Preface

This manual provides information specific to the Patient Care Component Health Summary System, including generating health summaries. This manual also provides information on customizing health summaries with measurement panels, flowsheets, and health maintenance reminders.
1.0 Introduction

The Patient Care Component (PCC) database is the central repository for data in the Resource and Patient Management System (RPMS).

The following RPMS components comprise the PCC suite:

- IHS Dictionaries (AUPN)
- Standard Tables
- PCC Health Summary, including Health Maintenance Reminders (APCH)
- PCC Data Entry (APCD)
- PCC Management Reports, including PGEN/VGEN (APCL)
- Designated Specialty Provider Management (DP)
- QMan (Query Manager) (AMQQ)
- Taxonomy Management (ATX)

1.1 Overview of Health Summary

The Health Summary System allows users to quickly generate a summary of a patient’s demographic and clinical information from the PCC of the RPMS database. This user manual explains in detail the elements that make up health summaries and explains how to generate health summaries. Also included are instructions for creating locally defined health summaries, and components for site and clinic-specific needs. This manual was written specifically for healthcare providers, site managers, and other clinical and administrative staff members who generate and use health summaries.

The PCC Health Summary is a clinically oriented, structured report that extracts a variety of data for a single patient from the PCC database and displays it in a standard format. The data displayed for the patient cover a range of health-related information, including demographic data, allergies, current medical problems, health history, and the purposes of previous visits.
Demographic data is entered into the RPMS database through the IHS Registration System at a patient’s initial encounter in a clinic or hospital and are updated after subsequent patient visits. Health information is collected during clinic, field, and administrative contacts with patients through the Indian Health Service (IHS) direct, tribal, and contract healthcare programs. Data obtained from these contacts is recorded by healthcare providers on the PCC Encounter Form and entered into the PCC database by the data entry staff. These types of data are then retrieved from the PCC and printed in the Health Summary to provide an overview of an individual patient’s health and previously received IHS services.

The Health Summary assists providers with the delivery of comprehensive healthcare to each patient at every visit. It allows the provider to recognize patient problems other than the presenting complaint and to meet the patient’s preventive healthcare needs. The summary also offers a means of communication among the various healthcare providers that an individual patient might see.

The key elements of the Health Summary provide:

- A structured and summarized overview of the health status, health experiences, and preventive health needs of each patient
- Health data from sources of care not normally contained in the patient chart
- An index to the patient chart through the highlighting of significant events and dates

A PCC Health Summary is routinely printed whenever a patient is seen by a provider in the emergency room, outpatient clinic, or in the field. The Health Summary can also be displayed for review on a video terminal.

**Note:** PCC Health Summaries are highly confidential documents and should be afforded the same security measures as patient health records.

### 1.2 Data Entry Guidelines

When prompted to enter the patient name, use the following guidelines:

- Type the patient’s name or a portion of the name in the following format:
  HORSECHIEF, JOHN DOE or HORSECHIEF, JOHN. Follow these guidelines:
    - Use from 3 to 30 letters
    - A comma must follow the last name
    - If ‘JR’ or ‘II’, etc., is included, follow the format SMITH, JOHN MARK, JR.
    - No spaces after commas.
- Type the patient’s IHS Chart Number
• Type the patient’s date of birth (DOB) in one of the following formats:
  B012266 or any valid date, e.g. 01/22/66, 01-22-66, or JAN 22,1966

• Type the patient’s Social Security Number (SSN) or the last four digits of the SSN

• If the patient is an inpatient, specify the ward or room-bed in the format
  66-2 PEDIATRICS

During data input, the help screen can be accessed by typing two question marks (??) at the specific prompt. In some cases, the valid entries for the data will display.

Some prompts ask the user to type a date. Examples of valid dates are as follows:

• JAN 20 1957, 20 JAN 57, 1/20/57, or 012057

• T (for today), T+1 (for tomorrow), T+2, T+7, etc.

• T-1 (for yesterday), T-3W (for 3 weeks ago), etc.

• If the year is omitted, the system assumes a date in the past.

• The user can omit the precise day; for example, JAN, 1957.
2.0 Release Notes

Detailed information listing the modifications and enhancements for BJPC v2.0 patch 11 is provided in the Indian Health Service Office of Information Technology Release Announcement. All software release announcements are available on the IHS website with the software files.
3.0 Health Summary (APCH)

The Health Summary System allows users to generate a summary of a patient’s demographic and clinical information. This manual explains the elements that make up health summaries and explains how to generate health summaries. Included are instructions for creating locally defined health summaries, and components for site and clinic-specific needs.

The example below shows the Health Summary menu options.

Figure 3-1: IHS Health Summary menu options

This section covers the following options in the Health Summary Menu:

Generate Health Summary (HS)
Browse Health Summary (BRHS)
Generate Multiple Health Summaries (MHS)
Health Summary Displaying CMS Register(s) (CRHS)
Health Summary for Inactive Patients (INHS)
Generate a Health Summary Supplement
Generate a Patient Wellness Handout (PWH)

This section does not cover the following options: Build Health Summary (BLD), Health Summary Maintenance (HSM), and Patient Wellness Handout Menu (PWH). These options are located in Sections 4.0, 5.0, and 6.0 of this manual, respectively.

3.1 Generate Health Summary (HS)

Use the HS option to generate a health summary for a single patient. Follow these steps:
1. At the “Select Health Summary Menu Option” prompt, type HS.

2. At the “Select health summary type” prompt type the name of the health summary type. To accept the default health summary type (Adult Regular), press Enter. Section 5.0 provides more information about working with health summary types.

3. At the “Select patient” prompt, type the name or health record number of the patient for whom the health summary will be generated.

4. At the “DEVICE” prompt, indicate the device to display/print the report, or press Enter to accept the default values.

Below is an example of the prompts and the initial information that displays for an Adult Regular Health Summary.

## 3.2 Browse Health Summary (BRHS)

Use the BRHS option to view a health summary report for a specific patient using the Browse feature. This option is not available when generating multiple health summaries at the same time. Follow these steps:

1. At the “Select Health Summary Menu Option” prompt, type **BRHS**.

2. At the “Select health summary type” prompt, type the name of the health summary type. To accept the default health summary type (Adult Regular), press Enter. Section 5.0 provides more about working with health summary types.

3. At the “Select Patient” prompt, type the name of the patient for whom the health summary will be generated. The report displays the OUTPUT BROWSER screen, as shown below.

Below is an example of the prompts and the initial information that displays in a patient’s health summary.
HS  Generate Health Summary  
BRHS Browse Health Summary  
MHS Generate Multiple Health Summaries  
GSUP Generate a Health Summary Supplement  
CRHS Health Summary Displaying CMS Register(s)  
INHS Health Summary for Inactive Patient  
BLD  Build Health Summary ...  
HSM Health Summary Maintenance ...  
MPWH Patient Wellness Handout Menu ...  
PWH Generate a Patient Wellness Handout  

Select Health Summary Menu Option: BRHS Browse Health Summary  
Select health summary type: ADULT REGULAR//  
Select patient: TEST,CARL

+ Enter ?? for more actions   + NEXT SCREEN -- PREVIOUS SCREEN Q QUIT  
Select Action: +//  

Figure 3-4: Example of browsing a health summary

The following options are available in the OUTPUT BROWSER screen at the “Select Action” prompt:

- Type Q (Quit) to exit the OUTPUT BROWSER screen and return to the “Select Health Summary Menu Option” prompt.
- Type a plus sign (+) to display the next screen. This option is not available for the last screen.
- Type a minus sign (-) to display the previous screen. This option is not available for the first screen.
3.3 Generate Multiple Health Summaries (MHS)

The multiple health summaries (MHS) option generates health summaries for multiple patients. Follow these steps:

1. At the “Select Health Summary Menu Option” prompt, type MHS.

2. At the “Select health summary type” prompt, type the name of the health summary type. To accept the default health summary type (Adult Regular), press Enter. Refer to Section 5.0 to learn more about working with health summary types.

3. At each “Select Patient(s)” prompt, type the name of the patient for whom the health summary will be generated.

4. When all patients have been added, press Enter at the “Select Patients(s)” prompt.

5. At the “Device” prompt, select the device to display/print the report.

6. At the “<>” prompt, press Enter to view the next page of the report.

The application displays the report. Below is an example of the prompts and the initial information that displays in the first patient’s health summary.
3.4 Health Summary Displaying CMS Register(s) (CRHS)

The CRHS option generates a Health Summary that displays any Case Management System register(s) in which the patient is enrolled.

Follow these steps:

1. At the “Select Health Summary Menu Option” prompt, type CRHS.
2. At the “Select Patient” prompt, type the name of the patient.
3. At the “Select health summary type” prompt, type the name of the health summary type. To accept the default health summary type (Adult Regular), press Enter. Section 5.0 provides more information about working with health summary types.

Below is an example of the CMS Registers health summary.

3.5 Health Summary for Inactive Patients (INHS)

Use the INHS option to generate a Health Summary for Inactive Patients. Follow the steps below:

1. At the “Select Health Summary Menu Option” prompt, type **INHS**.

2. At the “Select health summary type” prompt, type the name of the health summary type. To accept the default health summary type (Adult Regular), press Enter. Section 5.0 provides more information about working with health summary types.

3. At the “Select Patient” prompt, type the name of the patient for whom the health summary will be generated. If all patients are to be looked up, the application will display (I) at the end of the HRN #, for example:

   **ADAMS,DEBBIE F 08-15-1973 XXX-XX-1819 CIMD 103610(I)**

Below is an example of the prompts, and the display of the Inactive Patients health summary.

3.8 **Health Summary Maintenance (HSM)**

Use the HSM option to manage Health Summary types. Section 5.0 provides detailed information.

3.9 **Patient Wellness Handout Menu (MPWH)**

Section 6.0 provides detailed information about the menu structure. See the Patient Wellness Handout Description and Logic Manual for component logic.

3.10 **Generate a Patient Wellness Handout (PWH)**

Use the PWH option to generate a Patient Wellness Handout.

To generate a PWH, follow these steps:

1. At the “Select Health Summary Menu Option” prompt, type **PWH**.

2. At the “Select Patient Wellness Handout type” prompt, specify the type of PWH to generate. MU Adult Regular is the default value. To generate a Patient Wellness Handout that is not the default (e.g., a customized handout), type the name of the handout.

3. At the “Select Patient” prompt, type the name of the patient.

4. At the “Select one of the following” prompt, type one of the following two options: **P** (Print Output) or **B** (Browse Output on Screen).
   
   a. **P** (Print) sends the report file to your printer, your screen, or an electronic file.
   
   b. **B** (Both) produces both a printed report and a delimited file.

   **Note:** If you want to print to a file and do not know your printer name, check with the site manager.

If you choose the Browse Output on Screen option, an action bar displays at the bottom of the screen. At the “Select Action” prompt, do one of the following:

- Type **Q** (Quit) to exit the Output Browser screen and return to the “Select Health Summary Menu Option” prompt.
- Type a plus sign (+) and press Enter to display the next screen. This option is not available for the last screen.
- Type a minus sign (–) and press Enter to display the previous screen. This option is not available for the first screen.

If the user chooses the Print Output option, at the “Enter RETURN to continue or ‘^’ to exit” prompt, press Enter to continue to the next page of the handout or type a caret (^) to exit.

Below is an example of the prompts and the initial information in an Adult Regular Wellness Handout.

Health Summary User Manual
June 2015

Health Summary (APCH)
ALLERGIES - It is important to know what allergies and side effects you have to medicines or foods. Below is a list of allergies that we know of. Please tell us if there are any that we missed.

Allergies - No allergies are on file. Please tell us if there are any that we missed.

Your Health Problems (Problem List)
A problem list is a listing of all of the medical conditions that you have that don't go away quickly.

- R10.2 Chronic pelvic pain of female | Night Pain
- K57.32 Diverticulitis of rectum | Abdomen Discomfort | Onset: NOV 24, 2014
- R07.2 Precordial pain | possible heart attack
- Invalid CHeadache | NKA | de

J45.902 Intrinsic asthma with status asthmaticus | NKDA

RECENT LAB RESULTS
You recently had some lab work done. Be sure to talk with your health care provider about these results and ask what they mean. Your healthcare provider will answer any questions that you may have.

<table>
<thead>
<tr>
<th>LABORATORY TEST</th>
<th>RESULT</th>
<th>REFERENCE RANGE DATE</th>

MEDICATIONS - This is a list of medications and other items you are taking including non-prescription medications, herbal, dietary, and traditional supplements. Please let us know if this list is not complete. If you have other medications at home or are not sure if you should be taking them, call your health care provider to be safe.

No medications are on file. Please tell us if there are any that we missed.

IMMUNIZATIONS (shots). Ask your doctor if you are due for any immunizations.

CHOLESTEROL
Controlling your cholesterol can keep your heart and blood vessels healthy.

Your total cholesterol result was not found on file.
Your last LDL (bad cholesterol) result was 60 on Jan 07, 2014.
Your last HDL (good cholesterol) result was 40 on Jan 06, 2014.
Your last triglyceride result was not found on file.

MAMMOGRAM
No mammogram on file. It is recommended that you receive a mammogram every year. Ask your health care provider to order a mammogram for you.
PAP SMEAR
No Pap Smear on file. We recommend that you get a Pap Smear every 3 years. Ask your health care provider to order a Pap Smear for you.

COLON HEALTH SCREENING
It is recommended that all people who are 51 years and older be screened for colon cancer. Ask your health care provider to order a colon cancer screening for you.

BLOOD PRESSURE - Blood Pressure is a good measure of health.

You should have your blood pressure checked at your next visit.

PROCEDURES

Procedures are things that you have done to improve your health. Some examples of a procedure are any kind of surgery or putting a cast on a broken leg. If you think you have had a procedure or surgery that is not on this list, please tell your health care provider.

Figure 3-9: Example of a Patient Wellness Handout (PWH)
4.0 **Build Health Summary Menu (BLD)**

The Health Summary system provides options to create custom Health Summaries that are site-specific and can be tailored to highlight the particular health needs of the patients in an area, or can focus on a particular diagnosis. For example, it may be necessary to create an Obstetrics Health Summary to provide a detailed printout of patients’ prenatal visits and laboratory tests, or a Geriatrics Health Summary that focuses on the special needs of elderly patients.

The options to create a custom health summary type or build site-specific measurement panels and flowsheets are accessible from the Build Health Summary menu.

4.1 **Inquire About a Health Summary Type (IS)**

Use the IS option to view the structure of a specific health summary type. The components that display in the health summary are the order of the components, the data restrictions, and the specifications regarding the display of the clinic name and ICD text. Follow these steps:

1. At the “Select Build Health Summary Option” prompt, type **IS**.

2. At the “Select Health Summary Type Name” prompt, type the name of the desired health summary type.

3. At the “Device” prompt, specify the device to display/print the report.

4. At the end of the information, the user is returned to the “Select Health Summary Type Name” prompt, where another summary can be entered. If it is not necessary to review another summary, type a caret (^) to return to the “Select Build Health Summary Option” prompt.

Below is sample display for the specified health summary type.

```
NAME: DENTAL                      LOCK: APCHZMGR

```

4.2 Print Health Maintenance Item Protocols (PP)

Use the PP option to display or print the description/logic of all Health Summary Maintenance Reminders.

Health Maintenance Reminders are printed on many types of Health Summaries. The due dates for each item are calculated according to a predefined schedule. The PP option allows the user to review a schedule. Section Appendix A: provides more information about Health Maintenance Reminders. Follow these steps to use the PP option:

1. At the “Select Build Health Summary Option” prompt, type **PP**.

2. At the “Select one of the following” prompt, type either **P** (Print Output) or **B** (Browse Output on Screen).

Below is a sample of a few pages of a Health Summary Maintenance Reminder in the Output Browser screen.
Reminder: ADULT MMR 2-DOSE VERSION
Category: IMMUNIZATIONS
Description:
Default Status: Off
Denominator: Patients with no documented MMR since age 1 year:
1. Born in 1957 or later who are at least 18; OR
2. Females who were born in 1957 or earlier AND are currently less than age 50 years (NOTE: no longer applicable)

Definition (Frequency): Two doses total. First dose given after age 12 months, and second dose given at least one month after the first.

LOGIC DETAIL:
MMR:
- Immunizations/CVX Codes or Refusal: V Immunization 3; 94
- IZ Diagnosis (ICD Codes): [BGP MMR IZ DXS]
- Procedures (ICD Codes): [BGP MMR IZ PROCS]
- Procedures (CPT Codes): V CPT 90707; 90710

Reminder: ALCOHOL USE SCREENING
Category: BEHAVIORAL HEALTH
Description:
Default Status: On
Denominator: All patients starting at age 13 years with no documented Alcohol Use Screening.
Definition (Frequency): Annually

LOGIC DETAIL:
Alcohol Use Screening Definition:
- V Exam 35 or Behavioral Health Module Alcohol Screening
- Measurements: V Measurement (PCC and BH) AUDC, AUDT, CRFT
- ICD Codes: [BGP SCREEN FOR ALCOHOLISM DX]
- Behavioral Health Module Diagnosis (POV) 29.1
- Behavioral Health Module Diagnosis (Pov) 29.1
- Patient Education Topics: V PATIENT ED or Behavioral Health Module AOD-SCR or CD-SCR

NOTE: Alcohol diagnoses (ICD Codes) do NOT meet this reminder.

Reminder: ANMC DEPRESSION SCREEN SCORE
Category: BEHAVIORAL HEALTH
Description:
Every 4 weeks for patients whose last score is positive (>=10).

Every year for patients whose last score is negative (<10).

Does not display for any patient who has never had a score recorded.
Reminder: ASSESSMENT OF FUNCTION
Category: ELDER

Description:
Default Status: Off
Denominator: All patients starting at age 55 years
Definition (Frequency): Annually

LOGIC DETAIL: Any non-null values in V Elder Care for:
At least one of the following ADL fields: toileting; bathing; dressing;

+ Enter ?? for more actions >>>
+ NEXT SCREEN - PREVIOUS SCREEN Q QUIT
Select Action: +/-

Figure 4-4: Example Print Health Maintenance Item Protocols (PP)

The following actions are available at the “Select Action” prompt in the Output Browser screen:

- Type Q (Quit) at the “Select Action” prompt to exit the OUTPUT BROWSER screen and return to the “Build Health Summary Option” prompt.
- Type a plus sign (+) to display the next screen. This option is not available for the last screen.
- Type a minus sign (-) to display the previous screen. This option is not available for the first screen.

4.3 List Health Summary Types (LS)

Use the LS option to view the names of all health summary types that exist at a user’s facility. This list includes the standard health summary types distributed with this package, as well as any customized health summaries created locally. This list is pulled from the B index in the HEALTH SUMMARY TYPE file. Follow these steps:

1. At the “Select Build Health Summary Option” prompt, type LS to display list of health summary types.

The following is a portion of the health summary list.

Existing HEALTH SUMMARY TYPES:
- ADULT REGULAR
- ALL REMINDERS
- ANTICOAGULATION SERVICE
- BEHAVIORAL HEALTH
- BILLING
- CARDIOVASCULAR DISEASE
4.4 List Health Summary Components (LC)

Use the LC option to view a list of the available health summary components. Follow these steps:

1. At the “Select Build Health Summary Option” prompt, type LC to display a list of existing health summary components.

Refer to Appendix G: for more information about the components.

The following is a portion of the health summary component list.

```
Existing HEALTH SUMMARY COMPONENTS:
ACTIVE WAIT LIST ENTRIES
ALLERGIES (FROM PROBLEM LIST)
ALLERGIES/ADVERSE REACTIONS (B)
ALLERGIES/ADVERSE REACTIONS (D)
BEHAVIORAL HEALTH
BLOOD BANK - MOST RECENT
CHR
CPT - ALL BY CPT CODE
CPT - ALL BY DATE

DEMOGRAPHIC DATA
DEMOGRAPHICS - BRIEF
DEMOGRAPHICS - BRIEF W/ADV DIR
DEMOGRAPHICS - W/O REMARKS
DENTAL
DIAGNOSTIC PROCEDURE
DIRECTIONS TO PATIENT HOME
EDUCATIONAL ASSESSMENT
Enter RETURN to continue or '^' to exit:
```

4.5 List Measurement Panel Types (LM)

Use the LM option to view a list of the available measurement panels. Both the standard panels distributed with the Health Summary package and any panels that were created at your facility will display. The list is pulled from the B index in HEALTH SUMMARY MEAS PANEL file. Follow these steps:
1. At the “Select Build Health Summary Option” prompt, type **LM** to display a list of measurement panel types.

The following is a partial list of measurement panel types.

```
Existing HEALTH SUMMARY MEAS PANELS:
   ADULT STD
   ADULT STD METRIC
   PEDIATRIC STD
   PEDIATRIC STD METRIC
   PRENATAL MEAS
Enter RETURN to continue or '^' to exit:
```

Figure 4-7: Example of HEALTH SUMMARY MEAS PANELS (LM)

### 4.6 List Health Summary Flowsheets (LF)

Use the LF option to display the names of flowsheets that exist at the user’s facility. Remember that all flowsheets must be created locally. No flowsheets were distributed with this package. Follow these steps:

1. At the “Select Build Health Summary Option” prompt, type **LF** to display a list of existing health summary flowsheets displays.

The following is a partial list of the health summary flowsheets.

```
Existing HEALTH SUMMARY FLOWSHEETS:
   ANTICOAGULATION SERVICE
   CARDIOVASCULAR DISEASE
   DIABETIC FLOWSHEET
   EMPLOYEE HEALTH
   KIDNEY CLINIC
   PN HF SCREEN
   PRENATAL FLOWSHEET
Enter RETURN to continue or '^' to exit:
```

Figure 4-8: Example of HEALTH SUMMARY FLOWSHEETS (LF)

### 4.7 List Health Summary Flowsheet Items (LI)

Use the LI option to list the flowsheet items of a specified flowsheet. Follow the step below:

The following is a partial list of the health summary flowsheets items.

1. At the “Build Health Summary Option” prompt, type **LI** to display existing health summary flowsheet items.
4.8 Create/Modify Health Summary Type (MS)

Before constructing a new health summary type, carefully outline the details to include in the new summary while keeping in mind its intended purpose and use. For example, decide which components to include, the order in which the components will print, the data restrictions applied to the components, whether any custom measurement panels or flowsheets will be needed, and the name of the Health Summary. This planning step is very important.

Make a Request for New Health Summary form. Section Appendix F: provides more information about this form. You can copy this form and use it to help with the planning process, or fill it out and give the form to a site manager to complete. Follow these steps to create or modify a health summary type:

1. At the “Build Health Summary Option” prompt, type MS.

2. At the “Health Summary Type Name” prompt, type the name of the desired health summary.

3. If a new name was used, the application displays the “Are you adding ‘[summary name]’ as a new HEALTH SUMMARY TYPE? No/” prompt. Type either Y (Yes) or N (No). N (No) is the default value and will display the “Build Health Summary Option” prompt.

   The prompts continue when using Y (Yes).

4. At the “Lock” prompt, a security key can be added to the Health Summary. If a security key is added, only users who have the key will be able to modify this health summary type. To use a security key, indicate the name of the key. To bypass the prompt, press Enter.

5. If an existing name was used it will display at the “Name” prompt. If this is correct, press Enter. Otherwise, type a caret (^) to start over.

   The Create/Modify Summary Type screen is shown below.
Select Build Health Summary Option: MS Create/Modify Health Summary Type

This option will allow you to create a new or modify an existing health summary type.

At the Select Action prompt, do one of the following:

- To display the next screen, type a plus sign (+) at the “Select Action” prompt. This action cannot be used on the last screen.
- To display the prior screen, type a minus sign (–). This action cannot be used on the first screen.
- To exit the Create/Modify Summary Type screen, type Q (Quit) at the “Select Action” prompt and return to the “Select Build Health Summary Option” prompt.
- Otherwise, use any of the other options to create or modify a Health Summary.

### 4.8.1 Modify Structure (MS)

Use the MS option to add a new component to or remove an existing component from the summary type.

1. To add a new component, at the “Select Action” prompt, type MS.
2. At the “Select SUMMARY ORDER” prompt, type a new order number in which the new component should be placed.
3. At the “STRUCTURE COMPONENT NAME” prompt, type the name of the health summary component that should display (e.g., Demographics–Brief).
4. At the “COMPONENT NAME” prompt, if the correct name displays as the default, press Enter. If not, type the correct name.
5. At the “ALTERNATE TITLE” prompt, type an alternate name of the component. This information is not required.
6. At the “Select SUMMARY ORDER” prompt, if all components are added, press Enter. To add another component, repeat the steps above.

In the following example, the Demographics–Brief component is added as the first component in the structure.
The following provides information about removing a component from the summary.

1. To remove a component from this summary, at the “Select Action” prompt, type **MS**.

2. At the “Select SUMMARY ORDER” prompt:
   - If the component to remove is the default option, type the at sign (@).
• If the component to remove is not the default option, type the order number of the component to remove and press Enter. At the “SUMMARY ORDER” prompt, which now displays the order number just entered as the default option, type the at sign (@).

3. At the “SURE YOU WANT TO DELETE THE ENTIRE [component order #] SUMMARY ORDER?” prompt, type Y (Yes) or N (No).

4. At the “Select SUMMARY ORDER” prompt, if all the desired components are removed, press Enter. To remove another component, repeat the steps above.

In the following example, the Demographics–Brief component is removed from the structure.

