatientReferral.dll
 - b. IHSReferredCare.Referral.dll
2. Importing two .vor files to VueCentric Object Registry:
 - a. IHSReferredCare.PatientReferral.vor
 - b. IHSReferredCare.Referral.vor

Note: For Citrix and Terminal Server setups, ensure that the shared files on the server are updated. Desktop setups will need the local files updated on each workstation.

4. Click on the **Refresh All** button to confirm that the 2 objects have been removed.
5. Go to **File | Import**.
6. Select the new **IHSReferredCare.PatientReferral.vor** file and click open to import. Then click on the **Apply** button to confirm the changes.

Figure 4-2: Select Import Object screen

7. To verify that no Checksum errors occur, click on the **Retrieve** button.
8. The Select Target Folder will display if the import steps were completed successfully. You can then click the **Cancel** button to close the window.

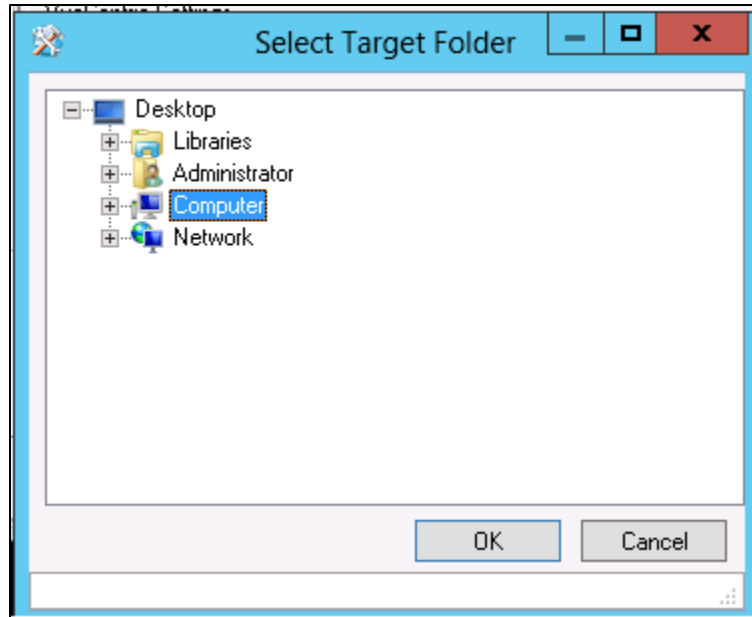

Figure 4-3: Select Target Folder screen

9. Repeat steps 5-8 with the **IHSReferredCare.Referral** file.

4.2.1.3 Fixing Checksum Error

If you see a 'File checksum invalid' error message in a pop-up alert after performing the steps in the previous section, then follow the steps below to correct the error.

