

Advancements in Diabetes Webinar
The CDC National Diabetes Prevention Program: Experiences and Outcomes
Wednesday, October 5, 2016
1:00 – 2:00 pm MDT

Speakers: Ann Albright, PhD, RD

Target Audience: Physicians, Nurses, Dietitians and other Healthcare Professionals working in Clinic and Community Health Settings

Agenda:

- **Welcome/Continuing Education Credits**
- ***The CDC National Diabetes Prevention Program: Experiences and Outcomes***
- **Q & A**
- **Survey/Certificate**

Description:

This seminar describes the evidence, experiences and outcomes from the National Diabetes Prevention Program (National DPP). The current work that is being done to reduce the impact of prediabetes and type 2 diabetes, including the Diabetes Prevention Recognition Program, a key component of the National DPP, are also presented. The seminar invites health team members to develop plans to incorporate evidence based lifestyle intervention activities into their care for patients at risk for diabetes, as well as plans to document program and participant successes.

Objectives: As a result of completing this training, participants will be able to:

1. Describe the burden of prediabetes and type 2 diabetes in the United States and explain why a national prevention effort is necessary.
2. Utilize key components of evaluation: defining the population, choosing standard measurements, obtaining appropriate baseline data, performing and documenting the intervention, and obtaining follow-up data.
3. Identify the type 2 diabetes risk factors that were measured by the Diabetes Prevention Program and those which were successfully modified.
4. Identify resources for incorporating a successful Diabetes Prevention Program into your clinical or community health practice.

Note: Before you begin the training, you can review the IHS Privacy Policy (http://www.ihs.gov/privacy_policy.asp). Also, you can review the Survey Monkey Privacy Policy for details on how user information submitted in the evaluation is protected.
