Data Entry Mnemonics

Version 2.0 Patch 11
June 2015
# Table of Contents

## 1.0 Introduction ................................................................. 1

## 2.0 Release Notes ............................................................... 2

## 3.0 PCC Data Entry Mnemonics ........................................... 3

### 3.1 Definition of PCC Data Entry Mnemonics .................. 3
### 3.2 Historical Mnemonics .................................................. 3
### 3.3 Online Documentation ............................................... 3
### 3.4 Entry of Incorrect Mnemonics .................................... 3
### 3.5 Mnemonic Codes, Descriptions, and Instructions ......... 4
#### 3.5.1 3M Codes Interface (3M) ..................................... 4
#### 3.5.2 Asthma Control (ACON) ....................................... 4
#### 3.5.3 Anesthesia CPT (ACPT) ....................................... 4
#### 3.5.4 Anti-Coagulation Therapy (ACTH) ....................... 5
#### 3.5.5 ADA Code Entry (ADA) ....................................... 6
#### 3.5.6 Asthma Work/School Days Missed (ADM) ............ 6
#### 3.5.7 Admitting Diagnosis (ADX) ............................... 7
#### 3.5.8 Abdominal Girth (AG) ....................................... 7
#### 3.5.9 Ankle BP (AKBP) ................................................ 7
#### 3.5.10 Appointment Length (AL) ................................. 7
#### 3.5.11 Allergy Tracking Entry (ALG) ......................... 8
#### 3.5.12 Allergy List Review (ALR) ............................... 9
#### 3.5.13 Asthma Management Plan (AMP) ..................... 9
#### 3.5.14 Anesthesia Operation (AOP) ............................ 9
#### 3.5.15 Activate an Inactive Problem (APO) ............... 10
#### 3.5.16 Appointment Date and Time (APPT) ............. 10
#### 3.5.17 Asthma Symptom Free Days (ASFD) .................. 10
#### 3.5.18 Activity and Travel Time (AT) ......................... 11
#### 3.5.19 Audiometry (AUD) ......................................... 11
#### 3.5.20 AUDIT-C (AUDC) .......................................... 11
#### 3.5.21 Audit (AUDT) ................................................ 12
#### 3.5.22 Birth Measurement (BM) ............................... 12
#### 3.5.23 Blood Pressure (BP) ....................................... 12
#### 3.5.24 Best Peak Flow (BPF) ................................. 13
#### 3.5.25 Blood Sugar (BS) .......................................... 13
#### 3.5.26 Blood Type Entry (BT) ................................... 13
#### 3.5.27 CBC Ordered (CBC) ..................................... 13
#### 3.5.28 Chief Complaint (CC) .................................... 14
#### 3.5.29 Cardiac Ejection Fraction (CEF) ................. 14
#### 3.5.30 CHS–Outpatient Form (CHA) ....................... 14
#### 3.5.31 Centimeter Head Circumference (CHC) .......... 15
#### 3.5.32 CHS–Hospitalization Form (CHH) ................ 15
#### 3.5.33 CHS–In-Hospital Form (CHI) ....................... 16
<p>| 3.5.34 | Centimeter Height (CHT) | 16 |
| 3.5.35 | Check Out Date and Time (CKO) | 17 |

Preface

The purpose of this manual is to provide technical information specific to the Patient Care Component (PCC) package and data entry mnemonics. This Data Entry Mnemonics manual provides comprehensive information regarding the use of mnemonics with the Resource and Patient Management System PCC, including correct entry, description, and abbreviation of mnemonics.
1.0 Introduction

The Patient Care Component (PCC) database is the central repository for data in the Resource and Patient Management System (RPMS).

The following RPMS components comprise the PCC suite:

- IHS Dictionaries (AUPN)
- Standard Tables
- PCC Health Summary, including Health Maintenance Reminders (APCH)
- PCC Data Entry (APCD)
- PCC Management Reports, including PGEN/VGEN (APCL)
- Designated Specialty Provider Management (BDP)
- Q-Man (Query Manager) (AMQQ)
- Taxonomy Management (ATX)

Mnemonics permit the user to enter data from a variety of PCC forms, and to do so in whatever entry order is easiest or most efficient. Mnemonics eliminate the requirement to “space through” fields on a form that contains no data.
2.0 Release Notes

Detailed information listing the modifications and enhancements for BJPC v2.0 patch 11 is provided in the Indian Health Service Office of Information Technology Release Announcement. All software release announcements are available on the IHS website with the software files.
3.0 PCC Data Entry Mnemonics

3.1 Definition of PCC Data Entry Mnemonics

PCC Data Entry mnemonics are two- to four-character abbreviations of the types of data typed into the PCC via the PCC Data Entry system. When a mnemonic is typed, the system is alerted that a particular type of data is about to be entered. For example, by typing the mnemonic BP, the system is alerted that the data that follows will be a blood pressure entered in the format 140/88.

Mnemonics are abbreviations usually recognizable for the data items that they represent. For example, WT represents weight, IM represents immunization, PV represents purpose of visit, PRV represents provider, and so on.

3.2 Historical Mnemonics

When a mnemonic begins with the letter H, it usually stands for historical data that occurred on a previous visit. For example, HEX represents historical exam, HPAP represents historical Pap smear, HLAB represents historical laboratory data, etc. When a historical mnemonic is used, the PCC Data Entry System temporarily shifts from the date of the visit being typed and prompts the operator to create a separate visit for the date of the historical event. Following entry of a historical mnemonic and the associated data for that visit, the system shifts back to the visit being typed prior to use of the historical mnemonic.

3.3 Online Documentation

In addition to the material included in this user’s guide, help screens are available online. To access these help screens, type a question mark (?) at the prompt and press Enter. If more help is needed, typing two or three question marks at the prompt generates more detailed help screens, when available.

A complete list of the mnemonics can be viewed by typing two question marks (??) and pressing Enter at the “Mnemonic” prompt.

3.4 Entry of Incorrect Mnemonics

If a mnemonic is typed in error, type a caret (^) by pressing Shift+6 and then press Enter. This usually allows the user to exit the erroneous mnemonic and choose the correct one.

Some mnemonics do not permit using a caret (^) to exit. In this case, type a value to return to the mnemonic prompt, and then type the MOD (Modify) mnemonic to delete the data typed in error.
3.5 Mnemonic Codes, Descriptions, and Instructions

The PCC data entry mnemonics are presented here in alphabetical order by mnemonic. For each mnemonic, a detailed description and instructions are provided.

3.5.1 3M Codes Interface (3M)

Use the 3M Coder Interface (3M) mnemonic to send the visit information to 3M for coding (for visit-related-only encounters). The workstation ID can be free text, must be one–two characters, and must not contain an embedded up-arrow.

MNEMONIC: 3M 3M Coder Interface ALLOWED VISIT-RELATED-ONLY Are you ready to send the visit information to 3M for coding? Y// YES
Enter your 3M Workstation ID : 22
Now Sending to 3M
Visit information has been passed to 3M, switch screens, code the visit and then press enter below when you are finished coding.
Are you done with the coding of the POV's on the 3M coder? N// YES

Figure 3-1: Example of using the 3M mnemonic

3.5.2 Asthma Control (ACON)

The Asthma Control (ACON) mnemonic populates the V Asthma, Asthma Control field for visit-related-only encounters. Asthma control is defined as: Well Controlled, Not Well Controlled, or Very Poorly Controlled, based on the patient’s current and recent symptoms, and the need for oral steroid treatment.

MNEMONIC: ACON Asthma Control ALLOWED VISIT-RELATED-ONLY ASTHMA CONTROL: ?
Asthma 'Control' is assessed at each visit and determines ongoing management. Asthma control is defined as: a) well controlled, b) not well controlled, or c) very poorly controlled, based on the patient's current and recent symptoms, and the need for oral steroid treatment.
Choose from:
W WELL CONTROLLED
N NOT WELL CONTROLLED
V VERY POORLY CONTROLLED
ASTHMA CONTROL: N NOT WELL CONTROLLED

Figure 3-2: Example of using the ACON mnemonic

3.5.3 Anesthesia CPT (ACPT)

Use the Anesthesia CPT (ACPT) mnemonic to type an anesthesia CPT for visit-related-only encounters. The system prompts for the V CPT code, the quantity, two modifiers, and whether anesthesia was administered. The system also prompts for the anesthesia start date/time, the stop date/time, and then calculates the elapsed time.

Quantity is the number of times this procedure was done to the patient during the encounter.
3.5.4 Anti-Coagulation Therapy (ACTH)

Use mnemonic ACTH to enter Anticoagulation Therapy data. The user is prompted to enter data in the following fields:

- V Anti-Coagulation Warfarin Indicated: Y/N
- INR Goal:
  Choose from:
  - 1 2.0 – 3.0
  - 2 2.5 – 3.5
  - 3 Other
  - 4 N/a
- Duration of Anti-Coagulation Therapy
  Choose from:
  - 1 3 Months
  - 2 6 Months
  - 3 12 Months
  - 4 Indefinitely
- Anti-Coagulation Start Date:
- Comment:
- Encounter Provider:

The INR Goal indicates the ratio at which anticoagulation therapy is directed. The INR goal is defined as a minimum INR value (range 2-3) and maximum INR value (range 3.04). You can use .5 integers, such as
2, 2.5, 3, 3.5, and 4. An example is 2.5/4.

Choose from:
1  2.0 - 3.0
2  2.5 - 3.5
3  Other
4  N/A

INR GOAL: 1 2.0 - 3.0
DURATION OF ANTI-COAGULATION THERAPY: ??

Indications for warfarin often have explicit durations of therapy that occur at 3 months, 6 months, or 1 year. The duration can also be indefinite.
You can enter 3, 6, or 1, which indicates t+91d, t+182d, t+365d. Enter IND or leave this field blank to indicate an indefinite time period.

Choose from:
1  3 MONTHS
2  6 MONTHS
3  12 MONTHS
4  INDEFINITELY

DURATION OF ANTI-COAGULATION THERAPY: 3 12 MONTHS
ANTI-COAGULATION THERAPY START DATE: JAN 14,2010
//   (JAN 14, 2010)
COMMENT:
ENCOUNTER PROVIDER:

---

3.5.5 ADA Code Entry (ADA)

Use the ADA Code Entry (ADA) mnemonic to type dental-related codes for visit-related-only encounters. The system prompts for the V Dental service code, number of units, and operative site.

Mnemonic: ADA  ADA Code Entry  ALLOWED  VISIT-RELATED-ONLY
Select V DENTAL SERVICE CODE: 7110  EXTRACTION, SIMPLE (ANY REASON)
NO. OF UNITS: 1
OPERATIVE SITE: 17 PERMANENT THIRD MOLAR, MAND LEFT 17

---

3.5.6 Asthma Work/School Days Missed (ADM)

Use the Asthma Work/School Days Missed (ADM) mnemonic to type the number of work or school days missed related to asthma in the past two weeks (for visit-related-only encounters). Type a value from 0 to 14 (the units of measure is days).

Mnemonic: ADM  Asthma Work/School Days Missed  ALLOWED  VISIT- RELATED-ONLY
VALUE: 2
3.5.7 Admitting Diagnosis (ADX)

Use the Admitting Diagnosis (ADX) mnemonic to modify the diagnosis for a hospitalization visit for visit-related-only encounters. To use the mnemonic, the visit must be a hospitalization and the user must be in Modify mode. In the following example, a warning message displays when using the ADX mnemonic in Enter mode.

```
MNEMONIC: ADX Admitting Diagnosis ALLOWED VISIT-RELATED-ONLY
You must specify MODIFY mode in order to use the Admitting DX mnemonic!
MNEMONIC: MOD Switch to Modify Mode ALLOWED VISIT-RELATED-ONLY

Switching to Modify Mode for ONE Mnemonic ONLY!
MNEMONIC: ADX Admitting Diagnosis ALLOWED VISIT-RELATED-ONLY
1 2970529 SIGMA,BOB MAY 26,1997@10:00
   ADMITTING DX: 251.0// 250.00 250.00 DM UNCOMPL/T-II/NIDDM,NS
UNCON
...OK? Yes// (Yes)
Switching back to ENTER Mode!
```

Figure 3-7: Example of using ADX mnemonic

3.5.8 Abdominal Girth (AG)

Abdominal girth (AG) is a measurement around the abdominal area that is recorded in centimeters for visit-related-only encounters. At the “Value” prompt, type the measurement, within the range 0 to 150.

```
MNEMONIC: AG Abdominal Girth ALLOWED VISIT-RELATED-ONLY VALUE: 50
```

Figure 3-8: Example of using the AG mnemonics

3.5.9 Ankle BP (AKBP)

Use the Ankle BP (AKBP) mnemonic to type ankle blood pressure for visit-related-only encounters. The systolic must be between 20 and 275 and the diastolic must be between 20 and 200.

```
MNEMONIC: AKBP Ankle BP ALLOWED VISIT-RELATED-ONLY VALUE: 120/80
```

Figure 3-9: Example of using the AKBP mnemonic

3.5.10 Appointment Length (AL)

Use the Appointment Length (AL) mnemonic to identify the length of a scheduled appointment (for visit-related-only encounters). The AL mnemonic is used for sites involved in Waiting Time studies.

```
MNEMONIC: AL Appointment Length ALLOWED VISIT-RELATED-ONLY
```
3.5.11 Allergy Tracking Entry (ALG)

Use the Allergy Tracking Entry (ALG) mnemonic to type allergies, signs, and symptoms, and to verify the causative agent (for non-visit- or visit-related encounters). To leave the ALG mnemonic, type N (No) at the “Does this patient have any known allergies or adverse reactions?” prompt.

MNEMONIC: ALG  Allergy Tracking Entry  ALLOWED NON-VISIT/VISIT MNEMONIC
Does this patient have any known allergies or adverse reactions? : Yes
This patient has no allergy/adverse reaction data. Enter Causative Agent: SULFAMETHOXAZOLE

3.5.12 Allergy List Review (ALR)

Use to document when a provider indicates on the PCC or PCC+ Form that he/she reviewed the allergy list. This mnemonic will prompt for the provider who reviewed the allergy list and the date/time reviewed. If the time is not known, the date alone is sufficient and will default to the visit date.

**MNEMONIC:** ALR  Allergy List Review  ALLOWED  VISIT RELATED ONLY

- **Did the Provider indicate that he/she Reviewed the Allergy List?** (Y/N): Y
- **Allergy List Review Date/Time:** Oct 26, 2010// (OCT 26, 2010)
- **Provider who Reviewed the the Allergy List:** SMITH  BTPROVIDER, WENDY C

![Figure 3-12: Example of using the ALR mnemonic](image)

3.5.13 Asthma Management Plan (AMP)

The Asthma Management Plan (AMP) is documented with the PED mnemonic using education topic ASM-SMP.

3.5.14 Anesthesia Operation (AOP)

Use the Anesthesia Operation (AOP) mnemonic to type the operation and procedure code, provider narrative, operating provider, and diagnosis data for visit-related-only encounters. The system also prompts for the anesthesia start date/time, the stop date/time, and then calculates elapsed time.

**MNEMONIC:** AOP  Anesthesia Operation  ALLOWED  VISIT-RELATED-ONLY

- **Enter OPERATION/PROCEDURE:** 28.3
  - 1 28.3 TONSILLECTOMY/ADENOIDE  TONSILLECTOMY WITH ADENOIDECTOMY
  - 2 28.31 TONSILLECTOMY W/ADENOIDECTOMY FOR MALIGNANCY

Figure 3-13: Example of using the AOP mnemonic

3.5.15 Activate an Inactive Problem (APO)
The APO mnemonic is disabled with BJPC v2.0 p10. Use the CPS mnemonic to change a problem status.

3.5.16 Appointment Date and Time (APPT)
Use the Appointment Date and Time (APPT) mnemonic to type the patient’s appointment date and time (in a single prompt) for visit-related-only encounters. Type the date and time using standard RPMS conventions. Type the date followed by @ and the time, as shown in the example. If a time is entered, the system automatically enters the current date. Time is a required response for this mnemonic.

MNEMONIC: APPT Appointment Date&Time ALLOWED VISIT-RELATED-ONLY
APPT DATE&TIME: MAY 31,1997@2:30

Figure 3-14: Example of using the APPT mnemonic

3.5.17 Asthma Symptom Free Days (ASFD)
Use the Asthma Symptom Free Days (ASFD) mnemonic to document the patient’s asthma symptom free day for visit-related-only encounters. This includes the number of days a patient has been free of asthma symptoms, such as chest tightness, cough, shortness of breath, or wheezing in the past two weeks.

