1.0 Introduction

The Behavioral Health System is a module of the Resource and Patient Management System (RPMS) designed specifically for recording and tracking patient care related to behavioral health. The new Behavioral Health System (AMH) version 4.0 includes functionality available in the previous versions of the RPMS behavioral health software plus multiple new features and an enhanced graphical user interface.

Many behavioral health providers co-located in a primary care setting at facilities that have deployed the RPMS Electronic Health Record (EHR) have transitioned to the EHR to document their services and support integrated care. However, a large number of behavioral health clinicians are located at facilities that do not use the EHR. For these providers, AMH v4.0 can be utilized as a “standalone” yet integrated module within the RPMS suite of clinical and practice management software.

Behavioral Health System v4.0 offers opportunities for improved patient outcome and continuity of care:

- Opportunities for improved continuity of care and health outcomes
- Standardized documentation
- Tools to meet regulatory and accreditation standards and reporting requirements
- Revenue enhancement
- Report generation for care management, program management, and clinical data to inform prevention activities and support local and national initiatives

While this package is integrated with other modules of RPMS, including the Patient Care Component (PCC), the package uses security keys and site-specific parameters to maintain the confidentiality of patient data. The package is one major module:

- **Behavioral Health Data Entry Menu**: Use the Behavioral Health Data Entry menu for all aspects of recording data items related to patient care, case management, treatment planning, and follow-up.

1.1 Primary Menu

The primary menu option for this package is IHS Behavioral Health System (AMHMENU).
1.2 Preparations

The Behavioral Health Program Manager should meet with the Site Manager to set site-specific parameters related to visit sharing and the extent of data transfer to PCC.

In order for data to pass to PCC, the site manager will add Behavioral Health to the PCC Master Control file. In addition, each user of this package must have a FileMan access code of M.

The Site Manager will need to add a AMH mail group using the Mail Group Edit Option. Add this mail group to the AMH Bulletins using the Bulletin Edit Option. Members of this mail group will automatically receive bulletins alerting them of any visits that failed to pass to PCC.

1.3 Security Keys

Security keys should only be assigned to personnel with privileged access to confidential behavioral health data. Program Managers should meet with the Site Manager when assigning these keys.

2.0 Orientation
The following provides information about using the Roll and Scroll RPMS Behavioral Health System and the RPMS Behavioral Health System Graphical User Interface (GUI).

2.1 Standard Conventions (Roll and Scroll)

2.1.1 Caps Lock
Always work with the Caps Lock on.

2.1.2 Default Entries
Any time a possible answer is followed by double slashes (///), press Enter key to default to the entry displayed. If you do not want to use the default response, type your new response after the double slashes ///.

Do you want to display the health summary? N/// (No Health Summary will be displayed.)

Figure 2-1: Default entry screen, which shows accepting the default entry

2.1.3 Help
Online help can be obtained at any data entry field by typing one, two, or three question marks (? , ??, ???). If available, a narrative description of the expected entry or a list of choices will appear.

2.1.4 To Back Out
Pressing the number 6 while holding down the shift key will generate the caret (^) symbol. This symbol terminates the current action and backs you out one level.

2.1.5 Exit
Type HALT at a menu option prompt to exit from RPMS at any time.

Type RESTART at a menu option prompt to bring you out to the “Access Code:” prompt.

Type CONTINUE at a menu option prompt to exit from RPMS and to return to the same menu you were using when you next sign on to RPMS.
2.1.6 Same Entries

For certain types of data fields, primarily those that use lists of possible entries (such as facilities, diagnoses, communities, patients, etc.), press the spacebar key and then Enter to repeat the last entry you used at the prompt.

2.1.7 Lookup

Be careful of misspellings. If unsure of the spelling of a name or an entry, type only the first few letters. RPMS will display all choices that match those beginning letters.

Example:

<table>
<thead>
<tr>
<th>PATIENT NAME: WARM</th>
</tr>
</thead>
<tbody>
<tr>
<td>1       WARMAN, BARRY       M 05-05-1989 054270542 PIMC 101623</td>
</tr>
<tr>
<td>2       WARMAN, CHRIS       F 06-16-1954 001290012 PIMC 100039</td>
</tr>
</tbody>
</table>

Figure 2-2: Patient lookup screen

2.1.8 Pause Indicator

The <> symbol is usually displayed when a multiple page report reaches the bottom of a display screen and there are additional pages in the report. Press Enter to see the next page or type a caret (^) to exit the report.

2.1.9 Dates and Times

You can enter dates and times in a number of formats. If the system prompts for a date alone, the acceptable formats are as follows:

- T (today)
- 3/28
- 0328
- 3-28
- 3.28
- T-1 (yesterday)
- T-30 (a month ago)
- T+7 (a week from today)

**Note:** If you do not enter the year, the system defaults to the current year.
If the system prompts for time, anything between 6 AM and 6 PM will be recorded correctly by entering a number or military time. Between 6 PM and 6 AM, use military time or append the number with an A or P.

Example:
- 130 (1:30 PM)
- 130A (1:30 AM)

If the system prompts for both date and time, the acceptable formats are as follows:

Example:
- T@1 (Today at 1 PM)
- 4/3@830

2.1.10 Stop
To stop a report while it is in processing mode or if you need an emergency out, press Ctrl-C to immediately exit from the program.

2.1.11 Delete
Typing the at sign (@) in a field containing data will delete the existing data in that field.

2.2 ListMan (Roll and Scroll)
The AMH Reporting program uses a screen display called ListMan for review and entry of data. The system displays data in a window-like screen. Menu options for editing, displaying, or reviewing the data are displayed in the bottom portion of the window.

Even though you might be using a personal computer as a RPMS terminal, you cannot use the mouse for pointing and clicking to select a menu option.

You can view additional menu options for displaying, printing, or reviewing the data by typing two question marks (??) at the “Select Option” prompt. Entering the symbol or letter mnemonic for an action at the “Select Action” prompt will result in the indicated action.

In the following example, two question marks (??) were keyed at the “Select Action” prompt to see the list of secondary options available.
At the “Select Action” prompt, you can do the following:

- Type a plus sign (+) in a display that fills more than one page to see the next full screen (when you are not on the last screen).
- Type a hyphen (-) to display the previous screen (when you are not on the first screen). This command will only work if you have already reviewed several screens in the display.
- Press the up arrow key to move the screen display back one line at a time.
- Press the down arrow key to move the screen display forward one line at a time.
- Press the right arrow key to move the screen display to the right.
- Press the left arrow key to move the screen display to the left.
- Type `FS` in a multi-page display to return to the first screen of the display.
- Type `LS` in a multi-page display to go to the last screen in the display.
- Type `GO` and the page number of a multi-screen display to go directly to that screen.
- Type `RD` to redisplay the screen.
- Type `PS` to print the current screen.
- Type `PL` to print an entire single or multi-screen display (called a list).
• Type **SL** to be prompted for a word that you wish to search for in the list. Press Enter after your word selection to move to the first occurrence of the word. For example, if you were many pages into a patient’s Face Sheet and wanted to know the patient’s age, you could type **SL**, then type age, and press Enter to move to the age field.

• Type **ADPL** to either display or not display the list of menu options in the window at the bottom of the screen.

• Type **QU** to close the screen and return to the menu.

### 2.3 ScreenMan (Roll and Scroll)

#### 2.3.1 Using the ScreenMan Window

When using ScreenMan for entering data, press Enter to accept defaulted data values or after you enter a data value into a field. The tab or arrow keys can be used for moving between fields or for bypassing data fields for which you do not want to enter a value. The system automatically fills in much of the demographic information when you enter patient, program, and course of action fields during the preliminary data entry process. In addition, if program defaults have been set, the system displays that information on the screen.

![Figure 2-4: Using ScreenMan sample screen one](image-url)
If you make a change or new entry on the form, press Enter to record the change. A confirmation dialog might appear for further information. If necessary, a pop-up window might appear for further entry of information. For example, in the above example, typing Y at the “Any Secondary Providers” prompt indicates that there was a secondary provider; but you must press Enter after typing Y to open the dialog and record the secondary provider information.

Type E and press Enter to close the screen, after all the required data has been entered. Type Y to save any changes.

2.3.2 Using the Pop-up Window

Press Enter to move between fields, when inputting data in a screen. Press Tab to move to the “Command” prompt (Close option by default). Press Enter to close the screen and return to the original data entry screen.

Figure 2-5: Using ScreenMan, sample screen two

Press Enter to open a text editor screen.

Figure 2-6: Using ScreenMan, sample screen three
2.4 Full Screen Text Editor (Roll and Scroll)

While many of the data entry items in the Behavioral Health system are coded entries or items selected from a table, there can be extensive text entry associated with clinical documentation, treatment plans, intake documents, etc. RPMS has two text editors, a line editor, and a full screen editor. Most users find it more convenient to use the Full Screen Text Editor.

In many ways, the Full Screen Text Editor works just like a traditional word processor. The lines wrap automatically; the up, down, right, and left arrow keys move the cursor around the screen, and a combination of upper- and lower-case letters can be used. On the other hand, some of the conventions of a traditional word processing program do not apply to the RPMS full screen editor. For example, the Delete key does not work. Delete text by moving one space to the right of the error and backspacing to remove the erroneous entry.

When entering a lengthy narrative, you have the option of typing the narrative in a traditional word processing application like Word or Word Perfect and then pasting the text into the open RPMS window.

Table 2-1 lists the most commonly used RPMS text editor commands.

<table>
<thead>
<tr>
<th>Action Needed</th>
<th>Use These Keys</th>
</tr>
</thead>
<tbody>
<tr>
<td>Delete a line (extra blank or text)</td>
<td>PF1(F1) followed by D</td>
</tr>
<tr>
<td>Join two lines (broken or too short)</td>
<td>PF1(F1) followed by J</td>
</tr>
<tr>
<td>Save without exiting</td>
<td>PF1(F1) followed by S</td>
</tr>
<tr>
<td>Exit and save</td>
<td>PF1(F1) followed by E</td>
</tr>
<tr>
<td>Quit without saving</td>
<td>PF1(F1) followed by Q</td>
</tr>
<tr>
<td>Top of text</td>
<td>PF1(F1) followed by T</td>
</tr>
</tbody>
</table>

Figure 2-7 shows a sample Text Edit screen.

```
==[ WRAP ]==[ INSERT ]======< S/O/A/P >=================[ <PF1>H=Help ]====
This is a demonstration of how to type and use the full screen editor. When all relevant information has been entered, press [F1]E

<===T=====T=====T=====T=====T=====T=====T=====T=====T=====
Bottom of text            PF1(F1) followed by B
```

Figure 2-7: Using Text Editor, sample screen 1

Press F1 and type H to display all available commands for the RPMS Full Screen Editor. Type a caret (^) to exit the Help screens.

* BEHAVIORAL HEALTH VISIT UPDATE *    [press <F1>E when visit entry is complete]
Encounter Date: OCT 1, 2009                      User: THETA, SHIRLEY
Patient Name:  ALPHAA,CHELESA MARIE   DOB: 2/7/75    HR#:  116431
---------------------------------------------------------------------------
Display/Edit Visit Information  Y      Any Secondary Providers?: N

___________________________________________________________________________

COMMAND:                                   Press <PF1>H for help    Insert

Figure 2-8: Using Text Editor, sample screen 2

- If the cursor is at the “COMMAND” prompt, type E and S to save and exit the data entry screen.
- If the cursor is not at the “COMMAND” prompt, press the F1 key and type E. These commands will also save the data and exit the data entry screen.

2.5 Word Processing Editors (Roll and Scroll)

If you see what is displayed in Figure 2-9 when entering a word processing field, then your default editor has been set to the RPMS line editor.

Figure 2-9: RPMS line editor default

You can change to the full screen editor, as follows:

1. At any menu prompt, type TBOX. ToolBox is a secondary menu option that all users can access but do not normally see on their screen.
2. At the “Select User’s Toolbox Option” prompt, type **Edit User Characteristics** and a window will display.

3. Press the down arrow key to move to the **Preferred Editor** field. To change your preferred editor to the Screen Editor, type **SC**. Continue to press the down arrow until the cursor reaches the “Command” prompt.

4. At the “Command” prompt, type **S** and press Enter to save your changes. Type **E** and press Enter to Exit the screen. Figure 2-11 shows the **Edit User Characteristics** screen and fields.

---

**Note**: Section 2.4 provides more information on using the Full Screen Text Editor.

### 2.6 Pop-up Windows (GUI)

The application displays pop-up windows that have the same functional controls on them. Generally, these are Crystal Report windows.
Scroll through the text on the current page by doing one of the following:

- Use the scroll bar.
- Double-click on any line of text. Then use the up and down arrows keys to scroll.

The information on the last line of the pop-up window displays the Current Page (being displayed), the total number of pages, and the zoom factor (of the text of the pop-up).

The pop-up window only displays the first page (when you first access the window). If there is more than one page, use the Next Page and Last Page buttons to move to that page. Otherwise, specify the page number to move to. Section 2.6.2 provides more information on buttons on the toolbar.

### 2.6.1 Buttons on Title Bar

The **Minimize**, **Maximize**, and **Exit Program** buttons on the upper right function just as the Windows equivalents.
2.6.2 Buttons on the Toolbar

The following describes the functions of the various buttons on the toolbar.

**Note:** The Close Current View button does not function.

**Print Report Button**

Use the Print Report button to output the text on the pop-up window.

1. Click the Print Report button

2. The Print dialog displays.

![Print dialog](image)

Figure 2-14: Print dialog

This is the same Print dialog as the Windows equivalent. Select the printer, number of copies, page range, and other properties used to output the contents of the pop-up.

**Move to Page Buttons**

The Move To Page buttons provides the means to go to adjacent pages in the text of the pop-up.

From left to right, the buttons do the following: Go to the first page; go to the previous page; go to the next page; go to the last page.
Go to Page

Click the Go to Page button ( ) to specify a page to move to.

After clicking the Go to Page button, the application displays the Go to Page dialog.

![Go to Page dialog](image)

Figure 2-15: Go to Page dialog

a. Type the page number to go to in the Free Text field.
b. Click OK to display the particular page of the pop-up (otherwise, click Cancel).
c. If you specify a page outside the range of pages in the pop-up, the application will display a blank page.

Find Text

Click the Find Text ( ) button to access the Find Text dialog.

![Find Text dialog](image)

Figure 2-16: Find Text dialog

d. In the field, type the text to search for in the pop-up window.
e. Click Find What to search for the text screen. (Otherwise, click Cancel.)
f. The Find Next function causes the application to search the text of the pop-up for the text string and to highlight the line of text containing the first occurrence of the text string.
g. Keep clicking Find Next to search for the next occurrence of the text string.
h. When there are no other occurrences, the system displays the Crystal Report Windows Forms Viewer information message that states that the application has finished searching the document. Click OK to close the information message. The focus returns to the Find Text dialog.
**Zoom Button**

Use the **Zoom** button to change the size of the text.

1. Click the **Zoom** (🔍) button.

2. Select a new size from the list.

---

**Note:** This action changes the size of the text of the pop-up (for easier reading, for example). This setting does not affect the output of the pop-up.

---

### 2.7 Using the Calendar (GUI)

Date and time fields exist throughout the GUI (Figure 2-17).

![Sample Date and Time field](image)

**Figure 2-17: Sample Date and Time field**

There are multiple ways to set a date and time in the field:

- Type `M` in the day item to set the day to Monday; type `09` in the month item to change the month to September.

- Place the cursor in an item (day of week, month, etc.) and press the up or down arrow keys to step through the available options.

Otherwise, follow these steps:

1. Click the date field list to display the calendar. The calendar always indicates the current date.

![Sample Calendar for Date Field](image)

**Figure 2-18: Sample Calendar for Date Field**

2. Change to another date by clicking on it. The selected date will display in the **Date** field.

3. Press the left or right arrow key to move from month-and-day to the next month-and-day.
4. To change the year, click the year label and click the up and down button to step through the years.

![2008](image)

Figure 2-19: Change Year

5. To display the previous or next month’s calendar, click the left or right arrow buttons.

6. To display a specific month, click the month label, and select from the list displayed.

<table>
<thead>
<tr>
<th>January</th>
<th>February</th>
<th>March</th>
<th>April</th>
<th>May</th>
<th>June</th>
<th>July</th>
<th>August</th>
<th>September</th>
<th>October</th>
<th>November</th>
<th>December</th>
</tr>
</thead>
</table>

Figure 2-20: List of months to select

7. Right-click the month label to select Go to Today and return to today’s date.

8. Press the up or down key to step through the calendar week by week.

9. Press the left or right arrow key to step through the calendar day by day.

### 2.8 Using the Search Window (GUI)

Several fields in the application have a list that accesses a search window. For example, the Community field would access the Community search window.
This type of window has similar functionality for other fields.

Click Close to dismiss the window and you return to the previous window.

1. At the Search String field, type a few characters of the search criteria.

2. Click Search to display the retrieved records in the Community list box.

3. Select a record and click OK to populate the appropriate field on the open form. (Otherwise, click Close.)

4. Another way to populate the field is to select a record in the Most Recently Selected list box and click OK.

2.9 Using the Search/Select Window (GUI)

Several fields in the application have a list that accesses a search/select window.

For example, the Add button on the POV tab of the Visit Data Entry screen displays the dialog in Figure 2-22.
The following describes how to use this window. Other search/select windows work in a similar manner (for example Secondary Provider).

Click the Close button to dismiss the window and return to the previous window.

1. At the Search String field, type a few characters of the search criteria.
2. Click Search and the retrieved records display in the POV list box.
3. To add one or more records from the POV group box to the Selected Items list box, click the right arrow button.
4. To add one or more records from the Most Recently Selected list box to the Selected Items list box, click the right arrow button.
5. Similarly, remove one or more selected records from the Selected Items list box by clicking the left arrow button.
6. When the Selected Item list box is complete, click OK. (Otherwise, click Close.)
2.10 Using the Multiple Select Window (GUI)

Several fields in the application have a list that accesses a multiple-select window. For example, the *AXIS IV* select window, as shown below.

![Sample AXIS IV multiple-select window](image)

Figure 2-23: Sample AXIS IV multiple-select window

Click the **Close** button to dismiss the window.

1. To add one or more selected items in the *Substance* list box to the *Selected Items Substance* list box, click the right arrow. Select more than one code by holding down the Ctrl key and selecting the next code.

2. To move one or more selected records from the *Selected Items Substance* list box to the *Substance* list box, click the left arrow.

3. When the *Selected Item* list box is complete, click **OK**.
2.11 Free Text Fields (GUI)

Free Text fields are fields that users can type information into; these fields do not have a list from which to select an option to populate it.

An example of the Free Text field is the Axis III field on POV tab of the Visit Data Entry dialog.

There is a context menu to aid in editing the text (Figure 2-24).

![Context menu to aid in editing text](image)

Figure 2-24: Context menu to aid in editing text

These options operate just like those in any Windows application. The meanings of the actions are as follows:

- **Undo** removes the last edit action.
- **Cut** removes the selected text from its current position and places it on the clipboard.
- **Copy** copies the selected text and places it on the clipboard (the text is NOT removed).
- **Paste** copies the contents of the clipboard and places it in the field at the current cursor position.
- **Delete** removes the selected text from its current position.
- **Select All** highlights all of the text in the current field.

**Note:** For long Free Text fields, users can type the contents of the field in a word processing application to check spelling and view the entire text string. Then, copy the text string from the word processing application and paste it in the Free Text field.

2.12 Selecting a Patient

The following provides information about selecting a patient in Roll and Scroll as well as the RPMS Behavioral Health System (GUI).
2.12.1 Patient Selection (Roll and Scroll)

The application displays the “Select Patient” prompt.

- Type a few characters (at least three) of the patient’s last name, Social Security Number (SSN), Health Record Number (HRN), or date of birth (use format MM/DD/YYYY).

- The application will accept either form of the patient’s name in the search criteria: LASTNAME,FIRSTNAME or LASTNAME, FIRSTNAME (space after the comma).

2.12.2 Patient Selection (GUI)

Select a patient in the following circumstances:

- When no patient has been selected and you select the “One Patient” option (such as under Visit Encounters)

- When you want to change patients. Change patients by selecting Patient | Select or by right-clicking on the menu tree.

In either case, the application displays the Select Patient dialog.

![Select Patient dialog](image)

Figure 2-25: Select Patient dialog

- Click the Help button to access the online help for this dialog.

- Click the Clear button to remove all data from the Patient List box and from the text box near the top.

1. At the field, type a few characters of the patient’s last name (at least three), Social Security Number (SSN), Health Record Number (HRN), or date of birth (use format MM/DD/YYYY) in the Patient Lookup Options field.
The application will accept either form of the patient’s name in the search criteria: LASTNAME, FIRSTNAME or LASTNAME, FIRSTNAME (space after the comma).

2. Determine the number of matches by selecting an option from the Matches list (the default is All).

3. Click Display.

4. The application retrieves the valid candidates and displays them in the Patient List box. If there are no candidates, then the list box remains empty. In addition, a message will display in the bottom left corner stating “0 records found.”

5. Use the scroll bars to scroll through the retrieved names.

6. Double-click the patient to select. The selected patient becomes the active patient.

2.13 Sensitive Patient Tracking

As part of the effort to ensure patient privacy, additional security measures have been added to the patient-access function. Any patient flagged as Sensitive will have access to the patient’s record tracked. In addition, warning messages will be displayed when staff (not holding special keys) accesses these records. If the person chooses to continue accessing the record, a bulletin is sent to a designated mail group. For further information on Sensitive Patient Tracking please see the Patient Information Management System (PIMS) Sensitive Patient Tracking User Manual.
If a patient is listed as Sensitive in the Sensitive Patient Tracking application, the word SENSITIVE will be displayed in Social Security, Date of Birth, and Age columns on the Select Patient dialog.

**GUI Example**

![Select Patient dialog showing sensitive patient](image)

Figure 2-27: Sample **Select Patient** dialog showing sensitive patient

Figure 2-28 displays the warning message users receive while in the GUI.

![Warning message displayed in GUI](image)

Figure 2-28: Warning message displayed in GUI

Click **Yes** to access the patient’s record. (Otherwise, click **No**. In this case you return to the **Select Patient** dialog.)

**Roll and Scroll Example**

There can be two types of messages in Roll and Scroll.

1. The Restricted Record warning message is shown in Figure 2-29.

```plaintext
*** WARNING ***
*** RESTRICTED RECORD ***
```
2. A simple warning message is shown below.

*** WARNING ***
*** RESTRICTED RECORD ***

2.14 Electronic Signature

The following provides information about the electronic signature. This signature applies to Roll and Scroll as well as the GUI. You use the electronic signature to sign a SOAP/Progress note, Intake document, and Update document.

2.14.1 Creating Your Electronic Signature

1. At the “Select TIU Maintenance Menu Option” prompt, type TBOX.

2. Select the Electronic Signature Code Edit option.

3. Prompts will appear for the electronic signature on SOAP/progress notes. You should not enter your credentials (such as MD) under both the block name and title or it will appear twice. Make sure your signature block printed name contains your name and (optionally) your credentials.

INITIAL: MGH/
SIGNATURE BLOCK PRINTED NAME: MARY THETA//MARY THETA, RN
SIGNATURE BLOCK TITLE
Figure 2-32: Prompts that display at the beginning of the process

4. When the following prompt appears in RPMS:

Enter your Current Signature Code:

Figure 2-33: Prompt to enter your current electronic signature

The above prompt means you already have an electronic signature code.

5. When the following prompt appears in RPMS, enter a new code.

Enter code:

Figure 2-34: Prompt for a new code

6. Enter a new code (using between 6 and 20 characters) with Caps Lock ON. However, when you enter the electronic signature (on a note for example), it can be in lower case. No special characters are allowed in the code.

7. If you forget the code, it must be cleared out by your Site Manager; then you must create a new one. You are the only user who can enter your electronic signature code.

2.14.2 Electronic Signature Usage

Each patient-related encounter can have only one SOAP/Progress Note with an electronic signature. Only the primary provider of service can electronically sign the SOAP/Progress Note, Intake document, or Update document.

- Electronically signed notes with text cannot be edited.
- Blank SOAP/Progress Notes cannot be signed.

Signed SOAP/Progress Notes can only be deleted by users that have the AMHZ DELETE SIGNED NOTE security key.

An encounter record containing an unsigned note can be edited or deleted.

Electronic signatures do not apply to BH encounters created in the EHR.

Electronic signatures cannot be applied to SOAP/Progress Notes that were created before the capability of electronic signature was available in AMH. Electronic signatures do not apply to a visit that was created prior to Version 4.0 install date. In this case, you get the following message: “E Sig not required for this visit, visit is prior to Version 4.0 install date.”
2.14.3 Data Entry Requirements (Roll and Scroll)

The field for electronic signature is part of the MH/SS RECORD file that includes the date and time the signature was affixed.

Figure 2-35 is a sample of the electronic signature and date/time stamp in the SOAP/Progress Note section of the printed encounter record.

![Sample Electronic Signature](image)

Figure 2-35: Sample date/time stamp for electronic signature

2.14.4 Assign PCC Visit

The application will apply the following check: The visit will not be passed to PCC if the SOAP/Progress Note associated with the record has not been signed.

When the provider exits the encounter, the application will determine if the provider is the primary provider or not.

- If the current user is the primary provider and is trying to edit/enter the record, that person is permitted to electronically sign the SOAP/Progress Note.
- If the current user is NOT the primary provider and is trying to edit/enter the record, that person is not permitted to electronically sign the SOAP/Progress Note. In this case, the application displays the message: Only the primary provider is permitted to sign the SOAP/Progress Note. The encounter will be saved as ‘unsigned.’ Additionally, a message will display stating: No PCC Link. Note not signed.

2.14.5 Signing a Note (GUI)

1. If you have entered a SOAP/progress note, the application displays the **Sign?** dialog.

![Sign Dialog](image)

Figure 2-36: **Sign** dialog

- Click **No** to save the encounter record without a signature to the note.
- Click **Yes** and the application displays the **Electronic Signature** dialog.
Behavioral Health System (AMH) Version 4.0 Patch 8

2.14.6 Signing a Note (Roll and Scroll)

After you save and exit an encounter record and you have entered a note, the application asks for your signature.

- If you use your valid electronic signature, the application saves the encounter record with a signed note.

Figure 2-37: **Electronic Signature** dialog

- Type your valid electronic signature and click **OK**. This process saves the encounter with a signed note.
- If you enter an invalid electronic signature and click **OK**, the application displays the Invalid notice that states: Invalid Signature Code. Click **OK** and the focus returns to the **Electronic Signature** dialog.
- Click **Close** on the **Electronic Signature** dialog and the application displays the **Are You Sure?** dialog.

Figure 2-38: **Are you Sure?** dialog

- Click **No** and the focus returns to the **Electronic Signature** dialog.
- Click **Yes** and the application displays the **Message** dialog.

Figure 2-39: **Message** dialog

- Click **OK**. The encounter record will not have a signed note.

- If you use your valid electronic signature, the application saves the encounter record with a signed note.
If you use an invalid electronic signature, the application does not save the encounter with a signed note.

If you edit a visit with a signed note, the application displays a message indicating that the note cannot be edited.

```
The progress note has been electronically signed. You will not be able to edit the note.
```

Figure 2-41: Message about progress note already signed.

If you edit the note with an unsigned note and you are not the primary provider, you will get a message as in Figure 2-42.

```
Only the Primary provider is permitted to sign a note.
```

Figure 2-42: Message– only the primary provider can sign a note

### 2.15 Login to GUI

If this is the first time logging into the GUI, the IHS Behavior Health System Login dialog displays.

![IHS Behavioral Health System Login dialog](image)

2. Click **Edit Connections** option on the list for the **RPMS Server** field. The **RPMS Server Connection Management** dialog displays.
3. Click **New** to create a new connection or select an existing connection and click **Edit**.

   The application displays the **Edit RPMS Server Connection** dialog.

   ![Sample Edit RPMS Server Connection dialog](image)

   Figure 2-45: Sample **Edit RPMS Server Connection** dialog

   Do not check the **Default RPMS Server Connection** or **Use Windows Authentication** checkboxes.

4. At the **Connection Name** field, type the name of the connection (your choice of words).

5. At the **Server Address/Name** field, type the number, including punctuation, of the server’s IP address. An IP address is typically four groups of two or three numbers, separated by a period (.), e.g., 161.223.99.999. Your Site Manager will provide this information.
6. At the **Server Post** field, type the number of the server port. Your Site Manager will provide this information.

7. At the **Server Namespace** field, consider the following:

   If your site has multiple databases on one server, you will additionally need to type the namespace, which is typically a text string, e.g., DEVEH.

8. At the **Use default namespace** field, select this checkbox if the Server Namespace is the default one to use.

   After populating the above fields, the **Test Connection** button becomes active.

9. Click the **Test Connection** button to display the **Test Login** dialog.

   a. Populate the **Access Code** and **Verify Code** fields and then click **OK**.
   
   b. After clicking **OK**, if the connection is correct, the application displays the Connection Test message that states: RPMS login was successful.
   
   c. Otherwise, the application will display an error message. Click **OK** to return to the **Test Login** dialog.

10. After the Edit RPMS Server Connection dialog is complete, click **OK** (otherwise, click **Cancel**). Clicking **OK** saves the information, and this information displays on the **RPMS Server Connection Management** dialog.

11. After the RPMS Server Connection Management dialog is complete, click **Save** (otherwise, click **Cancel**).

12. After clicking **Save** on the **RPMS Server Connection Management** dialog, the application displays the **IHS Behavioral Health System Login** dialog.

![Sample login dialog](image)

Figure 2-46: Sample login dialog

The designated server displays in the RPMS Server field.
13. Type your RPMS access and verify codes. These are the same access and verify codes that you would use to open any RPMS session.

   Do not use the field with the checkbox.

14. Click OK to access the RPMS Behavioral Health System tree. (Otherwise, click Cancel.)

### 2.16 RPMS Behavioral Health System Tree

Below is the default display of the RPMS Behavioral Health System tree structure.

![Figure 2-47: Tree structure for the RPMS Behavioral Health System](image)

The tree structure is similar to any tree structure in MS Office.

- Click the minus (-) icon to collapse the option. The icon will change to the plus (+) icon. The **View Patient Data**, **Treatment Plans** and **Suicide Reporting Forms** options are collapsed in the screen capture above.

- Click the plus (+) icon to expand the option. The icon will change to the minus (-) icon. The **Visit Encounters** option is expanded in the screen capture above.

**Patient Menu**

Use the **Patient** menu to select the current patient.

**Preferences Menu**

Use the **Preferences** menu to select another division as well as change the font on the main menu tree.
15. At the **Change Division** field, select the Division to use. Use the **Change Division** option to change the **RPMS Division** on the **Select Division** dialog. This option applies to a site that uses more than one RPMS database.

16. Select **Change Menu Font** to access the **Font** dialog. Use this option to change the font on the tree structure.

   ![Font dialog](image1)

   **Figure 2-49: Font dialog**

   a. Use the **Font** dialog to change the Font name, style, and size of the text on the tree structure. In addition, you can add effects like “Strikeout” and “Underline” - these perform like those effects in Microsoft Word. Most users change the font size.

   b. Change the Script option if you need to see the text displayed in another language and you have that language pack installed on the machine you are using. If the language pack is not installed on your machine, the display does not change by selecting another script.

   c. Click **OK** to apply your changes to the text on the tree structure. (Otherwise, click **Cancel**.)

**RPMS Menu**

Use the RPMS menu to access the RPMS system (roll and scroll). After clicking the RPMS menu, the application displays the RPMS Terminal emulator window.
• On the **RPMS Terminal Emulator** window, select **File | Connect** to access the **Connect** dialog. Populate the **Host** field with the IP address and click **OK** (note, you do not need to populate any other fields). After clicking **OK**, you access the RPMS system. Then, login as you normally do.

• After populating the fields on the **RPMS Terminal Emulator** window, they remain the same the next time you log in (the application pre-populates the required fields).

• After completing the activities in RPMS, select **File | Exit** to return to the GUI part of the application.

**Exit Menu**

Use the **Exit** menu to leave the application. The application displays the Exit information message: “Are you sure you want to Exit?” Click **Yes** to exit (otherwise, click **No**).

**Help Menu**

Use the **Help** menu to access the online help system for the application.

**About Menu**

Use the **About** menu to view information about the application (such as its version number).
3.0 Data Entry

This section provides an overview of the data entry process for Roll and Scroll application and for the RPMS Behavioral Health System (GUI).

3.1 Roll and Scroll

Documentation of patient care and documentation of administrative and group encounters are handled through the Data Entry module of the Behavioral Health System. We recommend that providers do their own data entry at the time of a patient encounter. However, a provider can document patient care on a PCC Encounter Form for data entry later by trained program support staff. Choosing DE from the Behavioral Health main menu can access the options for data entry.

3.2 RPMS Behavioral Health System Graphical User Interface (GUI)

The data entry options are located under the **Visit Encounters** category on the tree structure for the RPMS Behavioral Health System (GUI).
Figure 3-3: Location of Visit Encounters category on tree structure

- **One Patient**: Manage the visits for the one patient within a particular date range.
- **All Patients**: Manage the visits for all of the patients within a particular date range.
- **Group Encounters**: Manage the Group Encounter data for group encounters within a particular date range.

**Browse Visits**: Display visit information for the current patient within a particular date range.
4.0 One Patient Visit Data

This section provides information on how to manage the visit data of one patient for the RPMS Behavioral Health System (AMH) Roll and Scroll and the BHS GUI.

There are two ways to enter/edit patient visit data: using the PDE option or the SDE option on the IHS Behavioral Health System Data Entry menu.

**IHS Behavioral Health System Data Entry Menu**

Select Behavioral Health Data Entry Menu Option: PDE [RET]

Figure 4-1: Options on the IHS Behavioral Health System Data Entry menu

Use this menu for all aspects of recording data items related to patient care, case management, treatment planning, and follow-up.

4.1 Enter/Edit Patient/Visit Data – Patient Centered (PDE)

Use the PDE option on the **Data Entry** menu to add or edit patient visit data. This option was designed specifically for a provider to document a patient encounter and to display all the information for a single patient from a single screen.

Follow these steps:

17. At the “Select Behavioral Health Data Entry Menu Option” prompt, type **PDE**.

18. At the “Select patient name” prompt, type the name of the patient to be used.

If you enter the name of a deceased patient, the application displays the patient’s date of death.
***** PATIENT'S DATE OF DEATH IS Jan 14, 2000@20:30

Ok? Yes/

Figure 4-2: Information about patient’s date of death

- At the “OK?” prompt, type NO and the focus returns to the “Enter Patient Name” prompt.
- At the “OK?” prompt, type YES and the focus goes to the Patient Data Entry window.

a. Type the name of a living patient and the Patient Data Entry window displays.

Figure 4-3: Sample Patient Data Entry window

The following actions are described under Add/Edit Visit Data — Full Screen Mode (SDE). Section 4.2 provides more information.

- **AV** – Add Visit
- **EV** – Edit Visit
- **DR** – Display Record
- **ES** – Edit Soap
- **DE** – Delete Visit
- **PF** – Print Encounter Form
• **ID** – Intake Document  
• **AP** – Appointments  
• **HS** – Health Summary  
• **OI** – Desg Prov/Flag/Pers Hx  
• **EH** – Edit EHR Visit  
• **PPL** – Problem List  
• **SN** – Sign Note  
• **TN** – TIU Note Display  
• **MM** – Send Mail Message

The Treatment Plan Update (TP) is covered under Treatment Plans. Section **10.0** provides more information.

The Update Case Data (CD) is covered under Managing Case Data. Section **6.1** provides more information.

The next section provides information about actions not covered anywhere else.

### 4.1.1 List Visit Dates (LD)

Use the LD option to list the current patient’s visit dates.

19. At the “Select Action” prompt, type **LD**.

20. At the ”Browse which subset of visits for [current patient name]” prompt, use one of the following:

   • **L** – Patient’s Last Visit  
   • **N** – Patient’s Last N Visits  
   • **D** – Visits in Date Range  
   • **A** – All of this Patient’s Visits  
   • **P** – Visits to one Program

   If using **N**, **D**, or **P**, other prompts will display.

   If using **N**, do the following:

   • Type the number of visits to display at the “How many visits should be displayed: (1-99)” prompt. Type any number between 1 and 99.
If using D, do the following:

a. Type the beginning date of the date range at the “Enter Beginning Date of Visit” prompt.

b. Type the ending date of the date range at the “Enter Ending Date of Visit” prompt.

If using P, do the following:

- Type the program to be used at the “Visits to Which Program?” prompt. Use one of the following: M Mental Health Defaults, S Social Services Defaults, C Chemical Dependency or Alcohol/Substance Abuse, O Other

The Browse Patient’s Visit window displays. This is one of the visits using option A.

Figure 4-4: Sample list of visit dates window

4.1.2 GAF Scores (GS)

Use the GS option to display visit with GAF scored recorded.

21. At the “Select Action” prompt, type GS.

22. At the “Browse which subset of visits for patient” prompt, use one of the following:
   - N – Patient’s Last N Visits
   - D – Visits in a Date Range
   - A – All of the Patient’s Visits
- **R** – Visits to One Program
- **P** – Visits to One Program

If using **N**, the following prompts display:

a. At the “How many visits should be displayed: (1-99)” prompt, type any number 1 – 99 (5 is the default).

b. The GAF Scores window displays.

If using **D**, the following prompts display:

c. At the “Enter Beginning Date of Visit” prompt, type the beginning date of the date range.

d. At the “Enter Ending Date of Visit” prompt, type the beginning date of the date range.

e. The GAF Scores window displays.

If using **A**, the GAF Scores window displays.

If using **R**, the following prompts display:

f. At the “Choose” prompt, type one of the following: 1 (Visits in a Date Range), 2 (Visits to One Program), 3 (Visits to One Provider).
   - If using 1, you will be prompted to type the beginning and ending date of the date range.
   - If using 2, you will be prompted to type the program.
   - If using 3, you will be prompted to type the name of the provider.

g. The GAF Scores window displays.

If using **P**, the following prompts display:

h. At the “Which Program” prompt, type the program to be used.

i. The GAF Scores window displays.

### 4.1.3 Face Sheet (FS)

Use the **FS** option to display the Demographic Face Sheet for the patient.
4.2 Add/Edit Visit Data - Full Screen Mode (SDE)

Use the SDE option on the Data Entry Menu to enter/edit visit data for one or more patients. This option does not include access to other treatment information, such as the patient’s treatment plan or case status.

Follow the steps below.

1. At the “Select Behavioral Health Data Entry Menu Option” prompt, type SDE.
2. At the “Which set of defaults do you want to use in Data Entry” field, type the program with which the provider is affiliated so that the predefined defaults for clinic, location, community, and program will be automatically applied to the visit. Use one of the following:

- M – Mental Health Defaults
- S – Social Services Defaults
- C – Chemical Dependency or Alcohol/Substance Abuse
- O – Other

3. At the “Enter ENCOUNTER DATE” field, type the date of the encounter. The acceptable formats are:

- T (today)
- 3/28
- 0328
- 3-28
- 3.28
- T-1 (yesterday)
- T-30 (a month ago)
- T+7 (a week from today)

**Note:** If you do not enter the year, the system defaults to the current year.

The application displays “Creating new record” message when adding a visit.

4. The **Update BH Forms** window displays.
EV Edit Record   HS Health Summary   PPL Patient’s Problem List
OI Desg Prov/Flag ES SOAP/CC Edit AP Appointments
DR Display Record SD Switch Dates MM Send Mail Message
DE Delete Record EH Edit EHR Record Q Quit
Select Action:

Figure 4-6: Sample Update BH Forms window

The asterisk (*) preceding the number of the encounter record indicates that the record contains an unsigned note.

- The PPL option is fully described below. Section 9.1 provides more information.
- The AC option is fully described below. Section 7.0 provides more information.
- The OI option is fully described below. Section 6.1.4 provides more information.
- The ID option is fully described below. Section 12.1 provides more information.

4.2.1 Add Patient Visit (AV)

Use the AV option to add a patient visit.

1. At the “Select Action” prompt, type AV.

2. At the “TYPE THE PATIENT’S HRN, NAME, SSN OR DOB” prompt, type the name of the patient to use.

3. At the “Enter PRIMARY PROVIDER” field, type the primary provider name for the patient visit (the default is the current logon user).

The Behavioral Health Visit Update screen displays. This screen is available when using the EV or AV options on the Updated BH Forms window.

* BEHAVIORAL HEALTH VISIT UPDATE * [press <F1>E when visit entry is complete]
Encounter Date: MAR 5,2009                     User: THETA,SHIRLEY

Figure 4-7: Sample Behavioral Health Visit Update screen
If you are the primary provider and you save the data on the Behavioral Health Visit Update window, the application asks if you want to sign the note for the visit. Section 2.14.6 provides more information on signing a note (Roll and Scroll).

The underlined fields on the **Behavioral Health Visit Update** screen are required.

4. At the “Arrival Time” prompt, type the arrival time. The default is 12:00. Change this time if needed. Anything between 6 AM and 6 PM will be recorded correctly by entering a number or military time. Between 6 PM and 6 AM, use military time or append the number with an A or P.

Examples:
- 130 (1:30 PM)
- 130A (1:30 AM)

5. At the “Display/Edit Visit Information” prompt, type N (no) or Y (yes). Use Y to access the Visit Information pop-up.

Figure 4-8: Sample **Visit Information** pop-up

The application automatically populates the fields on the Visit Information pop-up according to which set of defaults that were selected at the “Which set of defaults do you want to use in Data Entry” prompt on the Site Parameters menu.

The underlined fields on the Visit Information pop-up are required.

a. At the “Program” prompt, type the program associated with the visit. Use one of the following: M (Mental Health), S (Social Services), O (Other), or C (Chemical Dependency).

b. At the “Location of Encounter;” prompt, type the location of the encounter.

c. At the “Clinic” prompt, type the clinic context. The response must be a clinic that is listed in the RPMS Standard Code Book table.

d. At the “Appointment/Walk-In” prompt, type the visit type. Use one of the following: A (Appointment), W (Walk In), or U (Unspecified – for non-patient contact or telephone contact).

e. At the “Type of Contact” prompt, type the contact type (the activity setting).
f. At the “Community of Service” prompt, type the community of service. The response must be a community that is included in the RPMS community code set.

The following are the fields on the **Behavioral Health Visit Update** screen.

6. At the “Any Secondary Providers?” prompt, type **Y** (yes) or **N** (no) to indicate if there are any additional secondary BH providers that were also providing care during this particular encounter.

Type **Y** to access the Enter/Edit Providers of Service pop-up.

```
******** ENTER/EDIT PROVIDERS OF SERVICE ********

Encounter Date: MAR 5, 2009@12:00       User: THETA, SHIRLEY
Patient Name: DEMO, DARRELL LEE

PROVIDER: THETA, STUART PRIMARY/SECONDARY: PRIMARY
PROVIDER:
PROVIDER:
PROVIDER:
PROVIDER:
PROVIDER:

```

The underlined prompts are required.

a. At the “PROVIDER” prompt, type the secondary provider name.

b. At the “PRIMARY/SECONDARY” prompt, type the name of the secondary provider (more than one secondary provider can be used).

The following are the fields on the **Behavioral Health Visit Update** screen.

7. At the “Chief Complaint/Presenting Problem” prompt, type the text of the chief complaint or presenting problem using 2 to 80 characters in length. This information describes the major reason the patient sought services.

8. At the “SOAP/Progress Note <press enter>” prompt, press Enter to access an input window. Populate it with the text of the note. You can enter the notes using any of the standard formats, such as SOAP, DAP, or free text.
Table 4-1 lists the most commonly used RPMS text editor commands.

<table>

</table>

9. At the “Comment/Next Appointment <press enter>” prompt, press Enter to access an input window. Populate it with the text of the comment about the next appointment. This field is not used for appointment scheduling.

10. At the “PURPOSE OF VISIT (POVS) <enter>” prompt, press Enter to access the Purpose of Visit Update pop-up.

Figure 4-11: Sample BH Record Entry - Purpose of Visit Update

When recording a patient visit, at least one Diagnosis and Narrative are required. The underlined fields are required.

a. At the “DIAGNOSIS” prompt, type the POV (the one- or two-digit AMH Purpose of Visit Code or the more specific five-digit DSM-5 diagnostic code). Section Appendix C: provides more information about DSM copyright and trademark information.
b. At the “NARRATIVE” prompt, type the narrative for the diagnosis (2–80 characters) or use one of the coded narratives by specifying its number.

The following are the fields on the Behavioral Health Visit Update screen.

11. At the “Any CPT Codes to enter?” prompt, type Y (yes) or N (no).

Use Y to access the Add/Edit CPT Procedures pop-up.

![**** Add/Edit CPT Procedures**** [press <F1>C to return to main screen]](image)

Figure 4-12: Sample Add/Edit CPT Procedures window

The underlined prompts are required.

a. At the “CPT Code” prompt, type the CPT code for Behavioral Health services. The CPT field will also accept Healthcare Procedure Coping System (HCPCS) that are commonly used by Medicare. State and Local codes might be available if the facility’s billing office has added them to the RPMS billing package. These codes are based on the history, examination, complexity of the medical decision-making, counseling, coordination of care, nature of the presenting problem, and the amount of time spent with the patient. More than one code can be used.

b. After specifying the CPT, HCPCS, or other billing code, the prompts for quantities and up to two modifiers display.

![QUANTITY: 1 MODIFIER: MODIFIER 2:](image)

Figure 4-13: Prompts for the code entered

c. At the “Quantity” prompt, type the number of CPT codes to use to help facilitate billing.

d. At the “Modifier” prompt, type the modifier for the CPT code. Up to two modifiers can be used. The modifier is a two-digit code.

The following are the fields on the Behavioral Health Visit Update screen.
12. At the “Activity” prompt, type the activity code that documents the type of service or activity performed by the Behavioral Health provider. These activities might be patient-related or administrative in nature only. Use only one activity code for each record regardless of how much time is expended or how diverse the services offered. Certain Activity codes are passed to PCC, and will affect the billing process. Section Appendix A: provides more information about the Activity Codes and Definitions.

13. At the “Activity Time” prompt, type the activity time, using any number between 1 and 9999 (no decimal digits). This is how much provider time was involved in providing and documenting the service or performing the activity. The understood units of measure are minutes. Please note, 0 (zero) is not allowed as a valid entry.

14. At the “# Served” prompt, type the number served, using any number between 0 and 999 (no decimal digits). The default is 1. This refers to the number of people directly served during a given activity and is always used for direct patient care as well as for administrative activities. Group activities or family counseling are examples where other numbers might be listed.

15. At the “Interpreter?” prompt, type 1 (yes) or 0 (no) to indicate if an interpreter was present during the patient encounter. Use Yes only if an interpreter is required to communicate with the patient. This information is available when running reports but is not included on the printed encounter form.

16. At the “Any Patient Education Done?” prompt, type Y (yes) or N (no).

Use Y to access the Patient Education Enter/Edit pop-up.

*PATIENT EDUCATION ENTER/EDIT*  [press <F1>C to return to main screen]
Patient Name: DEMO, DARRELL LEE
--------------------------------------------------------------------------
After entering each topic you will be prompted for additional fields

Display Patient Education History?  N

EDUCATION TOPIC:
EDUCATION TOPIC:
EDUCATION TOPIC:
EDUCATION TOPIC:
EDUCATION TOPIC:

Figure 4-14: Sample Patient Education Enter/Edit screen

a. At the “Display Patient Education History?” prompt, type Y (yes) or N (no) to display the Behavioral Health and PCC patient education history. This is all education provided in the past two years by BH programs. This display is shown in the Output Browser window. You must quit this window to return to prompts.
b. At the “EDUCATION TOPIC” prompt, type the education topic used at this encounter. For a complete list of the current Education Topics, type a question mark (?) at the prompt to view the whole list.

After entering the Education Topic, the pop-up displays, as shown in Figure 4-15.

![Sample pop-up for education topic information](Figure 4-15)

The underlined prompts are required.

c. At the “Education Topic” prompt, type the education topic (can be changed).
d. At the “Individual/Group” prompt, type if the education is for an individual or for a group.
e. At the “Readiness to Learn” prompt, type one of the following:
   - **Distraction**: Use when the patient has limited readiness to learn because the distractions cannot be minimized.
   - **Eager to Learn**: Use when the patient is exceedingly interested in receiving education.
   - **Intoxication**: Use when the patient has decreased cognition due to intoxication with drugs or alcohol
   - **Not Ready**: Use when the patient is not ready to learn.
   - **Pain**: Use when the patient has a level of pain that limits readiness to learn.
   - **Receptive**: Use when the patient is ready or willing to receive education.
   - **Severity of Illness**: Use when the patient has a severity of illness that limits readiness to learn.
   - **Unreceptive**: Use when the patient is NOT ready or willing to receive education.

f. At the “Level of Understanding” prompt, type the level of understanding. This is a required field. Use one of the following:
The following are the fields on the Behavioral Health Visit Update screen.

17. At the “Any Screenings to Record?” prompt, type Y (yes) or N (no).

Use N to accept the default response if no screenings were completed during the visit.

Use Y to access the following pop-up screen.

<table>
<thead>
<tr>
<th>Intimate Partner Violence (IPV/DV)</th>
<th>Display IPV/DV screening history?</th>
<th>N</th>

</tbody>
</table>

Figure 4-16: Sample IPV, Alcohol Screening, and Depression Screening pop-up
The following provides information about the fields on the pop-up.

a. At the “Display IPV/DV screening History?” prompt, type Y (yes) or N (no). If Y was used, the IPV/DV screening history displays on another screen. The display includes screenings entered in both BHS and PCC.

b. At the “IPV Screening/Exam Result” prompt, type the result of the intimate partner violence/domestic violence screening. Use one of the following:
   - N – Negative
   - PR – Present
   - PAP – Past and Present
   - PA – Past
   - REF – Patient Refused Screening
   - UAS – Unable to screen
   - Referral Needed

c. At the “IPV Screening Provider” prompt, type the IPV/DV provider name.

d. At the “IPV Comment” prompt, type the text of any comment related to the IPV/DV screening, using 2–245 characters.

e. At the “Display Alcohol Screening History?” prompt, type Y (yes) or N (no). If Y, the alcohol screening history displays on another screen. The display includes screenings entered in both BHS and PCC.

f. At the “Alcohol Screening Result” prompt, type the result of the alcohol screening. Use one of the following:
   - N – Negative
   - P – Positive
   - UAS – Unable to screen
   - REF – Patient Refused Screening
   - Referral Needed

g. At the “Alcohol Screening Provider” prompt, type the provider name for the alcohol screening.

h. At the “Alcohol Screening Comment” prompt, type the text of any comment related to the alcohol screening, using 2–245 characters.

i. At the “Display Depression Screening History?” prompt, type Y (yes) or N (no). If using Y, the depression screening history displays on another screen.

j. At the “Depression Screening Result” prompt, type the result of the depression screening. Use one of the following:
• N – Negative
• P – Positive
• UAS – Unable to screen
• REF – Patient Refused Screening
• Referral Needed

k. At the “Depression Screening Provider” prompt, type the provider name for the depression screening.

l. At the “Dep Screening Comment” prompt, type the text of any comment related to the depression screening, using 2–245 characters.