Figure 4-4: File Checksum Invalid error message

1. Close and restart the VcManager.
2. Select the **Object Registry** tab.

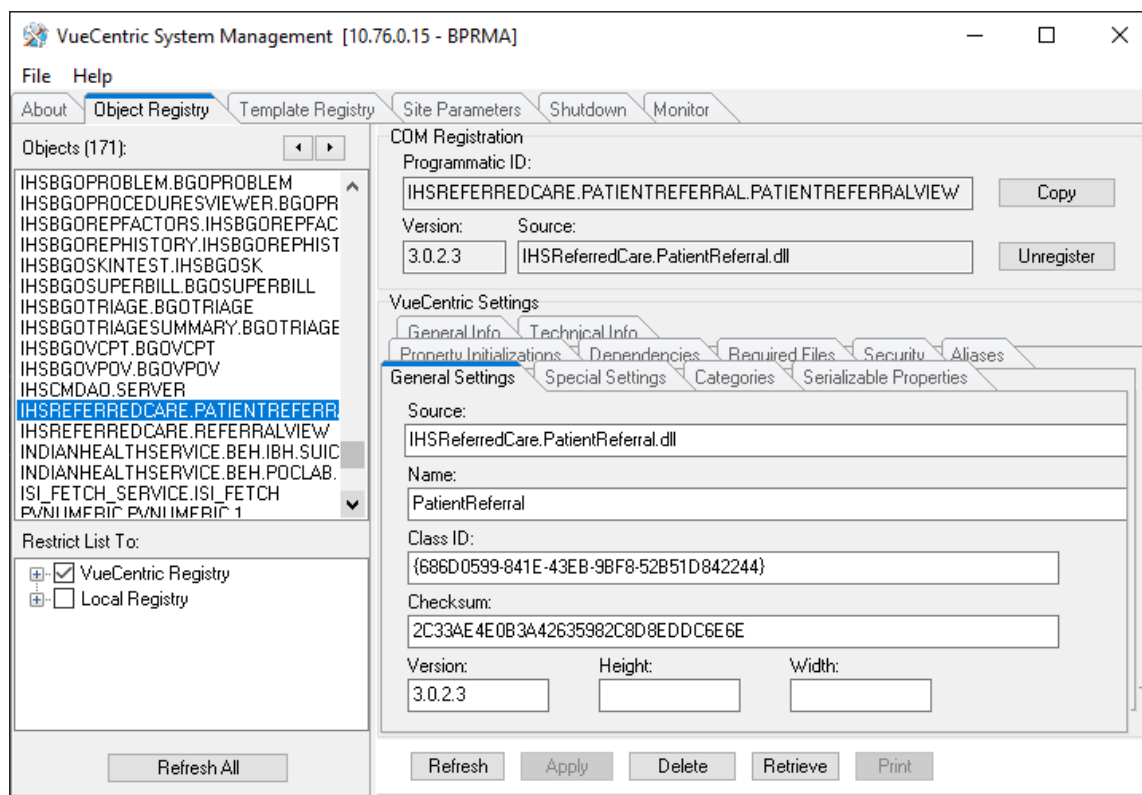

Figure 4-5: Object Loaded view in VCManager

3. Go to **File | Import**.
4. Select the **IHSReferredCare.PatientReferral.vor** file and click open to import.
5. Click on the **Copy** button once. Verify that the Checksum value updates when you click the **Copy** button. If the Checksum field becomes empty, repeat the steps in this section.
6. Click **Apply** to save the information.
7. Repeat the steps 3-6 for the **IHSReferredCare.Referral.vor** file.
8. Close the VcManager application when complete.

4.2.2 EHR-Referred Care Component – First Time Install

The EHR installation procedure includes these three stages:

1. Adding two dll files to the lib folder on the EHR network share:
 - a. IHSReferredCare.PatientReferral.dll
 - b. IHSReferredCare.Referral.dll
2. Importing two .vor files to VueCentric Object Registry:

- a. IHSReferredCare.PatientReferral.vor
- b. IHSReferredCare.Referral.vor
- 3. Modifying Provider template to add two referral components.

Note: For Citrix and Terminal Server setups, ensure that the shared files on the server are updated. Desktop setups will need the local files updated on each workstation.

4.2.2.1 Stage 1–DLL Files

Copy the two .dll files into the EHR lib folder on the main EHR network share:

- IHSReferredCare.PatientReferral.dll
- IHSReferredCare. Referral.dll

Note: Verify that the .dll files are placed in the same folder as defined in the VueCentric Site Parameters for the Default object source path.

4.2.2.2 Stage 2–VOR Files

- 1. Open VcManager.exe located in EHR\bin or EHR\utl folder.