MNEMONIC: ASFD Asthma Symptom Free Days ALLOWED VISIT-RELATED-ONLY
VALUE: 10

Figure 3-15: Example of using the ASFD mnemonic
3.5.18 Activity and Travel Time (AT)

The Activity and Travel Time (AT) mnemonic is primarily used for Public Health Nurses (PHNs) and Community Health Nurses (CHNs) to record activity and travel times when visiting patients at their homes or outside the healthcare facility (for visit-related-only encounters). Staff from other disciplines can record activity and travel times as well. The times are entered in minutes and must be in the range of 0 to 9999 with no decimals.

```
MNEMONIC: AT Activity & Travel Time ALLOWED VISIT-RELATED-ONLY Enter
ACTIVITY TIME (in Minutes): 30
TRAVEL TIME (in minutes): 15
```

Figure 3-16: Example of using the AT mnemonic

3.5.19 Audiometry (AUD)

Use the Audiometry (AUD) mnemonic to record the results of hearing exams, which are typically performed by an audiologist (for visit-related-only encounters). At the value prompt, type eight readings for the right ear followed by eight readings for the left ear. The values should be separated by slash marks (/). Each value must be in the range of 0 to 110.

```
MNEMONIC: AUD AUDIOMETRY VALUE:
100/100/100/95/90/90/85/80/105/105/105/105/100/100/95/90/
```

Figure 3-17: Example of using the AUD mnemonic

3.5.20 AUDIT-C (AUDC)

The AUDIT-C (AUDC) mnemonic is one of several Audit questions that focus on alcohol consumption for visit-related-only encounters. It is scored on a scale of 0–12 (score of zero reflects no alcohol use). In men, a score of four or more is considered positive; in women, a score of three or more is considered positive. A positive score means the patient is at increased risk for hazardous drinking or active alcohol abuse or dependence.

```
MNEMONIC: AUDC AUDIT-C ALLOWED VISIT-RELATED-ONLY
VALUE: 2
```

Figure 3-18: Example of using the AUDC mnemonic
3.5.21 Audit (AUDT)

The Audit (AUDT) mnemonic is one of several Audit questions that focus on alcohol consumption for visit-related-only encounters. It is based on a scale of zones, which range from 0–40. Zone I is a score of 0–7, which indicates low risk drinking or abstinence. Zone II is a score of 8–15, which indicates alcohol use in excess of low-risk guidelines. Zone III is a score of 16–19, which indicates harmful and hazardous drinking. Zone IV is a score of 20–40, which indicates a referral to specialist for diagnostic evaluation and treatment should be made.

When entering Birth Length, use the following format:
- to enter the value in inches, just enter the # of inches
- to enter the value in centimeters type a C and the value, e.g. C55

| BIRTH LENGTH: BIRTH ORDER: |

| MNEMONIC: |

Figure 3-20: Example of using the BM mnemonic

3.5.23 Blood Pressure (BP)

The Blood Pressure (BP) mnemonic consists of a systolic (contraction of the heart) and a diastolic (dilatation of the heart) reading for visit-related-only encounters. Each of the readings will be recorded on the PCC encounter form and should be typed as indicated on the PCC encounter form and separated by a slash mark (/). The systolic measurement must be between 20 and 275. The diastolic measurement must be between 20 and 200.
3.5.24 Best Peak Flow (BPF)
The Best Peak Flow (BPF) is also called “personal best” peak flow recorded during periods of symptom control for visit-related-only encounters. Use BPF mnemonic to document this value. It is often recorded from home and self-reported. The value range is 50-1000 L/min.

MNEMONIC: BPF BEST PEAK FLOW ALLOWED VISIT-RELATED-ONLY VALUE: 200

Figure 3-22: Example of using the BPF mnemonic

3.5.25 Blood Sugar (BS)
Use the Blood Sugar (BS) mnemonic to record the ordering of a glucose laboratory test for visit-related-only encounters. This mnemonic should be used only if the Laboratory System is not operational at a facility. The BS mnemonic indicates only that the test was ordered. Results are not typed.

MNEMONIC: BS 11 BLOOD SUGAR ORDERED

Figure 3-23: Example of using the BS mnemonic

3.5.26 Blood Type Entry (BT)
The Blood Type (BT) entry mnemonic allows for the entry of a patient’s blood type for non-visit- or visit-related encounters. After selecting this mnemonic, type one of the following blood types listed as follows: A+, A-, B+, B-, AB+, AB-, O+, and O-.

MNEMONIC: BT BLOOD TYPE ENTRY
BLOOD TYPE: O+

Figure 3-24: Example of using the BT mnemonic

3.5.27 CBC Ordered (CBC)
Use the CBC Ordered (CBC) mnemonic to record that a CBC laboratory test was ordered for a patient for visit-related-only encounters. This mnemonic is to be used only if the laboratory package is not operational at the user’s facility. The mnemonic records only that the test was ordered. Results are not typed.

MNEMONIC: CBC CBC Ordered ALLOWED VISIT-RELATED-ONLY

Figure 3-25: Example of using the CSC mnemonic
3.5.28 **Chief Complaint (CC)**

Use the Chief Complaint (CC) mnemonic to type free text about the patient’s chief complaint, using 2–240 characters (for visit-related-only encounters).

| MNEMONIC: CC Chief Complaint ALLOWED VISIT-RELATED-ONLY |
| CHIEF COMPLAINT: SORE THROAT |

Figure 3-26: Example of using the CC mnemonic

3.5.29 **Cardiac Ejection Fraction (CEF)**

The Cardiac Ejection Fraction (CEF) value must be within the range of 5–99 (for visit-related-only encounters).

| MNEMONIC: CEF Cardiac Ejection Fraction ALLOWED VISIT-RELATED-ONLY |
| VALUE: 10 |

Figure 3-27: Example of using the CEF mnemonic

3.5.30 **CHS–Outpatient Form (CHA)**

Use the Outpatient Form (CHA) mnemonic to type Contract Health Care ambulatory data from the HRSA 64-PO for CHS visits other than hospital or dental for visit-related-only encounters. In order to use this mnemonic, Contract must have been selected as the visit type. If Contract was not selected, a warning message displays indicating that the user needs to change the visit type.

Follow these steps:

1. At the “Select V CHS Authorizing Facility” prompt, type the facility name.
2. At the “Authorization No.” prompt, type the authorization number, which is a 10-character number beginning with the two-digit fiscal year, followed by the three-digit location code and a five-digit number for the authorization. No dashes (-) are required.
3. At the “Vendor” prompt, type the name of the contract service provider.
4. At the “No. of Visits” prompt, type the number of visits.
5. At the “Total Charges” prompt, type the dollar amount, if known.
6. At the “Pay Status” prompt, type either full pay or partial pay.

**Note:** After making entries for the CHA mnemonic, the provider (PRV) and purpose of visit (PV) will need to be typed to complete this visit record.
3.5.31 Centimeter Head Circumference (CHC)

Use the Centimeter Head Circumference (CHC) mnemonic to enter the head circumference measurement in centimeters for visit-related-only encounters. Before using this mnemonic, be sure that the provider has indicated centimeters as the unit of measure. The entry must be within the range of 26 to 76. Decimals and fractions can be used. The fractional/decimal portion of the entry must be a multiple of 1/8 (0.125).

| MNEMONIC: CHC  | Centimeter Head Circumference  | ALLOWED VISIT-RELATED- ONLY VALUE: 35 |

Figure 3-28: Example of using the CHC mnemonic

3.5.32 CHS–Hospitalization Form (CHH)

Use the Hospitalization Form (CHH) mnemonic to type contract healthcare hospitalization data from the HRSA 43-CHS PO for Hospital Services Rendered (for visit-related-only encounters). In order to use the CHH mnemonic Contract as the visit type and Hospital as the service category must be selected. If Contract and Hospital have not been selected, a warning message displays indicating that the values need to change.

Follow these steps:

1. At the “Authorizing facility” prompt, type the facility name.
2. At the “Authorization No.” prompt, type a 10-character number beginning with the two-digit fiscal year, followed by the three-digit location code, and a five-digit number for the authorization. No dashes (-) are required.
3. At the “Vendor” prompt, type the name of the contract service provider.
4. At the “Date of Discharge” prompt, type the date of discharge
5. At the “Discharge Type” prompt, type one of the following:
   - 1–Discharge
   - 2–Irregular Discharge
   - 3–Died within 48 hours
   - 4–Died after 48 hours
   - 5–Transferred
6. After typing the discharge type the following prompts display: “Newborn Diagnosis” and “Stillborn.” Type data in these fields, if applicable; or press ENTER to bypass them.
7. At the “Total Charges” prompt, specify the dollar amount, if known.
8. At the “Pay Status” prompt, indicate whether the pay status is full pay or partial

Note: After making entries for the CHA mnemonic, type the provider (PRV) and purpose of visit (PV) to complete this visit record.

3.5.33 CHS–In-Hospital Form (CHI)

Use the In-Hospital Form (CHI) mnemonic to type Contract Health Care in-hospital data from the HRSA 64-PO for CHS Other than Hospital or Dental for visit-related-only encounters. To use the CHI mnemonic, a visit type of Contract and a service category of In-Hospital must be selected. If Contract and In-Hospital have not been selected and the user tries to use this mnemonic, a warning message displays indicating the changes required.

Follow these steps:

1. At the “Authorizing facility” prompt, type the facility name.

2. At the “Authorization No.” prompt, type a 10-character number beginning with the two-digit fiscal year, followed by the three-digit location code, and a five-digit number for the authorization. No dashes (-) are required.

3. At the “Vendor” prompt, type the name of the contract service provider.

4. At the “Vendor” prompt, type the name of the contract service provider.

5. At the “Hospital Voucher No.” prompt, type the hospital voucher number, if any, using 10 to 15 characters in length.

6. At the “Number of Visits” prompt, type the appropriate value.

7. At the “Total charges” prompt, type the dollar amount, if known.

Note: After making entries for the CHI mnemonic, type the provider (PRV) and purpose of visit (PV) to complete this visit record.

3.5.34 Centimeter Height (CHT)

Use the Centimeter Height (CHT) mnemonic to enter the height measurement in centimeters for visit-related-only encounters. Be sure that the provider has indicated on the PCC Encounter form that the measurement has been recorded in centimeters. The entry must be in the range of 10 to 80 centimeters. Decimals or fractions can be used.

MNEMONIC: CHT  Centimeter Height  ALLOWED  VISIT-RELATED-ONLY
3.5.35 Check Out Date and Time (CKO)

Use the Check Out Date and Time (CKO) to identify the time the patient’s visit was concluded for visit-related-only encounters. This information is typed when the user’s site is involved in Waiting Time studies.

MNEMONIC: CKO  Checkout Date & Time  ALLOWED  VISIT-RELATED-ONLY
Enter the Checkout Date: Sep 21, 1998//@14:33  (Sep 21, 1998)
Enter CHECKOUT TIME: 233
Sep 21, 1998@233 (SEP 21, 1998@14:33)
APPOINTMENT LENGTH: 30//

Figure 3-30: Example of using the CKO mnemonic

3.5.36 Clinic Type (CL)

Use the Clinic Type (CL) mnemonic to type the clinic type for visit-related-only encounters. Clinic Type is a required data item for an ambulatory care visit record when the visit type is IHS, 638, or Tribal. The facility (location) code is between 0 and 49. Clinic Type can be typed by code or name.

MNEMONIC: CL  Clinic Type  ALLOWED  VISIT-RELATED-ONLY
CLINIC: GENERAL//WELL CHILD      24
WAS THIS AN APPOINTMENT OR A WALK IN? : WALK IN// W WALK IN

Figure 3-31: Example of using the CL mnemonic

3.5.37 Coded Chief Complaint (COC)

Use the Coded Chief Complaint (COC) mnemonic to type the code of the patient’s chief complaint for visit-related-only encounters.

CODED CHIEF COMPLAINT: 472.1 472.1  CHRONIC PHARYNGITIS
...OK? Yes//

Figure 3-32: Example of using COC mnemonic
3.5.38 Coding Guidelines Display (CODE)

This mnemonic is no longer available.

3.5.39 CPT Codes with Entry of Encounter Provider (CPE)

Use the CPT Codes with Entry of Encounter Provider (CPE) mnemonic to type CPT codes for a visit including typing of the provider for the encounter (for visit-related-only encounters). The CPT code can be typed by numerical code (as shown below) or by description. To type CPT codes without entering the encounter provider, use the CPT mnemonic.

```
MNEMONIC: CPE   Cpt Entry with Enc Pro ALLOWED VISIT-RELATED-ONLY
Enter CPT Code: 10140 DRAINAGE OF HEMATOMA/FLUID
...INCISION AND DRAINAGE OF HEMATOMA, SEROMA, OR FLUID COLLECTION
...OK? YES// YES)
QUANTITY: 1
EVENT DATE AND TIME: T@345  (NOV 28, 1998@15:45:00)
ENCOUNTER PROVIDER: ACC CURITIS,PATIENT  ACC
```

Figure 3-33: Example of using the CPE mnemonic

3.5.40 CPT Codes (CPT)

Use the CPT mnemonic to record CPT codes for a visit (for visit-related-only encounters). The CPT code can be entered by numerical code (if known) or by description, as shown below.

```
MNEMONIC: CPT Enter CPT Code: TRANSPLANTATION OF KIDNEY
(KIDNEY/KIDNEYS/KIDNEYSKIN/KIDNEYURETER
TRANSPLANTATION/TRANSPLANTATIONS )
The following word was not used in this search: OF
The following 2 matches were found:
1: 50360 (50360)
TRANSPLANTATION OF KIDNEY RENAL ALLOTRANSPLANTATION, IMPLANTATION OF
GRAFT; EXCLUDING DONOR AND RECIPIENT NEPHRECTOMY
2: 50365 (50365)
TRANSPLANTATION OF KIDNEY RENAL ALLOTRANSPLANTATION, IMPLANTATION OF
GRAFT; WITH RECIPIENT NEPHRECTOMY
Press <RET> or Select 1-2: 1
QUANTITY: 1
Enter CPT code:
```

Figure 3-34: Example of using the CPE mnemonic
3.5.41  **CRAFFT (CRFT)**

Use the CRAFFT (CRFT) mnemonic to enter a rating of alcohol or drug-related disorder (for visit-related-only encounters). Positive answers to two or more of the questions are highly predictive of a disorder and further assessment is indicated. The range is from zero to six.

| MNEMONIC: CRFT CRFT CRAFFT ALLOWED VISIT-RELATED-ONLY |
| VALUE: 3 |

Figure 3-35: Example of using the CRFT mnemonic

3.5.42  **CAN TRAN CODE ENTRY (CTC)**

Use the Can Tan Code Entry (CTC) mnemonic to type the CAN number to be processed (for visit-related-only encounters). This mnemonic is used by sites with the Monsalve Chargemaster (all seven Aberdeen hospitals and about eight other hospitals). When Chargemaster is installed, sites with the Monsalve Chargemaster are trained on these mnemonics. No other sites use this mnemonic.

3.5.43  **CAN TRAN CODE ENTRY TE (CTE)**

Use the Can Tan Code Entry Te (CTE) mnemonic to type the CAN number to be processed (for visit-related-only encounters). This mnemonic is used by sites with the Monsalve Chargemaster (all seven Aberdeen hospitals and about eight other hospitals). When Chargemaster is installed, sites with the Monsalve Chargemaster are trained on these mnemonics. No other sites use this mnemonic.

3.5.44  **Cervix Dilation (CXD)**

Use the Cervix Dilation (CXD) mnemonic to type the cervix dilatation measurement for a patient in visit-related-only encounters. The value entered must be in the range 0 to 10.

| MNEMONIC: CXD Cervix Dilatation ALLOWED VISIT-RELATED-ONLY |
| VALUE: 3 |

Figure 3-36: Example of using the CXD mnemonic

3.5.45  **Cup to Disk (CDR)**

Use the Cup to Disk (CDR) mnemonic to enter the Cup to Disc Ratio. The value must be between 0.0 and 0.99 and no more than 2 decimal digits.

| MNEMONIC: CDR CUP TO DISC RATIO ALLOWED VISIT RELATED ONLY |
| VALUE: .56 |
| Select QUALIFIER: LEFT |
| ...OK? Yes// (Yes) |
3.5.46 Disposition of Care (DC)

Use the Disposition of Care (DC) mnemonic to specify the disposition of care type for visit-related-only encounters. The options are: Admit, AMA, Death, Discharged, Follow up appointment, Observation, Other, PRN, and Transferred.

MNEMONIC: DC Disposition of Care ALLOWED VISIT-RELATED-ONLY
DISPOSITION: ADMIT

Figure 3-38: Example of using the DC mnemonic

3.5.47 Dental–Direct Services (DDS)

Use the Dental–Direct Services (DDS) mnemonic to capture dental data only if the IHS Dental Module is not currently operating at the user’s facility (for visit-related-only encounters). The system automatically creates a Purpose of Visit, as well as the designation of Primary for the provider entered. The user will be prompted for the dental service code, quantity, operative site, and tooth surface.

Note: The help screens are lengthy and might require a great deal of processing time.