SURE YOU WANT TO DELETE THE ENTIRE '3' SUMMARY ORDER? Y (Yes)
Select SUMMARY ORDER: 5//

Figure 4-12: Example of selecting summary order to remove component
4.8.2 Mod Meas Panel (MP)

Use the MP option to add a new measurement panel or remove an existing measurement type from the summary type. When Measurement Panels is specified as a component in the summary type, this field controls the display order of the associated measurement.

**Note:** Even if measurement panels are added to the Measurement Panels section, the “Measurement Panel” component must be added to or already exist as a component in the Health Summary’s structure for the component to actually display in the Health Summary. Section 4.8.1 provides instructions on how to add a Measurement Panel as a component in the Health Summary’s structure.

1. To add a new measurement panel, at the “Select Action” prompt, type **MP**.
2. At the “Select MEASUREMENT PANEL SEQUENCE” prompt, type a new order number in which the new measurement panel should display within the section.
3. At the “MEASUREMENT SEQUENCE MEASUREMENT PANEL TYPE” prompt, type the name of the measurement panel that should display (e.g., Adult).
4. At the “MEASUREMENT PANEL TYPE” prompt, if the correct name displays as the default, press Enter. If not, type the correct measurement panel name.
5. At the “Select MEASUREMENT PANEL SEQUENCE” prompt, if all measurement panels are added, press Enter. To add another component, repeat the steps above.

In the following example, there are no existing Measurement Panel types in the Measurement Panels section. The user adds two new Measurement Panels types: Adult Standard (Std) and Pediatric Standard (Std).
WARNING: Measurement Panels has not been added to the Health Summary Structure. Measurement panels will not display until they are part of the summary structure.

You can add a new measurement panel by entering a new sequence number and measurement panel name. The measurement panel must have been added using the option 'Create/Modify Measurement Panel' in order to be selected. To remove a measurement panel from this summary type select the measurement panel by sequence number and type an '@',

Select MEASUREMENT PANEL SEQUENCE: 10

**4.8.3 Lab Panel (LP)**

Use the LP option to add a new laboratory test or remove an existing laboratory test from the summary type.

**Note:** Even if lab panels are added to the Lab Panels section, the “Lab Panels” component must be added to or already exist as a component in the Health Summary’s structure for the component to actually display in the Health Summary. Section 4.8.1 provides instructions on how to add Lab Panels as a component in the Health Summary’s structure.

Follow these steps to add a new lab test:

1. To add a new measurement panel, at the “Select Action” prompt, type LP.
2. At the “Select LAB TEST SEQUENCE” prompt, type a new sequence order number in which the new lab panel should display within the section.

3. At the “LAB TEST PANEL LAB TEST TYPE” prompt, type the name of the lab panel that should display (e.g., Lymphs).

4. At the “LAB TEST TYPE” prompt, if the correct name displays as the default, press Enter. If not, type the correct measurement panel name.

5. At the “Select LAB TEST SEQUENCE” prompt, if all measurement panels are added, press Enter. To add another component, repeat the steps above.

In the following example, there are no existing laboratory test panel types in the Lab Test Panels section. The user adds one new lab panel, Lymphs.
Follow these steps to remove a lab test:

1. To remove a lab panel from the Lab Panel section, at the “Select Action” prompt, type **LP**.

2. At the “Select LAB TEST SEQUENCE” prompt:
   - If the lab panel to remove is the default option, type the at sign (@).
   - If the lab panel to remove is not the default option, type the order number of the measurement panel to remove. At the “LAB TEST SEQUENCE” prompt, which now displays the order number just entered as the default option, type the at sign (@).

3. At the “SURE YOU WANT TO DELETE THE ENTIRE [order #] LAB TEST SEQUENCE?” prompt, type Y (Yes) or N (No).

4. At the “Select LAB TEST SEQUENCE” prompt, if all the desired lab test panels are removed, press Enter. To remove another laboratory test panel, repeat the steps above.

In the following example, the Lymphs lab test panel is removed.
You can add a new LAB TEST by entering a new sequence number and the LAB TEST name. To remove a LAB TEST from this summary type select the LAB TEST by name or sequence number and then enter an '@'.

Select LAB TEST SEQUENCE: 10// @
SURE YOU WANT TO DELETE THE ENTIRE '10' LAB TEST SEQUENCE? Y (Yes)

Select LAB TEST SEQUENCE:

4.8.4 Health Main Reminder (HM)

Use the HM option to list currently defined health maintenance reminders for the selected summary type. See the following example.

Health Summary: XXX3

Note: any reminder flagged as inactive will not display on the summary even though you selected it for display. The reminder must be activated. Any reminders with (DEL) should be removed as they are no longer used.

Currently defined HEALTH MAINTENANCE REMINDERS on the SJT3 summary type

SEQ Health Maintenance Reminder                        Category/Group
-------------------------------------------------------------------
Other REMINDERS not yet selected that can be added to this summary type

BREAST EXAM            GENERAL
DIABETES SCREENING     GENERAL
BLOOD PRESSURE         GENERAL
PAP SMEAR              CANCER-RELATED
RECTAL                 CANCER-RELATED
TONOMETRY              ELDER
URINALYSIS             PEDIATRIC
PELVIC EXAM            GENERAL
VISUAL ACUITY EXAM     ELDER
HEARING TEST           PEDIATRIC
The following options are available at the “Select Action” prompt:

- The AR and RI options will either add or remove a reminder to the summary.
- The AG and RG options add/remove reminders in a group. Select a category of reminder, such as Asthma.
- The HS option displays the Health Summary of a specific patient.
- Type Q to exit the current screen and return to the “Select Build Health Summary” prompt.

4.8.5 Best Practice Prompts (BP)

Use the BP option to list Best Practice Prompts for the selected summary type.

---

WARNING: Best Practice Prompts has not been added to the Health Summary structure. Best Practice Prompts will not display until they are part of the summary structure.

Note: Any Best Practice Prompt flagged as inactive will not display on the summary even though the user selected it for display. The Best Practice Prompt must be activated. Any Best Practice Prompts with (DEL) should be removed as they are no longer used.

Currently defined BEST PRACTICE PROMPTS on the CHR summary type

SEQ Best Practice Prompts Category/Group -----------
-------------------------------------------------------------------

Other BEST PRACTICE PROMPTS not yet selected that can be added to this summary type:

HEARING INQUIRY ELDER
STRABISMUS/AMBLYOPIA SCREEN PEDIATRIC
ASTHMA: ADD/INCREASE INHALED STEROIDS ASTHMA
ASTHMA: PRIMARY CARE PROVIDER ASTHMA
ASTHMA: SEVERITY CLASSIFICATION
ASTHMA: ACTION PLAN
ASTHMA: FLU SHOT

AR Add Best Practice Prompt
RG Remove Group of Best Pract Prompts
RI Remove Best Practice Prompt
AG Add Group of Best Pract Prompts
Q Quit

Select Action:+//

Figure 4-18: Example BEST PRACTICE PROMPTS screen (BP)

The following options are available at the “Select Action” prompt:

- Type AR and RI to add or remove a Best Practice prompt.
- Type AG and RG to add or remove a group of Best Practice prompts.
- Type Q (Quit) to leave the Best Practice Prompt screen and return to the “Build Health Summary Option” prompt.

4.8.6 Flow Sheets (FS)

Use the FS option to add a new flowsheet or remove an existing flowsheet from the summary type.

Note: Even if flowsheets are added to the Flowsheet section, the “Flowsheet” component must be added to or already exist as a component in the Health Summary’s structure for the component to actually display in the Health Summary. Section 4.8.1 provides instructions on how to add a Flowsheet as a component in the Health Summary’s structure.

1. To add a new flowsheet, at the “Select Action” prompt, type LP.

2. At the “Select FLOWSHEET SEQUENCE” prompt, type a new order number in which the new flowsheet should display within the section.

3. At the “FLOWSHEET SEQUENCE FLOWSHEET TYPE” prompt, type the name of the flowsheet that should display (e.g., Diabetic).

4. At the “FLOWSHEET TYPE” prompt, if the correct name displays as the default, press Enter. If not, type the correct measurement panel name.

5. At the “Select FLOWSHEET SEQUENCE” prompt, if all desired flowsheets are added, press Enter. To add another flowsheet, repeat the steps above.

In the following example, there are no existing flowsheet types in the Flowsheets section. The user adds one new flowsheet, Medications Flowsheet.

Figure 4-19: Example of adding a Flowsheet

The following provides the steps to do to remove a flowsheet:

1. To remove a flowsheet from the Flowsheet section, at the “Select Action” prompt, type FS.

2. At the “Select FLOWSHEET SEQUENCE” prompt:
   a. If the flowsheet to remove is the default option, type the at sign (@).
   b. If the flowsheet to remove is not the default option, type the order number of the flowsheet. At the “FLOWSHEET SEQUENCE” prompt, which now displays the order number just entered as the default option, type the at sign (@).

3. At the “SURE YOU WANT TO DELETE THE ENTIRE [order #] FLOWSHEET SEQUENCE?” prompt, type Y (Yes) or N (No).

4. At the “Select FLOWSHEET SEQUENCE” prompt, if all the desired flowsheets are removed, press Enter. To remove another flowsheet, repeat the steps above.
In the following example, Diabetic Flowsheet is removed.

4.8.7 Health Factors (HF)

Use the HF option to add a new health factor or remove an existing health factor from the summary type.

**Note:** Even if health factors are added to the Health Factors section, the “Health Factors” component must be added to or already exist as a component in the Health Summary’s structure for the component to actually display in the Health Summary. For instructions on how to add Health Factors as a component in the Health Summary’s structure, refer to Section 4.8.1 Modify Structure.

1. To add a new health factor, at the “Select Action” prompt, type **HF**.

2. At the “Select HEALTH FACTOR SEQUENCE” prompt, type a new order number in which the new health factor should display within the section.

3. At the “HEALTH FACTOR TITLE” prompt, enter an alternate title for the health factor display. This is not a required field.

4. At the “DISPLAY MOST RECENT INSTANCE” prompt, type **Y** (Yes) to display the most recent only, type **N** (No) to display all occurrences.

5. At the “Select HEALTH FACTOR SEQUENCE” prompt, if all desired health factors are added, press Enter. To add another, repeat the steps above.

In the following example, there are no existing health factors in the Health Factors section. The user adds one new health factor, Asthma.
WARNING: HEALTH FACTORS has not been added to the Health Summary Structure. HEALTH FACTORS will not display until they are part of the summary structure.

If you want all HEALTH FACTOR categories to display on your summary then DO NOT update this field. If it is left blank then all HEALTH FACTOR categories will display. If you want only selected HEALTH FACTOR categories to display on this summary type then enter them into this field.

You can add a new HEALTH FACTOR category by entering a new sequence number and HEALTH FACTOR category name.

To remove a HEALTH FACTOR category from this summary type select the category by sequence number and type an '@'.

Select HEALTH FACTOR SEQUENCE: 10
HEALTH FACTOR SEQUENCE HEALTH FACTOR TYPE: ASTHMA TRIGGERS
HEALTH FACTOR TYPE: ASTHMA TRIGGERS/
HEALTH FACTOR TITLE:
DISPLAY MOST RECENT INSTANCE: ??
This field controls whether all instances or only the most recent instance of each health factor type within the category will be displayed. For example, if MOST RECENT ONLY DISPLAYED is selected for the category of TOBACCO USE, the the most recent instance of recording for factors in that category, e.g., CURRENT SMOKELESS, CURRENT SMOKER, etc. is displayed. Otherwise, ALL instances are shown (which may result because a patient has moved repeatedly from one status to another).

Choose from:
Y    MOST RECENT ONLY DISPLAYED
N    ALL OCCURRENCES DISPLAYED
DISPLAY MOST RECENT INSTANCE: Y MOST RECENT ONLY DISPLAYED

Health Summary: TESTING
+ FLOWSHEET: <none>

HEALTH FACTORS:
Order Health Factor      Title      Most Recent
10  ASTHMA TRIGGERS      MOST RECENT

SUPPLEMENTS:
Use these steps to remove a health factor from the Health Factors section.

1. To remove a health factor from the Health Factors section, at the “Select Action” prompt, type **HF**.

2. At the “Select HEALTH FACTORS SEQUENCE” prompt:
   - If the health factor to be removed is the default, type the at sign (@).
   - If the health factor to be removed is not the default, type the order number of the health factor to remove. At the “FLOWSHEET SEQUENCE” prompt, which now displays the order number just entered as the default option, type the at sign (@).

3. At the “SURE YOU WANT TO DELETE THE ENTIRE '[order #]' HEALTH FACTOR SEQUENCE?” prompt, type **Y** (Yes) or **N** (No).

4. At the “Select HEALTH FACTOR SEQUENCE” prompt, if all the desired health factors are removed, press Enter. To remove another flowsheet, repeat the steps above.

In the following example, the Asthma Triggers health factor is removed.
4.8.8 Provider Class Scrn (PC)

Use the PC option to add a new provider class or remove a provider class from the summary type. This field is used to screen out certain provider disciplines (classes) from the Outpatient Visits (Screened) component.
Note: If the Outpatient Visits Screened component has not been added to the Health Summary structure, the following warning will display: “WARNING: OUTPATIENT VISITS SCREENED has not been added to the Health Summary structure. Entering Provider class values into this field will have no effect unless OUTPATIENT VISITS (SCREENED) is added to the structure.” For instructions on how to add Outpatient Visits Screened as a component in the Health Summary’s structure, refer to Section 4.8.1 Modify Structure.

If the primary provider for a visit has a provider class that matches a class typed into this field, the visit will not display in the summary in the Outpatient Visits (Screened) section.

1. To add a new provider class, at the “Select Action” prompt, type PC.

2. At the “Select PROVIDER CLASSSCREEN” prompt, specify the type of provider class to add. To view a list of all classes, type two question marks (?) to view the list (example of truncated list in the screen capture below).

3. At the “Are you adding’ [class]’ as a new PROVIDER CLASS SCREEN (THE [#] for this HEALTH SUMMARY TYPE)? No/” prompt, type Y (Yes) to add a new provider class to the Health Summary. Type N (No) to not add a new provider class.

4. At the “Select PROVIDER CLASS SCREEN” prompt, if all desired classes are added, press Enter. To add another provider class, repeat the steps above.

In the following example, the user adds one new class, PHN/AIDES.
If the primary provider on a visit has a provider class that matches one entered into this field the visit will NOT display on the summary in the OUTPATIENT VISITS (SCREENED) section.

To remove a provider class from being screened out of this summary type the provider class code and type an '@',

Select PROVIDER CLASS SCREEN: ??
You may enter a new PROVIDER CLASS SCREEN, if you wish
This field is used to screen out certain provider disciplines (classes) from the component called OUTPATIENT VISITS (SCREENS).

Choose from:

WARNING: OUTPATIENT VISITS SCREENED has not been added to the Health Summary structure. Entering clinic values into this field will have no affect unless OUTPATIENT VISITS (SCREENED) is added to the structure.

If the clinic of a visit is a clinic that matches one entered into this field the visit will NOT display on the summary in the OUTPATIENT VISITS (SCREENED) section.

To remove a clinic from being screened out of this summary type the clinic code or name and type an '@',

Select CLINIC SCREEN: ??
You may enter a new CLINIC SCREEN, if you wish
This field is used to screen out certain clinic types from the component called OUTPATIENT VISITS (SCREENED).

Choose from:
ALCOHOL AND SUBSTANCE  43
AMBULANCE A3
ANESTHESIOLOGY D4
ANTICOAGULATION THERAPY D1
AUDIOLOGY 35
BEHAVIORAL HEALTH C4
CANCER CHEMOTHERAPY  62
CANCER SCREENING  58

Select CLINIC SCREEN: CANCER
1  CANCER CHEMOTHERAPY  62
2  CANCER SCREENING  58
CHOOSE 1-2: 1 CANCER CHEMOTHERAPY 62
Are you adding 'CANCER CHEMOTHERAPY' as a new CLINIC SCREEN (the 1ST for this HEALTH SUMMARY TYPE)? No// Y (Yes)
Select CLINIC SCREEN:

Follow these steps to remove a provider class:

1. To remove a provider class, at the “Select Action” prompt, type PC.
2. At the “Select CLINIC SCREEN” prompt:
   - If the clinic to remove is the default option, type the at sign (@).
• If the clinic to remove is not the default option, type the order number of the clinic to remove.

3. At the “SURE YOU WANT TO DELETE?” prompt, type Y (Yes) or N (No).

4. At the “Select CLINIC SCREEN” prompt, if all the desired entries are removed, press Enter. To remove another, repeat the steps above.

In the following example, CANCER CHEMOTHERAPY is removed.

Figure 4-26: Example of deleting a CLINIC SCREEN

4.8.10 Supplements (SP)

Use the SP option to add a new supplement to the summary type. Section Appendix G: provides more information about the different types of supplements.
Note: Supplements added to a panel will not display until Supplements is part of the summary structure. Section 4.8.1 provides instructions on how to add Supplements as a component in the Health Summary’s structure.

1. To add a new supplement, at the “Select Action” prompt, type SP.

2. At the “Select SUPPLEMENT PANEL SEQUENCE” prompt, type the sequence in which the supplement should display.

3. At the “Are you adding’[#]’ as a new SUPPLEMENT PANEL SEQUENCE (THE [#] for this HEALTH SUMMARY TYPE)? No/” prompt, type Y (Yes) to add it to the Health Summary. Type N (No) to not add it.

4. At the “SUPPLEMENT PANEL SEQUENCE SUPPLEMENT PANEL TYPE” prompt, type the name of the supplement to add. If the user does not know the name of the supplement, type two questions (??) to view a list.

5. At the “SUPPLEMENT PANEL TYPE” prompt, if the correct supplement displays, press Enter. If not, type the correct name.

6. At the “TIME LIMIT FOR MED DISPLAY” prompt, type the time limit.

7. At the “Select SUPPLEMENT PANEL SEQUENCE” prompt, if all desired supplements are added, press Enter. To add another, repeat the steps above.

In the following example, the user adds one new supplement, DIABETIC CARE SUPPLEMENT.
WARNING: SUPPLEMENTS has not been added to the Health Summary Structure. The SUPPLEMENTS you add to this panel will not display until SUPPLEMENTS is a part of the summary structure.

Select SUPPLEMENT PANEL SEQUENCE: 10
Are you adding '10' as a new SUPPLEMENT PANEL SEQUENCE (the 1ST for this HEALTH SUMMARY TYPE)? No// Y (Yes)

4.8.11 General Info (GI)

Use the GI option to determine various display elements for the Health Summary output. The following prompts display when using the GI option:

1. At the “CLINIC DISPLAYED” prompt, type Y (Yes) or N (No). This field controls whether or not the clinic will be displayed in any components where clinic applies (e.g., Outpatient/Field Encounters). The text displayed is obtained from the CLINIC STOP file. The Abbreviation field will be used if present; if not, the first 10 characters of the clinic stop name will be used instead.
2. At the “ICD TEXT DISPLAYED” prompt, type one of the following: L (long text), S (short text), C (code only), or N (none). This field applies to all components where ICD is involved (e.g., problem list, purpose of visit, etc.). This control is independent of whether or not ICD text displays, either or both can be specified. If neither is specified, provider narrative displays by default.

3. At the “PROVIDER NARRATIVE DISPLAYED” prompt, type 1 (YES) or 0 (NO). This field applies to all components where provider narrative is involved (e.g., problem list, purpose of visit, etc.). This control is independent of whether or not ICD text displays, either or both can be specified. If neither is specified, the provider narrative displays by default.

4. At the “DISPLAY PROVIDER INITIALS” prompt, type 1 (YES) or 0 (NO).

5. At the “DISPLAY PROV INITIALS W/MEDS” prompt, type 1 (YES) or 0 (NO).

6. At the “DISPLAY COMMENTS W/LAB” prompt, type 1 (YES) or 0 (NO).

7. At the “Display Comments w/Reasons Service Not Done” prompt, type 1 (YES) or 0 (NO).

The following shows the information displayed in the General Information screen.

```

4.8.12 Sample Health Summary (HS)

Use the HS option to display a sample Health Summary for a specified patient. The information displays in the OUTPUT BROWSER screen.

![Sample Health Summary](image)

**Figure 4-30: Example of Sample Health Summary (HS) option**

4.9 Create/Modify Measurement Panel (MM)

The Health Summary package provides an option for constructing custom measurement panels which allows the user to specify the types of measurements that display in a single panel. The custom panel can then be used in a health summary type.

These panels are useful to display only certain types of measurements in a Health Summary; for instance, a user may want to display one set of measurements in a Health Summary for a diabetic clinic visit, and a different set of measurements in a Health Summary for an emergency clinic visit. These custom panels must be created prior to incorporating them in a health summary type.

1. At the “Build Health Summary Option” prompt, type **MM**.

2. At the “Select HEALTH SUMMARY MEAS PANEL NAME” prompt, type the panel name.
A new Health Summary Meas Panel can also be used. This field contains the name of the measurement panel, as referenced in the selecting field of the HEALTH SUMMARY TYPE file. The capability to define named sets of measurements is provided because of the likelihood that measurement groupings will be reused across summary types.

If a new panel name is entered, the application confirms that you want to add it (yes or no). The prompts continue when using YES.

3. At the “Select Order in Panel” prompt, type the relative order in which the individual measurements making up the panel will display. The values need not be sequential, and need not be entered in order (e.g., items entered in the order “5, 10, 7” will display in the order “5, 7, 10”).

Use one of the following (for an existing value): 5 5 (HT), 10 10 (WT), 15 15 (BP), 20 20 (WT), 25 25 (WT), 30 30 (VU), 35 35 (VC).

Otherwise, type a new Order In Panel.

4. At the “Order in Panel Panel Component” prompt, type the measurement type to appear on the panel. The measurement is chosen from those available in the MEASUREMENT TYPE file (i.e., HT).

The following shows a partial list of valid entries: ADM (Asthma Work/School Days Missed), AG (Abdominal Girth), AKBP (Ankle Blood Pressure), ASFD (Asthma Symptom Free Days), ASQF (ASQ–Fine Motor), ASQG (ASQ–Gross Motor), ASQL (ASQ–Language), ASQM (ASQ Questionnaire (Mos)), ASQP (ASQ–Problem Solving), ASQP (ASQ Problem Solving), ASQS (ASQ–Social), AUD (Audiometry).

5. At the “Field Width” prompt, type how many columns in the display (or printout) the measurement will occupy. If a value containing a decimal point is entered, the decimal value is used to format the measurement. Section 4.9.1 provides more information about this prompt.

For example, a value of 123.45 will display as:

123.45 if Field Width is 6.2
123.4 if Field Width is 6.1
123 if Field Width is 6.0

6. At the “Label” prompt, the contents of this field will be used as the column label instead of the measurement name. Otherwise, the column containing the measurement is labeled with the name of the measurement as it appears in the MEASUREMENT TYPE file.
For users with Programmer privileges, the “Transform” prompt displays. Section 4.9.2 provides more information.

7. At the “Note to Display” prompt, type a line of text to be displayed any time a measurement of the indicated type appears in a panel. For example, if the measurement is Body Mass Index, text in this field might be “Body Mass Index assumes medium frame.”

8. After typing the text to display in the above prompt, the “Select Order in Panel” prompt displays.
   - This field contains an integer that specifies the relative order in which the individual measurements making up the panel will appear. The values need not be sequential and need not be entered in order.
   - Otherwise, do not enter any value and press enter to go to the “Select Health Summary Meas Panel Name” prompt. Here another health summary measure panel name can be added.

Select Build Health Summary Option: MM Create/Modify Measurement Panel

Select HEALTH SUMMARY MEAS PANEL NAME: ??

Choose from:
ADULT STD
ADULT STD METRIC
PEDIATRIC STD
PEDIATRIC STD METRIC
TEST

You may enter a new HEALTH SUMMARY MEAS PANEL, if you wish.
This field contains the name of the measurement panel, as referenced in the selecting field in the HEALTH SUMMARY TYPE file. The capability to define names sets of measurements is provided because of the complexity of the definition process and the likelihood that measurement groupings will be reused across summary types.

Select HEALTH SUMMARY MEAS PANEL NAME: TEST

-- NOTE: Programmer privileges (FileMan access code of "@") are required to view and modify the TRANSFORM field.
4.9.1 Specifying the Field Width

A field width for each of the measurement values selected in a custom measurement panel will have to be specified. The measurement values are always displayed right-justified in each field. A field will be filled with asterisks if an attempt is made to display a value that is too large for the field. When prompted to type a field width, specify the width using one of the following formats.

- An Integer. The integer represents the number of column positions for the Measurement Value field, and does not take into account measurement values that contain a decimal point. Regardless of the presence of a decimal point, all values will be right aligned. If the user types a field width of 3, for example, the field will hold a number like 123 or 1.5, but not 12.3.

- A Pair of Integers Separated by a Decimal Point. In this form, the first integer is the field width and the second integer is the number of decimal places to be displayed. For example, if the user types 6.3, this means 6 column positions with 3 decimal places. This field will hold a number such as 12.345, but not 123.456.

- An Integer Followed by a Decimal Point and a Zero. This form is a special case of the previous form. The integer specifies the number of column positions, and the zero indicates that no decimal places will be displayed, regardless of the presence of a fraction in the measurement value. If non-integral, the value will be rounded. Any number 0.5 and above is rounded up. For example, a height of 69.5 would be rounded up to 70.

4.9.2 Defining a Transform

The ability to transform stored values makes it possible to display measurements other than those contained in the database. In the measurement panels distributed with the Health Summary package, this capability is used to create height and weight percentiles, percent recommended weight, BMI, metric measurement displays, and separation of measurement data for the left and right eyes. Transforms can be created by programmers for inclusion in custom measurement panels.
Note: Only users with programming privileges will see the transform prompt when creating a measurement panel.

A transform is a line of MUMPS code that takes as input a value in the variable X, performs some computation or manipulation, and leaves a value in X to be displayed in the Health Summary.

- **Example 1:** The display of visual acuity data in the form “20/xx-20/yy” is created via a transform of data representing both eyes, which is stored in the form “xx/yy.” The transform is:
  \[ S X="20/\$P(X,"/",1)-20/\$P(X,"/",2) \]

- **Example 2:** The display of BMI is created via a transform of weight data; the computation is complex and carried out in a routine. The transform is:
  \[ D BMI^{APCHS2A1} \]

### 4.9.3 Constructing a Measurement Panel Example

Below is an example of a measurement panel.