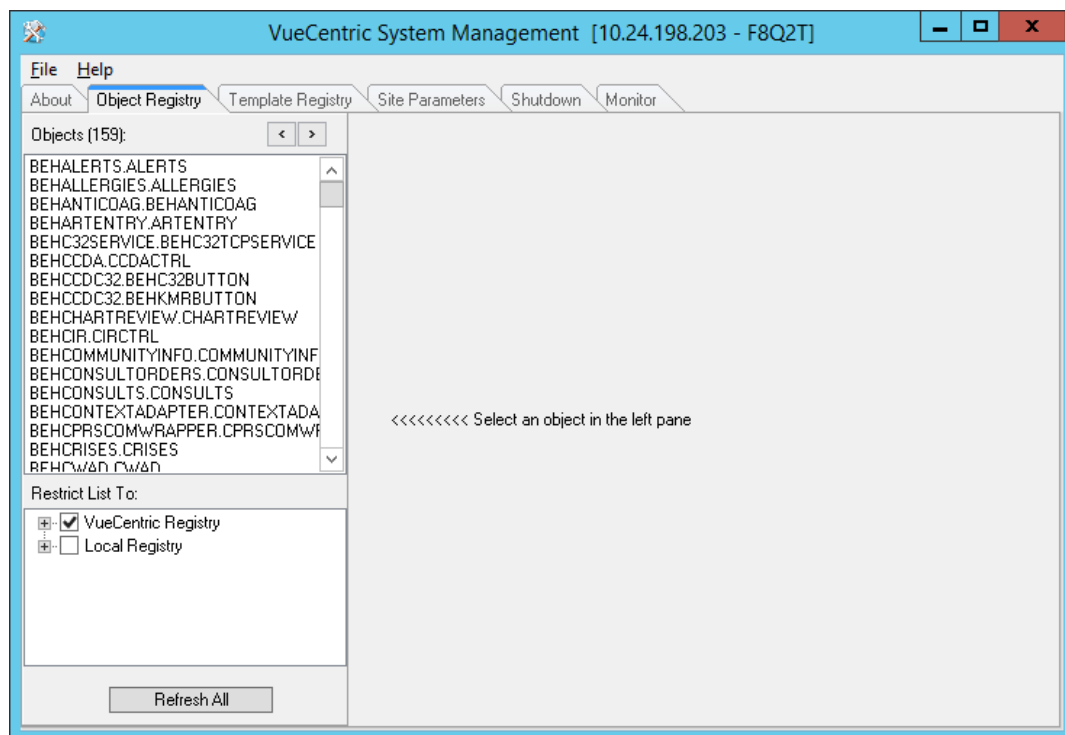

Figure 4-6: VcManager Screen

2. Select the **Object Registry** tab.
3. Go to **File | Import**.
4. Select **IHSReferredCare.PatientReferral.vor** and click open to import.

Figure 4-7: Select Import Object screen

5. Click **Apply** to save the information.

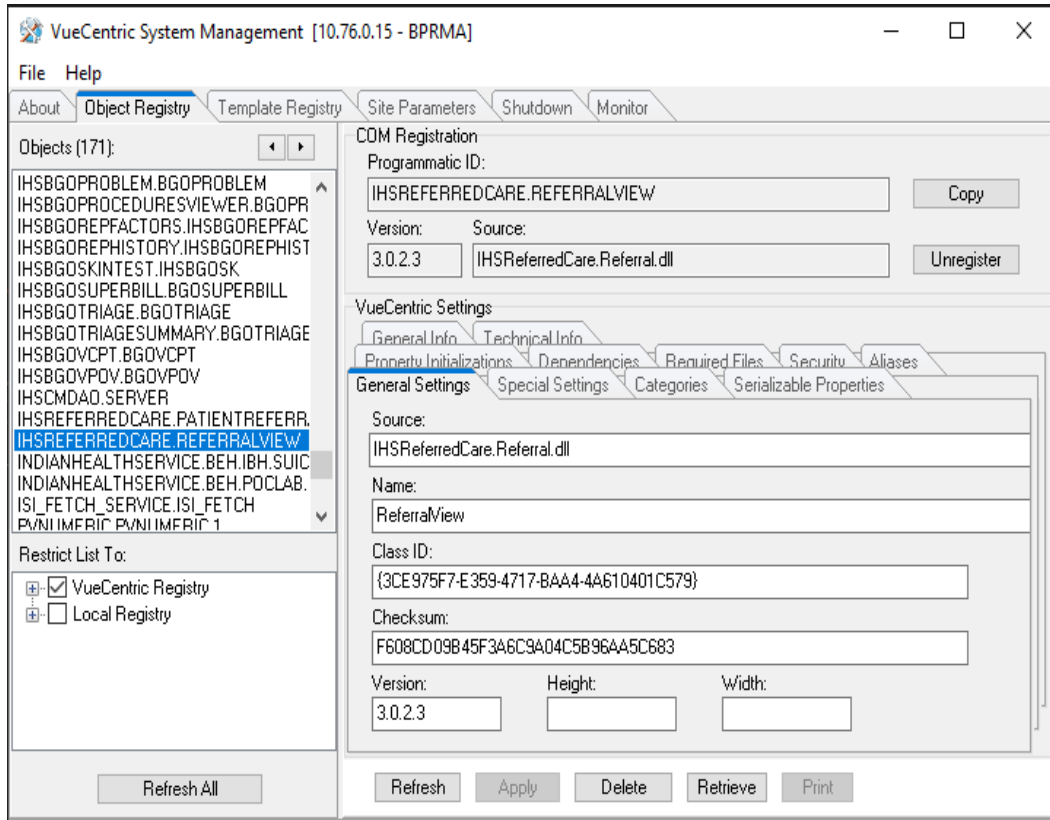

Figure 4-8: Object Loaded view in VcManager

6. Repeat the Import (Steps 3–5) for the **IHSReferredCare.Referral.vor** file.
7. Close the VcManager application when complete.

4.2.2.3 Stage 3–Provider Template

1. Open the EHR application and log in.
2. Right-click the header to display a context menu.
3. Select **Design Mode** option.