MNEMONIC: DDS Dental Direct Service ALLOWED VISIT-RELATED-ONLY
Select V PROVIDER: BLACK, HAROLD C DENTIST IHS 207 152207
Select V DENTAL SERVICE CODE: 2330 COMPOSITE RESIN, ONE SURFACE, ANTERIOR

DENTAL/ORAL HEALTH VISIT

Figure 3-39: Example of using the DDS mnemonic
3.5.48 Data Entry Health Summary (DHS)

Use the DHS mnemonic to display a Health Summary from within the Data Entry system for non-visit- or visit-related encounters. The type of Health Summary that displays is defined in the Site Parameter file. After the Health Summary displays, the commands at the bottom of the screen are used to browse through the patient information. For more information on Health Summaries, refer to the Health Summary system user’s manual.

3.5.49 Visit Display (DISP)

Use the Visit Display (DISP) mnemonic to display all data that has been typed for a patient for the visit with which the user is working (for non-visit- or visit-related encounters). Brief patient demographics display along with the Visit file. Note that historical and non-visit related entries do not display in the active visit file. To browse through the information, use the commands listed at the bottom of the screen. The visit display displays SNOMED preferred terms if the topic is a SMOMED topic. In addition the Visit Display handles LOINC and other new fields.

Figure 3-40: Example of using the DISP mnemonic

### 3.5.50 Designated Provider (DP)

Use the DP mnemonic when a patient is assigned a specific designated provider for all visits and to capture this provider’s name (for non-visit or visit-related encounters). The provider’s name will display in the Adult Regular Health Summary in the Demographics section. DP will rarely be used and should not be confused with the provider entry, which is required for all visits. (Note that this mnemonic is the same as the PCP – Primary Care Provider. Only the terminology is different.)

MNEMONIC: DP Designated Provider ALLOWED NON-VISIT/VISIT MNEMONIC PERSONAL PHYSICIAN: RBW WIRTH, ROBERT INTERNAL MEDICINE IHS RBW

Figure 3-41: Example of using the DP mnemonic
3.5.51 DRG (DRG)

Use the DRG mnemonic to enter the DRG number or name (for visit-related-only encounters).

| MNEMONIC: DRG DRG ALLOWED VISIT-RELATED-ONLY |
| DRG: DRG1 |  |

Figure 3-42: Example of using the DRG mnemonic

3.5.52 Diagnostic Procedure Tran Code (DTC)

Use the DTC mnemonic to type Chargemaster Transaction Codes for diagnostic procedures in visit-related-only encounters. Other Chargemaster Tran Codes not for diagnostic procedures are typed utilizing the TC mnemonic. The codes are usually recorded on a special-purpose billing form such as a Superbill. A Chargemaster Transaction File must be loaded at the user’s site in order to use this mnemonic.

| MNEMONIC: DTC Diagnostic Procedure Tran Code ALLOWED VISIT-RELATED-ONLY |
| Enter (DTC) TRANSACTION CODE: 10100330 X-RAY, FOREARM, AP/LAT |
| ORDERING DATE: T-1 (NOV 28, 1998) |
| ORDERING PROVIDER: ACC CHI, CLAYTON ACC |

Figure 3-43: Example of using the DTC mnemonic

3.5.53 Append a 2nd E-Code to a POV (ECO2)

Use the Append a 2nd E-Code to a POV (ECO2) mnemonic to append a second E code to a purpose of visit for visit-related-only encounters. See ECOD below for more information.

3.5.54 Append a 3rd E-Code to a POV (ECO3)

Use the Append a 3rd E-Code to a POV (ECO3) mnemonic to append a third E code to a purpose of visit for visit-related-only encounters. See ECOD below for more information.

3.5.55 Append an E-Code to a Purpose of Visit (ECOD)

Use the ECOD mnemonic to append an E code to a purpose of visit (for visit-related-only encounters). The E code allows a cause of injury to be recorded along with the visit diagnosis. For a visit with more than one purpose of visit, specify to which purpose of visit the E code should be appended. At the “Enter E-code” prompt, type the name or numerical code for entry.

| MNEMONIC: ECOD Append an E-Code to a POV ALLOWED VISIT-RELATED-ONLY |
| Enter E-CODE: E818.0 MV TRAFF ACC NEC-DRIVER |
| ...OK? Yes// (Yes) |

Data Entry Mnemonics
June 2015

PCC Data Entry Mnemonics

3.5.56 Edema Measurement (ED)

Use the Edema Measurement (ED) mnemonic to type the edema measurement for visit-related-only encounters. The value typed must be one of the following: 0, 1+, 2+, 3+, or 4+.

| MNEMONIC: ED EDEMA Measurement ALLOWED VISIT-RELATED-ONLY |
| VALUE: 1+ |

3.5.57 Expected Date of Delivery (EDD)

Use the Expected Date of Delivery (EDD) mnemonic to capture the expected date of delivery for non-visit or visit-related encounters. If the answer to the first prompt, “Currently Pregnant?:” is N (No), you are returned to the Mnemonic prompt. If the answer is Y (Yes), the EDD prompts follow.

The EDD choices are: EDD (Method Unknown), EDD (LMP), EDD (Ultrasound), EDD (Clinical Parameters), DEFINITIVE EDD. You have the option to enter a comment after you enter a date at an EDD prompt.

| MNEMONIC: EDD Expected Date of Delivery ALLOWED NON-VISIT/VISIT |
| CURRENTLY PREGNANT?: Yes |
| PROVIDER WHO UPDATED CURRENTLY PREGNANT: Test, Provider |
| EDD (Method Unknown): |
| EDD (LMP): |

Figure 3-47: Example of using the EFF mnemonic
3.5.59  EKG Diagnostic Procedure (EKG)

Use the EKG Diagnostic Procedure (EKG) mnemonic to type EKG procedures for
visit-related-only encounters. Results are recorded at the “Value” prompt and can be
designated only as normal or abnormal.

MNEMONIC: EKG  EKG Diagnostic Procedure  ALLOWED VISIT-RELATED-ONLY
VALUE: NORMAL

Figure 3-48: Example of using the EKG mnemonic

3.5.60  Elder Care (EL)

Use the Elder Care (EL) mnemonic to type data about elder care for visit-related-only
encounters. The value options are Independent, Needs Help, and Totally Dependent.
The options for Change in Functional Status are Same, Improvement, and Decline.
The options for “Is Patient a Caregiver” prompt are Yes or No.

MNEMONIC: EL  Elder Care  ALLOWED  VISIT-RELATED-ONLY
TOILETING: I INDEPENDENT
BATHING: I INDEPENDENT

IS PATIENT A CAREGIVER: N NO

Figure 3-49: Example of using the EL mnemonic

3.5.61  Evaluation and Management (CPT) (EM)

Use the Evaluation and Management CPT (EM) mnemonic to capture evaluation and
management CPT data for visit-related-only encounters. An entry can be created by
name or numerical code. Note that the code typed must be within the range of 99201
to 99499.

MNEMONIC: EM  Evaluation&Management (CPT)  ALLOWED VISIT-RELATED-ONLY
EVALUATION AND MANAGEMENT CODE: 99201 OFFICE/OUTPATIENT
VISIT, NEW
OFFICE OR OTHER OUTPATIENT VISIT FOR THE EVALUATION AND MANAGEMENT OF
A NEW PATIENT, WHICH REQUIRES THESE THREE KEY COMPONENTS: A PROBLEM
...OK? Yes// (Yes)

Figure 3-50: Example of using the EM mnemonic
3.5.62 Emergency Visit Record (EVR)

This mnemonic is not used by all sites.

3.5.63 Emergency Room Visit Record (ER)

Use the ER mnemonic to type patient data for an emergency room visit in visit-related-only encounters. Before using this mnemonic, Emergency must have been selected as the clinic type. If Emergency has not been selected, modify the clinic with the CL mnemonic.

Follow these steps:

1. At the “Urgency” prompt, type one of the following:
   • R  Resuscitation (1)
   • E  Emergent (2)
   • U  Urgent (3)
   • L  Less Urgent (4)
   • Routine (5)

2. At the “Means of Arrival” prompt, type one of the following:
   • A–Ambulance
   • P–Police
   • POV–POV
   • T–Taxi
   • W–Walked
   • O–Other
   • R–Air
   • M–Medivac from village

3. At the “Enter ER by” prompt, type one of the following:
   • A–Ambulatory
   • W–Wheelchair
   • C–Carried

4. At the “Informant” prompt, specify the information using up to 30 characters.

5. At the “Notified” prompt, type one of the following:
• R–Relative
• P–Police
• C–Coroner

6. At the “Disposition of Care” prompt, type one of the following:

• A–Admit
• T–Transfer
• D–Discharge
• O–Other
• M–Medivac Transfer
• L–Lifeguard
• E–Died/Expired
• L–Left AMA

7. At the “Departure Date &Time” prompt, type the date and time of the departure.

8. At the “Left Area” prompt, type the date and time of the patient left the area.

3.5.64 Examinations (EX)

Use the Examinations (EX) mnemonic to record the type of exam performed during a patient visit (for visit-related-only encounters). Some of the exam types are reported in the Health Summary in the Health Maintenance Reminders component, along with the date on which the exam was performed and a due date for the next exam. The following list shows available exam types.

<table>
<thead>
<tr>

    PROVIDER PERFORMING EXAM:

Figure 3-51: Example of using the EX mnemonic

3.5.65 24-Hour Fluid Balance, Positive/Negative (FBPN)

Use the FBPN mnemonic to enter the patient’s fluid balance within a 24-hour period. Subtract the 24-hour fluid output from the 24-hour fluid input for the value. This value can be either positive or negative. Use this information in conjunction with the 24-Hour Fluid Input (FI24) and 24-Hour Fluid Output (FO24) mnemonics.

MNEMONIC: FBPN FLUID BALANCE POS/NEG ALLOWED VISIT RELATED ONLY
VALUE: 2000

Figure 3-52: Example of using the FBPN mnemonic

3.5.66 FEF 25-75 (FEF)

Use the FEF 25-75 (FEF) mnemonic to type the average flow of air during the middle portion of expiration (the unit of measure is percent) for visit-related-only encounters. The value range is any integer between 0–150.

MNEMONIC: FEF FEF 25-75 ALLOWED VISIT-RELATED-ONLY
VALUE: 50

Figure 3-53: Example of using the FEF mnemonic

3.5.67 Fundal Height (FH)

Use the Fundal Height (FH) mnemonic to type the Fundal height measurement (for visit-related-only encounters). This measurement is recorded in centimeters and must be in the range 0 to 100. Note that when entering the FH mnemonic, the user will always be prompted to choose between FH and FHX, as shown below.

MNEMONIC: FH
VALUE: 15
3.5.68 Family History (FHX)

Use the FHX mnemonic to type medical data concerning family members that can be pertinent to the patient’s healthcare (for visit-related-only encounters). Family History does not allow a duplicate relation to be entered. The user is prompted to select SNOMED terms from a list of valid family history terms that have the mapped ICD code display next to the term description.

**Figure 3-55: Example of using FHX mnemonic**

At the “Select Action” prompt, do one of the following:

- Type **Q** (Quit) to quit the screen.
- Type a plus sign (+) to display the next screen. This option is not available for the last screen.
- Type a minus sign (–) to display the previous screen. This option is not available for the first screen.

The following actions are available on the FHX screen:

- Type **A** (Add Family Hx) to add a family relation type.
- Type **E** (Edit Facility Hx) to edit an existing family relation type.
- Type **X** (Delete Facility Hx) to remove an existing family relation type.
- Type **HS** (Health Summary) to display a Health Summary for a specified patient.
**3.5.69 24-Hour Fluid Input (FI24)**

Use the FI24 mnemonic to enter the patient’s fluid input within a 24-hour period. The value range is 0–10000 mls. Use this information in conjunction with the 24-Hour Fluid Output (FO24) and 24-Hour Fluid Balance, Positive/Negative (FBPN) mnemonics.

![Figure 3-56: Example of using FI24 mnemonic](image)

**MNEMONIC:** FI24  24 HOUR FLUID INPUT ALLOWED VISIT RELATED ONLY

**VALUE:** 5000

**3.5.70 Flag Field (FL)**

Use the Flag Field (FL) mnemonic to type a numeric code between 1 and 99 into a special Flag Field of the PCC Visit Record for keeping track of locally relevant data (for visit-related-only encounters). For example, a facility might want to gather workload data about a designated special area within their outpatient clinic. These special clinic areas can be identified in each visit by an entry in the Flag Field of the Visit Record.

![Figure 3-57: Example of using the FL mnemonic](image)

**MNEMONIC:** FL Flag Field ALLOWED VISIT-RELATED-ONLY

**FLAG:** 5

**3.5.71 Family Planning Method (FM)**

Use the Family Planning Method (FM) mnemonic to type the family planning method (only) for non-visit- or visit-related encounters. You are given the option to add a new contraceptive method or quit and return to the mnemonic prompt. Type two question marks (??) at the “ADD a new Contraceptive Method” prompt to see a list of the contraceptive methods available.

![Figure 3-58: Example of using the FM mnemonic](image)

**MNEMONIC:** FM Family Planning Method ALLOWED NON-VISIT/VISIT MNEMONIC

Contraceptive Methods currently recorded: None recorded

Select one of the following:

A       ADD a new Contraceptive Method
Q       QUIT

Which action: Q// Q QUIT

To type additional female reproductive factors, use the FP mnemonic. A list of contraceptive methods currently on file for the patient displays.
3.5.72 24-Hour Fluid Output (FO24)

Use the FO24 mnemonic to enter the patient’s fluid output within a 24-hour period. The value range is 0–10000 mls. Use this information in conjunction with the 24-Hour Fluid Input (FI24) and 24-Hour Fluid Balance, Positive/Negative (FBPN) mnemonics.

| MNEMONIC: FO24  24 HOUR FLUID INPUT ALLOWED VISIT RELATED ONLY |
| VALUE: 3000 |

Figure 3-59: Example of using FO24 mnemonic

3.5.73 Family Planning (FP)

Use the Family Planning (FP) mnemonic to capture female reproductive factors and family planning data for non-visit or visit-related encounters.

The reproductive history data fields are:

- Total # Pregnancies
- Full Term Births
- Premature Births
- Abortions, # Induced
- Abortions, # Spontaneous
- Ectopic Pregnancies
- Multiple Births
- Living Children
- DES Daughter?

MNEMONIC:
If you choose to delete an existing contraceptive method, you must type a reason in the Reason Deleted field. The method is not deleted from the system, but is marked as entered in error.

3.5.74 Future Scheduled Encounter
This mnemonic is not used by all sites.

3.5.75 Fetal Heart Tones (FT)
Fetal Heart Tones is a measurement of the fetal heart rate per minute. This measurement is usually found on a prenatal encounter form. The value for this measurement must be in the range of 0 to 400. This mnemonic is used for visit-related-only encounters.

```
MNEMONIC: FT Fetal Heart Tones ALLOWED VISIT-RELATED-ONLY
VALUE: 90
```

Figure 3-61: Example of using the FT mnemonic

3.5.76 FEV1/FVC (FVFC)
Use the FEV1/FVC (FVFC) mnemonic to type a ratio of FEV1/FVC. FEV1 is the maximum amount of air exhaled in one second. The range is 0–10 liters. The Forced Vital Capacity (FVC) is the maximum amount of air inhaled and exhaled. The range is 0–10 liters. The mnemonic is used for visit-related-only encounters.

```
MNEMONIC: FVFC FEV1/FVC ALLOWED VISIT-RELATED-ONLY
VALUE: 5/10
```

Figure 3-62: Example of using the FVFC mnemonic

3.5.77 FRAMINGHAM 10 YEAR RISK (F10R)
Use the Framingham 10 Year Risk (F10R) mnemonic to enter a numeric percentage from the following allowable values:

For women: <1, 1, 2, 3, 4, 5, 6, 8, 11, 14, 17, 22, 27, >30

For men: <1, 1, 2, 3, 4, 5, 6, 8, 10, 12, 16, 20, 25, >30

```
MNEMONIC: F10R FRAMINGHAM 10 YEAR RISK ALLOWED VISIT RELATED ONLY

Figure 3-63: Example of using the F10R mnemonic
3.5.78 Generate Health Summary (GHS)

The Generate Health Summary (GHS) mnemonic is used to display a particular patient’s Health Summary (for non-visit- or visit-related encounters).

3.5.79 Eyeglass Prescription (GP)

Use the Eyeglass Prescription (GP) mnemonic to type eyeglass prescription data for visit-related-only encounters. The data includes measurements for the sphere, cylinder, axis, and eyeglass frame, as well as the papillary distance in the eye. If eyeglass prescription data is typed at the user’s facility, each prescription must contain at least a sphere, cylinder, and axis reading. The form will record the prescription for the right eye first and the reading for left eye directly below it. An example of a complete prescription follows.

<table>
<thead>
<tr>
<th>Sphere</th>
<th>Cylinder</th>
<th>Axis</th>
<th>Frame Consensus</th>
<th>Add</th>
</tr>
</thead>
<tbody>
<tr>
<td>RX)</td>
<td>+1.25</td>
<td>X5</td>
<td>BL SL 50/22/5-1/4</td>
<td>+1.00</td>
</tr>
<tr>
<td></td>
<td>+1.50</td>
<td>X175</td>
<td></td>
<td>+0.50</td>
</tr>
</tbody>
</table>

Add:  +0.50 (This is a trifocal reading, and will not be entered.)

P.D. 6059

Figure 3-64: Example of using the GP mnemonic

- **Sphere**: The words “plano” and “sphere” are sometimes typed as a measurement. “Plano” is the only word acceptable for coding the eyeglass prescription. If the word “sphere” is used, press ENTER at the appropriate field.

- **Axis**: The axis measurement consists of three digits. When typing the value, disregard the any leading zeroes and the X before the digits.

- **Add**: There might also be a section of measurements that are prefaced with “Add.”

- **Frame Measurements**: The frame measurements can also be recorded on the encounter form identifying the style and color of the frame to be used. These measurements are usually recorded as 50/22/5-1/4, representing the eye, bridge, and temple sizes of the frame for the glasses. The eye and bridge measurements are typed in millimeters and should be recorded as such; the temple size is entered in inches. Press ENTER if no measurements have been recorded. If the temple measurement has been recorded in millimeters, it must be converted to inches by dividing the last three digits by 25.4; e.g., 50/22/140 (140 divided by 25.4 = 5.50). The following parameters apply to the prompts that appear when using the GP mnemonic:

  - **Sphere**: A number between -28.00 and +16.00, include the + or – or plano
  - **Cylinder**: A number between -9.50 and +9.50
  - **Axis**: A whole number between 0 and 180
- **RE Prism H**: A number between .25 and 50 followed by a prism base direction: BU (base up), BD (base down), BI, or BO
- **LE Prism H**: A number between .25 and 50 followed by a prism base direction: BU (base up), BD (base down), BI, or BO
- **R Prism V**: A number between .25 and 50 followed by a prism base direction: BU (base up), BD (base down), BI, or BO
- **LE Prism V**: A number between .25 and 50 followed by a prism base direction: BU (base up), BD (base down), BI, or BO
- **Reading Add**: A number between .74 and 9.99 (decimal point is required)
- **PD (NEAR)**: A whole number between 40 and 80
- **PD (DISTANCE)**: A whole number between 40 and 80
- **PD (LEFT)**: A whole number between 25 and 40
- **PD (RIGHT)**: A whole number between 25 and 40

### 3.5.80 Gram Weight (GWT)

Use the Gram Weight (GWT) mnemonic to type a patient’s weight in grams for visit-related-only encounters. Be sure that the provider has specified grams as the unit of measure on the encounter form before using this mnemonic. The value entered must be in the range 1000 to 340000. Fractions and decimals are allowed.