```
Select Health Summary Maintenance Option: MM Create/Modify Measurement Panel
Select HEALTH SUMMARY MEAS PANEL NAME: DEMO PANEL
NAME: DEMO PANEL // <ENTER>
Select ORDER IN PANEL: 10
ORDER IN PANEL PANEL COMPONENT: TMP TEMPERATURE
FIELD WIDTH: 12
LABEL: <ENTER>
NOTE TO DISPLAY: TEMPERATURE
```

Figure 4-32: Measurement Panel example

### 4.10 Create/Modify Flowsheet (MF)

Use the MF option to create or modify a flowsheet. This option builds prepackaged tabular displays of specific types of data. The flowsheet created can then be used in a health summary type. Remember that the user must locally create all flowsheets. Follow these steps:

1. At the “Build Health Summary Option” prompt, type **MF**.

2. At the “Select Health Summary Flowsheet Name” prompt, type a name for the new/existing flowsheet.
   - If an existing flowsheet name was typed, the application displays the name. If this is correct, press Enter to continue. If this is not the correct name, type another existing name.
• If a new flowsheet name was typed, the application asks if the user is adding a new flowsheet (displays the new name). At this prompt type Y (Yes) to continue. Otherwise, type N (No) and type another name. If the user accepts the new name, the application displays it at the “Name” prompt.

3. At the “Gender Restrictions” prompt, the user can specify if any gender is restricted by this flowsheet. If so, type F (for female only) or M (for male only). The user can leave this field blank by pressing Enter.

4. At the “Lower Age Limit” prompt, type the lower age limit, if any.

5. At the “Upper Age Limit” prompt, type the lower age limit, if any.

6. At the “Select Item Order” prompt, a new structure can be used. This field contains an integer that specifies the relative order in which the flowsheet items will be displayed. Values need not be sequential or entered in order. For example, items entered in the order “5, 10, 7” will display in the order “5, 7, 10.”

7. At the “Item Type” prompt, specify the type of item to be displayed in the specified relative order. The item is chosen from those available in the HEALTH SUMMARY FLOWSHEET ITEMS file. Valid entries for this prompt are: EXAMINATION, HEALTH FACTOR, LABORATORY RESULT, MEASUREMENT, MEDICATION, PATIENT EDUCATION, or PURPOSE OF VISIT.

8. At the “Item Label” prompt, type the name of the item specified in the “Item Type” field. This will be used as the label for the column in which the item appears.

9. At the “Item Width” prompt, type the width of the column in which the item displays. The sum of all columns plus the number of columns should be less than 70 to display the date at the beginning of each row, and the characters separating columns.

10. At the “Select Members” prompt, type new members, if desired.

This field limits the instances of data of the type specified in the “Item Type” field displayed on the flowsheet. It points to an entry in the file that defines the instances of the class of data represented by the item displayed. For example, if Medication is the type of item displayed the field points to any entry in the DRUG file. Specifically, this field points to an entry in the file specified in the Item Selection File field of the HEALTH SUMMARY FLOWSHEET ITEMS file that corresponds to the type of item displayed.

Type one of the following:
MEA.EntryName to select a Measurement type  
MED.EntryName to select a Medication  
LAB.EntryName to select a Lab test  
POV.EntryName to select a Purpose of visit  
EXM.EntryName to select a Examinations  
PED.EntryName to select a Patient education  
HF.EntryName to select a Health Factors

If the user types a name, the system will search each of the above files for the name entered. If a match is found, the system will ask if it is the correct entry.

If the user knows the file the entry should be in, processing can be speeded up by using the following syntax to select an entry: <Prefix>.<entry name> or <Message>.<entry name> or <File Name>.<entry name>

The user does not need to enter the entire file name or message to direct the look up. Using the first few characters will suffice.

11. The “Select Item Order” prompt displays again. Type a caret (^) to return to the “Select Build Health Summary Option” prompt.

| IS   | Inquire About a Health Summary Type |

Select Build Health Summary Option: MF Create/Modify Flowsheet

Select HEALTH SUMMARY FLOWSHEET NAME: ???

DIABETIC FLOWSHEET

You may enter a new HEALTH SUMMARY FLOWSHEET, if you wish
This field contains the name of the flowsheet as it will be specified in the FLOWSHEET PANEL multiple in the HEALTH SUMMARY TYPE file.

Select HEALTH SUMMARY FLOWSHEET NAME: TEST
Are you adding 'TEST' as a new HEALTH SUMMARY FLOWSHEET (the 2ND)? No// Y (Yes)
NAME: TEST//
GENDER RESTRICTIONS: F FEMALES ONLY
LOWER AGE LIMIT: 18
UPPER AGE LIMIT: 85
Select ITEM ORDER: ??
You may enter a new STRUCTURE, if you wish
This field contains an integer which specifies the relative order in which the flowsheet items are to be displayed. Values do not have
to be sequential, and need not be entered in order. For example, items entered in the order 5 10 7 will still display in the order 5 7 10.

Select ITEM ORDER: 10
ITEM ORDER ITEM TYPE: ??
This field specifies a type of item to be displayed in the specified relative order. The item is chosen from those available in the HEALTH SUMMARY FLOWSHEET ITEMS file.

Choose from:
EXAMINATION
HEALTH FACTOR
LAB RESULT
MEASUREMENT
MEDICATION
PATIENT EDUCATION
PURPOSE OF VISIT

ITEM ORDER ITEM TYPE: EXAMINATION
ITEM TYPE: EXAMINATION/>
ITEM LABEL:
ITEM WIDTH: 80??
This field specifies the width of the column in which item data is displayed. The sum of all columns plus the number of columns should be less than 70 in order to allow for the data appearing at the beginning of each row and the characters separating columns.
ITEM WIDTH: 25
Select MEMBERS: ??
You may enter a new MEMBERS, if you wish
This field is used to limit the instances of data (of the type specified by the ITEM TYPE field) displayed on the flowsheet. It points to an entry in the file which defines the instances of the class of data represented by the item being displayed. For example, if MEDICATION is the type of item being displayed, this field points to an entry in the DRUG file.

Specifically, this field points to an entry in the file specified in the ITEM SELECTION FILE field of the entry in the HEALTH SUMMARY FLOWSHEET ITEMS file which corresponds to the type of item being displayed. Enter one of the following:
MEA.EntryName to select a Measurement type
MED.EntryName to select a Medication
LAB.EntryName to select a Lab test
POV.EntryName to select a Purpose of visit
EXM.EntryName to select a Examinations
PED.EntryName to select a Patient education
HF.EntryName to select a Health Factors

To see the entries in any particular file type <Prefix.?>

If you simply enter a name then the system will search each of the above files for the name you have entered. If a match is found the system will ask you if it is the entry that you desire.

However, if you know the file the entry should be in, then you can speed processing by using the following syntax to select an entry:
<Prefix>.<entry name>
or
<Message>.<entry name>
or
<File Name>.<entry name>

Also, you do NOT need to enter the entire file name or message to direct the look up. Using the first few characters will suffice.

Select MEMBERS: EXM

- Searching for a Measurement type
- Searching for a Medication
- Searching for a Lab test
- Searching for a Purpose of visit
- Searching for a Examinations
- Searching for a Patient education
- Searching for a Health Factors

Select MEMBERS:
Select ITEM ORDER:
Select EVOKING CODES: ??

You may enter a new EVOKING CODES, if you wish
This field can optionally contain an ICD diagnosis code, or range of codes. If present, the data in this field will be compared with the patient's problem list: if the patient has any problem which matches the evoking code(s), the flowsheet will be generated; otherwise it will be skipped. If no evoking codes are specified, the flowsheet will be generated under the assumption that no restriction is desired.

Select EVOKING CODES:
Select CLINIC DISPLAY RESTRICTIONS:

Select HEALTH SUMMARY FLOWSHEET NAME:

Figure 4-33: Example of the Create/Modify Flowsheet (MF)

4.11 Generate Health Summary (HS)
Section 3.1 provides information about the Generate Health Summary (HS) prompts.

4.12 Browse Health Summary (BRHS)
Section 3.2 provides information about the Browse Health Summary (BRHS) prompts.

4.13 Create/Modify Health Summary Type Using FileMan (FMMT)
Use the FMMT option to edit a health summary type line-by-line *without* accessing the MS (Create/Modify Health Summary Type) option.

1. At the “Select Build Health Summary Option” prompt, type **FMMT**.
2. At the “Select HEALTH SUMMARY TYPE NAME” prompt, type the name of the health summary to modify.

3. At the “Name” prompt, if the correct health summary name displays, press Enter. If it does not, retype the name of the summary.

4. At the “Lock” prompt, type the lock code, if applicable. This field optionally specifies a key which must be held in order to modify the summary type. If present, the field must match exactly an existing entry in the SECURITY KEY file. If not, press Enter.

5. At the “Select SUMMARY ORDER” prompt, type the sequence number of the component to create or modify. If the user does not wish to create/modify the structure of the health summary, press Enter at this prompt. In the example below, the system defaults to the component in sequence number of 10. The user chooses 20 instead to create a new component that follows the component in slot 10.

6. At the “STRUCTURE COMPONENT NAME” prompt, if the user is creating/modifying the structure, enter the name of the component to create/modify.

7. At the “COMPONENT NAME” prompt, if the correct component displays as the default (what was entered in the previous step), press Enter. If not, retype the component name.

8. At the “MAXIMUM OCCURRENCES” prompt, type how many visits-worth of information should be displayed (for time-related components). If left blank, no limit on visits is imposed. Note that the value for this field interacts with that for TIME LIMIT – the more restrictive applies.

9. At the “TIME LIMIT” prompt, type how far back the health summary program will go to retrieve data to display (for time-related components). Limits can be specified in terms of years (e.g., 2Y), months (e.g., 6M), or days (e.g., 90D). If left blank no time limit is imposed on data retrieval. Note that the value for this field interacts with that for MAXIMUM OCCURRENCES - the more restrictive applies.

10. At the “ALTERNATE TITLE” prompt, type the name an alternative name for the component, if desired. In the example below, the user wants “BPP” to display for the component name in the health summary instead of “Best Practice Prompts.” No case conversion is performed, meaning that the title is displayed exactly as entered.

Depending on the component being created/modified, the prompts may differ, depending on the required information for the component to display. In the example below, the prompts for the Best Practice Prompts component and the Measurements component vary.
11. At the “Select SUMMARY ORDER” prompt, type the sequence number of the component to create or modify. If the user does not wish to create/modify the structure of the health summary, press Enter at this prompt. In the example below, the system defaults to the component in sequence number of 10. The user chooses 20 instead to create a new component that follows the component in slot 10.

12. At the “CLINIC DISPLAYED” prompt, type Y (YES) or N (NO).

This field controls whether or not the clinic will be displayed in any components where clinic applies (e.g., OUTPATIENT/FIELD ENCOUNTERS). The text displayed is obtained from the CLINIC STOP file: the ABBREVIATION field will be used if present; if not, the first ten characters of the clinic stop name will be used instead. Note that use of the initial portion of the clinic stop name may result in ambiguity if more than one clinic begins with the same first ten characters.

13. At the “DISPLAY PROVIDER INITIALS” prompt, type Y (YES) or N (NO).

14. At the “DISPLAY PROV INITIALS W?MEDS” prompt, type Y (YES) or N (NO).

15. At the “ICD PROV INITIALS W/MEDS” prompt, type L (long text), S (short text), C (code only), or N (none).

16. At the “PROVIDER NARRATIVE DISPLAYED” prompt, type Y (YES) or N (NO). This field controls whether provider narrative is displayed or not. It applies to all components where provider narrative is involved (e.g., problem list, purpose of visit, etc.). This control is independent of whether or not ICD text is displayed - either or both may be specified. If neither is specified, provider narrative will be displayed by default.

17. At the “DISPLAY COMMENT W/LAB” prompt, type Y (YES) or N (NO).

18. At the “DISPLAY COMMENT WITH REFUSALS)” prompt, type Y (YES) or N (NO).

19. At the “SELECT MEASUREMENT PANEL SEQUENCE” prompt, type the sequence number of the measurement panel to create/modify. If the user does not want to create/modify a measurement panel.

When MEASUREMENT PANELS is specified as a component in a summary type, this field controls the order of appearance of the associated measurement panel within the measurement area on the health summary. The value of the field is a number which specifies the relative order in which the panel appears. The values need not be sequential, and do not need to be entered in order. For example, if entered as 5 10 7, the panels will appear in the order 5 7 10.
20. At the “Select LAB TEST SEQUENCE” prompt, type the relative order in which the last test will be displayed. When LABORATORY DATA is specified as a component in a health summary type, the order of appearance of the associated lab test. The values do not need to be sequential and do not need to be entered in order.

21. At the “Select SURVEILLANCE ITEM SEQUENCE” prompt, type a number that specifies the relative order in which the reminder will be processed and in which any output produced will appear. When HEALTH MAINTENANCE REMINDERS is selected as a component on a health summary type, this field controls the order of appearance of the associated reminder. The values do not need to be sequential and do not need to be entered in order.

22. At the “Select FLOWSHEET SEQUENCE” prompt, type a number that specifies the relative order in which the flowsheet will be displayed. When FLOWSHEETS is selected as a component on a health summary type, this field controls the order of appearance of the associated flowsheet. The values do not need to be sequential and do not need to be entered in order.

23. At the “Select HEALTH FACTOR SEQUENCE” prompt, type a number that specifies the relative order in the flowsheet will be displayed. When HEALTH FACTORS is selected as a component on a health summary type, this field controls the order of appearance of the associated category of health factor. The values do not need to be sequential and do not need to be entered in order.

24. At the “Select PROVIDER CLASS SCREEN” prompt, type the name of the provider screen.

25. At the “Select CLINIC SCREEN” prompt, type the name of the clinic screen.

26. At the “Select SUPPLEMNT PANEL SEQUENCE” prompt, type the supplement panel sequence. A new one can be used.

27. At the “Select BEST PRACTICE PROMPT ORDER” prompt, type best practice prompt order.

FLOWSHEET # Diagnoses/Date Range Limits (press enter):

# of lines to display for REMARKS in demographic component: 20

For REMARKS display the FIRST or LAST n # of lines: FIRST

Exit     Save     Refresh

Enter a command or '^' followed by a caption to jump to a specific field.

COMMAND:                                           Press <PFl>H for help

Figure 4-35: Selecting Health Summary site parameters (HSSP)

The following provides information about prompts in Figure 4-35: Selecting Health Summary site parameters (HSSP).

- “Switch to the Diabetes Summary when Diabetes is on the problem list and summaries are printed through the Scheduling module?” prompt is used to control whether or not the summary type automatically switches to the Diabetes Health summary when diabetes is on the patient’s problem list and the summary is
printed from the scheduling module. For example, when Adult Regular is the default summary for a clinic and diabetes is on the patient’s problem list, the Diabetes summary will display instead of the Adult Regular summary.

To leave the auto-switch on, type 1 (Yes) in “Default Diabetes Summary Type” prompt, type 2 (No) to disable the auto-switch. If the user uses Yes, the name of the Diabetes summary type must be entered in the Default Diabetes Summary Type field.

- “Default Diabetes Summary Type” prompt: Type a default name for the Default Diabetes Summary Type or press Enter to bypass the prompt.
- “SUPPLEMENT # Diagnoses/Date Range Limits” prompt: Press Tab to bypass this prompt. If Enter is pressed at this prompt, the following screen displays:

<table>
<thead>
<tr>
<th>SUPPLEMENT</th>
<th># diagnoses in # years</th>
</tr>
</thead>
</table>

Figure 4-36: Sample dialog box for “Supplement # Diagnoses/Date Range Limits” prompt

- At the last line of this screen, type two question marks (??) to view Help.

You may enter a new SUPPLEMENT DIAGNOSIS LIMITS, if you wish.
Choose from:
DIABETIC CARE SUMMARY
PRE-DIABETES SUMMARY
Enter RETURN to continue or ‘^’ to exit.

Figure 4-37: Help information for supplement diagnosis limits

- Press Enter to return to the screen where a new supplement diagnosis limit can be typed. Type a caret (^) to exit. At the “Command” prompt, type Close to exit. Otherwise, type Refresh to refresh the display.
- “FLOWSHEET # Diagnosis/Date Range Limits” prompt: Press Tab to bypass this prompt. If Enter is pressed, the following screen displays:

<table>
<thead>
<tr>
<th>FLOWSHEET</th>
<th># diagnoses in # of years</th>
</tr>
</thead>
</table>

Figure 4-38: Example dialog box for “Flowsheet # Diagnosis/Date Range Limits” prompt
At the last line on this screen, type two question marks (??) to display the Help screen:

You may enter a new FLOWSHEET DIAGNOSES LIMITS, if you wish
Choose from:
ANTICOAGULATION SERVICE
CARDIOVASCULAR DISEASE
Enter RETURN to continue or '^' to exit.

Figure 4-39: Help information for flowsheet diagnoses limits

At the last line of the help screen:

- Press Enter to return to the prompt where a new flowsheet diagnoses limit can be typed.
- Type a caret (^) to exit the data entry screen. At the “Command” prompt, type Close to exit. Otherwise, type Refresh to refresh the data on the screen.
- The “# of lines to display for REMARKS in demographic component” prompt is used to specify the number of lines that are available in the REMARKS section of the health summary.

At the end of the session, type one of the following:

**Exit:** to exit the Updating Health Summary Site Parameters screen. The user will be asked whether or not to save.

**Save:** to save changes. After typing Y (Yes) or N (No), the “Select Health Summary Site Parameters Site Name” prompt will display. Type a caret (^) to return to the “Select Build Health Summary Option” prompt.

**Refresh:** to refresh the data on the screen.

### 4.15 Patient Wellness Handouts (PWH)

Use the PWH option to access the options on the Patient Wellness Handouts menu. Refer to Section 3.9, Patient Wellness Handouts Menu, for detailed information.
5.0 Health Summary Maintenance (HSM)

This section provides instructions for options that pertain to viewing and deleting elements of the Health Summaries. Section 4.0 provides information about the options for creating and modifying portions of the Health Summaries.

To access the options in the Maintenance menu, a manager’s key is required.

To access health summary maintenance options from the main Health Summary menu, type HSM. The Health Summary Maintenance menu displays.

Figure 5-1: Options in the Health Summary Maintenance menu

5.1 Inquire About a Health Summary Type (IS)

Use the IS option to view the structure of a specific health summary type. The components that display in the Health Summary are as follows: the order of components, data restrictions, specifications regarding the display of the clinic name, and ICD text. Section 4.1 provides more information.
5.2 Health Maintenance Reminders (HM)

Section 8.0 provides complete information about the HM option and its menu.

5.3 Print Health Maintenance Item Protocols (PP)

Health maintenance reminders are printed in many types of health summaries. The due dates for each item are calculated according to a predefined schedule. The PP option allows the schedule to be reviewed. Section Appendix A provides a list of reminders and schedules. Section 4.2 provides more information about the PP option prompts.

5.4 List Health Summary Types (LS)

Use the LS option to view the names of all health summary types that exist at your facility. This list includes the standard health summary types distributed with this package as well as any customized health summaries that were created locally.

The following is a portion of the Health Summary list.

```
IS   Inquire About a Health Summary Type

Health Summary User Manual
June 2015

84
5.9 Create/Modify Health Summary Type (MS)

Section 4.8 provides detailed instructions for the MS option. The prompts are the same.

5.10 Create/Modify Measurement Panel (MM)

Use the MM option to create/modify available measurement panels without navigating to the MS – Create/Modify Health Summary Type menu and the MM Create/Modify Measurement Panel sub-menu.

Section 4.9 provides detailed instructions about this option. The prompts are the same.

5.11 Create/Modify Flowsheet (MF)

Section 4.10 provides detailed instructions about this option. The prompts are the same.
5.12 Create/Modify Flowsheet Item (MI)

Use the MI option to create or modify a flowsheet item. Only programmers should be using this option.

Follow these steps:

1. At the “Health Summary Maintenance Option” prompt, type MI.

2. At the “Health Summary Flowsheet Items Name” prompt, type the name of the flowsheet item. This name will display in the definition for the flowsheet. Each item represents a class of data, e.g., Medication represents medication data.

```
Note: Programmer privileges (FileMan access code of "@") are required to access the remainder of this file.
```

3. At the “Item Selection File” prompt, specify the file that contains instances of the data class represented by the flowsheet item. For example, if the item is Medication, the item selection file is the Drug file.

4. At the “Data File” prompt, specify the file in which PCC stores uses of the data class represented by the flowsheet item. For example, if the item is Medication, the data file is V Medication.

5. At the “Value Extraction Logic” prompt, the application displays the MUMPS code, which returns a value to be displayed as part of a flowsheet. For example, if the item is Medication, the code returns the concatenation of the drug name, the number dispensed, the instructions (signature), and date discontinued (if any).

```
Note: Only users with programmer privileges can use this field.
```

The variable DA will contain the internal entry number of the relevant V-file entry.

1. At the “Replace” prompt, specify the correct MUMPS code.

2. At the “Type Extraction Logic” prompt, the application displays the MUMPS code and returns the value (usually a pointer) compared to the list of instances of the data class to be displayed (if entered in the flowsheet definition).

3. At the “Replace” prompt, specify the correct MUMPS code.

5.13 Delete Health Summary Type (DS)

Use the DS option to delete a specified health summary type. For instance, it may be necessary to delete customized Health Summaries if they are no longer used at a facility. Follow these steps:

1. At the “Health Summary Maintenance Option” prompt, type DS.
2. At the “Select HEALTH SUMMARY TYPE NAME” prompt, type the name of the health summary type to be deleted.