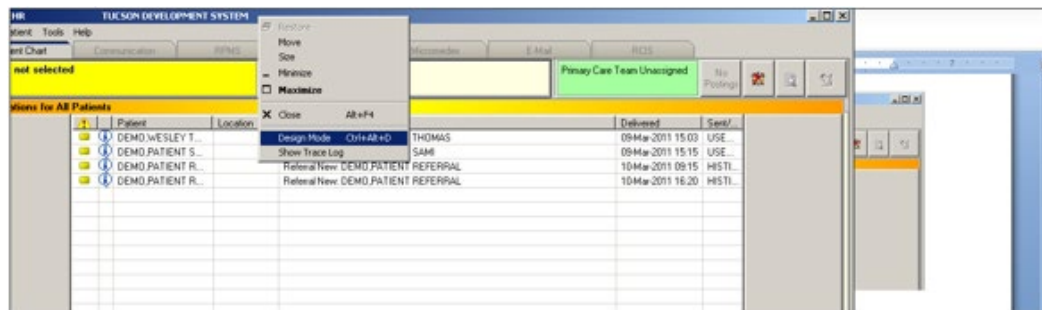

Figure 4-9: Design Mode option

4. Select the **Layout Manager** from the **Design** menu.
5. Highlight **Tabbed Notebook** and click **Properties**.

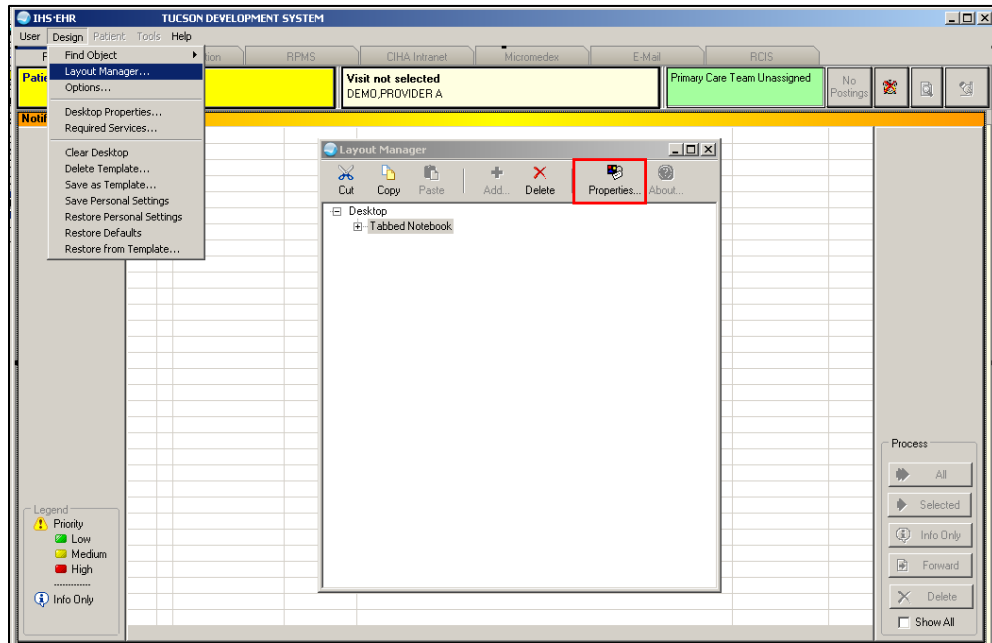

Figure 4-10: Design menu: Layout Manager

6. Select the **Tab Editor** and add a new tab named **RCIS**. Click **OK**.

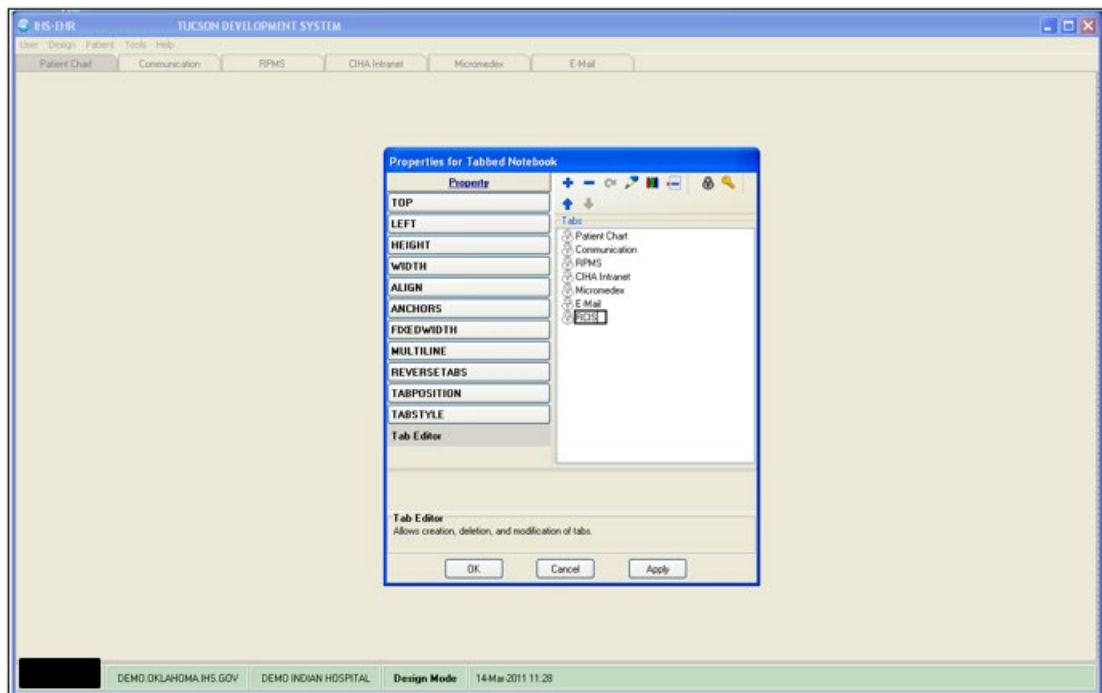

Figure 4-11: EHR Designer Mode - Create new RCIS tab

7. To add an object to the new RCIS tab, click **Add (+)** and expand the **Type | Object** list.
8. Select the **ReferralView** object from the list and click **Add**.

