

Advancements in Diabetes Webinar
Diabetes Medications and Medication Management
Wednesday, April 13, 2016
1:00 – 2:00 pm MDT

Speaker: Chris Lamer, PharmD, MSH, BCPS, CDE

Target Audience: Physicians, Nurses, Dietitians and other Healthcare Professionals working in Clinic and Community Health Settings

Agenda:

- **Welcome/Continuing Education Credits**
- ***Diabetes Medications and Medication Management***
- **Q & A**
- **Survey/Certificate**

Description:

This seminar will cover the latest information on diabetes medications and the management of patients receiving them. Working with patients on individualized treatment targets, and intricacies of needing and using multiple medications will also be addressed.

Objectives: As a result of completing this training, participants will be able to:

1. Describe the different types of diabetes medications, their mechanisms of action, and the types of patients with diabetes for whom they are best suited.
2. Teach patients about common adverse effects of medications used to manage blood glucose.
3. Monitor patient medications to assure safety and efficacy.
4. Apply one of the diabetes treatment algorithms to a case study.
5. Identify one change you can make in your clinical or public health practice.

Note: Before you begin the training, you can review the IHS Privacy Policy (http://www.ihs.gov/privacy_policy.asp). Also, you can review the Survey Monkey Privacy Policy for details on how user information submitted in the evaluation is protected.