```

Figure 3-72: Example of using the HCPT mnemonic
3.5.88  20 Hematocrit Ordered (HCT)

Hematocrit is a laboratory test and should only be typed using the Data Entry system if the laboratory package is not in use at the user’s site. If the laboratory package is not in use, the HCT mnemonic records that a hematocrit test was ordered (for visit-related-only encounters). Results of the test are not captured.

MNEMONIC: HCT  20 Hematocrit Ordered ALLOWED VISIT-RELATED-ONLY

Figure 3-73: Example of using the HCT mnemonic

3.5.89  Hearing (HE)

Use the Hearing (HE) mnemonic to type hearing test results for visit-related-only encounters. The Value can be recorded only as normal (N) or abnormal (A).

MNEMONIC:    HE
VALUE:      N

Figure 3-74: Example of using the HE mnemonic

3.5.90  Historical EKG (HEKG)

Use the Historical EKG (HEKG) mnemonic to type Historical EKG procedures (for non-visit- or visit-related encounters).

MNEMONIC: HEKG   Historical EKG    ALLOWED    NON-VISIT/VISIT MNEMONIC
Enter Date of Historical EKG:  JUNE 1996 (JUN 01, 1996@12:00) Enter EXAM Type:
VISION EXAM 19
RESULT: A ABNORMAL COMMENT:

3.5.91  Historical Examination (HEX)

Use the Historical Examination (HEX) mnemonic to record past examinations for a patient (for non-visit- or visit-related encounters). Various types of examinations can be typed. If a visit does not exist for the date specified for the exam, a visit will be created.

MNEMONIC: HEX   Historical Examination   ALLOWED NON-VISIT/VISIT MNEMONIC
Enter Date of Historical Exam:  2/1/05 (FEB 01, 2005@12:00) Enter EXAM Type:
VISION EXAM 19
RESULT: A ABNORMAL COMMENT:

Figure 3-76: Example of using the HEX mnemonic
3.5.92 Health Factor (HF)

Various factors that have an impact on a patient’s health can be recorded in the patient’s record. Use the HF mnemonic to enter these factors (for visit-related-only encounters), which are displayed on the Adult Regular Health Summary. The level/severity, quantity, and provider can also be typed, as applicable.

Below is a list of the available health factor categories:

- Activity Level
- Alcohol/Drug
- Asthma Triggers
- Barriers to Learning
- Confidence in Managing Health Problems
- Diabetes Self-Monitoring
- Learning Preference
- Occupation
- TB Status
- Tobacco (Exposure)
- Tobacco (Smoking)
- Tobacco (Smokeless–Chewing/Dip)

The choices for the “Level/Severity” prompt are:

- M–Minimal
- MO–Moderate
- H–Heavy/Severe

factor for non-visit- or visit-related encounters.

MNEMONIC: HHF Historical Health Factor ALLOWED NON-VISIT/VISIT MNEMONIC

******* PCC HEALTH FACTORS (LAST ONE FOR EACH CATEGORY) *******
3.5.96 Historical Immunizations (HIM)

Use the Historical Immunizations (HIM) mnemonic to record a patient’s immunization record (for non-visit- or visit-related encounters). These are past immunizations not previously recorded or immunizations administered at another facility. An event visit for the immunization date typed is automatically created if no visit exists for that date. The patient’s immunization history is displayed, which allows the operator to verify the data and avoid duplicate entries. The following items are required entries and must be identified when using this mnemonic:

- Date of Immunization (the month and year if the exact date is not available)
- Immunization Type, Series (for OPV and DPT)
- Name of the facility where the immunization was administered, if known.

To modify or correct a historical immunization, switch to Modify (MOD) mode and then use the HIM mnemonic.
3.5.97 Hospital Location (HL)

Use the Hospital Location (HL) mnemonic to specify the location within a hospital where a visit occurred (for visit-related-only encounters). The list of choices available is locally defined and maintained.

MNEMONIC: HL Hospital Location ALLOWED VISIT-RELATED-ONLY
HOSPITAL LOCATION: GENERAL

Figure 3-82: Example of using the HL mnemonic

3.5.98 Historical Lab Test (HLAB)

Use the Historical Lab Test (HLAB) mnemonic to record any historical laboratory test for a patient for non-visit- or visit-related encounters. The date of the test, test type, location given, results, and site can be recorded, if known. If the exact date is not known, the year is required as a minimum entry.

MNEMONIC: HLAB Historical Lab Test ALLOWED NON-VISIT/VISIT MNEMONIC

QUANTITY:
```

Figure 3-84: Example of using the HLST mnemonic

3.5.100 Historical Measurement (HMSR)

Use the Historical Measurement (HMSR) mnemonic to add historical measurements (for non-visit- or visit-related encounters). When typing measurements, once the measurement type has been specified, the value is a required response and must be typed before continuing. The date is also a required response, but if the exact date is unknown, the month and year or year only can be typed. For a list of the measurement types, refer to the description of the MEAS mnemonic.

```
MNEMONIC: HMSR  Historical Measurement  ALLOWED  NON-VISIT/VISIT MNEMONIC
Enter Date of Historical Measurement: JAN 1997 (JAN 01, 1997@12:00) TYPE: O// OTHER

Enter MEASUREMENT Type:
```

Figure 3-85: Example of using the HMSR mnemonic

3.5.101 Historical Pap Smear (HPAP)

Use the Historical Pap Smear (HPAP) mnemonic to type a pap smear that was performed on a previous date (for non-visit- or visit-related encounters). Unlike other mnemonics used for typing historical data, the HPAP mnemonic records that a pap smear was performed and allows results to be typed into a free-text field. The date and location can also be recorded. The information is typed into a patient’s V Lab File.

```
MNEMONIC: HPAP  Historical PAP Smear  ALLOWED  NON-VISIT/VISIT MNEMONIC
PAP SMEAR RESULTS
Patient Name: SIGMA, JANE  Patient Age: 28.6 years
```
3.5.102 Historical Radiology (HRAD)

Use the Historical Radiology (HRAD) mnemonic to type historical radiology procedures for non-visit- or visit-related encounters. The date, location, and impression, as well whether the result is normal or abnormal, can be recorded. At the Date field, type at least the year if the exact date is unknown.

Figure 3-87: Example of using the HRAD mnemonic

3.5.103 Historical RX (HRX)

Use the Historical RX (HRX) mnemonic to type a medication prescribed or dispensed on a date prior to the date of the visit being processed (for non-visit- or visit-related encounters). The medication might have been prescribed and dispensed at the user’s facility, but not typed into the computer at that time, or it might have been prescribed and dispensed by an outside provider and pharmacy.

Figure 3-88: Example of using the HRX mnemonic
3.5.104 Historical Skin Test (HS)

Use the Historical Skin Test (HS) mnemonic to type a skin test that was performed on a previous visit or at another facility (for non-visit- or visit-related encounters). In addition to the date of the test and the location where it was performed, the reading/result can be typed. An event visit file for the skin test read date is automatically created if there is no existing visit for that date. The following items are required:

- Date of skin test(s) reading
- Skin test type; for example, PPD, Cocci, etc.
- Readings and/or result
- Facility name where the skin test was read, if known

<table>
<thead>

Select LOCATION NAME: DEMO HOSPITAL
Enter SKIN TEST Type: COCCI
READING: 3
RESULTS: N NEGATIVE
DATE READ: 4/30/07 (APR 30, 2007)
Enter SKIN TEST Type:

Figure 3-89: Example of using the HS mnemonic

To modify or correct a historical skin test, select the option MOD (Modify Data) and type the ST mnemonic. Like the Immunization Record, the system displays the patient’s skin test history, which should be verified by the operator to avoid duplication of entry.

3.5.105 Historical Sigmoidoscopy (HSIG)

The Historical Sigmoidoscopy mnemonic is no longer available. Use mnemonic HCPT or SHX to enter an historical sigmoidoscopy.

3.5.106 Height (HT)

Use the Height (HT) mnemonic to type the height measurement in inches (for visit-related-only encounters). The value must be in the range of 10 to 90. Fractions and decimals are allowed.

| MNEMONIC: HT Height in Inches ALLOWED VISIT-RELATED-ONLY |
3.5.107 Historical UA (HUA)

Use the Historical UA (HUA) mnemonic to type a urinalysis test performed on a previous date for a patient (for non-visit- or visit-related encounters). Results are not captured, only that the test was given on a particular date. The location can be recorded also.

```
MNEMONIC: HUA Historical UA entry ALLOWED NON-VISIT/VISIT MNEMONIC
Enter Date of Historical UA: 1/1/07 (JAN 01, 2007@12:00)
TYPE: O// C CONTRACT
LOC. OF ENCOUNTER: DEMO HOSPITAL OUTSIDE LOCATION: CLINIC
Updating V Lab file...
```

3.5.108 Infant Feeding Choices (IF)

Use the Infant Feeding Choices (IF) mnemonic to document the feeding method of an infant patient for visit-related-only encounters. The options are:

- 1–Exclusive breastfeeding
- 2–Mostly breastfeeding
- 3–½ formula and ½ breast
- 4–Mostly formula
- 5–Formula only
- 6–Mostly breastfeeding, some formula
- 7–Mostly formula, some breast milk

If the feeding choice is 2, 4, 6 or 7 then the user is prompted for additional feeding choices (Milk, Fruit juice, Carbonated drink, sports drink, Glucose, Water).

```
MNEMONIC: IF Infant Feeding Choices ALLOWED VISIT-RELATED ONLY
Select V INFANT FEEDING CHOICES:  1  (1 EXCLUSIVE BREASTFEEDING)
ENCOUNTER PROVIDER:
```

3.5.109 In-Hospital Immunization Entry (IIM)

Use the In-Hospital Immunization Entry (IIM) mnemonic to enter immunization data for a specific date for non-visit- or visit-related encounters.
**3.5.110 Immunizations (IM)**

Use the Immunizations (IM) mnemonic to enter immunizations that were given during a patient’s visit (for visit-related-only encounters) and recorded on the Encounter form.

```plaintext
MNEMONIC: IM  Immunizations  ALLOWED  VISIT-RELATED-ONLY Enter IMMUNIZATION
Given: OPV  SABIN TRIVALENT (OPV)  OPV  06
SERIES: 1
LOT:
```

Figure 3-94: Example of typing the IM mnemonic

**3.5.111 ICD Operation Narrative (IOP)**

Use the ICS Operation Narrative (IOP) mnemonic to indicate that the standard ICD-10 code operation narrative will be automatically entered for the provider narrative (for visit-related-only encounters). The operator does not have to retype the narrative, thereby saving data entry time. Caution is advised because provider narratives should always be typed exactly as the provider recorded them on the Encounter Form.