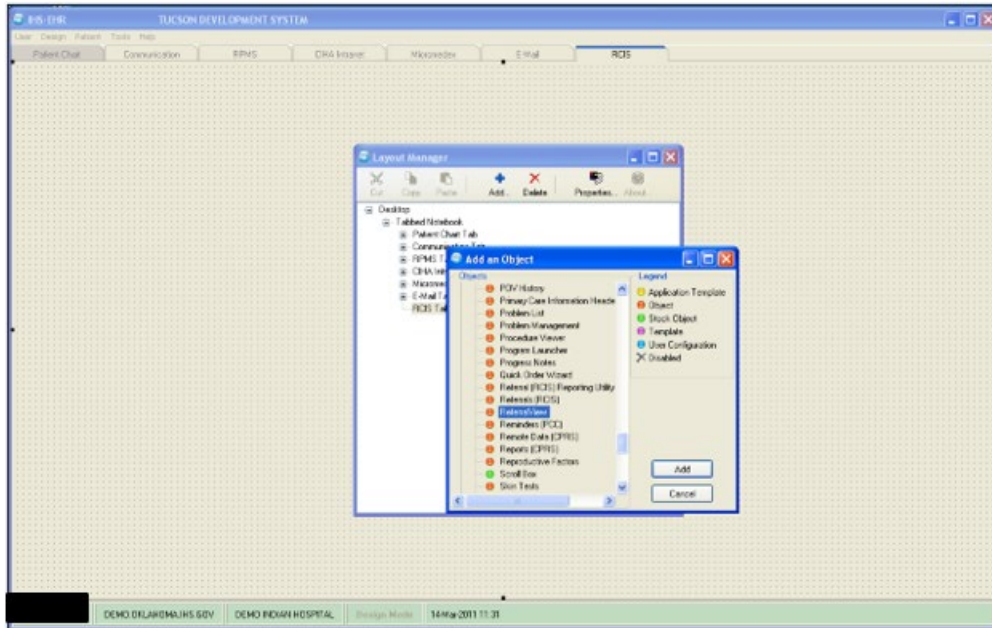

Figure 4-12: EHR Designer Mode - Add ReferralView object to RCIS tab

9. Open the properties for **ReferralView** and select **Align-All** to expand the component inside the **RCIS** tab.

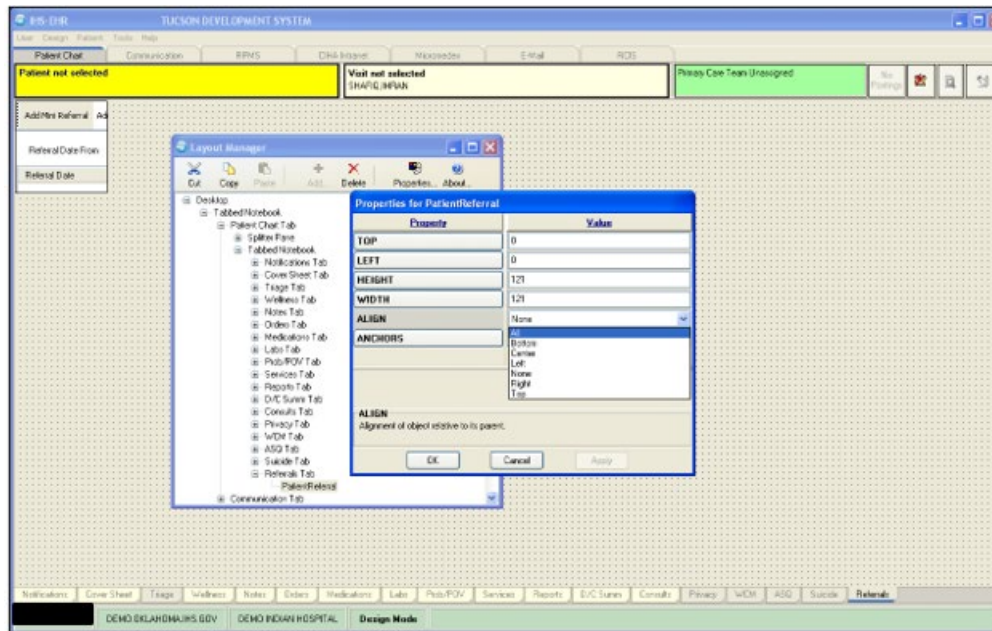

Figure 4-13: EHR Designer Mode - Align Setting in Object Properties

10. Select the **Layout Manager** from the **Design** menu again to add another new tab under the **Patient Chart** tab.
11. Open the properties for the Tabbed Notebook located under **Patient Chart**.