3. At the “SURE YOU WANT TO DELETE THIS SUMMARY TYPE?” prompt, type Y (Yes) or N (No).

```

SURE YOU WANT TO DELETE THIS SUMMARY TYPE? No// Y (Yes)

Select HEALTH SUMMARY TYPE NAME:

Figure 5-6: Example of deleting a health summary type (DS)

### 5.14 Delete Measurement Panel Definition (DM)

Use the DM option to delete a specified measurement panel. Prior to deleting a measurement panel, check to make sure it is not used by any of the health summary types generated at your facility. Follow these steps:

1. At the “Health Summary Maintenance Option” prompt, type **DM**.

2. At the “Select HEALTH SUMMARY MEAS PANEL NAME” prompt, type the name of the measurement panel definition to be deleted.

3. At the “SURE YOU WANT TO DELETE THIS MEASUREMENT PANEL?” prompt, type either Y (Yes) or N (No).

Select HEALTH SUMMARY MEAS PANEL NAME: TESTING
SURE YOU WANT TO DELETE THIS MEASUREMENT PANEL? No// Y (Yes)

Select HEALTH SUMMARY MEAS PANEL NAME:

Figure 5-7: Example of deleting a measurement panel definition (DM)

5.15 Delete Health Summary Flowsheet (DF)

Use the DF option to delete a specified flowsheet. Once the flowsheet is deleted, it will not appear in any Health Summaries that reference it. Review the Health Summaries in use at your facility to ensure that the deletion will not have any adverse effects. Follow these steps:

1. At the “Health Summary Maintenance Option” prompt, type DF.

2. At the “Select HEALTH SUMMARY FLOWSHEET NAME” prompt, type the name of the Health Summary flowsheet to be deleted.

3. At the “SURE YOU WANT TO DELETE THIS FLOWSHEET?” prompt, type either Y (Yes) or N (No).
5.16 Delete Health Summary Flowsheet Item (DI)

Use the DI option to delete a class of items for creating flowsheets. Items that have been deleted cannot be recovered. Follow these steps:

1. At the “Health Summary Maintenance Option” prompt, type DI.

2. At the “Select HEALTH SUMMARY FLOWSHEET ITEM NAME” prompt, type the name of the health summary flowsheet item to be deleted.

3. At the “SURE YOU WANT TO DELETE THIS FLOWSHEET ITEM?” prompt, type either Y (Yes) or N (No).

Select HEALTH SUMMARY FLOWSHEET ITEM NAME:

Figure 5-9: Example of deleting a health summary flowsheet item (DI)

5.17 Generate Health Summary (HS)

Section 3.1 provides detailed instructions for the HS option. The prompts are the same.

5.18 Best Practice Prompt Menu (BP)

Section 5.18 provides detailed information about this option and its menu.

5.19 Create/Modify Health Summary Type using FileMan (FMMT)

Use the FMMT option to edit a health summary type line-by-line without accessing the Create/Modify Health Summary Type (MS) option. Section 4.13 provides detailed instructions. The prompts are the same.

5.20 Update Health Summary Site Parameters (HSSP)

Section 4.14 provides detailed instructions. The prompts are the same.

5.21 Update the Minor Procedures CPT Taxonomy (IPT)

Use the IPT option to update the list of CPT codes to be included in the History of Minor Surgery component of the Health Summary. This taxonomy should contain only CPT codes for procedures/surgeries that would be on the minor surgery section of the Health Summary.

**Note:** When this option is READ ONLY, the user cannot update it.

Follow these steps:

1. At the “Health Summary Maintenance Option” prompt, type **IPT**.
2. At the “Press enter to continue” prompt, press Enter.
The Taxonomy Update screen displays.

The following options are available at the “Select Action” prompt:

- Type A (Add Item) to enter another CPT.
- Type R (Remove) to remove a CPT code from the list. To do this, type a minus sign (–) before the code. For example, to remove Code 56001 from this taxonomy, type -56001 at the “Enter Another CPT” prompt. The application confirms that the specified code will be removed.
- Type Q (Quit) to leave the screen and return to the “Select Health Summary Maintenance Option” prompt.

5.22 Update the Major Procedures CPT Taxonomy (MPT)

Use the MPT option to update the list of CPT codes to be included in the History of Surgery component of the Health Summary. This taxonomy should contain only CPT codes for procedures/surgeries that should be on the History of Surgery section of the Health Summary.

**Note:** When this option is READ ONLY, the user cannot update it.

Follow these steps:
1. At the “Health Summary Maintenance Option” prompt, type MPT.
2. At the “Press enter to continue” prompt, press Enter to display the Taxonomy Update screen.
8) 36500 - 36598
9) 36800 - 51700

11) 59030 - 59420
12) 59500 - 59501
13) 59514 - 59514
14) 59520 - 59620
15) 59800 - 69155
16) 69300 - 69990
+        Enter ?? for more actions
A Add Item    R Remove Item   Q Quit
Select Action:+//Q

Figure 5-11: Example of updating major procedures CPT Taxonomy (MPT)

The following options are available at the “Select Action” prompt:

- Type A (Add Item) to enter another CPT.
- Type R (Remove) to remove a CPT code from the list. To do this, type a minus sign (−) before the code. For example, to remove Code 56001 from this taxonomy, type -56001 at the “Enter Another CPT” prompt. The application confirms that the specified code will be removed.
- Type Q (Quit) to leave the screen and return to the “Select Health Summary Maintenance Option” prompt.
6.0 Patient Wellness Handout Menu (PWH)

The Patient Wellness Handout (PWH) provides patients with access to some of the information in their medical record, such as immunizations due, weight, height, BMI, blood pressure, allergies, and current medications.

The PWH combines features of RPMS with the concepts developed by the Agency for Healthcare Research and Quality’s (AHRQ’s) Putting Prevention into Practice program. These features address the Institute of Medicine’s (IOM’s) 10 rules of patient-centered care, and empower patients to improve their health and satisfaction with medical services.

The PWH can be printed in a variety of settings and at various times during the patient visit. Evaluate your processes and uses for the PWH to determine when it will be most effective at your site.

If printed before a patient visit, the PWH will populate information using the patient’s most recent previous visit data.

To access PWH functions, go to the main Health Summary menu. As shown below, MPWH is the option to access the main PWH menu, which includes sub-options to update the default PWH that prints for a site, print an AAP, create/modify a non-standard PWH, and run a report on the number of PWHs given.

Use the PWH option PWH below to quickly generate a PWH.

```

Figure 6-1: Example of PWH menu options in the main Health Summary menu
6.1 Available PWH Components

A PWH consists of one or more components. See the Patient Wellness Handout Description and Logic Manual for component logic.

A user with the appropriate security key can create and save multiple PWH types that include components of their choosing to use at a later date for other patients.

The available components are:

- Activity Level
- Allergies
- Anticoagulation
- Appointments
- Ask Me 3 Questions
- Blood Pressure
- Cancer Screening
- Cholesterol
- Demographics
- Diabetes Care
- Diabetes Screening
- Education Handouts
- Family History
- Healthcare Goals
- Height/Weight/BMI
- HIV Screening
- Immunizations Due
- Immunizations Received
- Medications (Active Only)
- Medications (Active and Recently Expired)
- Patient Goals
- Pediatric Screening
- Problem List
- Procedures
- Recent BP History
• Recent Lab Results
• Recent Weight History

6.2 PWH Types
There are two nationally-standardized PWH types: (1) Adult Regular and (2) Medication Reconciliation.

6.2.1 Standardized Type: Adult Regular
The Adult Regular type displays data from all available components. The components display in the following order:
• Demographics
• Height/Weight/BMI
• Medications (Active Only) or Medications (Active and Recently Expired)
• Blood Pressure
• HIV Screening
• Allergies
• Immunizations Due
• Immunizations Received
• Cholesterol
• Diabetes Care
• Cancer Screening
• Transparency Measures
• Healthcare Goals
• Activity Level
• Ask Me 3 Questions

6.2.2 Standardized Type: Medication Reconciliation
The Medication Reconciliation type displays data from the following components: (1) Allergies and (2) Medications.

6.2.3 Customized Type
As mentioned previously, a user with the appropriate security key can create and save multiple PWH types that include components of their choosing to use at a later date for other patients.
7.0 Options on the Patient Wellness Handout Menu

Use the MPWH option to access the options in the PWH menu.

At the “Select Health Summary Menu Option” prompt, type MPWH to display the following menu options:

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>PWH</td>
<td>Generate a Patient Wellness Handout</td>

<td>Number of PWHs Given to Patients Report</td>
</tr>
</tbody>
</table>

Select Patient Wellness Handout Menu Option:

Figure 7-1: Options in the Patient Wellness Handout menu

7.1 Generate a Patient Wellness Handout (PWH)

Use the PWH option to generate a Patient Wellness Handout for a specified patient. Each time a PWH is generated, the log records the patient, the date, the location, and the user who generated the handout.

To generate a Patient Wellness Handout, follow these steps:

1. At the “Select Patient Wellness Handout Menu Option” prompt, type PWH.

2. At the “Select Patient Wellness Handout type” prompt, type one of the following: Adult Regular: contains all 14 components or Medication Reconciliation: contains Medications and Allergies.

3. At the “Select Patient” prompt, type the name patient to use for the handout.

4. At the “Select one of the following” prompt, type either P (print output) or B (browse output on screen).

Below is an example.

TEST, CARL HRN: 147136
W.W
ALBUQUERQUE, NM 89701
202-555-1212

Thank you for choosing W.W.
This handout is a new way for you and your doctor to look at your health.

Emergency Contact: My Blood Type:
Address:                          
City/State:                      
Phone:                           

Last Hospital Admission: Aug 20, 2013
Reason for admission: HEAT STROKE & SUNSTROKE

Allergies - No allergies are on file. Please tell us if there are any that we missed.

Recent Lab Results

You recently had some lab work done. Be sure to talk with your health care provider about these results and ask what they mean. Your healthcare provider will answer any questions that you may have.

Laboratory Test | Result | Reference Range Date

Medications - This is a list of medications and other items you are taking including non-prescription medications, herbal, dietary, and traditional supplements. Please let us know if this list is not complete. If you have other medications at home or are not sure if you should be taking them, call your health care provider to be safe.

No medications are on file. Please tell us if there are any that we missed.

Immunizations (shots). Ask your doctor if you are due for any immunizations.

Cholesterol

Controlling your cholesterol can keep your heart and blood vessels healthy.

No recent cholesterol is on file. We recommend that you have your cholesterol rechecked at your next visit.

Colon Health Screening
It is recommended that all people who are 51 years and older be screened for colon cancer. Ask your health care provider to order a colon cancer screening for you.

BLOOD PRESSURE - Blood Pressure is a good measure of health. You should have your blood pressure checked at your next visit.

PROCEDURES

Procedures are things that you have done to improve your health. Some examples of a procedure are any kind of surgery or putting a cast on a broken leg. If you think you have had a procedure or surgery that is not on this list, please tell your health care provider.

Figure 7-2: Example output for Patient Wellness Handout (PWH)

The following actions are available on the Output Browser screen:

- Type Q (Quit) to exit the Output Browser screen to return to the “Select Health Summary Menu Option” prompt.
- Type a plus sign (+) to display the next screen. This option is not available for the last screen.
- Type a minus sign (–) to display the previous screen. This option is not available for the first screen.

7.2 Update PWH Site Parameters(DEF)

Use the DEF option to set the default PWH for a site. Follow these steps:

1. At the “Select Patient Wellness Handout Menu Option” prompt, type DEF.
2. At the “Select PCC MASTER CONTROL SITE” prompt, type the location of the site.
3. At the “DEFAULT PAT WELLNESS HANDOUT” prompt, type the name of the default handout.
4. At the “Smoking Cessation Program Phone Number” prompt, type the phone number of the Smoking Cessation Program. This prompt applies to facilities having a Smoking Cessation Program. This phone number will display on the Patient Wellness Handout in the Tobacco Quit component.
5. At the “Tobacco Quit Line Phone Number” prompt, type the phone number of the Tobacco Quit Line. This prompt applies to a facility or State that has a Tobacco Quit Line. This phone number will display on the Patient Wellness Handout in the Tobacco Quit component.

Asthma Triggers
No Triggers identified.

ASTHMA ACTION PLAN
Follow these steps to control your asthma.

********************************************************************
RED ZONE - Need Medical Help!!
You are coughing, short of breath, and wheezing.
You have trouble walking or talking.
Your rescue medicine doesn't work.

Ask someone to bring you to the Emergency Room, call 911, or call your doctor.

****
YELLOW ZONE - Asthma is Getting Worse
You are coughing or wheezing.
You are waking at night from your asthma.
You have some trouble doing usual activities.

Keep taking your green zone medications. Check your peak flow readings every few hours

Active Controller Medications
None documented; please discuss with your provider at your next clinic visit.

Active Reliever Medications
None documented; please discuss with your provider at your next clinic visit.

Figure 7-4: Example of printing the Asthma Action Plan (AAP)

Section Appendix C: provides information on the Asthma Supplement Logic.

7.4 Create/Modify Patient Wellness Type (MPWT)

Use the MPWT option to create a new or modify an existing Patient Wellness Handout type. Follow these steps:

1. At the “Select HEALTH SUMMARY PWH TYPE NAME” prompt, type the name of the summary type to view or print. The application verifies the users’ selection at the “NAME” prompt.

2. At the “LOCK” prompt, specify the lock used to create or modify the patient wellness type.

The application displays the wellness type specified. The ADULT REGULAR wellness type is shown in the following example.
DEMO HOSPITAL

PWH Generate a Patient Wellness Handout
DEF Update PWH Site Parameters
AAP Print Asthma Action Plan
MPWT Create/Modify Patient Wellness Type
TPWH Number of PWHs Given to Patients Report

Select Patient Wellness Handout Menu Option: MPWT Create/Modify Patient Wellness Type

This option will allow you to create a new or modify an existing Patient Wellness Handout type.

Select Action:+//

Figure 7-5: Example of modifying an existing PWH type

3. To quit the screen, type Q (Quit) at the “Select Action” prompt.

The MS, DH, and PH actions in Figure 7-5 are described in the following sections.
7.4.1 Modify Structure (MS)

Use the Modify Structure (MS) option to add a new component by entering a new order number and component name. To remove a component from this PWH type, specify the component by name or order and then type the at sign (@). If @ is used, the application confirms the deletion.

7.4.2 Display Handout (DH)

Use the DH action to display a handout for a specified patient.

1. At the “Select Action” prompt, type DH to display the handout.

2. At the “Select PATIENT NAME” prompt, type the name of the patient.

The following displays the prompts and information about the patient for the Display Handout option.
have that don't go away quickly.

R73.02 Impaired glucose tolerance
D64.9 Anemia

RECENT LAB RESULTS
You recently had some lab work done. Be sure to talk with your health care provider about these results and ask what they mean. Your healthcare provider will answer any questions that you may have.

MEDICATIONS - This is a list of medications and other items you are taking including non-prescription medications, herbal, dietary, and traditional supplements. Please let us know if this list is not complete. If you have other medications at home or are not sure if you should be taking them, call your health care provider to be safe.

No medications are on file. Please tell us if there are any that we missed.

3 Immunizations Due:
**CHOLESTEROL**
Controlling your cholesterol can keep your heart and blood vessels healthy.

Your total cholesterol result was 150 mg/dL on Dec 08, 2014.
Your last LDL (bad cholesterol) result was 40 on Dec 08, 2014.
Your last HDL (good cholesterol) result was 40 on Dec 08, 2014.
Your last triglyceride result was 150 on Dec 08, 2014.

**PAP SMEAR**
No Pap Smear on file. We recommend that you get a Pap Smear every 3 years.
Ask your health care provider to order a Pap Smear for you.

**BLOOD PRESSURE** - Blood Pressure is a good measure of health.

Your blood pressure was 131/85 on Aug 27, 2011.
You should have your blood pressure checked every year or more often.
Ask your provider to check your blood pressure at your next visit.

**DIABETES SCREENING**
It is important to have your blood sugar checked every two years. We recommend that you get it checked more often if you have to urinate often, always feel hungry, or are always thirsty.
Your last blood sugar was on Jan 17, 2015.

**PROCEDURES**
Procedures are things that you have done to improve your health. Some examples of a procedure are any kind of surgery or putting a cast on a broken leg. If you think you have had a procedure or surgery that is not on this list, please tell your health care provider.

| PROCEDURE | DATE
|-----------|------
| APPLICATION OF LONG LEG CAST | Nov 09, 2014

Figure 7-6: Using the DH option

The following options can be used at the “Select Action: +/-” prompt:

- Type **Q** (Quit) to exit the screen.
- Type a plus sign (+) to display the next screen. This option is not available for the last screen.
- Type a minus sign (−) to display the previous screen. This option is not available for the first screen.
7.4.3 Print Handout (PH)

Use the PH action to print the handout for a specified patient. Follow these steps:

1. At the “Select patient” prompt, type the name patient to use for the handout.

2. At the “Select one of the following” prompt, type either P (print output) or B (browse output on screen).

The report will output.

a. When using the Print Output option and at the “Enter RETURN to continue or ‘^’ to exit” prompt, you can:
   - Press Enter to continue with the next page of the report.
   - Type a caret (^) to exit the report and to return to the “Select Action” prompt.

b. When using the Browse option and at the “Select Action: +/-?” prompt:
   - Type Q (Quit) to exit the screen.
   - Type a plus sign (+) to display the next screen. This option is not available for the last screen.
   - Type a minus sign (–) to display the previous screen. This option is not available for the first screen.

7.5 Number of PWHs Given to Patients Report (TPWH)

The TPWH option produces a report that tallies the number of PWHs given to patients. The tally can be based on handout type, location, date the handout was generated, and user/provider that generated the handout. Optionally, a list of patients receiving the handout can be produced. Follow these steps:

1. At the “Enter beginning Date of Patient Wellness Handout” prompt, type the beginning date of the date range.

2. At the “Enter ending Date of Patient Wellness Handout” prompt, type the ending date of the date range.

3. At the “Do you wish to run the report for a particular patient handout?” prompt, type Y (Yes) or N (No). If Y (Yes) was typed, the “Enter Patient Wellness Type” prompt will display.

4. At the “Do you wish to run the report for a particular location?” prompt, type Y (Yes) or N (No). If the user typed Y, the “Enter Location” prompt will display.
5. At the “Do you wish to run the report for a particular provider/user?” prompt, type Y (Yes) or N (No). If the user typed Y, the “Enter Provider” prompt will display.

6. At the “Do you want a list of patients” prompt, type Y (Yes) or N (No).

If No is used, at the “Demo Patient Inclusion Exclusion” prompt, type one of the following:

- I (include all patients)
- E (exclude DEMO patients)
- O (include ONLY DEMO patients)

7. At the “Do you wish to” prompt, type P (print output) or B (browse output on screen).

The application displays the Patient Wellness Handout Tally report.

This report will tally the number of Patient Wellness Handouts given to patients. The user will be able to tally based on handout type, location date the handout was generated and user/provider who generated the handout. Optionally, the user can produce a list of patients receiving the handout.

Enter beginning Date of Patient Wellness Handout: T-200 (JUL 10, 2009)

Enter ending date of Patient Wellness Handout: T (JAN 26, 2010)

Do you wish to run the report for a particular patient handout? N// YES

Enter Patient Wellness Type: ADULT REGULAR

Figure 7-7: Example of prompts for and output of the Number of PWHs Given to Patients Report (TPWH)

The following options are available on the Output Browser screen:

- Type Q (Quit) to exit the Output Browser screen and return to the “Select Health Summary Menu Option” prompt.
- Type a plus sign (+) to display the next screen. This option is not available for the last screen.
- Type a minus sign (−) to display the previous screen. This option is not available for the first screen.
8.0 Health Maintenance Reminders

Note: Health Maintenance Reminders which look at ICD codes have been updated to look at ICD 9 codes before the ICD 10 implementation date, and ICD codes (contained in taxonomies) after the ICD10 implementation date.

The PCC Health Maintenance Reminder (HMR) system is designed to assist healthcare providers with addressing preventive and early detection healthcare measures. The system monitors a set of procedures (such as tuberculin skin tests, examinations, and laboratory tests) that should be performed for each member of a population at various stages of life. The recommended timing for these procedures is a function of the patient’s age and sex. These standards were developed by IHS senior clinicians and field health groups throughout the IHS organization.

The general criteria used for inclusion of items in the HMR system are as follows:

- Screening is for problems that are prevalent and medically significant among all or certain groups of American Indians and Alaska Natives (AI/ANs).
- The screening tests are considered to be effective.
- If a problem is detected, treatment can be provided.
- The tests can be accomplished by the IHS at current staffing levels without adversely affecting other patient needs, services, or programs at the facility level.
- For children, the system generally follows the recommendations of the American Academy of Pediatrics.

The criteria for the PCC HMR system have been adopted for service-wide use by the IHS. For an individual patient at a given visit, the HMR procedures should be viewed as recommendations or suggestions to providers of care, not as directives. Often a patient’s condition will negate performing certain health maintenance tests or examinations. Certain procedures may not be considered appropriate for a specific population group. These items can be removed from the system at the direction of the Area Office. The procedures suggested by the HMR system should in no way constrain healthcare providers from performing additional tests that are warranted.

Because patients rarely receive certain types of services exactly when they are due, the PCC system attempts to reasonably apply these standards. For instance, the IHS recommends that children have a urinalysis at age five. This does not mean that the Health Summary will prompt the provider for a urinalysis at age five if this patient had a urinalysis at age 4 years 11 months. The prompt will appear when the child turns five if there is no record of a urinalysis in the database. The lack of this record in the database does not necessarily mean that the child never had a urinalysis, only that the result was never entered into the system. The prompt will also appear if the child’s last urinalysis occurred before age three.
The Health Maintenance Reminder menu can be accessed by typing **HM** and pressing Enter at the “Select Health Summary Maintenance Option” prompt on the Health Summary Maintenance menu.

Below are the options on the Health Maintenance Reminder menu.

```

Enter ?? for more actions
S Select Item   A Display All Items   Q Quit
```
Figure 8-2: Options in the Health Reminder Display menu

Type **Q** (Quit) to return to the “Select Health Maintenance Reminders Option” prompt. Otherwise, use the other actions to continue.

2. At the “Select Action” prompt, type **S** (Select Item) to select an item on the list or type **A** (Display All Items).

   a. If **S** is typed, the application displays the “Which item(s)” prompt. Type the items (1 – 39) to use. The logic will display on the Output Browser screen.

   b. If **A** is typed, all of the reminders descriptions and logic will display on the Output Browser screen.

The Output Browser screen displays, showing information about the selected item. Figure 8-3 is an example of the Newborn Hearing Screen.
The following is available at the “Select Action” prompt:

- Type Q (Quit) to exit the Output Browser screen to return to the “Select Health Maintenance Reminders Option” prompt.
- Type a plus sign (+) to display the next screen. This option is not available for the last screen.
- Type a minus sign (-) to display the previous screen. This option is not available for the first screen.

8.2 Activate/Inactivate a Health Maintenance Reminder (AI)

The AI option can inactivate or activate a specified HMR. If an HMR is active, it can be added to a Health Summary and, if its conditions are met, the appropriate reminder will display in the Health Summary. Follow these steps:

1. At the “Select Health Maintenance Reminders Option” prompt, type AI.
2. At the “Select Health Reminder to Activate/Inactivate” prompt type the name of the reminder that will change status.

Below is an example of prompts for the Dental Exam Reminder.

![Figure 8-3: Example description of the selected HMR](image)

![Figure 8-4: Example of Dental Exam Reminder Status set to inactive.](image)
3. At the “STATUS” prompt, press Enter to accept the default value of INACTIVE (OFF) or type A (Active) to change the default value.

8.3 List Health Maintenance Reminders by Status (LHMR)

Use the LHMR option to list the health maintenance reminders available for display on a health summary. Follow these steps:

1. At the “List which set of Reminders” prompt, type one of the following: A (active reminders), I (inactive reminders), or B (both active and inactive reminders).

2. At the “How would you like the list sorted” prompt, type one of the following: C (by category), N (by name), or S (by status). Type S to display the following fields: Reminder Title, Category, and Summary Types.

3. At the “Do you wish to” prompt, type either P (print output) or B (browse output on screen) to display the reminders by status report.

8.4 Add/Modify Locally Defined HM Reminder Criteria (LS)

Use the LS option to add or modify specified locally defined reminder criteria (sex, age ranges, and frequencies for the health reminder). Follow these steps:

1. At the “Select Health Maintenance Reminders Option” prompt, type LS.

2. At the “Select HEALTH REMINDER to Modify” prompt, type the name of the health reminder to add or modify.

The application displays information about the reminder on the APCH MODIFY HMR screen.

Figure 8-6: Example of adding/modifying locally-defined criteria (LS)
Type **Q** (Quit) to quit the APCH MODIFY HMR screen and return to the “Select Health Maintenance Reminders Option” prompt.

The user can add a new sex, age range, frequency combination, or edit an existing reminder.

The responses to the following prompts are required. At any prompt the user can type a caret (^) to exit.

1. At the “Select Action” prompt, type **M** (Modify).
2. At the “Do you wish to” prompt, type one of the following: **A** (add a new one), **D** (delete one of the above), or **Q** (quit).
3. At the “Do you wish to ADD some?” prompt, type **Y** (Yes) to add information.
4. At the “Select one of the following” prompt, type of the following: **F** (Female), **M** (Male), or **B** (Both).
5. At the “Enter MINIMUM Age” prompt, type the minimum age in the age range. It must be typed in the following format: 1Y, 2M, 30D, 10Y, where Y = years, M = months and D = Days.
6. At the “Enter MAXIMUM age” prompt, type the maximum age in the age range. It must be typed in the following format: 1Y, 2M, 30D, 10Y, where Y = years, M = months and D = Days.
7. At the “Enter FREQUENCY” prompt, type the frequency in the form: 2Y for every 2 years, 3M for every 3 months, etc. (The prompt varies according to what was typed at the “Select one of the following” prompt).

The application verifies that the various parameters used in data entry.

The following is an example of the report for the LS option.

8.5 Print Health Maintenance Item Protocols (PR)

The PR option displays or prints the description/logic of all Health Summary maintenance reminders. Follow these steps:

1. At the “Select Health Maintenance Reminders Option” prompt, type LS.

2. At the “Select one of the following” prompt, type either: P (print output) or B (browse output on screen).

The application displays the OUTPUT BROWSER screen. The following is just part of the output.
1. Born in 1957 or later who are at least 18; OR
2. Females who were born in 1957 or earlier AND are currently less than age 50 years (NOTE: no longer applicable)

Definition (Frequency): One dose only after age 12 months

LOGIC DETAIL:
MMR:
- Immunizations/CVX Codes or Refusal: V Immunization 3; 94
- IZ Diagnosis (ICD Codes): [BGP MMR IZ DXS]
- Procedures (ICD Codes): [BGP MMR IZ PROCS]
- Procedures (CPT Codes): V CPT 90707; 90710

Site Configurable? Yes: sex, age range and frequencies

********************************************************************************
Reminder: ADULT MMR 2-DOSE VERSION
Category: IMMUNIZATIONS
Description:
Default Status: Off
Denominator: Patients with no documented MMR since age 1 year:
1. Born in 1957 or later who are at least 18; OR
2. Females who were born in 1957 or earlier AND are currently less than age 50 years (NOTE: no longer applicable)

Definition (Frequency): Two doses total. First dose given after age 12 months, and second dose given at least one month after the first.

LOGIC DETAIL:
MMR:
- Immunizations/CVX Codes or Refusal: V Immunization 3; 94
- IZ Diagnosis (ICD Codes): [BGP MMR IZ DXS]
- Procedures (ICD Codes): [BGP MMR IZ PROCS]
- Procedures (CPT Codes): V CPT 90707; 90710

Site Configurable? Yes: sex, age range and frequencies

********************************************************************************
Reminder: ALCOHOL USE SCREENING
Category: BEHAVIORAL HEALTH
Description:
Default Status: On
Denominator: All patients starting at age 13 years with no documented Alcohol Use Screening.
Definition (Frequency): Annually

LOGIC DETAIL:
Alcohol Use Screening Definition:
- V Exam 35 or Behavioral Health Module Alcohol Screening
- Measurements: V Measurement (PCC and BH) AUDC, AUDT, CRFT
- Health Factor with Alcohol/Drug Category (CAGE)
- ICD Codes: [BGP SCREEN FOR ALCOHOLISM DX]
- Behavioral Health Module Diagnosis (POV) 29.1
- Patient Education Topics: V PATIENT ED or Behavioral Health Module AOD-SCR or CD-SCR

NOTE: Alcohol diagnoses (ICD Codes) do NOT meet this reminder.
Reminder: ANMC DEPRESSION SCREEN SCORE
Category: BEHAVIORAL HEALTH

Description:
Every 4 weeks for patients whose last score is positive (>=10).
Every year for patients whose last score is negative (<10).
Does not display for any patient who has never had a score recorded.