The following are the fields on the Behavioral Health Visit Update screen.

Note: The Suicide Risk Assessment is not available in the roll and scroll.

18. At the “Any Measurement?” prompt, type Y (yes) or N (no).

Use Y to access the Measurements pop-up.

*** Measurements ***

<table>
<thead>
<tr>
<th>Measurement Description</th>
<th>Value</th>
<th>Provider</th>
</tr>
</thead>
</table>

Figure 4-17: Sample Measurements pop-up

Measurements will print on the Full Encounter form only (not on the Suppressed Encounter form).

Measurements can only be deleted from the encounter record where they were first recorded.

a. At the “Measurement” prompt, type the type of measurement being taken on the patient. Then the application populates the Description field.

b. At the “Value” prompt, type the numeric value of the measurement. If you populate this field with a value outside the valid value range, the application provides information about what valid values can be used for the field.

c. At the “Provider” prompt, type the name of the provider.

The following are the fields on the Behavioral Health Visit Update screen.
19. At the “Any Health Factors to enter?” prompt, type **Y** (yes) or **N** (no) to indicate that you want to record health factor information about the patient. Use **Y** to access the Patient Health Factor Update pop-up.

```
******* PATIENT HEALTH FACTOR UPDATE *******
Examples of health factors: Tobacco Use, Alcohol Cage, TB Status
Patient Name: DEMO, DARRELL LEE
Display Health Factor History?  N
After entering each factor you will be prompted for additional data items
```

Figure 4-18: Sample Patient Health Factor Update pop-up

a. At the “Display Health Factor History?” prompt, type **Y** (yes) or **N** (no). Use **Y** to have the health factor history for the current patient display on another screen.

b. At the “HEALTH FACTOR” prompt, type the health factor that most closely represents the patient’s health factor status at the encounter for a given health factor category. The other fields about the health factor displays.

```
LEVEL/SERIVITY
QUANTITY
COMMENTS
```

Figure 4-19: Other fields for health factor data

c. At the “Level/Severity” prompt, type **M** (Minimal), **MO** (Moderate), or **H** (Heavy/Severe).

d. At the “Quantity” prompt, type any integer between 0 and 99999.

e. At the “Comments” prompt, type any comments regarding the health factor.

The following are the fields on the Behavioral Health Visit Update screen.

20. At the “Display Current Medications?” prompt, type **Y** (yes) or **N** (no) to display a list of currently dispensed medications.

If **Y**, the list displays on the Output Browser window.

```
OUTPUT BROWSER       Mar 11, 2009 17:59:30       Page: 1 of 1
Medication List for DEMO, DARRELL LEE

*** Medications Prescribed entries in BH Database for last 2 years ***
The last of each type of medication from the PCC Database is displayed below.
TERBUTALINE 5MG TAB    #?    7/17/08
Sig: TAKE TWO (2) TABLETS BY MOUTH DAILY ON TUESDAY, THURSDAY, SATURDAY, AND S
DEXAMETHASONE 0.5MG TAB #?    7/17/08
Sig: TAKE ONE (1) TABLET BY MOUTH EVERY MORNING [OUTSIDE MED]
```
This **Output Browser** screen is the same as using the Display Meds (DM) option on the Patient Data Entry screen.

At the **Select Action** prompt, do one of the following:

- Type a plus sign (+) to display the new screen of information (does not apply to the last screen).
- Type a hyphen (–) to display the previous screen of information (does not apply to the first screen).
- Type **Q** to exit the window. Focus moves to the next prompt.

The following are the fields on the **Behavioral Health Visit Update** screen.

21. At the “MEDICATIONS PRESCRIBED <enter>” prompt, press Enter to access another screen where you can enter the medications prescribed.

See Table 4-1 for a list of the most commonly used RPMS text editor commands.

22. At the “Placement Disposition” prompt, type the active disposition. Use this prompt when hospitalization or placement in a treatment facility is required. Use either the number or first few letters of the placement type. After entering the disposition, the following pop-up displays, as shown in Figure 4-22.
Enter the Facility to which the patient was referred

FACILITY REFERRED TO:

Figure 4-22: Sample pop-up for facility name

a. At the “FACILITY REFERRED TO” prompt, type the name of the facility to which the patient was referred.

The following are the fields on the Behavioral Health Visit Update screen.

23. At the “Visit Flag” prompt, type the visit flag by using any number between 0 and 999 (no decimal digits). This field is for local use in flagging various types of visits. The site will define a numeric value to indicate the definition of the flag. For example, a 1 might mean any visit on which a narcotic was prescribed. You can then, later on, retrieve all visits with a flag of 1 which will list all visits on which narcotics were prescribed.

24. At the “Local Service Site” prompt, type the local service site.

4.2.2 Edit Record (EV)

Use the EV option to edit a particular visit.

1. At the “Select Action” prompt, type EV.

2. At the “Edit Which Record” prompt, type the number of the visit.

The Behavioral Health Record Edit window displays.

Figure 4-23: Sample Behavioral Health Record Edit window
The underlined fields are required.

3. At the “Date” prompt, type the date/time of the visit. Some examples of acceptable formats are as follows:
   - T@1 (Today at 1 PM)
   - 4/3@830

4. At the “Location of Service” prompt, type where the service took place.

5. At the “Program” prompt, type the name of the program with which the provider is affiliated.

6. At the “Outside Location” prompt, type the name of the outside location (3 to 30 characters in length).

7. At the “Clinic” prompt, type the name of the clinic. This field identifies the clinic context. The response must be a clinic that is listed in the RPMS Standard Code Book table.

8. At the “Appt/Walk-in” prompt, type the appointment type, which can be appointment, walk-in, or unspecified (for non-patient contact).

9. At the “Visit Flag” prompt, type the visit flag by using any number between 0 and 999 (no decimal digits). This field is for local use in flagging various types of visits. The site will define a numeric value to indicate the definition of the flag. For example, a 1 might mean any visit on which a narcotic was prescribed. You can then, later on, retrieve all visits with a flag of 1 which will list all visits on which narcotics were prescribed.

10. At the “Type of Contact” prompt, type the contact type (the activity setting).

11. At the “Community” prompt, type the name of the community.

12. At the “Providers <press enter>” prompt, press Enter to access the Enter/Edit Providers of Service pop-up.

******** ENTER/EDIT PROVIDERS OF SERVICE  ********
[press <Fl>C to return to main screen]
Encounter Date: MAR 16, 2009            User: BETAAAAA,LORI
Patient Name: DEMO,DOROTHY ROSE

---
PROVIDER: THETA, SHIRLEY PRIMARY/SECONDARY: PRIMARY
PROVIDER:                        PRIMARY/SECONDARY:
PROVIDER:                        PRIMARY/SECONDARY:
PROVIDER:                        PRIMARY/SECONDARY:

PROVIDER:                        PRIMARY/SECONDARY:
---
The underlined fields are required.

a. At the “PROVIDER” prompt, type the name of the service provider.

b. At the “PRIMARY/SECONDARY” prompt, type the provider type (primary or secondary). Only one primary provider can be used while there can be more than one secondary provider.

The following are the fields on the Behavioral Health Record Edit window.

13. At the “Local Service Site” prompt, type the name of the local service site.

14. At the “Activity” prompt, type the activity code that documents the type of service or activity performed by the Behavioral Health provider. These activities might be patient-related or administrative in nature only. Use only one activity code for each record regardless of how much time is expended or how diverse the services offered. Certain Activity codes are passed to PCC, and this will affect the billing process. See Appendix A: for more information.

15. At the “Activity Time” prompt, type the number of minutes spent on the activity. This is how much provider time was involved in providing and documenting the service or performing the activity. Please note, 0 (zero) is not allowed as a valid entry.

16. At the “# Served” prompt, type the number served at the encounter, any integer between 0 and 999.

17. At the “Interpreter Utilized” prompt, type Y (yes) or N (no). Use Y only if an interpreter is required to communicate with the patient.

18. At the “Chief Complaint/Presenting Problem” prompt, type the text that describes the major reason the patient sought services.

19. At the “SOAP/PROGRESS NOTE” prompt, press Enter to access another window to populate with the text of the note. The note can be edited only if it is unsigned.

20. At the “Comment/Next Appointment” prompt, type the text of the comments about the next appointment.

21. At the “Medications Prescribed” prompt, press Enter to access another window where you enter the medications prescribed.

22. At the “Edit Purpose of Visits?” prompt, type Y (yes) or N (no). Use Y to access the Purpose of Visit Update pop-up.

Enter RETURN to continue or ‘^’ to exit:

Figure 4-25: Sample BH Record Entry - Purpose of Visit Update

The underlined fields are required.

a. At the “Diagnosis” prompt, type the POV (the one- or two-digit AMH Purpose of Visit Code or the more specific DSM-5 diagnostic code).

b. At the “Narrative” prompt, either accept the narrative that is displayed or edit the narrative to more clearly identify the reason for the visit. For example, if Problem code 80 (Housing) was selected, you might want to change it to more accurately reflect the status of the patient’s housing issue - homeless, being evicted, etc.

The following are the fields on the Behavioral Health Record Edit window.

23. At the “Edit Prevention Activities” prompt, type Y (yes) or N (no).

Use Y to access a pop-up to enter one or more medical problems.

Figure 4-26: Fields that define the prevention activities

The underlined prompts are required.

a. At the “Prevention Activities” prompt, type the prevention activity.

b. At the Target” prompt, type the target for the activity that can one of the following: A (Adult), Y (Youth), or F (Family).

The following are the fields on the Behavioral Health Record Edit window.

24. At the “Edit CPT Codes?” prompt, type Y (yes) or N (no).
Type **Y** to access the Add/Edit CPT Procedures pop-up.

```
**** Add/Edit CPT Procedures**** [press <F1>C to return to main screen]

Cpt Code:
Cpt Code:
Cpt Code:
Cpt Code:
Cpt Code:
```

Figure 4-27: Sample *Add/Edit CPT Procedures* window

The underlined fields are required.

a. At the “CPT Code” prompt, type the CPT Code. These E&M codes are based on the history, examination, complexity of the medical decision-making, counseling, coordination of care, nature of the presenting problem, and the amount of time spent with the patient.

b. More than one CPT Code can be used.

The following are the fields on the *Behavioral Health Record Edit* window.

25. At the “Edit Health Factors?” prompt, type **Y** (yes) or **N** (no).

Type **Y** to access the Patient Health Factor Update pop-up.

```
******* PATIENT HEALTH FACTOR UPDATE *******
Examples of health factors: Tobacco Use, Alcohol Cage, TB Status

Patient Name: DEMO,DARRELL LEE

EDUCATION TOPIC:
EDUCATION TOPIC:
EDUCATION TOPIC:

Figure 4-30: Sample Patient Education Enter/Edit screen

   a. At the “Display Patient Education History?” prompt, type Y (yes) or N (no).
      Use Y to display all education provided in the last two years by BH programs. This history is displayed in the Output Browser window.

   b. At the “EDUCATION TOPIC” prompt, type the education topic name. The following pop-up displays where you enter data about the education topic.

   EDUCATION TOPIC: ABD-COMPLICATIONS
   INDIVIDUAL/GROUP: INDIVIDUAL
   READINESS TO LEARN:
   LEVEL OF UNDERSTANDING:
   PROVIDER: THETA, MARK
   MINUTES:
   COMMENT:
   STATUS (Goal):
   GOAL COMMENT:

   Figure 4-31: Sample pop-up for education topic information

   The underlined fields are required.

   c. At the “Education Topic” prompt, type the education topic (can be changed).
d. At the “Individual/Group” prompt, type if the education is for an individual or for a group.

e. At the “Readiness to Learn” prompt, type one of the following:
   - **Distraction**: Use when the patient has limited readiness to learn because the distractions cannot be minimized.
   - **Eager to Learn**: Use when the patient is exceedingly interested in receiving education.
   - **Intoxication**: Use when the patient has decreased cognition due to intoxication with drugs or alcohol.
   - **Not Ready**: Use when the patient is not ready to learn.
   - **Pain**: Use when the patient has a level of pain that limits readiness to learn.
   - **Receptive**: Use when the patient is ready or willing to receive education.
   - **Severity of Illness**: Use when the patient has a severity of illness that limits readiness to learn.
   - **Unreceptive**: Use when the patient is NOT ready or willing to receive education.

f. At the “Level of Understanding” prompt, type the level of understanding. Use one of the following:
   - 1 (Poor)
   - 2 (Fair)
   - 3 (Good)
   - 4 (Group No Assessment)
   - 5 (Refused)

g. At the “Provider” prompt, the name of the provider for the visit (can be changed). The default is the current logged-in user.

h. At the “Minutes” prompt, type the number of minutes spent on education, using any integer 1–9999.

i. At the “Comment” prompt, type the text of any comments about the education topic for the visit, if any.

j. At the “Status (Goal)” prompt, type the status of the education, if any. Use one of the following:
   - **GS** – Goal Set
   - **GM** – Goal Met
   - **GNM** – Goal Not Met
• GNS – Goal Not Set
  k. At the “Goal” prompt, type the text of the stated goal of the education, if any.

The following are the fields on the Behavioral Health Record Edit window.

27. At the “Edit Any Screening Exams?” prompt, type Y (yes) or N (no) for any Intimate Partner Violence, Alcohol Screen, or Depression Screening performed during the encounter.

Use Y to access the following pop-up screen, as shown in Figure 4-32.

<table>
<thead>
<tr>
<th>Intimate Partner Violence (IPV/DV)</th>
<th>Display IPV/DV screening history? N</th>
</tr>
</thead>
<tbody>

<td></td>
</tr>
</tbody>
</table>

Figure 4-32: Sample IPV, Alcohol Screening, and Depression Screening pop-up

a. At the “Display IPV/DV Screening History?” prompt, type Y (yes) or N (no). If you use Y, the IPV/DV screening history displays on another screen.

b. At the “IPV Screening/Exam Result” prompt, type the result of the intimate partner violence/domestic violence screening. Use one of the following:
   • N – Negative
   • PR – Present
   • PAP – Past and Present
   • PA – Past
   • UAS – Unable to screen
   • REF – Patient Refused Screening
   • Referral Needed

c. At the “IPV Screening Provider” prompt, type the IPV/DV provider name.

d. At the “IPV Comment” prompt, type the text of any comment related to the IPV/DV screening, using 2–245 characters.

e. At the “Display Alcohol Screening History?” prompt, type Y (yes) or N (no). If Y was used, the alcohol screening history displays on another screen.
f. At the “Alcohol Screening Result” prompt, type the result of the alcohol screening. Use one of the following:
   - N – Negative
   - P – Positive
   - UAS – Unable to screen
   - REF – Patient Refused Screening
   - Referral Needed

g. At the “Alcohol Screening Provider” prompt, type the provider name for the alcohol screening.

h. At the “Alcohol Screening Comment” prompt, type the text of any comment related to the alcohol screening, using 2–245 characters.

i. At the “Display Depression Screening History?” prompt, type Y (yes) or N (no). If Y, the depression screening history displays on another screen.

j. At the “Depression Screening Result” prompt, type the result of the depression screening. Use one of the following:
   - N – Negative
   - P – Positive
   - UAS – Unable to screen
   - REF – Patient Refused Screening
   - Referral Needed

k. At the “Depression Screening Provider” prompt, type the provider name for the depression screening.

l. At the “Dep Screening Comment” prompt, type the text of any comment related to the depression screening, using 2–245 characters.

The following are the fields on the Behavioral Health Record Edit window.

Note: The Suicide Risk Assessment is not available in the roll and scroll.

28. At the “Edit Measurements?” prompt, type Y (yes) or N (no).

   Type Y to access the Measurements pop-up.
*** Measurements ***

<table>
<thead>
<tr>
<th>Measurement Description</th>
<th>Value</th>
<th>Provider</th>
</tr>
</thead>
</table>

Figure 4-33: Sample Measurements pop-up

a. At the “Measurement” prompt, type the measurement type being taken on the patient. Then the application populates the Description field.

b. At the “Value” prompt, type the numeric value of the measurement. The value must be in the valid numeric range for the measurement.

c. At the “Provider” prompt, type the name of the provider.

The following are the fields on the Behavioral Health Record Edit window.

29. At the “Placement Disposition” prompt, type the placement disposition. This is a required field used when hospitalization or placement in a treatment facility is required.

30. At the “Referred to” prompt, type the name of the facility, using 2–30 characters. This field is required when the Placement Disposition is populated.

After you exit the window, the application displays the following prompt about your signature code. This prompt only displays where you are the primary provider for the visit and the SOAP/Progress Note is unsigned.

31. At the “Enter your Current Signature Code” prompt, type your (valid) signature code. This signature applies to the SOAP/Progress Note associated with the current visit. Section 2.14 provides more information on the Electronic Signature.

If you do not populate with your electronic signature and leave the window, the application will display the message: No PCC Link. Note not signed. After you press Enter to continue, the application displays the message: There is no electronic signature, this visit will not be passed to PCC.

The Other Information window displays, as shown in Figure 4-34.
6). Print an Encounter Form
7). Add/Update/Print Intake Document
8). Add/Update Suicide Forms
9). Provide List Update
10). None of the Above (Quit)
Choose one of the above: (1-9): 9//

Figure 4-34: Other Information window

Use Option 10 to exit the Other Information window. After selecting Option 10, one of the following will happen:

- If there was not an appointment the patient was checked in for using the scheduling package, you return to the previous window.
- If there was an appointment the patient was checked in for using the scheduling package, the application displays more prompts. Please note the following about these prompts:
  - If the facility is not using the scheduling package and doesn’t have the Interactive PCC Link in the site parameters turned on, you will never be presented with the ability to link it to a PCC visit.
  - If there is no visit in PCC (patient never checked in, no appointment or walk in was ever created using the scheduling package and no other clinics saw the patient that day), then the option to link is never presented and the BH visit continues to create a new visit in PCC.

Figure 4-35 shows the prompts for linking.

Generating PCC Visit.

PATIENT: BETAA, EMILY MAE has one or more VISITs on Mar 09, 2010@12:00.
If one of these is your visit, please select it

1 TIME: 16:00 LOC: WW TYPE: I CAT: A CLINIC: ALCOHOL DEC: 0 VCN: 47887.1A

PROVIDER:              BETA,BETAS
PROVIDER DISCIPLINE:   ACUPUNCTURIST
PRIMARY/SECONDARY:     PRIMARY

Note already signed, no E Sig necessary.

Press enter to continue....:

Figure 4-37: Display Record information

Once you are back at the Other Information list, you can quit and return to the main menu to see what the PCC visit looks like:

******** OTHER INFORMATION ********

Update, add or append any of the following data

1). Update any of the following information:
   Designated Providers, Patient Flag
2). Patient Case Open/Admit/Closed Data
3). Personal History Information
4). Appointments (Scheduling System)
5). Treatment Plan Update
6). Print an Encounter Form
7). Add/Update/Print Intake Document
8). Add/Update Suicide Forms
9). Problem List Update
10). None of the Above (Quit)

Choose one of the above: (1-10): 10//

Figure 4-38: Other Information screen

At The “Choose one of the above” prompt, type 10 to exit.

4.2.3 Display Record

Use the DR option to display information about a selected record. (This works like the LV option of PDE.)

1. At the “Select Action” prompt, type DR.
2. At the “Display Which Record” prompt, type the number of the record.
The **BH VISIT RECORD DISPLAY** window displays.

![Sample BH Visit Record Display](image)

**4.2.4 Delete Record (DE)**

Use the DE option to delete a particular record.

1. At the “Select Action” prompt, type **DE**.
2. At the “Display Which Record” prompt, type the number of the record to delete.
The application displays the information about the record.

3. At the “Are you sure you want to DELETE this record?” prompt, type **Y** (yes) or **N** (no).

If **Y** was used, the application displays: Record deleted. Press Enter to continue.

4. **2.5 Print Encounter Form (PF)**

Use the PF option to print/browse the encounter form for a specified date.

1. At the “Select Action” prompt, type **PF**.

2. At the “Print Which Record” prompt, type the number of the record.

3. At the “What type of form do you want to print” prompt, type the form you want to print. Use one of the following:

   - **F** Full Encounter Form
   - **S** Suppressed Encounter Form
   - **B** Both a Suppressed & Full
   - **T** Two copies of the Suppressed
   - **E** Two copies of the Full

   − A full encounter form prints all data for a patient encounter including the SOAP note.
   − The suppressed version of the encounter form will not display the following: (1) the Chief Complaint/Presenting Problem, (2) the SOAP note for confidentiality reasons, (3) the measurement data, and (4) screenings. It is important to note that the SOAP note, chief complaint/presenting problem, and measurements will be suppressed, but the comment/next appt, activity code, and POV will still appear on the printed encounter.

   At the “DEVICE” prompt, type the device to output the data.

4. At the “DEVICE” prompt, type the device to output the data.

Figure 4-40 is the data for a Suppressed Encounter form.

---

******* CONFIDENTIAL PATIENT INFORMATION *******
PCC BEHAVIORAL HEALTH ENCOUNTER RECORD Printed: Mar 27, 2009@12:44:08
*** Computer Generated Encounter Record ***
********* CONFIDENTIAL PATIENT INFORMATION *********
PCC BEHAVIORAL HEALTH ENCOUNTER RECORD Printed: Mar 27, 2009@12:44:08
*** Computer Generated Encounter Record ***
*******************************************************************************
Date:  Feb 23, 2009         Primary Provider: GAMMAAA, DENISE
Arrival Time: 12:00
Program:  MENTAL HEALTH
Clinic:  MENTAL HEALTH          Appointment Type:  APPOINTMENT
### 4.2.6 Health Summary

Use the HS option to display the health summary information about a selected record.

5. At the “Select Action” prompt, type **HS**.

6. At the “Patient” prompt, the patient’s HRN, name, SSM or DOB.

7. At the “Select HEALTH SUMMARY TYPE NAME” prompt, type the health summary type to use.

The PCC Health Summary for the patient displays.

```
PCC Health Summary for DEMO, JEANETTE

********* CONFIDENTIAL PATIENT INFORMATION -- 8/21/2014 11:27 AM [ST] *********
********** DEMO, JEANETTE #146457 (ADULT REGULAR SUMMARY) pg 1 **********
----------------------------- DEMOGRAPHIC DATA -----------------------------
DEMO, JEANETTE               DOB: MAY 8, 1998  16 YRS FEMALE  no blood type
WHITE MOUNTAIN APACHE TRB, AZ SSN: XXX-XX-4701
```
Figure 4-41: Sample Health Summary for the patient

4.2.7 SOAP.CC Edit (ES)

Use the ES option (on the Patient Data Entry window) to edit the SOAP note for a specified patient visit, as well the text for Chief Complaint, Comment/Next Appointment, and Medications Prescribed. Please note that this applies only to records with unsigned notes.
1. At the “Select Action” prompt, type **ES**.

2. At the “Edit Which Record” prompt, type the number of the record.

3. At the “CHIEF COMPLAINT” prompt, type the chief complaint (Free Text), if any, using between 2-80 characters in length. If there is existing text, you can change it. This information describes the major reason the patient sought services.

4. At the “SOAP/PROGRESS NOTE No existing text” prompt, if there is existing text, it appears below the “SOAP/PROGRESS NOTE” prompt. You can edit this text (just like entering new note).
   a. At the “Edit? NO//” prompt, type **Y** (yes) or **N** (no).
      
      If N, the other prompts continue.

      If Y, you access another window where you can edit the text of the SOAP/Progress Note.