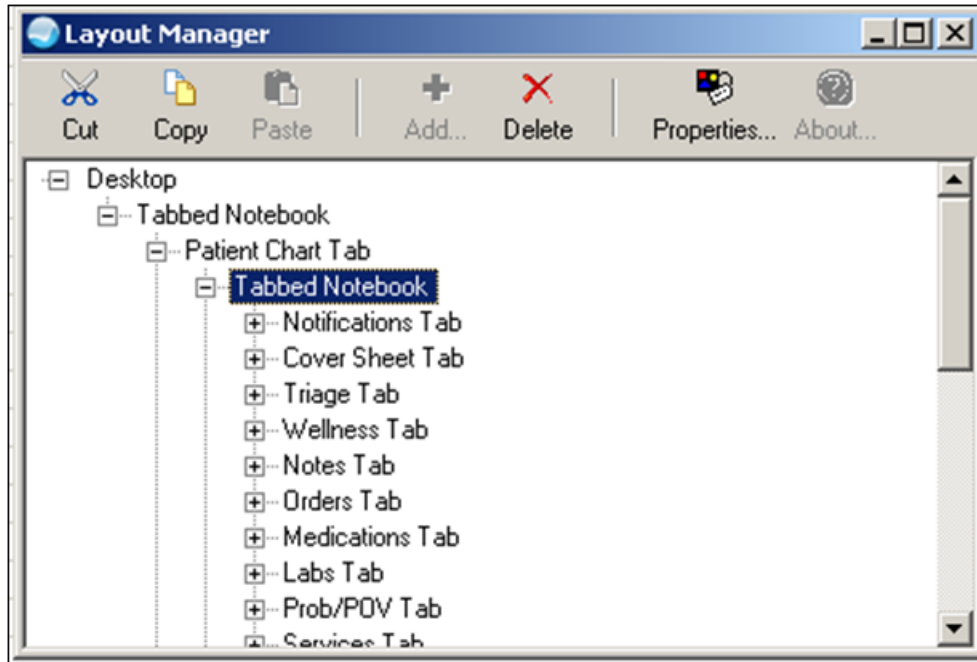

Figure 4-14: EHR Designer Mode - Layout Manager Close-up

12. Use the Tab Editor to add a new tab named **Referrals** and click **OK**.

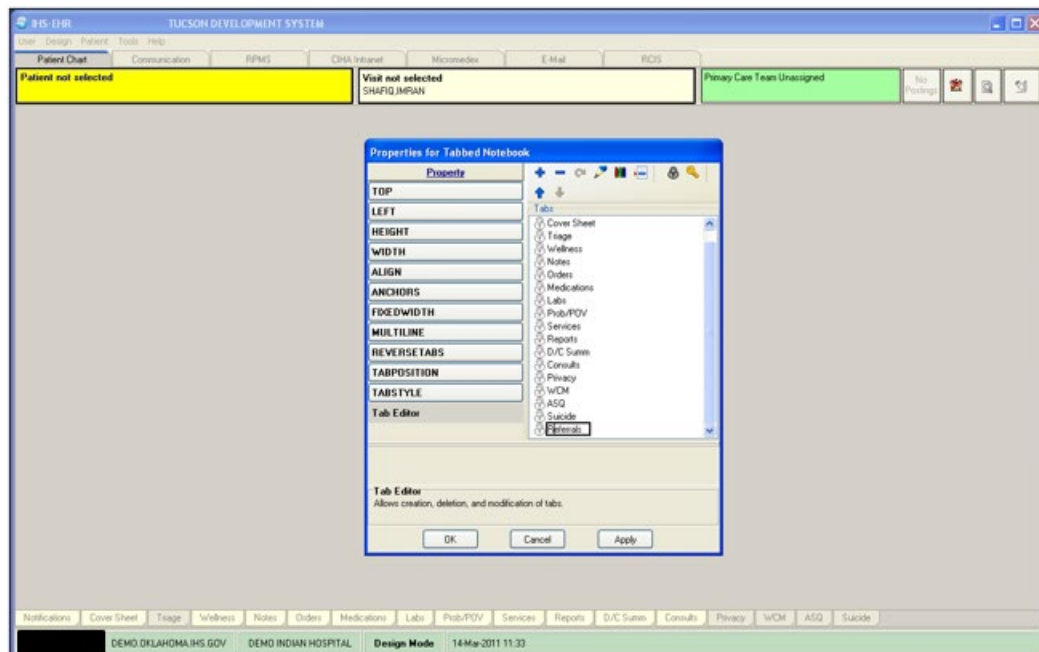

Figure 4-15: EHR Designer Mode - Add tab to Patient Chart

13. Add an Object to the new **Referrals** tab and select the **PatientReferral** object (see Steps 7–8).