***This reminder is in use at ANMC only.

Reminder: ASSESSMENT OF FUNCTION
Category: ELDER

Description:
Default Status: Off
Denominator: All patients starting at age 55 years
Definition (Frequency): Annually

LOGIC DETAIL: Any non-null values in V Elder Care for:
At least one of the following ADL fields: toileting; bathing; dressing;
transfers; feeding or continence
AND
At least one of the following IADL fields: finances; cooking; shopping;
housework/chores; medications or transportation.

Figure 8-8: Example the Output Browser screen for printing health maintenance item protocols (PR)

The following actions are available at the “Select Action” prompt:

- Type Q (Quit) to exit the Output Browser screen to return to the “Select Health Maintenance Reminders Option” prompt.
- Type a plus sign (+) to display the next screen. This option is not available for the last screen.
- Type a minus sign (-) to display the previous screen. This option is not available for the first screen.

Figure 9-3: Example Best Practice Display screen

To quit the current screen, type Q (Quit) at the “Select Action” prompt.

The following describes the other actions that for the Best Practice Display screen.

9.1.1 Display One (S)

Use the S action to display information (treatment prompt name, status, description, and criteria) about a specified Best Practice item.

1. At the “Select Action” prompt, type S (Display One).

2. At the “Which item(s)” prompt, type the number of the item to display.

The following shows an example of the Anticoagulation: Safety Measure: CBC best practice prompt information that display in the Output Browser screen:

```
BEST PRACTICE PROMPTS DESCRIPTIONS

Best Practice Prompt: ASTHMA: CONTROL CLASSIFICATION
Status: ACTIVE (ON)

Description: Denominator: Patients with asthma who do not have asthma Control
```
documented in the past year. Asthma defined as:
1. any Asthma Severity ever of 2, 3 or 4; OR
2. iCare active Asthma tag; OR
3. at least 3 instances of asthma primary diagnosis in the past 6 months
[BGP ASTHMA DXS].

Definition (Frequency): Annually.

LOGIC DETAIL:
Asthma Diagnosis:
- Diagnosis (ICD Codes) (not on same day, Primary dx only, and Service Category A or H only): V POV (BGP ASTHMA DXS taxonomy)
- Asthma Severity (Problem List Classification: category Asthma: 2-mild persistent, 3-moderate persistent, 4-severe persistent
- Active Asthma tag (iCare): Status Proposed or Accepted

Asthma Control:
- V Asthma Control, any value

Best Practice Prompt Text:
Asthma control should be assessed at each patient visit. This patient has not been assessed for asthma control in the past year. Please consider classifying the control of this patient's asthma. Classifications are either (1) well controlled, (2) not well controlled, and (3) very poorly controlled.

Site Configurable? No.

Best Practice Prompt Text:
Asthma control should be assessed at each patient visit. This patient has not been assessed for asthma control in the past year. Please consider classifying the control of this patient's asthma. Classifications are either (1) well controlled, (2) not well controlled, and (3) very poorly controlled.

Currently Defined Criteria in Use at this Facility:
<<< No Local Criteria defined >>>

Currently defined on the following summary types:

********************************************************************************
Enter ?? for more actions                                          >>>

Figure 9-4: Example of the “Asthma Control Class” information display

The following options are available at the “Select Action” prompt.

- Type Q (Quit) option to exit the window.
- Type a plus sign (+) to display the next screen. This option is not available for the last screen.
- Type a minus sign (-) to display the previous screen. This option is not available for the first screen
The following shows the information for Anticoagulation: Duration of Anticoagulation Therapy.

Best Practice Prompt: ANTICOAGULATION: DURATION OF ANTICOAG THERAPY
Status: ACTIVE (ON)

Description:
Duration of Anticoagulation Therapy:
It is recommended that patients who are on anti-coagulation therapy have a Duration of Anticoagulation Therapy established for them by their provider. The options include: 3 months; 6 months; 12 months or indefinitely. This can be reassessed periodically based on the patient's need for continuing therapy. Re-establishing the Duration of Anticoagulation Therapy initiates a re-calculation of the Anticoagulation Therapy End Date.

This best practice prompt will only be displayed if the patient is on Warfarin and meets the above criteria for the prompt to display. The definition of "on Warfarin" is that the patient had a Warfarin medication dispensed in the past 120 days and the last one dispensed was not discontinued.

Best Practice Prompt Text:
No Duration of Anticoagulation Therapy: This patient is on Warfarin and a Duration of Anticoagulation Therapy is not documented.

Currently Defined Criteria in Use at this Facility:
<<< No Local Criteria defined >>>

Currently defined on the following summary types:

*******************************************************************************
Enter ?? for more actions                          
+    NEXT SCREEN          -    PREVIOUS SCREEN      Q    QUIT
Select Action: +//

Figure 9-5: Example display of the Anticoagulation: Duration of Anticoagulation Therapy display information

Section Appendix H: provides information about the Anticoagulation Supplement Logic.

9.1.2 Display All (A)
Use the A action to display the descriptions for all Best Practice prompts.

Below is a sample of the first page of the output.
Best Practice Prompt: ANTICOAGULATION: ANTICOAGULATION THERAPY END DATE
Status: ACTIVE (ON)

Anticoagulation Therapy End Date:
The Anticoagulation Therapy End Date is a calculation based on the established Duration of Anticoagulation Therapy and Anticoagulation Therapy Start date. When today's date is within 45 days of this calculated date, the user will be prompted to consider reassessment of the need for continued therapy. Extending the Duration of Anticoagulation Therapy will result in a re-calculation of the Anticoagulation Therapy End Date.

This best practice prompt will only be displayed if the patient is on Warfarin and meets the above criteria for the prompt to display. The definition of "on Warfarin" is that the patient had a Warfarin medication dispensed in the past 120 days and the last one dispensed was not discontinued.

The following are available at the “Select Action” prompt.

- Type Q (Quit) to exit the window.
- Type a plus sign (+) to display the next screen. This option is not available for the last screen.
- Type a minus sign (-) to display the previous screen. This option is not available for the first screen

9.2 Activate/Inactivate a Best Practice Prompt (AI)

Use the AI option allows a site to inactivate or activate a Best Practice prompt.

If a Best Practice prompt is active, it can be added to a Health Summary and, if its conditions are met, the appropriate prompt will display in the Health Summary.

To activate or inactivate a treatment prompt, follow these steps:

1. At the “Select Best Practice Menu Option” prompt, type AI.
2. At the “Select Best Practice Prompt to Activate/Inactivate” prompt, type the name of the treatment prompt whose status the user wants to change.
3. The application displays the description and logic for the selected Best Practice prompt.
Best Practice Prompt: ASTHMA: ACTION PLAN
Status: ACTIVE (ON)

Description:
Default Status: On
Denominator: Patients with asthma who do not have a documented Action
(Management) Plan in the past year. Asthma defined as:
1. any Asthma Severity ever of 2, 3 or 4; OR
2. iCare active Asthma tag; OR
3. at least 3 instances of asthma primary diagnosis in the past 6 months.
4. last documented asthma control status "not well controlled" or "very poorly controlled"; OR
5. history of asthma exacerbation in the past year; OR
6) at least one ER or Urgent Care visit in the past year with a primary diagnosis of asthma.

Definition (Frequency): Annually

LOGIC DETAIL:
Asthma Diagnosis:
- Diagnosis (ICD Codes) (not on same day, Primary dx only, and Service Category A(mbulatory) or H(ospitalization) only): V POV (BGP ASTHMA DXS taxonomy)
- Asthma Severity (Problem List Classification: category Asthma: 2-mild persistent, 3-moderate persistent, 4-severe persistent
- Active Asthma tag (iCare): Status Proposed or Accepted
- Control status: V Asthma Control values "not well controlled" or "very poorly controlled"

Asthma Exacerbation:
- Diagnosis (ICD Codes) (Service Category A(mbulatory) or H(ospitalization) only: DX: [APCH ASTHMA EXACERBATION DXS]

Emergency Room (ER) visit - Clinic code 30
Urgent Care visit - Clinic code 80

Best Practice Prompt Text:
The asthma guidelines recommend providing the patient with an asthma action plan because they have [asthma criteria]. The asthma action plan provides information on daily management and early recognition of and actions for handling exacerbations. It should contain a list of medications for controlling asthma and actions to take when asthma worsens. Document asthma action plan in patient education with (ASM-SMP Self Management Plan).

Site Configurable? No.

Best Practice Prompt Text:
The asthma guidelines recommend providing the patient with an asthma action plan because they have |ASAP1|. The asthma action plan provides information on daily management and early recognition of and actions for handling exacerbations. It should contain a list of medications for controlling asthma and actions to take when asthma worsens. Document asthma action plan in patient education with (ASM-SMP Self Management Plan).

Currently Defined Criteria in Use at this Facility
<<< No local criteria defined. >>>

Figure 9-7: Example output for activating or inactivating a selected Best Practice prompt
4. At the “Status: Active (ON)” prompt either press Enter to accept the default value (ON) or type A I to use the Active/Inactive option.

9.3 Add/Edit Locally Defined Best Practice Criteria (LS)

Use the LS option to allow a site to specify sex, age ranges, and frequencies for a health maintenance reminder.

Follow these steps:
1. At the “Select Best Practice Menu Option” prompt, type LS.
2. At the “Select Best Practice Prompt to Modify” prompt, type the name of the treatment prompt to modify.

The Modify TP Criteria screen displays.

---

Figure 9-8: Example of adding/editing locally defined best practice criteria
3. Type **Q** (Quit) to quit the Modify TP Criteria screen and return to the “Select Action” prompt on the Best Practice Display screen.

4. Type **M** (Modify Criteria) to modify criteria such as sex, age range, frequency combination or edit and existing one for the HEARING INQUIRY reminder at the “Select Action” prompt.

5. The application will display a message asking if the user if wants to add information. Type **N** (No) to leave the modify criteria process or type **Y** (Yes) to continue.

The responses to the following prompts are required otherwise, at a prompt, type a caret (^) to exit.

6. At the “Select one of the following” prompt, type one the following: **F** (female), **M** (male), **U** (unknown), or **B** (both).

7. At the “Enter MINIMUM Age” prompt, type the minimum age in the age range in the following format: 1Y, 2M, 30D, 10Y, where Y = years, M = months, and D = days.

8. At the “Enter MAXIMUM Age” prompt, type the maximum age in the age range in the following format: 1Y, 2M, 30D, 10Y, where Y = years, M = months, and D = days.

9. At the “Enter FREQUENCY” prompt, type the frequency in the following format: 2Y for every 2 years, 3M for every 3 months, etc. The prompt varies according to the response at the “Select one of the following” prompt.

The application verifies that the entered criteria is correct.

Below shows an example of the prompts that follow:

---

**The following will be added:**

- BOTH GENDERS, ages 45 years to 88 years reminder due every 2 years
  Everything okay? Do you wish to continue and add it? Y// n NO

You may add a new sex, age range, frequency combination or edit and existing one for the HEARING INQUIRY reminder.

No local criteria currently defined.
Do you wish to ADD some? Y//

---

**Figure 9-9: Example of the prompts that confirm the changes to the best practice criteria**

---

**Below is the Modify Best Practice Prompt Criteria.**
Best Practice Prompt Text:
Patient is over 64 years old. Consider inquiring about hearing
difficulties at least every 2 years.

Currently Defined Criteria in Use at this Facility
Sex: ALL GENDERS Minimum Age: 25Y Maximum Age: 65Y Frequency: 2Y

Currently defined on the following summary types:

A.1 Adult MMR 1-Dose Version

Description Field Text

Default Status: Off

Denominator: Patients with no documented MMR since age one year:

- Born in 1957 or later who are at least 18; or
- Females who were born in 1957 or earlier and are currently less than age 50 years

Note: No longer applicable

Definition (Frequency): One dose only after age 12 months

Logic Detail

MMR

- Immunizations/CVX Codes or Refusal: V Immunization 3; 94
- IZ Diagnosis (ICD Codes): [BGP MMR IZ DXS]
- Procedures (ICD Codes): [BGP MMR IZ PROCS]
- Procedures (CPT Codes): V CPT 90707; 90710

Site Configurable? Yes: Sex, age range and frequencies
Tooltip Text

An MMR Immunization (one dose) is due after age one; this adult (18+) patient born in 1957 or later has no documented MMR. Refer to the Glossary for detailed definitions.

A.2 Adult MMR 2-Dose Version

Description Field Text

Default Status: Off

Denominator: Patients with no documented MMR since age one year:

- Born in 1957 or later who are at least 18; or
- Females who were born in 1957 or earlier and are currently less than age 50 years

Note: No longer applicable

Definition (Frequency): Two doses total: First dose given after age 12 months, and second dose given at least one month after the first.

Logic Detail

MMR

- Immunizations/CVX Codes or Refusal: V Immunization 3; 94
- IZ Diagnosis (ICD Codes): [BGP MMR IZ DXS]
- Procedures (ICD Codes): [BGP MMR IZ PROCS]
- Procedures (CPT Codes): V CPT 90707; 90710

Site Configurable? Yes: Sex, age range and frequencies

Tooltip Text

An MMR Immunization (two dose series) is due after age one; this adult (18+) patient born in 1957 or later has no documented two-dose MMR series.

A.3 Alcohol Use Screening

Description Field Text

Default Status: On

Denominator: All patients starting at age 13 years with no documented Alcohol Use Screening.
Definition (Frequency): Annually

Logic Detail

Alcohol Use Screening Definition

- V Exam 35 or Behavioral Health Module Alcohol Screening
- Measurements: V Measurement (PCC and BH) AUDC, AUDT, CRFT
- Health Factor with Alcohol/Drug Category (CAGE)
- ICD Codes: [BGP SCREEN FOR ALCOHOLISM DX]
- Behavioral Health Module Diagnosis (POV) 29.1
- Patient Education Topics: V PATIENT ED or Behavioral Health Module AOD-SCR or CD-SCR

Note: Alcohol diagnoses (ICD Codes) do not meet this reminder.

Site Configurable? Yes: Sex, age range and frequencies

Tooltip Text

Alcohol Use Screening is due annually for all patients starting at age 13 years. Refer to the Glossary for detailed definitions.

A.4 Assessment of Function Screen

Description Field Text

Default Status: Off

Denominator: All patients starting at age 55 years

Definition (Frequency): Annually

Logic Detail

Any non-null values in V Elder Care for:

- At least one of the following ADL fields: toileting; bathing; dressing; transfers; feeding or continence and
- At least one of the following IADL fields: finances; cooking; shopping; housework/chores; medications or transportation.

Site Configurable? Yes: Sex, age range and frequencies

Tooltip Text

A functional screening is due annually for all patients starting at age 55 years.
A.5 Blood Pressure

Description Field Text

Default Status: On

Denominator: All patients starting at age three years without a history of Hypertension on the Problem List

Definition (Frequency)

- Every two years for patients starting at age three years through 20 years.
- Annually for patients age 21 years and older and last diastolic BP value from 85 through 89.
- At next visit for patients age 21 years and older and last diastolic BP was greater than 139 and/or diastolic BP was greater than 89

Logic Detail

Blood Pressure: V Measurements

Hypertension

- Diagnosis (ICD Codes): Problem List [SURVEILLANCE HYPERTENSION taxonomy]

Site Configurable? Yes: Sex, age range and frequencies

Tooltip Text

A BP is due for all patients without hypertension (1) every two years for ages 3 through 20; (2) annually starting at age 21 if the last diastolic BP is between 85 and 89; or (3) at next visit starting at age 21, if the last systolic BP was greater than 139 and/or diastolic BP was greater than 89.

A.6 Breast Exam

Description Field Text

Default Status: Off

Denominator: All female patients starting at age 20 years

Definition (Frequency): Annually

Logic Detail

Breast Exam

- Exam Codes: V Exam 06 Breast Exam
• Diagnosis (ICD Codes): V POV [APCH BREAST EXAM DXS]
• Procedures (ICD Codes): V Procedure [APCH BREAST EXAM PROCS]
• Procedures (CPT Codes): V CPT G0101

Site Configurable? Yes: Sex, age range and frequencies

Tooltip Text
A breast exam is due annually for all female patients beginning at age 20.

A.7 Chlamydia Screening

Description Field Text
Category: General

Status: Inactive (off)

Description: Female patients ages 16–25 with no documented Chlamydia diagnosis screened at least once for Chlamydia.

Refusals do not count toward screening.

Logic Detail
Chlamydia Trachomatis Screening

• Procedures (CPT Codes): V CPT 86631, 86632, 87110, 87270, 87320, 87490-87492, 87810 [BGP CHLAMYDIA CPTS]
• LOINC Codes: V Lab as predefined in [BGP CHLAMYDIA LOINC CODES]
• Site Defined Lab Tests: V Lab site-defined tests in [BGP CHLAMYDIA TESTS TAX]

Chlamydia Diagnosis:

• Diagnosis (ICD Codes): POV or Problem List [BKM CHLAMYDIA DXS]

Site Configurable: Ages and frequencies.

A.8 Cholesterol

Description Field Text
Default Status: On

Denominator: All male patients starting at age 35 years through age 64 years. All female patients starting at age 45 years through age 64 years.
**Definition (Frequency):** Every 5 years

**Logic Detail**

**Cholesterol Definition**

- Site defined Lab Tests: V Lab site defined tests in DM AUDIT CHOLESTEROL TAX
- LOINC codes: V Lab as predefined in BGP TOTAL CHOLESTEROL LOINC taxonomy
- Procedures (CPT Codes): V CPT 82465

**Site Configurable?** Yes: Sex, age range and frequencies

**Tooltip Text**

Cholesterol screening is due every five years for males aged 35–64 years and females aged 45–64 years.

**A.9 Colorectal Cancer Screen–FOBT**

**Description Field Text**

**Default Status:** On

**Denominator:** All patients starting at age 50–75 without a documented history of colorectal cancer on the problem list.

**Definition (Frequency):** Annually

**Logic Detail**

**Colorectal Cancer Diagnosis**

ICD Codes: Problem List only - [BGP COLORECTAL CANCER DXS taxonomy]

**Fecal Occult Blood Test (FOBT)**

- Site defined Lab Tests: V Lab site defined tests in BGP GPRA FOB TESTS taxonomy
- LOINC Codes: V Lab as predefined in BGP FOBT LOINC CODES taxonomy
- Procedures (CPTS): V CPT 82270; 82274; 89205 (old code); G0107 (old code); G0328; G0394; [BGP FOBT CPTS taxonomy]

**Site Configurable?** Yes: Sex, age range and frequencies
**Tooltip Text**

A Fecal Occult Blood Test (FOBT) is due annually for all patients starting at age 50 years. Exceptions apply; see the Glossary for detailed definitions.

**A.10 Colorectal Cancer Screen–Scope/X-ray**

**Description Field Text**

**Default Status:** Off

**Denominator:** All patients starting at age 50–75 years without a documented history of colorectal cancer on the problem list.

**Definition (Frequency):** Variable

- Flexible Sigmoidoscopy every 5 years
- Barium Enema every 10 years
- Colonoscopy every 10 years

**Logic Detail**

**Colorectal Cancer Diagnosis**

- ICD Codes: Problem List only - [BGP COLORECTAL CANCER DXS taxonomy]

**Flexible Sigmoidoscopy**

- ICD Codes: V Procedure [BGP SIG PROCS]
- CPT Codes: V CPT 45330-45345, G0104 [BGP SIG CPTS taxonomy]

**Colonoscopy**

- Procedures (ICD Codes): V Procedure (BGP COLO PROCS taxonomy)
- Procedures (CPT Codes): V CPT: 44388-44394; 44397; 45355; 45378-45387; 45391; 45392; 45325 (old); G0105; G0121 [BGP COLO CPTS taxonomy]

**Barium Enema**

- Procedures (CPT Codes): V Radiology or V CPT: 74280; G0106; G0120 [BGP BE CPTS taxonomy]

**Site Configurable?** Yes: Sex, age range and frequencies
 Tooltip Text

A colorectal cancer screen (scope/X-ray) is due every five to ten years (depending on type of screen) for all patients starting at age 50 years. Exceptions apply.

A.11 Dental Exam

Description Field Text

Default Status: Off

Denominator: All patients, all ages

Definition (Frequency): Annually

Logic Detail

Dental Exam

- V Dental ADA code 0000 or 0190
- V Exam or Refusal: 30 Dental Exam
- CHS visit with any ADA code

Site Configurable? Yes: Sex, age range and frequencies

Tooltip Text

A dental exam is due annually for all patients.

A.12 Depression Screen

Description Field Text

Default Status: On

Denominator: All patients, starting at age 18 years, without a documented mood disorder diagnosis in past year.

Definition (Frequency): Annually

Logic Detail

Depression Screening

- Exam: V Exam, or Refusal 36 Depression Screening, or Behavioral Health Module Depression Screening
- ICD Codes: V POV [BGP DEPRESSION SCRN DXS]
Patient Education Topics: V PATIENT ED or Behavioral Health Module DEP-SCR

Measurements: V Measurement PHQ2, PHQ9, PHQT

Behavioral Health Module Diagnosis (POV) 14.1

Mood Disorders

- ICD Codes: V POV or BH diagnosis [BGP MOOD DISORDERS taxonomy]
- BH Problem Codes: 14 or 15

Site Configurable? No

Tooltip Text
Depression screening is due annually for all patients starting at age 18 years.

A.13 Diabetes Screening

Description Field Text

Default Status: Off

Denominator: All patients starting at age 18 years without a documented diagnosis of diabetes on the problem list.

Definition (Frequency): Every three years

Logic Detail

Diabetes

- Diagnosis (ICD Codes): Problem List [DM SURVEILLANCE DIABETES taxonomy]

Blood Glucose Laboratory Test

- Site defined Lab Tests: V Lab site defined tests in DM AUDIT GLUCOSE TESTS TAX
- LOINC Codes: V Lab as predefined in APCH SCREENING GLUCOSE LOINC taxonomy

Site Configurable? Yes: Sex, age range and frequencies

Tooltip Text
Diabetes screening (blood glucose test) is due every three years for all patients starting at age 18 years who do not have a problem list diagnosis of diabetes.
A.14 Domestic Violence/IPV Screening

Description Field Text

Default Status: On

Denominator: Female patients starting at age 15.

Definition (Frequency): Annually

Logic Detail

Domestic Violence/IPV Screening

- Exam Codes: V Exam 34 or Behavioral Health Module IPV/DV Exam

Site Configurable? Yes: Sex, age range and frequencies

Tooltip Text

Domestic Violence/Intimate Partner Violence Screening (DV/IPV) is due annually for females starting at age 15 years.

A.15 EPSDT SCREENING

Description Field Text

Default Status: Off

Denominator: All patients starting on the date of birth through 20 years

Definition (Frequency): Total of five times at scheduled intervals:

- Birth through 12 months
- 1 through 4 years
- 5 through 11 years
- 12 through 17 years
- 18 through 20 years

Logic Detail

EPSDT Screening Definition

Procedures (CPT Codes): V CPT:

- Age less than 1 year: New Patient 99381; Established Patient 99391
- Age 1 through 4 years: New Patient 99382; Established Patient 99392
- Age 5 through 11 years: New Patient 99383; Established Patient 99393
• Age 12 through 17 years: New Patient 99384; Established Patient 99394
• Age 18 through 20 years: New Patient 99385; Established Patient 99395

**Site Configurable?** Yes: Sex, age range and frequencies

**Tooltip Text**

An Early Periodic Screening and Diagnosis and Treatment (EPSDT) screening is due at regular intervals for all patients starting at birth through age 20 years.

### A.16 Fall Risk Assessment

**Description Field Text**

**Default Status:** On

**Denominator:** All patients starting at age 65 years.

**Definition (Frequency):** Annually

**Logic Detail**

**Fall Risk Assessment**

- Exam Codes: V Exam or Refusal 37 Fall Risk
- History of Falling Diagnosis (ICD Codes): V POV [BGP HISTORY OF FALL DXS]
- Abnormal Gait/Balance/Mobility Diagnosis (ICD Codes): [BGP ABNORMAL GAIT OR MOBILITY taxonomy]
- Fall-related Injury Diagnosis (Cause Codes #1-3) [BGP FALL RELATED E-CODES taxonomy]

**Site Configurable?** Yes: Sex, age range and frequencies

**Tooltip Text**

A fall risk assessment is due annually for all patients starting at age 65 years.

### A.17 HCT/HGB

**Description Field Text**

**Default Status:** On

**Denominator**

- All patients at age 12 months with no Hct/Hgb laboratory test documented during ages 9 through 12 months
• All patients at age four years with no Hct/Hgb laboratory test documented during ages three through four years

**Definition (Frequency):** Two times: Once at age 12 months and again at age four years. This reminder will continue to appear for patients through age 10 years, until the test is documented.