```
==[ WRAP ]==[ INSERT ]======<< SUBJECTIVE/OBJECTIVE =======[ <PF1>H=Help ]=====

<========T========T========T========T========T========T========T========T======
```

Figure 4-42: Window to enter the note

See Table 4-1 for a list of the most commonly used RPMS text editor commands.

5. At the “COMMENT/NEXT APPOINTMENT - No existing text” prompt, if there is existing text, it appears below the COMMENT/NEXT APPOINTMENT prompt. You can edit this text (just like entering new note).
   a. At the “Edit? NO//” prompt, type **Y** (yes) or **N** (no).
      
      If N, the other prompts continue.
If Y, you access another window where you can edit the text of the COMMENT/NEXT APPOINTMENT note.

Figure 4-43: Window to enter the note

See Table 4-1 for the most commonly used RPMS text editor commands.

6. At the “MEDICATIONS PRESCRIBED - No existing text” if there is existing text, it appears below the “MEDICATIONS PRESCRIBED” prompt. You can edit this text (just like entering new note).

   a. At the “Edit? NO//” prompt, type Y (yes) or N (no).

      If N, the other prompts continue.

      If Y, you access another window where you can edit the text of the COMMENT/NEXT APPOINTMENT note.
4.2.8 Switch Dates (SD)
Use the SD option to change the encounter date.
1. At the “Select Action” prompt, type SD.
2. At the “Enter Date” prompt, type date to be used.
The application changes the date of the encounter.

4.2.9 Edit EHR Visit (EH)
Use the EH option to edit a selected BH visit that was entered in the Electronic Health Record (EHR) application. (The same prompts display if you use the EHRE [Edit BH Data Elements of EHR created Visit] option on the IHS Behavioral Health System Data Entry Menu. In this option, you specify the patient name before specifying the encounter date.)
1. At the “Select Action” prompt on the Patient Data Entry screen, type EH.
2. At the “Edit Which Record” prompt, type the number of the BH encounter that was entered for a particular patient through the EHR.
The Edit Behavioral Health Specific Fields for an EHR Visit window displays.
3. At the “Community of Service” prompt, type the community of service where the encounter took place.

4. At the “Activity Type” prompt, type the activity type for the visit.

5. At the “Appt/Walk In” prompt, type the visit type: appointment, walk-in, or unspecified (for non-patient contact).

6. At the “Placement Disposition” prompt, type any active disposition (such as Alcohol/Drug Rehab). This is used when hospitalization or placement in a treatment facility is required.

   After you populate this field, a pop-up window displays, as shown in Figure 4-46.

   a. At the “Facility Referred to” prompt, type the facility name to which the patient was referred, using 2–30 characters. This is a Free Text field.

   The prompts continue on the Edit Behavioral Health Specific Fields for an EHR Visit window.

7. At the “Interpreter Utilized” prompt, type Y (yes) or N (no). This indicates if an interpreter was used in the visit. Use Y if an interpreter was required to communicate with the patient.

8. At the “Comment/Next Appt (press Enter)” prompt, press Enter to access another window where you can populate the field with the text of a comment about the next appointment.
See Table 4-1 for the most commonly used RPMS text editor commands.

9. At the “Local Service Site” prompt, type the local service site for the visit.

At the “Flag (Local Use)” prompt, type any local flag (0 to 999) used in flagging various types of visits. The site will define a numeric value to indicate the definition of the flag. For example, a 1 might mean any visit on which a narcotic was prescribed. You can then, later on, retrieve all visits with a flag of 1 which will list all visits on which narcotics were prescribed.

4.2.10 Sign Note

Use the SN option to sign a note (that is not signed) in a visit record. You can only sign notes where you are the primary provider.

1. At the “Select Action” prompt, type SN.

After using SN, one of two actions happen: (1) If there are no notes to sign, the application displays the message: There are no records with unsigned notes that need to be signed; or (2) if there are notes to be signed, the application displays the Behavioral Health visits for the current patient where you are the primary provider. Please note that visits with a blank SOAP/Progress Note will not appear on the list.

<table>

<td>HOARDING DISORDER</td>
<td></td>
</tr>
</tbody>
</table>

Figure 4-48: List of records that you can change

The prompts continue.

2. At the “Which record do you want to display” prompt, type the number of the record you want to use.

The application displays the BH Visit Record Display window (for the particular record).
After you quit the **BH Visit Record Display** window, the application asks if you want to edit this record.

- If N, you exit the sign note process.
- If Y, the application displays the **Edit SOAP** window.

After you save and exit this window, the application displays the signature code prompt.

3. At the “Enter your Current Signature Code” prompt, type your (valid) signature code. This signature applies to the SOAP/Progress Note associated with the current visit. Section 2.14.6 provides more information about signing a note. After typing your signature code, the **OTHER INFORMATION** screen displays.

If you do not populate with your electronic signature (or if you use an invalid signature three times) you will leave the window. After you quit, the application displays the message: There is no electronic signature; this visit will not be passed to PCC.

### 4.2.11 Display TIU Note (TN)

Use the TN option to display a particular TIU note.

1. At the “Select Action” prompt, type **TN**.

2. At the “Display Note for Which Record” prompt, type the number of the record to use.

### 4.3 Display Record Options (DSP)

Use the DSP option to access the Data Entry Menu Display Options.

### 4.4 Visit Window (GUI)

Behavioral Health System (GUI) tree structure. You access the **Visit** window for one patient.
Use the Visit for one patient window to manage the visits within a particular date range for the current patient (the name displays in the lower, left corner of the window). If there is no current patient, you will be asked to select one. The default date range is one year.

Another way to access the Visit window for the patient is to use the All Patients option on the RPMS Behavioral Health System (GUI) tree structure. You access the Visit window for all patients.

Use the Visit window for all patients to manage the visits for a selected patient. These visits are in the date range displayed in the Visit Date Range group box. The default date range is one day.

The following are features of both windows.
The following table provides information about the other features of the window.

Table 4-2: Visit window features and functions

<table>
<thead>
<tr>
<th>Feature</th>
<th>Functionality</th>
</tr>
</thead>
<tbody>
<tr>
<td>Visit window (for one patient)</td>
<td>The default <strong>Start Date</strong> is one year prior. Change the date range by clicking the list to access a calendar. After the date range is changed, click <strong>OK</strong> to redisplay the records in the Visit list box. <strong>Note:</strong> If you change the <strong>Start Date</strong> for the <strong>Visit</strong> window for one patient, this change stays in effect in future sessions of the GUI application for the <strong>Visit</strong> window for one patient (until you change it again).</td>
</tr>
<tr>
<td>Visit window (for all patients)</td>
<td>The default <strong>Start Date</strong> is today. You can change the default <strong>Start Date</strong> and the application maintains that Start Date until you exit the application. Then, when you log in again, the Start Date reverts to today’s date.</td>
</tr>
<tr>
<td>Visit list box</td>
<td>The <strong>Visit</strong> list box shows the Visit records in the particular Visit Date Range. The asterisk (*) in the first column indicates that the particular record contains an unsigned note. See section 2.14.5 Signing a Note (GUI) for more information.</td>
</tr>
<tr>
<td>Add button</td>
<td>Establish the patient to use in the add process. Use the <strong>Add</strong> button to add a new Visit record. You access the <strong>Visit Data Entry - Add Visit</strong> dialog.</td>
</tr>
<tr>
<td>Edit button</td>
<td>Use the <strong>Edit</strong> button to edit a particular Visit record. You access the <strong>Visit Data Entry - Edit Visit</strong> dialog.</td>
</tr>
<tr>
<td>View button</td>
<td>Use the <strong>View</strong> button (or double-click on a record) to browse a particular Visit record. This window has the same fields as the add/edit visit dialog, except for the Intake and <strong>Suicide Form</strong> tabs.</td>
</tr>
<tr>
<td>Delete button</td>
<td>Use the <strong>Delete</strong> button to delete a particular Visit record. The application confirms the deletion. <strong>Note:</strong> Visit records with a signed SOAP/Progress Notes can only be deleted by users that have the AMHZ DELETE SIGNED NOTE security key.</td>
</tr>
<tr>
<td>Sign Note button</td>
<td>Use the <strong>Sign Note</strong> button to sign the note of an “unsigned” record (asterisk [*] in the first column).</td>
</tr>
<tr>
<td>Problem button</td>
<td>Select a record and then click the <strong>Problem</strong> button to access either a <strong>BH Problem List</strong> or the <strong>PCC Problem</strong> list.</td>
</tr>
</tbody>
</table>
### Feature Functionality

**Print Encounter button**

Use the **Print Encounter** button to print the encounter data about a particular Visit record. The **Print Encounter** button has these options: Full, Suppressed, Both Full and Suppressed.

Please note that the Intake document and Suicide Reporting Form must be printed elsewhere and will not appear on a printed encounter form.

The suppressed report does NOT display the following information: Chief Complaint, SOAP note, measurement data, patient education data, screenings.

After selecting one of the options, the application displays the first page of the **Print Encounter** pop-up window.

**Problem button**

Select a visit and then click the **Problem** button to manage the patient’s Behavioral Health and PCC problems.

**Help button**

Click the **Help** button on the Visit window to access the online help for the window.

**Close button**

Click the **Close** button on the Visit window to exit the window.

### 4.5 Add/Edit Visit Data Entry

Use the **Add** button on the **Visit** window to add a new record.

1. Establish the patient to use in the add process.

2. Do one of the following:

   - Click **Add** to add a visit for the current patient. The application displays the **Visit Data Entry–Add Visit** dialog.

   - Click **Edit** to edit the selected visit for the current patient. The application displays the **Visit Data Entry–Edit** Visit dialog. The **Edit** button will be inactive if the patient does not have any previous visits.

Below is a sample **Visit Data Entry - Add Visit** dialog. (The same fields appear on the **Visit Data Entry - Edit Visit** dialog.)
The table below provides information about the features on this window.

Table 4-3: Add Visit window features and functions

<table>
<thead>
<tr>
<th>Feature</th>
<th>Functionality</th>
</tr>
</thead>
<tbody>
<tr>
<td>Help button</td>
<td>Click this button to access the online help about this window.</td>
</tr>
<tr>
<td>Save button</td>
<td>Click this button after adding or changing this window. (See below for more information).</td>
</tr>
<tr>
<td>Close button</td>
<td>Click this button to not save any changed. (See below for more information).</td>
</tr>
</tbody>
</table>

The Save process saves the changes and dismisses the add/edit window. If you added a SOAP/Progress note, you will be asked if you want to sign the note. Section 2.14.5 provides more information about the Electronic Signature (GUI).

- If there was not an appointment the patient was checked in for in the scheduling package, you return to the Visit window.
• If there was an appointment the patient was checked in for in the scheduling package and it is set to create a visit at check-in, the application displays the Select PCC Visit window. Section 4.5.9 provides more information about this window. Please note the following about this option:
  – If the facility is not using the scheduling package and doesn’t have the Interactive PCC Link in the site parameters turned on, you will never be presented with the ability to link it to a PCC visit.
  – If there is no visit in PCC (patient never checked in, no appointment or walk in was ever created in the scheduling package and no other clinics saw the patient that day), then the option to link is never presented and the BH visit continues to create a new visit in PCC.

The Close process displays the Continue? dialog. This dialog states: Unsaved Data Will Be Lost, Continue?

• Click Yes to not save; this dismisses the data entry window.

Click No and the focus remains on the data entry window where you can continue work.

4.5.1 Visit Information Group Box

Use the Visit Information group box to enter data about the visit.

![Visit Information group box](image)

Figure 4-52: Visit Information group box

The fields in bold text are required.

1. At the Primary Provider field, select the primary provider. The default is the current provider. Change this field by clicking the list to access the Primary Provider search/select window.
Use this search window in one of two ways:

1. Use the Search String field by typing the provider’s last name and then clicking Search. The retrieved providers will populate the Provider list box. Select a retrieved record and click OK to populate the Provider field. (Otherwise, click Close.)

2. Select a name in the Most Recently Selected list box and click OK to populate the Provider field. (Otherwise, click Close.)

2. At the Enter Date/Time field, type the date/time. The default is the current date and time. Change the date by clicking the list to access the calendar. You can manually change the time. (This field can be changed during Edit).

3. At the Program field, select the program associated with the visit from the list.
   - Mental health
   - Social services
   - Other
   - Chemical Dependency

   After selecting the program, the application automatically populates the remaining fields if the defaults were set up on the Site Parameters menu.

4. At the Encounter Location field, type the encounter location. This field determines the location of the encounter. Change this field by clicking the list to access the Location search window.
<table>
<thead>
<tr>
<th>Screen Capture</th>
<th>What to Do</th>
</tr>
</thead>
</table>
| ![Location search window](image) | Use this search window in one of two ways:  
(1) Use the **Search String** field by typing the location and then clicking **Search**. The retrieved locations will populate the Location list box. Select a location and click **OK** to populate the **Encounter Location** field. (Otherwise, click **Close**.)  
(2) Select a name in the **Most Recently Selected** list box and click **OK** to populate the **Encounter Location** field. (Otherwise, click **Close**.) |

5. At the **Clinic** field, select the name of the clinic. This field identifies the clinic context. The response must be a clinic that is listed in the RPMS Standard Code Book table. Change this field by clicking the list to access the **Clinic** search window.
Use this search window in one of two ways:
(1) Use the Search String field by typing the clinic and then clicking Search. The retrieved clinics and their codes will populate the Clinic list box. Select a clinic and click OK to populate the Clinic field. (Otherwise, click Close.)
(2) Select a clinic in the Most Recently Selected list box and click OK to populate the Clinic field. (Otherwise, click Close.)

6. At the Appointment or Walk-In field, select the type of visit form the list. Use one of the following:
   - Appointment
   - Walk In
   - Unspecified (for non-patient contact)

7. At the Type of Contact field, type the contract type (the activity setting). Click the list to access the Type of Contact window.
8. At the **Community of Service** field, type the name of the community of service where the encounter took place. Change this field by clicking the list to access the **Community** search window.
4.5.2 POV Tab

Use the **POV** tab to add, edit, or delete the **Purpose of Visit (POV)** for the encounter.

![Figure 4-58: POV ab on Visit Data Entry window](image)

You can add, edit, or delete POV records on this window.
Add Button

1. Click Add.

2. The POV search/select window displays.

3. At the Search String field, type a few characters of the search criteria.

4. Click Search; the retrieved the records display in POV list box (the POV and its narrative).

5. To add one or more selected records from the POV list box to the Selected Items list box, click the right arrow button.

6. In addition, select one or more items in the Most Recently Search list box and click the right arrow button. This adds those records to the Selected Items list box.

7. Similarly, remove one or more selected records from the Selected Items list box by clicking the left arrow button.

8. When the records in the Selected Item list box is complete, click OK and the records populate the POV tab. (Otherwise, click Close.)
Delete Button
9. Select the POV record to delete.

10. Click the Delete button.

11. The Are You Sure confirmation message displays; click Yes to remove the selected record from the list box. (Otherwise, click No.)

Edit Button
12. Select a POV record to edit.

13. Click Edit.

14. The application displays the Edit POV dialog.

![Figure 4-60: Edit POV dialog](image)

a. At the Narrative field, type the new POV narrative, using 2–80 characters. This is a Free Text field.

b. Click OK to save the change the narrative of the selected code on the POV tab. (Otherwise, click Close.)

4.5.3 Activity Tab

Use the Activity tab to manage Activity data about the visit for the current patient.
Activity Group Box

Figure 4-62 shows the Activity group box.

The fields in bold text are required.

1. At the Activity field, select the activity code that documents the type of service or activity performed by the Behavioral Health provider. These activities might be patient-related or administrative in nature only. Use only one activity code for each record regardless of how much time is expended or how diverse the services offered. Certain Activity codes are passed to PCC, and this will affect the billing process. Click the list to access the Activity search window and search for the activity name. Section Appendix A: provides more information about the Activity Codes and Definitions.
Use this search window in one of two ways:
(1) Use the Search String field by typing the activity name and then clicking Search. The retrieved activity code and activity name will populate the Activity list box. Select a retrieved record and click OK to populate the Activity field. (Otherwise, click Close.)
(2) Select an activity record in the Most Recently Selected list box and click OK to populate the Activity field. (Otherwise, click Close.)

2. At the Activity Time field, type the activity time, using any number between 1 and 9999 (no decimal digits). The understood units of measure are minutes. This required field determines how much provider time was involved in providing and documenting the service or performing the activity.

3. At the Visit Flag field, type the visit flag by using any number between 0 and 999 (no decimal digits). This field is for local use in flagging various types of visits. The site will define a numeric value to indicate the definition of the flag. For example, a 1 might mean any visit on which a narcotic was prescribed. You can then, later on, retrieve all visits with a flag of 1 which will list all visits on which narcotics were prescribed.

4. At the Local Service Site field, select the local service site. Click the list to access the Local Service Site window.
### Screen Capture

<table>
<thead>
<tr>
<th>What to Do</th>
</tr>
</thead>
</table>
| Use this dialog in one of two ways:  
(1) Select a local service site from the list.  
(2) Click OK to populate the Local Service Site field. (Otherwise, click Close.) |

---

5. At the Interpreter Utilized? field, select this check box if an interpreter is required to communicate with the patient.

6. At the Number Served field, type the number served, using any number between 1 and 9999 (no decimal digits). The default is 1. This required field refers to the number of people directly served during a given activity and always is used for direct patient care as well as for administrative activities. Group activities or family counseling are examples where other numbers might be listed.

**CPT Codes Group Box**

Use the CPT Codes group box to manage the CPT codes used during the encounter.

You can add or delete records in this group box.

**Delete Button**

1. Select a CPT code record to delete.

---

Figure 4-64: Local Service Site window
2. Click **Delete**.

3. At the *Are you sure you want to delete?* confirmation message, click **Yes** to delete the record. (Otherwise, click **No**.)

**Add Button**

1. Click **Add**.

2. The **CPT Code** search/select window displays.

![CPT Code search/select window](image)

Figure 4-65: **CPT Codes** search/select window

3. At the **Search String** field, type a search string to search for a particular CPT code. Then click **Search**. The CPT codes that match the search criteria will display in the **CPT Code** field.

![Sample CPT Code search results](image)

Figure 4-66: Sample CPT Code search results
a. Select a retrieved CPT Code.

b. At the **Quantity** field, type the number of CPT codes to use to help facilitate billing.

c. At the **Modifier** field, select the modifier for the CPT code. Click the list to access the **CPT Modifier** search window.

<table>
<thead>
<tr>
<th>Screen Capture</th>
<th>What to Do</th>
</tr>
</thead>
</table>
| ![CPT Modifier search window](image) | Use this search window in one of two ways:  
(1) Use the **Search String** field by typing the CPT Modifier name and then clicking **Search**. The retrieved CPT Modifier names and their descriptions will populate the **CPT Modifier** list box. Select a CPT modifier and click **OK** to save the modifier. (Otherwise, click **Close**.)  
(2) Select a CPT modifier in the **Most Recently Selected** list box and click **OK** to save the modifier. (Otherwise, click **Close**.) |

4. After the **Quantity** and **Modifier** fields are complete, click the right arrow button to add the items to the **Selected Items** list box.

   More than one CPT Code can be used in the above process.

5. Another way to populate the **Selected Items** list box is to select a CPT code in the **Most Recently Selected** list box and then click the right arrow button.

6. Remove a selected CPT code in the **Selected Items** list box by clicking the left arrow button.
7. When the Selected Items list box is complete, click OK to save the data and add it to the CPT Code(s) group box. (Otherwise, click Close.)

**Secondary Provides for this Visit Group Box**

Use the **Secondary Providers for this Visit** group box to manage the secondary providers used during the encounter.

![Sample Secondary Providers for this Visit group box](image)

Figure 4-68: Sample Secondary Providers for this Visit group box

You can add or delete records on the **Secondary Provider** group box.

**Add Button**

1. Click Add.

2. The **Secondary Providers** multiple search/select window displays.

![Secondary Provider multiple search/select window](image)

Figure 4-69: **Secondary Provider** multiple search/select window

3. At the **Search String** field, type a few characters of the Secondary Provider’s last name.
4. Click **Search** and the retrieved the records display in **Secondary Providers** list box.

5. To add one or more selected records from the **Secondary Providers** list box to the **Selected Items** list box, click the right arrow button.

6. To add one or more selected records from the **Most Recently Selected** list box to the **Selected Items** list box, click the right arrow button.

7. Similarly, you can remove one or more selected records from the **Selected Items** list box by clicking the left arrow button.

8. When the Selected Items list box is complete, click **OK** and these items populate the **Secondary Providers** for this **Visit** group box. (Otherwise, click **Close**.)

**Delete Button**

1. Select the provider record to delete.

2. Click **Delete**.

3. At the **Are You Sure** confirmation message, click **Yes** to remove the selected provider from the **Secondary Providers** for this **Visit** group box. (Otherwise, click **No**.)

**4.5.4 SOAP/Progress Notes Tab**

Use the **SOAP/Progress Notes** tab on the **Visit Data Entry** window to manage the SOAP/progress note associated with the current visit, to enter the chief complaint/pressing problem, and to enter any comments about the next appointment.

![SOAP/Progress Notes tab](Figure 4-70: SOAP/Progress Notes tab)
If you are editing a record and it has a signed note, the **Progress Notes** field will be inactive (read-only). The other fields will be active.

1. At the **Chief Complaint/Presenting Problem** field, type the chief complaint or presenting problem, 2–80 characters in length. This is a Free Text field that describes the major reason the patient sought services.

2. At the **Progress Notes** field, type the text of the progress note for the visit. A SOAP or progress note must be entered in the context of a visit. This is a Free Text field.

3. At the **Comments/Next Appointment** field, type the text of any additional notes or comments about the client’s next appointment. This is a Free Text field.

4. At the **Placement Disposition** field, select the placement disposition.

   Use this field when hospitalization or placement in a treatment facility is required. Click the list to access the **Placement Disposition** dialog.
Use this dialog in one of two ways:
(1) Select a Placement Type.
(2) Click OK to populate Placement Disposition field. (Otherwise, click Close.)

At the Placement Name field, type the name of the placement facility.

4.5.5 Rx Notes/Labs Tab

Use the Rx Notes tab to view prescription data or lab tests data.
Figure 4-72: Rx Notes/Labs tab

The **Rx/Labs** group box controls what is displayed on the right side of the tab.

**RX Data**

When the Rx is selected in the Rx/Labs group box (the default), the application displays information about PCC Medications, Behavioral Health Medications, and Prescription Entry.

**PCC Medications List Box**

Use the **PCC Medications** list box to view PCC medications prescribed for the current patient. The entire medication history might not be present here.

**Behavioral Medication List Box**

Use the **Behavioral Medication** list box to view the visit dates when behavioral health medication was prescribed and any associated notes.

**Prescription Entry Field**

Use the **Prescription Entry** field to type information about the patient’s prescriptions. This is a Free Text field. This field has a context menu that lets you cut, copy, or paste data (these functions are like the ones in MS Office).

This information will be viewable in the **Medications** field for future visits. Items in the **Medication** field can be copied and pasted into the **Prescription Entry** field. This feature is used by some sites to record notes for the psychiatrist such as doing a pill count with the patient, whether or not the patient is compliant with meds, etc.
PCC Labs
When the **PCC Labs** is selected in the **Rx/Labs** group box, you can select what you want to view about the PCC Labs: **View by Visit**, **View by Lab Test**, or **Graph**.

**View by Visit Date**
Select the **View by Visit Date** option to access the **View Labs by Visit Date** dialog.

![View Labs by Visit Date dialog](image)

The **View Labs by Visit Date** dialog has the following features:

- The default Begin Date will be one year prior.
- The application will link the default dates for these options so that if you change the date in one view, the date will be the default in both Lab views.
- When you change the default Begin Date, it will be maintained until you change it again.
- The application will save your default Begin Date when exiting.

You can edit either or both dates.

6. At the **Begin Date** field, select the beginning date of the date range by clicking the list to select a date from the calendar.

7. At the **End Date** field, select the ending date of the date range by clicking the list to select a date from the calendar.

8. When this dialog is complete, click **OK** and the application displays the first page of the PCC labs for the patient by visit date within the particular date range pop-up window. (Otherwise, click **Close**.) Section 2.6 provides more information about the controls on the pop-up window.

This same functionality is available on the tree structure for the RPMS Behavioral Health System (GUI).

**View by Lab Test**
If you select the **View by Lab Test** option, you access the **View Labs by Lab Test** dialog.
The **View Labs by Lab Test** dialog has the following features:

- The default Begin Date will be one year prior.
- The application will link the default dates for these options so that if you change the date in one view, the date will be the default in both Lab views.
- When you change the default Begin Date, it will be maintained until you change it again.
- The application will save your default Begin Date when exiting.

You can edit either or both dates.

9. At the **Begin Date** field, select the beginning date of the date range by clicking the list to select a date from the calendar.

10. At the **End Date** field, select the ending date of the date range by clicking the list to select a date from the calendar.

11. When this dialog is complete, click **OK** and the application displays the first page of the PCC labs by lab test for the patient within the particular date range pop-up window. (Otherwise, click **Close**). Section 2.6 provides more information about the controls on the pop-up window.

This same function is available on the tree structure for the RPMS Behavioral Health System (GUI).

**Graph**

If you select the **Graph** option, the right side of the tab changes to two boxes: **Lab Graph Date Range** and **Graphable Lab Tests**.
Lab Graph Date Range

The default date range is one year. This date range determines the data displayed in the Graphable Lab Tests list box. You can edit either or both dates.

1. At the Starting Date field, click the list and select a date from the calendar that determines the starting date of the date range.

2. At the Ending Date field, click the list and select a date from the calendar that determines the ending date of the date range.

3. When the date range is correct, click Display to refresh the data in the Graphable Lab Tests list box. The new date range stays in effect until you change it again.
Graphable Lab Tests

Figure 4-76: Graphable Lab Tests list box

To graph a lab test, select one lab test record and then click Graph.

This causes the data to be entered into an Excel spreadsheet and the graph of the particular lab test is shown.

Figure 4-77: Sample graph of a lab test

Save this data, if needed.

4.5.6 Wellness Tab

Use the Wellness tab to view the BH/PCC wellness activities, as well as manage the education, health factors, and screenings for the visit.
When you first access the **Wellness** tab, the application displays a tree structure.

![Wellness tab](image)

**Figure 4-78: Wellness tab**

You can select any of the options on the Wellness tree structure: **Patient Education**, **Health Factors**, or **Screening**.

**Patient Education**

4. Select the **Patient Education** option on the Wellness tree structure to display the patient education list boxes: **Patient Education History** and **Patient Education Data Entry**.

![Patient Education group boxes](image)

**Figure 4-79: Patient Education group boxes**

The **Patient Education History** list box is read only. Scroll through the data using the scroll bar.

You can add/edit data in the **Patient Education Data Entry** list box by using the **Add**, **Edit**, or **Delete** buttons.
Add/Edit Patient Education Record

The Add and Edit functions use the same fields.

1. Click Add to add an education record.

OR

2. Select an education record to edit and click Edit.

3. The Education Topic select window displays.

<table>
<thead>
<tr>
<th>Screen Capture</th>
<th>What to Do</th>
</tr>
</thead>
<tbody>
<tr>
<td>Use this search window in one of two ways:</td>
<td></td>
</tr>
<tr>
<td>(1) Use the Search String field by typing the education topic and then clicking Search. The retrieved education topics will populate the Education Topic list box. Select a retrieved record and click OK. (Otherwise, click Close.)</td>
<td></td>
</tr>
<tr>
<td>(2) Select an education topic in the Most Recently Selected list box, click OK. (Otherwise, click Close.)</td>
<td></td>
</tr>
</tbody>
</table>

Figure 4-80: Education Topic select window

If the user clicks Close, the application displays the Continue warning: “Canceling will lose all unsaved data, Continue?” Click Yes and the focus returns to the Patient Education Data Entry group box. Click No to display the Patient Education dialog with no data in the fields.

If the user clicks OK, the Patient Education dialog displays, with the Education Topic field populated.
The fields in bold text are required: **Education Topic**, **Level of Understanding**, and **Provider**.

4. At the **Education Topic** field, determine if you want to change the field. The application populates this field with what was selected on the **Education Topic** select window. To change this selection, click the list to access the **Education Topic** search window.

**Figure 4-82: Education Topic select window**

<table>
<thead>

</thead>
<tbody>
<tr>
<td>Use this search window in one of two ways:</td>
<td></td>
</tr>
<tr>
<td>(1) Use the <strong>Search String</strong> field by typing the education topic and then clicking Search. The retrieved education topics will populate the <strong>Education Topic</strong> list box. Select a retrieved record and click <strong>OK</strong> to populate the <strong>Education Topic</strong> field. (Otherwise, click <strong>Close</strong>.)</td>
<td></td>
</tr>
<tr>
<td>(2) Select an education topic in the <strong>Most Recently Selected</strong> list box and click <strong>OK</strong> to populate the <strong>Education Topic</strong> field. (Otherwise, click <strong>Close</strong>.)</td>
<td></td>
</tr>
</tbody>
</table>
5. At the **Time** field, type the number of minutes spent on the education topic, using any integer 1–9999.

6. At the **Goal** field, type text of the stated goal of the education. For example, Patient plans to walk six times a week.

7. At the **Status** field, select the status of the education goal. Select one of the following:
   - **Goal Set**: the preparation phase defined as “patient ready to change” (patient is active)
   - **Goal Met**: the action phase defined as “patient actively making the change” or maintenance phase defined as “patient is sustaining the behavior change”
   - **Goal Not Met**: the contemplation phase defined as “patient is unsure about the change” or relapse when the patient started making the change and did not succeed due to ambivalence or other reason
   - **Goal Not Set**: the pre-contemplation phase defined as “patient is not thinking about change”

8. At the **Readiness to Learn** field, select the Readiness to Learn option. Click the list to display the **Readiness to Learn** select window.

<table>
<thead>
<tr>
<th>Screen Capture</th>
<th>What to Do</th>
</tr>
</thead>
<tbody>
<tr>
<td>Use this window as follows: (1) Select a readiness to learn option. (2) Click <strong>OK</strong> to add the option to the <strong>Readiness to Learn</strong> field. (Otherwise, click <strong>Close</strong>.)</td>
<td></td>
</tr>
</tbody>
</table>

Figure 4-83: **Readiness to Learn** select window
9. At the **Level of Understanding** field, select the level of understanding. Select one of the following:
   - **Poor**: does not verbalize understanding; unable to return demonstration or teach-back correctly
   - **Fair**: verbalizes need for more education; incomplete return demonstration or teach-back indicates partial understanding
   - **Good**: verbalizes understanding; able to return demonstration or teach-back correctly
   - **Group No Assessment**: education provided in group; unable to evaluate individual response
   - **Refused**: refuses education

10. At the **Provider** field, select the provider for the patient education. Click the list to display the **Education Provider** select window.

<table>
<thead>
<tr>
<th>Screen Capture</th>
<th>What to Do</th>
</tr>
</thead>
</table>
| ![Education Provider select window](image) | Use this search window in one of two ways:  
(1) Use the **Search String** field by typing the last name of the education provider and then clicking Search. The retrieved provider names will populate the **Education Provider** list box. Select a retrieved record and click **OK** to populate the **Provider** field. (Otherwise, click **Close**.)  
(2) Select a name in the **Most Recently Selected** list box and click **OK** to populate the **Provider** field. (Otherwise, click **Close**.) |

Figure 4-84: **Education Provider** select window

11. In the **Comment** field, type any comments about the education topic for the visit. This is a Free Text field.

   After the dialog is complete, click **OK** (otherwise, click **Cancel**).
If the user clicks **OK**, the application saves the data and displays it on the Education Topics Data Entry grid.

If the user clicks **Cancel**, the application displays the “Continue?” warning: “Canceling will lose all unsaved data, Continue?” Click **Yes** to not save and leave the Patient Education dialog. Click **No** and the focus returns to the Patient Education dialog.

If using Edit, click **OK** after the dialog is complete and the fields will be updated. Otherwise, click **Cancel**.

If the record was saved before the installation date for BHS v4.0 it will continue to display the CPT field. You can edit an education record if the visit has a signed note.

**Delete Patient Education Record**

12. Select a record in the Patient Education Data Entry grid to delete.

13. Click **Delete**.

14. At the “Are You Sure” warning message, click **Yes** to remove the selected record. (Otherwise, click **No**.)

**Health Factors**

Select the **Health Factors** option on the Wellness tree structure to display the Health Factor list boxes: **Health Factors History** and **Health Factors Data Entry**.

[Image: Sample Health Factors list boxes]

Health Factors describe a component of the patient’s health and wellness not documented as an ICD or CPT code or elsewhere. Health factors are not visit specific and relate to the patient’s overall health status. They appear on the Adult Regular and Behavioral Health summary report.
Health Factors influence a person’s health status and response to therapy. Some important patient education assessments can be considered health factors such as barriers to learning, learning preferences.

The **Health Factors History** list box is read only. Scroll through the data using the scroll bar.

You can add/edit data in the **Health Factors Data Entry** list box by using the **Add**, **Edit**, or **Delete** buttons.

**Add/Edit Health Factor Record**

The **Add** and **Edit** functions use the same fields.

1. Click **Add** to add a record.

   OR

2. Select a record to edit and click **Edit**.

3. The **Health Factors** search window displays.

   **Screen Capture**

   **What to Do**

   Use this search window in one of two ways:

   (1) Use the **Search String** field by typing the health factor and then clicking the **Search** button. The retrieved health factors will populate the **Health Factor** list box. Select a retrieved record and click **OK** to populate the **Health Factor** field on the **Health Factors** dialog. (Otherwise, click **Close**.)

   (2) Select an education provider name in the **Most Recently Selected** list box and click **OK** to populate the **Health Factor** field on the **Health Factors** dialog. (Otherwise, click **Close**.)

   ![Figure 4-86: Health Factor search window](image-url)
The **Health Factors** dialog is shown in Figure 4-87.

![Sample Health Factors dialog](image)

Figure 4-87: Sample Health Factors dialog

The fields in bold text are required.

4. At the **Health Factor** field, determine if you want to change the field. The application populates this field with what was selected on the **Health Factors** select window. To change this selection, click the list to access the **Health Factor** search window. Refer to Step 2 above for more information about this window.

5. At the **Level/Severity** field, select an option from the list, if applicable:
   - Minimal
   - Moderate
   - Heavy/Severe

6. At the **Quantity** field, type the quantity associated with the health factor, if any.

7. At the **Comment** field, type the text of any comment for clarification about the documented health factor. This is a Free Text field.

8. After the dialog is complete, click **OK** (otherwise, click **Cancel**).

   If the user clicks **OK**, the application saves your data and displays it on the Health Factors Data Entry grid.

   If the user clicks **Cancel**, the application displays the **Continue?** dialog: “Canceling will lose all unsaved data, Continue?” Click **Yes** to not save and leave the **Health Factors** dialog. Click **No** and the focus returns to the **Health Factors** dialog.

   After editing a record and completing the dialog, click **OK** to change the selected record (otherwise, click **Cancel**).

**Delete Health Factor Record**

1. Select a record in the Health Factors Data Entry grid to delete.

2. Click Delete.
3. The application displays the “Are You Sure” warning message; click **Yes** to delete the selected record. (Otherwise, click **No**.)

**Screening**

Select the **Screening** option on the Wellness tree structure to display the screening list boxes: **Screening History** and **Screening Data Entry**.

![Screening group boxes](image)

Figure 4-88: Screening group boxes

The **Screening History** list box is read only. Scroll through the data using the scroll bar.

- If the **Screening Data Entry** list box is empty, the **Add** button displays.
- If the **Screening Data Entry** list box is populated, the **Edit** button displays. You can edit a selected record by clicking the **Edit** button.

In either case, the **Screening** dialog displays.
1. At the Alcohol field, select the outcome of the alcohol screening. Use one of the following:
   - Negative: patient’s screening does not indicate risky alcohol use
   - Positive: patient’s screening indicates risky alcohol use
   - Unable to Screen: provider unable to conduct the screening
   - Patient Refused Screening: patient declined exam or screening
   - Referral Needed

2. At the Provider field, select the name of the provider for the alcohol screening. Click the list and select another one from the Alcohol Provider search window, if needed.

Figure 4-89: Screening dialog
### What to Do

Use this search window in one of two ways:

1. Use the **Search String** field by typing the last name of the provider and then clicking **Search**. The retrieved providers will populate the **Alcohol Provider** list box. Select a retrieved record and click **OK** to populate the **Provider** field. (Otherwise, click **Close**.)

2. Select a name in the **Most Recently Selected** list box and click **OK** to populate the **Provider** field. (Otherwise, click **Close**.)

---

#### Figure 4-90: Alcohol Provider search window

3. At the **Comment** field, type the text of any comment related to the alcohol screening, using 2–245 characters.

4. At the **Depression** field, select the outcome of the depression screening. Select one of the following:
   - **Negative**: denies symptoms of depression
   - **Positive**: provides positive answers to depression screening; further evaluation is warranted
   - **Unable to Screen**: provider unable to conduct the screening
   - **Patient Refused Screening**: patient declines exam or screening
   - **Referral Needed**

5. At the **Provider** field, select the name of the provider for the depression screening. Click the list and select another one from the **Depression Provider** search window, if needed.
Use this search window in one of two ways:
(1) Use the Search String field by typing the last name of the provider and then clicking Search. The retrieved providers will populate the Depression Provider list box. Select a retrieved record and click OK to populate the Provider field. (Otherwise, click Close.)
(2) Select a name in the Most Recently Selected list box and click OK to populate the Provider field. (Otherwise, click Close.)

6. At the Comment field, type the text of any comment related to the depression screening, using 2–245 characters.

7. At the IPV/DV field, select the intimate partner violence/domestic violence screening. Select one of the following:
   - Negative: denies being a current victim of domestic violence
   - Present: admits being a victim of domestic violence
   - Past and Present
   - Past: denies being a current victim but discloses being a past victim of domestic violence
   - Unable to Screen: unable to screen patient (partner or verbal child present, unable to secure an appropriate interpreter, etc.)
   - Patient Refused Screening: patient declined exam or screening
   - Referral Needed
8. At the **Provider** field, select the name of the provider for the IPV/DV screening. Click the list and select another one from the **IPV/DV Provider** search window, if needed.

<table>
<thead>
<tr>

</thead>
</table>
| ![IPV Provider search window](image) | Use this search window in one of two ways:  
(1) Use the **Search String** field by typing the last name of the provider and then clicking **Search**. The retrieved providers will populate the IPV Provider list box. Select a retrieved record and click **OK** to populate the **Provider** field. (Otherwise, click **Close**.)  
(2) Select a name in the **Most Recently Selected** list box and click **OK** to populate the **Provider** field. (Otherwise, click **Close**.) |

Figure 4-92: **IPV Provider** search window

9. At the **Comment** field, type the text of any comment related to the IPV/DV screening, using 2–245 characters. This is a Free Text field.

After the dialog is complete, click **OK** (otherwise, click **Cancel**).

After clicking **OK**, the application saves your data and displays it on the Screening Data Entry grid.

After clicking **Cancel**, the application displays the **Continue?** dialog that states: Canceling will lose all unsaved data, Continue? Click **Yes** to not save and leave the **Screening** dialog. Click **No** and the focus returns to the **Screening** dialog.

10. At the **Suicide Risk** field, select the outcome of the depression screening. Use one of the following:

- **Low**
• Moderate
• High
• Referral Needed
• Patient Refused Screening (patient declines exam or screening)
• Unable to Screen (provider unable to conduct the screening)

11. At the Provider field, select the name of the provider for the Suicide Risk Assessment. Click the list and select another one from the Suicide Risk Provider search window, if needed.

12. In the Comment field, type the text of any comment related to the Suicide Risk Assessment, using 2–245 characters. This is a Free Text field.

After the dialog is complete, click OK (otherwise, click Cancel).

After clicking OK, the application saves your data and displays it on the Screening Data Entry grid.

After clicking Cancel, the application displays the Continue? dialog: “Canceling will lose all unsaved data, Continue?”. Click Yes to not save and leave the Screening dialog. Click No and the focus returns to the Screening dialog.

4.5.7 Measurements Tab

Use the Measurements tab to view existing measurements as well as add, edit, or delete V Measurement data for the current patient visit.

Figure 4-93: Measurements tab
**Measurement View Group Box**

This group box displays the measurements for the current patient in the date range shown in the **Measurement History** group box.

![Sample Measurement View group box](image)

**Change Date Range**

1. At the **Starting Date** field, select a new date. Click the list to display a calendar and select another starting date.
2. At the **Ending Date** field, select a new date. Click the list to display a calendar and select another ending date.
3. Click **Display** to refresh the record in group box.

**Graph**

To better utilize the data collected and viewed through the **Measurement View** group box, you can graph a measurement in the grid.

1. Click **Graph**.
2. The **Measurement Type** dialog displays.
3. Select the measurement type to graph.
4. Click **OK**, and the application (automatically) uses the data to display a graph in MS Excel. (Otherwise, click **Close**.)
5. The focus moves to the MS Excel application with the data shown. The data automatically displays in the form of a line graph. You can create a graph of your choice from the selected data.

Figure 4-96 shows a sample line graph.

![Sample line graph](image)

Figure 4-96: Sample line graph

You can save the data, if needed.

**Measurement Data Entry Group Box**

Use this group box (Figure 4-97) to manage the measurements during the visit.

![Measurement Data Entry group box](image)

Figure 4-97: Measurement Data Entry group box

You can add, edit, or delete measurement data entry records.
**Delete Button**

1. Select the measurement to delete. Measurements can only be deleted from the encounter record where they were first recorded.

2. Click **Delete**.

3. At the “Are You Sure” confirmation, click **Yes** to remove the selected measurement record from the Measurement Data Entry group box. (Otherwise, click **No**.)

**Add/Edit Button**

The **Add** and **Edit** function uses the same fields.

1. Click **Add** to activate the measurement fields for data entry. The fields in bold text are required.

   OR

2. Select a record to edit and click **Edit**. The fields are populated with existing data.

3. At the **Measurement Type** field, select a V Measurement type. Click the list to access the **Measurement Type** search window and select a type.

   This field is inactive when editing a record.
<table>
<thead>
<tr>
<th>Screen Capture</th>
<th>What to Do</th>
</tr>
</thead>
<tbody>
<tr>
<td>Use this search window in one of two ways:</td>
<td></td>
</tr>
<tr>
<td>(1) Use the <strong>Search String</strong> field by typing the measurement type and then clicking <strong>Search</strong>. The retrieved measurement types will populate the Measurement Type list box. Select a retrieved record and click <strong>OK</strong> to populate the <strong>Measurement Type</strong> field. (Otherwise, click <strong>Close</strong>.)</td>
<td></td>
</tr>
<tr>
<td>(2) Select a measurement type in the Most Recently Selected list box and click <strong>OK</strong> to populate the <strong>Measurement Type</strong> field. (Otherwise, click <strong>Close</strong>.)</td>
<td></td>
</tr>
</tbody>
</table>

![Figure 4-98: Measurement Type select window](image)

4. At the **Value** field, type the numeric value of the measurement.

   If the value is outside the accepted range, the **Warning** message displays. Click **OK** to dismiss the warning and populate with another valid numeric value.

![Figure 4-99: Warning dialog – invalid measurement value](image)

5. At the **Provider** field, select the provider who entered the measurement data (the default is the primary provider). Click the list to access the **Measurement Provider** search window to change this field.
### What to Do

Use this search window in one of two ways:

1. Use the **Search String** field by typing the last name of the provider and then clicking **Search**. The retrieved provider names will populate the Measurement Provider list box. Select a retrieved record and click **OK** to populate the **Provider** field. (Otherwise, click **Close**.)
2. Select a name in the Most Recently Selected list box and click **OK** to populate the **Provider** field. (Otherwise, click **Close**.)

![Measurement Provider search window](image)

#### Screen Capture

Figure 4-100: **Measurement Provider** search window

6. Click **OK** on the Measurement Data Entry group box. (Otherwise, click **Cancel**.) Clicking OK causes a new record to display in the grid (showing the Measurement along with its description, value, and provider).

Measurements and Patient Education will print on the Full Encounter form only (not on the Suppressed Encounter form).

7. After clicking **Edit** and changing the fields, click **OK** to change the Value and/or **Provider** in the grid. (Otherwise, click **Cancel**.)

### 4.5.8 Intake Tab (GUI)

When you click the **Intake** tab, the **Intake** window displays.
4.5.9 Suicide Form

Click the Suicide Form tab to display the Suicide Form window. Section 11.2 provides more information about the Suicide Form Window (GUI).

4.5.10 Select PCC Visit Window

You access the PCC Visit window after you have saved and signed a visit, and that visit was entered in the scheduling package with the option to create a visit at check-in.
You can do one of the following: either create a new record or link the entry with the one created by the scheduling package (a PCC incomplete visit record).

If the displayed visits don’t include the one needed to link to, choose a new one or wait until you have had a chance to check in the patient in the Scheduling package.

After checking in the patient in the Scheduling package, return to the GUI and click the **Refresh** button to load more visits.

Then, select the entry you just put in, click **OK** and it will link the two in PCC.

If you access PCC, this is what you will see:

4.6 Browse Visits (GUI)

Use the Browse Visits option on the RPMS Behavioral Health System (GUI) tree structure to access the Browse Visits dialog. This dialog applies to the current patient.

1. Select Browse Visits on the RPMS Behavioral Health System (GUI) tree structure.

2. The Browse Visits dialog displays.

Figure 4-105: Sample Browse Visits dialog

3. At the Browse Visits By field, select one of the following:
- **L** – Patient’s Last Visit
- **N** – Patient’s Last N Visits
- **D** – Visits in a Date Range
- **A** – All of the Patient’s Visits
- **P** – Visits to One Program

If using option A or L, the other fields will not be active.

If N was used in the **Browse Visits By** field, the **Number of Records** field becomes active.

4. At the **Number of Records** field, select an option from the list.

   If D was used in the **Browse Visits** field, the **Begin Date** and **End Date** fields become active.

5. At the **Begin Date** field, select the beginning date from the list.

6. At the **End Date** field, select the ending date from the list.

   If P was used in the **Browse Visits** field, the **Program** field becomes active.

7. At the **Program** field, select the program from the list:
   - **M** – Mental Health
   - **S** – Social Services
   - **O** – Other
   - **C** – Chemical Dependence

8. Click **OK**. (Otherwise, click **Close**.)

   After clicking **OK**, the first page of the **Browse Visits** window displays.
Section 2.6 provides more information about using the controls on this type of window.

### 4.7 View Patient Data

When you expand the View Patient Data option on the tree structure for the RPMS Behavioral Health System (GUI), you can select any of the sub-options to view particular patient data: **Face Sheet, Health Summary, PCC Medications, PCC Labs by Visit Date, or PCC Labs by Lab Test.**
The data applies to the current patient.

4.7.1 Face Sheet

Use the Face Sheet option to view the first page of the Ambulatory Care Record Brief pop-up window for the current patient. Section 2.6 provides more information about this type of window.

4.7.2 Health Summary

Use the Health Summary option to view the selected health summary type report for the current patient.

The Select Health Summary Type dialog displays.

1. At the field, select the health summary type from the list.

2. Click OK. (Otherwise, click Close).

After clicking OK, a pop-up that shows the first page of the particular type of health summary displays.
Figure 4-109: Sample Health Summary pop-up window

If there is more than one page, use the **Next Page** and **Last Page** buttons to move to other pages. Otherwise, specify the page number to move to. Section 2.6 provides more information about the controls on this window.

### 4.7.3 Patient Appointments

Use the **Patient Appointments** option to view the appointments of the current patient in a particular date range. The **Patient Appointments** dialog displays.

Figure 4-110: Sample **Patient Appointments** dialog
The default Begin Date is three months previous and the default End Date is three months in the future.

You can edit either or both dates.

1. At the **Begin Date** field, click the list and select a date from the calendar. This establishes the beginning date of the date range.

2. At the **End Date** field, click the list and select a date from the calendar. This established the ending date of the date range.

3. When this dialog is complete, click **OK** (otherwise, click **Close**). If OK was used, a pop-up displays that shows the first page of the appointments for the current patient in the particular date range.

   The application saves both default dates when you exit the application.

   Section 2.6 provides more information about using the controls of this type of window.

### 4.7.4 PCC Medications

Use the **PCC Medications** option to view the PCC medications for the current patient in a particular date range. The **PCC Medications** dialog displays.

![Sample PCC Medications dialog](image)

Figure 4-111: Sample **PCC Medications** dialog

The default date Start Date is one year previous.

You can edit either or both dates.

1. At the **Begin Date** field, click the list and select a date from the calendar. This established the beginning date of the date range.

2. At the **End Date** field, click the list and select a date from the calendar. This established the ending date of the date range.

3. When this dialog is complete, click **OK** (otherwise, click **Close**).

   After clicking **OK**, a pop-up displays, showing the first page of the Medication Prescribed in the Behavioral Health database within the particular date range.
4.7.5 PCC Labs by Visit Date

Use the PCC Labs by Visit Date option to view the PCC Labs for a current patient in a particular visit date range. The application displays the View Labs by Visit Date dialog.

![Sample View Labs by Visit Date dialog](image)

The default Begin Date is one year previous.

You can edit either or both dates.

1. At the Begin Date field, click the list and select a date from the calendar. This establishes the beginning date of the date range.

2. At the End Date field, click the list and select a date from the calendar. This establishes the ending date of the date range.

3. When this dialog is complete, click OK (otherwise, click Close).

After clicking OK, the first page of the PCC labs by visit date within the particular date range displays.

This same function is available when entering/changing visit encounter data for one patient on the Rx Notes/Labs tab.

4.7.6 PCC Labs by Lab Test

Use the PCC Labs by Lab Test option to view the PCC Labs for the current patient in a particular lab test date range. The application displays the View Labs by Lab Test dialog.

![Sample View Labs by Lab Test dialog](image)

The default Begin Date is one year previous.
You can edit either or both dates.

4. At the **Begin Date** field, click the list and select a date from the calendar. This establishes the beginning date of the date range.

   If you change the Begin Date in View Labs by Lab Test, the application applies this change to the Begin Date for the View Labs by Visit Date. The application saves your default Begin Date when you exit the application.

5. At the **End Date** field, click the list and select a date from the calendar. This establishes the ending date of the date range.

6. When this dialog is complete, click **OK** (otherwise, click **Close**).

   After clicking **OK**, a pop-up displays that shows the first page of the PCC labs by lab test within the particular date range.

This same function is available when entering/changing visit encounter data for one patient on the **Rx Notes/Labs** tab.
5.0 Group Encounters

This section provides information on how to enter or edit group encounter data for Roll and Scroll and the RPMS Behavioral Health System (GUI).

5.1 Group Form Data Entry Using Group Definition (Roll and Scroll)

Use the Group Form Data Entry Using Group Definition (GP) option to enter BH visit data from a group form. Use GP when the encounter involves a group of patients. This process allows you to enter data into each participant’s record without entering an encounter record for each patient.

1. At the “Select Behavioral Health Data Entry Menu Option” prompt, type GP.

2. At the “Enter Beginning Date” prompt, type the beginning date of the date range for displaying Group definitions.

3. At the “Enter Ending Date” prompt, type the ending date of the date range for displaying Group definitions.

The application displays the Group Entry window.

![Figure 5-1: Sample Group Entry window](image)

The asterisk (*) preceding the Entry Date indicates that the record contains an unsigned group note.

At the “Select Action” prompt, press Enter to view the next page of data about Group Entry.

Use the Quit action to dismiss this window.
Note: You can edit group records only with the group screens, not on the individual data entry side (PDE, SDE).

5.1.1 Add New Group

Use action 1 (Add a New Group) to add a new group to the list of groups.

1. At the “Select Action” prompt, type **1**.

2. At the “Enter Date of the Group Activity” prompt, type the date of the new group activity.

The **Group Encounter Documentation** window displays.

![Sample Group Encounter Documentation window](image)

Add/View/Update Providers (Primary or Secondary) for this Group? **Y**

Insert

Figure 5-2: Sample **Group Encounter Documentation** window

The underlined fields are required.

3. At the “Add/View/Update Providers (Primary or Secondary) for this Group?” prompt, type **Y** (yes) or **N** (no).

If **Y** was used, the add function is available. This is the **only place** to add providers for the group encounter. The following pop-up displays.

![Sample Secondary Providers pop-up](image)

**PROVIDER:**  
**PRIMARY/SECONDARY:**

**PROVIDER:**  
**PRIMARY/SECONDARY:**

**PROVIDER:**  
**PRIMARY/SECONDARY:**

Figure 5-3: Sample Secondary Providers pop-up
The underlined fields on the pop-up are required.

a. At the “PROVIDER” prompt, type the provider name.

b. At the “PRIMARY/SECONDARY” prompt, type the provider type by using P for primary or S for secondary. Only one primary provider can be used, whereas, multiple secondary providers are allowed.

Below are more fields on the **Group Encounter Documentation** window.

4. At the “Encounter Date” prompt, type the encounter date. The default shows the date of the new group activity (that was entered before you accessed this window).

5. At the “Arrival Time” prompt, type the arrival time of the group encounter. The default shows 12:00.

6. At the “Program” prompt, type the program for the group encounter. Use one of the following:
   - M – Mental Health
   - S – Social Services
   - C – Chemical Dependency
   - O – Other

7. At the “Community of Service” prompt, type the name of community of service where the encounter took place.

8. At the “Group Name” prompt, type the name of the group encounter, using between 1 and 30 characters.

9. At the “Clinic” prompt, type the clinic (by number or name).

10. At the “Activity” prompt, type the activity of the group encounter.

11. At the “Activity Time” prompt. Type the number of minutes (no decimal digits) the provider(s) spent on the activity, using any integer between 1 and 9999. Please note, 0 (zero) is not allowed as a valid entry. The time is divided equally among each of the group participants.

12. At the “Encounter Location” prompt, type the name of the location for the encounter.

13. At the “Type of Contact” prompt, type the contact type (the activity setting).

14. At the “POV or DSM (Primary Group Topic)” prompt, press Enter to access the POV or DSM Diagnosis pop-up.
### Figure 5-4: Sample pop-up window for POV

- **At the “Code” prompt, type an MHSS Problem/DSM POV code, using 2–80 characters.**
- **After populating the Code field, the application populates the Narrative for the particular code (but can be edited). Note: The special characters single or double quotation marks (‘or ‘) cannot be the first character of the POV narrative.**

Below are more fields on the **Group Encounter Documentation** window.

15. **At the “Chief Complaint/Presenting Problem” prompt, type the chief complaint or presenting problem using 2 to 80 characters.** This information describes the major reason the patient sought services.

16. **At the “Any Patient Education Done?” prompt, type Y (yes) or N (no).**

   If using Y, the **Patient Education for this Group Activity** pop-up displays.

   - **EDUCATION TOPIC:**
   - **LEVEL OF UNDERSTANDING:** GROUP-NO ASSESSMENT
   - **PROVIDER:** THETA, SHIRLEY
   - **MINUTES:**
   - **COMMENT:**

### Figure 5-5: Sample Patient Education enter/edit screen

- **At the “EDUCATION TOPIC” prompt, type the education topic code.**
- **After populating this field, the following pop-up displays.**

### Figure 5-6: Sample pop-up for education data
The underlined fields are required.

c. At the “Level of Understanding” prompt, the application automatically populates with GROUP-NO ASSESSMENT. You cannot change this field.

d. At the “Provider” prompt, the application automatically populates with the current logon user. This can be changed.

e. At the “Minutes” prompt, type the number of minutes spent on education, using any integer 1–9999.

f. At the “Comment” prompt, type the text of any comment about the education topic, using 2–100 characters.

Below are more fields on the **Group Encounter Documentation** window.

17. At the “CPT Code(s) <press enter>” prompt, press Enter to access another window where you specify the CPT or HCPCS codes associated with the group encounter.

```
<table>
<thead>
<tr>
<th>CPT Code(s)</th>
</tr>
</thead>
<tbody>
<tr>
<td>CPT CODE:</td>
</tr>
<tr>
<td>CPT CODE:</td>
</tr>
<tr>
<td>CPT CODE:</td>
</tr>
<tr>
<td>CPT CODE:</td>
</tr>
</tbody>
</table>
```

**Figure 5-7: Sample pop-up for CPT Code(s) data**

a. At the “CPT CODE” prompt, type the CPT code to be used for the group. Another pop-up window displays.

```
| QUANTITY: 1 |
| MODIFIER:   |
| MODIFIER 2: |
```

**Figure 5-8: Sample secondary pop-up window**

b. At the “Quantity” prompt, type the quantity associated with the CPT code.

c. At the “Modifier” prompt, type the modified associated with the CPT code.

d. At the “Modifier 2” prompt, type the second modified associated with the CPT code.

After completing the “Modifier 2” prompt, the focus returns to the “CPT CODE” prompt.

Below are more fields on the **Group Encounter Documentation** window.

18. At the “S/O/A/P (Standard Group Note) <press enter>” prompt, press Enter to access another window where you enter the text of a group note.
Table 5-1 lists the most commonly used RPMS text editor commands:

Table 5-1: RPMS text editor commands

<table>
<thead>
<tr>
<th>Action Needed</th>
<th>Use These Keys</th>
</tr>
</thead>
<tbody>
<tr>
<td>Delete a line (extra blank or text)</td>
<td>PF1(F1) followed by D</td>
</tr>
<tr>
<td>Join two lines (broken or too short)</td>
<td>PF1(F1) followed by J</td>
</tr>
<tr>

</table>

19. At the “Patients <press enter>” prompt, press Enter to access the Patients pop-up:

Please enter all patients who participated in the group. Remove any patients who were not present

PATIENT:
PATIENT:
PATIENT:
PATIENT:
PATIENT:
PATIENT:

Figure 5-10: Sample pop-up for Patients
a. At the “PATIENT” prompt, type the patient name, HRN, DOB, or Social Security Number.

b. More than one patient name can be used.

After you save and exit, the application displays the following choices:

<table>
<thead>
<tr>
<th>Select one of the following:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Y</td>
</tr>
<tr>
<td>N</td>
</tr>
<tr>
<td>Q</td>
</tr>
</tbody>
</table>

Do you wish to continue on to add patient visits for this group: Y//

Figure 5-11: Questions upon exit

- Type Y to continue adding the patient’s individual visit associated with the group visit. The focus returns to the record for the first patient.
- Type N to edit the group definition.
- Type Q to quit and exit. The focus returns to the Group Entry screen.

After completing the group definition, completing the documentation for the individual patients, and saving, the application will display an option to sign all SOAP/Progress Notes or to leave them unsigned.

5.1.2 Edit Group Definition

Use option 8 to edit a selected unsigned group entry record.

If the selected group already has visits created, the application displays the message: This group already has visits created. You must use the REVIEW/EDIT GROUP VISITS to modify visits within this group. In this case, the focus returns to the Group Entry window.

1. At the “Select Action” prompt, type 8.
2. At the “Select GROUP ENTRY” prompt, select a group to edit.
3. The Group Encounter Documentation window displays.

* GROUP ENCLOSENT DOCUMENTATION *
DEMO INDIAN HOSPITAL

NOTE: Please enter all standard information about this group activity.
After you leave this screen a record will be created for each patient.
At that time you can add additional information for each patient.

Add/View/Update Providers (Primary or Secondary) for this Group? Y

Section 5.1.1 provides more information about the fields on this window.

5.1.3 Review/Edit Group Visits

Use action 6 to review/edit the group visits with a particular unsigned group encounter.

1. At the “Select Action” prompt, type 6.

2. At the “Select GROUP ENTRY” prompt, type the group entry to review/edit.

If the group has a signed note, the application displays the message: The notes associated with this group entry have been signed. You can edit other items in this entry but not the notes. Press Enter to continue.

After populating the Select GROUP ENTRY field, the Enter/Edit Patient Group Data window displays.

Figure 5-13: Sample Enter/Edit Patient Group Data window

Use the Q action to exit the window.

Delete a Patient’s Group Visit (X)
Use the X action to remove a particular patient’s group visit.
1. At the “Select Action” prompt, type **X**.

2. At the “Enter PATIENT GROUP ENTRY” prompt, type the group number.

3. The application displays the BH record data.

4. At the end of the data, the application verifies that you want to delete the particular patient’s visit. Type **Y** (yes) or **N** (no).

**Display Patient’s Group Visit (D)**

Use the D action to display a particular patient’s group visit.

1. At the “Select Action” prompt, type **D**.

2. The BH Visits Record Display window (view only) displays.

**Edit Patient’s Group Visit (AE)**

Use the AE option to edit a patient’s group visit.

1. At the “Select Action” prompt, type **AE**.

2. At the “Enter PATIENT GROUP ENTRY” prompt, type the group number.

The **BEHAVIORAL HEALTH RECORD EDIT** window for the particular patient displays.

```

Figure 5-14: Sample Behavioral Health Record Edit window
If you cannot change the note, the applicable field on the Behavioral Health Record Edit window will read: SOAP/PROGRESS NOTE SIGNED/UNEDITABLE. In this case, as you tab through the fields, the application will skip the Note field.

The underlined fields are required. Section 4.2.2 provides more information about the prompts on this window.

5.1.4 Display Group Entry

Use action 2 to display group entry data for a specified group.

1. At the “Select Action” prompt, type 2.

2. At the “Select GROUP ENTRY” prompt, type the number of the group.

The application displays the Output Browser window showing the group data.

   - Hyphen (-) to view the previous (does not apply to the first screen)
• Q to quit the Output Browser screen and the focus returns to the Group Entry.

5.1.5 Print Encounter Forms

Use action 5 to print a specified encounter form for a particular group.

1. At the “Select Action” prompt, type 5.

2. At the “Select GROUP ENTRY” prompt, type the group to use.
   
   The application states: Forms will be generated for the following patient visits. After this message, the application displays the names of the patients in the group.

3. At the “Enter response” prompt, type one of the following:
   
   • F – Full Encounter Form
   • S – Suppressed Encounter Form
   • B – Both a Suppressed & Full Encounter Form
   • T – Two copies of the Suppressed Encounter Form
   • E – Two copies of the Full Encounter Form
     
     A full encounter form (option F) prints all data for a patient encounter including the S/O/A/P note.
     
     The suppressed report (option S) does NOT display the following information: Chief Complaint, SOAP note, measurement data, screenings.

4. At the “Device” prompt, type the device to output the encounter form.

   Below is a sample full encounter form report.

5.1.6 Duplicate Group

Use action 3 to duplicate a particular group encounter. This creates a new group encounter.

To prevent inclusion of deceased patients in duplicated groups, the application will search the RPMS Patient Registration files for a Date of Death before displaying the patient’s name, case number, etc.

Duplicating a group containing signed SOAP/Progress Notes will revert the SOAP/Progress Notes associated with the new group encounter to the unsigned status.
Please note: The SOAP/Progress Note for each individual patient is actually the standard group note plus the individual entry completed on the Patient Data tab. When a group is duplicated, the standard group note is retained but the individual note added on the Patient Data tab (as well as any other changes made on that tab) is not.

1. At the “Select Action” prompt, type 3.

2. At the “Select GROUP ENTRY” prompt, type the number of the group to duplicate in order to create a new group.

3. At the “Enter Date for the new group entry” prompt, type the date for the new group.

The Group Encounter Documentation window displays.

**Figure 5-17: Sample Group Encounter Documentation window**

Section 5.1.1 provides more information about how to complete the Group Encounter Documentation window.

### 5.1.7 Add No Show visit

Use action 7 to enter a No Show visit for a client who failed to attend the group session.

**Note:** Any patient who is a no show or canceled should be removed from a duplicated group before the group documentation is completed.
1. At the “Select Action” prompt, type 7.

2. At the “Select GROUP ENTRY” prompt, type the number of the group to use.

3. At the “Select PATIENT NAME” prompt, type the name of the patient who failed to attend the group session.

4. At the “Enter PRIMARY PROVIDER” prompt, type the primary provider name.

The Behavioral Health Visit Update window displays. Section 4.2.1 provides more information about using this window.

### 5.1.8 Sign Notes

Use action 9 to sign an unsigned SOAP/Progress note for a particular group encounter. Only the primary provider for the particular record can sign the note.

1. At the “Select Action” prompt, type 9.

2. At the “Select Group Entry” prompt, type the number of the record to use.

If you are NOT the primary provider, the application displays the message in Figure 5-18. Press Enter and the focus returns to the Group Entry window.

You are not the primary provider for this group, no electronic signature will be applied and no PCC link will occur.
The primary provider will need to sign these at a later time.
Press enter to continue....

Figure 5-18: Message about the primary provider

If there is a record but no visits created for this group, the application displays the following message. Press Enter and the focus returns to the Group Entry window.

There were no visits created for this group.
Press enter to continue....

Figure 5-19: Message about no visits created

If the provider opted out of E-Signature, the application displays the following information:

No E-Sig Required. Provider opted out of E-Sig

Figure 5-20: Message when provider opted out of E-Signature

If you are the primary provider, the BH Visit Record Display window displays.
Behavioral Health System (AMH) Version 4.0 Patch 8

Figure 5-21: Sample BH Visit Record Display window

After you quit this window, the application asks: Do you wish to edit this record? Type Y to edit the record. Type N to not edit the record.

If Y was used, the focus stays on the window.

If N was used, the application prompts: Enter your Current Signature Code. Type Y (yes) to enter your signature code, otherwise type N (no). Section 2.14.6 provides more information about signing a note.

Note: No Show notes are not included here and must be signed individually.

5.1.9 Delete Group

Use action 4 to remove a particular group encounter record with an unsigned note.

1. At the “Select Action” prompt, type 4.
2. At the “Select GROUP ENTRY” prompt, type the number of the group to delete.
3. The application displays the data associated with the group visit.
4. At the “Are you sure you want to remove/delete both the group definition and all associated individual patient records” prompt, type Y (yes) or N (no).
Please note that the user must hold a specific key in order to delete group encounters with signed notes. Removing the group definition will also remove the related individual patient encounter records.

### 5.2 Group Entry Window (GUI)

The following shows where the Group Encounter function is located on the RPMS Behavioral Health System (GUI) tree structure.

![Group Encounters location on tree structure](image)

Figure 5-22: Group Encounters location on tree structure

Click the **Group Encounters** option to access the **Group Entry** window.

![Group Entry window](image)

Figure 5-23: Group Entry window

The following table provides information about the features on the **Group Entry** window.
Table 5-2: Group Entry window features and functions

<table>
<thead>
<tr>
<th>Feature</th>
<th>Functionality</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Group Entry Date Range</strong></td>
<td>The Group Entry window displays the group encounters in the date range shown in the Group Entry Date Range group box (default is one year). The default view is sorted by date (from most recent). Change the date range by accessing the calendar under the list for the date. After changing the date range, click OK to update the display in the Group Entry group box.</td>
</tr>
<tr>
<td><strong>Group Entry list box</strong></td>
<td>This list box shows the records in the particular group entry date range. The asterisk (*) in the first column indicates that the particular record contains an unsigned note. When this type of record is selected, the Sign Note button becomes active.</td>
</tr>
<tr>
<td><strong>Add button</strong></td>
<td>Click the Add button to add a new group encounter record on the Group Data Entry - Add Group Data window.</td>
</tr>
<tr>
<td><strong>Edit button</strong></td>
<td>Click the Edit button to change the selected group encounter record on the Group Data Entry - Edit Group Data window.</td>
</tr>
<tr>
<td><strong>View button</strong></td>
<td>Use the View button (or double-click on a record) to view the highlighted group encounter record on the Group Data Entry - View Group Data window. This window has the same fields as the Add/Edit group data window.</td>
</tr>
<tr>
<td><strong>Duplicate button</strong></td>
<td>Use the Duplicate button to duplicate an existing group encounter record in order to create a new one. You will need to edit any information that would be different for the new encounter group. To prevent inclusion of deceased patients in duplicated groups, the application will search the RPMS Patient Registration files for a Date of Death before displaying the patient’s name, case number, etc. Duplicating a group containing signed SOAP/Progress Notes causes the notes to revert to unsigned status (for the SOAP/Progress Notes associated with the new group encounter). The duplicated group will duplicate the standard group note only and not the individual patient group note. Select an existing group encounter and then click Duplicate. The application displays the Group Data Entry - Duplicate Group Data window. The fields are the same as those on the Group Data Entry - Add Group Data window. The duplicated group encounter will have a default date/time as the current date/time.</td>
</tr>
<tr>
<td><strong>Delete button</strong></td>
<td>After selecting the particular record and clicking Delete, the Are You Sure confirmation message displays, asking if you are sure you want to delete. Click Yes (otherwise, click No). Clicking Yes removes the selected group encounter record from the group box. If Yes was used, the group definition and all individual patient records will be removed. Note that Group Encounter records with signed SOAP/Progress Notes can only be deleted by users that have the AMHZ DELETE SIGNED NOTE security key.</td>
</tr>
<tr>
<td>Feature</td>
<td>Functionality</td>
</tr>
<tr>
<td>-------------</td>
<td>-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td><strong>Print Encounter</strong> button</td>
<td>Select the group encounter record to print and click the <strong>Print Encounter</strong> button. It will print one of the following: Full, Suppressed, Both Full and Suppressed. The full option prints all data for the group encounter, including the SOAP note. The suppressed report does NOT display the following information: Chief Complaint, SOAP note, measurement data, screenings. The application displays the first page of the <strong>Print Encounter Group</strong> pop-up window.</td>
</tr>
<tr>
<td><strong>Help</strong> button</td>
<td>Use the <strong>Help</strong> button to access the online help for the <strong>Group Entry</strong> window.</td>
</tr>
<tr>
<td><strong>Close</strong> button</td>
<td>Use the <strong>Close</strong> button to dismiss the <strong>Group Entry</strong> window.</td>
</tr>
<tr>
<td><strong>Sign Note</strong> button</td>
<td>Use the <strong>Sign Note</strong> button to sign a particular &quot;unsigned&quot; group encounter record (asterisk (*) in the first column).</td>
</tr>
</tbody>
</table>

The following applies to the information about the Sign Note button:

Click the **Sign Note** button to access the **Sign?** dialog where you type your electronic signature. Section 2.14.5 provides more information.

If the primary provider has opted out of E-Sig will pass to PCC, the application displays the **Message** regarding this.

![Message](image)

Figure 5-24: Message stating that the provider opted out of E Sig

The **Message** means that no electronic signature is required for the particular record. Click **OK** and leave the Sign Note process.

5.3 Add/Edit Group Data (GUI)

1. Click the **Add** button to add a new group data record on the **Group Data Entry - Add Group Data** window.

   OR

2. Use the **Edit** button to change the highlighted group encounter record on the **Group Data Entry - Edit Group Data** window.

All Patient Education entries created before the installation date for BHS v4.0 will continue to display the **CPT** field.
Below is the **Group Data Entry - Add Group Data** window. (The same fields appear on the **Group Data Entry - Edit Group Data** window.)

Figure 5-25: **Group Data Entry - Add Group Data** window

The following table provides information about the features on this window.

**Table 5-3: Group Data Entry – Add Group Data window features and functionality**

<table>
<thead>
<tr>
<th>Feature</th>
<th>Functionality</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Group Encounter Information</strong> group box</td>
<td>The fields in this group box display the existing data (cannot be changed). All editing is completed in the <strong>Group Encounter Information</strong> group box or on the <strong>Patient Data</strong> tab if the group has already been saved.</td>
</tr>
<tr>
<td></td>
<td>• If the group has been signed the other fields can still be edited (does not apply to the note section).</td>
</tr>
<tr>
<td></td>
<td>• If you access an unsigned group data record, you can edit the note.</td>
</tr>
<tr>
<td><strong>Help</strong> button</td>
<td>Click this button to access the online help system about this window.</td>
</tr>
<tr>
<td><strong>Save</strong> button</td>
<td>Click this button to save the changes and dismiss the window.</td>
</tr>
</tbody>
</table>
The following applies to the Save process:

- If you added a SOAP/Progress note, the application displays the **Sign?** confirmation message that asks if you want to sign the SOAP/Progress note now.
  - Click **No** to leave the note unsigned.
  - Click **Yes** and the application will display the **Electronic Signature** dialog. Section 2.14.5 provides more information about electronic signature (GUI).

The following applies to the Close process:

- The Close process displays the **Continue?** dialog: “Unsaved Data Will Be Lost, Continue?” Click **Yes** to not save; this dismisses the add group data window. Click **No** to remain on the add group data window.

Other features to consider are:

- If you access an unsigned group data record, you can edit the note.

- The **Patient Data** tab is the only place you can do any editing after a group has been saved.

- If you access an unsigned group data record, then you can edit everything on that tab except the note.

### 5.3.1 Group Encounter Information Group Box

The add window has the following (active) fields.

![Group Encounter Information group box](image)

Figure 5-26: **Group Encounter Information** group box

These fields are not active (and cannot be changed) on the **Edit Group Data** window.

The fields in bold text are required.

1. At the **Primary Provider** field, select the primary provider for the group encounter. The default is the current provider.

   Change this field by clicking the list to access the **Primary Provider** search/select window. Here you can search for a primary provider name.
Use this search window in one of two ways:

1. Use the Search String field by typing the provider's last name and then clicking Search. The retrieved names will populate the Primary Provider list box. Select a name and click OK to populate the Primary Provider field. (Otherwise, click Close.)

2. Select a name in the Most Recently Selected list box and click OK to populate the Primary Provider field. (Otherwise, click Close.)

2. At the Encounter Date/Time field, select the encounter date and time. The default is the current date and time.

Change the date by clicking the list to access the calendar. You can select the hour, minutes, and AM/PM. If you make the hour and minutes, for example, 13:25, the application automatically changes the time to 1:25 PM. In addition, you can change the time manually.

3. At the Program field, select the program associated with the visit. Click the list and use one of the following:

- Mental Health
- Social Services
- Other
- Chemical Dependency
After selecting a program, the application automatically populates the **Clinic** and **Encounter Location** fields if the defaults were set in the **Site Parameters** menu. These fields are inactive on the edit window.

4. At the **Encounter Location** field, select the location of the group encounter. Change this field by clicking the list to access the **Location** search window. Here you can search for a location name.

<table>
<thead>
<tr>
<th>Screen Capture</th>
<th>What to Do</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="Location search window" /></td>
<td>Use this search window in one of two ways: (1) Use the <strong>Search String</strong> field by typing the location and then clicking <strong>Search</strong>. The retrieved locations will populate the <strong>Location</strong> list box. Select a location and click <strong>OK</strong> to populate the <strong>Encounter Location</strong> field. (Otherwise, click <strong>Close</strong>.) (2) Select a location in the <strong>Most Recently Selected</strong> list box and click <strong>OK</strong> to populate the <strong>Encounter Location</strong> field. (Otherwise, click <strong>Close</strong>.)</td>
</tr>
</tbody>
</table>

5. At the **Clinic** field, select the clinic context. The response must be a clinic that is listed in the RPMS Standard Code Book table. Change this field by clicking the list to access the **Clinic** search window. Here you can search for a type of clinic.
What to Do

Use this search window in one of two ways:

1. Use the Search String field by typing the clinic and then clicking Search. The retrieved clinics and their codes will populate the Clinic list box. Select a clinic and click OK to populate the Clinic field. (Otherwise, click Close.)

2. Select a clinic in the Most Recently Selected list box and click OK to populate the Clinic field. (Otherwise, click Close.)

Figure 5-29: Clinic search window

6. At the Group Name field, type the name of the group encounter, using between 1 and 30 characters. This is a Free Text field.

5.3.2 Activities Tab

Use the Activities tab to specify the community of service, type of contact, activity, and activity code. In addition, you can add CPT codes in the lower group box.

The information on this tab is read only when using the Edit Group Data window.
Below are the fields for the **Activities** tab.

7. At the **Community of Service** field, select the community of service where the group encounter took place. Change this field by clicking the list to access the **Community** search window. Here you search for the community name.

<table>
<thead>
<tr>
<th>Screen Capture</th>
<th>What to Do</th>
</tr>
</thead>
<tbody>
<tr>
<td>Use this search window in one of two ways: (1) Use the <strong>Search String</strong> field by typing the community name and then clicking <strong>Search</strong>. The retrieved community names and their states will populate the <strong>Community</strong> list box. Select a community and click <strong>OK</strong> to populate the <strong>Community of Service</strong> field. (Otherwise, click <strong>Close</strong>.) (2) Select a community in the <strong>Most Recently Selected</strong> list box and click <strong>OK</strong> to populate the <strong>Community of Service</strong> field. (Otherwise, click <strong>Close</strong>.)</td>
<td></td>
</tr>
</tbody>
</table>
8. At the **Type of Contact** field, select the type of contact (the activity setting) for the group encounter. Change this field by clicking the list to access the **Type of Contact** window where you select an option.

<table>
<thead>
<tr>
<th>Screen Capture</th>
<th>What to Do</th>
</tr>
</thead>
</table>
| ![Type of Contact Window](image.png) | Use the **Type of Contact** window as follows:  
(1) Select a type of contact from the list.  
(2) Click **OK** to populate the **Type of Contact** field. (Otherwise, click **Close**.) |

Figure 5-32: **Type of Contact** window

9. At the **Activity** field, select the activity for the group encounter. The default is Group Treatment. Change this field by clicking the list to access the **Activity** search window. Here you search for an activity name or its code.
### Screen Capture

<table>
<thead>
<tr>
<th>What to Do</th>
</tr>
</thead>
<tbody>
<tr>
<td>Use this search window in one of two ways: (1) Use the Search String field by typing the activity name or code and then clicking Search. The retrieved activities will populate the Activity list box. Select an activity and click OK to populate the Activity field. (Otherwise, click Close.) (2) Select a record in the Most Recently Selected list box and click OK to populate the Activity field. (Otherwise, click Close.)</td>
</tr>
</tbody>
</table>

![Activity search window](image)

Figure 5-33: **Activity** search window

10. At the **Activity Time** field, type the number of minutes spent on the activity for the group, using any integer between 1 and 9999. Please note that zero is not a valid entry.