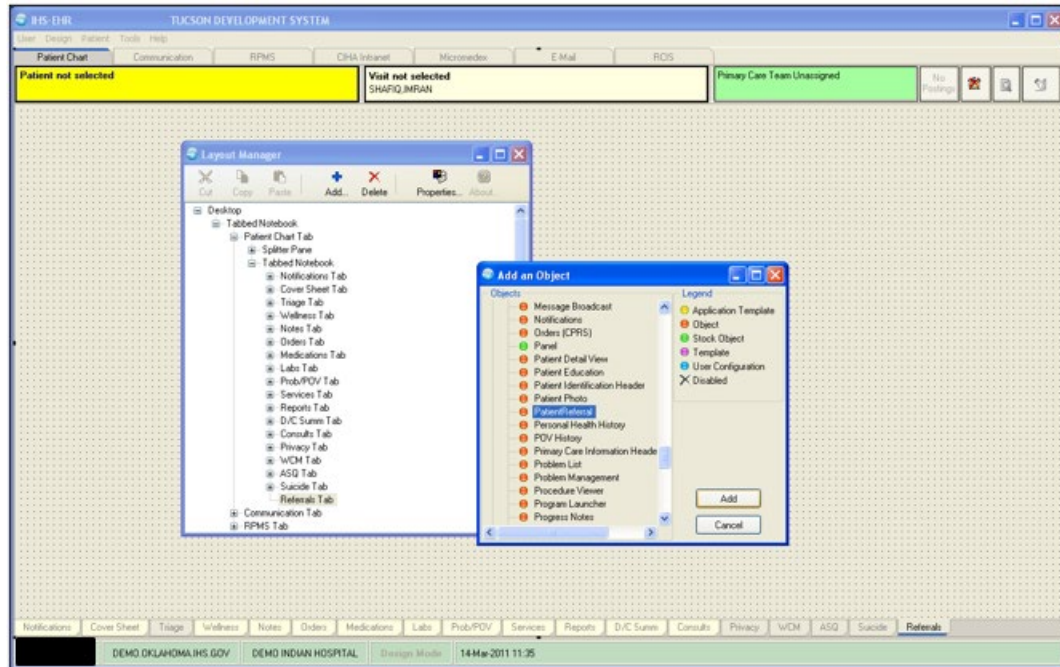

Figure 4-16: EHR Design Mode - Add PatientReferral object to Referrals tab

14. Select **Align–All in the PatientReferral** properties to expand the component inside the **Referrals** tab (See Figure 4-13).
15. Save the design to the Provider template. The Provider template is generally titled **%Provider**.