**Logic Detail**

**Hemoglobin/Hematocrit (HCT/HGB) test**

- Site defined Lab Tests: V Lab site defined tests in APCH HCT/HGB TESTS taxonomy
- LOINC Codes: V Lab as predefined in APCH HCT/HGB LOINC CODES taxonomy

**Site Configurable?** Yes: Sex, age range and frequencies

**Tooltip Text**

A hemoglobin/hematocrit is due for all patients at age 12 months and then again at age four years.

### A.18 Head Circumference

**Description Field Text**

**Default Status:** On

**Denominator:** All patients starting at date of birth through age three years.

**Definition (Frequency):** Seven times total in regular intervals: once each at birth; two months; four months; six months; 12 months; 18 months; and 24 months of age. The reminder will appear for patients through age three years, until the test is documented.

**Logic Detail**

**Head Circumference:** V Measurement HC

**Site Configurable?** Yes: Sex, age range and frequencies

**Tooltip Text**

A head circumference measurement is due at regular intervals for all patients starting at birth through 24 months.
A.19 Hearing Test

Description Field Text

Default Status: On

Denominator: All patients at age 4 with no documented hearing test from ages three to four years; does not count any hearing test before age three.

Definition (Frequency): One time. This reminder will continue to appear for patients through age seven years, until the test is documented.

Logic Detail

Hearing Test

- Exam Codes: V Exam 17-HEARING (Inactive), 23-AUDIOMETRIC (Inactive)
- 24-AUDIOMETRIC THRESHOLD (Inactive)
- Screening Diagnosis (ICD Codes): V POV [APCH HEARING EXAM DXS]
- Measurements: V Measurement HEARING or AUDIOMETRY
- Procedures (CPT Codes): [APCH HEARING SCREEN CPTS]
- Diagnoses: [APCH HEARING LOSS DXS]

Site Configurable? Yes: Sex, age range and frequencies

Tooltip Text

A hearing test is due for all patients at age four years.

A.20 Height

Description Field Text

Default Status: On

Denominator: All patients starting on the date of birth (DOB)

Definition (Frequency)

- Once each at birth; two months; four months; six months; 12 months; 18 months; and 24 months
- Annually starting at age three years through 17 years
- Once at or after age 18 years through 64 years
- Annually at ages older than 64 years
Logic Detail

Height: V Measurements Height

Site Configurable? Yes: Sex, age range and frequencies

Tooltip Text

A height is due routinely for all patients, depending on age: Annually for ages 3–17 and older than 64; once for ages 18–64; frequently for children less than 3 years.

A.21 HIV Screening

Description Field Text

Category: General

Status: Active (on)

Description: All patients ages 13–64 with no recorded HIV diagnosis ever should be screened at least once, not to include Refusals. This reminder will appear until an HIV screening is performed.

Logic Detail

HIV Screening:
- Procedures (CPT Codes): V CPT 86689, 86701-86703, 87390, 87391, 87534-87539 [BGP CPT HIV TESTS]
- LOINC Codes: V Lab as predefined in [BGP HIV TEST LOINC CODES]
- Site Defined Lab Tests: V Lab site-defined tests in [BGP HIV TEST TAX]

HIV Diagnosis:
- Diagnosis (ICD Codes): POV or Problem List [BGP HIV/AIDS DXS]

Site Configurable: Yes: Sex, age and frequencies.

A.22 Influenza

Description Field Text

Default Status: On

Denominator: Patients with no documented flu immunization this year

- Ages 65 years and older, or
• With a high risk diagnosis on the problem list, including pulmonary tuberculosis, pneumococcal septicemia, Human Immunodeficiency Virus (HIV)/acquired immunodeficiency syndrome (AIDS), cardiovascular syphilis, candidal endocarditis, myocarditis due to toxoplasmosis, malignant neoplasms, other immunity disorders, diseases of the blood, alcohol dependence, drug abuse, various rheumatic fevers, chronic rheumatic heart disease, hypertensive disease, heart disease, chronic obstructive pulmonary disease (COPD), asthma, lung and other respiratory diseases, liver diseases, nephritis and other urinary system diseases, arthropathies, inflammatory polyarthropathies, dorsoarthropathies, injury to spleen, transplanted organ complication, and chemotherapy.

Definition (Frequency): Annually between September 1st and April 1st

Logic Detail

Flu Shot

• Immunization/CVX Codes: V Immunization or Refusal 15, 16, 88, 111
• Diagnosis (ICD Codes): V POV V06.6; V04.8 (old code); V04.81 [BGP FLU IZ DXS taxonomy]
• Procedures (ICD Codes): V PROCEDURE 99.52 [BGP FLU IZ PROCEDURES taxonomy]
• Procedures (CPT Codes): V CPT 90655-90662; 90724 (old code); G0008; G8108 [BGP CPT FLU taxonomy]

High-Risk Diagnosis

• Diagnosis (ICD Codes): Problem List 011.00-011.96; 038.2; 042.0-044.9; 093.0-093.9; 112.81; 130.3; 140.0-208.91; 235.0-239.9; 240.0-279.9; 280.0-289.9; 303.00-303.93; 305.00-305.03; 331.7; 391.0-391.9; 393.-398.99; 401.0-405.91; 410.0-414.9; 415.0-417.9; 420.0-438.99; 440.1; 490.-496.; 500.-508.99; 510.0-519.9; 570.-572.8; 580.0-589.9; 590.00-599.9; 710.0-710.9; 714.0-714.9; 720.0-721.41; 759.0; 785.2-785.3; 865.00-865.19; 996.80-996.89; V08.; V42.0-V42.9; V58.1 [SURVEILLANCE PNEUMOCOCCAL RISK taxonomy]

Site Configurable? Yes: Sex, age range and frequencies

Tooltip Text

An influenza immunization is due annually for all patients ages 65 and older or those who are considered at risk.
A.23 LDL Screening for IHD Patients

Description Field Text

Default Status: Off

Denominator: All patients ages 18 or older with Ischemic Heart Disease (IHD) with no documented LDL within past year.

Definition (Frequency): One time.

This reminder will continue to appear until the screening is documented.

Logic Detail

IHD Defined as any Problem List Entry or a POV within the Past Year:
(BGP IHD DXS taxonomy).

LDL screening test is defined by the site-populated taxonomy DM AUDIT LDL CHOLESTEROL TAX.

If LDL test was documented as refused within the last 12 months, the prompt will display on the following line, “Pt refused LDL test on [***] date” and any accompanying provider note.

Tooltip Text

• May be due now; or
• Pt refused LDL test on [***date]

A.24 Mammogram

Description Field Text

Default Status: On

Denominator: All females starting at age 50 years through age 69 years.

Definition (Frequency): Annually

Logic Detail

The due date is derived by comparing any PCC data to any Women’s Health (WH) application. If a BREAST TX Need is documented in WH, the date is compared to the most recent PCC procedure (V Rad, V CPT, V POV or V Procedure), if any. If the WH due date is greater than the PCC date, use the WH date. If no WH procedure or procedure date exists, the due date is calculated from the most recent PCC procedure, if any. Otherwise the procedure is due now.
Mammogram

- Diagnosis (ICD Codes): [BGP MAMMOGRAM ICDS taxonomy]
- Procedures (CPT Codes): V Radiology or V CPT: 76083 (old code) 76090-76092,(old codes) G0206, G0204, G0202 [BGP CPT MAMMOGRAM taxonomy]
- Procedures (ICD Codes): V Procedures [BGP MAMMOGRAM PROCEDURES taxonomy]
- Women’s Health Procedure (BW): Screening Mammogram, Mammogram Dx Bilat, Mammogram Dx Unilat

Site Configurable? Yes: Age range and frequency (not sex)

Tooltip Text
A mammogram is due annually for females ages 50 through 69. Exceptions apply.

A.25 Newborn Hearing Screen

Description Field Text

Default Status: On

Denominator: All patients until age one with no documented hearing tests in both ears.

Definition (Frequency): One time. This reminder will continue to appear for patients through age one year until the tests are documented for both ears or age one is reached.

Logic Detail

- Newborn Hearing Screening–Exam: V Exam 38 Newborn Hearing Screen (Right) AND 39 Newborn Hearing Screen (Left); must have both exam codes documented.
- Diagnosis (ICD) Codes: V POV or Problem List: (APCH Hearing Loss DXS)
- Procedures (CPTs): V CPT 99431; 99435 (APCH Newbrn Hear Scrn CPTS) or 92551; 92552; 92553; 92587; 92555; 92556; 92557; 92579; 92582; 92583; 92585; 92586; 92590-92594; 92620-92621; 92630 (APCH Hearing Screen CPTS)
- Procedures (ICD): V POV (APCH Hearing Loss DXS)

Site Configurable? No
A.26 Osteoporosis Screening

Description Field Text

Default Status: Off

Denominator: All female patients ages 65 years and older without a documented history of osteoporosis.

Definition (Frequency): Once since turning 65.

This reminder will continue to appear until the screening is documented.

Logic Detail

Osteoporosis Screening Definitions:

• Procedures (CPT Codes): V CPT 76070-76076; 76977; 77078-77081; G0130 [BGP OSTEO SCREEN CPTS taxonomy]
• Procedures (ICD Codes): V Procedure [BGP OSTEOPOROSIS SCREEN PROCS]
• Diagnosis (ICD Codes): [BGP OSTEOPOROSIS DXS]

Site Configurable? Yes: Age and frequency

Tooltip Text

Osteoporosis screening should be done every two years for all female patients ages 65 years and older without a documented history of osteoporosis.

A.27 Pap Smear

Description Field Text

Default Status: On

Denominator: All females without a history of a hysterectomy starting at age 18 years; 18-29 Every 3 years; 30-64 Every 3 years; Or a Pap and High Risk HPV test every 5 years.

Definition (Frequency): Every three years

Logic Detail

Last pap smear from PCC is retrieved. The WH application is then checked. If there is a CX TX need documented, compare that to PCC. If the date is greater than the date displayed in PCC, use the date from the WH package as the “Last Done” date. If no date or unknown in WH, the due date is calculated from the most recent PCC procedure, if any. Otherwise, the procedure is due now.
Pap Smear

- Site defined Lab Tests: V Lab site defined tests in [BGP PAP SMEAR TAX taxonomy]
- LOINC Codes: V Lab as predefined in BGP PAP LOINC CODES taxonomy
- Procedures (ICD Codes): V Procedure [BGP PAP PROCEDURES taxonomy]
- Procedures (CPT Codes): V CPT 88141-88167; 88174-88175; G0101; G0123; G0124; G0141; G0143-G0145; G0147; G0148; P3000; P3001; Q0091 [BGP CPT PAP taxonomy]
- Women’s Health Procedures: PAP SMEAR

HPV Test

- V Lab BGP HPV TESTS taxonomy, BGP HPV LOINC CODES taxonomy
- Diagnoses: BGP HPV DXS taxonomy
- CPTs: BGP HPV CPTS taxonomy

Hysterectomy

- Procedures (ICD Codes): V Procedure [BGP HYSTERECTOMY PROCEDURE taxonomy]
- Procedures (CPT Codes): V CPT 51925; 56308 (old code); 58150; 58152; 58200-58294; 58458; 58550-58554; 58951; 58953-58954; 58956; 59135 [BGP HYSTERECTOMY CPTS taxonomy]

Site Configurable? Yes: Age range and frequency (not sex)

Tooltip Text

A pap smear is due every three years for females without a history of hysterectomy starting at age 18 years. For patients with a history of hysterectomy, a pap smear may be indicated based on clinical assessment.

A.28 PPD–Tuberculosis

Description Field Text

Default Status: On

Denominator

- All patients without a documented history or current diagnosis of tuberculosis at age four years with no documented PPD between ages three and four years.
• All patients without a documented history or current diagnosis of tuberculosis at age 11 years with no documented PPD between ages 9 and 11 years.

This reminder will continue to appear for patients through age 18, until the test is documented.

**Definition (Frequency):** Two times: Once at age four years and once at age 11 years

**Logic Detail**

**PPD:** V SKIN TEST: PPD

**Tuberculosis**

**Diagnosis (ICD Codes):** Problem List 010.00-018.96; 137.0-137.4; 795.5; V12.01 [SURVEILLANCE TUBERCULOSIS taxonomy]

**Health Factors:** V Health Factor any TB Treatment category

Site Configurable? Yes: Sex, age range and frequencies

**Tooltip Text**

A tuberculosis test (PPD) is due for all patients at age four years and then again at age 11 years. Exceptions apply.

**A.29 Pelvic Exam**

**Description Field Text**

**Default Status:** Off

**Denominator:** All female patients starting at age 18 years

**Definition (Frequency):** Annually

**Logic Detail**

**Pelvic Exam**

• Exam Codes: V Exam 15 Pelvic Exam

• Screening Diagnosis (ICD Codes): V POV APCH PELVIC EXAM DXS taxonomy

• Procedures (CPT Codes): V CPT G0101

Site Configurable? Yes: Sex, age range and frequencies
Tooltip Text
A pelvic exam is due annually for all female patients starting at age 18 years. Refer to Section 20.0 for detailed definitions.

A.30 Physical Exam

Description Field Text
Default Status: Off

Denominator: All patients starting at age 18 years

Definition (Frequency): Annually

Logic Detail
Physical Exam

• Exam Codes: V Exam Physical Exam 01 (Inactive)

• Diagnosis (ICD Codes): V POV [SURVEILLANCE PHYSICAL EXAM taxonomy]

• Procedures (CPT Codes): V CPT 99391-99397; G0344 [APCH GENERAL EXAM CPTS taxonomy]

Site Configurable? Yes: Sex, age range and frequencies

Tooltip Text
A physical exam is due annually for all patients starting at age 18 years.

A.31 Pneumovax

Description Field Text
Default Status: On

Denominator

• All patients ages 65 years and older with no documented pneumovax or only one documented five or more years ago; or

• All patients ages 5 years through 10 years and a high risk diagnosis on the problem list with no documented pneumovax ever or only one documented three or more years ago; or

• All patients’ ages 11 years through 64 years and a high risk diagnosis on the problem list with no documented pneumovax ever or only one documented five or more years ago.
**Definition (Frequency):** At least two, but not more than five years apart (three years for ages 5–10).

**Logic Detail**

**Pneumococcal Immunization**

- Immunization/CVX Codes: V Immunization or Refusal 33, 100, 109
- Procedures (ICD Codes): V POV [BGP PNEUMO IZ DXS taxonomy]
- Procedures (CPT Codes): V CPT 90669; 90732 [BGP PNEUMO IZ CPTS taxonomy]
- High risk diagnosis, including pulmonary tuberculosis, pneumococcal septicemia, HIV/AIDS, cardiovascular syphilis, candidal endocarditis, myocarditis due to toxoplasmosis, malignant neoplasms, other immunity disorders, diseases of the blood, alcohol dependence, drug abuse, various rheumatic fevers, chronic rheumatic heart disease, hypertensive disease, heart disease, COPD, asthma, lung and other respiratory diseases, liver diseases, nephritis and other urinary system diseases, arthropathies, inflammatory polyarthropathies, dorsopathies, injury to spleen, transplanted organ complication, chemotherapy
- Diagnosis (ICD Codes): Problem List [SURVEILLANCE PNEUMOCOCCAL RISK taxonomy]

**Site Configurable?** Yes: Sex, age range and frequencies

**Tooltip Text**

Two pneumovax are due at specific intervals for all patients ages 65 and older or those who are considered at risk.

### A.32 Rectal Exam

**Description Field Text**

**Default Status:** Off

**Denominator:** All patients starting at age 40 years

**Definition (Frequency):** Annually

**Logic Detail**

**Rectal Exam**

- V Exam: Rectal Exam 14 (currently Inactive)
- V POV: [APCH RECTAL EXAM DXS] taxonomy
• V Procedure: [APCH RECTAL EXAM PROCS] taxonomy
• V CPT: G0102; S0601; S0605

**Site Configurable?** Yes: Sex, age range and frequencies

**Tooltip Text**
A rectal exam is due annually for all patients starting at age 40 years.

### A.33 TD Adult

**Description Field Text**

**Default Status**: On

**Denominator**: All patients starting at age 12 years with no history of allergy to Tetanus Diphtheria Vaccine

**Definition (Frequency)**: Every 10 years

**Logic Detail**

- **Tetanus Diphtheria (TD)**
- Immunizations/CVX Codes: V Immunization 1, 9, 20, 22, 28, 35, 50, 106, 107, 110, 112, 113, 115
- Procedures (CPT Codes): V CPT 90700-90703; 90718; 90720-90723 [APCH TD CPTS taxonomy]

**Site Configurable?** Yes: Sex, age range and frequencies

**Tooltip Text**
A Tetanus-Diphtheria (TD) vaccine is due every ten years for all patients with no documented history of TD allergy starting at age 12 years.

### A.34 Tobacco Use Screening

**Description Field Text**

**Default Status**: On

**Denominator**: All patients starting at age 13 years

**Definition (Frequency)**: Annually

**LOGIC DETAIL**

Tobacco Screening
• Health Factors: V Health Factor in any category TOBACCO (SMOKING), TOBACCO (SMOKELESS – CHEWING/DIP), TOBACCO (EXPOSURE)

• Diagnoses (ICD Codes): V POV or Problem List [BGP GPRA SMOKING DXS taxonomy]

• V Dental: ADA 1320

• Procedures (CPT Codes): V CPT 1034F; 1035F; 1036F [BGP TOBACCO USE CPTS taxonomy] or 99406; 99407; G0375 (old code); G0376 (old code) [BGP TOBACCO SCREEN CPTS taxonomy]

**Site Configurable?** Yes: Sex, age range and frequencies

**Tooltip Text**

Tobacco use screening is due annually for all patients starting at age 13.

### A.35 Tonometry

**Description Field Text**

*Default Status*: Off

*Denominator*: All patients starting at age 40 years

*Definition (Frequency)*: Every three years for patients ages 40 years through 59 years; annually starting at age 60 years.

**Logic Detail**

*Tonometry Definition*

• Exam Codes: V exam 23 (Inactive)
• Measurements: V Measurement TON
• Procedures (ICD Codes): V Procedures [APCH TONOMETRY PROCS]
• Procedures (CPT Codes): V CPT S0620; S0621; 92100; 92120; 92499

**Site Configurable?** Yes: Sex, age range and frequencies

**Tooltip Text**

A tonometry test is due every three years for all patients starting at age 40 years through age 59 years, and then annually starting at age 60 years.

### A.36 Urinalysis

**Description Field Text**

*Default Status*: Off
**Denominator:** All patients at age five years with no documented test from ages three through five years.

**Definition (Frequency):** Once only

This reminder will continue to appear for patients through age 14 years, until the test is documented.

**Logic Detail**

**Urinalysis**

**Site-Defined Lab Tests:** V Lab site defined tests in DM AUDIT URINALYSIS TAX taxonomy

**LOINC Codes:** V Lab as predefined in DM AUDIT URINALYSIS LOINC taxonomy

**Site Configurable?** Yes: Sex, age range and frequencies

**Tooltip Text**

A urinalysis is due for all patients at age five years.

---

**A.37 Visual Acuity Exam**

**Description Field Text**

**Default Status:** On

**Denominator:** All patients starting at age 65 years

**Definition (Frequency):** Every two years

**Logic Detail**

**Visual Acuity Exam**

- Exam Codes: V Exam 19 Vision Exam (Inactive)
- Measurements: V Measurement VU VISION UNCORRECTED or VC VISION CORRECTED
- Procedures (ICD Codes): V Procedures 95.09; 95.05
- Procedures (CPT Codes): V CPT 99172; 99173
- Screening Diagnosis: V POV V72.0

**Site Configurable?** Yes: Sex, age range and frequencies
Tooltip Text
A visual acuity exam is due every two years for all patients starting at age 65 years.

A.38 Weight

Description Field Text
Default Status: On

Denominator: All patients starting on the date of birth

Definition (Frequency)
- Every visit for ages birth through five months
- Every two months for ages six through 11 months
- Every three months for ages 12 months through five years
- Every six months for ages six through 15 years
- Annually starting at age 16 years

Logic Detail
Weight: V-Measurements

Site Configurability: Yes: sex, age range and frequencies

Tooltip Text
A weight is due routinely for all patients, depending on age; annually for all patients ages 16 years and older; biannually for ages 6–15 years; more often for ages younger than six.
Appendix B: Best Practice Prompt Definitions

Below are the definitions for the best practice prompts.

B.1 Anticoagulation: Anticoagulation Therapy End Date

Description Field Text

**Default Status:** On

**Description:** The Anticoagulation Therapy End Date is a calculation based on the established Duration of Anticoagulation Therapy and Anticoagulation Therapy Start date. When today’s date is within 45 days of this calculated date, the user will be prompted to consider reassessment of the need for continued therapy. Extending the Duration of Anticoagulation Therapy will result in a recalculation of the Anticoagulation Therapy End Date.

This best practice prompt will only be displayed if the patient is on Warfarin and meets the above criteria for the prompt to display. The definition of “on Warfarin” is that the patient had a Warfarin medication dispensed in the past 120 days and the last one dispensed was not discontinued.

**Best Practice Prompt Text**

Anticoagulation Therapy End Date: This patient’s Anticoagulation therapy is scheduled to end on [ACENDDT]. Consider reassessing your patient’s continued need for Warfarin therapy.

B.2 Anticoagulation: Duration of Anticoagulation Therapy

Description Field Text

**Default Status:** On

**Description:** It is recommended that patients who are on anti-coagulation therapy have a Duration of Anticoagulation Therapy established for them by their provider. The options include: three months; six months; 12 months or indefinitely. This can be reassessed periodically based on the patient's need for continuing therapy. Reestablishing the Duration of Anticoagulation Therapy initiates a re-calculation of the Anticoagulation Therapy End Date.

This best practice prompt will only be displayed if the patient is on Warfarin and meets the above criteria for the prompt to display. The definition of “on Warfarin” is that the patient had a Warfarin medication dispensed in the past 120 days and the last one dispensed was not discontinued.
**Best Practice Prompt Text**

No Duration of Anticoagulation Therapy: This patient is on Warfarin and a Duration of Anticoagulation Therapy is not documented.

### B.3 Anticoagulation: INR Goal

**Description Field Text**

**Default Status:** On

**Description:** It is recommended that patients who are on anti-coagulation therapy have an INR Goal Range established for them by their provider. The options for these ranges include: 2.0–3.0 or 2.5–3.5 or Other. If Other is selected, providers will enter both minimum and maximum values for the range.

This best practice prompt will only be displayed if the patient is on Warfarin and meets the above criteria for the prompt to display. The definition of "on Warfarin" is that the patient had a Warfarin medication dispensed in the past 120 days and the last one dispensed was not discontinued.

**Best Practice Prompt Text**

No INR Goal: This patient is on Warfarin and has never had an INR Goal range documented.

### B.4 Anticoagulation: Safety Measure: CBC

**Best Practice Prompt Text**

**Default Status:** On

**Description:** Clinical Guidelines recommend that patients on Anticoagulation therapy have a CBC annually.

**Definition (Frequency):** Annually

**Logic Detail**

- A CBC is defined as CPT Codes: 85025-85027 [BGP CBC CPT]
- LOINC Codes contained in [BGP CBC LOINC]; [BGP CBC TESTS].

This best practice prompt will only be displayed if the patient is on Warfarin and meets the above criteria for the prompt to display. The definition of "on Warfarin" is that the patient had a Warfarin medication dispensed in the past 120 days and the last one dispensed was not discontinued.
**Best Practice Prompt Text**

No CBC: A Complete Blood Count (CBC) is recommended annually for patients on Warfarin. The last CBC was reported on |ACCBCDT|.

---

**B.5 Anticoagulation: Safety Measure: FOBT**

**Description Field Text**

**Default Status:** On

**Description:** It is recommended that patients on anti-coagulation therapy have an Fecal Occult Blood Test (FOBT) annually. Patients with no documented FOBT in the past year will be prompted to consider ordering this test.

**Definition (Frequency):** Annually

**Logic Detail**

FOBT or Fecal Immunochemical Test (FIT): CPT 82270, 82274, 89205 (old code), G0107 (old code), G0328, G0394 (old code); BGP FOBT LOINC CODES (LOINC taxonomy); or site-populated taxonomy BGP GPRA FOB TESTS

This best practice prompt will only be displayed if the patient is on Warfarin and meets the above criteria for the prompt to display. The definition of “on Warfarin” is that the patient had a Warfarin medication dispensed in the past 120 days and the last one dispensed was not discontinued.

---

**Best Practice Prompt Text**

No FOBT: A FOBT is recommended annually for patients on Warfarin. The last FOBT was reported on |ACFOBTDT|.

---

**B.6 Anticoagulation: Safety Measure: Urinalysis**

**Description Field Text**

**Default Status:** On

**Description:** Clinical Guidelines recommend that patients on Anticoagulation therapy have a urinalysis annually.

**Logic Detail**

A urinalysis is defined as LOINC Codes contained in [DM AUDIT URINALYSIS LOINC], [DM AUDIT URINALYSIS TAX] or [BJPC URINALYSIS CPT].
This best practice prompt will only be displayed if the patient is on Warfarin and meets the above criteria for the prompt to display. The definition of "on Warfarin" is that the patient had a Warfarin medication dispensed in the past 120 days and the last one dispensed was not discontinued.

**Best Practice Prompt Text**

No Urinalysis: A Urinalysis (UA) is recommended annually for patients on Warfarin. This patient’s last UA was reported on [ACURINDT].

