Is your home, school, and worksite free of commercial tobacco smoke? To ensure that our children, families, and co-workers are breathing in fresh clean air, please do not smoke in the home, school or worksite. Commercial tobacco smoke is harmful. So is secondhand smoke and third-hand smoke which is left in the air, on furniture, and clothing even after the smoker puts out the cigarette. If you are a smoker, protect your children and family by not smoking in the home, car, and workplace. If you need help to quit smoking, please call 1-800-QUIT-NOW (1-800-784-8669) or call your local tribal or Indian Health Service clinic. Let's fill our lungs with fresh air that is tobacco-free! Thank you for not smoking.