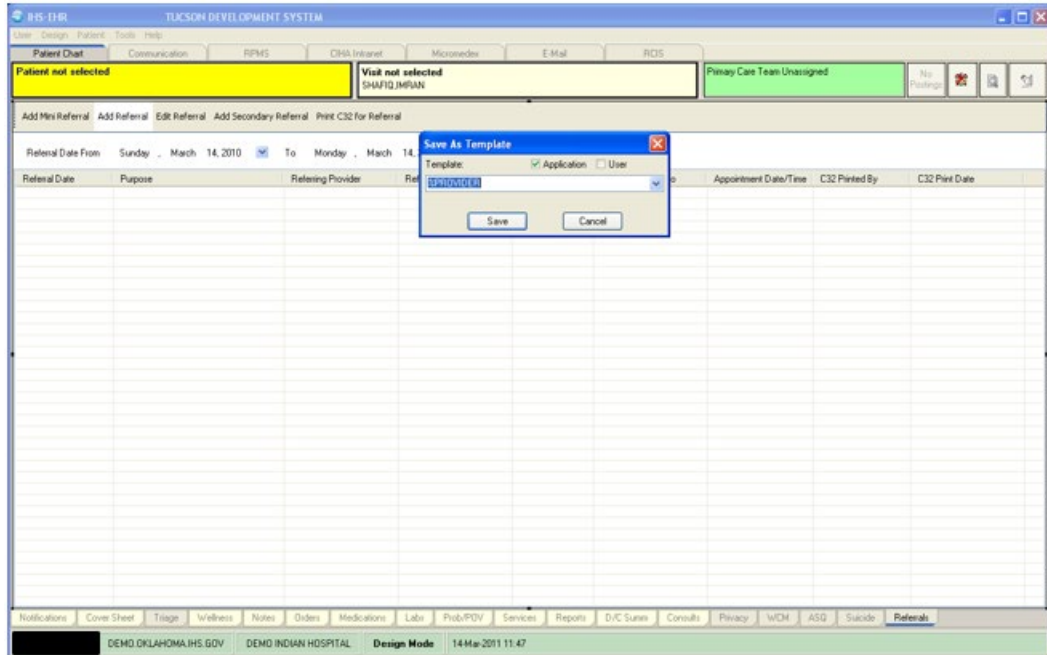

Figure 4-17: EHR Designer Mode - Save As screen for Provider template

4.3 Installation Verification

1. Log in to EHR as a Provider.
2. The **RCIS** tab should show referrals authored by the currently logged-in provider (see below).

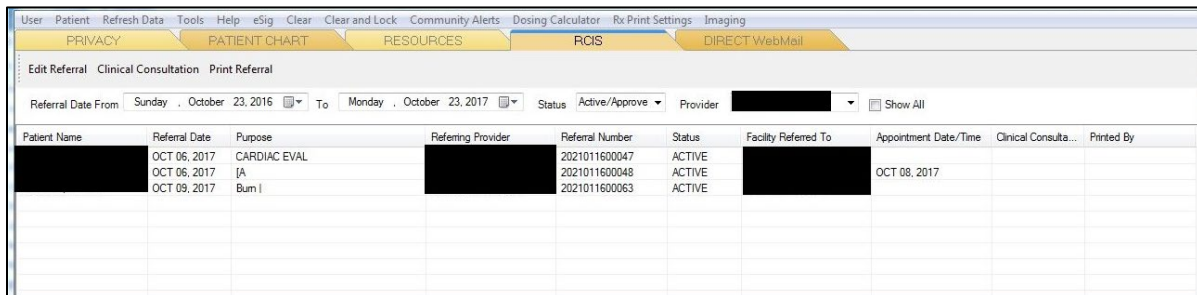

Figure 4-18: **RCIS** tab window

3. Go to the **Patient Chart** tab.
4. Select a patient.
5. The **Referrals** tab under Patient Chart should display the referrals for the patient as shown below.

Referral Date	Purpose	Referring Provider	Referral Number	Status	Facility Referred To	Appointment Date/Time	Clinical Consulta...	Printed By	Print Date

Figure 4-19: Referrals tab under Patient Chart