```plaintext
MNEMONIC: IOP  ICD Operation Narrative  ALLOWED  VISIT-RELATED-ONLY
Enter OPERATION/PROCEDURE: 085SXZZ  Destruction of Right Conjunctiva, External Approach
...OK? Yes// (Yes)
OPERATING PROVIDER: SMITH, CARL R
DIAGNOSIS: 873.50  OPEN WND FACE NOS-COMPL
...OK? Yes// (Yes)
```

Figure 3-95: Example of using the IOP mnemonic

**3.5.112 Hospitalization Information (IP)**

Use the Hospitalization Information (IP) mnemonic to type data from IHS form HRSA 44-1 Clinical Record Brief-IHS Inpatient Services for visit-related-only encounters. This requires that the Service Category be set to H for “hospitalization;” if the Service Category is not set to H, correct the record using the VST mnemonic.
Admission type:
- Direct Admission 1
- Trans-Non IHS Hospital Admission 2
- Trans-IHS Hospital Admission 3
- Referred From IHS Clinic Admission 4
- Other Admission 5

NEPHRITIS AND NEPHROPATHY, NOT SPECIFIED AS ACUTE OR CHRONIC, IN
DISEASES CLASSIFIED ELSEWHERE

OK? Y/

Figure 3-96: Example of using the IP mnemonic

**Note:** After making entries for the IP mnemonic, type the provider (PRV) and purpose of visit (PV) to complete this visit record.

3.5.113 Inactive Problem (IPO)

The IPO mnemonic is inactivated. Use mnemonic CPS to change a problem status.

3.5.114 ICD Narrative Purpose of Visit (IPV)

Use the ICD Narrative Purpose of Visit (IPV) mnemonic as an alternative to the PV Purpose of Visit mnemonic (for visit-related-only encounters). This mnemonic allows the standard ICD code narrative to automatically be entered for the provider narrative. The operator does not have to retype the narrative, thereby saving data entry time. Caution is advised as provider narratives should always be typed *exactly* as the provider stated on the form.

**MNEMONIC: IPV**

This is the MNEMONIC that automatically stuffs the ICD Narrative in the Provider Narrative field!!

Enter PURPOSE of VISIT: DIABETES MELLITUS

250.00 (DM UNCOMPL/T-II/NIDDM,NS UNCON)
DIABETES MELLITUS WITHOUT MENTION OF COMPLICATION/TYPE II/NON-INSULIN DEPENDENT/ADULT-ONSET, OR UNSPECIFIED TYPE, NOT STATED AS UNCONTROLLED

OK? Y/

DM UNCOMPL/T-II/NIDDM,NS UNCON ****ICD****
CAUSE OF DX:

Enter PURPOSE of VISIT:

Figure 3-97: Example of using the IPV mnemonic
When adding a diagnosis, if the diagnosis is an injury, the IPV mnemonic will prompt for three E Code fields and for an entry of First Visit or Revisit. These prompts will always display in MOD (modification) mode so they can be deleted, if appropriate.

### 3.5.115 Kilogram Weight (KWT)

Use the Kilogram Weight (KWT) mnemonic to type a patient’s weight in kilograms for visit-related-only encounters. Before using the KWT mnemonic, be sure that the provider has indicated kilograms as the unit of measure for the patient’s weight. The value typed must be in the range of 1 to 340. Fractions and decimals are allowed.

| MNEMONIC: KWT Kilogram Weight ALLOWED VISIT-RELATED-ONLY |
| VALUE: 125 |

Figure 3-98: Example of using the KWT mnemonic

### 3.5.116 Lab Test (LAB)

Laboratory tests and results can be typed from within the Data Entry system for visit-related-only encounters. However, laboratory tests should only be entered with this mnemonic if the laboratory system is not being used at the user’s facility. If using this mnemonic, it is recommended that laboratory personnel type the laboratory tests to ensure accurate entry of results.

| MNEMONIC: LAB Lab Test ALLOWED VISIT-RELATED-ONLY Select V LAB LAB |

| SITE: |
| ENCOUNTER PROVIDER: Enter LAB TEST: CURRENT STATUS FLAG: ORDERING PROVIDER: |

Figure 3-99: Example of using the LAB mnemonic

### 3.5.117 Line Item Entry for Billing (LI)

This mnemonic is not used by all sites.

### 3.5.118 Last Known Well (LKW)

This measurement is specific to the onset of stroke symptoms. Use the Last Known Well mnemonic to enter the time the patient was last known to be without the signs and symptoms of the current stroke or at his or her prior baseline. The value “Well” is automatically recorded in the V Measurement file when you enter the mnemonic, date last known well, and encounter provider.
Document the Date/Time Last Known Well as follows:

If provider witnessed onset, document the date/time of onset of stroke symptoms. When the onset of symptoms is clearly witnessed, then the time last known well is identical to the time of symptom onset. If date/time of onset was not witnessed, document date/time the patient was without stroke symptoms. Example: A nurse in the hospital takes vital signs at 8 AM. Patient was at baseline. Nurse returns at 10 AM and notes facial droop and unilateral weakness. Onset was not witnessed. Nurse would then enter 8 AM for last known well since this was the last time the patient was known to be without the signs or symptoms.

<table>
<thead>
<tr>
<th>MNEMONIC: LKW Last Known Well ALLOWED VISIT-RELATED ONLY</th>
</tr>
</thead>
<tbody>
<tr>
<td>Enter date/time patient was last known to be without signs/symptoms of current stroke. When onset is witnessed, the last known well is identical to time of symptoms onset.</td>

<tr>
<td>Date/Time Last Known Well: T@07:00</td>
</tr>
<tr>
<td>ENCOUNTER PROVIDER: Test, Provider</td>
</tr>
</tbody>
</table>

Figure 3-100: Example of using the LKW mnemonic

### 3.5.119 Last Menstrual Period (LMP)

Use the Last Menstrual Period (LMP) mnemonic to record the date of a female patient’s last menstrual period for non-visit- or visit-related encounters. The user is prompted to confirm the patient’s name and then type the date.

<table>
<thead>
<tr>
<th>MNEMONIC: LMP Last Menstrual Period ALLOWED NON-VISIT/VISIT MNEMONIC</th>

<tbody>
<tr>
<td>NAME: SIGMA,TESS//</td>
</tr>
<tr>
<td>LAST MENSTRUAL PERIOD: 6/12/07 (JUN 12, 2007)</td>
</tr>
</tbody>
</table>

Figure 3-101: Example of using the LMP mnemonic

### 3.5.120 Level of Care (LOC)

Use the Level of Care (LOC) mnemonic to type level of care information (for visit-related-only encounters), including CPT code, provider narrative, event date and time, and the ordering provider.

<table>
<thead>
<tr>
<th>MNEMONIC: LOC LEVEL OF CARE ALLOWED VISIT-RELATED-ONLY</th>
</tr>
</thead>
<tbody>
<tr>
<td>Enter CPT Code: 71120 71120 X-RAY EXAM OF BREASTBONE RADIOLOGIC EXAMINATION; STERNUM, MINIMUM OF TWO VIEWS</td>

<tr>
<td>EVENT DATE AND TIME: T-20 (FEB 15, 2008)</td>
</tr>
<tr>
<td>ORDERING PROVIDER: SIGMA,JOHN</td>
</tr>
</tbody>
</table>

Figure 3-102: Example of using the LOC mnemonic
3.5.121 Level of Service (LS)

Use the Level of Service (LS) mnemonic to type data checked in the Level of Service box in the lower right area of the PCC Ambulatory Encounter form (for visit-related-only encounters). The choice of entries consists of: Brief, Limited, Intermediate, Extended, and Comprehensive.

Note: With Data Entry Version 2.0, most facilities will begin typing the Evaluation and Management CPT code for each visit. When the Evaluation and Management CPT code is typed, there is no need to use the LS mnemonic to type Level of Service.

MNEMONIC: LS  Level of Service  ALLOWED  VISIT-RELATED-ONLY
LEVEL OF SERVICE (PCC FORM): INTER  INTERMEDIATE

Figure 3-103: Example of using the LS mnemonic

3.5.122 Measurement Entry (MEAS)

Use the Measurement Entry (MEAS) to type any measurement for visit-related-only encounters. The user will be prompted for the measurement type and value. The value is a required field and must be completed before continuing.

Measurement types are listed as follows:

<table>
<thead>
<tr>

</table>

The following shows an example of using the MEAS mnemonic.
3.5.123 Medication List Review (MLR)

Use to document when a provider indicates on the PCC or PCC+ Form that he/she reviewed the medication list. This mnemonic will prompt for the provider who reviewed the medication list and the date/time reviewed. If the time is not known, the date alone is sufficient and will default to the visit date.

Figure 3-105: Example of using the MLR mnemonic

3.5.124 Change Note Narrative (MNN)

Use the Change Note Narrative (MNN) mnemonic to make changes to the narrative portion of a note (for non-visit- or visit-related encounters). Before using this mnemonic, the problem number that corresponds to the note must be clearly identified on the encounter form, as shown in the following example.

The MNN mnemonic prompts for the provider who added the problem list update and the date the update was made. This enables the creation of a V Updated/Reviewed entry with a clinical action of Problem List Updated.

Figure 3-106: Example of using the MNN mnemonic
3.5.125 Switch to Modify Mode (MOD)

To change an entry, use the MOD mnemonic to switch from Enter mode to Modify mode for visit-related-only encounters. This mnemonic applies to visit-related-only encounters.

Note that typing the mnemonic that requires modification prior to selecting MOD to switch to Modify mode, will not allow the user to correct the error. Instead, the user might be typing new data or overwriting previously entered data. MOD can only be used for one mnemonic at a time. To modify data for another mnemonic, the user will need to use the MOD mnemonic again. A warning message indicates when the user is switching between Enter and Modify modes, as shown in the following example.

```
MNEMONIC: MOD  Switch to Modify Mode  ALLOWED  VISIT-RELATED-ONLY
Switching to Modify Mode for ONE Mnemonic ONLY!
MNEMONIC: MEAS  Measurement Entry  ALLOWED  VISIT-RELATED-ONLY
1 BP  THETA,EVA  JUN 19,1997@12:25  120/80
2 WT  THETA,EVA  JUN 19,1997@12:25  185
Choose: 2
  TYPE: WT//
  VALUE: 185// 158
Switching back to ENTER Mode!
```

3.5.126 Modify Problem Narrative (MPO)

Use the Modify Problem Narrative (MPO) mnemonic to change a patient’s active or inactive problem narrative for non-visit- or visit-related encounters when the problem has been entered through PCC data entry. If the problem was entered through the EHR and SNOMED coded the following message displays:

```
This problem was entered through EHR and SNOMED coded. Your editing of this problem is limited to the Status.
```
Problem item fields can be changed when using the MPO mnemonic, as shown in the example that follows. Before using this mnemonic, be sure that the problem number and facility codes have been clearly identified on the encounter form in the Purpose of Visit or the Problem List Update section. The patient’s Problem List displays to assist with verifying the correct problem for modification.

The PO mnemonic prompts for the provider who added the problem list update and the date the update was made. This enables the creation of a V Updated/Reviewed entry with a clinical action of Problem List Updated. Please note the following example.

<table>

Enter Problem Diagnosis: INJURY

959.9 (INJURY-SITE NOS)
OTHER AND UNSPECIFIED INJURY TO UNSPECIFIED SITE

OK? Y //
3.5.127 No Active Allergies (NAA)

Use to document when a provider indicates on the PCC or PCC+ Form that he/she reviewed allergy list and there are No Active Allergies. This mnemonic will prompt for the provider who documented No Active Allergies and the date/time documented. If the time is not known, the date alone is sufficient and will default to the visit date. Please note that if you choose mnemonic NAA and there are active allergies in the allergy tracking system, you will be warned and prompted as to whether you want to continue.

MNEMONIC: NAA  No Active Allergies  ALLOWED  VISIT RELATED ONLY

Did the Provider indicate there are No Active Allergies?  (Y/N): Y
Date/Time Provider documented 'No Active Allergies': Oct 26, 2010
// (OCT 26, 2010)
Provider who Documented 'No Active Allergies': BTPROVIDER,WENDY C

3.5.128 No Active Medications (NAM)

Use to document when a provider indicates on the PCC or PCC+ Form that he/she reviewed the medication list and there are No Active Medications. This mnemonic will prompt for the provider who documented No Active Medications and the date/time documented. If the time is not known, the date alone is sufficient and will default to the visit date. Please note that if you choose mnemonic NAM and there are active medications on the medication list, you will be warned and prompted as to whether you want to continue.

MNEMONIC: NAM  No Active Medications  ALLOWED  VISIT RELATED ONLY

This patient has active medications in their record.

Are you sure you want to document 'No Active Medications'?  (Y/N): Y
Date/Time Provider documented 'No Active Medications': Oct 26, 2010
// (OCT 26, 2010)
Provider who Documented 'No Active Medications': BTPROVIDER,WENDY C
3.5.129 No Active Problems (NAP)

Use to document when a provider indicates on the PCC or PCC+ Form that he/she reviewed the problem list and there are No Active Problems. This mnemonic will prompt for the provider who documented No Active Problems and the date/time documented. If the time is not known, the date alone is sufficient and will default to the visit date. Please note that if you choose mnemonic NAP and there are active problems on the problem list, you will not be able to continue with the mnemonic.

| MNEMONIC: NAP  No Active Problems ALLOWED VISIT RELATED ONLY |
| Did the Provider indicate there are No Active Problems?  (Y/N): Y |
| Date/Time Provider documented 'No Active Problems': Nov 10, 2010 // (NOV 10, 2010) |
| Provider who Documented 'No Active Problems': XCPROVIDER,SHARON R |

Figure 3-112: Example of using the NAP mnemonic

3.5.130 Not Medically Indicated (NMI)

Use the Not Medically Indicated (NMI) mnemonic to type a new patient refusals for service/NMI (for non-visit- or visit-related encounters). The options are: ADA Code, CPT, Education Topics, EKG, Exam, ICD Operation/Procedure, Immunization, Lab, Mammogram, Measurements, Medication/Drug, Pap Smear, Radiology Exam, and Skin Test. The user is prompted to enter the type of refusal, the date declined/not indicated, and the provider who documented the refusal.

| PROVIDER WHO DOCUMENTED: SMITH,JOHN |
| COMMENT: REFUSED |

Figure 3-113: Example of using the NMI mnemonic

3.5.131 Note (NO)

Use the Note (NO) mnemonic to add notes to an existing problem for non-visit- or visit-related encounters. Providers often record treatment plans or notes on a patient’s Problem List. Before adding a note, be sure that the problem number has been clearly identified on the encounter form. The patient’s problem displays so that the problem number can be verified.

The NO mnemonic prompts for the provider who added the problem list update and the date the update was made. This enables the creation of a V Updated/Reviewed entry with a clinical action of Problem List Updated.

3.5.140 Outside RX (Historical)

This mnemonic is not used by all sites.

3.5.141 Other Items for List Manager (OT)

This mnemonic is not used by all sites.

3.5.142 Health Reminder Override (OVR)

Use the Health Reminder Override (OVR) mnemonic to override a health reminder for a specific patient in non-visitor visit-related encounters.

MNEMONIC: OVR Health Reminder Override  ALLOWED  NON-VISIT/VISIT MNEMONIC
Select HEALTH REMINDER OVERRIDE HEALTH MAINTENANCE REMINDER: WEIGHT
3.5.143 Pain (PA)

Use the Pain (PA) mnemonic to enter perceived pain level, with a range of zero to ten for visit-related-only encounters.

**Example:**

<table>
<thead>
<tr>
<th>PROVIDER REQUESTING OVERRIDE: SMITH, JOHN</th>
</tr>
</thead>
<tbody>
<tr>
<td>DUE DATE: T</td>
</tr>
<tr>
<td>PROVIDER COMMENTS: OVERRIDE</td>
</tr>
</tbody>
</table>

**Note:** Pain can only be entered if PRV mnemonic is also entered.

**Figure 3-123: Example of using the OVR mnemonic**

**Figure 3-124: Example of using the PA mnemonic**

3.5.144 31 Pap Smear Ordered (PAP)

Use the 31 Pap Smear Ordered (PAP) mnemonic to record that a pap smear was ordered for a female patient for visit-related-only encounters. This entry indicates only that a Pap was ordered. Results are not captured. This mnemonic should be used only if the user’s facility is not using the laboratory or women’s health package.

**Example:**

| MNEMONIC: PAP 31 PAP Smear Ordered ALLOWED VISIT-RELATED-ONLY |

**Figure 3-125: Example of using the PAP mnemonic**

3.5.145 PCC+ Form (PCF)

The PCC+ Form (PCF) mnemonic flags a visit as being created from a PCC+ form (for visit-related-only encounters).

3.5.146 Primary Care Provider (PCP)

Use the Primary Care Provider (PCP) mnemonic to indicate that a patient is assigned a specific provider for all visits for non-visit or visit-related encounters. The provider’s name displays on the Adult Regular Health Summary in the Demographics section. PCP will rarely be used and should not be confused with the PRV mnemonic that is required for all visits.

**Note:** This mnemonic is the same as the DP – Designated Provider. Only the terminology is different.

**Example:**

| MNEMONIC: PCP Primary Care Provider ALLOWED NON-VISIT/VISIT MNEMONIC PERSONAL PHYSICIAN: SIGMA, JANE PHYSICIAN IHS TAC 100TAC |

**Figure 3-126: Example of using the PCP mnemonic**
3.5.147 Procedure Entry (PCPT)

The PCPT mnemonic is no longer available as of the ICD10 implementation date.

3.5.148 Patient Education (PED)

Use the Patient Education (PED) mnemonic to record the health education received by a patient for visit-related-only encounters. The education topic should be noted on the Encounter Form and will display on the Adult Regular health summary. This data should not be entered unless the education topic has been initialized by the provider in the Patient Education section of the form. Each facility is responsible for establishing and maintaining its own database of patient education topics.

The patient’s readiness to learn can be typed, with the following choices:

- Distraction
- Eager to Learn
- Intoxication
- Not Ready
- Pain
- Receptive
- Severity of Illness
- Unreceptive

The patient’s level of understanding can be entered, as well as CPT codes. The choices available for patient’s level of understanding shown as follows:

- Poor
- Fair
- Good
- Group – No Assessment
- Refused

Education topics can be entered in one of three ways: (1) use the name of the topic (e.g., DM-DIET), (2) use an ICD Diagnosis for the topic diagnosis and type a topic category or (3) use a CPT Code and type a topic category.

MNEMONIC: PED  Patient Education  ALLOWED  VISIT-RELATED-ONLY
You can enter education topics in 2 ways:
- using the name of the topic (e.g. DM-DIET)
- using an ICD Diagnosis for the topic diagnosis and enter a topic category

Select one of the following:
T EDUCATION TOPIC
D  DIAGNOSIS
C  CPT CODE
Do you wish to enter a: T// EDUCATION TOPIC
Enter EDUCATION Topic: DEP-EXERCISE
READINESS TO LEARN: EAGER TO LEARN

3.5.149 Peak Flow (PF)
Use the Peak Flow (PF) mnemonic to document a patient’s peak flow measurement for visit-related-only encounters. The value range is 50 to 1000.

MNEMONIC: PF  Peak Flow  ALLOWED  VISIT-RELATED-ONLY
VALUE: 500

Figure 3-128: Example of using the PF mnemonic

3.5.150 Public Health Nursing Form (PHN)
Use the Public Health Nursing (PHN) mnemonic to type patient data resulting from public health nursing visits (for visit-related-only encounters). The user is prompted to enter data in several fields. The choices for the Level of Intervention and Type of Decision Making prompts are listed below. The remaining fields are free-text fields. The entry can be a maximum of 200 characters in length for each.

<table>
<thead>
<tr>
<th>Code</th>
<th>Level of Intervention</th>
</tr>
</thead>
<tbody>
<tr>
<td>P</td>
<td>Primary</td>
</tr>
<tr>
<td>S</td>
<td>Secondary</td>
</tr>
<tr>

<tr>
<td>H</td>
<td>High Complexity</td>
</tr>
</tbody>
</table>

The following shows an example of using the PHN mnemonic:

MNEMONIC: PHN  Public Health Nursing Form  ALLOWED  VISIT-RELATED- ONLY
LEVEL OF INTERVENTION: P PRIMARY
TYPE OF DECISION MAKING: S STRAIGHTFORWARD
PSYCHO/SOCIAL/ENVIRON: PT IS DEPRESSED SECONDARY TO OTHER MEDICAL PROBLEMS
NSG DX: DEPRESSION, DIABETES, HYPERTENSION
SHORT TERM GOALS: CONTINUE TO MONITOR MEDICATION
LONG TERM GOALS: ADMISSION TO NURSING HOME

Figure 3-129: Example of using the PHN mnemonic

3.5.151 PHQ2 (PHQ2)

Use the PHQ2 mnemonic as a depression screen (for visit-related-only encounters). A score of three or higher is considered a positive screen and further evaluation is indicated. The value range is zero to six.

MNEMONIC: PHQ2 PHQ2 ALLOWED VISIT-RELATED-ONLY
VALUE: 5

Figure 3-130: Example of using the PHQ2 mnemonic

3.5.152 PHQ9 (PHQ9)

Use the PHQ9 mnemonic as a depression screen (for visit related encounters). The value range is 0 to 27. A value of zero to four indicates no depression. A value of five to nine indicates minimal symptoms. A value of 10 to 14 indicates mild symptoms. A value of 15 to 19 indicates moderate symptoms. A value of 20 or more indicates severe symptoms.

MNEMONIC: PHQ9 PHQ9 ALLOWED VISIT-RELATED-ONLY
VALUE: 10

Figure 3-131: Example of using the PHQ9 mnemonic

3.5.153 PHQT (PHQ-9 Modified for Teens)

Use the PHQT mnemonic as a depression screen for teens (for visit related encounters). The value range is 0 to 27. A positive score is a total score equal to or greater than 11 OR a positive response to questions 12 or 13. Depression Severity: 1 – 4: Minimal depression; 5 – 9: Mild depression; 10 – 14: Moderate depression; 15 – 19: Moderately severe depression; 20 – 27: Severe depression. Suicidality: Regardless of the PHQ-9 Modified total score, endorsement of serious suicidal ideation OR past suicide attempt (a “Yes” response to questions 12 or 13) should be considered a positive screen.

MNEMONIC: PHQT PHQ-9 Modified for Teens
VALUE: 20
Select QUALIFIER:
Date/Time Vitals Taken: T@13:40  (MAY 04, 2012@13:40:00)
ENCOUNTER PROVIDER: TEST,PCC
3.5.154 Personal History (PHX)

When a provider wants to capture data that is pertinent to the patient’s health but has not otherwise been recorded, use the PHX mnemonic to capture personal history data (for non-visit or visit-related encounters). Many times judgment calls will be required by the data entry operator based on the narrative that has been written on the encounter form; for example, the notation “Attempted suicide 1993” indicates a personal history item with the date of onset as 1993. Although personal history items do not display in the Adult Regular Health Summary, they can be displayed in a locally defined custom Health Summary.

![Figure 3-132: Example of using the PHQT mnemonic](image1)

Examples: 7 2 for 7 lbs 2 ozs
3.2K for 3.2 kilograms
3200G for 3200 grams

BIRTH WEIGHT: 7 1
BIRTH ORDER: 2
FORMULA STARTED: 1Y

Data Entry Mnemonics
June 2015
3.5.156 Problem List (PL)

Use the Problem List (PC) mnemonic to access a Problem List update menu (for non-visit or visit-related encounters). The patient’s Problem List displays on the screen with action commands listed across the bottom. A patient’s Problem List is updated in the same way that the problem list mnemonics are used, with text prompts. Only the method of selecting action items is different. The Problem List Narrative can be up to 160 characters.

Additional features available from this menu include a Health Summary and face sheet display from within this menu. The detailed display shows the complete data for the problem selected. An example of adding a problem is shown in the following example.

Two action items have been added to the List Manager display when using the PL mnemonic: NP (No Active Problems), and LR (Problem List Reviewed).
CLASS:  
STATUS: CHRONIC//

Severity: None recorded

Select one of the following:

A    Add a Severity
N    No Change

Which action: N//

Add a new Problem Note for this Problem? N//
Enter the Date the Problem List was Updated by the Provider: Dec 15, 2014//
Enter the individual that updated the problem list.
If you are transcribing an update from a PCC Provider, then enter
the individual who requested the change. If you are data
entry/coder correcting the problem entry such as correcting the
ICD code, then enter yourself.
Enter the INDIVIDUAL who Updated the Problem List: DEMO, DR

Figure 3-135: Example of using the PL mnemonic

The Problem List Update menu will display again after you press the Enter key.

Note: Remember to type Q to quit the Problem List menu and
return to the “Mnemonic” prompt.

When adding a problem, if the diagnosis is an injury, the PL mnemonic will prompt
for three Injury Code fields. When modifying any problem, however, these prompts
will always display so they can be deleted, if appropriate.

Enter Problem Diagnosis: INJURY

    CAUSE (V01-Y99 Code Range) #2:
    CAUSE (V01-Y99 Code Range) #3:

Figure 3-136: Example of E Code prompts

Problems can no longer be deleted from the Problem List; instead, they will be
updated with a status of Deleted. The status values are now Active, Inactive, or
Deleted.

The PL mnemonic has been modified so that when you delete a problem, you are
prompted for a reason and for who documented the deletion. Instead of deleting the
problem, as was done in the past, the status field is set to D for Deleted.
If the problem does have a SNOMED code, then the user can only edit the status and ICD code.

### 3.5.157 Problem List Reviewed (PLR)

Use to document when a provider indicates on the PCC or PCC+ Form that he/she reviewed the problem list. This mnemonic will prompt for the provider who reviewed the problem list and the date/time reviewed. If the time is not known, the date alone is sufficient and will default to the visit date.

MNEMONIC: PLR  Problem List Reviewed  ALLOWED  VISIT RELATED ONLY
Did the Provider indicate that he/she Reviewed the Problem List? (Y/N): Y
Problem List Review Date/Time: Oct 26, 2010/ (OCT 26, 2010)
Provider who Reviewed the Problem List: SMITH BT PROVIDER, WENDY C

Figure 3-138: Example of using the PLR mnemonic

### 3.5.158 Problem Only (PO)

Use the Problem Only mnemonic to add new active or inactive problems to a patient’s Problem List for non-visit- or visit-related encounters. Problems to be added to a patient’s Problem List will be written in the Purpose of Visit section of the encounter form with the problem status marked as A (Active) I (Inactive), or D (Deleted). For more information on the Problem List, refer to the PCC Forms and Health Summary manuals.

The PO mnemonic prompts for the provider who added the problem list update and the date the update was made. This enables the creation of a V Updated/Reviewed entry with a clinical action of Problem List Updated.

COMMENT:

Figure 3-143: Example of using the PRD mnemonic
3.5.162 Providers (Primary/Secondary) (PRV)

Use the Providers (PRV) mnemonic to record each person who provides healthcare services to a patient during a visit (for visit-related-only encounters). A primary provider is required for each patient visit and must be recorded on the encounter form. Secondary providers are optional and can be typed with the PRV if written on the encounter form. The user can type the provider’s code, initials, or entire name. The date and time that the provider saw the patient can also be typed utilizing the PRV mnemonic. These data fields are typed only at facilities that are conducting Waiting Time studies. The PCC Data Entry Site Parameters determine whether or not the data entry operator is prompted for Date and Time when using this mnemonic.

Figure 3-144: Example of using the PRV mnemonic

3.5.163 Prescription RX (PRX)

Use the Prescription RX (PRX) mnemonic at sites that either do not have a pharmacy or are not utilizing an automated pharmacy system for entry of medications for visit-related-only encounters. Data entry staff use this mnemonic to type medications directly into the PCC V-Medication File. This mnemonic is similar to the RX mnemonic but fewer data fields are typed using PRX.

Figure 3-145: Example of using the PRX mnemonic

3.5.164 VA Mobile Cln Prescription Act

This mnemonic is not used by all sites.
3.5.165 Physical Therapy (PT)

Facilities that have a therapist on staff and use form HRSA 464–PCIS Brief Visit Record for documenting physical therapy visits should use the PT mnemonic to capture the physical therapy treatment provided (for visit-related-only encounters). The physical therapist will type the appropriate code for data entry in the box on the right side of the form labeled Coding. The physical therapist is responsible for establishing and maintaining the list of physical therapy codes.

<table>

3.5.166 Patient Goals (PTG)

Use the Patient goals Mnemonic to document patient goals, steps taken to meet the goals and monitor and update goal progression and status. The PTG mnemonic takes you to the Goal List Update screen which is in list manager format. The list manager is also accessible through option PATG Patient Goals Update under the UPD Update Patient Related/Non-visit Data menu. A brief description of the list manager options is below.

**AG – Add Goal**

Enter a goal by first establishing a goal setting. Options are: “S Goal Set” and” N Goal Not Set.” Choose a predefined goal type, or choose “Other.” Prompts for Goal Number, Goal Name, Reason for Goal, Provider, Goal Start and Follow-up Dates follow. Multiple goal types and multiple steps can be added. The available goal types are:

- ALCOHOL OR OTHER DRUGS
- DIABETES CURRICULUM
- MEDICATIONS
- \MONITORING
- NUTRITION
- OTHER
- PHYSICAL ACTIVITY
- STRESS AND COPING
- TOBACCO
- WELLNESS AND SAFETY
RV – Review a Goal
You can select one of the following:

- ME – Goal Met
- MA – Maintenance Goal
- S – Goal Stopped
- – No Change

After you choose a review option, previously entered progress notes display. You can add, edit or delete a progress note or return to the previous screen.

DE – Delete Goal
Goals should not be deleted unless they were entered in error. You are prompted to enter the goal you want to delete. Answer “No” to the verification prompt “Do you wish to continue to delete a Goal?” if you wish to leave the option without deleting a goal.

AS – Add Step
Enter text that describes the step; enter the step type, start date, follow-up date and the provider. You can enter multiple steps for each goal.

ES – Review Step
You can select one of the following:

- ME – Step Met
- MA – Maintenance Step
- S – Step Stopped

RS – Remove Step
Steps should not be removed unless they were entered in error. You are prompted to enter the goal and step you want to delete. Answer “No” to the verification prompt “Are you sure you want to delete this STEP?” if you wish to leave the option without removing a step.

IG – Display Inactive Goals
Goals are considered inactive if the goal status is “Goal Met” or “Goal Stopped.”

DD – Detail Display
Choose a goal from the list. Detailed data entered for the goal and associated steps displays.
'Active Goals are listed first followed by Goals not set. Inactive goals are not listed.

3.5.167 Pulse (PU)

This is an optional data item that does not print on the Adult Regular Health Summary although it can be used in a customized Health Summary. The value typed must be in the range 30 to 250. The mnemonic applies to visit-related-only encounters.

MNEMONIC: PU Pulse ALLOWED VISIT-RELATED-ONLY
VALUE: 75

Figure 3-148: Example of using PU mnemonic

3.5.168 Purpose of Visit (PV)

The purpose of visit is the most important data item recorded for a patient’s visit. Every encounter form must have a purpose of visit recorded before it can be processed by the data entry staff. This data item is typed in the Purpose of Visit section on the encounter form in a narrative format by the provider. The purpose of visit is entered in two parts: (1) to obtain the ICD code, and (2) to maintain the provider’s narrative verbatim. The second entry, the provider’s narrative, displays in the Adult Regular Health Summary. For more information on the purpose of visit or the Problem List, refer to the PCC Forms manual. This mnemonic applies to visit-related-only encounters.

After ICD10 implementation, if the dual coding site parameter is set to Yes, the user will have the option to enter an ICD-9 diagnosis code after entering the ICD-10 diagnosis code.
Figure 3-149: Example of Dual Coding Data Entry

During entry of the purpose of visit, the user will be prompted for a modifier and a cause of diagnosis. These optional fields are used as needed, depending on the provider’s diagnosis. The choices available for entry at each of these prompts are listed in the following table.

<table>
<thead>
<tr>

MNEMONIC: PV  Purpose of Visit  ALLOWED VISIT-RELATED-ONLY
Enter PURPOSE of VISIT: R51
  1)  Headache (ICD-10-CM R51.)
PROVIDER NARRATIVE: Headache
MODIFIER: CAUSE OF DX:
Enter PURPOSE of VISIT:

Figure 3-150: Example of using the PV mnemonic

Note: At the “Provider Narrative” prompt, if the narrative from
the encounter form is identical to the text typed at the
“Purpose of Visit” prompt to obtain the ICD code, then
type an equal sign (=) to duplicate the text typed in at the
Purpose of Visit prompt. This will save keystrokes.

If the diagnosis is an injury, several different prompts will appear requesting specific
information about the injury. It is very important that these fields get completed in
order to maintain records and generate statistical reports on accidents in the user’s
area. The additional prompts that display are as follows:

• “Cause of Injury”
• “Retained Foreign Body”
• “Place of Occurrence”
• “Date of Injury”
• “First/Revisit”

The Cause of Injury field allows an injury code to be recorded for the visit. Data for
each

An example of an injury-related visit follows.

3.5.169 Radiology (RAD)

Use the Radiology (RAD) mnemonic to enter radiology procedures into the system for visit-related-only encounters. The impression and an indication of whether or not the result is normal/abnormal can be recorded. It is recommended that radiology staff enter this data to ensure that the procedures and impressions are input accurately. This mnemonic should not be used if the radiology package is operational at the user’s facility.

<table>

3.5.171 Add Patient to a Register (REG)

This mnemonic is not used by all sites.

3.5.172 Reproductive Factors (RF)

Use the Reproductive Factors (RF) mnemonic to enter reproductive factors for a female patient for non-visit or visit-related encounters. The following fields are available for data entry:

- Total # Pregnancies
- Full Term Births
- Premature Births
- Abortions, #Induced
- Abortions, #Spontaneous
- Ectopic Pregnancies
- Multiple Births
- Living Children
- DES Daughter?
- Age at First Menses
- Age at First Vaginal Intercourse
- Age at Onset of Menopause

- AGE at ONSET of MENOPAUSE:

**MNEMONIC:**

Figure 3-154: Example of using the RF mnemonic

### 3.5.173 Remove Note Narrative (RNO)

When a provider indicates on the encounter form that a problem note should be removed, use the RNO mnemonic (for non-visit- or visit-related encounters). Notes are linked to problems and must be clearly identified by number in the top section of the Encounter Form under “Problem List Update - Remove” before a delete is performed by the data entry operator. The provider uses the patient’s Health Summary to identify the entire problem number and note to be deleted; for example, SX1SX1. For reference, the patient’s Problem List displays prior to deletion of the note.

The PO mnemonic prompts for the provider who added the problem list update and the date the update was made. This enables the creation of a V Updated/Reviewed entry with a clinical action of Problem List Updated.

**Figure 3-155: Example of using the RNO mnemonic**

### 3.5.174 VA Mobile Clinic REFER OUPT (RO)

This mnemonic is not used by all sites.

### 3.5.175 Remove Problem Entry (RPO)

Use the Remove Problem Entry (RPO) mnemonic when a provider indicates that an active or inactive problem is to be removed from the patient’s Problem List for non-visit- or visit-related encounters. The provider must write the entire problem number from the Health Summary in the “Remove” box under the Problem List Update section at the top of the encounter form.

The PO mnemonic prompts for the provider who added the problem list update and the date the update was made. This enables the creation of a V Updated/Reviewed entry with a clinical action of Problem List Updated.
Are you sure that you want to remove Problem Number CI3 ? (Y/N) Y

Removing Problem CI3 ...
Provider who deleted the problem: ADPROVIDER, RAY
REASON PROBLEM DELETED: D DUPLICATE

Enter the Date the Problem List was Updated by the Provider: Nov 02, 2010// (NOV 02, 2010)
Enter the PROVIDER who Updated the Problem List: ADPROVIDER, RAY
ADPROVIDER, RAY

Figure 3-156: Example of using the RPO mnemonic

Problems can no longer be deleted from the Problem List; instead, they will be updated with a status of Deleted. The status values are now Active, Inactive, or Deleted.

The RPO mnemonic has been modified so that when you delete a problem, you are prompted for a reason and for who documented the deletion. Instead of deleting the problem, as was done in the past, the status field is set to D for Deleted.

3.5.176 Respiration (RS)

Use the Respiration (RS) mnemonic to record the patient’s respiration rate for visit-related-only encounters. The value entered must be in the range 0 to 100.

Figure 3-157: Example of using the RS mnemonic

3.5.177 Medications (RX)

Use the Medications (RX) mnemonic to record medications dispensed only if the Pharmacy module is not in use at the user’s facility (for visit-related-only encounters). The provider notes the prescription name, SIG, quantity, and days under the Medications section on the lower portion of the encounter form. Medications display in the Adult Regular Health Summary.
3.5.178 Suicide Form Entry (SF)

Use the Suicide Form Entry (SF) mnemonic to enter information about a patient’s suicide attempt for non-visit or visit-related encounters. The data fields included are: Provider Completing The Form, Date Of Suicide Act, Local Case Number, Community, Employment Status, Relationship Status, Education Level, Suicidal Behavior, Location Of Act, Previous Attempts, Method, Substance Involved, Factor, Disposition, and Narrative.

**Figure 3-158: Example of using RX mnemonic**

**Figure 3-159: Example of using the SF mnemonic**

3.5.179 History of Surgery (SHX)

Use the SHX mnemonic when a provider documents a past surgical procedure in the Purpose Of Visit section of the encounter form (for non-visit- or visit-related encounters). This mnemonic is used for historical procedures only. Type the provider’s narrative and date for the procedure. If the exact date is unknown, type the year the procedure was performed for an entry. These historical surgeries display in the Adult Regular Health Summary.
3.5.180 Purpose of Visit with Stage Prompt (SPV)

The Purpose of Visit with Stage Prompt (SPV) mnemonic is identical to the PV mnemonic except that an additional prompt, “Stage,” is included (for visit-related-only encounters). The entry for Stage must be a number between zero and nine. No decimals are allowed. For more information on purpose of visit, see the description of the PV mnemonic. The mnemonic applies to visit-related-only encounters.

If the diagnosis is an injury, the SPV mnemonic will prompt for three E Code fields and for an entry of First Visit or Revisit. When modifying any diagnosis (MOD), these prompts will always display so they can be deleted, if appropriate.

3.5.181 VA Mobile Clinic Refer Spec (SR)

This mnemonic is not used by all sites.

3.5.182 Skin Test (ST)

Use the Skin Test (ST) mnemonic to type skin tests reading(s) and results for visit-related-only encounters. A reading and/or results is required before an entry is made. Provider initials do not indicate a reading or results. To record only that a skin test was placed, use the STP mnemonic. The PPD readings and/or results are written on the last line of the Orders/Initials column. All other skin tests are written on the last line of the Medications/Treatments Procedures/Patient Education section.
At the “Reading” prompt, the value typed must be in the 0 to 40 range. Select from choices in the following table for an entry at the “Results” prompt.

<table>
<thead>
<tr>
<th>Result</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>P</td>
<td>Positive</td>
</tr>
<tr>
<td>N</td>
<td>Negative</td>
</tr>
<tr>
<td>D</td>
<td>Doubtful</td>
</tr>
<tr>
<td>O</td>
<td>No Take</td>
</tr>
</tbody>
</table>

The following shows using the ST mnemonic:

```
MNEMONIC: ST  Skin Test  ALLOWED  VISIT-RELATED-ONLY
Enter SKIN TEST Type: PPD 21
READING: 0
RESULTS: N  NEGATIVE
DATE READ: Jun 16, 1997//  (JUN 16, 1997)
```

Figure 3-162: Example of using the ST mnemonic

### 3.5.183 Stage in Purpose of Visit (STG)

Use the Stage in Purpose of Visit (STG) mnemonic to record the stage only for a Purpose Of Visit (for visit-related-only encounters). After typing the STG mnemonic, all purposes of visit typed display. In the case of multiple purposes for a single visit, type the stage for only one purpose of visit at a time. At the “Stage” prompt, type a number between zero and nine.

**Note:** Decimals are not allowed.

```
MNEMONIC: STG  Stage in Purpose of Visit  ALLOWED  VISIT-RELATED-ONLY
  1  174.3  SIGMA, JANE  JUN 23, 2007@09:00
STAGE: 4
```

Figure 3-163: Example of using the STG mnemonic

### 3.5.184 Station (Pregnancy) (STN)

Use the Station (STN) mnemonic to type the station measurement for a pregnancy for visit-related-only encounters. The value typed must be between negative six and four.

```
MNEMONIC: STN  Station (Pregnancy Meas)  ALLOWED  VISIT-RELATED-ONLY
VALUE: 3
```

Figure 3-164: Example of using the STN mnemonic
3.5.185 Skin Test Placed (No Reading) (STP)

Use the Skin Test Placed (STP) mnemonic to record that a skin test was placed during a visit (for visit-related-only encounters). No results or reading are typed when using this mnemonic. Choose from the following skin test types:

- Cocci
- Mono-Vac
- PPD
- Schick
- Tine

MNEMONIC: STP  Skin Test Placed (No Reading)  ALLOWED  VISIT- RELATED-ONLY
Enter SKIN TEST Type: PPD  21

Figure 3-165: Example of using the STP mnemonic

3.5.186 Type of Appointment (S/M/L) (TA)

Use the Type of Appointment (TA) mnemonic to type whether the patient’s appointment was Short, Medium, or Long (for visit-related-only encounters).

MNEMONIC: TA  Type of Appointment (S/M/L)  ALLOWED  VISIT-RELATED- ONLY
TYPE OF APPOINTMENT (S/M/L): M MEDIUM

Figure 3-166: Example of using the TA mnemonic

3.5.187 Chargemaster Transaction Code (TC)

Use the TC mnemonic to enter one or more Chargemaster Transaction Codes from a Superbill or other form of billing document (for visit-related-only encounters). A Chargemaster Transaction File must be loaded at the user’s site in order use this mnemonic.

MNEMONIC: TC  Chargemaster Transaction Code  ALLOWED  VISIT- RELATED-ONLY
Enter (TC) TRANSACTION CODE: 10100095 X-R, TMJ, OPEN/CLSD MOUTH;BI
Enter (TC) TRANSACTION CODE: 10100110 X-R, PHARYNX, LARYNX, W/FLUO Enter
(TC) TRANSACTION CODE: 10100055 X-RAY, ORBITS, COMP, MIN 4VS

Figure 3-167: Example of using the TC mnemonic

3.5.188 Type of Decision Making (TD)

The type of decision making is recorded primarily for public health nursing visits (for visit-related-only encounters). The prompt displays when using the PHN mnemonic. To record only the type of decision making, use the TD mnemonic. The entry choices are the following:
<table>
<thead>
<tr>
<th>Type</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>S</td>
<td>Straightforward</td>
</tr>
<tr>
<td>L</td>
<td>Low Complexity</td>
</tr>
<tr>
<td>M</td>
<td>Moderate Complexity</td>
</tr>
<tr>
<td>H</td>
<td>High Complexity</td>
</tr>
</tbody>
</table>

The following shows using the TD mnemonic:

MNEMONIC: TD  Type of Decision Making  ALLOWED  VISIT-RELATED- ONLY
LEVEL OF DECISION MAKING: S  STRAIGHTFORWARD

Figure 3-168: Example of using the TD mnemonic

### 3.5.189 Chargemaster Transaction Code with Enc Prov (TE)

Use the TE mnemonic to enter one or more Chargemaster Transaction Codes, including the identification of the Ordering Provider, from a Superbill or other form of billing document for visit-related-only encounters. A Chargemaster Transaction File must be loaded at the user’s site in order to use this mnemonic.

MNEMONIC: TE  Chargemaster TC with Enc Prov  ALLOWED  VISIT-RELATED- ONLY
Enter (TE) TRANSACTION CODE: 26000800  IPECAC ADMINISTRATION
EVENT DATE AND TIME: T-1  (NOV 28, 1998)
ENCOUNTER PROVIDER: GM  SIGMA, JANE

Figure 3-169: Example of using the TE mnemonic

### 3.5.190 Time of Visit (TM)

Use the Time of Visit (TM) mnemonic to correct a visit time for visit-related-only encounters. Time is a required entry for a patient visit and is typed at the “Time of Visit” prompt when a visit is created. If the user has entered an incorrect time, use TM to make the change.

MNEMONIC: TM  Time of Visit  ALLOWED  VISIT-RELATED-ONLY
Enter new time: 1130//1145
Now changing time...  (JUN 16, 1997@11:45)

Figure 3-170: Example of using the TM mnemonic

### 3.5.191 Temperature (TMP)

Use the Temperature (TMP) mnemonic to type the patient’s temperature at the time of the visit for visit-related-only encounters. The value is entered in degrees Fahrenheit and must be in the 70 to 120 range. The patient’s temperature will not display in the Adult Regular Health Summary, but can be selected to display in a locally defined custom Health Summary.
3.5.192 Tonometry (TON)

Use the Tonometry (TON) mnemonic to record the intraocular tension of a patient’s eyes for visit-related-only encounters. Tonometry is rarely entered into the system because only facilities with an optometrist use this data. The tonometry reading is recorded in the Medications/Treatments /Procedures /Patient Education section of the encounter form. The reading is entered with the right eye measurement first, followed by a slash, and then the reading for the left eye, as shown in the following example. The values must be between 0 and 80.

Figure 3-172: Example of using TON mnemonic

3.5.193 Treatments Provided (TP)

This optional data item is located in the Medications/Treatments/Procedures/Patient Education section of the ENCOUNTER FORM. The treatment provided is recorded on the form with a three-digit code for visit-related-only encounters. Because this section of the encounter form is used for multiple purposes, providers must indicate “TP” next to the code for the treatment to be captured; for example, TP 906. Because the PCC requires this data to be entered as a six-digit code, three zeroes must precede the three-digit code; in the example above, 000906 would be typed. Treatments provided are primarily used by CHNs. Each facility is responsible for establishing and maintaining this list of codes for treatments provided (for visit-related-only encounters).

Figure 3-173: Example of using the TP mnemonic

3.5.194 Treatment Contracts (TRC)

Use the Treatment Contracts (TRC) mnemonic to enter a new mental health (M) or pain (P) contract and the date for visit-related-only encounters. The user can also enter a new V Treatment Contract. This is the entry in the Exam file that represents which type of exam was done at the encounter (for visit-related-only encounters).
Enter TREATMENT CONTRACT Type: P (P PAIN)
DATE INITIATED: T (MAR 06, 2008)
PROVIDER: SIGMA, JOHN

Figure 3-174: Example of using the TRC mnemonic

3.5.195 49 Urinalysis Order–No Results (UA)
Use the UA mnemonic to record the order for a urinalysis test for visit-related-only encounters. This mnemonic is used only if the Laboratory module is not in use at the user’s facility. The UA mnemonic should not be used unless the second box under the Orders/Initials on the encounter form is checked and initialed. The Adult Regular Health Summary contains a section called Most Recent Laboratory Data under which the UA test order displays.

MNEMONIC: UA 49 Urinalysis Ordered ALLOWED VISIT-RELATED-ONLY

Figure 3-175: Example of using UA mnemonic

3.5.196 Unable to Screen (UAS)
Use the Unable to Screen (UAS) mnemonic to document the service/NMI refusal type that the provider was not able to perform (for non-visit- or visit-related encounters).

MNEMONIC: UAS Unable to Screen ALLOWED NON-VISIT/VISIT MNEMONIC

Select PATIENT REFUSALS FOR SERVICE/NMI REFUSAL TYPE: EXAM
Enter the EXAM value: 08 HEART EXAM 08
DATE REFUSED/NOT INDICATED: T (MAR 06, 2008)
PROVIDER WHO DOCUMENTED: SIGMA, JOHN
COMMENT:

Figure 3-176: Example of using the UAS mnemonic

3.5.197 Underlying Cause of Death (UCD)
Use the Underlying Cause of Death (UCD) mnemonic to capture the underlying cause of death of a patient for non-visit- or visit-related encounters. At the prompt, enter the narrative for lookup, as shown below, or the ICD diagnostic code, if known.

MNEMONIC: UCD Underlying Cause of Death ALLOWED NON-VISIT/VISIT
UNDERLYING CAUSE OF DEATH: P96.0
P96.0 Congenital renal failure
OK? Y//

Figure 3-177: Example of using the UCD mnemonic
3.5.198 Auditory Evoked Potential Exam (UNH)

Use the Auditory Evoked Potential Exam (UNH) mnemonic to type data related to potential exam (for visit-related-only encounters).

3.5.199 Uncoded Procedure (UOP)

Use the Uncoded Procedure (UOP) mnemonic to enter an uncoded procedure for visit-related-only encounters. The provider narrative, operating provider, and diagnosis will be entered with this mnemonic.

<table>
<thead>
<tr>
<th>MNEMONIC: UOP  Uncoded Procedure  ALLOWED  VISIT-RELATED-ONLY</th>
</tr>
</thead>
<tbody>
<tr>
<td>Entering Uncoded Procedure, please enter a narrative describing the PROCEDURE</td>
</tr>
<tr>
<td>PROVIDER NARRATIVE: SUTURE LACERATION OF RIGHT UPPER ARM</td>
</tr>
<tr>
<td>OPERATING PROVIDER: JCS SIGMA, JANE PHYSICIAN IHS JAS 100JCS</td>
</tr>
<tr>
<td>DIAGNOSIS: S41.102S Unspecified open wound of left upper arm, sequela</td>

</tr>
<tr>
<td>MODIFIER: CAUSE OF DX:</td>
</tr>
<tr>
<td>Enter another Diagnosis/POV? No//  (No)</td>
</tr>
</tbody>
</table>

Figure 3-179: Example of using UPV mnemonic

3.5.201 Vision Corrected (VC)

Use the Vision Corrected (VC) mnemonic to enter vision data located in the Vision Corrected box on the right column of the encounter form (for visit-related-only encounters). This box is divided into a R (Right) and L (Left) eye reading. Usually two numbers are entered in each half; for example, 20/30 and 20/40. Only the second number (denominator) in each half of the box is picked up and combined for one entry into the system; for example, 30/40 would be entered for the previous example.
If one of the boxes on the form does not contain a reading, type only one value. To type the reading for the right eye only, type the number without a slash: 30. To type the left eye only, type a slash followed by the reading: /40. The values must be between 10 and 999. The numerator can differ from the assumed value of 20. If so, the second prompt “Numerator on VC/VU” allows the user to change the numerator value.

| MNEMONIC: VC  Vision Corrected  ALLOWED VISIT-RELATED-ONLY  VALUE: 40/50  NUMERATOR ON VC/VU: 20// |

Figure 3-180: Example of using the VC mnemonic

3.5.202 VA Mobile Clinic Visits Data (VR)

This mnemonic is not used by all sites.

3.5.203 Visit File Data Modify (VST)

Use the Visit File Data Modify (VST) mnemonic to correct the visit file (for visit-related-only encounters) after the visit is created and the mnemonic prompt has been reached. The data already entered displays as the default values for the prompts. To change any data previously entered, type the corrected information at the prompt, as shown in the example below.

Figure 3-181: Example of using the VST mnemonic

3.5.204 VA Mobile Clinic Visit Type

This mnemonic is not used by all sites.
3.5.205 Vision Uncorrected (VU)

Use the Vision Uncorrected (VU) mnemonic to enter the patient’s uncorrected vision measurement (which is found in the Vision-Uncorrected box on the right column of the encounter form). This box is divided into an R (Right) and L (Left) eye reading. Usually two numbers are entered in each half of the box; for example, 20/30 and 20/40. Only the second number (denominator) in each half of the box is picked up and combined as one entry; for example, 30/40 for the sample given above. This mnemonic applies to visit-related-only encounters.

It is assumed that the first number (numerator) is 20. In instances where the numerator is a number other than 20, enter the correct value at the “Numerator” prompt. If one box on the form does not have a reading, only the reading recorded is typed. If the reading is for the right eye only, enter the reading without the slash: 30. If the reading is for the left eye only, precede the value with the slash: /40.

**MNEMONIC: VU Vision Uncorrected ALLOWED VISIT-RELATED-ONLY**
VALUE: 30/40
NUMERATOR ON VC/VU: 20//

Figure 3-182: Example of using the VU mnemonic

3.5.206 Waist Measurement (WC)

Use the Waist Measurement (WC) mnemonic to document the waist circumference for visit-related-only encounters.

**MNEMONIC: WC**

1  WC  Waist Measurement ALLOWED VISIT-RELATED-ONLY
2  WCE  WELL CHILD EXAM ALLOWED VISIT-RELATED-ONLY
Choose: 1-2 1 WC  Waist Measurement ALLOWED VISIT-RELATED-ONLY
VALUE: 35

Figure 3-183: Example of using the WC mnemonic

3.5.207 Well Child Exam (WCE)

Use the Well Child Exam (WCE) mnemonic to enter data about a well-child exam for visit-related-only encounters. The user can enter patient education data and data gathered during a general health screening, age-specific physical exam, special risk screening, and a behavioral health screening.

**MNEMONIC: WCE WELL CHILD EXAM ALLOWED VISIT-RELATED-ONLY**

14. Read interactively with child; listen as he reads aloud
15. Set appropriate limits, establish consequences

Select ITEMS by number: 2

1. Set reasonable expectations
2. Know child's friends and their families [SELECTED]
3. Ensure adequate sleep (bed by 8-9??)
4. Limit TV, computer, video time (2 hours a day)
5. Promote physical activity
6. Use belt-positioning booster seat in back seat
7. NEVER put booster seat in front seat with air bag
8. Reinforce home safety rules (matches, poisons, tools)
9. Provide safe after-school care
10. Teach stranger, neighborhood safety
11. Supervise tooth brushing
12. Answer questions, normal curiosity
13. Praise child, encourage talking about activities and feelings
14. Read interactively with child; listen as he reads aloud
15. Set appropriate limits, establish consequences

Want to make any additional changes? No//

Name of educator: SIGMA, JOHN

If possible, record the level of understanding and duration of patient education session

Select one of the following:
1 POOR
2 FAIR
3 GOOD
5 REFUSED

Level of understanding: 3 GOOD

Total patient education time (min): (1-100): 30

Was an Infant Feeding Choice recorded? No//

No nutrition topics are required for this visit!!

Select EXAM TYPE
Select one of the following:

1. General health screening  
2. Age-specific physical exam  
3. Special risk screening  
4. Behavioral health screening  
A. ALL OF ABOVE  
Q. QUIT ENTERING EXAMS

Your choice: 4 Behavioral health screening  
No behavioral health screening exam items are available for this visit

Select EXAM TYPE  
Select one of the following:

1. General health screening  
2. Age-specific physical exam  
3. Special risk screening  
4. Behavioral health screening  
A. ALL OF ABOVE  
Q. QUIT ENTERING EXAMS

Your choice: 2 Age-specific physical exam  
Select age-specific physical exam(s)  
1. Teeth  
2. Signs of possible abuse or neglect 
Select ITEMS by number: 2  
1. Teeth  
2. Signs of possible abuse or neglect [SELECTED]

Want to make any additional changes? No/

Signs of possible abuse or neglect  
Exam result (N or A): N NORMAL

Select EXAM TYPE  
Select one of the following:

1. General health screening  
2. Age-specific physical exam  
3. Special risk screening  
4. Behavioral health screening  
A. ALL OF ABOVE  
Q. QUIT ENTERING EXAMS

Your choice: QUIT ENTERING EXAMS

No ASQ scores should be entered on this visit!!

Select one of the following:

1. Clinic  
2. Provider  
3. POV  
4. Development/Autism Screen comments  
5. Patient education  
6. Nutrition  
7. Screening exams  
8. ASQ score  
A. ALL items  
Q. QUIT THIS MNEMONIC

Your choice: QUIT THIS MNEMONIC

---

Figure 3-184: Example of using the WCE mnemonic
3.5.208 Demographic and Visit Display (WHAT)

Use the WHAT mnemonic to view the current patient’s demographics and visit data already entered (for non-visit or visit-related encounters). This mnemonic is similar to DISP, but displays the data in a different format. No dependent entry count is provided with WHAT.

| MNEMONIC: WHAT Demographic and Visit Display ALLOWED NON-VISIT/VISIT MNEMONIC |
|-----------------------------|--------------------------------------------------------------------------|
| You are currently processing the following Patient Visit:                          |
| Patient Name: SIGMA, JANE Chart: 000000  |
| Date of Birth: AUG 21, 1976 Sex: F Visit Date: JUN 23, 2007@08:00:00          |
| Location: DEMO HOSPITAL/CLINIC                                          |
| Type: I Service Category: A                                             |

Figure 3-185: Example of using the WHAT mnemonic

3.5.209 Information on Patient (WHO)

Use the Information on Patient (WHO) mnemonic to view information about the current patient (for non-visit or visit-related encounters). This mnemonic provides a quick way to verify the patient for whom the user is entering information and some brief visit items that have already been entered.

| MNEMONIC: WHO Information on Patient ALLOWED NON-VISIT/VISIT MNEMONIC |
|-----------------------------|--------------------------------------------------------------------------|
| You are currently processing the following Patient Visit:                          |
| Patient Name: SIGMA, JANE Chart: 000000  |
| Date of Birth: NOV 18, 1970 Sex: F |
| Visit Date: JUN 23, 2007@08:00 Location: DEMO HOSPITAL/CLINIC |
| Type: I Service Category: A                                             |
| Clinic: GENERAL                                                        |

Figure 3-186: Example of using the WHO mnemonic
3.5.210 Weight (WT)

Use the Weight (WT) mnemonic to enter a patient’s weight in pounds and ounces (for visit-related-only encounters).

**Note:** Be sure that the provider has specified pounds as the unit of measure in the weight (WT) section of the encounter form before using this mnemonic.

The value entered must be in the range of 2 to 750 pounds. Ounces can be entered by leaving a space between the pounds and ounces; for example: 10 6 for 10 pounds 6 ounces. Fractions and decimals are allowed in multiples of 1/16 (.0625).