### CPT Codes Group Box

Use the **CPT Code** group box to manage the CPT codes associated with the activity for the group.

#### Add Button

1. Click **Add**.

2. The **CPT Code** search/select window displays.
3. At the **Search String** field, type a search string to search for a particular CPT code. Then click **Search**. The CPT codes will display in the **CPT Code** list field.

   a. Select a retrieved CPT Code.
   
   b. At the **Quantity** field, type the number of CPT codes to use to help facilitate billing.
c. At the Modifier field, select the modifier for the CPT code. Click the list to access the CPT Modifier search window.

<table>
<thead>
<tr>
<th>Screen Capture</th>
<th>What to Do</th>
</tr>
</thead>
</table>
| ![CPT Modifier search window](image) | Use this search window in one of two ways:
   1. Use the Search String field by typing the CPT Modifier name and then clicking Search. The retrieved CPT Modifier names and their descriptions will populate the CPT Modifier list box. Select a CPT modifier and click OK to save the modifier. (Otherwise, click Close.)
   2. Select a CPT modifier in the Most Recently Selected list box and click OK to save the modifier. (Otherwise, click Close.) |

Figure 5-36: CPT Modifier search window

4. After the Quantity and Modifier fields are complete, click the right arrow button to add the items to the Selected Items list box.

   More than one CPT Code can be used in the above process.

5. Another way to populate the Selected Items list box is to select a CPT code in the Most Recently Selected list box and then click the right arrow button.

6. Remove a selected CPT code in the Selected Items list box by clicking the left arrow button.

7. When the Selected Items list box is complete, click OK to save the data and to add the data to the CPT Code(s) group box. (Otherwise, click Close.)

Delete Button

1. Select a CPT code record to delete.

2. Click Delete.

3. At the Are You Sure confirmation message, click Yes and the selected record will be removed from the CPT Code(s) group box. (Otherwise, click No).
5.3.3 Group Data Tab

Use the **Group Data** tab to specify secondary providers, POV code, group note, and CPT codes for the group encounter.

![Figure 5-37: Group Data tab](image)

**Note:** Only the primary provider can change the data on the **Group Data** tab. Whoever is doing the data entry can change the information on this tab until such time the group has been saved; nothing on this tab can be edited after the group is saved. All editing takes place on the **Patient Data** tab.

The group box names in bold text are required.

**Chief Complaint/Presenting Problem Field**

In the field, type the chief complaint or presenting problem using 2 to 80 characters. This information describes the major reason the patients sought services.

**Secondary Providers Group Box**

Use the **Secondary Providers** group box to add or delete secondary providers for the group encounter.

![Figure 5-38: Secondary Providers group box](image)
Add Button

1. Click **Add**.

2. The **Secondary Provider** multiple search/select window displays.

![Secondary Providers search/select window](image)

Figure 5-39: **Secondary Providers** search/select window

Use the **Secondary Providers** multiple search/select window in the following manner:

a. At the **Search String** field, type a few characters of the search criteria.

b. Click **Search** and the retrieved the records display in **Secondary Provider** list box.

c. To add one or more selected records from the **Secondary Provider** list box to the **Selected Items Secondary Provider** list box, click the right arrow button.

d. Another way to add records to the **Selected Items Secondary Provider** list box is to select one or more records in the **Most Recently Selected** list box and click the right arrow button.

e. Similarly, you can remove one or more selected records from the **Selected Items Secondary Provider** list box by clicking the left arrow button.
f. When the records in the Selected Items Secondary Provider list box is complete, click OK and the records populate the Secondary Providers group box. (Otherwise, click Close.)

Delete Button
1. Select a secondary provider record to delete.
2. Click Delete.
3. At the Are You Sure confirmation message, click Yes to remove the selected secondary provider. Otherwise, click No.

Purpose of Visit - POV (Primary Group Topic) Group Box
Use this group box to add, edit, or delete POV codes and their narratives associated with the group encounter. These are POVs for all group members and will display as such on the Patient Data tab and the printed encounter record unless edited or deleted on the Patient Data tab.

At least one POV record is required for a group encounter.

![Figure 5-40: POV group box]

You can add, edit, or delete POV records in this group box.

Delete Button
1. Select a POV record to delete.
2. Click Delete.
3. At the Are You Sure confirmation message, click Yes to remove the selected POV record. Otherwise, click No.

Add Button
1. Click Add.
2. The POV multiple search/select window displays.
Use the POV multiple search/select window in the following manner:

3. At the **Search String** field, type a few characters of the search criteria.

4. Click **Search** and the retrieved the records display in **POV** list box (the POV and its narrative).

5. To add one or more selected records from the **POV** list box to the **Selected Items** list box, click the right arrow button.

6. Another way to add records to the **Selected Items** list box is to select one or more records in the **Most Recently Selected** list box and click the right arrow button.

7. Similarly, you can remove one or more selected records from the **Selected Items** list box by clicking the left arrow button.

8. When the records in the **Selected Items** list box is complete, click **OK** and the records populate the **Purpose of Visit (POV)** group box. (Otherwise, click **Close**.)

**Edit Button**

Use the **Edit** button to change the Narrative part of a POV record in the group box.

1. Select a POV record to edit.
2. Click **Edit**.

3. The **Edit POV** dialog displays.

![Edit POV dialog](image)

Figure 5-42: **Edit POV** dialog

4. At the **Narrative** field, type the new POV narrative, using 2–80 characters.

   **Note**: The special characters double or single quotation marks (“ or ‘) cannot be the first character of the POV narrative. The Narrative field is a Free Text field.

5. Click **OK** to change the narrative of the selected code on the POV group box. Otherwise, click **Close** to not change the narrative.

**Standard Group Note Field**

Use **Standard Group Note** field to type the text of a group note for the group encounter. This is a Free Text field.

You must be on the **Patient Data** tab to do any editing after the group has been saved.

**5.3.4 Group Education Tab**

Use the **Group Education** tab to add, change, or delete education data about the group encounter.
Figure 5-43: Sample Group Education tab

The information on this tab is read-only when using the **Edit Group Data** window.

**Add/Edit Group Education Record**

The **Add** and **Edit** functions use the same fields.

All Group Education entries created before the installation date for BHS v4.0 will continue to display the **Goal** and **CPT** fields.

1. Click **Add** to activate the fields below the education grid.

   OR

2. Select a record to edit and click **Edit**.

3. At the **Education Topic** field, select the education topic for the group encounter. Click the list to access the **Education Topic** search window. Here you search for an education code.
<table>
<thead>
<tr>
<th>Screen Capture</th>
<th>What to Do</th>
</tr>
</thead>
</table>
| ![Education Topic select window](image) | Use this search window in one of two ways:  
(1) Use the **Search String** field by typing the education topic and then clicking **Search**. The retrieved education topics will populate the **Education Topic** list box. Select a retrieved record and click **OK** to populate the **Education Topic** field. (Otherwise, click **Close**.)  
(2) Select an education topic in the **Most Recently Selected** list box and click **OK** to populate the **Education Topic** field. (Otherwise, click **Close**.) |

4. At the **Provider** field, select the provider for the group education. Click the list to access the **Education Provider** search window. Here you search for a provider name.
Use this search window in one of two ways:
(1) Use the Search String field by typing the provider’s last name and then clicking Search. The retrieved names will populate the Education Provider list box. Select a retrieved record and click OK to populate the Provider field. (Otherwise, click Close.)
(2) Select a name in the Most Recently Selected list box and click OK to populate the Provider field. (Otherwise, click Close.)

Figure 5-45: Education Provider select window

5. At the Time field, type the time spent on the education topic, using any integer (1–9999). The understood units of measure are minutes.

6. At the Level of Understanding field, select the level of understanding about the education topic. The default is Group-No Assessment (the only choice).

7. At the Comment field, type any comments about the education topic for the group encounter.

   Click Cancel to clear the fields on the Group Education tab.

   Click OK when all fields are complete. This adds a record to the Education grid.

Delete Group Education Record

1. Select a group education record to delete.

2. Click Delete.

3. At the Are You Sure confirmation message, click Yes to remove the selected Education record from the group box. (Otherwise, click No.)
Note: The Group Education can be removed only prior to saving the group. Once the group has been saved, there is currently no means to remove it in the group format.

5.3.5 Patients Tab

The Patients tab shows the patients in the group encounter.

The information on this tab is read only when using the Edit Group Data window.

You can add or delete patient records on this tab (on the Add window).

Add Patient Record
The Add button requires that the POV group box and the Standard Note Group Note (on the Group Data tab) are populated.

1. Click Add to access the Select Multiple Patients window.
Figure 5-47: Select Multiple Patients dialog

Use this dialog add one or more patients to the Patients tab.

2. At the Patient Lookup field, type the patient name, HRN, DOB, or SSN.

3. Click Display.

4. The retrieved patients display in the Patient List box.

5. Select one or more patient names from the Patient List group box and click the right arrow button to add them to the Selected Items list box.

6. If needed, select a patient name from the Selected Items list box and click the left arrow button to move the patient name to the Patient List box.

7. When the Selected Item list box is complete, do one of the following:
   - Click OK to have the patient names to populate the Patients group box (on the Patients tab). This closes the Select Multiple Patients dialog.
   - Click Clear to have all of the patient names removed from the Selected Items group box and the focus stays on the Select Multiple Patients window.
   - Click Close to close Select Multiple Patients window and no patient names are added to the Patients group box.

Delete Patient Record

1. Select a patient record to delete.

2. Click Delete.

3. At the “Are You Sure” confirmation message, click Yes to remove the selected patient record from the Patient group box. (Otherwise, click No.)
5.3.6 Patient Data Tab

Use the Patient Data tab to add POV, group note, and comment/next appointment information for a particular patient in the group encounter.

![Figure 5-48: Patient Data tab](image)

The following table provides information about the features on this window.

**Table 5-4: Patient Data features and functionality**

<table>
<thead>
<tr>
<th>Features</th>
<th>Functionality</th>
</tr>
</thead>
<tbody>
<tr>
<td>Patients list field</td>
<td>Select a patient by double-clicking the name in the Patients list box to activate the other group boxes.</td>
</tr>
<tr>
<td>OK button</td>
<td>Click OK after selecting a patient record and changing or adding new patient data to save the patient data.</td>
</tr>
<tr>
<td>Cancel button</td>
<td>Click Cancel to not save the changes and to dismiss the Patient Data tab.</td>
</tr>
</tbody>
</table>

Patients List Box

The Patients list box shows the patients in the group encounter.
Double-click one of the patient names in order to use the other group boxes and fields.

After completing the information for the first patient, click OK. The focus returns to the Patients list box. Then double-click the next patient. After completing the information for the second patient, click OK. Repeat this process until all of the patients are complete. Then click Save to save all of the information.

If you are in ADD mode and you have clicked OK and then try to go to the Group Data tab, the application displays the Continue warning.

- Click Yes to overwrite any added individual data. This focus will go to the Group Data tab.
- Click No to not overwrite any added individual data. The focus will go to the Patients Data tab.

**Purpose of Visit - POV (Diagnosis or Problem Code) Group Box**

Use the Purpose of Visit - POV (Diagnosis or Problem Code) group box to add, edit, or delete a POV for the selected patient. (Be sure to double-click a patient name before adding/changing the data in this group box.)
2. Click **Delete**.

3. At the **Are You Sure** confirmation message, click **Yes** to remove the selected POV record from the **POV** group box. (Otherwise, click **No**.)

**Add Button**

1. Click **Add**.

2. The **POV** multiple search/select window displays.

![Figure 5-52: POV multiple select/search window](image)

Use the **POV** multiple search/select window in the following manner:

a. At the **Search String** field, type a few characters of the search criteria.

b. Click **Search** and the retrieved records display in **POV** list box (the **POV** and its narrative).

c. To add one or more selected records from the **POV** list box to the **Selected Items** list box, click the right arrow button.

d. Similarly, you can remove one or more selected records from the **Selected Items** list box by clicking the left arrow button.
e. Another way to add records to the **Selected Items** list box is to select one or more records in the **Most Recently Selected** list box and click the right arrow button.

f. When the records in the **Selected Items** list box is complete, click **OK** and the records populate the **Purpose of Visit (POV)** group box. (Otherwise, click **Close**.)

**Edit Button**

1. Select a POV record to edit.

2. Click **Edit** to display the **Edit POV** dialog.

![Figure 5-53: Edit POV dialog](image)

3. At the **Narrative** field, change the text of the narrative, using 2–80 characters.

   **Note:** The special characters single and double quotation marks and asterisk (', “, *,) cannot be the first character of the POV narrative. The Narrative field is a Free Text field.

4. Click **OK** to change the narrative of the selected code on the **POV** group box on the **Patient Data** tab.

5. Otherwise, click **Close** to not change the narrative.

**Standard Group Note Field**

Populate this Free Text field with the text of the Standard Group Note. This information, for example, could be about how the patient reacted in the group (on the **Patient Data** tab).

This is where users can individualize the note for the patient in focus. The standard group note should never reference the individual patient but should have information about the individual patient’s participation in the group.

- This field is available for text entry by the primary provider of the record (only).
- This field is not available for text entry if the note for the group record is signed.
Comment/Next Appointment Field
Populate this Free Text field with the text of any comments about the next appointment for the selected patient. This field is available for text entry by the primary provider of the record (only).

CPT Codes Group Box
Use this group box to manage the CPT codes for the selected patient in the group.

![CPT Code(s) group box](image)

Figure 5-54: CPT Code(s) group box

You can add or delete CPT code records.

Delete Button
1. Select a CPT Code record to delete
2. Click Delete.
3. At the Are You Sure? confirmation, click Yes to remove the selected record from the CPT Codes group box. (Otherwise, click No).

Add Button
1. Click Add.
2. The CPT Code search/select window displays.
3. At the **Search String** field, type a search string to search for a particular CPT code. The CPT codes will display in the **CPT Code** field.

4. At the **Quantity** field, type the number of the CPT code to use to help facilitate billing.

5. At the **Modifier** field, select the modifier for the CPT code. Click the list to access the **CPT Modifier** search window.
Screen Capture

<table>
<thead>
<tr>
<th>What to Do</th>
</tr>
</thead>
<tbody>
<tr>
<td>Use this search window in one of two ways:</td>
</tr>
<tr>
<td>(1) Use the <strong>Search String</strong> field by typing the CPT Modifier name and then clicking <strong>Search</strong>. The retrieved CPT Modifier names and their descriptions will populate the <strong>CPT Modifier</strong> list box. Select a CPT modifier and click <strong>OK</strong> to save the modifier. (Otherwise, click <strong>Close</strong>.)</td>
</tr>
<tr>
<td>(2) Select a CPT modifier in the <strong>Most Recently Selected</strong> list box and click <strong>OK</strong> to save the modifier. (Otherwise, click <strong>Close</strong>.)</td>
</tr>
</tbody>
</table>

![CPT Modifier search window](image)

Figure 5-57: **CPT Modifier** search window

6. Remove a selected CPT code in the **Selected Items** list box by clicking the left arrow button.

7. After the **Quantity** and **Modifier** fields are complete, click the right arrow button to add the items to the **Selected Items** list box.

8. When the **Selected Items** list box is complete, click **OK** to save the data and to add the data to the CPT Code(s) group box. (Otherwise, click **Close**.)

**Time in Group**

![Time in Group field](image)

Figure 5-58: **Time in Group** field

1. At the **Time in Group** field, type the number of minutes in the group encounter (up to six digits).

2. This is required data for the group encounter record.
Consider the following:

- If the patient attended the whole group session, no changes need to be made to the **Time in Group** field.

- If the patient was late or left early, the **Time in Group** field needs to be changed to reflect the actual time in minutes that the patient was in the group.

- If the patient didn’t attend at all, type a zero in the **Time In Group** field and click **OK**. The application will display the **No Show** message that states: Changing Time in Group to zero removed this patient’s POV and Note entry. You will now be prompted for a No Show POV. Click **OK**. After clicking **OK**, access the **POV** search/select window. Here you can select one or more no-show POVs. Click **OK** (otherwise, click **Cancel**). After clicking **OK**, the selected POVs will display in the **Purpose of Visits – POV** group box on the **Patient Data** tab (all existing POVs will be replaced by your selections).

**Visit Flag**

![Visit Flag field](image)

Figure 5-59: Visit Flag field

Use the **Visit Flag** field to specify the visit flag for the group encounter.

1. At the **Visit Flag** field, type any number between 0 and 999 (no decimal digits).

2. This field is for local use in flagging various types of visits. The site will define a numeric value to indicate the definition of the flag. For example, a 1 might mean any visit on which a narcotic was prescribed. Users can later retrieve all visits with a flag of 1, which will list all visits on which narcotics were prescribed.
6.0 Case Management

This section provides information about case management in the roll-and-scroll application, as well as in the RPMS Behavioral Health System (GUI).

6.1 Managing Case Data (Roll and Scroll)

Manage case data on the Patient Data Entry window by selecting the Update Case Data (CD) action. The application displays the Update BH Patient Case Data screen.

Figure 6-1: Sample Update BH Patient Case Data screen.

Use the Quit (Q) option to exit the Update BH Patient Case Data screen.

6.1.1 Open New Case (OP)

Use the Open New Case (OP) option to create a new case. If you use the Open New Case (OP) option, the application displays that it is opening a case for the current patient.

Below are the prompts.

1. At the “Select Item” prompt, type OP.

2. At the “Enter Case Open Date” prompt, type the date to open the case. This is the first contact for an episode of care. The Update Patient Case Data window displays.
CASE OPEN DATE: MAY 23, 2009
PROGRAM AFFILIATION: MENTAL HEALTH
PROVIDER NAME: 
PRIMARY PROBLEM: 
CASE ADMITT DATE: 
NEXT CASE REVIEW DATE: 
DATE CASE CLOSED: 
DISPOSITION: 

COMMENT:

______________________________

COMMAND: Press <PF1>H for help Insert

Figure 6-2: Sample Update Patient Case Data window

The underlined fields are required.

3. At the “Case Open Date” prompt, type the date the case was opened (can be edited).

4. At the “Program Affiliation” prompt, type the program affiliation, using one of the following:
   - M Mental Health Defaults
   - S Social Services Defaults
   - C Chemical Dependency or Alcohol/Substance Abuse
   - O Other

5. At the “Provider Name” prompt, type the name of the provider for the case.

6. At the Primary Problem” prompt, type the primary problem (name or code).

7. At the “Case Admit Date” prompt, type the admit date for the case. This is when a case management plan was developed and treatment began.

8. At the Next Case Review Date” prompt, type the next date for the case review.

9. At the “Date Case Closed” prompt, type the date the case was closed. This is when treatment has been discontinued (used when closing a case).

10. At the “Disposition” prompt, type the disposition for the case. This is the reason for closing a case. This is a required field when there is a date in the Date Case Closed field.

11. At the “Comment” prompt, type the text of a comment about the case, using 1–240 characters.
6.1.2 Edit Case Data (ED)

Use the Edit Case Data (ED) option to change a selected case. Use this option to edit an open case where you enter the admitted date when a case is admitted or to close the case when it is closed on the Update Patient Data window.

1. At the “Select Item(s)” prompt, type ED.
2. At the “Select BH Patient Case Data” prompt, type the number of the case data to edit.
3. The UPDATE PATIENT CASE DATA window displays.

   The fields on this window are the same as those when you use the Open New Case option. Section 6.1.1 provides more information.

6.1.3 Delete Case (DC)

Use the Delete Case (DC) option to remove a specified case from the Update BH Patient Case Data window.

1. At the “Select Item(s)” prompt, type DC.
2. At the “Select BH Patient Case Data” prompt, type the number of the case data to delete.
3. At the “Are you sure you want to delete this CASE?” prompt, type Y (yes) or N (no.)

6.1.4 Designated Provider/Flag/Personal History (Roll and Scroll)

Use the OI (Desg Prov/Flag/Pers Hx) option on the Patient Data Entry window to update patient information.

1. At the “Select Action” prompt, type OI.

   The Update Patient Information window displays.

   ******* UPDATE PATIENT INFORMATION *******
   Patient Name: DEMO,DARRELL LEE
   [press <F1>E when finished updating record]
The data on this window applies to the current patient.

2. At the “Designated Mental Health Provider” prompt, type the RPMS provider name who has accepted designated Mental Health provider status for the patient.

3. At the “Designated Social Services Provider” prompt, type the PRMS provider name who has accepted designated Social Services provider status for the patient.

4. At the “Designated CD A/SA Provider” prompt, type the RPMS provider name who has accepted designated chemical dependency or alcohol/substance abuse provider status for the patient.

5. At the “Designated Other Provider” prompt, type the RPMS provider name who has accepted the designated other provider status for the patient.

6. At the “Other Provider Non-RPMS” prompt, type another behavioral health provider name not listed in RPMS (this could be a local doctor, school teacher, etc.), using 2–40 characters. This is a Free Text field.

7. At the “Patient Flag Field” prompt, type a locally-defined number field used to identify a specific group of patients (between 0 and 999). For example, 1 could designate patients with a family history of substance abuse, 2 could be used to identify patients enrolled in a special social services program, 3 could be used to identify patients enrolled in a special drug trial. In a program consisting of social services and mental health components, agreement must be reached on use of the flags or users might discover that the same flag has been used for multiple purposes.

8. At the “Patient Flag Narrative” prompt, type the narrative about the patient flag, using 2–60 characters.

After saving or exiting the **Update Patient Information** window, the application displays the **Personal History** window.

If the patient has an existing Personal History entry, the application displays this information (the date and the personal history factor). Add another personal history factor, if needed.
Facilities often find personal history factors to be useful in developing reports for tracking diagnoses associated with personal history.

***** PERSONAL HISTORY FOR DEMO, DOROTHY ROSE *****
TWIN
DIABETES
Enter PERSONAL HISTORY:

Figure 6-4: Sample **Personal History** window

Below are the prompts.

9. At the “Enter personal history” prompt, type the personal history factor for the current patient. If you do not want to add another personal history, type a caret (^) at the prompt.

10. After completing the personal history entry, the focus returns to the **Patient Data Entry** window.

The personal history data entered here appears on the Patient List for Personal Hx Items report.

6.2 **Case Management Window (GUI)**

The figure below shows where the Case Management function is located on RPMS Behavioral Health System (GUI) tree structure.

![Case Management Window](image)

Figure 6-5: Case Management option on the RPMS Behavioral Health System (GUI) tree structure

Use the Case Management option to access the **Case Management** window for the current patient.
Use the **Case Management** window to manage the case management records within a particular date range for the current patient (the name displays in the lower, left corner of the window).

Table 6-1 provides information about the features of the **Case Management** window.

<table>
<thead>
<tr>

6.3.1 Case Status Group Box

![Figure 6-8: Fields in Case Status group box](image)

The fields in bold text are required.

1. At the **Program** field, select the program associated with the new case. Use one of the following from the list:
   - Mental Health
   - Social Services
   - Other
   - Chemical Dependency

2. At the **Case Admit Date** field, select the case admin date. This is when a case management plan was developed and treatment began. Accept the default date by checking the check box in front of the date. The default is the current date. Click the list to access a calendar to change the field.

3. At the **Case Open Date** field, select the case open date. This is the first contact for an episode of care. The default is the current date. Click the list to access a calendar to change the field.

4. At the **Next Review Date** field, select the new review date. The default is the current date. Click the list to access a calendar to change the field. Accept the default date by checking the check box in front of the date.

5. At the **Provider Name** field, select the primary provider for the case (the default is the current logged-in user). Click the list to access the **Primary Provider** search/select window.
Use this search window in one of two ways:

1. Use the **Search String** field by typing the provider’s last name and then clicking **Search**. The retrieved names will populate the **Primary Provider** list box. Select a name and click **OK** to populate the **Provider Name** field. (Otherwise, click **Close**.)

2. Select a name in the **Most Recently Selected** list box and click **OK** to populate the **Provider Name** field. (Otherwise, click **Close**.)

---

**Figure 6-9: Primary Provider search/select window**

6. At the **Date Case Closed** field, select the date the case was closed. This is when treatment has been discontinued. The default is the current date. Click the list to access a calendar to change the field. Accept the default date by checking the check box in front of the date.

7. At the **Primary Problem** field, select the primary problem for the case. Click the list to access the **POV** search window.
### Screen Capture

#### What to Do

Use this search window in one of two ways:

1. Use the **Search String** field by typing the POV for the primary problem for the case and then **Search**. The retrieved POVs will populate the **POV** list box. Select a retrieved record and click **OK** to populate the **Primary Problem** field. (Otherwise, click Close.)

2. Select a record in the **Most Recently Selected** list box and click **OK** to populate the **Primary Problem** field. (Otherwise, click **Close**.)

![Primary Problem/POV search window](image)

**Figure 6-10**: Primary Problem/POV search window

8. At the **Disposition** field, select the reason for closing a case. Click the list to select an option on the **Disposition** select window. This is required when there is a date in the **Date Case Closed** field.
What to Do

Use this search window as follow:

1. Select a Disposition option and click **OK** (otherwise, click **Cancel**).
2. After clicking **OK**, the selected option populates the **Disposition** field.

![Disposition select window](image)

Figure 6-11: **Disposition** select window

9. At the **Comment** prompt, type a comment about the case, using 1–240 characters in this Free Text field.

### 6.3.2 Patient Information Group Box

Use the **Patient Information** group box to supply information about various providers and other case management information.

![Patient Information group box](image)

Figure 6-12: Fields in the **Patient Information** group box
**Note:** These fields should be cleared out whenever the case is closed; otherwise, the patient will continue to show up on the provider’s case list. To clear the field, right-click and select **Clear**.

All fields are optional.

1. At the **Designated Mental Health Provider** field, select the RPMS provider name who has accepted designated mental health provider status for the patient. Click the list to access the **Designated Mental Health Provider** search window.

<table>
<thead>
<tr>
<th>Screen Capture</th>
<th>What to Do</th>
</tr>
</thead>
</table>
| ![Designated Mental Health Provider search window](image) | Use this search window in one of two ways:
(1) Use the **Search String** field by typing the provider’s last name and then clicking **Search**. The retrieved providers will populate the **Designated Mental Health Provider** list box. Select a retrieved record and click **OK** to populate the **Designated Mental Health Provider** field. (Otherwise, click **Close**.)
(2) Select a name in the **Most Recently Selected** list box and click **OK** to populate the **Designated Mental Health Provider** field. (Otherwise, click **Close**.) |

![Designated Mental Health Provider search window](image)

2. At the **Other Provider Non-RPMS** field, type another Behavioral Health provider name not listed in RPMS, using between 2–40 characters (Free Text field).

3. At the **Designated Social Work Provider** field, select the RPMS provider who has accepted designated social work provider status for the patient. Click the list to access the **Designated Social Work Provider** search window.
What to Do

Use this search window in one of two ways:
(1) Use the Search String field by typing the provider’s last name and then clicking Search. The retrieved providers will populate the Designated Social Work Provider list box. Select a retrieved record and click OK to populate the Designated Social Work Provider field. (Otherwise, click Close.)
(2) Select a name in the Most Recently Selected list box and click OK to populate the Designated Social Work Provider field. (Otherwise, click Close.)

4. At the Other Provider Non-RPMS prompt, type another provider name not listed in RPMS, using 2–40 characters (Free Text field).

5. At the Designated Chemical Dependency Provider field, select the RPMS provider name who has accepted designated chemical dependency provider status for the patient. Click the list to access the Designated Chemical Dependency Provider search window.
Use this search window in one of two ways:

1. Use the Search String field by typing the provider’s last name and then clicking Search. The retrieved providers will populate the Designated Chemical Dependency Provider list box. Select a retrieved record and click OK to populate the Designated Chemical Dependency Provider field. (Otherwise, click Close.)

2. Select a name in the Most Recently Selected list box and click OK to populate the Designated Chemical Dependency Provider field. (Otherwise, click Close.)

Figure 6-15: Designated Chemical Dependency Provider search window

6. At the Patient Flag field, type a locally defined number field used to identify a specific group of patients (Free Text field), using 0–999. For example, 1 could designate patients with a family history of substance abuse, 2 could be used to identify patients enrolled in a special social services program, 3 could be used to identify patients enrolled in a special drug trial. In a program consisting of social services and mental health components, agreement must be reached on use of the flags, or users might discover that the same flag has been used for multiple purposes.

7. At the Designated Provider Other RPMS field, select the RPMS provider who has accepted the Designated Other RPMS Provider status for the patient. Click the list to access the Designated Other RPMS Provider search window.
8. At the Patient Flag Narrative field, type the narrative about the patient flag, using 2–60 characters.

9. At the Designated Primary Care Provider prompt, the application displays the name of the designated primary care provider for the patient (if any). This information is pulled from the Primary Care Provider application and is view only.

6.3.3 Personal History Group Box

Use the Personal History group box to add or delete personal history data about the current patient.
Figure 6-17: Sample Personal History group box

Users need to document personal history only once, because it becomes a permanent part of the patient’s medical record. Facilities often find personal history factors to be useful in developing reports for tracking diagnosis associated with personal history.

**Add Button**

1. Click **Add**.

2. The **Personal History Factors** multiple select window displays, where users can add one or more personal history factors.

Figure 6-18: Personal History Factors multiple select window

Use this multiple select window as follows:

a. To add one or more selected records from the **Personal History Factors** list box to the **Selected Items Factor** list box, click the right arrow button.

b. Similarly, you can remove one or more selected records from the **Selected Items Factor** list box by clicking the left arrow button.
c. When the **Selected Items Factor** list box is complete, click **OK** and the records populate the **Personal History** group box. (Otherwise, click **Close**.)

**Delete Button**

1. Select the personal history record to delete.

2. Click **Delete**.

At the **Are You Sure?** confirmation message, type **Y** (yes) or **N** (no).
7.0 Administrative/Community Activity

The Administrative/Community Activity option gives assistance to community organizations, planning groups, and citizens’ efforts to develop solutions for community problems.

7.1 Add Administrative/Community Activity Record (Roll and Scroll)

Below is the Update BH Forms window.

Use the AC option to add administrative/community activity record.

1. At the “Select Action” prompt, type AC.

2. At the “Enter Primary Provider” prompt, type the primary provider for the visit. The default is the current logged-in user.

The application displays the Behavioral Health Record Update window, with the following fields automatically populated: Program, Location of Encounter, Arrival Time, Secondary Providers, Community of Service, # Served, Type of Contact. These fields are auto-populated based on the defaults set up on the site parameters menu. If you do not have defaults set up on the site parameters menu some of these fields might be blank.
Chief Complaint/Presenting Problem:

SOAP/Progress Note <press enter>: Comment/Next Appointment <press enter>:
PURPOSE OF VISIT (POVS) <enter>: Any CPT Codes to enter? Y

Activity: Activity Time: # Served: 1 Interpreter?

Any Patient Education Done? N Any Screenings to Record? N
Any Measurements? N Any Health Factors to enter? N
Display Current Medications? N MEDICATIONS PRESCRIBED <enter>:
Placement Disposition:
Visit Flag: Local Service Site:

COMMAND: Press <PF1>H for help Insert

Figure 7-2: Sample Behavioral Health Record Update

The underlined fields are required.

3. At the “Program” prompt, type the program associated with the record.

4. At the “Clinic” prompt, type the clinic to be used. The response must be a clinic that is included in the RPMS clinic code set.

5. At the “Location of Encounter” prompt, type the location of the encounter.

6. At the “Arrival Time” prompt, type the arrival time of the encounter (default is 12:00).

7. At the “Display/Edit Visit Information” prompt, type Y (yes) or N (no).

If Y, the Visit Information pop-up displays.

***** Visit Information *****

Program: MENTAL HEALTH Location of Encounter: DEMO INDIAN HOSPITAL
Clinic: MENTAL HEALTH Appointment/Walk In: APPOINTMENT
Type of Contact: OUTPATIENT
Community of Service: SELLS

a. At the “Program” prompt, type the program

8. At the “Any Secondary Providers?” prompt, type Y (yes) or N (no) to indicate if there were any additional BHS providers who were also providing care during this particular encounter. Type Y to display the Enter/Edit Providers of Service pop-up.

******* ENTER/EDIT PROVIDERS OF SERVICE *******
Figure 7-3: Sample Enter/Edit Providers of Service pop-up

The underlined fields are required.

a. At the “Provider” prompt, type the provider name.

b. At the “PRIMARY/SECONDARY” prompt, type P for primary or S for secondary.
   
   You can add one or more secondary providers.

The prompts for the Behavioral Health Record Update window continue.

9. At the “Community of Service” prompt, type the community of service where the encounter took place.

10. At the “Activity Code” prompt, type the activity code associated with the encounter. Section Appendix A: provides more information about Activity Codes and Definition.

11. At the “# Served” prompt, type the number of people served in the community activity, using any integer between 0 and 999.

12. At the “Activity Time” prompt, type the number of minutes spent on the activity, using any integer between 1 and 9999. Please note, 0 (zero) is not allowed as a valid entry.

13. At the “Type of Contact” prompt, type the contact type (the activity setting).

14. At the Local Service Site” prompt, type the local service site for the encounter.

15. At the Any Prevention Activities to Record?” prompt, type Y (yes) or N (no).

   If Y was used, the Prevention Activities pop-up displays:
Please enter all Prevention Activities

**PREVENTION ACTIVITY:**
**PREVENTION ACTIVITY:**
**PREVENTION ACTIVITY:**

**TARGET:**

Figure 7-4: Pop-up for prevention activities

The **Target** field will be disabled until a Prevention Activity is entered. In addition, the **Target** field will be disabled if all of the prevention activities are deleted.

The underlined fields are required.

a. At the “**PREVENTION ACTIVITY**” prompt, type the code for the prevention activity. These activities are recorded when recording non-patient activities. You can enter more than one, if needed.

b. At the “**TARGET**” prompt, type the code of the population the prevention activity is designed for: A (Adult), Y (Youth), F (Family), M (Mixed Adult & Youth), S (Staff), E (Elderly Only), W (Women), or M (Men).

The prompts for the Behavioral Health Record Update window continue.

16. At the “Purpose of Visits (POVS) <press enter>” prompt, press Enter to access the BH Record Entry–Purpose of Visit Update window.

```
******** BH RECORD ENTRY - PURPOSE OF VISIT UPDATE ********

_________________________________________________________

COMMAND: Insert
Press <PF1>H for help
```

Figure 7-5: Sample BH Record Entry POV window

The underlined fields are required.

a. At the “Problem Code” prompt, type the problem code that can be either the Behavioral Health Purpose of Visit or the more specific DSM diagnostic code.
b. At the Narrative” prompt type the text of the narrative for the problem code, if needed.

The prompts for the Behavioral Health Record Update window continue.

17. At the “COMMENT (press enter)” prompt, press Enter to access another window where you can enter the text of comments about the Administrative/Community Activity.

7.2 Administrative/Community Activity Window (GUI)

Below shows where the Administrative/Community Activities function is located on RPMS Behavioral Health System (GUI) tree structure.

![Administrative/Community Activities option on the RPMS Behavioral Health System (GUI) tree structure](image)

Figure 7-6: Administrative/Community Activities option on the RPMS Behavioral Health System (GUI) tree structure

After selecting the Administrative/Community Activities option from the RPMS Behavioral Health System (GUI) tree structure, the Administrative/Community Activity window displays.

![Sample Administrative/Community Activity window](image)

Figure 7-7: Sample Administrative/Community Activity window

The Administrative/Community Activity window shows the administrative / community activities records.

The following table provides information about the features on this window.
Table 7-1: Administrative/Community Activity window features and functions

<table>
<thead>
<tr>
<th>Features</th>
<th>Functionality</th>
</tr>
</thead>
<tbody>
<tr>
<td>Administrative/Community Activity date range</td>
<td>This group box shows the date range for the records in the Administrative/Community Activity group box. You can change any date in the date range by clicking the list and selecting a new date from the calendar. Select one of the following options: Full, Suppressed, Both Full and Suppressed. Suppressed means the chief complaint/presenting problem information is suppressed for confidentiality. The application displays the Print Encounter pop-up window.</td>
</tr>
</tbody>
</table>
7.3 Add/Edit Administrative/Community Activity (GUI)

Click Add (on the Administrative/Community Activity window) to add new administrative/community activity data. This function displays the Administrative/Community Activity Data Entry–Add Administrative/Community Data window.

![Administrative/Community Activity Data Entry](image)

Figure 7-8: Sample Community Activity Data Entry list view

Highlight a record (on the Administrative/Community Activity window) and click Edit to change the administrative/community activity data. This function displays the Administrative/Community Activity Data Entry–Edit Administrative/Community Data window. This window has the same fields as the Administrative/Community Activity Data Entry–Add Administrative/Community Data.
Click **Help** to access the online help for this window.

After completing the fields on this window, click **Save** (otherwise, click **Close**). Clicking **Save** adds a record to the **Administrative/Community Activity** window.

### 7.3.1 Administrative/Community Entry Group Box

Below is the **Administrative/Community Entry** group box.

The fields in bold text are required.

1. At the **Primary Provider** field, select the primary provider name for the administrative/community activity. Click the list to access the **Primary Provider** search/select window and search for the primary provider name.
Use this search window in one of two ways:

1. Use the Search String field by typing the provider’s last name and then clicking Search. The retrieved names will populate the Primary Provider list box. Select a name and click OK to populate the Primary Provider field. (Otherwise, click Close.)

2. Select a name in the Most Recently Selected list box and click OK to populate the Primary Provider field. (Otherwise, click Close.)

Figure 7-11: Primary Provider search window

2. At the Encounter Date/Time field, type the date/time. The default is the current date and time. Change the date by clicking the list to access the calendar. Users can change the time manually and select the hour, minutes, and AM/PM. If you enter the hour and minutes as 13:25, for example, the application automatically changes the time to 1:25 PM.

3. At the Program field, type the program name. This is the program associated with the administrative/community activity. Use one of the following:

- Mental Health
- Social Services
- Other
- Chemical Dependency
After completing this field for a new record, the application automatically populates the remaining required fields if defaults were set up in the Site Parameters.

4. At the **Encounter Location** field, select the location where the administrative/community activity took place. Click the list to access the **Location** search window and search for a location name.

![Location search window](image)

**Figure 7-12: Location search window**

5. At the **Type of Contact** field, select the type of contact (the activity setting) for the administrative/community activity. Click the list to access the **Type of Contact** select window.
6. At the **Community of Service** prompt, select the community of service where the encounter took place. Click the list to access the **Community** search window and search for a community name.
Use this search window in one of two ways:

1. Use the Search String field by typing the community name and then clicking Search. The retrieved names will populate the Community list box. Select a retrieved record and click OK to populate the Community of Service field. (Otherwise, click Close.)

2. Select a name in the Most Recently Selected list box and click OK to populate the Community of Service field. (Otherwise, click Close.)

Figure 7-14: Community search/select window

7. At the Clinic field, select the clinic associated with the administrative/community activity. Click the list to access the Clinic search/select window and search for the clinic by name or code.
Use this search window in one of two ways:

1. Use the **Search String** field by typing the clinic name or code and then clicking **Search**. The retrieved records will populate the Clinic list box. Select a retrieved record and click **OK** to populate the Clinic field. (Otherwise, click **Close**.)

2. Select a name in the **Most Recently Selected** list box and click **OK** to populate the Clinic field. (Otherwise, click **Close**.)

---

8. At the **Activity Code** field, select the activity code associated with the administrative/community activity. Click the list to access the **Activity** search/select window and search for the activity name. Appendix A: provides more information about the Activity Codes and Definitions.

</table>

![Figure 7-16; Sample Activity search/select window](image)

9. At the **Activity Time** field, type the number of minutes spent on the activity, using any integer between 1 and 9999.

10. At the **# Served** field, type the number of people served in the administrative/community activity, using any integer between 0 and 999.

11. At the **Flag Field** field, type any local flag (0 to 999) used in flagging various types of visits. The site will define a numeric value to indicate the definition of the flag. For example, a 1 might mean any visit on which a narcotic was prescribed. You can then, later on, retrieve all visits with a flag of 1 which will list all visits on which narcotics were prescribed.

12. At the **Local Service Site** field, select the local service site associated with the administrative/community activity, if any. Click the list to access the **Local Service Site** select window.

### What to Do

Use this window as follows:
1. Select a local service site from the list.
2. Click **OK** to populate the Local Service Site field. (Otherwise, click **Close**.)

---

**7.3.2 Activity Data Tab**

Use the **Activity Data** tab to specify the **Purpose of Visit - POV**, **Prevention Activities**, and **Secondary Providers** data.
Figure 7-18: **Activity Data** tab

**Purpose of Visit–POV Group Box**

The **Purpose of Visit - POV** group box lists the POVs associated with the administrative/community activity.

Figure 7-19: **POV** group box

At least one POV is required for an administration/community activity record. You can add, change, or delete a record.

**Add Button**

1. Click **Add**.
2. The **POV** search/select window displays. Here you select one or more POVs.
Use this search/select window as follows:

3. At the **Search String** field, type a few characters of the search criteria.

4. Click **Search** and the retrieved the records display in **POV** list box (the POV and its narrative).

5. To add one or more selected records from the **POV** list box to the **Selected Items** list box, click the right arrow button.

6. Similarly, you can remove one or more selected records from the **Selected Items** list box by clicking the left arrow button.

7. When the **Selected Item** list box is complete, click **OK** and the records populate the **POV** group box. (Otherwise, click **Close**.)

**Edit Button**

1. Select the POV record to change.

2. Click **Edit**.

   The application displays the **Edit POV** window.
a. At the Narrative field, type new POV narrative in the Narrative text box using 2–80 characters.

**Note:** The special characters double or single quotation marks (" or ‘) cannot be the first character of the POV narrative. This is a Free Text field.

b. Click **OK** to change the narrative of the selected record. (Otherwise, click **Close**.)

**Delete Button**

1. Select a record to delete.

2. Click **Delete**.

3. The **Are You Sure?** confirmation message displays; click **Yes** to remove the selected group encounter record from the **POV** group box. (Otherwise, click **No**.)

**Prevention Activities Group Box**

The **Prevention Activities** group box lists the prevention activities associated with the administrative/community activity.

![Prevention Activities Group Box](image)

The **Target** field will be disabled until a **Prevention Activity** is entered. In addition, the **Target** field will be disabled if all of the prevention activities are deleted.

You can add/delete a prevention activity and/or specify the target group.

1. At the **Target** field, select the population for which the prevention activity is designed. The selected option applies to all of the prevention activities.
- Adult
- Youth
- Family
- Mixed (Adult & Youth)
- Staff
- Elderly Only
- Women
- Men

Add Button

1. Click Add.

2. The **Prevention Activity** multiple select window displays. Select one or more prevention activities.

![Prevention Activity multiple select window](image)

Figure 7-23: **Prevention Activity** multiple select window

Use this multiple select window as follows:

a. To add one or more selected records from the **Prevention Activity** list box to the **Selected Items Prevention Activity** list box, click the right arrow button.
b. Similarly, remove one or more selected records from the **Selected Items Prevention Activity** list box by clicking the left arrow button.

c. When the **Selected Items Prevent Activity** list box is complete, click **OK** and the records populate the **Prevention Activity** group box. (Otherwise, click **Close**.)

d. If you select OTHER (Code 20) on the **Prevention Activity** search/select window, the application displays the **Other** window.

![Figure 7-24: Other window](image)

  e. At the **Other** field, type the text of the other prevention activity associated with this record (limited to 80 characters).
  f. Click **OK** and the text populates the Other cell on the grid.

  If you dismiss the **Other** window (with no data), the Other cell on the grid will be blank.

### Delete Button

1. Select the prevention activity record to delete.

2. Click **Delete**.

At the **Are You Sure?** confirmation message displays, click **Yes** to remove the selected prevention activity record from the group box. (Otherwise, click **No**.)

### Secondary Providers Group Box

The **Secondary Providers** group box lists the secondary providers associated with the administrative/community activity.

![Figure 7-25: Secondary Providers group box](image)

You can add or delete a record.

### Add Process

1. Click **Add** to access the **Secondary Providers** search/select window. Select one or more secondary provider names.
Use the **Secondary Providers** multiple search/select window in the following manner:

a. At the **Search String** field, type a few characters of the search criteria.

b. Click **Search** and the retrieved the records display in **Secondary Provider** list box.

c. To add one or more selected records from the **Secondary Provider** list box to the **Selected Items Secondary Provider** list box, click the right arrow button.

d. Another way to add records to the **Selected Items Secondary Provider** list box is to select one or more records in the **Most Recently Selected** list box and click the right arrow button.

e. Similarly, you can remove one or more selected records from the **Selected Items Secondary Provider** list box by clicking the left arrow button.

f. When the **Selected Items Secondary Provider** list box is complete, click **OK** and the records populate the **Secondary Providers** group box. (Otherwise, click **Close**.)

**Delete Process**

1. Select the secondary provider record to remove.
2. Click **Delete**.

3. At the **Are You Sure?** confirmation message displays, click **Yes** to remove the selected secondary provider record from the group box. (Otherwise, click **No**.)

### 7.3.3 Notes Tab

Use the **Notes** field to enter any notes about the administrative/community activity.

![Notes field](image)

Figure 7-27: **Notes** field

This is a Free Text box.
8.0 Encounter and Treatment Plan Sharing (Roll and Scroll)

After the entry of a Visit or a Treatment plan, you have the option to share it with a colleague through MailMan. In order to do this, you must be properly set up through Site Parameters as a provider who can share information.

Make sure that the provider being sent the plan is authorized to use this function.

After the entry of a Visit or Treatment plan, you will be asked the question shown in Figure 1 1).

Do you want to share this visit information with other providers? N//

By answering the question with a Yes, you will be stepped through the process of sending the information via a MailMan message, as shown in Figure 1 2:

Send to: NUUUU,BILL          WBM
Send to:
Message will be sent to:    THETA,BILL

Do you want to attach a note to this mail message? N// YES
Enter the text of your note.

NOTE APPENDED TO MAIL MSG:
  No existing text
  Edit? NO//Y
  - Here the provider can append a note to his/her colleague.

Ready to send mail message?? Y// ES
Send Full or Suppressed Form: (F/S): S// f FULL  - The answer to this question will determine which type of encounter form will be send in the message.

Sending Mailman message to distribution list
Message Sent
Press enter to continue....:

9.0 Problem List
This section addresses the Problem List management for Roll and Scroll and the GUI.

9.1 BH Patient’s Problem List (Roll and Scroll)
The PPL option appears on the Patient Data Entry and Update BH Forms windows.

Use the PPL option to manage the patient’s problem list.

1. At the “Select Action” prompt, type PPL.
2. The application displays the following information:

   Problem List updates must be attached to a visit. If you are updating the Problem List in the context of a patient visit select the appropriate existing visit and then update the Problem List. If you are updating the Problem List outside of the context of a patient visit, first create a chart review visit and then update the Problem List.
   Select record to associate the Problem List update to: (1-5):

3. At the “Enter ENCOUNTER DATE” prompt, type the encounter date for the problem list.

   The application displays the patient’s problem list.

### 9.1.1 Add BH Problem (AP)

Use the AP action to add a new BH problem for the current patient’s visit.

1. At the Select Action” prompt, type **AP**.

   The application displays information about the POV diagnosis assigned to the patient in the past 90 days.

2. At the “Choose a Diagnosis” prompt, type one of the diagnoses.

3. At the “Enter Diagnosis to Add to the Problem List” prompt, type the active diagnosis code to add to the problem list.

   The application displays the Provider Narrative for the particular problem (can be changed).

4. At the “STATUS” prompt, type one of the following: **A** (active) or **I** (Inactive).

5. At the “DATE OF ONSET” prompt, type the date of onset, when the problem was first diagnosed. (This can be left blank.)

6. At the “Add TREATMENT Note?” prompt, type **Y** (yes) to add a treatment or **N** (no).

   If **N** was used, the focus moves to the “Enter the Date the Problem List was Updated by the Provider” prompt.

   If **Y** was used, the following prompts will display:

   a. At the “PROVIDER NARRATIVE” prompt, type the text of the narrative for the treatment note.

   b. At the “AUTHOR” prompt, press Enter to use the default name or type a new one.

   c. At the “LONG/SHORT TERM TREATMENT” prompt, type 1 for Short Term or 2 for Long Term. This refers to the treatment described in the Treatment note.

   After completing the last prompt, the focus returns to the “Add TREATMENT Note?” prompt.

7. At the “Enter the Date the Problem List was Updated by the Provider” prompt, press Enter to use the current date or type a new one.
8. At the “Enter the individual that updated the Problem List” prompt, type the name of the individual who updated the BH Problem List (the default will be provider listed on the visit to which the problem list item is associated).
   - If you are transcribing an update from a BH provider, enter the name of the provider.
   - If you are a data entry/coder correcting the Problem List (for instance, correcting the DSM code), enter your own name.

9.1.2 Edit BH Problem (EP)

Use the EP action to edit a specified BH problem.

1. At the Select Action” prompt, type EP.
2. At the “Select Problem” prompt type the number of the problem to edit.
3. At the “Diagnosis” prompt, the current diagnosis displays. This can be changed, if needed.
4. At the “Provider narrative <text of narrative>” prompt, the text of the narrative displays. This can be changed, if needed.
5. At the “DATE OF ONSET” prompt, type the date of onset, when the problem was first diagnosed. (This can be left blank.)
6. At the “STATUS” prompt, the current status displays. This can be changed using A (Active), or I (Inactive).
7. At the “Enter the Date the Problem List was Updated by the Provider” prompt, press Enter to use the current date or type a new one.
8. At the “Enter the individual that updated the Problem List” prompt, type the name of the individual who updated the BH Problem List (the default will be provider listed on the visit to which the problem list item is associated).
   - If you are transcribing an update from a BH provider, enter the name of the provider.
   - If you are a data entry/coder correcting the Problem List (for instance, correcting the DSM code), enter your own name.

9.1.3 Delete BH Problem (DE)

Use the DE action to delete a specified BH problem.

1. At the “Select Action” prompt, type DE.
2. At the “Select Action” prompt, type the action to execute, either 1 (Delete BH Problem) or 2 (Detail Display). Use 1 in this case.

3. At the “Select Problem” prompt, type the number of the problem to delete. The information about the particular problem displays:

Deleting the following BH Problem from DUCK DEMO's BH Problem List.

<table>
<thead>
<tr>
<th>PROBLEM CODE: 9.1</th>
<th>PATIENT NAME: DEMO,DUCK</th>

<td>STATUS: ACTIVE</td>
</tr>
<tr>
<td>USER LAST UPDATE: THETA,SHIRLEY</td>
<td></td>
</tr>
</tbody>
</table>

Please Note: You are NOT permitted to delete a BH Problem without entering a reason for the deletion.