**B.7 Asthma: Action Plan**

**Description Field Text**

**Default Status:** On

**Denominator:** Patients with asthma who do not have a documented Action (Management) Plan in the past year. Asthma is defined as:

- Any asthma severity ever of 2, 3, or 4; or
- iCare active asthma tag; or
- At least three instances of asthma primary diagnosis in the past six months
- Last documented asthma control status “not well controlled” or “very poorly controlled;” or
- History of asthma exacerbation in the past year; or
- At least one ER or Urgent Care visit in the past year with a primary diagnosis of asthma

**Definition (Frequency):** Annually

**Logic Detail**

**Asthma Diagnosis**

Diagnosis (ICD Codes) {not on same day, Primary dx only, and Service Category A (Ambulatory) or H (Hospitalization) only}: V POV (BGP ASTHMA DXS taxonomy)

- Asthma severity:
  - Problem list classification: Category Asthma: 2-mild persistent, 3-moderate persistent, 4-severe persistent
- Active asthma tag (iCare): Status Proposed or Accepted
- Control status: V Asthma Control values “not well controlled” or “very poorly controlled”

**Asthma Exacerbation**
• Diagnosis (ICD Codes) Service Category A (Ambulatory) or H (Hospitalization) only: DX: [APCH ASTHMA EXACERBATION DXS]
• Emergency Room (ER) visit: Clinic code 30
• Urgent Care visit: Clinic code 80

**Best Practice Prompt Text**

The asthma guidelines recommend providing the patient with an AAP because they have [asthma criteria]. The AAP provides information on daily management and early recognition of and actions for handling exacerbations. It should contain a list of medications for controlling asthma and actions to take when asthma worsens. Document AAP in patient education with (ASM-SMP Self-Management Plan).

*Site Configurable?*: No.

**Tooltip Text**

This patient has no action plan documented in the past year. Clinical guidelines recommend that patients with documented asthma diagnosis should have an action plan documented annually.

## B.8 Asthma: Add/Increase Inhaled Steroids

**Description Field Text**

**Default Status**: On

**Denominator**: Patients with asthma who do not have a prescription in the past six months for inhaled corticosteroids. Asthma is defined as:

- Any asthma severity ever of category 2, 3 or 4; *or*
- iCare active asthma tag; *or*
- At least three instances of asthma primary diagnosis in the past six months

**Definition (Frequency)**: As needed when no current prescription.

**Logic Detail**

**Asthma Diagnosis**

- Diagnosis (ICD Codes) (not on same day, Primary dx only, and Service Category A or H only): (BGP ASTHMA DXS taxonomy)
- Asthma Severity (Problem List Classification)
  - Category Asthma:
    - 2-Mild persistent, 3-Moderate persistent, 4-Severe persistent
• Active Asthma tag (iCare): Status Proposed or Accepted

**Inhaled Corticosteroids**

Site-Defined Medications: V Medications in BAT ASTHMA INHALED STEROIDS taxonomy

NDC (National Drug Codes): V Medications as predefined in BAT ASTHMA INHLD STEROIDS NDC taxonomy

**Best Practice Prompt Text**

If this patient has asthma, consider adding or increasing this patient’s inhaled corticosteroids.

**Site Configurable?**: No.

**Tooltip Text**

This patient has no documented current prescription for inhaled steroids. Clinical guidelines recommend that patients with documented asthma diagnosis should have a current prescription for inhaled corticosteroids.

**B.9 Asthma: Control Classification**

**Description Field Text**

**Denominator**: Patients with asthma who do not have asthma control documented in the past year. Asthma is defined as:

- Any asthma severity ever of category 2, 3, or 4; or
- iCare active asthma tag; or
- At least three instances of asthma primary diagnosis in the past six months.

**Definition (Frequency)**: Annually.

**Logic Detail**

**Asthma Diagnosis**

- Diagnosis (ICD Codes): Not on same day, Primary dx only, and Service Category A or H only: H POV (BGP ASTHMA DXS taxonomy)
- Asthma Severity (Problem List Classification)
  - Category Asthma: 2-Mild persistent, 3-Moderate persistent, 4-Severe persistent
- Active asthma tag (iCare): Status Proposed or Accepted
- Asthma Control
– V Asthma Control, any value

**Best Practice Prompt Text**

Asthma control should be assessed at each patient visit. This patient has not been assessed for asthma control in the past year. Please consider classifying the control of this patient’s asthma. Classifications are (1) well controlled, (2) not well controlled, or (3) very poorly controlled.

**Site Configurable?**: No.

**Tooltip Text**

This patient has no control documented in the past year. Clinical guidelines recommend that patients with documented asthma diagnosis should have their asthma control documented at each visit.

### B.10 Asthma: Flu Shot

**Description Field Text**

**Default Status**: On

**Denominator**: Patients with asthma who do not have an influenza immunization documented during the current flu season. Asthma is defined as:

- Any asthma severity ever of category 2, 3 or 4; *or*
- iCare active asthma tag; *or*
- At least three instances of asthma primary diagnosis in the past six months *or*
- Current prescription for inhaled corticosteroids

**Definition (Frequency)**: Annually during the months of September through March only.

**Logic Detail**

**Asthma Diagnosis**

- Diagnosis (ICD Codes): Not on same day, Primary dx only, and Service Category A or H only: (BGP ASTHMA DXS taxonomy)
- Asthma severity (Problem List Classification):
  - Category Asthma: 2-Mild persistent, 3-Moderate persistent, 4-Severe persistent
- Active asthma tag (iCare): Status Proposed or Accepted Inhaled Corticosteroids
• Site-Defined Medications: V Medications in BAT ASTHMA INHALED STEROIDS taxonomy
• NDC (National Drug Codes): V Medications as predefined in BAT ASTHMA INHLD STEROIDS NDC taxonomy

**Best Practice Prompt Text**

It is recommended that all asthma patients receive a flu shot. If this patient has asthma (as documented on [most recent visit date with asthma POV]) consider giving this patient flu shot per protocol during the season.

**Site Configurable?:** No.

**Tooltip Text**

This patient has no documented flu shot during this flu season. Clinical guidelines recommend that patients with documented asthma diagnosis should have an annual influenza immunization.

**B.11 Asthma: Increased Risk for Exacerbation**

**Description Field Text**

**Default Status:** On

**Denominator:** Patients with increased risk for asthma exacerbation, defined as:

- Two or more ER, Urgent Care, or inpatient visits in the last year (not on the same day) with a documented primary diagnosis of asthma; or
- One prescription for oral corticosteroids on the same day as a visit with primary asthma diagnosis in the last year for patients with *only* asthma severity 1 (intermittent); or
- Two prescriptions for oral corticosteroids on the same day as a visit with primary asthma diagnosis in the last year for patients with *any* asthma severity 2, 3, or 4 (persistent); or
- At least one ER, Urgent Care, or inpatient visit in the last year with a documented primary diagnosis of asthma and one prescription for oral corticosteroids on the same day as a visit with primary asthma diagnosis in the last year on a date at least two weeks (14 days) before or after the ER/UC/inpatient visit.

**Definition (Frequency):** As needed.

**Logic Detail**

**Asthma Diagnosis**
• Diagnosis (ICD Codes): Not on same day, Primary dx only, and Service Category A or H only: V POV (BGP ASTHMA DXS taxonomy)
• Asthma Severity: Problem List Classification category
  Asthma Severity, any value
• Emergency Room (ER) visit: Clinic code 30
• Urgent Care visit: Clinic Code 80
• Inpatient (hospital) visit: Visit Service Category H

**Oral Corticosteroids**

Site defined Medications: V Medications in BGP RA GLUCOCORTICOID taxonomy

VA Drug Class: V Medications as predefined in BGP RA GLUCOCORTICOID CLASS taxonomy

**Best Practice Prompt Text**

This patient may be at increased risk for future asthma exacerbations. The documented asthma severity is ([Severity] or “None Documented”). They had the following events which may have resulted from uncontrolled asthma.

• [Event Trigger1]
• [Event Trigger2]

Making sure that the patient’s asthma is well controlled will help to prevent further exacerbations.

**Site Configurable?**: No.

**Tooltip Text**

This patient may be at increased risk for future asthma exacerbations. The provider should ensure the patient’s asthma is well controlled.

**B.12 Asthma: Primary Care Provider**

**Description Field Text**

**Default Status**: On

**Denominator**: Patients with asthma who do not have a Designated Primary Care Provider (DPCP) documented. Asthma is defined as:

• Any asthma severity ever of category 2, 3 or 4; or
• iCare active Asthma tag; or
- At least three instances of asthma primary diagnosis in the past six months.

**Definition (Frequency):** As needed when no DPCP documented.

**Logic Detail**

**Asthma Diagnosis**

- Diagnosis (ICD Codes): Not on same day, Primary dx only, and Service Category A or H only: V POV (BGP ASTHMA DXS taxonomy)

**Asthma Severity (Problem List Classification)**

- Category Asthma: 2-Mild persistent, 3-Moderate persistent, 4-Severe persistent
- Active Asthma tag (iCare): Status Proposed or Accepted

**Designated Primary Care Provider**

- Designated Specialty Provider Management (DSPM): Provider role DPCP
- Patient File: Primary Care Provider

**Best Practice Prompt Text**

This patient has a chronic condition. Guidelines recommend that patients with chronic conditions have a PCP. Please assign this patient to a primary care provider.

**Site Configurable?**: No.

**Tooltip Text**

This patient has no DPCP assigned. Clinical guidelines recommend that patients with chronic conditions such as asthma have a PCP.

### B.13 Asthma: Severity Classification

**Description Field Text**

**Default Status:** On

**Denominator:** Patients with asthma who do not have a documented asthma severity. Asthma is defined as:

- iCare active asthma tag; or
- At least three instances of asthma primary diagnosis in the past six months.

**Definition (Frequency):** Once
Logic Detail

Asthma Diagnosis

- Diagnosis (ICD Codes): Not on same day, Primary dx only, and Service Category A or H only: V POV (BGP ASTHMA DXS taxonomy)
- Active Asthma tag (iCare): Status Proposed or Accepted

Asthma Severity - Problem List Classification

- Category asthma severity, any value: 1-Intermittent, 2-Mild persistent, 3-Moderate persistent, 4-Severe persistent

Best Practice Prompt Text

If this patient has asthma, consider classifying the severity of this patient's asthma in the Problem List Classification field.

Site Configurable?: No.

Tooltip Text

This patient has no documented asthma severity. Clinical guidelines recommend that patients with documented asthma diagnosis should have asthma severity assessed and documented to assist with treatment planning.

B.14 CVD At Risk: Missing Risk Factors

Description Field Text

Default Status: ACTIVE (ON)

Denominator: Patients with active CVD At Risk (CVD AR) tag (iCare) who are not documented in RPMS for any or all of the following CVD risk factors:

- Tobacco Use Screen in the past year; and/or
- Total Cholesterol test in past five years; and/or
- HDL with result in past five years; and/or
- LDL with result in past five years; and/or
- Blood Pressure in the past year

Definition (Frequency): As needed when any risk factors are missing.

Logic Detail

CVD At Risk tag (Proposed or Accepted): If patient is not categorized with Known CVD, CVD At Highest Risk or CVD At Significant and meets the following criteria:
- Male equal to or greater than age 45; or
- Female equal to or greater than age 55

**Tobacco Use Screen**

- Health Factors: Most recent V Health Factor TBD BGP TOBACCO USER HLTH FACTORS taxonomy
- V POV or Problem List: defined in taxonomy [BGP GPRA SMOKING DXS taxonomy]
- V Dental: defined in taxonomy [BGP TOBACCO CESS DENTAL CODE]
- Procedures (CPT Codes): defined in taxonomy [BGP TOBACCO USER CPTS taxonomy]

**Total Cholesterol Test**

- Site defined Lab Tests: V Lab site defined tests in DM AUDIT CHOLESTEROL TAX taxonomy
- LOINC Codes: V Lab as predefined in BGP TOTAL CHOLESTEROL LOINC taxonomy

**Note:** CPT Codes will not be used to identify this test because a result value is required.

**HDL Test**

- Site defined Lab Tests: V Lab site defined tests in DM AUDIT HDL TAX taxonomy
- LOINC Codes: V Lab as predefined in BGP HDL LOINC CODES taxonomy

**Note:** CPT Codes will not be used to identify this test because a result value is required.

**LDL Test**

- Site defined Lab Tests: V Lab site defined tests in DM AUDIT LDL CHOLESTEROL TAX taxonomy
- LOINC Codes: V Lab as predefined in BGP LDL LOINC CODES taxonomy

**Note:** CPT Codes will not be used to identify this test because a result value is required.
Best Practice Prompt Text

Missing information re: CVD Risk Factors: This patient may be at risk for CVD due to gender and age. Currently unable to calculate level of risk for this patient and assist in treatment recommendations because the following data is missing (list specifics).

Site Configurable? No.

B.15  CVD At-Risk: No ASA/Antiplatelets

Description Field Text

Default Status: On

Denominator: Patients with active CVD At-Risk (CVD AR) tag (iCare) with no current prescriptions or contraindications for Aspirin/ASA, Warfarin or other Anti Platelet medications.

Definition (Frequency): As needed when no current prescription.

Logic Detail

CVD At-Risk tag (Proposed or Accepted): If patient is not categorized with Known CVD, CVD At Highest Risk or CVD At Significant and meets the following criteria:

- Male equal to or greater than age 45; or
- Female equal to or greater than age 55

Aspirin/ASA Medications

- Site defined Medications: V Medications in DM AUDIT ASPIRIN DRUGS taxonomy
- NDC (National Drug Codes): V Medications as predefined in BAT ASTHMA INHLD STEROIDS NDC taxonomy

Anti Platelet Medications

- Site defined Medications: V Medications in BGP ANTIPLATELET DRUGS taxonomy
- VA Drug Class: V Medications as predefined in BGP CMS ANTI-PLATELET CLASS NDC taxonomy

Warfarin

- Site defined Medications: V Medications in BGP CMS WARFARIN MEDS Taxonomy
• NDC (National Drug Codes): V Medications as predefined in BAT
ASTHMA INHLD STEROIDS NDC taxonomy
• Medication Contraindications: Defined in RPMS Clinical Reporting System
  logic document.

Best Practice Prompt Text
CVD Risk: This patient may be at risk for CVD due to gender and age. Consider
aspirin therapy, if not contraindicated.

Site Configurable? No.

B.16 CVD Highest Risk: High BP

Description Field Text
Default Status: On

Denominator: Patients with active CVD At Highest Risk (CVD AHR) tag
(iCare) with two of last three non-ER blood pressures in past two years are
Systolic greater than 130 or Diastolic greater than 80.

Definition (Frequency): As needed when blood pressure is elevated.

Logic Detail
CVD At Highest Risk tag (Proposed or Accepted): if patient is not categorized
with Known CVD and meets either of the following criteria:

• Known Diabetes: the patient has two primary diagnosis POVs ever for
  ambulatory or hospitalization visits (not on the same day) or one instance on
  Active Problem List.
  – Defined as taxonomy (SURVEILLANCE DIABETES); or
• End stage renal disease (ESRD) or with dialysis: the patient has at least 2
  primary diagnosis POVs or procedures ever for ambulatory or hospitalization
  visits (not on the same day) or one instance on Active Problem List.
  – Defined using taxonomy (BGP ESRD DXS); or
  – ICD Procedures (BGP ESRD PROCs); or
  – CPT (BGP ESRD CPTS taxonomy).

Best Practice Prompt Text
High BP: At least two recent BP values for this patient were greater than (>)
130/80. Consider more aggressive anti hypertensive therapy.

Site Configurable? No.
B.17  CVD Highest Risk: High LDL

**Description Field Text**

**Default Status**: On

Denominator: Patients with active CVD At Highest Risk (AHR) tag (iCare) with most recent LDL test result in the past year greater than 100 *and* with current prescription for Statin medications.

**Definition (Frequency)**: As needed when LDL is high.

**Logic Detail**

CVD At Highest Risk tag (Proposed or Accepted): if patient is not categorized with Known CVD and meets either of the following criteria:

- Known Diabetes: The patient has two primary diagnosis POVs ever for ambulatory or hospitalization visits (not on the same day) *or* one instance on Active Problem List.
  - Defined using SURVEILLANCE DIABETES taxonomy; *or*
- ESRD or with dialysis: the patient has at least two primary diagnosis POVs or procedures ever for ambulatory or hospitalization visits (not on the same day) or one instance on Active Problem List.
  - Defined using BGP ESRD DXS taxonomy *or*
  - ICD Procedures: BGP ESRD PROCS taxonomy *or*
  - CPT: BGP ESRD CPTS taxonomy.

**LDL Test**

- Site defined Lab Tests: V Lab site defined tests in DM AUDIT LDL CHOLESTEROL TAX taxonomy
- LOINC Codes: V Lab as predefined in BGP LDL LOINC CODES taxonomy

**Note**: CPT Codes will not be used to identify this test because a result value is required.

**Statin Medications**

Site defined Medications: V Medications in BGP HEDIS STATIN MEDS taxonomy

NDC (National Drug Codes): V Medications as predefined in BGP HEDIS STATIN NDC taxonomy
**Best Practice Prompt Text**

High LDL: On [date of test], patient’s LDL was [xx]. Intensify therapy and reevaluate in two months.

*Site Configurable?* No.

**B.18 CVD Highest Risk: High LDL/No Statin**

**Description Field Text**

**Default Status**: On

**Denominator**: Patients with active CVD At Highest Risk (AHR) tag (iCare) with most recent LDL test result in the past year greater than 100 and no documented current prescription for Statin medications.

**Definition (Frequency)**: As needed when no current prescription.

**Logic Detail**

CVD At Highest Risk tag (Proposed or Accepted): if patient is not categorized with Known CVD and meets either of the following criteria:

- Known Diabetes: the patient has two primary diagnosis POVs ever for ambulatory or hospitalization visits (not on the same day) or one instance on Active Problem List.
  - Defined using SURVEILLANCE DIABETES taxonomy; or
- ESRD or with dialysis: the patient has at least two primary diagnosis POVs or procedures ever for ambulatory or hospitalization visits (not on the same day) or one instance on Active Problem List.
  - Defined using ESRD DXS taxonomy; or
  - ICD Procedures: BGP ESRD PROCS taxonomy; or
  - CPT: BGP ESRD CPTS taxonomy.

**LDL Test**

- Site defined Lab Tests: V Lab site defined tests in DM AUDIT LDL CHOLESTEROL TAX taxonomy
- LOINC Codes: V Lab as predefined in BGP LDL LOINC CODES taxonomy

**Note**: CPT Codes will not be used to identify this test because a result value is required.

**Statin Medications**
• Site defined Medications: V Medications in BGP HEDIS STATIN MEDS taxonomy

• NDC (National Drug Codes): V Medications as predefined in BGP HEDIS STATIN NDC taxonomy

**Best Practice Prompt Text**

High LDL: On [date of test], patient’s LDL was [xx]. Patient is not documented as currently on a Statin medication. Consider prescribing a Statin medication or another lipid lowering agent, if not contraindicated.

**Site Configurable? No.**

**B.19 CVD Highest Risk: High TG**

**Description Field Text**

**Default Status:** On

**Denominator:** Patients with active CVD At Highest Risk (AHR) tag (iCare) with most recent Triglyceride (TG) test result in the past year greater than 150.

**Definition (Frequency):** As needed.

**Logic Detail**

CVD At Highest Risk tag (Proposed or Accepted): if patient is not categorized with Known CVD and meets either of the following criteria:

• Known Diabetes: The patient has two primary diagnosis POVs ever for ambulatory or hospitalization visits (not on the same day) or one instance on Active Problem List.
  – Defined using SURVEILLANCE DIABETES taxonomy; or

• ESRD or with dialysis: the patient has at least two primary diagnosis POVs or procedures ever for ambulatory or hospitalization visits (not on the same day) or one instance on Active Problem List.
  – Defined using BGP ESRD DXS taxonomy; or
  – ICD Procedures: BGP ESRD PROCS; or
  – CPT: BGP ESRD CPTS taxonomy.

**Triglyceride (TG) Test**

• Site defined Lab Tests: V Lab site defined tests in DM AUDIT TRIGLYCERIDE TAX taxonomy
• LOINC Codes: V Lab as predefined in BGP TRIGLYCERIDE LOINC CODES taxonomy

**Note:** CPT Codes will not be used to identify this test because a result value is required.

**Best Practice Prompt Text**

High TG: On [date of test], patient’s TG was [xx]. Consider fasting lipid profile and/or intensify therapy and reevaluate in two months.

**Site Configurable?** No.

**B.20 CVD Highest Risk: Low HDL**

**Description Field Text**

**Default Status:** On

**Denominator:** Patients with active CVD At Highest Risk (AHR) tag (iCare) with most recent HDL result in the past year less than (<) 40.

**Definition (Frequency):** As needed.

**Logic Detail**

CVD At Highest Risk tag (Proposed or Accepted): if patient is not categorized with Known CVD and meets either of the following criteria:

• Known Diabetes: The patient has two primary diagnosis POVs ever for ambulatory or hospitalization visits (not on the same day) or one instance on Active Problem List.
  – Defined using SURVEILLANCE DIABETES taxonomy; or
• ESRD or with dialysis: the patient has at least two primary diagnosis POVs or procedures ever for ambulatory or hospitalization visits (not on the same day) or one instance on Active Problem List.
  – Defined using BGP ESRD DXS taxonomy; or
  – ICD Procedures: BGP ESRD PROCS; or
  – CPT: BGP ESRD CPTS taxonomy.

**HDL Test**

• Site defined Lab Tests: V Lab site defined tests in DM AUDIT HDL TAX taxonomy
• LOINC Codes: V Lab as predefined in BGP HDL LOINC CODES taxonomy
Note: CPT Codes will not be used to identify this test because a result value is required.

Best Practice Prompt Text

Low HDL: On [date of test], patient’s HDL was [xx]. Consider therapeutic lifestyle changes and medical intervention if needed.

Site Configurable? No.

B.21 CVD Highest Risk: No ACEI/ARB

Description Field Text

Default Status: On

Denominator: Patients with active CVD At Highest Risk (CVD AHR) tag (iCare) with no current prescription for ACE Inhibitor or ARB medication and any or all of the following conditions:

- Hypertension (HTN): Active Problem List or at least two diagnoses ever, including one in the past year; and/or
- High Blood Pressure: Two of last three non-ER blood pressures in past two years are Systolic => 140 or Diastolic => 90; and/or
- Evidence of Nephropathy in past two years; and/or
- Positive microalbuminuria result in the past year; and/or
- Most recent Estimated GFR result less than 60

Definition (Frequency): As needed.

Logic Detail

CVD At Highest Risk tag (Proposed or Accepted): if patient is not categorized with Known CVD and meets either of the following criteria:

- Known Diabetes: The patient has two primary diagnosis POVs ever for ambulatory or hospitalization visits (not on the same day) or one instance on Active Problem List.
- Defined using SURVEILLANCE DIABETES taxonomy; or
- ESRD or with dialysis: the patient has at least two primary diagnosis POVs or procedures ever for ambulatory or hospitalization visits (not on the same day) or one instance on Active Problem List.
  - Defined using BGP ESRD DXS taxonomy; or
  - ICD Procedures: BGP ESRD PROCS; or
– CPT: BGP ESRD CPTS taxonomy.

ACE Inhibitor Medications

• Site defined Medications: V Medications in BGP HEDIS ACEI MEDS taxonomy
• NDC (National Drug Codes): V Medications as predefined in BGP HEDIS ACEI NDC taxonomy
• VA Drug Class: V Medications as predefined in BGP CMS ACEI MEDS CLASS taxonomy

ARB Medications

• Site defined Medications: V Medications in BGP HEDIS ARB MEDS taxonomy
• NDC (National Drug Codes): V Medications as predefined in BGP HEDIS ARB NDC taxonomy
• VA Drug Class: V Medications as predefined in BGP CMS ARB MEDS CLASS taxonomy
• ACEI/ARB Contraindications: Defined in RPMS Clinical Reporting System logic document.

Hypertension

• V POV or Problem List: Defined using BGP HYPERTENSION DXS taxonomy

Evidence of Nephropathy

• Active Problem List or two instances in V POV (not on same day) in past two years: defined using BGP NEPHROPATHY DXS taxonomy
• Procedures (ICD Codes): (one in past year) defined using BGP NEPHROPATHY PROCEDURES taxonomy
• Procedures (CPT Codes): (one In Past Year) defined using BGP NEPHROPATHY CPTS taxonomy

Microalbuminuria Test

• Site defined Lab Tests: V Lab site defined tests in DM AUDIT MICROALBUMUNURIA TAX taxonomy
• LOINC Codes: V Lab as predefined in BGP MICROALBUM LOINC CODES taxonomy
Note: CPT Codes will not be used to identify this test because a result value is required.

**Estimated GFR**

- Site defined Lab Tests: V Lab site defined tests in BGP GPRA ESTIMATED GFR TAX taxonomy

**Best Practice Prompt Text**

Treatment Recommendation: This patient has the following documented condition(s): [list all conditions that apply]. Consider an ACE Inhibitor or an ARB, if not contraindicated.

Site Configurable? No.

**B.22 CVD Highest Risk: No ASA/Antiplatelet**

**Description Field Text**

Default Status: On

Denominator: Patients older than 30 with active CVD At Highest Risk (CVD AHR) tag (iCare) with no current prescriptions or contraindications for Aspirin/ASA, Warfarin or other Anti Platelet medications.