```
MNEMONIC: WT Weight in lbs/ozs ALLOWED VISIT-RELATED-ONLY
VALUE: 125
```

Figure 3-187: Example of using the WT mnemonic

3.5.211 Quick Out (XIT)

The XIT mnemonic allows the user to leave the data entry process from the “Mnemonic” prompt, regardless of whether the visit data entry is complete (for visit-related-only encounters). The user is prompted to determine whether the visit information entered so far is to be deleted or saved. Remember that exiting an incomplete visit will result in an error that must be corrected prior to the data transmission process. Two sample dialogs are shown below. In the first example, the visit is saved. The visit is deleted in the second example.

Saving the visit:

```
MNEMONIC: XIT Quick Out ALLOWED VISIT-RELATED-ONLY
This is the 'Quick Exit' from Data Entry Enter Mode. This visit will be deleted and you will be returned to the 'VISIT/DATE TIME' prompt. Do you wish to Proceed with the Deletion? Y// NO
Do you still wish to EXIT this Visit? Y// ES
WARNING - You may be leaving an INCOMPLETE VISIT!!
Looking for ancillary data to merge into this visit...
```

Figure 3-188: Example of saving a visit

Deleting a visit:

```
MNEMONIC: XIT Quick Out ALLOWED VISIT-RELATED-ONLY
This is the 'Quick Exit' from Data Entry Enter Mode. This visit will be deleted and you will be returned to the 'VISIT/DATE TIME' prompt. Do you wish to Proceed with the Deletion? Y// ES..
Looking for ancillary data to merge into this visit...
```

Appendix B: Rules of Behavior

The Resource and Patient Management (RPMS) system is a United States Department of Health and Human Services (HHS), Indian Health Service (IHS) information system that is FOR OFFICIAL USE ONLY. The RPMS system is subject to monitoring; therefore, no expectation of privacy shall be assumed. Individuals found performing unauthorized activities are subject to disciplinary action including criminal prosecution.

All users (Contractors and IHS Employees) of RPMS will be provided a copy of the Rules of Behavior (RoB) and must acknowledge that they have received and read them prior to being granted access to a RPMS system, in accordance IHS policy.

- For a listing of general ROB for all users, see the most recent edition of IHS General User Security Handbook (SOP 06-11a).
- For a listing of system administrators/managers rules, see the most recent edition of the IHS Technical and Managerial Handbook (SOP 06-11b).

Both documents are available at this IHS Web site: http://security.ihs.gov/.

The ROB listed in the following sections are specific to RPMS.

B.1 All RPMS Users

In addition to these rules, each application may include additional RoBs that may be defined within the documentation of that application (e.g., Dental, Pharmacy).

B.1.1 Access

RPMS users shall

- Only use data for which you have been granted authorization.
- Only give information to personnel who have access authority and have a need to know.
- Always verify a caller’s identification and job purpose with your supervisor or the entity provided as employer before providing any type of information system access, sensitive information, or nonpublic agency information.
- Be aware that personal use of information resources is authorized on a limited basis within the provisions Indian Health Manual Part 8, “Information Resources Management,” Chapter 6, “Limited Personal Use of Information Technology Resources.”
RPMS users shall not

- Retrieve information for someone who does not have authority to access the information.
- Access, research, or change any user account, file, directory, table, or record not required to perform their official duties.
- Store sensitive files on a PC hard drive, or portable devices or media, if access to the PC or files cannot be physically or technically limited.
- Exceed their authorized access limits in RPMS by changing information or searching databases beyond the responsibilities of their jobs or by divulging information to anyone not authorized to know that information.

B.1.2 Information Accessibility

RPMS shall restrict access to information based on the type and identity of the user. However, regardless of the type of user, access shall be restricted to the minimum level necessary to perform the job.

RPMS users shall

- Access only those documents they created and those other documents to which they have a valid need-to-know and to which they have specifically granted access through an RPMS application based on their menus (job roles), keys, and FileMan access codes. Some users may be afforded additional privileges based on the functions they perform, such as system administrator or application administrator.
- Acquire a written preauthorization in accordance with IHS polices and procedures prior to interconnection to or transferring data from RPMS.

B.1.3 Accountability

RPMS users shall

- Behave in an ethical, technically proficient, informed, and trustworthy manner.
- Log out of the system whenever they leave the vicinity of their personal computers (PCs).
- Be alert to threats and vulnerabilities in the security of the system.
- Report all security incidents to their local Information System Security Officer (ISSO)
- Differentiate tasks and functions to ensure that no one person has sole access to or control over important resources.
- Protect all sensitive data entrusted to them as part of their government employment.
• Abide by all Department and Agency policies and procedures and guidelines related to ethics, conduct, behavior, and information technology (IT) information processes.

B.1.4 Confidentiality
RPMS users shall
• Be aware of the sensitivity of electronic and hard copy information, and protect it accordingly.
• Store hard copy reports/storage media containing confidential information in a locked room or cabinet.
• Erase sensitive data on storage media prior to reusing or disposing of the media.
• Protect all RPMS terminals from public viewing at all times.
• Abide by all Health Insurance Portability and Accountability Act (HIPAA) regulations to ensure patient confidentiality.

RPMS users shall not
• Allow confidential information to remain on the PC screen when someone who is not authorized to that data is in the vicinity.
• Store sensitive files on a portable device or media without encrypting.

B.1.5 Integrity
RPMS users shall
• Protect their systems against viruses and similar malicious programs.
• Observe all software license agreements.
• Follow industry standard procedures for maintaining and managing RPMS hardware, operating system software, application software, and/or database software and database tables.
• Comply with all copyright regulations and license agreements associated with RPMS software.

RPMS users shall not
• Violate federal copyright laws.
• Install or use unauthorized software within the system libraries or folders.
• Use freeware, shareware, or public domain software on/with the system without their manager’s written permission and without scanning it for viruses first.
B.1.6 System Logon
RPMS users shall

- Have a unique User Identification/Account name and password.
- Be granted access based on authenticating the account name and password entered.
- Be locked out of an account after five successive failed login attempts within a specified time period (e.g., one hour).

B.1.7 Passwords
RPMS users shall

- Change passwords a minimum of every 90 days.
- Create passwords with a minimum of eight characters.
- If the system allows, use a combination of alpha-numeric characters for passwords, with at least one uppercase letter, one lower case letter, and one number. It is recommended, if possible, that a special character also be used in the password.
- Change vendor-supplied passwords immediately.
- Protect passwords by committing them to memory or store them in a safe place (do not store passwords in login scripts or batch files).
- Change passwords immediately if password has been seen, guessed, or otherwise compromised, and report the compromise or suspected compromise to their ISSO.
- Keep user identifications (IDs) and passwords confidential.

RPMS users shall not

- Use common words found in any dictionary as a password.
- Use obvious readable passwords or passwords that incorporate personal data elements (e.g., user’s name, date of birth, address, telephone number, or social security number; names of children or spouses; favorite band, sports team, or automobile; or other personal attributes).
- Share passwords/IDs with anyone or accept the use of another’s password/ID, even if offered.
- Reuse passwords. A new password must contain no more than five characters per eight characters from the previous password.
- Post passwords.
- Keep a password list in an obvious place, such as under keyboards, in desk drawers, or in any other location where it might be disclosed.
• Give a password out over the phone.

B.1.8 Backups
RPMS users shall
• Plan for contingencies such as physical disasters, loss of processing, and disclosure of information by preparing alternate work strategies and system recovery mechanisms.
• Make backups of systems and files on a regular, defined basis.
• If possible, store backups away from the system in a secure environment.

B.1.9 Reporting
RPMS users shall
• Contact and inform their ISSO that they have identified an IT security incident and begin the reporting process by providing an IT Incident Reporting Form regarding this incident.
• Report security incidents as detailed in the IHS Incident Handling Guide (SOP 05-03).
RPMS users shall not
• Assume that someone else has already reported an incident. The risk of an incident going unreported far outweighs the possibility that an incident gets reported more than once.

B.1.10 Session Timeouts
RPMS system implements system-based timeouts that back users out of a prompt after no more than 5 minutes of inactivity.
RPMS users shall
• Utilize a screen saver with password protection set to suspend operations at no greater than 10 minutes of inactivity. This will prevent inappropriate access and viewing of any material displayed on the screen after some period of inactivity.

B.1.11 Hardware
RPMS users shall
• Avoid placing system equipment near obvious environmental hazards (e.g., water pipes).
• Keep an inventory of all system equipment.
• Keep records of maintenance/repairs performed on system equipment.
RPMS users shall not
• Eat or drink near system equipment.

B.1.12 Awareness
RPMS users shall
• Participate in organization-wide security training as required.
• Read and adhere to security information pertaining to system hardware and software.
• Take the annual information security awareness.
• Read all applicable RPMS manuals for the applications used in their jobs.

B.1.13 Remote Access
Each subscriber organization establishes its own policies for determining which employees may work at home or in other remote workplace locations. Any remote work arrangement should include policies that
• Are in writing.
• Provide authentication of the remote user through the use of ID and password or other acceptable technical means.
• Outline the work requirements and the security safeguards and procedures the employee is expected to follow.
• Ensure adequate storage of files, removal, and nonrecovery of temporary files created in processing sensitive data, virus protection, and intrusion detection, and provide physical security for government equipment and sensitive data.
• Establish mechanisms to back up data created and/or stored at alternate work locations.
Remote RPMS users shall
• Remotely access RPMS through a virtual private network (VPN) whenever possible. Use of direct dial in access must be justified and approved in writing and its use secured in accordance with industry best practices or government procedures.
Remote RPMS users shall not
• Disable any encryption established for network, internet, and Web browser communications.
B.2 RPMS Developers

RPMS developers shall

• Always be mindful of protecting the confidentiality, availability, and integrity of RPMS when writing or revising code.
• Always follow the IHS RPMS Programming Standards and Conventions (SAC) when developing for RPMS.
• Only access information or code within the namespaces for which they have been assigned as part of their duties.
• Remember that all RPMS code is the property of the U.S. Government, not the developer.
• Not access live production systems without obtaining appropriate written access, and shall only retain that access for the shortest period possible to accomplish the task that requires the access.
• Observe separation of duties policies and procedures to the fullest extent possible.
• Document or comment all changes to any RPMS software at the time the change or update is made. Documentation shall include the programmer’s initials, date of change, and reason for the change.
• Use checksums or other integrity mechanism when releasing their certified applications to assure the integrity of the routines within their RPMS applications.
• Follow industry best standards for systems they are assigned to develop or maintain, and abide by all Department and Agency policies and procedures.
• Document and implement security processes whenever available.

RPMS developers shall not

• Write any code that adversely impacts RPMS, such as backdoor access, “Easter eggs,” time bombs, or any other malicious code or make inappropriate comments within the code, manuals, or help frames.
• Grant any user or system administrator access to RPMS unless proper documentation is provided.
• Release any sensitive agency or patient information.

B.3 Privileged Users

Personnel who have significant access to processes and data in RPMS, such as, system security administrators, systems administrators, and database administrators, have added responsibilities to ensure the secure operation of RPMS.
Privileged RPMS users shall

- Verify that any user requesting access to any RPMS system has completed the appropriate access request forms.
- Ensure that government personnel and contractor personnel understand and comply with license requirements. End users, supervisors, and functional managers are ultimately responsible for this compliance.
- Advise the system owner on matters concerning information technology security.
- Assist the system owner in developing security plans, risk assessments, and supporting documentation for the certification and accreditation process.
- Ensure that any changes to RPMS that affect contingency and disaster recovery plans are conveyed to the person responsible for maintaining continuity of operations plans.
- Ensure that adequate physical and administrative safeguards are operational within their areas of responsibility and that access to information and data is restricted to authorized personnel on a need-to-know basis.
- Verify that users have received appropriate security training before allowing access to RPMS.
- Implement applicable security access procedures and mechanisms, incorporate appropriate levels of system auditing, and review audit logs.
- Document and investigate known or suspected security incidents or violations and report them to the ISSO, Chief Information Security Officer (CISO), and systems owner.
- Protect the supervisor, superuser, or system administrator passwords.
- Avoid instances where the same individual has responsibility for several functions (i.e., transaction entry and transaction approval).
- Watch for unscheduled, unusual, and unauthorized programs.
- Help train system users on the appropriate use and security of the system.
- Establish protective controls to ensure the accountability, integrity, confidentiality, and availability of the system.
- Replace passwords when a compromise is suspected. Delete user accounts as quickly as possible from the time that the user is no longer authorized system. Passwords forgotten by their owner should be replaced, not reissued.
- Terminate user accounts when a user transfers or has been terminated. If the user has authority to grant authorizations to others, review these other authorizations. Retrieve any devices used to gain access to the system or equipment. Cancel logon IDs and passwords, and delete or reassign related active and backup files.
• Use a suspend program to prevent an unauthorized user from logging on with the current user's ID if the system is left on and unattended.

• Verify the identity of the user when resetting passwords. This can be done either in person or having the user answer a question that can be compared to one in the administrator’s database.

• Shall follow industry best standards for systems they are assigned to, and abide by all Department and Agency policies and procedures.

Privileged RPMS users shall not

• Access any files, records, systems, etc., that are not explicitly needed to perform their duties

• Grant any user or system administrator access to RPMS unless proper documentation is provided.

• Release any sensitive agency or patient information.