Figure 9-3: Example of information displayed about the problem code

4. At the “Are you sure you want to delete this BH Problem?” prompt, type Y (yes) or N (no).

If N was used, the focus will return to the BH Problem List Update window.

If Y was used, the following information will display:

Deleting Treatment Plan...
Treatment Plan for DEMO,DOROTHY ROSE DELETED.
Press enter to continue....:

Figure 9-4: Further information

Press Enter and the focus returns to the Updated Patient Treatment Plan window.

9.1.4 Activate BH Problem (AC)

Use the AC action to change the status of a selected inactive BH problem to active.

1. At the “Select Action” prompt, type AC.

2. At the “Select Problem” prompt, type the number of the problem to activate.

• If the particular problem is already active, the application will display the following message:

That problem is already ACTIVE!!
Press return to continue....:

Figure 9-5: Message displayed when the problem is already active

After pressing Enter, the focus returns to the BH Problem List Update window.
• If the particular problem is not active, the prompts continue:

3. At the “Enter the Date the Problem List was Updated by the Provider” prompt, press Enter to use the default date or type a new one.

4. At the “Enter the individual that updated the Problem List” prompt, type the name of the individual who updated the BH Problem List.

• If you are transcribing an update from a BH provider, enter the name of the provider.
• If you are a data entry/coder correcting the Problem List (for instance, correcting the DSM code), enter your own name.

9.1.5 Inactivate BH Problem (IP)
Use the IP action to change the status of a particular active BH problem to inactive.

1. At the “Select Action” prompt, type IP.

2. At the “Select Problem” prompt, type the number of the problem to inactivate.

• If the particular problem is already inactive, the application displays the following message:

```
That problem is already INACTIVE!!
Press return to continue....:
```

Figure 9-6: Message displayed when the problem is already inactive

After pressing Enter, the focus returns to the BH Problem List Update window.

• If the particular problem is not inactive, the prompts continue:

3. At the “Enter the Date the Problem List was Updated by the Provider” prompt, press Enter to use the default date or type a new one.

4. At the “Enter the individual that updated the Problem List” prompt, type the name of the individual who updated the Problem List.

• If you are transcribing an update from a BH provider, enter the name of the provider.
• If you are a data entry/coder correcting the Problem List (for instance, correcting the DSM code), enter your own name.

9.1.6 Detail Display (DD)
Use the DD action to display detailed information about a selected BH problem.
1. At the “Select Action” prompt, type DD.

2. At the “Select Problem” prompt, type the number of the problem to use.

The Behavioral Health Problem List information displays on the Output Browser screen.

![Output Browser](image)

**Figure 9-7: Sample Problem Detail**

### 9.1.7 Add Note (NO)

Use the NO action to add a note to a selected BH problem.

1. At the “Select Action” prompt, type **NO**.

2. At the “Select Action” prompt, type one of the following:
   1. Add Note
   2. No Active BH Problems

   Use 1 in this case.

   The application displays information about the patient’s BH problem list.

3. At the “Add a new Problem Note for this Problem?” prompt, type **Y** to add a note. (Otherwise, type **N**.)

   If **Y** was used, the following prompt displays:

4. At the “NARRATIVE” prompt, type the text of the narrative of the note.

5. At the “AUTHOR” prompt, press Enter to use the default name or type a new one.
6. At the “LONG/SHORT TERM TREATMENT” prompt, type one of the following: 1 (for short) or 2 (for long).

The application will re-display the information about the problem and information about the notes.

Adding a Note to the following problem on DOROTHY ROSE DEMO's BH Problem List.

Notes:
1) Date Added: 12/07/2015 Author: THETA, SHIRLEY
   Note Narrative: PT PRESENTS BX ASSOCIATED WITH HOARDING

Figure 9-8: Example of information about the problem and information about the notes

7. At the “Add a new Problem Note for this Problem?” prompt, type Y (for yes) or N (for no).

   If Y was used, the prompts will repeat, starting with NARRATIVE.

   If N was used, the prompts will continue.

8. At the “Enter the Date the Problem List was Updated by the Provider” prompt, press Enter to use the default date or type another one.

9. At the “Enter the individual that updated the Problem List” prompt, type the name of the individual who updated the BH Problem List.
   - If you are transcribing an update from a BH provider, enter the name of the provider.
   - If you are a data entry/coder correcting the Problem List (for instance, correcting the DSM code), enter your own name.

9.1.8 Edit Note (MN)

Use the MN action to edit the text of a selected note.

1. At the “Select Action” prompt, type MN.

2. At the “Select Problem” prompt, type the number of the problem having the note to be edited.
The application displays information about the selected problem and information about any existing notes.

3. At the “Edit which one” prompt, type the number of the note to edit.

4. At the “NARRATIVE: <text of the problem>// - Replace” prompt, type in the Replace field with the replacement text for the narrative.

5. At the “LONG/SHORT TERM TREATMENT” prompt, type one of the following: 1 (for short) or 2 (for long).

6. At the “Enter the Date the Problem List was Updated by the Provider” prompt, press Enter to use the default date or type another one.

7. At the “Enter the individual that updated the Problem List” prompt, type the name of the individual who updated the BH Problem List.
   • If you are transcribing an update from a BH provider, enter the name of the provider.
   • If you are a data entry/coder correcting the Problem List (for instance, correcting the DSM code), enter your own name.

9.1.9 Remove Note (RN)
Use the RN action to delete a selected note.

1. At the “Select Action” prompt, type RN.

2. At the “Select Problem” prompt, type the number of the problem having the note to be removed.

   The application displays information about the selected problem and information about any existing notes.

3. At the “Remove which one” prompt, type the number of the note to remove.

4. At the “Are you sure you want to delete this NOTE?” prompt, type Y (yes) or N (no).
   If N was used, the focus will return to the BH Problem List Update window.
   If Y was used, the prompts will continue.

5. At the “Enter the Date the Problem List was Updated by the Provider” prompt, press Enter to use the default date or type another date.

6. At the “Enter the individual that updated the Problem List” prompt, type the name of the individual who updated the Problem List.
• If you are transcribing an update from a BH provider, enter the name of the provider.
• If you are a data entry/coder correcting the Problem List (for instance, correcting the DSM code), enter your own name.

9.1.10 No Active BH Problems (NP)
Use the NP action to specify the date when a particular provider indicated that the patient had no active BH problems. This action requires that there are no ACTIVE problems on the patient’s BH problem list (otherwise, the application will display an error message).

1. At the “Select Action” prompt, type NP.
2. At the “Did the Provider indicate that the patient has No Active BH Problems” prompt, type Y (yes) or N (no).
   - If N was used, the focus will return to the BH Problem List Update window.
   - If Y was used, the prompts will continue:

3. At the “Enter the Date the Provider documented ‘No Active BH Problems’” prompt, press Enter to use the default date or type a new one.
4. At the “Enter the PROVIDER who documented ‘No Active BH Problems’” prompt, type the provider name who documented that there are no active BH problems.

9.1.11 Problem List Reviewed (LR)
Use the LR action to indicate who reviewed the current patient’s BH Problem List and when.

1. At the “Select Action” prompt, type LR.
2. At the “Did the Provider indicate that he/she reviewed the Problem List?” prompt, type Y (yes) or N (no).
   - If N was used, the application will display ‘No Action Taken’ and the focus will return to the BH Problem List Update window.
   - If Y was used, the prompts continue:

3. At the “Enter the Date the Provider Reviewed the Problem List” prompt, press Enter to use the default date or type a new one.
4. At the “Enter the PROVIDER who Reviewed the Problem List” prompt, type the name of the provider who reviewed the BH Problem List.

9.1.12 PCC Problem List Display (PC)

Use the PC action to display the PCC problem list.

1. At the “Select Action” prompt, type PC.

The application displays the message:

You are now leaving the Behavioral Health Problem List and will be taken into the PCC Problem List for updating.

Do you wish to continue? Y/

Figure 9-9: Information displayed by the application

If N was used at the last prompt, focus will return to the BH Problem List Update window.

If Y was used, the PCC Problem List Display window displays.

Figure 9-11: Sample information about the selected PCC problem

At the “Select Action” prompt do one of the following:

- Type a plus sign (+) to display the next screen (does not apply to the last screen)
- Type a hyphen (−) to display the previous screen (does not apply to the first screen)
- Type Q to quit the screen.

9.2 Problem List (GUI)
This section addresses how to manage the problems for a selected patient on the Visit window for one patient.

After selecting a record and clicking the Problem button, select one of the following options:

- BH Problem List
9.2.1 Behavior Health Problem List Window

After selecting the BH Problem List option, the Behavioral Health Problem List window displays.

Figure 9-12: Behavioral Health Problem List window

The current patient’s problems display in the Problem List grid, including any associated notes. The note displays on the row below the problem.

Table 8-1 provides information about the features on this window.

<table>

</tbody>
</table>

Add/Edit Problem

The Add and Edit function use the same fields.
1. Select **Problems | Add Problem** to access the fields in the **Problem List Data Entry** group box.

2. Select an existing problem and then select **Problems | Edit Problem**. All of the fields in the **Problem List Data Entry** group box are populated with existing data.

![Problem List Data Entry group box](image)

**Figure 9-13: Problem List Data Entry group box**

The fields in bold are required: Diagnosis, Narrative, Date Updated, and Person Who Updated.

1. At the **Diagnosis** field, click the list to access the **POV** select window. Here you select a POV to populate the **Diagnosis** and **Narrative** fields.

![POV select window](image)

**Figure 9-14: POV select window**

<tbody>
<tr>
<td>Use this search window in one of two ways:</td>
<td></td>
</tr>
<tr>
<td>(1) Use the <strong>Search String</strong> field by typing the search criteria for the POV and clicking <strong>Search</strong>. The retrieved POVs will populate the <strong>POV</strong> list box. Select a retrieved record and click <strong>OK</strong> to populate the <strong>Diagnosis</strong> and <strong>Narrative</strong> fields. (Otherwise, click <strong>Close</strong>.)</td>
<td></td>
</tr>
<tr>
<td>(2) Select a record in the <strong>Most Recently Selected</strong> list box and click <strong>OK</strong> to populate the <strong>Diagnosis</strong> and <strong>Narrative</strong> fields. (Otherwise, click <strong>Close</strong>.)</td>
<td></td>
</tr>
</tbody>
</table>
2. At the **Active/Inactive** option button, indicate if the selected diagnosis is Active or Inactive by selecting the appropriate option button (Active is the default for a new problem).

3. At the **Date of Onset** field, select the Date of Onset, which is the date when the problem was first diagnosed. For a new problem, the default is today’s date.
   - To have no Date of Onset, uncheck the check box.
   - To change the Date of Onset, click the list to access a calendar. The check box will remain checked.

4. At the **Narrative** field, determine the diagnosis to use. This field is populated when you choose a diagnosis (can be changed). Type a new narrative in the Free Text field, if needed.

5. At the **Add Note?** field, select the **Add Note** field to display the **Note** group box.

![Figure 9-15: Note group box](image)

After the **Note** group box displays, you can uncheck the **Note** field to close the group box, if needed.

   a. At the **Note** field, type the text of the note, usually information about the treatment.

   b. At the **Author** field, type the name of the author of the note. The application populates this field with the current logon user. To change the name, click the list to access the **Primary Provider** window to select another name.
What to Do

Use this search window in one of two ways:

1. Use the Search String field by typing the primary provider’s last name and clicking Search. The retrieved names will populate the Primary Provider list box. Select a retrieved record and click OK to populate the Author field. (Otherwise, click Close.)

2. Select a record in the Most Recently Selected list box and click OK to populate the Author field. (Otherwise, click Close.)

---

c. At the Long-Term/Short-Term field, select either the Long-Term or Short-Term option button, referring to the treatment described in the note.

6. At the Date Updated field, the application displays today’s date (the default). To change the date, click the list to access the calendar where you can select another date.

7. At the Person Who Updated field, the application displays the default provider (who is the provider of the visit to which the Problem List item is associated). To change the name, click the list to access the Primary Provider select window to select another primary provider.
Use this search window in one of two ways:
(1) Use the Search String field by typing the primary provider’s last name and clicking Search. The retrieved names will populate the Primary Provider list box. Select a retrieved record and click OK to populate the Person Who Updated field. (Otherwise, click Close.)
(2) Select a record in the Most Recently Selected list box and click OK to populate the Person Who Updated field. (Otherwise, click Close.)

8. If Add was used, after the Problem List Data Entry group box is complete, click Save to add the “new” problem to the Problem List grid. (Otherwise, click Cancel).

9. If Edit was used, after the Problem List Data Entry group box is complete, click Save to change the selected record on the Problem List grid. (Otherwise, click Cancel).

Delete Problem
1. Select an existing problem in the Problem List grid.
2. Select Problems | Delete Problem.
3. The Problem List Reason for Delete dialog displays.
4. Click the list for the Reason field (required) and select an option.
   - DUPLICATE
   - ENTERED IN ERROR
   - OTHER
     a. If you select OTHER, the dialog changes to include a text field.

b. In this case, at the Other field, type the reason to delete the problem (required).

5. After the Problem List Reason for Delete dialog is complete, click OK (otherwise, click Close).

After clicking OK, the application activates the Date Updated and Person Who Updated fields.

6. At the Date Updated field, select the update date. The default is today’s date. To change the date, click the list to access the calendar and select another date.

7. At the Person Who Updated field, select the provider who updated the information. The default is the provider of the visit to which the Problem List item is associated. The Primary Provider select window displays.
Use this search window in one of two ways:
(1) Use the Search String field by typing the primary provider’s last name and clicking Search. The retrieved names will populate the Primary Provider list box. Select a retrieved record and click OK to populate the Person Who Updated field. (Otherwise, click Close.)
(2) Select a record in the Most Recently Selected list box and click OK to populate the Person Who Updated field. (Otherwise, click Close.)

After the active fields are complete, click Save to remove the problem from the Problem List grid. (Otherwise, click Cancel.)

Activate/Inactivate Problem
1. Select an existing problem in the Problem List grid.
2. Select Problems | Activate (or Inactivate).
3. The Date Updated and Person Who Updated fields display.
4. At the **Date Updated** field, select the update date. The default is today’s date. To change the date, click the list to access the calendar and select another date. The **Activate** action only works if the **Date Updated** is checked.

5. At the **Person Who Updated** field, select the person who updated the problem list. To change the name, click the list to access the **Primary Provider** select window and select a name. See Figure 9-21.

6. After the active fields are complete, click **Save** to change the Status of the selected record on the **Problem List** grid. (Otherwise, click **Cancel**.)

**Add/Edit Note**

The **Add Note** and **Edit Note** functions use the same fields.

1. Select an existing problem in the **Problem List** grid. Select **Notes | Add Note**.

OR

2. Select an existing note in the **Problem List** grid. Select **Notes | Edit Note**. The fields become populated with existing data.

Figure 9-23 shows the fields in the lower group box.

3. At the **Date Updated** field, select the update date. The default is today’s date. To change the date, click the list to access the calendar and select another date. The **Add Note** action only works if the **Date Updated** is checked.

4. At the **Person Who Updated** field, select the person who updated the problem list. To change the name, click the list to access the **Primary Provider** select window and select a name. See Figure 9-21.

5. At the **Note** field, type the text of the note (Free Text field), usually information about the treatment.
6. At the **Author** field, select the author of the note. To change the name, click the list to access the **Primary Provider** select window. See Figure 9-16.

7. At the **Long Term/Short Term** field, select either the **Long Term** or **Short Term** option button, referring to the treatment described in the note.

8. After the lower group box is complete, click **Save** and the note will be added to the particular problem in the **Problem List** grid. (Otherwise, click **Cancel**.)

After saving, the application gives the note a note number, displays when the note was added, and displays the note narrative.

If **Edit** was used, after the **Note** group box is complete, click **Save** (otherwise, click **Cancel**). After clicking **Save**, the particular note will be changed (on the **Problem List** grid).

**Remove Note**

1. Select an existing note in the **Problem List** grid.

2. Select **Notes** | **Remove Note**.

3. The **Date Updated** and **Person Who Updated** fields become active. See Figure 9-20.

4. At the **Date Updated** field, select the update date. The default is today’s date. To change the date, click the list to access the calendar. The **Remove Note** action only works if the **Date Updated** is checked.

5. At the **Person Who Updated** field, select the person who updated the information. Click the list to access the **Primary Provider** select window. Select the name of the person who updated the Problem List. See Figure 9-21.

6. After the active fields are complete, click **Save** (otherwise, click **Cancel**). If **Save** was used, the prompts continue.

7. At the **Are You Sure?** confirmation message, click **Yes** to remove the note, which will be removed from the **Problem List** grid. (Otherwise, click **No**.)

**Detail Display**

Select a problem in the **Problem List** grid.

Click the **Detail Display** button.

The **BH Problem List Detail** pop-up for the particular patient displays.
Section 2.6 provides more information about using the controls on the pop-up window.

**No Active Problems**

Use the **No Active Problems** button to indicate that the patient has No Active BH Problems. The application determines if the patient has active BH problems.

1. After clicking this button and if there are active problems, the application displays the following message: There are ACTIVE Problems on this patient’s BH problem list. You cannot use this action item. Click **OK** to dismiss the message and the focus returns to the Behavioral Health Problem List window.

2. After clicking this button and there are no active problems, the application asks the following: Did the Provider indicate that the patient has No Active BH Problem? Click **Yes** (otherwise, click **No**).

   If **Yes** was used, the **Date Documented** and **Provider Who Documented** fields become active.
3. At the **Date Documented** field, select the date the provider documented that the patient has no active problems. The default is today’s date. To change the date, click the list to access the calendar. The **No Active Problems** action only works if the **Date Documented** is checked.

4. At the **Person Who Documented** field, select the person who documented that the patient has no active problems. To change the name, click the list to access the **Primary Provider** select window and select a name.

<td></td>
</tr>
</tbody>
</table>
5. After the active fields are complete, click **Save** (otherwise, click **Cancel**).

6. After clicking **Save**, the text below the action buttons will display information such as No Active BH Problem Documented on Dec 01, 2011 by DEMO,DOCTOR. Other text below the action buttons will display information such as: BH Problem List Reviewed on Dec 01, 2011 by DEMO,DOCTOR.

**Problem List Reviewed**

1. Click the **Problem List Reviewed** button to indicate that the current patient’s problem list was reviewed.

2. The **Date Reviewed** and **Provider Who Reviewed** fields become active.

![Date Reviewed and Provider Who Reviewed fields](image)

Figure 9-27: **Date Reviewed** and **Provider Who Reviewed** fields

3. At the **Date Reviewed** field, select the date the provider reviewed the problem list. The default is today’s date. To change the date, click the list to access the calendar and select another date. The **Problem List Reviewed** action only works if the **Date Reviewed** is checked.

4. At the **Person Who Reviewed** field, select the person who reviewed the problem list. To change the name, click the list to access the **Primary Provider** select window and select a name.
Screen Capture

Use this search window in one of two ways:
(1) Use the Search String field by typing the primary provider's last name and clicking Search. The retrieved names will populate the Primary Provider list box. Select a retrieved record and click OK to populate the Person Who Reviewed field. (Otherwise, click Close.)
(2) Select a record in the Most Recently Selected list box and click OK to populate the Person Who Reviewed field. (Otherwise, click Close.)

Figure 9-28: Primary Provider select window

5. After the active fields are complete, click Save (otherwise, click Cancel).

After clicking Save, the text below the action buttons (on the Behavioral Health Problem List window) will display information such as: BH Problem List Reviewed on December 1, 2011 by DEMO, DOCTOR.

PCC Problem List Display

Click the PCC Problem List Display button to move to the PCC Problem List window.

PCC Problem List Window

1. After selecting the PCC Problem List option (on the Visit window), the PCC Problem List window displays.
2. The current patient’s PCC problems display in the Problem List grid, including any associated notes. The notes display on the row below the problem.

3. Click Close to leave the window.

4. Click Help to access the online help for this window.

**Detail Display**

1. Select a problem in the Problem List grid.

2. Click the Detail Display button.

3. The PCC Problem List Detail pop-up for the particular patient displays.
Section 2.6 provides more information about using the controls on the pop-up window.

**BH Problem List Update**

Click the **BH Problem List Update** button to move to the **Behavioral Health Problem List** window.

Section 9.2.1 provides more information about this window.
10.0 Treatment Plans

Use the Treatment Plans feature to add or update treatment plans in Roll and Scroll and in the RPMS Behavioral Health System (GUI).

10.1 Patient Treatment Plans (Roll and Scroll)

Use the Update BH Patient Treatment Plans (TPU) option on the Data Entry Menu to access the Patient Treatment Plans menu.

10.1.1 Add, Edit, Delete a Treatment Plan (UP)

Use the UP (Add, Edit, Delete a Treatment Plan) to access the Update Patient Treatment Plan window for a particular patient.

1. At the “Select Update BH Patient Treatment Plans Option, type UP.
2. At the “Select PATIENT NAME” prompt, type the name of the patient.
3. The Update Patient Treatment Plan window displays.

Update Patient Treatment Plan Apr 13, 2009 17:11:07 Page: 1 of 9
Patient Name: ALPHAA, CHELSEA MARIE DOB: FEB 07, 1975 Sex: F

TREATMENT PLANS CURRENTLY ON FILE

1) Program: SOCIAL SERVICES Responsible Provider: GAMMAA, RYAN
   Date Established: MAR 27, 2009 Next Review Date: APR 01, 2009
   Status:                     Date Resolved:
   Problem: eating

2) Program: MENTAL HEALTH Responsible Provider: GAMMAA, RYAN
   Date Established: MAR 24, 2009 Next Review Date: APR 15, 2009
   Status:                     Date Resolved:
Use the Quit action to dismiss the Update Patient Treatment Plan window.

**Add Treatment Plan (AD)**

Use the AD action to add a new treatment plan for the current patient. The prompts are the same as when you edit a plan. The Edit a Plan section below provides more information about the prompts.

**Edit a Plan (ED)**

Use the ED action to change a selected treatment plan for the current patient.

1. At the “Select Action” prompt, type **ED**.

2. At the “Enter Date Established” prompt, type the date the treatment plan was established (you cannot change).

3. At the “Program” prompt, type the program for the treatment plan. Use one of the following: M (Mental Health), S (Social Services), C (Chemical Dependency), O (Other).

4. At the “Designated Provider” prompt, type the name of the designated provider for the treatment plan. The default is the current logon user.

5. At the “Case Admit Date” prompt, type the date the case was admitted.

6. At the “PROBLEM LIST” prompt, type the text of the problem, using up to 240 characters. The text should list and briefly describe multiple problems.

7. At the “DIAGNOSIS – No existing text – Edit? NO//” prompt, type **Y** (yes) to edit the text (otherwise, type **N** (no). If Y was used, the application displays a window for typing the text of the diagnosis (Figure 10-3).

![Figure 10-2: Sample Update Patient Treatment Plan window](image-url)
Table 10-1 lists the most commonly used RPMS text editor commands.

**Table 10-1: Common RPMS text editor commands**

<table>
<thead>
<tr>
<th>Action Needed</th>
<th>Use These Keys</th>
</tr>
</thead>
<tbody>
<tr>
<td>Delete a line (extra blank or text)</td>
<td>PF1(F1) followed by D</td>
</tr>
<tr>
<td>Join two lines (broken or too short)</td>
<td>PF1(F1) followed by J</td>
</tr>
<tr>
<td>Save without exiting</td>
<td>PF1(F1) followed by S</td>
</tr>
<tr>
<td>Exit and save</td>
<td>PF1(F1) followed by E</td>
</tr>
<tr>
<td>Quit without saving</td>
<td>PF1(F1) followed by Q</td>

<tr>
<td>Top of text</td>
<td>PF1(F1) followed by T</td>
</tr>
</tbody>
</table>

8. At the “Treatment Plan Narrative (Problems/Goals/Objectives/Methods) – No existing text – Edit? NO//” prompt, type **Y** (yes) to edit the text (otherwise, type **N** (no).” If **Y** was used, the application displays a window to type the text of the treatment plan (Figure 10-4).

---

**Figure 10-3: Window to add the text of the diagnosis**

**Figure 10-4: Window to add information about the treatment plan**
See Table 10-1 for commonly used RPMS text editor commands.

9. At the “Anticipated Completion Date” prompt, type the date the treatment plan is anticipated to be completed.

10. At the “Review Date” prompt, type the date of the review.

11. At the “Concurring Supervisor” prompt, type the name of the concurring supervisor for the treatment plan.

12. At the “Date Concurred” prompt, type the date the concurring supervisor agreed to the treatment plan. Once a date is specified at this prompt, you cannot change it. The prompt displays only if you specified a concurring supervisor.

13. At the “Participants in the development of this plan” prompt, if there is a participant in the development of this plan, the application displays the name. If not, the “None recorded” message displays.

The application allows you to do one of the following at this prompt: A - Add a Participant or N - NO Changes. If N was used, the “Date Closed” prompt displays.

If A was used, the following prompts display:

a. At the “Enter the Participant Name” prompt, type the name of the participant.

b. At the “Enter the Relationship to the Client” prompt, type the relationship of the participant to the patient.

The application then lists the participants in the development of the plan. Figure 10-5 shows an example.

<table>
<thead>
<tr>
<th>Participants in the development of this plan:</th>
</tr>
</thead>
<tbody>
<tr>
<td>1) Alma Beta cousin</td>
</tr>
</tbody>
</table>

Select one of the following:

A  Add a Participant
E  Edit an Existing Participant
D  Delete a Participant
N  No Change

Which action:

c. At the “Which action” prompt, use one of the following:
   - Type A to add a participant. The prompts are the same as those shown above.
- Type **E** to edit a particular existing participant. After you indicate the participant name, the prompts are the same as the add option.

- Type **D** to delete a particular existing participant. The application asks to specify the one you want to delete. There is no confirmation about the deletion.

- Type **N** to continue onto the next prompt.

14. At the “Date Closed” prompt, type the date the treatment plan is to be closed.

**Delete Tx Plan (DE)**

Use the DE action to delete a particular treatment plan.

1. At the “Select Action” prompt, type **DE**.

2. At the “Select BH Treatment Plan” prompt, type the number of the treatment plan to remove.

3. At the “Are you sure you want to DELETE this Treatment Plan?” prompt, type **Y** (yes) to remove the particular treatment plan from the Update Patient Treatment Plan window. (Otherwise, type **N** (no).)

**Enter TP Review (RV)**

Use the RV action to access the Treatment Plan Update window of a specified treatment plan (for the current patient).

1. At the “Select Action” prompt, type **RV**.

2. At the “Select BH Treatment Plan” prompt, type the number of the treatment plan to review.

   Note: the application could display the message in Figure 10-6.

   Press enter to continue.

   The Treatment Plan Update window displays. This window has the following prompts.

3. At the “Select REVIEW DATE” prompt, press Enter to accept the displayed review date (you can change). If you do not enter a date here, you exit the RV process.

NOTE: It is recommended you close out treatment plans using DSM-IV diagnoses and create a new treatment plan using DSM-5 diagnoses.
4. At the “Review Provider” prompt, type the name of the review provider.

5. At the “Review Supervisor” prompt, type the name of the review supervisor, if any.

6. At the “Progress Summary” prompt, type the text of the progress summary displays (if any).

7. At the “Edit?” prompt, type Y (yes) or N (no) to edit the text of the progress summary or not. If Y was used, you access another window to edit the text.

---

Figure 10-7: Window to add information about the treatment plan

See Table 10-1 for commonly used RPMS text editor commands.

8. At the “Select TX REVIEW PARTICIPANT NAME” prompt, type a new treatment review participant name, if needed.

9. At the “Relationship to Client” prompt, type the relationship to the client. This prompt does not display unless you added a name in the previous prompt.

10. At the “Next Review Date” prompt, type the next review date displays (you can change).

**Disp/Print Plan (DS)**

Use the DS action to display/print a specified treatment plan for the current patient.

1. At the “Select Action” prompt, type DS.

2. At the “Select BH Treatment Plan” prompt, type the number of the treatment plan to browse/print.

3. At the “What would do like to print” prompt, type T (Treatment Plan Only), R (Treatment Plan REVIEWS Only), or B (both Treatment Plan and Reviews).
4. At the “Do you wish to” prompt, type P (print output on paper) or B (browse output on screen).

The browse option outputs on the **Output Browser** window.

**Health Summary (HS)**

Use the HS action to display/print a particular health summary for the current patient.

1. At the “Select Action” prompt, type **HS**.

2. At the “Select HEALTH SUMMARY TYPE NAME” prompt, type the health summary type to use.

   The application displays the Health Summary for the current patient on the **Output Browser** window.

**Browse Visits (BV)**

Use the BV action to browse the behavioral health visits for the current patient.

1. At the “Select Action” prompt, type **DS**.

2. At the “Browse which subset of visits for [patient name]” prompt, type one of the following: **L** (patient’s last visit), **N** (patient’s last n visits), **D** (visits in a date range), **A** (All of this patient’s visits), or **P** (visits to one program). If you use N, D, or P, other prompts will display.

   a. If N was used, type the number of visits at the “How many visits should be displayed: (1-99)” prompt.

   b. If D was used, type the date range of the visits.

      • At the “Enter beginning Date of Visit” prompt, type the beginning date of the date range.

      • At the “Ending Date of Visit” prompt, type the ending date of the date range.

   c. If P was used, type the program at the “Visits to Which Program” prompt.

   The **BROWSE PATIENT’S VISITS** window displays. The one below is for all visits.

Share a TP (SP)
You need to have shared permission in order to use this option. (Use the Site parameters on the Manager utilities (Share Records); your name would need to be added to that list.)

10.1.2 Display/Print a Treatment Plan (DTP)

Use the DTP option (on the Patient Treatment Plans menu) to display/print the treatment plan for a specified patient.

1. At the “Select Update BH Patient Treatment Plans Option” prompt, type **DTP**.

2. At the “Select PATIENT NAME” prompt, type the name of the patient to use.

If you use a patient with no treatment plan, the application will display a message to that effect.

If the patient has at least one treatment plan, the application will display the Display/Print Treatment Plan window.

Table 10-2 lists the actions related to view functions on this window.

### Table 10-2: Display/Print Treatment Plan window actions and functionality

<table>
<thead>
<tr>
<th>Action</th>
<th>Functionality</th>
</tr>
</thead>
<tbody>
<tr>
<td>NS (Next Screen)</td>
<td>Display the next screen of information (does not apply to the last screen).</td>
</tr>
<tr>
<td>PS (Previous Screen)</td>
<td>Display the previous screen of information (does not apply to the first screen).</td>
</tr>
<tr>
<td>DN (Down a Line)</td>
<td>Display the next line of information following the one at the bottom of the current screen (does not apply to the last screen).</td>
</tr>
<tr>
<td>UP (Up a Line)</td>
<td>Display the previous line of information before the top of the current screen (does not apply to the first screen).</td>
</tr>
<tr>
<td>Q (Quit)</td>
<td>Dismiss the window.</td>
</tr>
</tbody>
</table>

**Display/Print Plan (DS)**

Use the DS action to browse/print a particular treatment plan. See **Display/Print Plan (DS)** for more information about the display/print plan action.

**Health Summary (HS)**

Use the HS action to display a particular type of health summary for the current patient.

1. At the “Select Action” prompt, type **HS**.

2. At the “Select HEALTH SUMMARY TYPE NAME” prompt, type the health summary type to use.

The application displays the Health Summary for the current patient on the **Output Browser** window.

**Print List (PL)**

Use the PL action to display/print the treatment plans for the current patient.

1. At the “Select Action” prompt, type **PL**.
2. At the “Device” prompt, type the device to output the list of treatment plans.

The application displays the Display/Print Treatment Plan for the current patient.

![Sample Display/Print Treatment Plan window](image)

**Search List (SL)**

Use the SL action to search for a particular text string in the text of the treatment plans

1. At the “Select Action” prompt, type **SL**.
2. At the “Search for” prompt, type the text string to search for in the treatment plan.

   If the application finds the first occurrence of the text string, it highlights it and the prompts continue.

3. At the “Stop Here?” prompt, type **Y** (yes) or **N** (no).

   If **N** was used, the focus leaves the search sequence.

   If **Y** was used, the application will search for the next occurrence of the text string. If it finds it, the application will highlight it. If it does not find it, it displays the message: “Text not found. Do you want to start at the beginning of the list?” Type **Y** (yes) or **N** (no).

**10.1.3 Print List of Treatment Plans Needing Reviewed (REV)**

Use the REV option to print a list of treatment plans in a particular date range that need to be reviewed.
1. At the “Select Update BH Patient Treatment Plans” prompt, type REV.

2. At the “Enter Beginning Date” prompt, type the beginning date of the date range.

3. At the “Enter Ending Date” prompt, type the ending date of the date range.

4. At the “Run the Report for which Program” prompt, type which program to use: O (One Program) or A (All Programs).
   
   If O was used, type the number of the program to use at the “Which Program” prompt.

5. At the “List Treatment Plans for” prompt, type one of the following: O (One Provider) or A (All Providers).
   
   If O was used, type the name of the provider at the “Which Responsible Provider” prompt.

6. At the “Demo Patient Inclusion/Exclusion” prompt, type one of the following: I (include all patients), E (exclude DEMO patients), O (include only DEMO patients).

7. At the “Device” prompt, type the device to output the list.

   Figure 10-12 shows a sample Listing of Treatment Plans Due to be Reviewed.

### 10.1.5 Print List of All Treatment Plans on File (ATP)

Use the ATP option to print/browse a list of all patients who have a treatment plan on file (in a specified date range). This date range is the one during which the treatment plan was established.

1. At the “Select Update BH Patient Treatment Plans” prompt, type **ATP**.
2. At the “Enter BEGINNING Date” prompt, type the beginning date of the date range.
3. At the “Enter ENDING Date” prompt, type the ending date of the date range.
4. At the “Run the Report for which PROGRAM” prompt, type which program to use: **O** (One Program) or **A** (All Programs).

If **O** was used, type the number of the program to use at the “Which Program” prompt.

5. At the “List treatment plans for” prompt, type **O** (one provider) or **A** (all providers).
If O was used, type the name of the provider at the “Which Provider” prompt.

6. At the “Sort list by” prompt, type P (Responsible Provider), N (Patient Name), or D (Date Established).

7. At the “Demo Patient Inclusion/Exclusion” prompt, type one of the following: I (include all patients), E (exclude DEMO patients), O (include only DEMO patients).

8. At the “Device” prompt, type the device to output the list.

The application displays the **Listing of Treatment Plans** window.

### 10.1.6 Patients w/Case Open but No Treatment Plan (NOTP)

Use the NOTP option to produce a report that lists all patients who have a case open date, no case closed date, and no treatment plan in place in a specified date range. This date range is during which the case was opened.

1. At the “Select Update BH Patient Treatment Plans” prompt, type **NOTP**.

2. At the “Enter BEGINNING Date” prompt, type the beginning date of the date range.

3. At the “Enter ENDING Date” prompt, type the ending date of the date range.
4. At the “List cases opened by” prompt, type O (one program) or A (all programs). This allows you to limit the report output to cases opened by one or all Programs.

If O was used, type the name of the program at the “Review Cases opened by which Program” prompt.

5. At the “List cases opened by” prompt, type O (one provider) or A (all providers). This allows you to limit the report output to cases opened by one or all Providers.

If O was used, type the name of the provider at the “Which Provider” prompt.

6. At the “Sort list by” prompt, type P (Responsible Provider), N (Patient Name), or C (Case Open Date).

7. At the “Demo Patient Inclusion/Exclusion” prompt, type one of the following: I (include all patients), E (exclude DEMO patients), O (include only DEMO patients).

8. At the “Do you wish to” prompt, type P (Print output) or B (Browse output on screen).

The LISTING OF CASES OPENED WITH NO TREATMENT PLAN IN PLACE report displays.

10.2 Treatment Plan Window (GUI)

The RPMS Behavioral Health System (GUI) application provides ways to manage treatment plans for one patient.

Figure 10-16 shows where the treatment plan functions are located on the Clinical Activities tree structure.
One way to access the Treatment Plan window is to use the One Patient option. You access the Treatment Plan window for the current patient.

Another way to access the Treatment Plan window is to use All Patients. You access the Treatment Plan window for all patients.
Table 10-3 provides information about the features of both windows.

Table 10-3: Treatment Plan window features and functionality

<table>
<thead>
<tr>
<th>Feature</th>
<th>Functionality</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Treatment Plan Window for One Patient</strong></td>
<td>The default <strong>Start Date</strong> is one year prior. Changing the <strong>Start Date</strong> for the Treatment Plan window for One Patient stays in effect in future sessions of the GUI application for the Treatment Plan window (until you change it again).</td>
</tr>
<tr>
<td><strong>Treatment Plan Window for All Patients</strong></td>
<td>The default <strong>Start Date</strong> is one year prior. Changing the <strong>Start Date</strong> for the Treatment Plan window for All Patients stays in effect until you exit the application. When you log in the next time, the Start Date reverts to one year previous.</td>
</tr>
<tr>
<td><strong>Treatment Plan Group Box</strong></td>
<td>This group box shows the records within the Treatment Plan Date Range. They are in date order.</td>
</tr>
<tr>
<td><strong>Add Button</strong></td>
<td>Establish the patient to use in the add process. Click the <strong>Add</strong> button to add a new treatment plan record on the Treatment Plan - Add Treatment Plan window.</td>

</tr>
<tr>
<td><strong>Help Button</strong></td>
<td>Click the <strong>Help</strong> button to access the online help system for the Treatment Plan window.</td>
</tr>
<tr>
<td><strong>Close Button</strong></td>
<td>Click the <strong>Close</strong> button to dismiss the Treatment Plan window.</td>
</tr>
<tr>
<td><strong>Delete Button</strong></td>
<td>Click the <strong>Delete</strong> button to delete a particular treatment plan record. The application confirms the deletion.</td>
</tr>
<tr>
<td><strong>Print Treatment Plan Button</strong></td>
<td>Use the <strong>Print Treatment Plan</strong> button to print a particular Treatment Plan record. The <strong>Print Treatment Plan</strong> button has three choices: (1) <strong>Treatment Plan Only</strong>, (2) <strong>Review Data Only</strong>, and (3) <strong>Treatment Plan and Review Data</strong>. Highlight a record and choose one of the <strong>Print Treatment Plan</strong> options. The application determines which of the options are active.</td>
</tr>
</tbody>
</table>

The following applies to the **Print Treatment Plan** button:
If you use Review Data Only (2) or Treatment Plan and Review Data (3) and if there are reviews, the application displays the **Treatment Plan Reviews** dialog.

![Treatment Plan Reviews dialog](image)

Figure 10-19: **Treatment Plan Reviews** dialog

Check each Treatment Plan Review record to use and click **OK**. Otherwise, click **Close** to exit the print routine.

The following shows the first page of the **Treatment Plan** pop-up window.
Section 2.6 provides more information about using the controls on this type of window.

10.3 Add/Edit Treatment Plan Record (GUI)

Click the **Add** button on the **Treatment Plan** window to display the **Treatment Plan - Add Treatment Plan** window.

Click the **Edit** button on the **Treatment Plan** window to display the **Treatment Plan -Edit Treatment Plan** window.
Both windows have the same fields. Figure 10-21 shows the Add Treatment Plan window.

![Figure 10-21: Add Treatment Plan window](image)

Table 10-4 provides information about the buttons on this window.

<table>
<thead>
<tr>
<th>Button</th>
<th>Functionality</th>
</tr>

</tr>
</tbody>
</table>

### 10.3.1 Treatment Plan Information Group Box

Use the Treatment Plan Information group box to manage the basic information about the treatment plan.
The fields in bold text are required (Date Established, Program, and Designated Provider).

1. At the **Date Established** field, select the date the treatment plan was established. The default for a new record is the current date. Click the list to access the calendar to change this date.

2. At the **Next Review Date** field, select the date the treatment plan is expected to be reviewed. Click the list to access the calendar to change this date. Note that if Date Completed/Closed is populated, this field will be inactive.

3. At the **Program** field, select the program used in the treatment plan. Click the list to select one of the following: Mental Health, Social Services, Other, or Chemical Dependency.

4. At the **Date Completed/Closed** field, select the date the treatment plan was completed or closed. Click the list to access the calendar to change this date.

5. At the **Case Admit Date** field, select the date the patient was admitted into care. Click the list to access the calendar to change this date.

6. At the **Anticipated Completion Date** field, select the anticipated completion date for the treatment plan. Click the list to access the calendar to change this date.

7. At the **Designated Provider** field, select the name of the designated provider for the treatment plan. Click the list to access the Designated Provider search dialog to search for the name of the designated provider.
### What to Do

Use this search window in one of two ways:

1. Use the **Search String** field by typing the designated provider’s last name and then clicking **Search**. The retrieved providers will populate the **Designated Provider** list box. Select a retrieved record and click **OK** to populate the **Designated Provider** field. (Otherwise, click **Close**.)

2. Select a name in the **Most Recently Selected** list box and click **OK** to populate the **Provider** field. (Otherwise, click **Close**.)

---

<table>

</thead>
</table>
| ![Designated Provider search window](image) | Use this search window in one of two ways:  
(1) Use the **Search String** field by typing the designated provider’s last name and then clicking **Search**. The retrieved providers will populate the **Designated Provider** list box. Select a retrieved record and click **OK** to populate the **Designated Provider** field. (Otherwise, click **Close**.)  
(2) Select a name in the **Most Recently Selected** list box and click **OK** to populate the **Provider** field. (Otherwise, click **Close**.) |

---

8. At the **Concurring Supervisor** field, select the name of the concurring supervisor for the treatment plan. Click the list to access the **Concurring Supervisor** search dialog and search for the name of the supervisor.
9. At the **Date Concurred** field, select the date that the concurring supervisor agreed to the treatment plan. This date cannot be before the Date Established. Click the list to access the calendar to change this date.

10.3.2 Diagnosis Tab

Use the **Diagnosis** tab to add diagnosis information. This includes the text of the diagnosis for the particular treatment plan (in the **Diagnosis** field) and the text of the problem list (in the **Problem List** field).
10.3.3 Plan Tab

Use the Plan tab to add participants to the plan as well as describing the Problems / Goals / Objectives / Methods of the plan.

Participants Group Box

Use the Participants group box to manage the participants in the treatment plan.
Delete Button
Use the **Delete** button to delete a selected participant record.

1. Select the participant record to delete.
2. Click **Delete**.
3. The application confirms the deletion. Type **Y** (yes) or **N** (no).

Add/Edit Button
The **Add** and **Edit** buttons use the same fields.

1. Click **Add** to add a record.

   OR

2. Select a record to edit and click **Edit**.

   The **Treatment Plan Participants** dialog displays.

![Figure 10-27: Treatment Plan Participants dialog](image)

3. At the **Participant** field, type the participant name. This is a Free Text field.

4. At the **Relationship to Patient** field, type the participant’s relationship to the patient of the treatment plan. This is a Free Text field.

5. After completing the **Participant** and **Relationship** fields, do one of the following:
   a. Click the right arrow button to add the information to the **Participants** list box. More than one participant/relationship record can be added to the **Participants** list box.
   b. Click **Clear** to remove the data in the **Participant** and **Relationship to Patient** fields.
6. Remove a highlighted record in the Participants list box by clicking the left arrow button.

7. If Add was used, click OK to save the data. The data in the Participants list box will populate the Participants group box on the Plan Review tab of the add/edit treatment plan window. (Otherwise, click Close.)

8. If Edit was used, click OK to save the data. The data in the Participants list box will be updated.

Problems/Goals/Objectives/Methods
Populate this field with the text of the problems, goals, objective, or methods for the treatment plan. This is a Free Text field.

10.3.4 Plan Review Tab
Use the Plan Review tab to document the plan review of the treatment plan.

![Plan Review Tab Image]

Figure 10-28: Plan Review tab

When a record is selected in the grid for the plan review, you can do the following:

- Complete the fields for the plan review (below the grid)
- Complete the participants in the plan review (in the Participants group box)
- Complete the Progress Summary for the plan review (in the Progress Summary field)

After you have completed the fields and group boxes, click OK to save the plan review record. (Otherwise, click Cancel.)
Review Group Box
Use the top group box to document the review date, the review provider, and review supervisor, and next review date for the treatment plan.

Delete Button
Use the Delete button to delete a selected plan review record.

1. Select the plan review record to delete.
2. Click Delete.
3. At the Are You Sure confirmation message, type Y (yes) to delete the record. Otherwise, type N (no).

Edit Button
Use the Edit button to change a selected plan review record.

1. Select the plan review record to change.
2. Click Edit.
3. The fields for the selected plan become active. These fields are reviewed below (under Add button).

Add Button
Use to add a new review record. Populate the fields below the review grid as well as the Participants group box, and the Progress Summary field to complete the add process.

The fields for Review in bold text are required.

1. Click Add. The fields below the review grid become active.
2. At the Review Date field, select the date of the review. The default is the current date for a new record. Click the list to access the calendar to change the date.
3. At the Next Review Date field, select the date of the next review. The default is the current date for a new record. Click the list to access the calendar to change the date. Please note that changing the Next Review date here will also change the Next Review date on the Treatment Plan Information group box.
4. At the Review Provider field, select the provider who is doing the review (the default is the current user). Click the list to access the Reviewing Provider search/select window where you search for the provider name.
5. At the **Review Supervisor** field, select the review supervisor for the treatment plan. Click the list to access the **Reviewing Supervisor** search/select window where you search for the supervisor name.
Screen Capture | What to Do
---|---
Use this search/select window in one of two ways:
(1) Use the Search String field by typing the reviewing supervisor’s last name clicking Search. The retrieved names will populate the Reviewing Supervisor list box. Select a retrieved record and click OK to populate the Review Supervisor field. (Otherwise, click Close.)
(2) Select a name in the Most Recently Selected list box and click OK to populate the Review Supervisor field. (Otherwise, click Close.)

Figure 10-30: Reviewing Supervisor search/select window

Participants Group Box (Plan Review)
Use the Participants group box to display the participants in the plan review.

Add/Edit Button
The Add and Edit buttons use the same fields.

1. Click Add to access the Treatment Plan Participants dialog.

   OR

2. Select a participant record to edit. Click Edit to access the Treatment Plan Participants dialog.
Figure 10-31: **Treatment Plan Participants** dialog

3. At the **Participant** field, type the participant name. This is a Free Text field.

4. At the **Relationship to Patient** field, type the participant’s relationship to the patient of the treatment plan. This is a Free Text field.

5. After completing the Participant and Relations fields, do one of the following:
   a. Click the right arrow button to add the information to the **Participants** list box. More than one participant/relationship record can be added to the **Participants** list box.
   b. Click **Clear** to remove the data in the **Participant** and **Relationship to Patient** fields.

6. To remove a selected record in the **Participants** list box, click the left arrow button.

7. If Add was used, click **OK** to save the data. The data in the **Participants** list box will populate the **Participants** group box on the **Plan Review** tab of the add/edit treatment plan window. (Otherwise, click **Close**.)

8. If Edit was used, click **OK** to save the data. The data in the **Participants** list box will be updated.

**Delete Button**

Use the **Delete** button to delete a selected Participants record.

1. Select a participant record to delete.

2. Click **Delete**.

3. On the **Are You Sure** confirmation message, click **Yes** to delete the record (otherwise, click **No**).

**Progress Summary**

Use the **Progress Summary** field to add the text of the progress of the plan review. This is a Free Text field.
11.0 Suicide Forms

Users can manage suicide forms in Roll and Scroll as well as in the RPMS Behavioral Health System (GUI).

Please note: All of the fields are mandatory but not enforced. This means if you do not populate all of the fields, you can still save, but the suicide form will be considered Incomplete. If you do complete all of the fields, the suicide form will be considered Complete.

11.1 Suicide Reporting Forms (Roll and Scroll)

Use the SF (Suicide Reporting Forms - Update/Print) option on the IHS Behavioral Health System Data Entry Menu to manage suicide forms in Roll and Scroll.

The Add/Update Suicide Forms option on the Other Information window also accesses the suicide reporting forms.

After using the SF option, the user has two options, shown in Figure 11-1.

Figure 11-1: Options available for managing suicide forms

11.1.1 Update Suicide Reporting Form for a Patient (SFP)

Use the SFP option to update the suicide report for a specified patient.

