The Tribal Health Board’s/Governing Body’s Role in ECC Prevention

Early Childhood Caries (ECC) is any tooth decay in a child under 6 years of age. While some children may only have one tooth that is decayed, and some may have multiple teeth that are decayed (as shown in the picture to the right) it is important to understand that tooth decay in childhood is not normal and can be prevented.

Early childhood caries (tooth decay) is a devastating problem in young children. Not only can it cause pain and loss of teeth, but it also affects self-esteem, speech development, nutrition, and school attendance. Almost 80% of AI/AN children experience dental caries before they reach kindergarten.

The IHS has started a new initiative to draw attention to this problem, which afflicts more than half of Native American children. This project involves medical staff, dental staff, Community Health Representatives, WIC staff, Head Start staff, and other key stakeholders in your community concerned with the oral health of children. As a Tribal Council or Governing Board, your support of this initiative is critical to its success in reducing tooth decay.

Things YOU can do

1. **Support** your health clinic in providing services to children inside the clinic and outside the clinic at health fairs, schools, and special events.

2. **Learn** about Early Childhood Caries (tooth decay in young children) prevention and help spread the prevention messages throughout the community.

3. **Place a priority** on dental treatment of young children...the next generation.

4. **Draft a tribal resolution** to support the Early Childhood Caries Initiative (example on back page).

Together, we can make a difference!

IHS Division of Oral Health, 2010
SAMPLE TRIBAL COUNCIL RESOLUTION (#___)

WHEREAS, the _________ Tribe/Nation is a Native American Indian Tribe organized under the Indian Reorganization Act of 1934, and

WHEREAS, the _________ Tribe is a sovereign Indian Nation, and recognized as such by the United States of America, and

WHEREAS, the ________ Tribal Council is the duly elected governing body of the _________ Tribe, as authorized by ________ of the Constitution and Bylaws adopted by the people of the ________ Tribe/Nation and approved by the Secretary of the Interior, and

WHEREAS, the Tribal Council, as the governing body of a sovereign nation, has the authority and responsibility of providing for the health, education, welfare and safety of the _______ People, and

WHEREAS, dental care has been identified as one of the most critical health problems facing the ________ , and dental intervention has been determined to be a primary focus, and

WHEREAS, early childhood caries (ECC) is defined as tooth decay in children under 6 years of age, and is the most prevalent disease of childhood, and

WHEREAS, the 1999 IHS Oral Health Survey found that 76% of 2-5 year-olds had this disease, which can result in pain, infection, poor school performance, delayed speech and social development, poor self-esteem, and exorbitant costs to treat it, and

WHEREAS, the Indian Health Service has recently unveiled the IHS Early Childhood Caries Initiative to bring attention and priority to this problem through a multi-disciplinary approach focused on prevention and early intervention,

THEREFORE BE IT RESOLVED, that the _________ Tribal Council hereby recognizes the importance of this Initiative and fully supports the implementation of the IHS Early Childhood Caries Initiative throughout the community.

CERTIFICATION

I, the undersigned, as the Secretary-Treasurer of the _____________Tribal Council, certify that the Tribal Council is composed of ___ members of whom ___ were called and polled on this ___ day of __________, and that the foregoing resolution was duly adopted by the affirmative vote of ___ members for, ___ members against, and ___ members abstaining; pursuant to the authority contained under ____________________ of our Tribal Constitution and Bylaws approved ____________.