1. At the “Select Patient Name” prompt, type the name of the patient to use.

2. The View/Update Suicide Form window for the selected patient displays.

```
View/Update Suicide Form    Apr 14, 2009 15:41:17    Page: 1 of 9

Figure 11-2: Sample View/Update Suicide Form window for the current patient

If any of the suicide forms are incomplete, the message “[Incomplete Form]” will display as the last line under the particular case.

Use the Quit action to dismiss this window.

Add/Edit Suicide Form
The add and edit functions use the same update form.

Add a Suicide Form (AF)
Use the AF action to add a suicide form for the current patient.

1. At the “Select Item(s)” prompt, type AF.
2. At the “Provider Completing the form” prompt, type the name of the provider who is completing the form.
3. At the “Enter the Date of the Suicide Act” prompt, type the date of the suicide act.
4. The application displays the Updating IHS Suicide Form window. (See Edit a Suicide Form (EF) below for more information about this window.)

Edit a Suicide Form (EF)
Use the EF action to change a selected suicide form.

1. At the “Select Item(s)” prompt, type EF.
2. At the “Select Suicide Reporting Form List” prompt, type the number of the suicide form to change.
3. The application displays the Updating IHS Suicide Form window.
8. Date of Act: DEC 24, 2006  11. Community where act Occurred:
17. Substance Use Involved:  18. Location of Act: HOME OR VICINI
19. Contributing Factors (press enter):
20. Disposition: IN-PATIENT MENTAL HEALTH TREATMENT (VOLUNTARY)
21. Other Relevant Information:
_______________________________________________________________________________

COMMAND: Press <PF1>H for help Insert

Figure 11-3: Sample Updating IHS Suicide Form window

The underlined fields are required.

4. At the “Local Case #” prompt, type a local case number generated by the site (1–20 characters).

5. At the “Provider” prompt, type the name of the provider reporting this suicide case (the provider completing the form).

6. At the “Employment Status” prompt, type the employment status of the patient. Use one of the following: P (part-time), F (full-time), S (self-employed), UE (unemployed), R (retired), ST (student), SE (student and employed), or UNK (unknown).

7. At the “Date of Act” prompt, type the date of the suicide act. The default is the current date (can be changed).

8. At the “Community where act Occurred” prompt, type the name of the community where the suicide act occurred.

9. At the “Relationship Status” prompt, type the relationship status. Use one of the following: 1 (single), 2 (married), 3 (divorced/separated), 4 (widowed), 5 (cohabiting/common law), 6 (same sex partnership), 9 (unknown).

10. At the “Education” prompt, type the level of patient’s education. Use one of the following:
    - 1 – Less than 12 years
    - 2 – High School Graduate/GED
    - 3 – Some College/Technical School
    - 4 – Collage Graduate
    - 5 – Post Graduate
If you use the “Less than 12 years” option, the application asks for the following information:

a. At the “If less than 12 years, highest grad completed” prompt, type any whole number between 0 and 11.

The following fields are on the **Updating IHS Suicide Form** window.

11. At the “Suicidal Behavior” prompt, type the suicidal behavior for the suicide act. Use one of the following:

- 1 – Ideation W/ Plan and Intent
- 2 – Attempt
- 3 – Completed Suicide
- 6 – Att’d Suicide w/ Att’d Homicide
- 7 – Att’d Suicide w/ Compl Homicide
- 8 – Compl Suicide w/ Att’d Homicide
- 9 – Compl Suicide w/ Compl Homicide

12. At the “Method (press Enter)” prompt, press Enter to access the following pop-up.

![Figure 11-4: Sample fields on the pop-up](image)

- At the “Method” prompt, type a suicide method. More than one can be used.
  - 1 – GUNSHOT
  - 2 – HANGING
  - 3 – MOTOR VEHICLE
  - 4 – JUMPING
  - 5 – STABBING/LACERATION
  - 6 – CARBON MONOXIDE
  - 7 – OVERDOSE
  - U – UNKNOWN

If you use **Other** in the **Method** field, the application asks the following information:
b. At the “Please describe the “OTHER” Method” prompt, type the text of the other method using between 1 and 40 characters.

The following fields are on the **Updating IHS Suicide Form** window.

13. At the “Previous Attempts” prompt, type the number/character of previous suicide attempts. Use one of the following:

- 0 – 0
- 1 – 1
- 2 – 2
- 3 – 3 or more
- U – Unknown

14. At the “Substance Use Involved” prompt, type the substance use involved in the suicide act. Use one of the following: 1 (none), 2 (alcohol and other drugs), U (unknown).

If you use 2, the application displays the list of drug choices type.

<table>
<thead>

FACTOR:
FACTOR:
FACTOR:

Figure 11-6: Fields on the pop-up

a. At the “Factor” prompt, type the contributing factor. More than one can be used.

You cannot enter UNKNOWN if other legitimate values have already been entered. If you want to enter UNKNOWN, first delete (using the at symbol “@”) all other entries (the application confirms the deletion).

If you use OTHER at the FACTOR prompt, the application asks the following information:

b. At the “Enter a brief description of the ‘Other’ Contributing Factor” prompt, type a brief description, using 1–40 characters.

The following fields are on the Updating IHS Suicide Form window.

17. At the “Disposition” prompt, type the disposition of the suicide act.

If using OTHER at the Disposition prompt, the application asks the following information:

• At the “Disposition If Other” prompt, type the disposition, using 1–80 characters.

The following fields are on the Updating IHS Suicide Form window.

18. At the “Other Relevant Information” prompt, press Enter to access another window where you populate the field with text of the other relevant information about the suicide act.

After you leave the suicide form and if there are any missing data, the application lists what is missing and what actions you can take:

Select one of the following:

E        Edit and Complete the Form
D        Delete the Incomplete Form
L        Leave the Incomplete Form as is and Finish it Later

What do you want to do: E//

Figure 11-8: List of actions you can take

Type E to return to the form where you can edit and complete it.

Type D to delete the form (there is no confirmation).

Type L to leave the form incomplete (as is) and finish it later.

**Display a Suicide Form (DF)**

Use the DF action to display a specified suicide form.

1. At the “Select Item(s)” prompt, type DF.
2. At the “Select Suicide Reporting Form List” prompt, type the suicide form to display.
3. At the “Do you wish to” prompt, type one of the following: P (print output) or B (browse output on screen)

The form displays where you can browse the Suicide Reporting Form on the screen.

**Delete a Suicide Form (XF)**

Use the XF action to remove a selected suicide form record.

1. At the “Select Item(s)” prompt, type XF.
2. At the “Select Suicide Reporting Form List” prompt, type the suicide form to remove.
3. At the “Are you sure you want to delete this suicide form?” prompt, type Y (yes) to delete the suicide form or N (no).

**Browse Visits for this Patient (BV)**

Use the BV action to browse the BH visits for the current patient.

1. At the “Select Item(s)” prompt, type BV.
2. At the “Browse which subset of visits for <patient name>” prompt, type one of the following: L (patient’s last visit), N (patient’s last n visits), D (visits in a date range), A (All of this patient’s visits), or P (visits to one program). If N, D, or P are used, other prompts will display.

   a. If N was used, type the number of visits at the “How many visits should be displays: (1–99)” prompt.
   b. If D was used, type the beginning date of visit and ending date of visit at the “Enter Beginning Date of Visit” and “Enter Ending Date of Visit” prompts.
   c. If P was used, type the program to use at the “Visits to Which Program” prompt.

The BROWSE PATIENT'S VISITS window displays.

---

**Figure 11-10: Sample Browse Patient’s Visits window**

At the “Select Action” prompt, do one of the following:

- Type a plus sign (+) to view the next screen (does not apply to the last screen)
- Type a hyphen (−) to view the previous screen (does not apply to the first screen)
- Type Q to quit.

**Health Summary for this Patient (HS)**
Use the HS to display/print a particular health summary for the current patient.

1. At the “Select Item(s)” prompt, type **HS**.

2. The health summary for this patient displays on the **Output Browser** window.

Tribe: CHEROKEE NATION, OK  Community: MOAB

---
The phrase “[Incomplete Form]” at the end of the suicide form record represents the Incomplete Suicide Reporting Form.

Section 11.1.1 provides more information about the add/edit/delete functions on this window.

11.2 Suicide Form Window (GUI)

The suicide form options are located under the Suicide Reporting Forms category on the tree structure for the RPMS Behavioral Health System (GUI) application.

One way to access the Suicide Form window is to select the One Patient option.
Note You can access this window if you click the Suicide Form tab on the Visit Data Entry – Add/Edit window.

The application displays the Suicide Form window for One Patient. If you access the Suicide Form for one patient window and there is no current patient, you will be prompted to select one.

Figure 11-14: Suicide Form window for one patient

Another way to access the Suicide Form window is to select the All Patients option. The application displays the Suicide Form window for All Patients.

Figure 11-15: Sample Suicide Form window for all patients

Both windows function in the same way.

Table 11-2 provides information about the features of these windows.

Table 11-2: Suicide Form window features and functionality

<table>

<tr>
<td><strong>Print Button</strong></td>
<td>Click this button to output the highlighted suicide form record. After clicking <strong>Print</strong>, the application displays the first page of the <strong>Suicide Reporting Form</strong> pop-up window.</td>
</tr>
</tbody>
</table>

The following applies to the **Print** button.
11.3 Add/Edit Suicide Form (GUI)

1. Click **Add** to add a new suicide record. The **Suicide Form Data Entry – Add Suicide Form** displays.

   OR

2. Select a record to change and click **Edit**. The **Suicide Form Data Entry - Edit Suicide Form** displays.

Below are the fields on the **Suicide Form Data Entry - Add Suicide Form** window. (The same fields display on the **Suicide Form Data Entry - Edit Suicide Form** window.)
All fields except the Local Case Number and the Narrative are required in order to save. Attempting to save with incomplete fields results in the application displaying the Required information message.

- Click Yes to save the form and complete it later; the focus returns to the Suicide Form window.
- Click No to not save; the focus remains on the data entry form.

Table 11-3 provides information about the buttons on this window.
<table>
<thead>
<tr>
<th>Button</th>
<th>Functionality</th>
</tr>
</thead>
<tbody>
<tr>
<td>Close</td>
<td>Use this button to display the <strong>Continue?</strong> dialog. This dialog states: Unsaved Data Will Be Lost, Continue? Click <strong>Yes</strong> to not save; this dismisses the add window. Click <strong>No</strong> and the focus remains on the add window where you can continue work on the suicide form.</td>
</tr>
</tbody>
</table>

11.3.1 Suicide Form Fields

![Suicide Form](image)

Figure 11-19: Fields on suicide form

The required fields are in bold text.

1. At the **Local Case Number** field, type the local case number or a health record number, if any (limited to 20 characters). This is a Free Text field.

2. At the **Provider** field, select the provider. For a new record, the application automatically populates this field with the current logon provider. To change click the list to access the **Provider** search window where you search for the provider name.
<table>
<thead>
<tr>
<th>Screen Capture</th>
<th>What to Do</th>
</tr>
</thead>
</table>
| ![Provider search window](image) | Use this search window in one of two ways:  
(1) Use the **Search String** field by typing the community name and clicking **Search**. The retrieved names will populate the **Provider** list box. Select a retrieved record and click **OK** to populate the **Provider** field. Otherwise, click **Close**.  
(2) Select a name in the **Most Recently Selected** list box and click **OK** to populate the Provider field. Otherwise, click **Close**. |

3. At the **Date of Act** field, select the date of the act. For a new record, the current date displays. To change click the list to access a calendar where you select another date.

4. At the **Community Where Act Occurred** field, select the community where the act occurred. To change click the list to access the **Community** search/select window where you search for the community name.
Use this search window in one of two ways:
(1) Use the Search String field by typing the community name and clicking Search. The retrieved names will populate the Community list box. Select a retrieved record and click OK to populate the Community Where Act Occurred field. Otherwise, click Close.
(2) Select a name in the Most Recently Selected list box and click OK to populate the Community Where Act Occurred field. Otherwise, click Close.

5. At the Relationship Status field, select the patient’s relationship status. Use one of the following:

- Single
- Married
- Divorced/Separated
- Widowed
- Cohabitng/Common Law
- Same Sex Partnership
- Unknown
6. At the **Education field**, select the level of education of the patient. Use one of the following:
   - Less than 12 years
   - High School Graduate/GED
   - Some College/Technical School
   - Collage Graduate
   - Post Graduate
   - Unknown

7. At the **Employment Status** field, select the status of the patient’s employment. Click the list and select one of the options.
   - PART TIME
   - FULL TIME
   - UNEMPLOYED
   - RETIRED
   - STUDENT
   - STUDENT AND EMPLOYED
   - UNKNOWN

8. At the **If less than 12 years, highest grade completed** field, type the highest grade the patient completed (0–11). This field becomes active when you populate the Education field with “Less than 12 years.”

9. At the **Suicidal Behavior** field, select the type of suicidal activity. Click the list and select one of the options.
   - IDEATION W/ PLAN AND INTENT
   - ATTEMPT
   - COMPLETED SUICIDE
   - ATT’D SUCICIE W/ATT’D HOMICIDE
   - ATT’D SUICDIE W/COMPL HOMICIDE
   - COMPL SUICIDE W/ATT’D HOMICIDE
   - COMPL SUICIDE W/COMP’L HOMICIDE

10. At the **Location of Act** field, select the location of the suicidal act. Click the list and select one of the options.
    - HOME OR VICINITY
- SCHOOL
- WORK
- JAIL/PRISON/DETENTION
- TREATMENT FACILITY
- MEDICAL FACILITY
- OTHER
- UNKNOWN

11. At the **Previous Attempts** field, select the previous suicide attempts. Select one of the options available from the list.

- 0
- 1
- 2
- 3 OR MORE
- UNKNOWN

12. At the if other field, type where the suicidal act occurred (limited to 80 characters). This field becomes active if you populate the Location of Act field with ‘Other’. This is a Free Text field.

13. At the **Disposition** field, select the disposition of the suicide act. Click the list to access the **Disposition** select window.
### What to Do

Use this window as follows:

1. Select a Disposition option and click **OK**; the selected option populates the **Disposition** field.
2. If **Other** was selected, the field to the right becomes active. Populate this **Free Text** field with the disposition of the suicide act (limited to 80 characters).

---

**Figure 11-22: Disposition select window**

### 11.3.2 Method Tab

Use the **Method** tab to indicate the method used in the suicide act as well as indicate the substance used in overdose cases.

---

**Figure 11-23: Method tab**
Method Group Box

1. Select one or more check boxes in this group box that describe the method used in the suicide act. At least one is required.

2. Select the **Overdose** check box and the **Substance** multiple select window displays where you can add one or more categories of substances.

![Substance multiple select window](image)

Figure 11-24: **Substance** multiple select window

Use this search window as follows:

a. Select an option in the **Substance** list box.

b. Click the right arrow button to add it to the **Selected Item Substance** list box.

c. Likewise, select an option in the **Selected Item Substance** list box and click the left arrow button to remove the option.

d. When the **Selected Item** list box is complete, click **OK** and the options populate the **Overdose** group box.

3. When this window is complete, click **OK**. This action adds the substances to **Overdose** group box.
• If you select a substance with OTHER in its name and then click OK, the OTHER dialog displays.

![OTHER ANTIDEPRESSANT](image)

Figure 11-25: Other dialog

You must populate the Other Free Text field (limited to 80 characters) with a description of the other substance. Click OK. The description populates the Substance If Other cell on the Overdose group box.

4. If you select the Other check box, the field below the check box becomes active. Populate this Free Text field with text that describes the method used in the suicide act (limited to 80 characters).

5. If you select the Overdose checkbox under Method, the Overdose group box becomes available. The Substance multi-select window displays.

![Substance multi-select window](image)

Figure 11-26: Substance multi-select window
Use this search window as follows:

a. Select an option in the **Substance** list box.
b. Click the right arrow button to add it to the **Selected Item Substance** list box.
c. Likewise, select an option in the **Selected Item Substance** list box and click
   the left arrow button to remove it.
d. When the **Selected Item** list box is complete, click **OK** and the options
   populate the Overdose list box. (Otherwise, click **Cancel**.)

**Overdose Group Box**

This group box contains the categories of substances used in the overdose suicidal
act. Once it is populated, the **Add**, **Edit**, and **Delete** buttons become active.

You can add, edit, or delete overdose substances.

**Delete Button**

1. Select a substance to delete.
2. Click **Delete**.
3. At the “Are you sure” confirmation message, click **Yes** to delete. (Otherwise,
   click **No**.)

**Edit Button**

1. Highlight the record with data in the “Substance if Other” column.
2. Click **Edit**.
3. The **Other Antidepressant** dialog displays.
   
   a. Change the antidepressant substance in the field.
   b. Click **OK** to change the record.
4. The application displays the current “Substance If Other” data in the **Other**
   field. You can change the data, as needed. Click **OK** to dismiss the **Other**
   dialog.

**Add Button**

1. Click **Add**.
2. The **Substance** multiple select window where you can add one or more substances.

![Substance multi-select window](image)

Figure 11-28: **Substance** multi-select window

Use this search window as follows:

a. Select one or more substances in the **Substance** list box.
b. Click the right-point arrow to add them to the **Selected Item Substance** list box.
c. Likewise, select a substance in the **Selected Item Substance** list box and click the left-point arrow to remove the substance.
d. When the **Selected Item Substance** list box is complete, click **OK** and the substances populate the **Overdose** group box. (Otherwise, click **Close**.)

3. If you select a substance with **Other** in the title on the **Substance** multiple select window, the application displays the **Other** dialog.
Figure 11-29: **Other** dialog

a. Type the substance used in the overdose (limited to 80 characters). This is a Free Text field.

b. Click **OK** to populate the substance used in the **Substance If Other** column on the grid.

### 11.3.3 Substance Use Tab

Use the **Substance Use** tab to indicate the substances involved in the suicide incident as well as the categories of the substances involved.

![Substance Use tab](image)

**Substances Involved This Incident Group Box**

1. Select one of the checkboxes in this group box that describes the substance used in the suicide act. At least one is required.

![Substances Involved This Incident](image)

2. If you select the **Alcohol and Other Drugs** checkbox, the application displays the **Substance** multiple select window where you can add one or more substances.
Use this search window as follows:

a. Select one or more substances in the Substance list box.

b. Click the right arrow button to add them to the Selected Item Substance list box.

c. Likewise, select a substance in the Selected Item Substance list box and click the left arrow button to remove the substance.

d. When the Selected Item Substance list box is complete, click OK and the substances populate the Overdose group box. (Otherwise, click Close.)

3. If you select the Other option (on the Substance multiple select window), the application displays the Other dialog.
a. Type the name of the “other substance” in the field (limited to 80 characters).

b. When this dialog is complete, click OK to have the substance populate the Substances Involved list box. What appears in the Other field will populate Substance If Other column.

If you uncheck the Alcohol and Other Drugs checkbox, this action clears any data in the Substances Involved list box.

### 11.3.3.1 Substances Involved Group Box

![Substances Involved group box]

This group box contains the substances used immediately before or during the suicidal act. Once the Alcohol and Other Drugs checkbox is selected, the Add, Edit, and Delete buttons become active.

**Add Button**

Use the Add button to add one or more new records.

1. Click Add.

2. The Substance multiple select window where you can add one or more substances.
Use this search window as follows:

a. Select one or more substances in the Substance list box.

b. Click the right arrow button to add them to the Selected Item Substance list box.

c. Likewise, select a substance in the Selected Item Substance list box and click the left arrow button to remove the substance.

d. When the Selected Item Substance list box is complete, click OK and the substances populate the Substances Involved group box. (Otherwise, click Close.)

3. If you selected Other on the multiple select window, the application displays the Other dialog.
Figure 11-36: Other dialog

a. Type the name of the “other substance” in the field (limited to 80 characters).
b. When this dialog is complete, click OK to have the substance populate the Substances Involved list box. What appears in the Other field will populate Substance If Other column.

Edit Button
Use the Edit button with OTHER records (Substance If Other column is populated).

1. Highlight the record to edit.
2. Click Edit.
3. The Other dialog displays. Change the Other field and then click OK (otherwise, click Close). The OK function changes the data in the Substance If Other column.

Delete Button
Use the Delete button to remove a highlighted substance record.

1. Highlight the record to delete.
2. Click Delete.

On the Are You Sure confirmation, click Yes to delete the highlighted substance record. (Otherwise, click No.)

11.3.4 Contributing Factors Tab
Use the Contributing Factors tab to indicate one or more contributing factors associated with the suicide act.

Figure 11-37: Contributing Factors tab
1. Select one or more check boxes that define the contributing factors to the suicide act. At least one is required.

2. If you select the Other checkbox, the field below the checkbox becomes active. Use this Free Text field to describe the “other” contributing factor (limited to 80 characters).

11.3.5 Narrative Tab

Use the Narrative tab to populate the Other Relevant Information Free Text field. (This is not a required field.)

![Figure 11-38: Other Relevant Information field](image)

Populate this field with data that is not included elsewhere. This is not where you put the SOAP or progress note.
12.0 Intake

This section addresses how to manage intake/update documents in roll and scroll and the GUI.

12.1 Intake Document (Roll and Scroll)

One place you can add/change/remove an intake document the Intake Document (ID) option on the Patient Data Entry window.

![Sample Patient Data Entry window](image)

At the “Select Action” prompt, type ID. The application asks which Program you are associated. Then the Updated BH Intake Document window displays.

The other place to add, change, or remove an intake document is when exiting the visit encounter (display or add/edit) window. After exiting the last screen, the application displays the OTHER INFORMATION window.

******** OTHER INFORMATION ********

Update, add or append any of the following data

1). Update any of the following information:
   Designated Providers, Patient Flag
2). Patient Case Open/Admit/Closed Data
3). Personal History Information
4). Appointments (Scheduling System)
5). Treatment Plan Update
6). Print an Encounter Form
7). Add/Update/Print Intake Document
8). Add/Update Suicide Forms
9). Problem List Update
10) None of the Above (Quit)
Choose one of the above: (1-10): 7//

Figure 12-2: Options on the Other Information menu

Use option 7 (Add/Update/Print Intake Document) to access the Update BH Intake Document for the selected visit. You will be prompted for a Program. After specifying the program, the Update BH Intake Document for the current patient displays.

```

U Add/Edit Update Q Quit
Select Action: Q//
```

Figure 12-3: Sample Update BH Intake Document window

Use the Q (quit) option to exit the **Update BH Intake Document** window.

The asterisk (*) in the first column indicates that the record contains an unsigned intake/update document.

Please note the following information about intake and update documents on the **Update BH Intake Document** window:

- The intake documents are listed on the left side (under the Date Initiated, Program, and Initial Provider columns).
- The update documents are listed on the right side (under the Date Updated and Update Provider columns).
12.1.1 Add Initial Intake (I)

Use option I to create an initial intake document for the visit.

1. At the “Select Action” prompt, type I.

The application displays a message that it is adding the Intake document for the patient.

2. At the “Do you wish to continue and add the Initial Intake document?” prompt, type Y to add the Intake document (otherwise, type N)

If Y was used, the prompts continue.

3. At the “DATE” prompt, press Enter to use the default date which is the current date (you can change). This cannot be a future date.

4. At the “PROGRAM” prompt, press Enter to accept the default (Mental Health). Otherwise, type the program to use.

5. At the “PROVIDER” prompt, press Enter to accept the default provider (you can change).

6. At the “DATE LAST UPDATED” prompt, press Enter to use the default which is the current date (you can change). This cannot be future date.

7. At the “NARRATIVE - No Existing Text - Edit?” prompt, type Y to edit the narrative or N to not edit the narrative.

If N was used, the application creates the Intake document. You must enter the Intake narrative before you can electronically sign the intake document. The application then prompts if you want to enter an Intake Narrative (Y or N). If N was used, the focus returns to the Update BH Intake Document window.

If Y was used, the focus moves to another window to enter the text of the narrative.

---\[ WRAP \]---\[ INSERT \]=======< SUBJECTIVE/OBJECTIVE =======[ \<PF1\>H=Help ]====

<=-------T=--------T=-------T=-------T=-------T=-------T=-------T=-------T>=-------

Figure 12-4: Screen to enter text
Table 12-1 lists the most commonly used RPMS text editor commands.

Table 12-1: Common RPMS text editor commands

<table>
<thead>
<tr>
<th>Action Needed</th>
<th>Use These Keys</th>
</tr>
</thead>
<tbody>
<tr>
<td>Delete a line (extra blank or text)</td>
<td>PF1(F1) followed by D</td>
</tr>
<tr>
<td>Join two lines (broken or too short)</td>
<td>PF1(F1) followed by J</td>
</tr>
<tr>
<td>Save without exiting</td>
<td>PF1(F1) followed by S</td>
</tr>
<tr>

<td>PF1(F1) followed by E</td>
</tr>
<tr>
<td>Quit without saving</td>
<td>PF1(F1) followed by Q</td>
</tr>
<tr>
<td>Top of text</td>
<td>PF1(F1) followed by T</td>
</tr>
</tbody>
</table>

After you save and exit, the prompts continue.

8. At the “Enter your Current Signature Code” prompt, do one of the following:
   - Type your electronic signature to sign the document. This action marks the document as signed. You cannot edit it.
   - Press Enter to not sign the document. The document is marked as not signed. You can edit it.

12.1.2 Edit Initial Intake (E)

Use option E to change the selected initial intake document.

   - Only the original intake provider or the person who entered the intake document can edit the document; other providers can only view or print the document.
   - Editing an initial intake that was created before the installation of BHS v4.0 will result in a prompt to enter the program associated with the intake.

1. At the “Select Action” prompt, type E.

2. At the “CHOOSE” prompt, type 1 (Edit Initial Intake Document) or 2 (Quit). If 2 was used, the focus returns to the Update BH Intake Document. If 1 was used, the prompts continue.

3. At the “Select Intake” prompt, type the number of the intake document to edit.
   - If the specified intake document has been signed, you cannot edit it.
   - If you are not the original author or the person who entered this document, you cannot edit it.

4. At the “DATE” prompt, press Enter to use the default (the current date). Otherwise, you can type another date (cannot be a future date).
5. At the “PROGRAM” prompt, type the program associated with the intake displays.

6. At the “PROVIDER” prompt, type the author of the initial intake document.

7. At the “DATE LAST UPDATED” prompt, press Enter to use the default (the current date). Otherwise, type a new date (cannot be a future date).

8. At the “NARRATIVE - No Existing Text - Edit?” prompt, type Y (yes) to edit the narrative or N (no) to not edit the narrative.

In order to edit the narrative, you must be the original provider or the person who entered or modified the document.

If N was used (for step 8), the application displays that the Intake document was created and that an intake narrative must be entered before an electronic signature can be applied. Then the application asks if you want to enter an Intake Narrative (Y or N). If Y was used, the focus returns to the “Narrative” prompt (as above). If N was used, the focus returns to the Update BH Intake Document window.

If Y was used (for step 8), the focus moves to another window where you enter the text of the narrative.

==[ WRAP ]==[ INSERT ]========< SUBJECTIVE/OBJECTIVE >========[ <PF1>H=Help ]=====

<========T==========T==========T==========T==========T==========T==========T==========T>

Figure 12-5: Screen to enter text

See Table 12-1 for commonly used RPMS text editor commands.

After you save and exit this window, the prompts continue:

9. At the “Enter your Current Signature Code” prompt, do one of the following:
- Type your electronic signature to sign the document. This action marks the document as signed. You cannot edit it.
- Press Enter to not sign the document. The document is marked as not signed. You can edit it.

12.1.3 Add/Edit Update (U)

Use option U to create a new update to a particular intake document or edit an existing, unsigned one where you are the provider.

- Only the person who originally entered the Intake document or the Intake document Provider can edit the document
- Other providers can only view or print the document.

1. At the “Select Action” prompt, type U.

2. At the “Select Intake” prompt, type the number of intake document to use.

The following message displays:

You can either add a new Update to this Intake document or edit an existing, unsigned one on which you are the provider. Please select an Update to edit or choose 1 to add a new one or 0 to quit.

0    Quit/Exit Update
1    Add new Update document
Select Action:  (0-1): 0/

Figure 12-6: Message from the application

3. At the “Select Action” prompt, you can either add a new update to this intake document, quit/exit the update process, or use the option to edit the Update.
   - If the Quit option was used, you leave the add/edit process.
   - If the Add New Update document option was used, the prompts continue. The application displays a message that it is adding the Intake Update document for the patient.

4. At the “Do you wish to continue on to add the Intake Update?” prompt, type Y (yes) or N (no). If Y was used, the prompts continue.

5. At the “DATE” prompt, press Enter to use the default (current date). Otherwise, type a new date (cannot be a future date).

6. At the “PROVIDER” prompt, Press Enter to use the default provider. Otherwise, type the name of the provider for the update document.

7. At the “DATE LAST UPDATED” prompt, press Enter to use the default (current date). Otherwise, type a new date (cannot be a future date).
8. At the “NARRATIVE” prompt, the application displays the text of the narrative or displays “no existing text” if there is none.

9. At the “Edit?” prompt, type Y (yes) to edit the text of the narrative or N (no) to not edit the narrative.
   a. If N was used, the application creates the Intake Update document and displays the message that the narrative must be entered before an Electronic Signature must be applied. At the “Do you wish to enter an Intake Narrative?” prompt, type Y (yes) or N (no).
   b. If Y was used, the focus moves to another window where you enter the text of the narrative.

![Figure 12-7: Screen to enter text](image)

See Table 12-1 for commonly used RPMS text editor commands.

After you save and leave this window, the application displays the next prompt.

10. At the “Enter your Current Signature Code” prompt, do one of the following:
   - Type your electronic signature to sign the document.
   - Press Enter to not sign the document

If you press Enter, you can either add a new update to this intake document or edit an existing, unsigned one on which you are the Provider or the person who entered the Intake Document. The application displays the next prompt:

11. At the “Select Action” prompt, do one of the following:
Figure 12-8: Prompts for the actions to take

If 0 was used, the focus returns to the Update BH Intake Document window.

If 2 was used, this action has the same prompts as Add/Edit Update (Section 12.1.3 provides more information).

If 1 was used, the following prompts display:

a. At the “Date Updated” prompt, type the date the document was updated.

b. At the “Provider” prompt, type the name of the provider who updated the document.

Delete Intake/Update (D)

Use option D to do one of the following:

- Delete Intake/Update
- Display/Print Intake/Update

12.1.4 Delete Intake/Update

You can delete only unsigned Intake documents you entered or on which you are the provider, unless you possess a special key or are listed on the Delete Override list.

12. At the “Select Intake” prompt, type the number of the Initial Intake to delete, or the Initial Intake with the Update to delete.

The application gives you the following choices:

Figure 12-9: Actions to take

If 0 was used, the focus returns to the Update BH Intake Document window.

If 1 was used, the application displays information about the intake document, including its narrative. Then the next prompt displays:

13. At the “Are you sure you want to delete this Initial Intake document?” prompt, type Y (yes) or N (no).

If there are multiple documents you want to delete, the application repeats the process.
Display/Print Intake/Update

This action is the same as using option P on the Update BH Intake Document window. Section 12.1.5 provides more information about the print process.

12.1.5 Print Intake Document

Use option P to print/browse a particular intake document.

1. At the “Select Action” prompt, type P.
2. At the “Select Intake” prompt, type the number of the document to display/print.
3. At the “What would you like to print” prompt, type I (Intake document only), U (Update document only), B (both the Intake and Update documents), or Q (quit/exit).
   a. If Q was used, the focus returns to the previous window.
   b. If U was used, another menu is displayed listing each of the updates and an option to print all updates or quit.
   c. If B was used, the application will display a list of options. At the “Which Updates would you like to Print” prompt, type the number of the option to use.
4. At the “Do you wish to” prompt, type P to print output on paper or B browse output on screen.

Below is sample Intake only report.

Date Established:   MAY 12, 2009
Author/Provider:    THETA,SHIRLEY
Program:            MENTAL HEALTH
Type of Document:   INITIAL

Intake Documentation/Narrative: This is a 34-year old female requesting antidepressant medications, stating that she ran out of her previous prescription since moving back to the reservation.

________________________________________            __________________
DATE                                                                                   DATE
12.2 Intake (GUI)

There are two ways to work with the Patient Intake documents in the GUI:

Method 1: Use the Intake option on the GUI tree structure.

Method 2: Use the Intake tab on the Add/Edit Visit Data Entry window.

Either method accesses the same Intake window.

The following provides information about using the Intake option on the GUI tree structure.

The Intake option applies to the current patient. After selecting the Intake option, the Select Program dialog displays.

![Select Program dialog]

1. At the Program field, click the list for the Program field and select an option.

2. Click OK (otherwise click Close).

The OK process displays the Intake window listing the intake documents for the particular program for the current patient. The current patient’s name appears in the lower left corner of the window.

**Note:** The following window is the window that displays when you click the Intake tab on the Add/Edit Visit Data Entry window.
The asterisk (*) in the first column indicates that the particular record contains an unsigned intake/update document.

Use the Help button to access the online help for this window.

### 12.2.1 Patient Intake Documents List Box

The Patient Intake Documents list box displays the names of the current patient’s intake documents and update documents (view only). You can distinguish the documents in the following manner:

- The intake documents are listed on the left side of the grid (under the **Date Initiated**, **Program**, and **Initial Provider** columns).
• The update documents are listed on the right side of the grid (under the **Date Updated** and **Update Provider** columns).

As you highlight a record in the **Patient Intake Documents** list box, the text of the document displays in the **Intake** group box.

All initial documents and updates created before the BHS v4.0 installation will remain unsigned and editable. The initial provider associated with the intake will be the provider for the intake document. Any edits or updates completed after the installation date will be subject to all business rules added in BHS v4.0.

### 12.2.2 Add Initial Intake

Use the **Add Initial Intake** button to add a new initial intake document.

1. Click **Add Initial Intake** to access the **Select Intake Parameters** dialog.

![Figure 12-14: Select Intake Parameters dialog](image)

2. At the Intake Date field, the current date displays. Change this by clicking the list and selecting another date from the calendar (cannot be a future date).

3. At the Program field, the default program displays (the one selected when you first accessed the Intake menu). You can change this by clicking the list and selecting another option.

   **Note:** If you change the Program, it will not be visible when you return to the list view. You have to back out of the Program selection screen again and select the Program associated with the document you just entered. We encourage you to NOT change the program. It is actually more efficient to back out and enter the correct program initially.

4. At the Provider field, the current login provider name displays. You can change this by clicking the list to access the **Primary Provider** search/select window.
5. At the **Date Last Updated** field, the current date displays. Change this by clicking the own list and selecting another date from the calendar (cannot be a future date).

After completing the **Select Intake Parameters** dialog, click **OK** (otherwise, click **Close**). The **OK** function activates the Intake group box. Section 12.2.3 provides more information about this group box.
12.2.3 Intake Group Box

Figure 12-16: Sample of active Intake group box

When the Intake group box is active, use it to type the text of the document (intake or update). This text is the narrative for the document.

To exit the Intake group box, click Cancel to cause the Intake group box to become inactive.

After you have completed the Intake group box, click Save (otherwise click Close).

- If Close was used, the Continue? message displays: Unsaved Data Will Be Lost, Continue? Click Yes to lose any data and the focus returns to the GUI tree structure. Click No and the focus returns to the Intake group box.
- If Save was used, the Intake Electronic Signature dialog displays. The Save process requires that there is intake narrative.

Figure 12-17: Intake Electronic Signature dialog

To sign the particular document, do the following:

a. At the Electronic Signature field, type your electronic signature.

b. Click OK. This saves the document and marks it as signed. Signing a document locks the document from any future edits.

To not sign the particular document, do the following:

c. At the Electronic Signature field, do not type your electronic signature.

d. Click Close.
e. Click **Yes** or **No** at the **Are You Sure?** dialog display, which states: “Are you sure you want to Close without Electronically Signing the Intake?”.

- Click **Yes** to not sign it and to save the document marked as not signed. The application displays the Message: “You did not Electronically Sign the Intake.” Click **OK** to dismiss the message. This type of document can be edited.

Click **No** and the focus returns to the **Intake Electronic Signature** dialog.

### 12.2.4 Edit Initial Intake

Select an existing initial intake document and click the **Edit Initial Intake** button to edit the initial intake document.

- If the selected document has been signed, the application displays the Message: This Initial Intake document has been signed. You cannot edit it. Click **OK** to dismiss the message and you exit the edit process.

- Only the provider or the person who entered the intake can edit it; otherwise, the application displays the Message: You are not the provider or the person who entered the Intake, you cannot edit it. Click **OK** to dismiss the message and you exit the edit process.

If you are the provider or the person who entered the intake, the application displays the **Select Intake Parameters** dialog. Section 12.2.2 provides more information the add initial intake process. After completing this dialog, the text of the initial intake document will display in the Intake area of the Intake window. Section 12.2.3 provides more information about the intake group box.

### 12.2.5 Add/Edit Update

This button has two different labels, depending on the action you take.

**Note:** If you select a signed Update document, the button reads **Edit Update**. After you click the **Edit Update** button, the application displays the message: This Intake Update document has been signed. You cannot edit it. Click **OK** to dismiss the message and exit the edit process.

After the Provider locks the document using the electronic signature, it cannot be edited or deleted unless the user possesses the appropriate security key or is listed on the Delete Override Site Parameter.

If you select an Intake document (signed or unsigned), the button reads: **Add Update**.

If you select an unsigned Update document, the button reads: **Edit Update**.
In either case, the application displays the **Select Intake Parameters** dialog. Section 12.2.2 provides more information about Add Initial Intake.

After completing this dialog, the **Intake** group box will become active. Section 12.2.3 provides more information about the **Intake** group box.

### 12.2.6 Delete Intake

Use the **Delete Intake** button to delete a selected unsigned Intake document (in the **Patient Intake Documents** group box).

1. Select an unsigned Intake document to delete.
2. Click **Delete Intake**.
3. On the **Are You Sure** confirmation message, click **Yes** to delete (otherwise, click **No**).
   - Only the intake Provider or the person who entered the selected intake can use the Delete function. However, when a person is listed in the Delete Override section on the Site Parameters menu (in RPMS), that person can delete the document.

If the selected Intake document has an attached update document, the application displays the message: This intake document has updates associated with it. It cannot be deleted at this time. Click **OK** and you exit the Delete process.

### 12.2.7 Display/Print Intake

Use the **Display/Print Intake** button to access the options for the display/print process.

![Display/Print Intake Options](image)

Figure 12-18: Options on the **Display/Print Intake** button

1. Highlight an Intake record and select one of options (only the valid options will be highlighted).
If you select **Update Document Only** or **Both the Intake and Update Documents**, the application displays the **Intake Updates** dialog.

Check the records you want to include in the output and click **OK** (otherwise, click **Close**).

The first page of the **Intake** (for the current patient) pop-up displays.
Figure 12-20: Intake pop-up window

Section 2.6 provides more information about using the controls on this type of window.
13.0 Reports (Roll and Scroll Only)

The Reports menu of the Behavioral Health system provides numerous options for retrieving data from the patient file. You can obtain specific patient information and tabulations of records and visits from the database. The system provides options for predefined reports and custom reports.

The Reports menu (Figure 13-1) contains several different submenus that categorize the reports by type. The first four submenus contain report options specific to the Behavioral Health System. Use the last submenu to print standard tables applicable to this package. Each of these submenus and their report options are detailed in the following sections.

Select Reports Menu Option:

Figure 13-1: Options on Report menu

Use this menu for tracking and managing patient, provider, and program statistics.

Note: The location screen (UU) and the list of Those Allowed to See All Visits found on the site parameters menu will impact the information displayed in the reports. For example, if your name has not been added to the list of those allowed to see all visits, the report will contain only those visits where you were a provider or completed the data entry.

13.1 Patient Listings (PAT)

The Patient Listings submenu (Figure 13-2) contains report options for generating lists of patients by various criteria. Also included is the Patient General Retrieval option, that is a custom report that allows you to select which patients to include in the report as well as the items to print and the sort criteria.
13.1.1 **Active Client List (ACL)**

Use the ACL option to review a list of patients who have been seen in a specified date range. You can further filter the report by a particular provider, if needed.

Below are the prompts.

**Enter beginning Date**

Specify the beginning date of the date range.

**Enter ending Date**

Specify the ending date of the date range.

**Note:** The date range considered should be one in which the patient should be seen in order to be considered active.

Limit the list to those patients who have seen a particular provider?

Type **Y** (yes) or **N** (no). If you type Y, other prompts display.

**Demo Patient Inclusion/Exclusion**

Use one of the following: **I** (include all patients), **E** (exclude demo patients), **O** (include only demo patients).

Do you wish to

Use **P** (print output) or **B** (browse output on screen).

Browse the output on the **Output Browser** window (Figure 13-3).
Figure 13-3: Sample Output Browser data

Near the end of the report, the application displays the total number of patient.

13.1.2 Patient General Retrieval (PGEN)

Use the PGEN option to produce a report that shows a listing of patients based on selected criteria. The patients used on the report can be selected based on any selected print and sort criteria.

Below are the prompts.

Select and Print Patient List from

Use S (search template) or P (patient file). If you use S, other prompts will display.

Do you want to use a PREVIOUSLY DEFINED REPORT?

Use Y or N. If you use Y, other prompts will display.

The application displays the Patient Selection Menu (Figure 13-4).
Figure 13-4: Sample Patient Selection Menu options

Use this menu to select the patients based on various criteria. If you do not specify any criteria (immediately use the Quit Item Selection option), the application selects all patients.

Choose Type of Report

Use one of the following: T (total count only), S (sub-counts and total count), or D (detailed listing). If you select D (the detailed listing), the application displays the Print Item Selection Menu (Figure 13-5).

Figure 13-5: Sample Print Item Selection Menu options

Use this menu to determine the data items on the report. Select the items in the order that you want them to appear on the output. When through selecting, use the Quit Item Selection action to dismiss the menu.

Next, the application displays the Sort Item Selection Menu (Figure 13-6).
Use this menu to determine how the data will be sorted on the report. If you do not select any item (immediately use the Quit Item Selection option), the report will be sorted by patient name.

Do you want a separate page for each Patient Name?
Use Y or N.

Would you like a custom title for this report?
Use Y or N. If you use Y, other prompts will display.

Do you wish to save this search/print/sort logic for future use?
Use Y or N. If you use Y, other prompts will display.

Demo Patient Inclusion/Exclusion
Use one of the following: I (include all patients), E (exclude demo patients), O (include only demo patients).

The application provides a Report Summary that shows the criteria you selected.

Do you wish to
Use P (print output) or B (browse output on screen).

The application first displays the Patient Selection Criteria for the report.

After you move onto the next screen press Enter (to continue), and the application displays the patient listing report (Figure 13-7).
13.1.3 **Designated Provider List (DP)**

Use the DP option to produce the designated mental health provider list report.

Below are the prompts.

Which Designated Provider?

Use one of the following: M (mental health), S (social services), C (chemical, dependency or alcohol/substance abuse), O (other), T (other non-RPMS).

Run Report for

Use one of the following: 1 (one provider) or 2 (all providers). If you use 1, other prompts will display.

Demo Patient/Inclusion/Exclusion

Use one of the following: I (include all patients), E (exclude demo patients), O (include only demo patients).

Do you wish to

Use P (print output) or B (browse output on screen).

The application displays the Designated Mental Health Provider List report (Figure 13-8).
13.1.4 Patients with AT LEAST N Visits (GRT)

Use the GRT option to produce a report that shows a list of patients who have been seen at least N number of times in a specified date range.

Below are the prompts.

Enter beginning Date

Specify the beginning date of the date range.

Enter ending Date

Specify the ending date of the date range.

Enter the minimum number of time the patient should have been seen

Use any number between 2 and 100.

Demo Patient/Inclusion/Exclusion

Use one of the following: I (include all patients), E (exclude demo patients), O (include only demo patients).

Do you wish to

Use P (print output) or B (browse output on screen).

The application displays the patients seen at least N times report (Figure 13-9).
13.1.5 Patients Seen by Age and Sex (AGE)

Use the AGE option to produce a report that tallies the number of patients, who have had an encounter, by age and sex. You will choose the item you want to tally. For example, you can tally problems treated, or activities by age and sex. Any tally by PROBLEM only includes the PRIMARY PROBLEM. You will be able to define the age groups to be used.

Below are the prompts.

Choose an item to tally by age and sex

Use one of the following:

- 1). Program Type
- 2). POV/Problem (Problem Code)
- 3). Problem/POV (Problem Category)
- 4). Problem/POV
- 5). Location of Service
- 6). Type of Contact of Visit
- 7). Activity Code
- 8). Activity Category
- 9). Community of Service

The item you select will display down the left column of the report. Age groups will be across the top.

Enter beginning Visit Date for Search
 Specify the beginning date of the date range.

Enter ending Visit Date for Search
 Specify the ending date of the date range.

The application displays the Visit Selection Menu (Figure 13-10).
as many as you wish, in any order or combination. An (*) asterisk indicates items already selected. To bypass screens and select all Visits type Q.

1) Patient Name           23) Next Case Review Date          45) Axis V

R       Remove Item(s)            -    Previous Screen    E    Exit Report
Select Action: S//

Figure 13-10 Sample Visit Selection Menu

Use this menu to select the visit selection criteria for the report. If you do not select any criteria (immediately use the Quit Item Selection), all visits will be selected.

Do you wish to modify these age groups?

The application displays the currently defined age groups. Answer Y or N to this prompt. If you use Y, other prompts will display. Use N to have the defined age groups listed across the top of the report.

Demo Patient/Inclusion/Exclusion

Use one of the following: I (include all patients), E (exclude demo patients), O (include only demo patients).

Do you wish to

Use P (print output) or B (browse output on screen).

The application displays the criteria for the report. After pressing Enter, the application displays the Behavioral Health Record Listing report (Figure 13-11).

</tr>
</tbody>
</table>

Select Case Status Reports Option:

Figure 13-12: Options on the Case Status Reports menu
13.1.6.1 Active Client List Using Case Open Date (ACO)

Use the ACO option to produce a report that shows a list of patients who have a case open date without a case closed date.

Below are the prompts:

Run the Report for which program

Use one of the following: O (one program) or A (all programs). If you use O, other prompts will display.

Include cases opened by

Use one of the following: A(all provides) or O (one provider). If you use O, other prompts will display.

Demo Patient/Inclusion/Exclusion

Use one of the following: I (include all patients), E (exclude demo patients), O (include only demo patients).

Do you wish to

Use P (print output) or B (browse output on screen).

The application displays the active client list report (Figure 13-13).

![Active Client List Report](image)

13.1.6.2 Cases Opened but Patient Not Seen in N Days (ONS)

Use the ONS option to produce a report that shows a list of patients who have a case open date, no closed date, and have not been seen in N days. The user will determine the number of days to use.
Below are the prompts:

Run the Report for which PROGRAM

Use one of the following: O (ONE program) or A (ALL programs). If you use O, other prompts will display.

Include cases opened by

Use one of the following: A (Any provider) or O (One Provider). If you use O, other prompts will display.

Enter the number of days since the patient has been seen

Specify the number of days (1-99999) to be used when determining which patients should be included in the report.

Demo Patient/Inclusion/Exclusion

Use one of the following: I (include all patients), E (exclude demo patients), O (include only demo patients).

Do you wish to

Use P (print output) or B (browse output on screen).

The application displays the Cases Opened but Patient Not Seen in N Days report (Figure 13-14).

13.1.6.3 Tally Cases Opened/Admitted/Closed (TCD)

Use the TCD option to produce a report that tallies the case open, admit, and closed dates in a specified time period.

Below are the prompts:

Enter beginning of Time Period

Specify the beginning date of the date range.
Enter ending of Time Period
   Specify the ending date of the date range.

Run the Report for which PROGRAM
   Use one of the following: O (one program) or A (All programs). If you use O, other prompts will display.

Include cases opened by
   Use one of the following: A (Any provider) or O (One providers). If you use O, other prompts will display.

Demo Patient/Inclusion/Exclusion
   Use one of the following: I (include all patients), E (exclude demo patients), O (include only demo patients).

Do you wish to
   Use P (print output) or B (browse output on screen).

The application displays the Tally of Cases Opened/Admitted/Closed report (Figure 13-15).

<table>

Figure 13-15: Tally of Cases Opened/Admitted/Closed report

13.1.6.4 Duration of Care for Cases Opened and Closed (DOC)

Use the DOC option to produce a report that shows a list of all closed cases in a specified date range. In order to be included in this report, the case must have both a case open and a case closed date. The duration of care is calculated by counting the number of days from the case open date to the case closed date. Cases can be selected based on Open date, Closed date, or both. Only those cases falling within the specified time frame will be counted.
Below are the prompts:

Enter Beginning Date
Specify the beginning date of the date range.

Enter Ending Date
Specify the ending date of the date range.

Please Select which Dates should be Used
Use one of the following: O (cases opened in that Date Range), C (cases closed in that Date Range), or B (cases either opened or closed in that Date Range).

Run the Report for which PROGRAM
Use one of the following: O (One program) or A (All programs). If you use O, other prompts will display.

Include cases opened by
Use one of the following: A (Any provider) or O (One provider). If you use O, other prompts will display.

Do you want each Provider on a separate page?
Use Y (for yes) or N (for no).

Demo Patient/Inclusion/Exclusion
Use one of the following: I (include all patients), E (exclude demo patients), O (include only demo patients).

Do you wish to
Use P (print output) or B (browse output on screen).

The application displays the Duration of Care report (Figure 13-16).

********** CONFIDENTIAL PATIENT INFORMATION **********

Total Number of Cases for THA, VICTOR L: 1
Average Duration of Care: 38.00 days

Patient F 106030 05/22/08 08/30/08 100 days UPSILON, GEOF
Total Number of Cases for UPSILON, GEORGE G: 1
Average Duration of Care: 100.00 days

Total Number of Cases: 7
Average Duration of Care: 64.71 days

Figure 13-16 Figure 13 16: Sample Duration of Care report

At the end of the report, the application provides the total number of cases for the provider and the average duration of care.

13.1.6.5 Patient Seen X Number of Times with No Case Open (SENO)

Use the SENO option to produce a report that shows a list of patients, in a specified date range, who have been seen a certain number of times but do not have open cases. The user, based on the program’s standards of care, specifies when a case is to be opened. For example, a case will be opened if a patient has been seen at least three times.

Below are the prompts:

Enter Beginning Visit Date
Specify the beginning date of the date range.

Enter Ending Visit Date
Specify the ending date of the date range.

Run Report for which PROGRAM
Use one of the following: M (Mental Health), S (Social Services), O (Other), or C (Chemical Dependency).

Include visits to
Use one of the following: A (All providers) or O (One provider). If you use O, other prompts will display.

Enter number of visits
Specify the number of visits with no case opened.
Demo Patient/Inclusion/Exclusion

Use one of the following: I (include all patients), E (exclude demo patients), O (include only demo patients).

Do you wish to

Use P (print output) or B (browse output on screen).

The application displays the Patients Seen at least N times with no Case Open Date report (Figure 13-17).

![Table of Patients Seen at least 3 Times with No Case Open Date]

**Figure 13-17: Sample Patients Seen at least N times with no Case Open Date report**

### 13.1.7 GAF Scores for Multiple Patients (GAFS)

Use the GAFS option to produce a report that lists the GAF scores for multiple patients, sorted by patient. Only visits with GAF scores recorded will display on this list.

Below are the prompts.

Enter Beginning Date of Visit

Specify the beginning date of the date range.

Enter Ending Date of Visit

Specify the ending date of the date range.

List visits/GAF Scores for which program

Use one of the following: O (one program) or A (all programs). If you use O, other prompts will display.
Include visits to
Use one of the following: A (all providers) or O (one provider). If you use O, other prompts will display.

Demo Patient/Inclusion/Exclusion
Use one of the following: I (include all patients), E (exclude demo patients), O (include only demo patients).

Do you wish to
Use P (print output) or B (browse output on screen).

The application displays the GAF Scores for Multiple Patients report (Figure 13-18).

![GAF Scores for Multiple Patients report](image)

**Figure 13-18: Sample GAF Scores for Multiple Patients report**

### 13.1.8 Listing of No-Show Visits in a Date Range (NSDR)
Use the NSDR option to print a list of visits with POVs related to No Shows and Cancellations for multiple patients. The user will specify the date range, program, and provider.

Below are the prompts.

Enter Beginning Date
Specify the beginning date of the date range.

Enter Ending Date
Specify the ending date of the date range.
Run the Report for which PROGRAM

Use one of the following: O (ONE program) or A (All programs). If you use O, other prompts will display.

Include visits for

Use one of the following: A (All providers) or O (One provider). If you use O, other prompts will display.

How would you like the report sorted

Use P (patient name) or D (date of visit).

Demo Patient/Inclusion/Exclusion

Use one of the following: I (include all patients), E (exclude demo patients), O (include only demo patients).

Do you wish to

Use P (print output) or B (browse output on screen).

The application displays the Behavioral Health No Show Appointment Listing report (Figure 13-19).

```

```

The application will display a sub-count for each Personal History Item.

### 13.1.10 Placements by Site/Patient (PPL)

Use the PPL option to produce a report that shows a list of patients who have had a placement disposition recorded in a specified date range.

Below are the prompts.

Enter beginning Date

Specify the beginning date of the date range.

Enter ending Date

Specify the ending date of the date range.

How would you like this report sorted

Use P (alphabetically by patient name) or S (alphabetically by site referred to).
Demo Patient/Inclusion/Exclusion

Use one of the following: I (include all patients), E (exclude demo patients), O (include only demo patients).

Do you wish to

Use P (print output) or B (browse output on screen).

The application displays the Placements report (Figure 13-21).

---

Near the end of the report, the report shows subtotals by Placement Type, subtotals by Facility Referred, and the Total Number of Placements.

13.1.11 Listing of Patients with Selected Problems (PPR)

Use the PPR option to produce a report that lists all patients who have been seen for a particular diagnosis/problem in a specified date range. For example, you can enter all suicide problems codes (39, 40, and 41) and you will get a list of all patients seen for suicide and can then use this report to assist in follow up activities. The report will list the Designated Provider, the Patient Name, the date seen for this problem, and the date last seen.

Below are the prompts.

Which Type

Use one of the following: P (Problem Code and all DSM codes grouped under it), or D (individual problem or DSM codes).
Below are prompts for the P type:

Enter Problem Code

Enter the problem code. The application lists the problem/diagnosis codes that will be included. The next prompt allows you to enter another problem code.

Enter Beginning Visit Date

Specify the beginning date of the date range.

Enter Ending Visit Date

Specify the ending date of the date range.

Demo Patient/Inclusion/Exclusion

Use one of the following: I (include all patients), E (exclude demo patients), O (include only demo patients).

Do you wish to

Use P (print output) or B (browse output on screen).

The application displays the Patients Seen with Selected Diagnosis/Problems report (Figure 13-22).

![Figure 13-23: Sample Patients Seen with Selected Diagnosis/Problems report (D type)](image)

### 13.1.12 SBIRT Report (SB)

Use the SB option to produce a report that will tally and optionally list all patients who have had a positive screening result for risky or harmful alcohol use in an Ambulatory Care setting in the time frame specified by the user. These tallies will also be further defined to show if the patient received a Brief Negotiated Interview (BNI), Brief Intervention (BI), and/or Referral to Treatment (RT) within seven days of the positive screen result. Visits from PCC and AMH will be included.

Below are the prompts.

Enter Beginning Date

Specify the beginning date of the date range.

Enter Ending Date

Specify the ending date of the date range.
Include which patients in the list

Use one of the following: F (FEMALES only), M (MALES only), B (Both MALE and FEMALES).

Would you like to restrict the report by Patient age range?

Use Y (yes) or N (no). If you use Y, other prompts will display.

Include patients who were seen by which providers during the report period

Select one of the following: O (One Provider Only), P (Any/All Providers)

Patient Lists

Select one of the following: 1 (Those with a Positive Alcohol Screening), 2 (Those with at least 1 Positive Alcohol Screening with BNI/BI or RT), 3 (Those with all Positive Alcohol Screenings without BNI/BI or RT), 0 (No Lists)

Demo Patient/Inclusion/Exclusion

Use one of the following: I (include all patients), E (exclude demo patients), O (include only demo patients).

Do you wish to

Use P (print output) or B (browse output on screen).

The application displays the SBIRT report (Figure 13-24).

Figure 13-26: Options on the IPV/DV Reports menu

13.1.13.1.1 Tally/List Patients with IPV/DV Screening (DVP)

This report will tally and optionally list all patients who have had IPV screening (PCC Exam code 34) or a refusal documented in a specified time frame. This report will tally the patients by age, gender, result, provider (either exam provider, if available or primary provider on the visits), clinic, date of screening, designated PCP, MH Provider, SS Provider and A/SA Provider.
Notes:

- The last screening/refusal for each patient is used. If a patient was screened more than once in the time period, only the latest is used in this report.

- This report will optionally, look at both PCC and the Behavioral Health databases for evidence of screening/refusal

Below are prompts for the DVP report:

Enter Beginning Date for Screening
Enter the beginning date of the date range for the screening.

Enter Ending Date for Screening
Enter the ending date of the date range for the screening.

Which items should be tallied: (0-11)
Select which items you want to tally on this report (Figure 13-27):

| 0) | Do not include any Tallies |
| 1) | Result of Screening |
| 2) | Gender |
| 3) | Age of Patient |
| 4) | Provider who Screened |
| 5) | Clinic |
| 6) | Date of Screening |
| 7) | Primary Provider on Visit |
| 8) | Designated MH Provider |
| 9) | Designated SS Provider |
| 10) | Designated ASA/CD Provider |
| 11) | Designated Primary Care Provider |

Figure 13-27: List of options from which to tally the report

The response must be a list or range, e.g., 1, 3, 5 or 2–4, 8.

Would you like to include IPV/DV Screenings documented in the PCC clinical database?
Use Y (yes) or N (no).

Would you like to include a list of patients screened?
Use Y (yes) or N (no). If you use Y, the following prompt will display.

How would you like the list to be sorted
Figure 13-28 lists the possibilities.

Select one of the following:

| H | Health Record Number |
| N | Patient Name |
| P | Provider who screened |
| C | Clinic |
| R | Result of Exam |
| D | Date Screened |
| A | Age of Patient at Screening |
G   Gender of Patient
T   Terminal Digit HRN

How would you like the list to be sorted: H/

Figure 13-28: List of options to sort the list

The default is H (Health Record Number).

Display the Patient’s Designated Providers on the list?
Use Y (yes) or N (no).

Demo Patient/Inclusion/Exclusion
Use one of the following: I (include all patients), E (exclude demo patients), O (include only demo patients).

DEVICE
Specify the device to output the report.

13.1.13.1.3 List All IPV/DV Screenings for Selected Patients (ISSP)

This report will list all patients you select who have had IPV screening or a refusal documented in a specified time frame. You will select the patients based on age, gender, result, provider, or clinic where the screening was done. You will enter a date range during which the screening was done.

Please enter the date range during which the screening was done. To get all screenings ever put in a long date range like 01/01/1980 to the present date.

Below are prompts for the ISSP report:

Enter Beginning Date for Screening
Enter the beginning date of the date range for the screening.

Enter Ending Date for Screening
Enter the ending date of the date range for the screening.

Would you like to include screenings documents in non-behavioral health clinics (those documented in PCC)?
Use Y (yes) or N (no).

Include which patients in the list
Use one of the following: F (FEMALES only), M (MALES only), B (Both MALE and FEMALES).

Would you like to restrict the report by Patient age range?
Use Y (yes) or N (no). If you use Y, other prompts will display.

Which result value do you want included in this list: (1-7)
Figure 13-33 shows the possible options.

1) Normal/Negative
2) Present
3) Past
4) Present and Past
5) Refused
6) Unable to Screen
7) Screenings done with no result entered
8) Referral Needed

Figure 13-33: List of options to include in the list

You can limit the list to only patients who have had a screening in the time period on which the result was any combination of the following: (e.g., to get only those patients who have had a result of Present enter 2 to get all patients who have had a screening result of Past or Present, enter 2,3).
Include visits to ALL clinics?
Use Y (yes) or N (no).

Report should include visits whose PRIMARY PROVIDER on the visit is
Figure 13-34 shows the possible options. If you use O, other prompts will display.

<table>

Figure 13-37: Sample IPV Screening Visit Listing for Selected Patients report
13.1.13.1.4  Tally/List Pts in Search Template w/IPV Screening (IPST)

| Note: This IPV/DV report is intended for advanced RPMS users who are experienced in building search templates and using Q-MAN. |

TALLY AND LISTING OF PATIENT’S RECEIVING IPV SCREENING, INCLUDING REFUSALS ONLY PATIENTS WHO ARE MEMBERS OF A USER DEFINED SEARCH TEMPLATE ARE INCLUDED IN THIS REPORT

This report will tally and list all patients who are members of a user defined search template. It will tally and list their latest IPV screening (Exam code 34) or a refusal documented in a specified time frame. This report will tally the patients by age, gender, result, screening provider, primary provider of the visit, designated primary care provider, and date of screening/refusal.

- The last screening/refusal for each patient is used. If a patient was screened more than once in the time period, only the latest is used in this report.
- This report will optionally, look at both PCC and the Behavioral Health databases for evidence of screening/refusal.

13.1.13.1.5  Tally List All PIV Screenings for Template of Pts (IVST)

Please Note: This IPV/DV report is intended for advanced RPMS users who are experienced in building search templates and using Q-MAN.

TALLY AND LISTING OF ALL VISITS W/IPV SCREENING, INCLUDING ONLY PATIENTS WHO ARE MEMBERS OF A USER DEFINED SEARCH TEMPLATE ARE INCLUDED IN THIS REPORT

This report will tally and optionally list all visits on which IPV screening (Exam code 34) or a refusal was documented in a specified time frame. This report will tally the visits by age, gender, result, provider (either exam provider, if available, or primary provider on the visit), and date of screening/refusal. This report will optionally look at both Behavioral Health and PCC databases for evidence of screening/refusal.

13.1.13.2 Alcohol Screening Reports (ALC)

Use the ALC option to access the ALC Report menu (Figure 13-38).
13.1.13.2.1 **Tally/List Patients with Alcohol Screening (ASP)**

This report will tally and optionally list all patients who have had ALCOHOL screening or a refusal documented in a specified time frame. Alcohol Screening is defined as any of the following documented:

- Alcohol Screening Exam (Exam code 35)
- Measurements: AUDC, AUDT, CRFT
- Health Factor with Alcohol/Drug Category (CAGE)
- Diagnoses V79.1, 29.1
- Education Topics: AOD-SCR, CD-SCR
- CPT Codes: 99408, 99409, G0396, G0397, H0049
- Refusal of exam code 35

This report will tally the patients by age, gender, screening exam result, provider (either exam provider, if available or primary provider on the visits), clinic, date of screening, designated PCP, MH Provider, SS Provider and A/SA Provider.

Notes:

- The last screening/refusal for each patient is used. If a patient was screened more than once in the time period, only the latest is used in this report.
- This report will optionally, look at both PCC and the Behavioral Health databases for evidence of screening/refusal.
- This is a tally of patients, not visits or screenings.

Please enter the date range during which the screening was done. To get all screenings ever put in a long date range like 01/01/1980 to the present date.

Below are the prompts.

**Enter Beginning Date for Screening**

Specify the beginning date of the date range.

**Enter Ending Date for Screening**

Specify the ending date of the date range.
Which items should be tallied

Specify which items you would like to have displayed in the report. The application provides a list of items. Your response must be a list (like 1,3,5) or a range (2-4, 8).

Would you like to include ALCOHOL Screenings documented in the PCC clinical database?

Use Y (Yes) or N (No).

Would you like to include a list of patients screened?

Use Y (Yes) or N (No).

If you answered Yes to this question, the next prompt will display:

How would you like this report sorted

Use only one of the items in the list provided by the application.

Display the Patient’s Designated Providers on the list?

Use Y (Yes) to display the patient’s Designated Providers or N (No) to bypass this option.

Demo Patient/Inclusion/Exclusion

Use one of the following: I (include all patients), E (exclude demo patients), O (include only demo patients).

Do you wish to

Use P (print output) or B (browse output on screen).

The application displays the Tally/List Patients with Alcohol Screenings report (Figure 13-39).

Figure 13-39: Sample Tally/List Patients with Alcohol Screenings report

13.1.13.2.2 Tally/List Alcohol Screening (ALS)

This report will tally and optionally list all visits on which ALCOHOL screening or a refusal was documented in a specified time frame.

Alcohol Screening is defined as any of the following documented:

- Alcohol Screening Exam (Exam code 35)
- Measurements: AUDC, AUDT, CRFT
- Health Factor with Alcohol/Drug Category (CAGE)
- Diagnoses V79.1, 29.1
- Education Topics: AOD-SCR, CD-SCR
- CPT Codes: 99408, 99409, G0396, G0397, H0049
- Refusal of exam code 35

This report will tally the visits by age, gender, result, screening result, provider (either exam provider, if available, or primary provider on the visit), clinic, date of screening, designated PCP, MH Provider, SS Provider, and A/SA Provider.

Notes:

- This report will optionally, look at both PCC and the Behavioral Health databases for evidence of screening/refusal.
- This is a tally of visits with a screening done, if a patient had multiple screenings during the time period, all will be counted.

Please enter the date range during which the screening was done. To get all screenings ever put in a long date range like 01/01/1980 to the present date.

Below are the prompts.

Enter Beginning Date for Screening
    Specify the beginning date of the date range.

Enter Ending Date for Screening
    Specify the ending date of the date range.
Note: This date range indicates when the screening was done.

Which items to be tallied

Specify which items you would like to have displayed in the report. The application provides a list. Your response must be list (like 1,3,5) or a range (2-4, 8).

Would you like to include ALCOHOL Screenings documented in the PCC clinical database

Use Y (Yes) or N (No).

Would you like to include a list of visits w/screenings done?

Use Y (Yes) or N (No).

How would you like this report sorted

The report can be sorted by only one of the items in the list.

Demo Patient/Inclusion/Exclusion

Use one of the following: I (include all patients), E (exclude demo patients), O (include only demo patients).

Do you wish to

Use P (print output) or B (browse output on screen).

The application displays the Tally/List Alcohol Screenings report (Figure 13-40).

### List All Alcohol Screenings for Selected Patients (ASSP)

This report will tally and optionally list all patients who have had an alcohol screening or a refusal documented in a specified time frame. Alcohol Screening is defined as any of the following documented:

- Alcohol Screening Exam (Exam code 35)
- Measurements: AUDC, AUDT, CRFT
- Health Factor with Alcohol/Drug Category (CAGE)
- Diagnoses V79.1, 29.1
- Education Topics: AOD-SCR, CD-SCR
- CPT Codes: 99408, 99409, G0396, G0397, H0049
- Refusal of exam code 35

Figure 13-40: Sample Tally/List Alcohol Screenings report

13.1.13.2.3 List All Alcohol Screenings for Selected Patients (ASSP)
This report will tally the patients by age, gender, screening exam result, provider (either exam provider, if available, or primary provider on the visit), clinic, date of screening, designated PCP, MH Provider, SS Provider, and A/SA Provider.

Notes:
- The last screening/refusal for each patient is used. If a patient was screened more than once in the time period, only the latest is used in this report.
- This report will optionally, look at both PCC and the Behavioral Health databases for evidence of screening/refusal.
- This is a tally of patients, not visits or screenings.

Below are the prompts.

Enter Beginning Date for Screening
Specify the beginning date of the date range.

Enter Ending Date for Screening
Specify the ending date of the date range.

Would you like to include screenings documented in non-behavioral health clinics (those documented in PCC)?
Use Y (Yes) or N (No).

Include which patients in the list
Use F (Females Only), M (Males Only), or B (Both Male and Females).

Would you like to restrict the report by Patient age range?
Type Y (Yes) or N (no). If you wish to include visits from ALL age ranges, answer No. If you wish to list visits for only patients with a particular age range, enter Yes. If you use Yes, other prompts will display.

Which result values do you want included on this list
You can limit the list to only patients who have had a screening in the time period on which the result was any combination of the following: (e.g. to get only those patients who have had a result of Positive, enter 2; to get all patients who have had a screening result of Positive or Refused, enter 2,3).

You can choose from the following:
- 1 Normal/Negative
- 2 Positive
- 3 Refused
• 4 Unable to Screen
• 5 Screenings done with no result entered
• 6 Referral Needed

Include visits to ALL clinics
Use Y (Yes) or N (No). If No is used, additional prompts will display.

Report should include visits whose PRIMARY PROVIDER on the visit is
Use O (One Provider Only), P (Any/All Providers including Unknown), or U (Unknown Provider Only). If you use O, other prompts will display.

Select which providers who performed the screening should be included
Use O (One Provider Only), P (Any/All Providers including Unknown), or U (Unknown Provider Only). If you use O, other prompts will display.

Would you like to limit the list to just patients who have a particular designated Mental Health provider?
Use Y (Yes) or N (No). If Yes is used, additional prompts will display.

Would you like to limit the list to just patients who have a particular designated Social Services provider?
Use Y (Yes) or N (No). If Yes is used, additional prompts will display.

Would you like to limit the list to just patients who have a particular designated ASA/CD provider?
Use Y (Yes) or N (No). If Yes is used, additional prompts will display.

Select Report Type
Use L (List of Patient Screenings) or S (Create a Search Template of Patients).

How would you like this report sorted
The report can be sorted by only one of the items in the list.

Display the Patient’s Designated Providers on the list?
Use Y (Yes) or N (no).

Demo Patient/Inclusion/Exclusion
Use one of the following: I (include all patients), E (exclude demo patients), O (include only demo patients).
Do you wish to
Use P (print output) or B (browse output on screen).

The application displays the criteria you selected for the report.

Then, the application displays the Tally/List Alcohol Screenings report (Figure 13-41).

**Figure 13-41: Sample Alcohol Screenings Visit Listing for Selected Patients report**

**13.1.13.2.4 Tally/List Pts in Search Template with Alcohol Screenings (APST)**

This report will tally and list all patients who are members of a user defined search template. It will tally and list their latest ALCOHOL screening or a refusal documented in a specified time frame. Alcohol Screening is defined as any of the following documented:

- Alcohol Screening Exam (Exam code 35)
- Measurements: AUDC, AUDT, CRFT
- Health Factor with Alcohol/Drug Category (CAGE)
- Diagnoses V79.1, 29.1
- CPT Codes: 99408, 99409, G0396, G0397, H0049
- Refusal of exam code 35

This report will tally the patients by age, gender, screening exam result, provider (either exam provider, if available, or primary provider on the visit) clinic, date of screen, designed PCP, MH Provider, SS Provider, and A/SA/ Provider.
- The last screening/refusal for each patient is used. If a patient was screened more than once in the time period, only the latest is used in this report.
- This report will optionally, look at both PCC and the Behavioral Health databases for evidence of screening/refusal.
- This is a tally of Patients, not visits or screenings.

### 13.1.13.2.5 Tally/List All Alcohol Screenings for Template of Pts (AVST)

This ALCOHOL report is intended for advanced RPMS users who are experienced in building search templates and using Q-MAN.

**TALLY AND LISTING OF ALL VISITS W/ALCOHOL SCREENING ONLY PATIENTS WHO ARE MEMBERS OF A USER DEFINED SEARCH TEMPLATE ARE INCLUDED IN THIS REPORT**

This report will tally and optionally list all visits on which ALCOHOL screening or a refusal was documented in a specified time frame specified. Alcohol Screening is defined as any of the following documented:

- Alcohol Screening Exam (Exam code 35)
- Measurements: AUDC, AUDT, CRFT
- Health Factor with Alcohol/Drug Category (CAGE)
- Diagnoses V79.1, 29.1
- Education Topics: AOD-SCR, CD-SCR
- CPT Codes: 99408, 99409, G0396, G0397, H0049
- Refusal of exam code 35

This report will tally the visits by age, gender, result, screening result, provider (either exam provider, if available, or primary provider on the visit), clinic, date of screening, designated PCP, MH Provider, SS Provider, and A.SA Provider.

- This report will optionally, look at both PCC and the Behavioral Health databases for evidence of screening/refusal.

This is a tally of visits with a screening done, if a patient had multiple screenings during the time period, all will be counted.

### 13.1.13.3 Depression Screening Reports (DEP)

Use the DEP option to access the Depression Screening Reports menu (Figure 13-42).
DEMO INDIAN HOSPITAL

DSP  Tally/List Patients with Depression Screening
DLS  Tally/List Depression Screenings
DSSP List all Depression Screenings / Selected Patients
DPST Tally/List Pts in Search Temp w/Depression Scrn
DVST Tally List all Depression Scrn for Template of Pts

Select Depression Screening Reports Option:

Figure 13-42: Options on the Depression Screening Reports menu

13.1.13.3.1 Tally/List Patient with Depression Screening (DSP)

This report will tally and optionally list all patients who have had DEPRESSION screening or a refusal documented in the specified time frame. Depression Screening is defined as any of the following documented:

- Depression Screening Exam (Exam code 36)
- Measurements: PHQ2, PHQ9, PHQT
- Diagnoses V79.0, 14.1
- Education Topics: DEP-SCR
- Refusal of PCC exam code 36

This report will tally the patients by age, gender, screening exam result, provider (either exam provider, if available, or primary provider on the visit), clinic, date of screening, designated PCP, MH Provider, SS Provider and A/SA Provider.

Notes:

- The last screening/refusal for each patient is used. If a patient was screened more than once in the time period, only the latest is used in this report.
- This report will optionally, look at both PCC and the Behavioral Health databases for evidence of screening/refusals.
- This is a tally of Patients, not visits or screening.

Please enter the date range during which the screening was done. To get all screenings ever put in a long date range like 01/01/1980 to the present date.

Below are the prompts:

Enter Beginning Date for Screening
   Specify the beginning date of the date range.

Enter Ending Date for Screening
   Specify the ending date of the date range.
Which items should be tallied: (0-11)

Select which items you want to tally on this report (Figure 13-43):

13.1.13.3.3 List All Depression Screenings/Selected Patients (DSSP)

This report will tally and optionally list all patients who have had DEPRESSION screening or a refusal documented in the time frame specified by the user. Depression Screening is defined as any of the following documented:

- Depression Screening Exam (PCC Exam code 36)
- Measurements: PHQ2, PHQ9, PHQT
- Diagnoses V79.0, 14.1
- Education Topics: DEP-SCR
- Refusal of exam code 36

This report will tally the patients by age, gender, screening exam result, provider (either exam provider, if available, or primary provider on the visit), clinic, date of screening, designated PCP, MH Provider, SS Provider, and A/SA Provider.

Notes:

- The last screening/refusal for each patient is used. If a patient was screened more than once in the time period, only the latest is used in this report.
- This report will optionally, look at both PCC and the Behavioral Health databases for evidence of screening/refusal.
- This is a tally of Patients, not visits or screenings.

You will be able to choose the patients by age, gender, clinic, primary provider, or result of the screening.

Below are the prompts:

Enter Beginning Date for Screening
Specify the beginning date of the date range.
Enter Ending Date for Screening
   Specify the ending date of the date range.

Would you like to include screenings documented in non-behavioral health clinics (those documented in PCC)?
   Use Y (yes) or N (no).

Include which patients in the list
   Use one of the following: F (FEMALES only), M (MALES Only), or B (Both MALE and FEMALES).

Would you like to restrict the report by Patient age range?
   Use Y (yes) or N (no). If you use Y, other prompts will display.

Which result values do you want included on this list
   Figure 13-49 shows the list from which to select.

1) Normal/Negative
2) Positive
3) Refused
4) Unable to Screen
5) Screenings done with no result entered
6) Referral Needed

Figure 13-49: List of options from which to select

You can limit the list to only patients who have had a screening in the time period on which the result was any combination of the following: (e.g. to get only those patients who have had a result of Positive enter 2 to get all patients who have had a screening result of Positive or Refused, enter 2,3).

Include visits to ALL clinics
   Use Y (yes) or N (no).

Report should include visits whose PRIMARY PROVIDES on the visit is
   Figure 13-50 shows the options. If you use O, other prompts will display.

Select one of the following:
   O   One Provider Only
   P   Any/All Providers (including unknown)
   U   Unknown Provider Only

Figure 13-50: Options for visits to include on the report
Select which providers who performed the screening should be included

Figure 13-51 shows the options. If you use O, other prompts will display.

Figure 13-53: Sample Depression Screening Visit Listing for Selected Patients report

13.1.13.3.4 Tally/List Pts in Search Temp with Depression Screening (DPST)
This report will tally and list all patients who are members of a user defined search template. It will tally and list their latest DEPRESSION screening or a refusal documented in the time frame specified by the user. Depression Screening is defined as any of the following documented:

- Depression Screening Exam (PCC Exam code 36)
- Measurements: PHQ2, PHQ9, PHQT
- Diagnoses V79.0, 14.1
- Education Topics: DEP-SCR
- Refusal of exam code 36
This report will tally the patients by age, gender, screening exam result, provider (either exam provider, if available, or primary provider on the visit), clinic, date of screening, designated PCP, MH Provider, SS Provider, and A/SA Provider.

Notes:
- The last screening/refusal for each patient is used. If a patient was screened more than once in the time period, only the latest is used in this report.
- This report will optionally, look at both PCC and the Behavioral Health databases for evidence of screening/refusal.
- This is a tally of Patients, not visits or screenings.

13.1.13.3.5 Tally/List All Depression Screenings for Templates of Pts (DVST)

This report will tally and optionally list all visits on which DEPRESSION screening or a refusal was documented in the time frame specified by the user. Depression Screening is defined as any of the following documented:

- Depression Screening Exam (PCC Exam code 36)
- Measurements: PHQ2, PHQ9, PHQT
- Diagnoses V79.0, 14.1
- Education Topics: DEP-SCR
- Refusal of PCC exam code 36

This report will tally the visits by age, gender, screening result, provider (either exam provider, if available, or primary provider on the visit), clinic, date of screening, designated PCP, MH Provider, SS Provider, and A/SA Provider.

Notes:
- This report will, optionally, look at both PCC and the Behavioral Health databases for evidence of screening/refusal.
- This is a tally of visits with a screening done; if a patient had multiple screenings during the time period, all will be counted.

13.1.13.4 Suicide Risk Assessment Reports (SRA)

Use the SRA option to access the Suicide Risk Assessment Report menu Figure 13-54).
13.1.13.4.1 Tally/List Patients with Suicide Risk Assessment (SRP)

This report will tally and optionally list all patients who have had a Suicide Risk Assessment (PCC Exam code 43) or a refusal documented in a specified time frame. This report will tally the patients by age, gender, result, provider (either exam provider, if available or primary provider on the visits), clinic, date of screening, designated PCP, MH Provider, SS Provider and A/SA Provider.

Notes:

- The last screening/refusal for each patient is used. If a patient was screened more than once in the time period, only the latest is used in this report.
- This report will optionally, look at both PCC and the Behavioral Health databases for evidence of screening/refusal.

Below are prompts for the SRP report.

Enter Beginning Date for Screening
Enter the beginning date of the date range for the screening.

Enter Ending Date for Screening
Enter the ending date of the date range for the screening.

Which items should be tallied: (0-11)

13.1.13.4.2 Tally/List Suicide Risk Assessments (SRS)

This report will tally and optionally list all visits on which a Suicide Risk Assessment (Exam code 43) or a refusal was documented in a specified time frame. This report will tally the visits by age, gender, result, provider (either exam provider, if available, or primary provider on the visit), and date of screening/refusal.

Note:

- This report will optionally look at both the Behavioral Health and PCC clinical databases for evidence of screening/refusal.
- Please enter the date range during which the screening was done. To get all screenings ever put in a long date range like 01/01/1980 to the present date.

Below are prompts for the SRS report:

Enter Beginning Date for Screening
Enter the beginning date of the date range for the screening.

Enter Ending Date for Screening
Enter the ending date of the date range for the screening.

Figure 13-60: Sample output of the Suicide Risk Assessment Screening Visit Tally and Visit Listing report

13.1.13.4.3 **List All Suicide Risk Assess for Selected Patients (SRSP)**

This report will list all patients you select who have had a Suicide Risk Assessment or a refusal documented in a specified time frame. You will select the patients based on age, gender, result, provider, or clinic where the screening was done. You will enter a date range during which the screening was done.

Please enter the date range during which the screening was done. To get all screenings ever put in a long date range like 01/01/1980 to the present date.

Below are prompts for the ISSP report:

Enter Beginning Date for Screening

Enter the beginning date of the date range for the screening.

Enter Ending Date for Screening

Enter the ending date of the date range for the screening.

Would you like to include screenings documents in non-behavioral health clinics (those documented in PCC)?

Use Y (yes) or N (no).

Include which patients in the list

Use one of the following: F (FEMALES only), M (MALES only), B (Both MALE and FEMALES).

Would you like to restrict the report by Patient age range?

Use Y (yes) or N (no). If you use Y, other prompts will display.
Which result value do you want included in this list: (1-7)

Figure 13-61 shows the possible options.

1) Low
2) Moderate
3) High
4) Refused
5) Unable to Screen
6) Referral Needed
7) Screenings done with no result entered

Figure 13-61: List of options used to be included in the list

You can limit the list to only patients who have had a screening in the time period on which the result was any combination of the following: (e.g., to get only those patients who have had a result of Present enter 2 to get all patients who have had a screening result of Past or Present, enter 2,3).

Include visits to ALL clinics?
Use Y (yes) or N (no).

Report should include visits whose PRIMARY PROVIDER on the visit is

Figure 13-62 shows the possible options. If you use O, other prompts will display.

Select one of the following:

O  One Provider Only
P  Any/All Providers (including unknown)
U  Unknown Provider Only

Figure 13-62: Options for visits to include on the report

Select which providers who performed the screening should be included

Figure 13-63 shows the possible options. If you use O, other prompts will display.

Select one of the following:

O  One Provider Only
P  Any/All Providers (including unknown)
U  Unknown Provider Only

Figure 13-63: Options for providers to include on the report

Would you like to limit the list to just patients who have a particular designated Mental Health provider?

Use Y (yes) or N (no). If you use Y, other prompts will display.
Would you like to limit the list to just patients who have a particular designated Social Services provider?

Use Y (yes) or N (no). If you use Y, other prompts will display.

Would you like to limit the list to just patients who have a particular designated ASA/CD provider?

Use Y (yes) or N (no). If you use Y, other prompts will display.

Select Report Type

Use one of the following: L (List of Patient Screenings) or S (Create a Search Template of Patients). If you use S, other prompts will display.

How would you like the list to be sorted

Figure 13-64 shows the possible selections. The default is H (Health Record Number).

Figure 13-70: Options on the Treatment Plans menu

Print List of All Treatment Plans on File (ATP): see Section 10.1.5.

Print List of Treatment Plans Needing Reviewed (REV): see Section 10.1.3.

Print List of Treatment Plans Needing Resolved (RES): see Section 10.1.4.

Patients w/Case Open but no Treatment Plan (NOTP): see Section 10.1.6.

13.1.15 Patients Seen in Groups with Time in Group (TSG)

Use the TSG option to produce a report that shows a list of patients who have spent
time in a group in a specified date range. It will list the patient, the primary provider,
diagnosis, and time spent in the group.

Below are the prompts.

Enter beginning Date
   Specify the beginning date of the date range.

Enter ending Date
   Specify the ending date of the date range.

Demo Patient/Inclusion/Exclusion
   Use one of the following: I (include all patients), E (exclude demo patients), O
   (include only demo patients).

Do you wish to
   Use P (print output) or B (browse output on screen).

The application displays the Patients Seen in Groups with Time Spent in Group report
(Figure 13-71).
13.2 Behavioral Health Record/Encounter Reports (REC)

Use the REC option to list various records from the Behavioral Health patient file that are available on the BHS Encounter/Record Reports menu (Figure 13-72).

13.2.1 List Visit Records, Standard Output (LIST)

Use the LIST option to produce a report that shows a listing of visits in a specified date range. The visits can be selected based on any combination of selected criteria. The user will select the sort criteria for the report.

Be sure to have a printer available that has 132-column print capability.

Below are the prompts.

Enter beginning Visit Date for Search
   Specify the beginning date of the date range.

Enter ending Visit Date for Search
   Specify the ending date of the date range.

The application displays the Visit Selection Menu (Figure 13-73).
Visits can be selected based upon any of the following items. Select as many as you wish, in any order or combination. An (*) asterisk indicates items already selected. To bypass screens and select all Visits type Q.

1) Patient Name  25) Next Case Review Date  49) Primary Provider
2) Patient Sex   26) Appointment/Walk-In  50) Primary Prov Discipl
3) Patient Race  27) Interpreter Utilized  51) Primary Prov Affiliation
4) Patient Age   28) Program             52) Prim/Sec Providers
5) Patient DOB   29) Visit Type          53) Prim/Sec Prov Discipline
6) Patient DOD   30) Location of Encounter 54) POV (Prim or Sec)
7) Ethnicity     31) Clinic              55) POV (Probs Code Grps)
8) Veteran Status Y/N 32) Outside Location 56) Primary POV
9) Living Patients 33) SU of Encounter  57) POV (Problem Category)
10) Chart Facility 34) County of Service  58) Prim/Sec Prov Discipl
11) Patient Community 35) Community of Service 59) Procedures (CPT)
12) Patient County Resid 36) Activity Type  60) Education Topics Pro
13) Patient Tribe  37) Days in Residential 61) Prevention Activity
14) Eligibility Status 38) Days in Aftercare 62) IPV SCREENING
15) Class/Beneficiary 39) Activity Category  63) ALCOHOL SCREENING
16) Medicare Eligibility 40) Local Service Site 64) DEPRESSION SCREENING
17) Medicaid Eligibility 41) Number Served  65) SUICIDE RISK ASSESSM
18) Priv Ins Eligibility 42) Type of Contact  66) Personal History Item
19) Patient Encounters O 43) Activity Time  67) Designated MH Prov
20) Patient Flag Field 44) Inpatient Disposition 68) Designated SS Provider
21) Case Open Date  45) PCC Visit Created  69) Designated A/SA Prov
22) Case Admit Date 46) Axis IV             70) Designated Other Pro
23) Case Closed Date 47) Axis V             24) Case Disposition  48) Flag (Visit Flag)
25) Next Screen        Q  Quit Item Selection
26) Previous Screen    E  Exit Report

Figure 13-73: Sample Visit Selection Menu

Use this menu to select the visit criteria for the report. If you do not select any criteria (immediately use the Quit Item Selection), all visits will be selected.

Type of Report to Print
Use one of the following: D (detailed using 132 column print) or B (brief (using 80 column print)).

The application displays the Sort Item Selection Menu (Figure 13-74).

1) Patient Name  18) Visit Type  35) Flag (Visit Flag)
Figure 13-74: Sample Sort Item Selection Menu options

Use this menu to determine how the visit data will be sorted on the report. If you do not select any item (immediately use the Quit Item Selection option), the report will be sorted by visit date.

Do you want a separate page for each Visit Date?

Use Y (yes) or N (no).

Demo Patient/Inclusion/Exclusion

Use one of the following: I (include all patients), E (exclude demo patients), O (include only demo patients).

Do you wish to

Use P (print output) or B (browse output on screen).

The application displays the criteria for the report. Then, the application displays the Behavioral Health Record Listing report (Figure 13-75), which is the brief type.
### 13.2.2 List Behavioral Health Records, General Retrieval (GEN)

Use the GEN option to produce a report that shows a listing of visits selected by visit criteria. The visits printed can be selected based on any combination of selected items and the selected sort criteria.

If the selected print data items exceed 80 characters, a 132-column capacity printer will be needed.

Below are the prompts.

Select and Print Encounter List from

- Use one of the following: S (search template) or D (date range). The next prompts vary according to the option selected.

- Enter Beginning Encounter Date for search
  - Define the beginning encounter date.

- Enter Ending Encounter Date for search
  - Define the ending encounter date.

- Do you want to use a PREVIOUSLY DEFINED REPORT?
  - Use Y or N. If you use Y, other prompts displays.

The application displays the Visit Selection Menu (Figure 13-76).
Use this menu to determine visit data that will be selected for the report. If you do not select any item (immediately use the Quit Item Selection option), all visits will be used.

The following prompts continue in the process:

Choose Type of Report

Use one of the following: T (Total Count Only), S (Sub-counts and Total Count), D (Detailed Listing), F (Flag ASCII file (pre-defined record format)).

The application displays the Print Item Selection Menu (Figure 13-77).
Figure 13-77: Print Item Selection Menu options

Use this menu to select the data items to be used on the report. Use option Q when you have completed your selections.

Figure 13-78: Options on the Sort Item Selection Menu
Use this menu to determine the sort criteria for the report. If you don’t select any criteria (use Quit Item Selection) immediately, the report will be sorted by visit date.

Do you want a separate page for each Visit Date?
Use Y or N.

Would you like a custom title for this report?
Use Y or N. If you use Y, other prompts will display.

Do you wish to save this SEARCH/PRINT/SORT logic for future use?
Use Y or N. If you use Y, other prompts will display.

Demo Patient/Inclusion/Exclusion
Use one of the following: I (include all patients), E (exclude demo patients), O (include only demo patients).

The application displays the criteria for the report.

Do you wish to
Use P (print output) or B (browse output on screen).

The application displays the criteria for the report. After pressing Enter, the application displays the visit report (Figure 13-79).

13.3 Workload/Activity Reports (WL)

Use the WL option to view the Activity Workload Reports menu (Figure 13-80).
** Activity Workload Reports **
***************************************************
Version 4.0 (Patch 8)
DEMO INDIAN HOSPITAL

GRS1   Activity Report
GRS2   Activity Report by Primary Problem
ACT    Activity Record Counts
PROG   Program Activity Time Reports (132 COLUMN PRINT)
FACT   Frequency of Activities
FCAT   Frequency of Activities by Category
PA     Tally of Prevention Activities

Select Workload/Activity Reports Option:

Figure 13-80: Options on the Activity Workload Reports menu

The Workload/Activity Reports menu has options to generate reports related specifically to the activities of Behavioral Health providers. Included are options for generating reports that categorize and tabulate activity times, frequency of activities, and primary problems requiring Behavioral Health care.

13.3.1 Activity Report (GRSI)

Use the GRS1 option to produce a report that will tally activities by service unit, facility, and provider. The report is patterned after GARS Report #1.

Below are the prompts.

Enter beginning Encounter Date
   Specify the beginning encounter date for the date range.

Enter ending Encounter Date
   Specify the ending encounter date for the date range.

Run Report for which Program
   Use one the following: M - MENTAL HEALTH, S - SOCIAL SERVICES, C - CHEMICAL DEPENDENCY or ALCOHOL/SUBSTANCE ABUSE, O – OTHER, or A – ALL.

Run Report for
   Use one of the following: 1 (ONE PROVIDER) or 2 (ALL PROVIDERS). If you use 1, other prompts will display.
Include which providers

Use one of the following: P (Primary Provider Only) or S (Both Primary and Secondary Providers).

Demo Patient/Inclusion/Exclusion

Use one of the following: I (include all patients), E (exclude demo patients), O (include only demo patients).

Do you wish to

Use P (print output) or B (browse output on screen).

The application displays the Activity Report (Figure 13-81).

<td></td>
<td></td>
</tr>
</tbody>
</table>

Figure 13-81: Sample Activity Report

Near the end of the report, there will be a Facility Total, SU Total, and Area Total.
13.3.2 Activity Report by Primary Problem (GRS2)

Use the GRS2 option to produce a report that will tally PRIMARY problems by service unit, facility, and by provider and activity.

The prompts are the same as those for the GRS1 report. Section 13.3.1 provides more information about the Activity Report.

The application displays the Activity Report by Primary Purpose report (Figure 13-82).

13.3.3 Activity Record Counts (ACT)

Use the ACT option to produce a report that will generate a count of activity records for a selected item in a specified date range. You will be given the opportunity to select which visits will be included in the tabulation. For example, you can choose to tally activity time by Problem Code for only those with a discipline of Psychiatrist.

Below are the prompts.
Choose an item for calculating activity time and records counts

The application displays a list of items from which to choose.

Enter beginning Visit Date for Search
Specify the beginning visit date for the date range.

Enter ending Visit Date for Search
Specify the ending visit date for the date range.

The application displays the Visit Selection Menu (Figure 13-83).

Figure 13-83: Sample Sort Item Selection Menu options

Use this menu to determine visit data that will be selected for the report. If you do not select any item (immediately use the Quit Item Selection option), all visits will be used.
Demo Patient/Inclusion/Exclusion

Use one of the following: I (include all patients), E (exclude demo patients), O (include only demo patients).

Do you wish to

Use P (print output) or B (browse output on screen).

The application displays the Activity Record Counts report (Figure 13-84).

13.3.4 Program Activity Time Reports (PROG)

Use the PROG option to produce a report that will generate a count of activity records, total activity time, and number of patient visits by Program and by a selected item within a specified date range. You will be given the opportunity to select which visits will be included on the report. For example, you might want to only report on those records on which the type of visits was Field. Note: if you choose to report on Problems, only the primary problem is included.

NOTE: If you choose to report on Problems, ONLY THE PRIMARY PROBLEM is included.

The prompts are the same as those for the ACT report. Section 13.3.3 provides more information about Activity Record Counts.

The application displays the record selection criteria. After pressing Enter, the application displays the Program Activity Time report (Figure 13-85).

**13.3.5 Frequency of Activities (FACT)**

Use the FACT option to produce a report that will generate a list of the top N Activity Codes for selected visits.

Below are the prompts.

Enter beginning Visit Date for Search

Specify the beginning visit date for the date range.

Enter ending Visit Date for Search

Specify the ending visit date for the date range.

The application displays the Visit Selection Menu (Figure 13-86).
Figure 13-86: Sample Sort Item Selection Menu options

Use this menu to determine visit data that will be selected for the report. If you do not select any item (immediately use the Quit Item Selection option), all visits will be used.

Select Type of Report

Use one of the following: L (list of items with counts) or B (Bar Chart, requires 132 column printer).

How many entries do you want to list (5–100)

Specify the number of entries (any number 5–100).

Demo Patient/Inclusion/Exclusion

Use one of the following: I (include all patients), E (exclude demo patients), O (include only demo patients).

Do you wish to

Use P (print output) or B (browse output on screen).

The application displays the criteria for the report. After pressing Enter, the application displays the Frequency of Activities report (Figure 13-87).

#### 13.4.1 Abuse Report (ABU)

Use the ABU option to produce a report that focuses on patients who might have been victims of abuse or neglect. It will present, by age and sex, the number of individual patients who were seen for the Purpose of Visit (POV) – the application displays the POVs.

Below are the prompts.

**Enter Beginning Visit Date**

Specify the beginning visit date for the date range (during which the patient should have been seen with one of the above problems).
Enter the Ending Visit Date
   Specify the ending visit date for the date range.

The application displays the current Age Groups.

Do you wish to modify these age groups?
   Use Y or N at this prompt. If you use Y, other prompts will display. Use N to not modify the age groups.

Demo Patient/Inclusion/Exclusion
   Use one of the following: I (include all patients), E (exclude demo patients), O (include only demo patients).

Do you wish to
   Use P (print output) or B (browse output on screen).

The application displays the Abuse Report by Age and Sex report. You need a 132-column printer to print the report.

13.4.2 Frequency of Problems (FDX)
   Use the FDX option to produce a report that shows a list of the top N Problem/POV for selected visits.

   Below are the prompts.
   Enter beginning Visit Date for Search
      Specify the beginning visit date for the date range.
   Enter ending Visit Date for Search
      Specify the ending visit date for the date range.

   The application displays the Visit Selection Menu (Figure 13-91).
Figure 13-91: Sample Sort Item Selection Menu options

Use this menu to determine visit data that will be selected for the report. If you do not select any item (immediately use the Quit Item Selection option), all visits will be used.

Include which POVs

Use one of the following: P (primary POV only) or S (primary and secondary POVs).

Select Type of Report

Use one of the following: L (List of items with counts) or B (Bar Chart, requires 132 column printer).

How many entries do you want to list (5-100)

Specify the number of entries.

Demo Patient/Inclusion/Exclusion

Use one of the following: I (include all patients), E (exclude demo patients), O (include only demo patients).

Do you wish to

Use P (print output) or B (browse output on screen).

The application displays the Frequency of Problems report (Figure 13-92).

+ Enter ?? for more actions
S Select Item(s) + Next Screen Q Quit Item Selection
R Remove Item(s) - Previous Screen E Exit Report

Select Action: S//

**Figure 13-93: Sample Sort Item Selection Menu options**

Use this menu to determine visit data that will be selected for the report. If you do not select any item (immediately use the Quit Item Selection option), all visits will be used.

The prompts continue.

Include which POV/s

Use one of the following: P (Primary POV only) or S (Primary and Secondary POVs).

Select Type of Report

Use one of the following: L (List of items with counts) or B (Bar Chart, required 132 column printer).

How many entries do you want in the list (5-100)

Specify the number of entries, using any whole number 5-100.

Demo Patient/Inclusion/Exclusion

Use one of the following: I (include all patients), E (exclude demo patients), O (include only demo patients).

Do You wish to

Use one of the following: P (print output) or B (browse output on screen).

**Figure 13-94 displays the Frequency of Problems by Code Grouping report.**
### Frequency of Problems by Problem Category (FPRC)

Use the FPRC option to produce a report that generates a list of the top N Problem/POV (Problem Category) for selected visits. The prompts are below.

**Enter beginning Visit Date for Search**
- Specify the beginning visit date for the date range.

**Enter ending Visit Date for Search**
- Specify the ending visit date for the date range.

The application displays the Visit Selection Menu (Figure 13-95).
18) Priv Ins Eligibility  42)  Type of Contact  66) Personal History Item
19) Patient Encounters  43)  Activity Time  67) Designated MH Provider

RUN TIME (H.M.S): 0.0.1
End of report. PRESS ENTER:

#### Figure 13-96: Sample Frequency of Problems by Problem Category report

#### 13.4.5 Suicide Related Reports (SUIC)

Use the SUIC option to access the Suicide Reports menu (Figure 13-97).

![Options on Suicide Report menu](image)

#### 13.4.5.1 Aggregate Suicide Form Data – Standard (SSR)

This report will tally the data items specific to the Suicide Form for a date range, community, and type of suicidal behavior (specified by the user).

Below are the prompts.

**Enter Beginning Date of Suicide Act**
Specify the beginning date for the date range.

**Enter Ending Date of Suicide Act**
Specify the ending date for the date range.
Report on Suicide Forms for Suicide Acts that occurred in

Use one of the following: O (One particular Community) or A (All Communities). If you use O, other prompts will display.

Include which Suicidal Behaviors (0-9)

The application displays the suicide behaviors. You can respond with a list or a range.

Demo Patient/Inclusion/Exclusion

Use one of the following: I (include all patients), E (exclude demo patients), O (include only demo patients).

Do You wish to

Use one of the following: P (print output) or B (browse output on screen).

Figure 13-98 shows the Aggregate Suicide Form Data – Standard report.

Figure 14-3: Pop-up for default values of BH site

Below are the prompts on the pop-up.

**MH/SS/CD/OTHER Location:** Specify the name of the location where the program visits take place.
MH/SS/CD/OTHER Community: Specify the name of the community where the program visits occur.

MH/SS/CD/OTHER Clinic: Specify the name of the clinic where the program visits occur.

Default Type of Contact: Specify the type of contact setting or code (e.g., Administrative, Chart Review, etc.).

Default Appt/Walk in Response: Specify the type of visit that occurred (e.g., appointment, walk in, or unspecified).

EHR Default Community: Specify the name of the default community used in the EHR. In order to pass EHR behavioral health encounter records into the AMH v4.0 files, a Default Community of Service field was created on the AMH v4.0 site parameters’ menu. If the facility has opted to pass behavioral health encounter records created in EHR to AMH v4.0, the application will populate the Community of Service field with the value entered in the site parameter “EHR Default Community” or, if that field is blank, with the default Mental Health community value. If the default Mental Health community value is blank, the field will be populated with the default Social Services community value; if that field is also blank, the field will be populated with the default Chemical Dependency value; and if that field is blank, the default Other Community value will be used. If none of the default community fields contains a value, no behavioral health record will be created.

Below are the fields on the update window.

Update Hospital Location Defaults?

Use Y or N. If you use Y, the application displays Figure 14-4. All default settings are moved to this separate pop-up window.

MENTAL HEALTH HOSPITAL LOCATION:
SOCIAL SERVICES HOSPITAL LOCATION:
CHEMICAL DEP/ALCOHOL HOSPITAL LOCATION:
OTHER PROGRAM HOSPITAL LOCATION

Figure 14-4: Pop-up for Update Hospital Location Defaults of BH site

Below are the prompts on the pop-up.

Mental Health Location: Specify the name of the Mental Health Hospital Location where the program visits take place. This depends on how it is set up in the Scheduling application and will populate the Hospital Location Field in EHR.
**Social Services Hospital Location**: Specify the name of the Social Services Hospital Location where the program visits take place. This depends on how it is set up in the Scheduling application and will populate the Hospital Location Field in EHR.

**Chemical Dep/Alcohol Hospital Location**: Specify the name of the Chemical Dependence/Alcohol Health Hospital Location where the program visits take place. This depends on how it is set up in the Scheduling application and will populate the Hospital Location Field in EHR.

**Other Hospital Location**: Specify the name of the Other Health Hospital Location where the program visits take place. This depends on how it is set up in the Scheduling application and will populate the Hospital Location Field in EHR.

Default HEALTH Summary Type

Specify the type of health summary printed from within the AMH package. Typically, the default value is the Mental Health/Social Services summary type. Refer to the Health Summary System Manuals for further information on the available types.

Default Response on Form Print

Your response applies to when you print a Mental Health/Social Services record. Use one of the following: B (both), F (full), S (suppressed form), T (Suppressed - 2 copies), E (Full – 2 copies). The suppressed report does NOT display the following information: Chief Complaint, SOAP note, measurement data, screenings.

A full encounter form prints all data for a patient encounter including the SOAP note. The suppressed version of the encounter form will not display the SOAP note for confidentiality reasons. It is important to note that the SOAP and chief complaint will be suppressed, but the comment/next appt, activity code, and POV will still appear on the printed encounter.

Suppress Comment on Suppressed Form?

Use Y or N to suppress the provider’s comments.

Number of past POVs to display

Specify the number of the past POVs to be displayed on the Patient Data Entry screen. This response must be a whole number between zero and five.

Exclude No Shows on last DX Display?

Use Y or N.
DSM-5 Implementation Date

From the date listed forward the application will use the DSM-5 Code Set. Section Appendix C: provides information about DSM copyright and trademark information.

Update PCC Link Features?

Use Y or N. If you use Y, the application displays the Update PCC Link Feature Parameters pop-up window (Figure 14-5).

```
**** Update PCC Link Feature Parameters ****
================================================================================
Type of PCC Link
Type of Visit to create in PCC
Interactive PCC Link?
Allow PCC Problem List Update?
Update PCC LINK Exceptions?
```

Figure 14-5: Fields on the Update PCC Link Feature Parameters pop-up

The underlined fields are required on the pop-up window.

**Type of PCC Link:** What you use determines the type of data that passes from AMH to the PCC. Use one of the following:

- **No Link Active.** Use this option to have the data link between the two modules turned off. No data is passed to the PCC visit file from the AMH application (including the Health Summary). Therefore, because the RPMS Third Party Billing Package processes encounters in PCC, an alternative billing process will need to be established. If you leave this field blank, it is the same as choosing this option and no data will pass to PCC.

- **Pass STND Code and Narrative.** Use this option to have all patient contacts in the Behavioral Health programs passed to the PCC visit file using the same ICD-10 code and narrative, as defined by the program. This approach does not facilitate billing because all encounters will appear the same. For example, if the code and narrative are entered in the site parameters as Z71.9, Encounter, all encounters will have the ICD code of Z71.9 and narrative of Encounter.

- **Pass All Data as Entered (No Masking).** Use this option to have all DSM-5 and Problem Codes passed as ICD codes as shown in the crosswalk along with the narrative as written by the provider. This link type is the one most preferred by billers and coders since the actual ICD code and narrative display in PCC.
• Pass Codes and Canned Narrative. Use this option to have both DSM-5 and
   Problem Codes converted to ICD codes as shown in the crosswalk and
   passed with a single standard narrative, as defined by the program, for all
   contacts. This type of link facilitates billing by passing the POV entered in
   AMH as ICD codes although the standard narrative is not passed to the Health
   Summary.

   For “Pass STND Code and Narrative” and “Pass Codes and Canned Narrative”
   options, the application displays the Standard Code to Use pop-up.

   Standard ICD-9 Code to Use (Option 2 and 5 ONLY): V65.40
   Standard ICD-10 Code to Use (Option 2 and 5 ONLY): Z71.9
   Narrative for MH Program: MH/SS/SA COUNSELING
   Narrative for SS Program: SS VISIT

   Figure 14-6: Standard code to use screen

   With each of these link types, standard data is passed to the PCC. You can specify
   those standards using the Standard Code to Use screen. The standard code, shown in
   the first line, will be passed if using Pass STND Code and Narrative. The narrative
   entered will be the only narrative passed if you have selected Pass STND Code and
   Narrative and Pass Codes and Canned Narrative options.

   Type of Visit to create in PCC: What you use determines the type of visit created
   from the encounter record you enter into AMH. Use one of the following, depending
   on the classification of the BH programs at your facility.

   • I (IHS)
   • C (Contract)
   • 6 (638 Program)
   • T (Tribal)
   • O (Other)
   • V (VA)
   • P (Compacted Program)
   • U (Urban Program)

   Interactive PCC Link?: Use Y or N. The AMH site parameters contain a question
   about an interactive PCC link to address an issue with the PIMS Scheduling package.
   Because it is possible to set up a clinic in the Scheduling package that initiates a PCC
   record at check in, some sites were creating two separate records for each individual
   patient encounter in the behavioral health clinics. Leaving the field blank is the same
   as using N (for this prompt) and the interactive link will not be turned on.
In the Scheduling package, if the clinic set-up response is YES to the question about creating an encounter at check in, then the Interactive PCC Link question in the AMH site parameters must also be answered YES. If the clinic set up in the Scheduling package has a negative response, then the Interactive Link question in AMH should be set to NO.

**Note:** There should never be a mismatched response where one package has YES and the other NO.

**Allow PCC Problem List Update?:** Use Y or N to allow the ability to update a patient’s PCC problem list from within AMH.

**Update PCC LINK Exceptions?:** (Figure 14-7) Use Y or N to determine if you want to set data passing parameters for individuals that are different from the program default.

</tbody>
</table>

Figure 14-7: Setting up PCC link exceptions

Below are the fields on the update window.

**Turn Off EHR to BH Link?**

Use Y or N. A site parameter was created to give sites the ability to opt out of the new behavioral health (BH) Electronic Health Record (EHR) visit functionality. This functionality allows BH providers to enter a visit into the EHR that passes first to PCC and then to the behavioral health database (AMH). These visits display in the EHR as well as the BH applications, AMH v4.0 and the RPMS Behavioral Health System v4.0 GUI.

The name of the site parameter is “Turn Off EHR to BH Link” and it is accessed via the AMH v4.0 Manager Utilities module SITE menu option. The default setting on this new site parameter is “NO” and no action is required if sites will be deploying the BH EHR functionality. If sites will not be deploying the BH EHR visit functionality, then the site parameter should be changed to “YES.”

**Turn on PCC Coding Queue?**

Use Y (yes) or N (no).

- If you use Y, the visits will not be passed directly to the billing package. The visits will be marked as incomplete and must be reviewed by local data entry staff, billers, or coders.
- If you use N, all visits will continue to pass to PCC as complete.
Because the visits entered in the behavioral health system have always been marked as complete, the visits were going through PCC to the claims generator without review. With this version of the software, sites are given the option of transmission to the Coding Queue or continuing to send visits to PCC marked as complete.

In addition to establishing an option on the site parameters’ menu to turn on the Coding Queue, an option that can be placed on data entry staff’s RPMS menu has been created. Because the SOAP/Progress Notes related to visits created in AMH do not pass to PCC, the data entry staff, billers, and/or coders needed some method to access the notes for review. The option will allow them to review the specifics for a particular visit but will not give them full access to AMH. For example, they will not be able to view treatment plans, case status information, or the Suicide Reporting Forms.

Turning on the link to the Coding Queue in the Behavioral Health System should not be done if the PCC Coding Queue has not been activated. However, if the PCC Coding Queue has been activated and the site wants the AMH generated visits to be reviewed, complete the following steps:

a. Log in to AMH v4.0 and select the Manager Utilities menu.
b. Select the Site Parameters option and enter the name of the site you want to update.
c. On the site parameters entry window, scroll down to the “Turn on PCC Coding Queue” field.
d. Type Y at this field.
e. Save the changes to the site parameters.

Once the coding queue option has been turned on and the changes to the site parameters are saved, any visits documented in AMH v4.0 will be flagged as incomplete. Visits created the same day but before the site parameters were changed will still be marked as complete. The date and time the visit was entered in RPMS determines the flag to be applied, not the date and time of service.

Update Provider Exceptions to E Sig?

Use Y (yes) or N (no). The electronic signature function is available on the PDE, SDE, Intake, and Group entry menus (in roll and scroll) and also available on the One Patient, All Patients, Intake, and Group entry menus (in the GUI). Only those encounter records with signed SOAP/Progress Notes will pass to PCC.

If you use Y, Figure 14-8 displays.

Electronic Signature will not be activated for providers added to this list.

PROVIDER:
Populate the PROVIDER field with the name of provider with exception to electronic signature.

Because some sites might still use data entry staff to enter behavioral health visits, the ability to opt out of the electronic signature for a specific provider has been added to the site parameters menu. If a site determines that a particular provider should be exempted from the electronic signature, those visits will pass to PCC but show up as unsigned on the visit entry display.

Update those allowed to see all records?

Use Y or N to determine if you want to update those allowed to see all records.

- If the user’s name is added to this list, the user will be able to see all records entered into the system, whether the user was the provider of the visit or not, or whether the provider created the record or not.
- If the user’s name is not added to this list, only those encounter records the user created or those on which the user was a provider will be visible to that user.

The “Help” prompt has been updated and provides the following information when the user types in a question mark (?): “If users need to see records other than their own, their names should be added to this list. Type a Y to update the list.”

If you use Y, Figure 14-9 displays. You can add another user to the list. This new user will be able to see all visits when using the SDE or PDE options.

Enter only those users who should be permitted to see all Visit and Intake records for all patients whether they were the provider of record or the user who entered the record or not. Users not entered on this list will see only those Visits or Intake records that they entered or for which they were the provider of record. This parameter applies to the SDE menu option and all other options that display Visit and Intake information.

+THETA, SHIRLEY
PHI, LISA M
RHO, SUSAN P
ALPHA, WENDY

Figure 14-9: List of names allowed to see all records

Update those allowed to override delete?

Use Y or N to determine if you want to update those allowed to override delete.
If you use Y, Figure 14-10 displays. You can add another name to the list.

Enter only those users who should be permitted to delete any Intake document, signed or unsigned, whether they are the user who entered the Intake document or the provider of record.

<table>

</tr>
<tr>
<td>NU, KAREN</td>
</tr>
</tbody>
</table>

Figure 14-10: List of names allowed to delete any Intake document

Update those allowed to share visits?

Use Y or N to update those allowed to share visit information via RPMS mail message.

If you use Y, Figure 14-11 displays. Here you can add a new name at the “User allowed to share visits via mail” prompt. All users permitted to share visit information via RPMS mail messages should be entered here.

Entering users into this field will give them access to send a copy of a completed encounter form (either full or suppressed) to other RPMS users. Keep confidentiality issues in mind when deciding on who should be given this access.

<table>

</table>

Figure 14-11: Sample pop-up to enter user names allowed to share visits via mail

Update those allowed to order Labs?

Use Y or N to permit those allowed to order lab tests.

If you use Y, Figure 14-12 displays. Here you can add a new name at the “User Permitted to Order Labs” prompt. All users permitted to order lab tests should be entered here.

The users that you enter into this field will be given access to order LAB tests through the SEND PATIENT option. If a user is not entered here he/she will not be granted access to the LAB SEND PATIENT option.

Figure 14-12: Pop-up to enter user names allowed to order labs

If you are using the RPMS Pharmacy System, enter the Division.

Specify the name of the division for the RPMS Pharmacy System.

14.2 Export Utility Menu (EXPT)

Use the EXPT option to access the options on the Export Utility Menu (Figure 14-13).

Figure 14-13: Options on the Export Utility Menu

Use the options on this menu to pass data from your facility to the IHS Headquarters office for statistical reporting purposes.

**Important:** This set of utilities should only be accessed and used by the site manager, the BH program manager, or designee.

These options should be familiar to site managers and other RPMS staff who generate exports. The recommended sequence for their use follows those from PCC-CHK, clean, GEN, DISP, ERRS, transmit. RGEN, RSET and OUTP should be reserved for expert use as required.

14.2.1 Generate BH Transactions for HQ (GEN)

Use the GEN option to generate AMH transactions to be sent to HQ. The transactions are for records posted between a specified date range.

The transactions are for records posted since the last time you did an export up until yesterday. Both BH visit records and Suicide forms will be exported.
Type the caret (^) at any prompt and the application will ask you to confirm your entries prior to generating transactions.

Figure 14-14 displays.

| The inclusive dates for this run are DEC 28, 2008 through APR 18, 2009. |
| The location for this run is DEMO INDIAN HOSPITAL. |
| Do you want to continue? N// |

Figure 14-14: Sample information before continuing

Do you want to continue?
Use Y or N. If you use N, you return to the Export Utility menu. If you use Y, the prompts continue.

Do you want to QUEUE this to run at a later time?
Use Y or N. If you use Y, the generation will be put in the queue. If you use N, the generate process continues. The BH export generally takes less than five minutes to generate. It will still tie up your computer while doing the export (but it is quick). Figure 14-15 shows a sample.

| Enter beginning date for this run: SEP 1, 2008 |
| The inclusive dates for this run are SEP 1, 2008 THROUGH SEP 30, 2008 |
| The location for this run is the ________________ HOSPITAL/CLINIC. |
| Do you want to continue (Y/N) N// Y |
| Generating transactions. Counting records ( * 100* ) |
| *100* Transactions were generated. |
| Updating log entry. |
| Deleting cross reference entries (100) |
| RUN TIME (H.M.S): 0.3.56 |

Figure 14-15: Sample information for generating the new log entry

14.2.2 Display a Log Entry (DISP)

Use the DISP option to display the extract log information in a specified date range.

Select MHSS EXTRACT LOG BEGINNING DATE
Specify the extract log beginning date. (You can view the extract date by typing a question mark [?] at this prompt.)

DEVICE
Select the device to output the log information.
Figure 14-16 shows the extract log information.

![Extract Log Information](image)

**14.2.3 Print Export Log (PRNT)**

Use the PRNT option to display the export extract log report.

The application displays the previous selection beginning date.

**START WITH BEGINNING DATE**

Press Enter to accept the default date. Otherwise, specify the first beginning date of the date range.

**GO TO BEGINNING DATE**

Press Enter to accept to default date. Otherwise, specify the next beginning date.

**DEVICE**

Specify the device to print/browse the log.

The application displays the Mental Health/Social Service Export Extract Log (Figure 14-17).

<table>

</tr>
</tbody>
</table>
14.2.4 Re-generate Transactions (RGEN)

Use the RGEN option to re-generate transactions between two dates.

**Warning**: Do not use this option if you are not an expert user.

The prompts are below.

Select MHSS EXTRACT LOG BEGINNING DATE
Specify the beginning date.

If you specified an existing date, Figure 14-18 displays.

Log entry 6 was for date range MAR 2, 2007 through JUN 16, 2007
And generated 44 transactions from 67 records.
This routine will generate transactions.
Do you want to regenerate the transactions for this run? N//

Figure 14-18: Sample information about re-generate transactions

14.2.5 Re-set Data Export Log (RSET)

Use the RSET option to reset the BH Data Transmission Log. You must be absolutely sure that you have corrected the underlying problem that caused the Transmission process to fail in the first place.

The BH Data Transmission log entry you choose will be REMOVED from the log file and all Utility and Data globals associated with that run will be killed!

You must now select the Log Entry to be reset. <Select carefully>

The BH Data Transmission log entry you choose will be removed from the log file and all Utility and Data globals associated with that run will be killed.

14.2.6 Check Records Before Export (CHK)

Use the CHK option to review all records that were posted to the BH database since the last export. It will review all records that were posted from the day after the last date of that run up until two days ago.

Figure 14-19 shows the BH Export Record Review report.
14.2.7 Print Error List for Export (ERRS)

Use the ERRS option to print/browse the report that shows all records that have been posted to the database and are still in error AFTER the latest Export/Generation.

If the records are listed here, they aren’t passing to PCC and the billing package.

Below are the prompts.

Select MHSS EXTRACT LOG BEGINNING DATE

Specify the extract log beginning date. (You can view the extract date by typing a question mark [?] at this prompt.)

**Note:** Use the Check Records before Export option to determine all errors before running the generation. Correct these remaining errors before the next export/generation.

DEVICE

Specify the device to print/browse the report.

Figure 14-20 shows the MHSS Extract Log Error Report.
14.2.8 Create OUTPUT File (OUTP)

Use the OUTP option to create an output file. Consult with the site manager on how
to create an RPMS export.

14.2.9 Set Automated Export Option (SAE)

These options control the destination of the BHSX Export once it is generated. If no
selection is made the application comes set with option 1 Automatically Send
Export to HQ.

Select HSS SITE Parameters
Use the site parameter to set the destination for the export file.

Auto Export Option
Use one of the following: 1 Automatically Send Export to HQ, 2
Automatically Send Export to Area, 3 Automatically Send Export to Both
Area and HQ, 4 Do Not Automatically Send Exports.

14.3 Re-Set Patient Flag Field Data (RPFF)

Use the RPFF option to reset all patient flag fields to null. This should be done each
time you want to flag patients for a different reason. You can reset one particular flag
or all flags. You may use this reset option to reassign a particular flag or all flags as
needed.

Below are the prompts.

Reset which flags
Use one of the following: A (all flags) or O (one particular flag). If you use O,
other prompts will display.

Are you sure you want to do this?
Use Y or N. If you use Y, Figure 14-21 shows the information:
14.4 Display Log of Who Edited Record (DLWE)

Use the DLWE option to display a list of who edited a BH record.

Below are the prompts.

Enter ENCOUNTER DATE
Specify the date of the encounter.

Enter LOCATION OF ENCOUNTER
If known, specify the location. Otherwise, press Enter.

Enter PATIENT
Specify the name of the patient.

Figure 14-22 shows the Behavioral Health Visits for the date specified. The following examples were visits with no location and no patient.
14.5 Add/Edit Local Service Sites (ELSS)

Use the ELSS option to add/edit location service sites. If you add a new location service site, you give it a name and abbreviation. Counts of these visits can be recovered using the GEN option in Encounter Reports or ACT in the Workload reports.

The prompts are below.

Select MHSS LOCAL SERVICE SITES

Specify a new or existing local service site. Specify a new service site using 3–30 characters.

If you specify a new service site, the application confirms that you are adding this new service site (use Y or N); if you use N, the above prompt repeats.

If you specify an existing factor, for example, HEADSTART, the application displays the following prompt:

LOCAL SERVICE SITE: HEADSTART/

You can accept the existing service site by pressing Enter. Otherwise, you can give it a new service site name.

ABBREVIATION: HEAD

You can accept the abbreviation of the existing service site by pressing Enter. Otherwise, you can give it another abbreviation.

14.6 Add Personal History Factors to Table (EPHX)

Use the EPHX option to add personal history factors to the four-item list initially identified for use in BH programs. Added items will be shown as items in the Personal History field any place this option exists in a Select or Print field in the GEN reports.

The prompts are below.

Enter a PERSONAL HISTORY FACTOR

Specify a new or existing personal history factor. If you use a new factor, using 3–30 characters, with no numeric or starting with punctuation.
If you specify a new factor, the application confirms that you are adding this new factor (use Y or N); if you use N, the above prompt repeats.

If you specify an existing factor, for example, FAS, the application displays the following prompt:

FACTOR: FAS//

You can accept the existing factor by pressing Enter. Otherwise, you can give it a new factor name.

14.7 Delete BH General Retrieval Report Definitions (DRD)

Use the DRD option to delete a PCC Visit or Patient General Retrieval report definition. This option enables the user to delete a PCC Visit or Patient General Retrieval report definition. For example, if a provider had created multiple report definitions using GEN or PGEN and saved the logic, these reports may be deleted when the provider leaves the facility.

The prompts are below.

REPORT NAME

Specify the name of the report whose definition you want to remove. Use a question mark (?) at this prompt to view a list of existing definitions.

Are you sure you want to delete the [report name] definition?

The [report name] is the name of the report you specified in the previous prompt. Use Y or N at this confirmation prompt.

14.8 Edit Other EHR Clinical Problem Code Crosswalk (EEPC)

Use the EEPC option to loop through all MHSS PROBLEM/DSM-5 table entries created by EHR users to change the grouping from the generic 99.9 OTHER EHR CLINICAL grouping to a more specific MHSS PROBLEM CODE grouping.

In the RPMS behavioral health applications, the Purpose of Visit (POV) is recorded as either a BH Problem Code or DSM-5 code. For the purpose of reports, these codes are grouped within larger problem code groupings and then again in overarching categories. For example, DSM-5 code F32.0 Major Depressive Disorder, Single Episode, Mild is also stored as problem code grouping 14 Depressive Disorders and problem category Psychosocial Problems.
In the RPMS EHR, the POV is recorded using ICD-10 or SNOMED codes that are mapped to ICD codes and pulled into AMH, not DSM-5 codes. Many ICD and DSM numeric codes are identical. There may be instances when a provider selects an ICD code that does not have a matching DSM code. When this occurs, it will be dynamically added to the MHSS PROBLEM/DSM-5 table. Once the ICD code is in the MHSS PROBLEM/DSM-5 table, then it is accessible to users in AMH as well.

These ICD codes that have been added to the MHSS PROBLEM/DSM-5 table will not have been automatically assigned to the appropriate BH problem code group. To ensure that these ICD codes are captured in AMH reports that have the option to include problem code groupings, a site can manually assign the code to the appropriate group. The assignment of this code to a group only needs to be done one time.

Below are sample prompts for a site.

- **CODE: V72.3**
- **ICD Narrative: GYNECOLOGIC EXAMINATION**

**Enter the Problem Code Grouping**

Specify the grouping code for the above Code and ICD Narrative.

The application provides you with the caret (^) option so that you don’t have to go all the way through the entries.

**14.9 Update Locations a User Can See (UU)**

Use the UU option to specify the location a user can view in this application.

AMH v4.0 contains a new field called **BH User** that will permit a site to screen the locations that a user may access to view or enter information.

If a site wants to limit the visits by location that a BH user can access then they will enter that user into this file and list all the facilities/locations that that user is allowed to see or access. If an entry is made in this file for a user, that user will only be able to look up patients with a health record at those facilities, only patients with health records at those facilities will display on patient lists and reports, and that user will only be able to view/access visits to those locations. If a user is not entered into this file, that person will be able to see visits to all locations. This file will only be updated if a site is multi-divisional and there is a need to restrict the viewing of data between sites.
Select BH USER NAME

Specify the user you want to use. This will add the user to the BH User file. A ScreenMan screen will pop-up and the manager can enter all of the locations that the user is able to access or see on the screen.

Figure 14-24 shows the **Update Visit Locations a User can See** window.

<table>
<thead>
<tr>
<th>**** Update Visit Locations a User can See ****</th>
</tr>
</thead>
<tbody>
<tr>
<td>USER: BETA,LORI</td>
</tr>
<tr>
<td>Location: DEMO INDIAN HOSPITAL</td>
</tr>
<tr>
<td>Location: SELLS HOSP</td>
</tr>
<tr>
<td>Location:</td>
</tr>
<tr>
<td>Location:</td>
</tr>
<tr>
<td>Location:</td>
</tr>
<tr>
<td>COMMAND:</td>
</tr>
<tr>
<td>Press &lt;PF1&gt;H for help Insert</td>
</tr>
</tbody>
</table>

In the above example, the provider Lori Beta will only be able to access visits to Demo Indian Hospital and Sells Hospital. If a patient that she is treating had a visit to Phoenix Hospital, she would not see that visit information. This logic applies to any option that displays or reports on visit data. For example, Lori Beta chooses option “Browse Visits,” she would not see any visit in the visit list that was to a location other than the two listed above.
Appendix A: Activity Codes and Definitions

AMH activity codes are presented here by category for ease in reviewing and locating particular codes. The category labels are for organizational purposes only and cannot be used alone to report activities. However, aggregate reports can be organized by these activity categories.

All the Activity Codes shown with a three-letter acronym are assumed to involve services to a specific patient. During the data entry process, if you enter one of these activity codes, you must also enter the patient’s name so that the data you enter can be added to the patient’s visit file.

A.1 Patient Services - Patient Always Present (P)

Direct services provided to a specific person (client/patient) to diagnose and prognosticate (describe, predict, and explain) the recipient’s mental health status relative to a disabling condition or problem; and, where indicated, to treat and/or rehabilitate the recipient to restore, maintain, or increase adaptive functioning.

01–Twelve Step Work – Group (TSG)

Twelve Step work facilitation in a group setting; grounded in the concept of the Twelve Step model of recovery and that the problem—alcoholism, drug dependence, overeating, etc.—is a disease of the mind, body, and spirit.

02–Twelve Step Work - Individual (TSI)

Twelve Step work facilitation in an individual setting grounded in the concept of the Twelve Step model of recovery and that the problem—alcoholism, drug dependence, overeating, etc.—is a disease of the mind, body, and spirit.

03–Twelve Step Group (TSG)

Participation in a Twelve Step recovery group, including but not limited to AA, NA, Alateen, Al-Anon, CoDA (Co-depends Anonymous).and OA (Overeatrs Anonymous).

04-Re-assessment, Patient Present (RAS)

Formal assessment activities intended to reevaluate the patient’s diagnosis and problem. These services are used to document the nature and status of the recipient’s condition and serve as a basis for formulating a plan for subsequent services.
11-Screening (SCN)
Services provided to determine in a preliminary way the nature and extent of the recipient’s problem in order to link him/her to the most appropriate and available resource.

12-Assessment/Evaluation (EVL)
Formal assessment activities intended to define or delineate the client/patient’s diagnosis and problem. These services are used to document the nature and status of the recipient’s condition and serve as a basis for formulating a plan for subsequent services.

13-Individual Treatment/Counseling/Education (IND)
Prescribed services with specific goals based on diagnosis and designed to arrest, reverse, or ameliorate the client/patient’s disease or problem. The recipient in this case is an individual.

15-Information and/or Referral (REF)
Information services are those designed to impart information on the availability of clinical resources and how to access them. Referral services are those that direct or guide a client/patient to appropriate services provided outside of your organization.

16-Medication/Medication Monitoring (MED)
Prescription, administration, assessment of drug effectiveness, and monitoring of potential side effects of psychotropic medications.

17-Psychological Testing (TST)
Examination and assessment of client/patient’s status through the use of standardized psychological, educational, or other evaluative test. Care must be exercised to assure that the interpretations of results from such testing are consistent with the socio-cultural milieu of the client/patient.

18-Forensic Activities (FOR)
Scientific and clinical expertise applied to legal issues in legal contexts embracing civil, criminal, and correctional or legislative matters.

19-Discharge Planning (DSG)
Collaborative service planning with other community caregivers to develop a goal-oriented follow-up plan for a specific client/patient.

20-Family Facilitation (FAC)
Collection and exchange of information with significant others in the client/patient’s life as part of the clinical intervention.
21-Follow-through/Follow-up (FOL)
Periodic evaluative review of a specific client/patient’s progress after discharge.

22-Case Management (CAS)
Focus is on a coordinated approach to the delivery of health, substance abuse, mental health, and social services, linking clients with appropriate services to address specific needs and achieve stated goals. May also be called Care Management and/or Service Coordination.

23-Other Patient Services not identified here (OTH)
Any other patient services not identified in this list of codes.

47-Couples Treatment (CT)
Therapeutic discussions and problem-solving sessions facilitated by a therapist sometimes with the couple or sometimes with individuals.

48-Crisis Intervention (CIP)
Short-term intervention of therapy/counseling and/or other behavioral health care designed to address the presenting symptoms of an emergency and to ameliorate the client’s distress.

85-Art Therapy (ART)
The application of a variety of art modalities (drawing, painting, clay, and other mediums), by a professional Art Therapist, for the treatment and assessment of behavioral health disorders; based on the belief that the creative process involved in the making of art is healing and life enhancing.

86-Recreation Activities (REC)
Recreation and leisure activities with the purpose of improving and maintaining clients’/patients’ general health and well-being.

88-Acupuncture (ACU)
The use of the Chinese practice of Acupuncture in the treatment of addiction disorders (including withdrawal symptoms and recovery) and other behavioral health disorders.

89-Methadone Maintenance (MET)
Methadone used as a substitute narcotic in the treatment of heroin addiction; administered by a federally licensed methadone maintenance agency under the supervision of a physician. Services include methadone dosing, medical care, counseling and support and disease prevention and health promotion.
90–Family Treatment (FAM)
Family-centered therapy with an emphasis on the client/patient’s functioning within family systems and the recognition that addiction and behavioral health disorders have relational consequences; often brief and solution focused.

91–Group Treatment (GRP)
This form of therapy involves groups of patients/clients who have similar problems that are especially amenable to the benefits of peer interaction and support and who meet regularly with a group therapist or facilitator.

92–Adventure Based Counseling (ABC)
The use of adventure-based practice to effect a change in behaviors (both increasing function and positive action and decreasing dysfunction and negative action) as it relates to health and/or mental health.

93–Relapse Prevention (REL)
Relapse prevention approaches seek to teach patients concrete strategies for avoiding drug use episodes. These include the following:

- Cataloging situations likely to lead to alcohol/drug use (high-risk situations)
- Strategies for avoiding high-risk situations
- Strategies for coping with high-risk situations when encountered
- Strategies for coping with alcohol/drug cravings
- Strategies for coping with lapses to drug use to prevent full-blown relapses

94–Life Skills Training (LST)
Psychosocial and interpersonal skills training designed to help a patient or patients make informed decisions, communicate effectively, and develop coping and self-management skills.

95–Cultural Activities - Pt. Present (CUL)
Participation in educational, social, or recreational activities for the purpose of supporting a client/patient’s involvement, connection, and contribution to the patient’s cultural background.

96–Academic Services (ACA)
Provision of alternative schooling under the guidelines of the state education program.
97–Health Promotion (HPR)
Any activities that facilitate lifestyle change through a combination of efforts to enhance awareness, change behavior, and create environments that support good health practices.

A.2 Support Services - Patient Not Present (S)
Indirect services (e.g., information gathering, service planning, and collaborative efforts) undertaken to support the effective and efficient delivery or acquisition of services for specific clients/patients. These services, by definition, do not involve direct recipient contact. Includes:

05-Re-assessment, Patient Not Present
Reassessment or reevaluation activities when patient is not present at time of service delivery.

24-Material/Basic Support (SUP)
Support services required to meet the basic needs of the client/patient for food, shelter, and safety.

25-Information and/or Referral (INF)
Information services are those designed to impart information on the availability of clinical resources and how to access them. Referral services are those that direct or guide a client/patient to appropriate services provided outside of your organization.

26-Medication/Medication Monitoring (MEA)
Prescription, assessment of drug effectiveness, and monitoring of potential side effects of psychotropic medications. Patient is not present at the time of service delivery.

27-Forensic Activities (FOA)
Scientific and clinical expertise applied to legal issues in legal contexts embracing civil, criminal, and correctional or legislative matters. Patient is not present at time of service delivery.

28-Discharge Planning (DSA)
Collaborative service planning with other community caregivers to develop a goal oriented follow-up plan for a specific client/patient.

29-Family Facilitation (FAA)
Collection and exchange of information with significant others in the client/patient’s life as part of the clinical intervention.
30-Follow-up/Follow-through (FUA)
Periodic evaluative review of a specific client/patient’s progress after discharge.

31-Case Management (CAA)
Focus is on a coordinated approach to the delivery of health, substance abuse, mental health, and social services, linking clients/patients with appropriate services to address specific needs and achieve stated goals. May also be called Care Management and/or Service Coordination. Patient is not present at the time of service delivery.

33-Technical Assistance
Task-specific assistance to achieve an identified end.

34-Other Support Services
Any other ancillary, adjunctive, or collateral services not identified here.

44-Screening
Activities associated with patient/client screening where no information is added to the patient/client’s file.

45-Assessment/Evaluation
Assessment or evaluation activities when patient is not present at time of service delivery.

49-Crisis Intervention (CIA)
Patient is not present. Short-term intervention of therapy/counseling and/or other behavioral healthcare designed to address the presenting symptoms of an emergency and to ameliorate the client’s distress.

A.3 Community Services (C)
Assistance to community organizations, planning groups, and citizens’ efforts to develop solutions for community problems. Includes the following:

35-Collaboration
Collaborative effort with other agency or agencies to address a community request.

36-Community Development
Planning and development efforts focused on identifying community issues and methods of addressing these needs.
37-Preventive Services
Activity, class, project, public service announcement, or other activity whose
primary purpose is to prevent the use/abuse of alcohol or other substances
and/or improve lifestyles, health, image, etc.

38-Patient Transport
Transportation of a client to or from an activity or placement, such as a
medical appointment, program activity, or from home.

39-Other Community Services
Any other form of community services not identified here.

40-Referral
Referral of a client to another agency, counselor, or resource for services not
available or provided by the referring agency/program. Referral is limited to
providing the client with information and might extend to calling and setting
up appointments for the client.

87-Outreach
Activities designed to locate and educate potential clients and motivate them
to enter and accept treatment.

A.4 Education Training (E)
Participation in any formal program leading to a degree or certificate or any
structured educational process designed to impart job related knowledge, attitudes,
and skills. Includes:

41- Education/Training Provided
42- Education/Training Received
43- Other Education/Training

A.5 Administration (A)
Activities for the benefit of the organization and/or activities that do not fit into any
of the above categories. Includes:

32-Clinical Supervision Provided
Clinical supervision is a process based upon a clinically-focused professional
relationship between the practitioner engaged in professional practice and a
clinical supervisor.
50-Medical Rounds (General)
On the inpatient unit, participation in rounds designed to address active medical/psychological issues with all members of the treatment team and to develop management plans for the day.

51-Committee Work
Participation in the activities of a body of persons delegated to consider, investigate, take action on, or report on some matter.

52-Surveys/Research
Participation in activities aimed at identification and interpretation of facts, revision of accepted theories in the light of new facts, or practical application of such new or revised theories.

53-Program Management
The practice of leading, managing, and coordinating a complex set of cross-functional activities to define, develop, and deliver client services and to achieve agency/program objectives.

54-Quality Improvement
Participation in activities focused on improving the quality and appropriateness of medical or behavioral healthcare and other services. Includes a formal set of activities to review, assess, and monitor care to ensure that identified problems are addressed.

55-Supervision
Participation in activities to ensure that personnel perform their duties effectively. This code does not include clinical supervision.

56-Records/Documentation
Review of clinical information in the medical record/chart or documentation of services provided to or on behalf of the client. This does not include the time spent in service delivery.

57-Child Protective Team Activities
Participation in a multi-disciplinary child protective team to evaluate alleged maltreatments of child abuse and neglect, assess risk and protective factors, and provide recommendations for interventions to protect children and enhance their caregiver’s capacity to provide a safer environment when possible.
58-Special Projects
A specifically-assigned task or activity which is completed over a period of time and intended to achieve a particular aim.

59-Other Administrative
Any other administrative activities not identified in this section.

60-Case Staffing (General)
A regular or ad-hoc forum for the exchange of clinical experience, ideas and recommendations.

66-Clinical Supervision Received
Clinical supervision is a process based upon a clinically-focused professional relationship between the practitioner engaged in professional practice and a clinical supervisor.

A.6 Consultation (L)
Problem-oriented effort designed to impart knowledge, increase understanding and insight, and/or modify attitudes to facilitate problem resolution. Includes:

61-Provider Consultation (PRO)
Focus is a specific patient and the consultation is with another service provider. The purpose of the consultation is of a diagnostic or therapeutic nature. Patient is never present.

62-Patient Consultation (Chart Review Only) (CHT)
Focus is a specific patient and the consultation is a review of the medical record only. The purpose of the consultation is of a diagnostic or therapeutic nature. Patient is never present.

63-Program Consultation
Focus is a programmatic effort to address specific needs.

64-Staff Consultation
Focus is a provider or group of providers addressing a type or class of problems.

65-Community Consultation
Focus is a community effort to address problems. Distinguished from community development in that the consultant is not assumed to be a direct part of the resultant effort.
A.7 Travel (T)

71-Travel Related to Patient Care
Staff travel to patient’s home or other locations – related to provision of care. Patient is not in the vehicle.

72 Travel Not Related to Patient Care
Staff travel to meetings, community events, etc.

A.8 Placements (PL)

75-Placement (Patient Present) (OHP)
Selection of an appropriate level of service, based on assessment of a patient’s individual needs and preferences.

76-Placement (Patient Not Present) (OHA)
Selection of an appropriate level of service, based on assessment of a patient’s individual needs and preferences. This activity might include follow-up contacts, additional research, or completion of placement/referral paperwork when the patient is not present.

A.9 Cultural Issues (O)

81-Traditional Specialist Consult (Patient Not Present) (TRA)
Seeking recommendation or service from a recognized Indian spiritual leader or Indian doctor with the patient present. Such specialists can be called in either as advisors or as direct providers, when agreed upon between client and counselor.

82-Traditional Specialist Consult (Patient Not Present) (TRA)
Seeking evaluation, recommendations, or service from a recognized Indian spiritual healer or Indian doctor (patient not present). Such specialists can be called in either as advisors or as direct providers, when agreed upon between client and counselor.

83-Tribal Functions
Services offered during or in the context of a traditional tribal event, function, or affair—secular or religious. Community members gather to help and support individuals and families in need.
84-Cultural Education to Non-Tribal Agency/Personnel

The education of non-Indian service providers concerning tribal culture, values, and practices. This service attempts to reduce the barriers members face in seeking services.

Appendix C: DSM Copyright and Trademark Information

C.1 10.2 Copyright

In all instances where any portion of the WORK or DSM-5 appears, the source and copyright status of the material must appear where the text appears and in all marketing materials. The following notice shall be used:

*Reprinted with permission from the Diagnostic and Statistical Manual of Mental Disorders, Fifth Edition. ™ Copyright ©2013 American Psychiatric Association. All Rights Reserved.

Unless authorized in writing by the APA, no part may be reproduced or used in a manner inconsistent with the APA’s copyright. This prohibition applies to unauthorized uses or reproductions in any form.

The American Psychiatric Association is not affiliated with and is not endorsing this product.

To the extent that such notice or any other copyright management information is embedded in the electronic product, LICENSEE agrees that it will not alter it or delete it. LICENSEE further agrees to require all USERS of its PRODUCT to maintain such copyright management information in its original form as provided by LICENSOR.

C.2 10.3 Trademark

LICENSEE acknowledges that DSM and DSM-5 are registered trademarks of the American Psychiatric Association and may not be used commercially without prior approval. LICENSOR grants to LICENSEE permission to use the DSM and DSM-5 trademarks on a non-exclusive basis, as part of the PRODUCT, only with proper notice and only as necessary to accomplish LICENSEE’s purpose as set out in Paragraph 1.2, above. The following notice shall be used:

*DSM and DSM-5 are registered trademarks of the American Psychiatric Association, and are used with permission herein. Use of these terms is prohibited without person of the American Psychiatric Association.
Appendix D: Rules of Behavior

The Resource and Patient Management (RPMS) system is a United States Department of Health and Human Services (HHS), Indian Health Service (IHS) information system that is *FOR OFFICIAL USE ONLY*. The RPMS system is subject to monitoring; therefore, no expectation of privacy shall be assumed. Individuals found performing unauthorized activities are subject to disciplinary action including criminal prosecution.

All users (Contractors and IHS Employees) of RPMS will be provided a copy of the Rules of Behavior (ROB) and must acknowledge that they have received and read them prior to being granted access to a RPMS system, in accordance IHS policy.

- For a listing of general ROB for all users, see the most recent edition of *IHS General User Security Handbook* (SOP 06-11a).
- For a listing of system administrators/managers rules, see the most recent edition of the *IHS Technical and Managerial Handbook* (SOP 06-11b).

Both documents are available at this IHS Web site: [http://security.ihs.gov/](http://security.ihs.gov/).

The ROB listed in the following sections are specific to RPMS.

D.1 All RPMS Users

In addition to these rules, each application may include additional ROBs that may be defined within the documentation of that application (e.g., Dental, Pharmacy).

D.1.1 Access

RPMS users shall

- Only use data for which you have been granted authorization.
- Only give information to personnel who have access authority and have a need to know.
- Always verify a caller’s identification and job purpose with your supervisor or the entity provided as employer before providing any type of information system access, sensitive information, or nonpublic agency information.
- Be aware that personal use of information resources is authorized on a limited basis within the provisions *Indian Health Manual Part 8, “Information Resources Management,”* Chapter 6, “Limited Personal Use of Information Technology Resources.”

RPMS users shall not

- Retrieve information for someone who does not have authority to access the information.
• Access, research, or change any user account, file, directory, table, or record not required to perform their official duties.

• Store sensitive files on a PC hard drive, or portable devices or media, if access to the PC or files cannot be physically or technically limited.

• Exceed their authorized access limits in RPMS by changing information or searching databases beyond the responsibilities of their jobs or by divulging information to anyone not authorized to know that information.

D.1.2 Information Accessibility

RPMS shall restrict access to information based on the type and identity of the user. However, regardless of the type of user, access shall be restricted to the minimum level necessary to perform the job.

RPMS users shall

• Access only those documents they created and those other documents to which they have a valid need-to-know and to which they have specifically granted access through an RPMS application based on their menus (job roles), keys, and FileMan access codes. Some users may be afforded additional privileges based on the functions they perform, such as system administrator or application administrator.

• Acquire a written preauthorization in accordance with IHS policies and procedures prior to interconnection to or transferring data from RPMS.

D.1.3 Accountability

RPMS users shall

• Behave in an ethical, technically proficient, informed, and trustworthy manner.

• Log out of the system whenever they leave the vicinity of their personal computers (PCs).

• Be alert to threats and vulnerabilities in the security of the system.

• Report all security incidents to their local Information System Security Officer (ISSO).

• Differentiate tasks and functions to ensure that no one person has sole access to or control over important resources.

• Protect all sensitive data entrusted to them as part of their government employment.

• Abide by all Department and Agency policies and procedures and guidelines related to ethics, conduct, behavior, and information technology (IT) information processes.
D.1.4 Confidentiality
RPMS users shall

• Be aware of the sensitivity of electronic and hard copy information, and protect it accordingly.
• Store hard copy reports/storage media containing confidential information in a locked room or cabinet.
• Erase sensitive data on storage media prior to reusing or disposing of the media.
• Protect all RPMS terminals from public viewing at all times.
• Abide by all Health Insurance Portability and Accountability Act (HIPAA) regulations to ensure patient confidentiality.

RPMS users shall not

• Allow confidential information to remain on the PC screen when someone who is not authorized to that data is in the vicinity.
• Store sensitive files on a portable device or media without encrypting.

D.1.5 Integrity
RPMS users shall

• Protect their systems against viruses and similar malicious programs.
• Observe all software license agreements.
• Follow industry standard procedures for maintaining and managing RPMS hardware, operating system software, application software, and/or database software and database tables.
• Comply with all copyright regulations and license agreements associated with RPMS software.

RPMS users shall not

• Violate federal copyright laws.
• Install or use unauthorized software within the system libraries or folders.
• Use freeware, shareware, or public domain software on/with the system without their manager’s written permission and without scanning it for viruses first.

D.1.6 System Logon
RPMS users shall

• Have a unique User Identification/Account name and password.
• Be granted access based on authenticating the account name and password entered.
• Be locked out of an account after five successive failed login attempts within a specified time period (e.g., one hour).

D.1.7 Passwords

RPMS users shall
• Change passwords a minimum of every 90 days.
• Create passwords with a minimum of eight characters.
• If the system allows, use a combination of alpha-numeric characters for passwords, with at least one uppercase letter, one lower case letter, and one number. It is recommended, if possible, that a special character also be used in the password.
• Change vendor-supplied passwords immediately.
• Protect passwords by committing them to memory or store them in a safe place (do not store passwords in login scripts or batch files).
• Change passwords immediately if password has been seen, guessed, or otherwise compromised, and report the compromise or suspected compromise to their ISSO.
• Keep user identifications (IDs) and passwords confidential.

RPMS users shall not
• Use common words found in any dictionary as a password.
• Use obvious readable passwords or passwords that incorporate personal data elements (e.g., user’s name, date of birth, address, telephone number, or social security number; names of children or spouses; favorite band, sports team, or automobile; or other personal attributes).
• Share passwords/IDs with anyone or accept the use of another’s password/ID, even if offered.
• Reuse passwords. A new password must contain no more than five characters per eight characters from the previous password.
• Post passwords.
• Keep a password list in an obvious place, such as under keyboards, in desk drawers, or in any other location where it might be disclosed.
• Give a password out over the phone.
D.1.8 Backups

RPMS users shall

- Plan for contingencies such as physical disasters, loss of processing, and disclosure of information by preparing alternate work strategies and system recovery mechanisms.
- Make backups of systems and files on a regular, defined basis.
- If possible, store backups away from the system in a secure environment.

D.1.9 Reporting

RPMS users shall

- Contact and inform their ISSO that they have identified an IT security incident and begin the reporting process by providing an IT Incident Reporting Form regarding this incident.
- Report security incidents as detailed in the *IHS Incident Handling Guide* (SOP 05-03).

RPMS users shall not

- Assume that someone else has already reported an incident. The risk of an incident going unreported far outweighs the possibility that an incident gets reported more than once.

D.1.10 Session Timeouts

RPMS system implements system-based timeouts that back users out of a prompt after no more than 5 minutes of inactivity.

RPMS users shall

- Utilize a screen saver with password protection set to suspend operations at no greater than 10 minutes of inactivity. This will prevent inappropriate access and viewing of any material displayed on the screen after some period of inactivity.

D.1.11 Hardware

RPMS users shall

- Avoid placing system equipment near obvious environmental hazards (e.g., water pipes).
- Keep an inventory of all system equipment.
- Keep records of maintenance/repairs performed on system equipment.
RPMS users shall not
• Eat or drink near system equipment.

D.1.12 Awareness
RPMS users shall
• Participate in organization-wide security training as required.
• Read and adhere to security information pertaining to system hardware and software.
• Take the annual information security awareness.
• Read all applicable RPMS manuals for the applications used in their jobs.

D.1.13 Remote Access
Each subscriber organization establishes its own policies for determining which employees may work at home or in other remote workplace locations. Any remote work arrangement should include policies that
• Are in writing.
• Provide authentication of the remote user through the use of ID and password or other acceptable technical means.
• Outline the work requirements and the security safeguards and procedures the employee is expected to follow.
• Ensure adequate storage of files, removal, and non-recovery of temporary files created in processing sensitive data, virus protection, and intrusion detection, and provide physical security for government equipment and sensitive data.
• Establish mechanisms to back up data created and/or stored at alternate work locations.

Remote RPMS users shall
• Remotely access RPMS through a virtual private network (VPN) whenever possible. Use of direct dial in access must be justified and approved in writing and its use secured in accordance with industry best practices or government procedures.

Remote RPMS users shall not
• Disable any encryption established for network, internet, and Web browser communications.
D.2 RPMS Developers

RPMS developers shall

- Always be mindful of protecting the confidentiality, availability, and integrity of RPMS when writing or revising code.
- Always follow the IHS RPMS Programming Standards and Conventions (SAC) when developing for RPMS.
- Only access information or code within the namespaces for which they have been assigned as part of their duties.
- Remember that all RPMS code is the property of the U.S. Government, not the developer.
- Not access live production systems without obtaining appropriate written access, and shall only retain that access for the shortest period possible to accomplish the task that requires the access.
- Observe separation of duties policies and procedures to the fullest extent possible.
- Document or comment all changes to any RPMS software at the time the change or update is made. Documentation shall include the programmer’s initials, date of change, and reason for the change.
- Use checksums or other integrity mechanism when releasing their certified applications to assure the integrity of the routines within their RPMS applications.
- Follow industry best standards for systems they are assigned to develop or maintain, and abide by all Department and Agency policies and procedures.
- Document and implement security processes whenever available.

RPMS developers shall not

- Write any code that adversely impacts RPMS, such as backdoor access, “Easter eggs,” time bombs, or any other malicious code or make inappropriate comments within the code, manuals, or help frames.
- Grant any user or system administrator access to RPMS unless proper documentation is provided.
- Release any sensitive agency or patient information.

D.3 Privileged Users

Personnel who have significant access to processes and data in RPMS, such as, system security administrators, systems administrators, and database administrators, have added responsibilities to ensure the secure operation of RPMS.
Privileged RPMS users shall

- Verify that any user requesting access to any RPMS system has completed the appropriate access request forms.
- Ensure that government personnel and contractor personnel understand and comply with license requirements. End users, supervisors, and functional managers are ultimately responsible for this compliance.
- Advise the system owner on matters concerning information technology security.
- Assist the system owner in developing security plans, risk assessments, and supporting documentation for the certification and accreditation process.
- Ensure that any changes to RPMS that affect contingency and disaster recovery plans are conveyed to the person responsible for maintaining continuity of operations plans.
- Ensure that adequate physical and administrative safeguards are operational within their areas of responsibility and that access to information and data is restricted to authorized personnel on a need-to-know basis.
- Verify that users have received appropriate security training before allowing access to RPMS.
- Implement applicable security access procedures and mechanisms, incorporate appropriate levels of system auditing, and review audit logs.
- Document and investigate known or suspected security incidents or violations and report them to the ISSO, Chief Information Security Officer (CISO), and systems owner.
- Protect the supervisor, superuser, or system administrator passwords.
- Avoid instances where the same individual has responsibility for several functions (i.e., transaction entry and transaction approval).
- Watch for unscheduled, unusual, and unauthorized programs.
- Help train system users on the appropriate use and security of the system.
- Establish protective controls to ensure the accountability, integrity, confidentiality, and availability of the system.
- Replace passwords when a compromise is suspected. Delete user accounts as quickly as possible from the time that the user is no longer authorized system. Passwords forgotten by their owner should be replaced, not reissued.
- Terminate user accounts when a user transfers or has been terminated. If the user has authority to grant authorizations to others, review these other authorizations. Retrieve any devices used to gain access to the system or equipment. Cancel logon IDs and passwords, and delete or reassign related active and backup files.
• Use a suspend program to prevent an unauthorized user from logging on with the current user's ID if the system is left on and unattended.

• Verify the identity of the user when resetting passwords. This can be done either in person or having the user answer a question that can be compared to one in the administrator’s database.

• Shall follow industry best standards for systems they are assigned to, and abide by all Department and Agency policies and procedures.

Privileged RPMS users shall not

• Access any files, records, systems, etc., that are not explicitly needed to perform their duties

• Grant any user or system administrator access to RPMS unless proper documentation is provided.

Release any sensitive agency or patient information.
Glossary

Caret
The symbol (^) obtained by pressing Shift-6.

Command
The instructions you give the computer to record a certain transaction. For example, selecting “Payment” or “P” at the command prompt tells the computer you are applying a payment to a chosen bill.

Database
A database is a collection of files containing information that may be used for many purposes. Storing information in the computer helps in reducing the user’s paperwork load and enables quick access to a wealth of information. Databases are comprised of fields, records, and files.

Data Elements
Data fields that are used in filling out forms in BHS.

Default Response
Many of the prompts in the BHS program contain responses that can be activated simply by pressing the Enter key. For example: “Do you really want to quit? No/.” Pressing the Enter key tells the system you do not want to quit. “No/” is considered the default response.

Device
The name of the printer to use when printing information. Home means the computer screen.

Fields
Fields are a collection of related information that comprises a record. Fields on a display screen function like blanks on a form. For each field, the application displays a prompt requesting specific types of data.

FileMan
The database management system for RPMS.

Free Text Field
This field type will accept numbers, letter, and most of the symbols on the keyboard. There may be restrictions on the number of characters that are allowed.
Frequency
The number of times a particular situation occurs in a given amount of time.

Full Screen Editor
A word processing system used by RPMS. The Full Screen Text Editor works like a traditional word processor, however, with limited functionality. The lines wrap automatically. The up, down, right, and left arrows move the cursor around the screen, and a combination of upper- and lower-case letters can be used.

Interface
A boundary where two systems can communicate.

Line Editor
A word-processing editor that allows editing text line-by-line.

Menu
The menu is a list of different options from which to select at a given time. To choose a specific task, select one of the items from the list by entering the established abbreviation or synonym at the appropriate prompt.

Menu Tree/Tree Structure
A tree structure is a way of representing the hierarchical nature of a structure in a graphical form. It is named a "tree structure" because the classic representation resembles a tree, even though the chart is generally upside down compared to an actual tree, with the "root" at the top and the "leaves" at the bottom.

Prompt
A field displayed onscreen indicating that the system is waiting for input. Once the computer displays a prompt, it waits for entry of some specific information.

Roll-and-Scroll
The roll-and-scroll data entry format captures the same information as the graphical use interface (GUI) format but uses a series of keyboard prompts and commands for entering data into RPMS. This method of data entry is sometimes referred to as CHUI – Character User Interface.

Security Keys
Tools used to grant/restrict access to certain applications, application features, and menus.
Site Manager
The person in charge of setting up and maintaining the RPMS database(s) either at the site or Area-level.

Submenu
A menu that is accessed through another menu.

Suicide
The act of causing one’s own death.

- **Ideation with Intent and Plan**—Serious thoughts of suicide or of taking action to take one’s life with means and a specific plan

- **Attempt**—A non-fatal, self-inflicted destructive act with explicit or inferred intent to die.

- **Completion**—A fatal self-inflicted destructive act with explicit or inferred intent to die.

Terminal Emulator
A type of software that gives users the ability to make one computer terminal, typically a PC, appear to look like another so that a user can access programs originally written to communicate with the other terminal type. Terminal emulation is often used to give PC users the ability to log on and get direct access to legacy programs in a mainframe operating system. Examples of Terminal Emulators are Telnet, NetTerm, etc.

Text Editor
A word processing program that entering and editing text.

Word Processing Field
This is a field that allow users to write, edit, and format text for letters, MailMan messages, etc.
## Acronym List