Definition (Frequency): As needed when no current prescription.

Logic Detail

CVD At Highest Risk tag (Proposed or Accepted): if patient is not categorized with Known CVD and meets either of the following criteria:

- Known Diabetes: The patient has two primary diagnosis POVs ever for ambulatory or hospitalization visits (not on the same day) or one instance on Active Problem List.
  - Defined using SURVEILLANCE DIABETES taxonomy; or

- ESRD or with dialysis: the patient has at least two primary diagnosis POVs or procedures ever for ambulatory or hospitalization visits (not on the same day) or one instance on Active Problem List.
  - Defined as using BGP ESRD DXS taxonomy; or
  - ICD Procedures: BGP ESRD PROCS taxonomy; or
  - CPT: BGP ESRD CPTS taxonomy.

**Aspirin/ASA Medications**
- Site defined Medications: V Medications in DM AUDIT ASPIRIN DRUGS taxonomy
- NDC (National Drug Codes): V Medications as predefined in BAT ASTHMA INHLD STEROIDS NDC taxonomy

**Anti Platelet Medications**

- Site defined Medications: V Medications in BGP ANTIPLATELET DRUGS taxonomy
- VA Drug Class: V Medications as predefined in BGP CMS ANTI-PLATELET CLASS NDC taxonomy

**Warfarin**

- Site defined Medications: V Medications in BGP CMS WARFARIN MEDS taxonomy
- NDC (National Drug Codes)): V Medications as predefined in BAT ASTHMA INHLD STEROIDS NDC taxonomy

**Best Practice Prompt Text**

No ASA prescribed: Patient is over 30 years old and not documented on ASA, Warfarin medications or any other anti-platelet therapy. Consider aspirin or alternative, if not contraindicated.

**Site Configurable?** No.

**B.23 CVD Highest Risk: No EKG Ever**

**Description Field Text**

**Default Status**: On

**Denominator**: Patients with active CVD At Highest Risk (AHR) tag (iCare) with no documented EKG ever.

**Definition (Frequency)**: As needed when no EKG is documented.

**Logic Detail**

CVD At Highest Risk tag (Proposed or Accepted): if patient is not categorized with Known CVD and meets either of the following criteria:
• Known Diabetes: The patient has two primary diagnosis POVs ever for ambulatory or hospitalization visits (not on the same day) or one instance on Active Problem List.
  – Defined using SURVEILLANCE DIABETES taxonomy; or
• ESRD or with dialysis: The patient has at least two primary diagnosis POVs or procedures ever for ambulatory or hospitalization visits (not on the same day) or one instance on Active Problem List.
  – Defined using ESRD DXS taxonomy; or
  – ICD Procedures: BGP ESRD PROCS taxonomy; or
  – CPT: BGP ESRD CPTS taxonomy.

**EKG**

• Procedures (ICD Codes): defined using BQI EKG PROCEDURES taxonomy

**Best Practice Prompt Text**

No EKG: Patient has no documented EKG ever. EKG should be ordered.

Site Configurable? No.

**B.24 CVD Highest Risk: No Exercise Education**

**Description Field Text**

Default Status: On

Denominator: Patients with active CVD AHR tag (iCare) with no documented exercise education in the past year.

Definition (Frequency): As needed when no exercise education is documented.

**Logic Detail**

CVD AHR tag (Proposed or Accepted): if patient is not categorized with Known CVD and meets either of the following criteria:

• Known Diabetes: The patient has two primary diagnosis POVs ever for ambulatory or hospitalization visits (not on the same day) or one instance on Active Problem List.
  – Defined using SURVEILLANCE DIABETES taxonomy; or
• End stage renal disease (ESRD) OR with dialysis: The patient has at least two primary diagnosis POVs or procedures ever for ambulatory or hospitalization visits (not on the same day) or one instance on Active Problem List.
  – Defined using BGP ESRD DXS taxonomy; or
  – ICD Procedures: BGP ESRD PROCS taxonomy; or
  – CPT: BGP ESRD CPTS taxonomy.

**Exercise Education**

• Defined using BQI EXERCISE COUNSELING DXS taxonomy

• Patient Education Codes: V Patient Ed Codes containing “EX”

**Best Practice Prompt Text**

No Recent Exercise Education: Discuss and document exercise education with this patient.

Site Configurable? No.

## B.25 CVD Highest Risk: No LDL

**Description Field Text**

**Default Status:** On

**Denominator:** Patients with active CVD AHR tag (iCare) with no documented LDL test result value in the past year.

**Definition (Frequency):** As needed.

**Logic Detail**

CVD AHR tag (Proposed or Accepted): if patient is not categorized with Known CVD and meets either of the following criteria:

• Known Diabetes: The patient has two primary diagnosis POVs ever for ambulatory or hospitalization visits (not on the same day) or one instance on Active Problem List.
  – Defined using SURVEILLANCE DIABETES taxonomy; or
• ESRD or with dialysis: The patient has at least two primary diagnosis POVs or procedures ever for ambulatory or hospitalization visits (not on the same day) or one instance on Active Problem List.
  – Defined using BGP ESRD DXS taxonomy; or
  – ICD Procedures: BGP ESRD PROCS taxonomy; or
LDL Test

- Site defined Lab Tests: V Lab site defined tests in DM AUDIT LDL CHOLESTEROL TAX taxonomy
- LOINC Codes: V Lab as predefined in BGP LDL LOINC CODES taxonomy

**Note:** CPT Codes will not be used to identify this test because a result value is required.

**Best Practice Prompt Text**

No LDL: Patient has no documented LDL value in the past year. Needs Lipid evaluation, either fasting lipid or lipid profile with direct LDL.

**Site Configurable?** No.

**B.26 CVD Highest Risk: No Nutrition Education**

**Description Field Text**

**Default Status:** On

**Denominator:** Patients with active CVD AHR tag (iCare) with no documented nutrition education in the past year.

**Definition (Frequency):** As needed when no nutrition education is documented.

**Logic Detail**

CVD At Highest Risk tag (Proposed or Accepted): if patient is not categorized with Known CVD and meets either of the following criteria:

- Known Diabetes: The patient has two primary diagnosis POVs ever for ambulatory or hospitalization visits (not on the same day) or one instance on Active Problem List.
  - Defined using SURVEILLANCE DIABETES taxonomy; or
- ESRD or with dialysis: The patient has at least two primary diagnosis POVs or procedures ever for ambulatory or hospitalization visits (not on the same day) or two instance on Active Problem List.
  - Defined using BGP ESRD DXS taxonomy; or
  - ICD Procedures: BGP ESRD PROCS taxonomy; or
  - CPT: BGP ESRD CPTS taxonomy.

**Nutrition Education**

- Defined by using taxonomy BGP DIETARY SURVEILLANCE DXS
• Patient Education Codes: V Patient Ed Codes containing “N” or “-MNT”

**Best Practice Prompt Text**
No Recent Nutrition Education: Discuss and document nutrition education with this patient.

**Site Configurable?** No.

**B.27 CVD Highest Risk: No Recent EKG**

**Description Field Text**

**Default Status:** On

**Denominator:** Patients with active CVD AHR tag (iCare) with no documented EKG in the past year.

**Definition (Frequency):** As needed when no recent EKG is documented.

**Logic Detail**

CVD AHR tag (Proposed or Accepted): if patient is not categorized with Known CVD and meets either of the following criteria:

- **Known Diabetes:** The patient has two primary diagnosis POVs ever for ambulatory or hospitalization visits (not on the same day) or one instance on Active Problem List.
  
  - Defined using SURVEILLANCE DIABETES taxonomy; or

- **ESRD or with dialysis:** The patient has at least two primary diagnosis POVs or procedures ever for ambulatory or hospitalization visits (not on the same day) or one instance on Active Problem List.
  
  - Defined using BGP ESRD DXS taxonomy; or
  
  - Procedures (ICD): BGP ESRD PROCS taxonomy; or
  
  - CPT: BGP ESRD CPTS taxonomy.

**EKG**

Defined using BQI EKG PROCEDURES taxonomy.

**Best Practice Prompt Text**

No EKG has been documented in past year. EKG is due for this patient.

**Site Configurable?** No.
B.28 CVD Highest Risk: Smoking Cessation

Description Field Text

**Default Status:** On

**Denominator:** Patients with active CVD At Highest Risk (CVD AHR) tag (iCare) who are documented tobacco users (smoker or smokeless) with no documented tobacco intervention after most recent tobacco use diagnosis

**Definition (Frequency):** As needed when no tobacco intervention is documented.

**Logic Detail**

CVD AHR tag (Proposed or Accepted): if patient is not categorized with Known CVD and meets either of the following criteria:

- **Known Diabetes:** The patient has two primary diagnosis POVs ever for ambulatory or hospitalization visits (not on the same day) or one instance on Active Problem List.
  - Defined using SURVEILLANCE DIABETES taxonomy; or
- **ESRD or with dialysis:** The patient has at least two primary diagnosis POVs or procedures ever for ambulatory or hospitalization visits (not on the same day) or one instance on Active Problem List.
  - Defined using BGP ESRD DXS taxonomy; or
  - ICD Procedures: BGP ESRD PROCS taxonomy; or
  - CPT: BGP ESRD CPTS taxonomy.

**Tobacco Use**

- **Health Factors:** most recent V Health Factor BGP TOBACCO USER HLTH FACTORS taxonomy
- **V POV or Problem List:** defined using BGP GPRA SMOKING DXS taxonomy
- **V Dental:** defined in taxonomy BGP TOBACCO CESS DENTAL CODE
- **Procedures (CPT Codes):** BGP TOBACCO USER CPTS taxonomy

**Tobacco Intervention or Cessation**

- **Procedures (CPT Codes):** V CPT G0375, G0376, 4000F, 4001F [BGP TOBACCO INTERVENTION CPTS taxonomy]
- **Clinic:** Visit Clinic Code 94 (Tobacco Cessation Clinic)
- **Patient Education Codes:** V Patient Ed Codes containing “TO-,” “-TO,” “-SHS,” 305.1, 649.00-649.04
- Site defined Medications: V Medications in BGP CMS SMOKING CESSATION MEDS taxonomy or med name containing “Nicotine Patch,” “Nicotine Polacrilex,” “Nicotine Inhaler,” or “Nicotine Nasal Spray”
- NDC (National Drug Codes): V Medications as predefined in BGP CMS SMOKING CESSATION NDC taxonomy
- V Dental: defined in taxonomy BGP TOBACCO CESS DENTAL CODE

**Best Practice Prompt Text**

Tobacco Cessation: Patient is documented as a current Tobacco User. Consider tobacco cessation intervention.

Site Configurable? No.

**B.29 CVD Known: High BP**

**Description Field Text**

- **Default Status**: On

  **Denominator**: Patients with active CVD Known tag (iCare) with two of last three non-ER blood pressures in past two years are Systolic greater than 130 or Diastolic greater than 80 and with current prescriptions for both beta blockers and ACE Inhibitors (ACEI) or ARB medications.

  **Definition (Frequency)**: As needed when blood pressure is elevated.

  **Logic Detail**

  CVD Known tag (Proposed or Accepted): The patient is categorized in iCare with Known CVD if any of the following criteria are met:

  - One ever of primary diagnosis POV for specific cerebrovascular or peripheral vascular disease diagnoses or procedures for CABG, PCI/PTCA, endarterectomy or carotid stent for ambulatory or hospitalization visits. Defined using the following taxonomies: BQI KNOWN CVD-1 DXS or BQI PCI-PTCA DXS for primary diagnosis only; BGP CABG PROCES; BGP CABG CPTS; BQI PCI-PTCA PROCEDURES; BGP CMS PCI PTCA CPTS; BQI KNOWN CVD-1 PROCEDURES; BQI KNOWN CVD-1 CPTS. or

  - Two primary diagnosis POVs ever for ambulatory or hospitalization visits (not on the same date) of Acute Myocardial Infarction (AMI) (one instance can be an Active Problem List) at least 90 days apart but no more than two years between first (most recent) and last diagnosis. AMI defined using taxonomy BGP AMI DXS (HEDIS). or
• Three different POVs of Ischemic Heart Disease (IHD) on same day for ambulatory or hospitalization visit (one POV must be a primary diagnosis; one instance can be an Active Problem List); defined using taxonomy BQI IHD DXS.

or

• Three primary diagnosis POV for any IHD or other specific cerebrovascular or peripheral vascular disease diagnoses or procedures for ambulatory or hospitalization visits at least 90 days apart but no more than five years between first and last diagnosis (one instance can be an Active Problem List). Defined using taxonomies BQI IHD DXS, BQI KNOWN CVD-MULT DXS; BQI KNOWN CVD-MULT PROCEDURES; BQI KNOWN CVD-MULT CPTS.

**Beta Blocker Medication**

• Site defined Medications: V Medications in BGP HEDIS BETA BLOCKER MEDS taxonomy

• NDC (National Drug Codes): V Medications as predefined in BGP HEDIS BETA BLOCKER NDC taxonomy

• VA Drug Class: V Medications as predefined in BGP CMS BETA BLOCKER CLASS taxonomy

**ACE Inhibitor Medications**

• Site defined Medications: V Medications in BGP HEDIS ACEI MEDS taxonomy

• NDC (National Drug Codes): V Medications as predefined in BGP HEDIS ACEI NDC taxonomy

• VA Drug Class: V Medications as predefined in BGP CMS ACEI MEDS CLASS taxonomy

**ARB Medications**

• Site defined Medications: V Medications in BGP HEDIS ARB MEDS taxonomy

• NDC (National Drug Codes): V Medications as predefined in BGP HEDIS ARB NDC taxonomy

• VA Drug Class: V Medications as predefined in BGP CMS ARB MEDS CLASS taxonomy

**Best Practice Prompt Text**

High BP: At least two recent BP values for this patient were greater than (> 130/80. Consider more aggressive anti hypertensive therapy.
Site Configurable? No.

B.30 CVD Known: High LDL

Description Field Text

Default Status: On

Denominator: Patients with active CVD Known tag (iCare) with most recent LDL test result in the past year greater than 100 and with current prescription for Statin medications.

Definition (Frequency): As needed when LDL is high.

Logic Detail

CVD Known tag (Proposed or Accepted): The patient is categorized in iCare with Known CVD if any of the following criteria are met:

- One ever of primary diagnosis POV for specific cerebrovascular or peripheral vascular disease diagnoses or procedures for CABG, PCI/PTCA, endarterectomy or carotid stent for ambulatory or hospitalization visits. Defined using the following taxonomies: BQI KNOWN CVD-1 DXS; BGP CABG PROCES; BGP CABG CPTS; BGP CMS PCI-PTCA DXS; BGP CMS PCI-PTCA PROCEDURES; BGP CMS PCI PTCA CPTS; BQI KNOWN CVD-1 PROCEDURES; BQI KNOWN CVD-1 CPTS or

- Two primary diagnosis POVs ever for ambulatory or hospitalization visits (not on the same date) of AMI (one instance can be an Active Problem List) at least 90 days apart but no more than two years between first (most recent) and last diagnosis. AMI defined using BGP AMI DXS (HEDIS) taxonomy or

- Three different POVs of IHD on same day for ambulatory or hospitalization visit (one POV must be a primary diagnosis; one instance can be an Active Problem List). Defined using BQI IHD DXS taxonomy or

- Three primary diagnosis POV for any IHD or other specific cerebrovascular or peripheral vascular disease diagnoses or procedures for ambulatory or hospitalization visits at least 90 days apart but no more than five years between first and last diagnosis (one instance can be an Active Problem List). Defined using the following taxonomies: BQI IHD DXS; BQI KNOWN CVD-MULT DXS; BQI KNOWN CVD-MULT PROCEDURES; BQI KNOWN CVD-MULT CPTS taxonomy.

LDL Test

- Site defined Lab Tests: V Lab site defined tests in DM AUDIT LDL CHOLESTEROL TAX taxonomy
• LOINC Codes: V Lab as predefined in BGP LDL LOINC CODES taxonomy
• NOTE: CPT Codes will not be used to identify this test because a result value is required.

Statin Medications

• Site defined Medications: V Medications in BGP HEDIS STATIN MEDS taxonomy
• NDC (National Drug Codes): V Medications as predefined in BGP HEDIS STATIN NDC taxonomy

Best Practice Prompt Text

High LDL: On [date of test], patient’s LDL was [xx]. Intensify therapy and reevaluate in 2 months.

Site Configurable? No.

B.31 CVD Known: High TG

Description Field Text

Default Status: On

Denominator: Patients with active CVD Known tag (iCare) with most recent Triglyceride (TG) test result in the past year greater than 150.

Definition (Frequency): As needed.

Logic Detail

CVD Known tag (Proposed or Accepted): The patient is categorized in iCare with Known CVD if any of the following criteria are met:

• One ever of primary diagnosis POV for specific cerebrovascular or peripheral vascular disease diagnoses or procedures for CABG, PCI/PTCA, endarterectomy or carotid stent for ambulatory or hospitalization visits. Defined using the following taxonomies: BQI KNOWN CVD-1 DXS or BGP CMS PCI-PTCA DXS for primary diagnosis only; BGP CABG PROCES; BGP CABG CPTS; BGP CMS PCI-PTCA PROCEDURES; BGP CMS PCI PTCA CPTS; BQI KNOWN CVD-1 PROCEDURES; BQI KNOWN CVD-1 CPTS; or

• Two primary diagnosis POVs ever for ambulatory or hospitalization visits (not on the same date) of AMI (one instance can be an Active Problem List) at least 90 days apart but no more than two years between first (most recent) and last diagnosis. AMI defined as BGP AMI DXS (HEDIS) taxonomy; or
• Three different POVs of IHD on same day for ambulatory or hospitalization visit (one POV must be a primary diagnosis; one instance can be an Active Problem List); defined using BQI IHD DXS taxonomy; or

• Three primary diagnosis POV for any IHD or other specific cerebrovascular or peripheral vascular disease diagnoses or procedures for ambulatory or hospitalization visits at least 90 days apart but no more than five years between first and last diagnosis (one instance can be an Active Problem List). Defined using taxonomies BQI IHD DXS; BQI KNOWN CVD-MULT DXS; BQI KNOWN CVD-MULT PROCEDURES; BQI KNOWN CVD-MULT CPTS.

Triglyceride (TG) Test

• Site defined Lab Tests: V Lab site defined tests in DM AUDIT TRIGLYCERIDE TAX taxonomy

• LOINC Codes: V Lab as predefined in BGP TRIGLYCERIDE LOINC CODES taxonomy

Note CPT Codes will not be used to identify this test because a result value is required.

Best Practice Prompt Text

High TG: On [date of test], patient’s TG was [xx]. Consider fasting lipid profile and/or intensify therapy and reevaluate in two months.

Site Configurable? No.

B.32 CVD Known: Low HDL

Description Field Text

Default Status: On

Denominator: Patients with active CVD Known tag (iCare) with most recent LDL test result in the past year equal to or less than (\(\leq\)) 100 and most recent HDL result in the past year less than (\(<\)) 40.

Definition (Frequency): As needed.

Logic Detail

CVD Known tag (Proposed or Accepted): The patient is categorized in iCare with Known CVD if any of the following criteria are met:
- One ever of primary diagnosis POV for specific cerebrovascular or peripheral vascular disease diagnoses or procedures for CABG, PCI/PTCA, endarterectomy or carotid stent for ambulatory or hospitalization visits. Defined using the following taxonomies: BQI KNOWN CVD-1 DXS or BGP CMS PCI-PTCA DXS for primary diagnosis only; BGP CABG PROCES; BGP CABG CPTS; BGP CMS PCI-PTCA PROCEDURES; BGP CMS PCI PTCA CPTS; BQI KNOWN CVD-1 PROCEDURES; BQI KNOWN CVD-1 CPTS; or

- Two primary diagnosis POVs ever for ambulatory or hospitalization visits (not on the same date) of AMI (one instance can be an Active Problem List) at least 90 days apart but no more than two years between first (most recent) and last diagnosis. AMI defined using BGP AMI DXS (HEDIS) taxonomy; or

- Three different POVs of IHD on same day for ambulatory or hospitalization visit (one POV must be a primary diagnosis; one instance can be an Active Problem List). Defined using BQI IHD DXS taxonomy; or

- Three primary diagnosis POV for any IHD or other specific cerebrovascular or peripheral vascular disease diagnoses or procedures for ambulatory or hospitalization visits at least 90 days apart but no more than five years between first and last diagnosis (one instance can be an Active Problem List). Defined using taxonomies: BQI IHD DXS; BQI KNOWN CVD-MULT DXS; BQI KNOWN CVD-MULT PROCEDURES; BQI KNOWN CVD-MULT CPTS.

**LDL Test**

- Site defined Lab Tests: V Lab site defined tests in DM AUDIT LDL CHOLESTEROL TAX taxonomy

- LOINC Codes: V Lab as predefined in BGP LDL LOINC CODES taxonomy

**Note**: CPT Codes will not be used to identify this test because a result value is required.

**HDL Test**

- Site defined Lab Tests: V Lab site defined tests in DM AUDIT HDL TAX taxonomy

- LOINC Codes: V Lab as predefined in BGP HDL LOINC CODES taxonomy

**Note**: CPT Codes will not be used to identify this test because a result value is required.
**Best Practice Prompt Text**

Low HDL: On [date of test], patient's HDL was [xx]. Consider therapeutic lifestyle changes and medical intervention if needed.

**Site Configurable?** No.

**B.33 CVD Known: No ACEI/ARB**

**Description Field Text**

**Default Status:** On

**Denominator:** Patients with active CVD Known tag (iCare) with two of last three non-ER blood pressures in past two years are Systolic greater than 130 or Diastolic greater than 80 and with no current prescriptions or contraindications for ACEI or ARB medications.

**Definition (Frequency):** As needed when no current prescription.

**Logic Detail**

CVD Known tag (Proposed or Accepted): The patient is categorized in iCare with Known CVD if any of the following criteria are met:

- One ever of primary diagnosis POV for specific cerebrovascular or peripheral vascular disease diagnoses or procedures for CABG, PCI/PTCA, endarterectomy or carotid stent for ambulatory or hospitalization visits. Defined using the following taxonomies: BQI KNOWN CVD-1 DXS or BGP CMS PCI-PTCA DXS for primary diagnosis only; BGP CABG PROCES; BGP CABG CPTS; BGP CMS PCI-PTCA PROCEDURES; BGP CMS PCI PTCA CPTS; BQI KNOWN CVD-1 PROCEDURES; BQI KNOWN CVD-1 CPTS; or

- Two primary diagnosis POVs ever for ambulatory or hospitalization visits (not on the same date) of AMI (one instance can be an Active Problem List) at least 90 days apart but no more than two years between first (most recent) and last diagnosis. AMI defined using BGP AMI DXS (HEDIS) taxonomy; or

- Three different POVs of IHD on same day for ambulatory or hospitalization visit (one POV must be a primary diagnosis; one instance can be an Active Problem List). Defined using BQI IHD DXS taxonomy; or
• Three primary diagnosis POV for any IHD or other specific cerebrovascular or peripheral vascular disease diagnoses or procedures for ambulatory or hospitalization visits at least 90 days apart but no more than five years between first and last diagnosis (one instance can be an Active Problem List). Defined using taxonomies BQI IHD DXS; BQI KNOWN CVD-MULT DXS; BQI KNOWN CVD-MULT PROCEDURES; BQI KNOWN CVD-MULT CPTS.

**ACE Inhibitor Medications**

• Site defined Medications: V Medications in BGP HEDIS ACEI MEDS taxonomy
• NDC (National Drug Codes): V Medications as predefined in BGP HEDIS ACEI NDC taxonomy
• VA Drug Class: V Medications as predefined in BGP CMS ACEI MEDS CLASS taxonomy

**ARB Medications**

• Site defined Medications: V Medications in BGP HEDIS ARB MEDS taxonomy
• NDC (National Drug Codes): V Medications as predefined in BGP HEDIS ARB NDC taxonomy
• VA Drug Class: V Medications as predefined in BGP CMS ARB MEDS CLASS taxonomy
• ACEI/ARB Contraindications: Defined in RPMS Clinical Reporting System logic document.

**Best Practice Prompt Text**

No ACEI/ARB prescribed: Patient is not documented as currently on an ACEI or ARB medication. This patient should be on an ACE Inhibitor or ARB, if not contraindicated.

**Site Configurable?** No.

**B.34 CVD Known: No ASA/Antiplatelet**

**Description Field Text**

**Default Status:** On

**Denominator:** Patients with active CVD Known tag (iCare) with no current prescriptions or contraindications for Aspirin/ASA, Warfarin or other Anti Platelet medications.
Definition (Frequency): As needed when no current prescription.

Logic Detail

CVD Known tag (Proposed or Accepted): The patient is categorized in iCare with Known CVD if any of the following criteria are met:

- One ever of primary diagnosis POVs for specific cerebrovascular or peripheral vascular disease diagnoses or procedures for CABG, PCI/PTCA, endarterectomy or carotid stent for ambulatory or hospitalization visits. Defined using the following taxonomies: BQI KNOWN CVD-1 DXS or BGP CMS PCI-PTCA DXS for primary diagnosis only; BGP CABG PROCES; BGP CABG CPTS; BGP CMS PCI-PTCA PROCEDURES; BGP CMS PCI PTCA CPTS; BQI KNOWN CVD-1 PROCEDURES; BQI KNOWN CVD-1 CPTS;

or

- Two primary diagnosis POVs ever for ambulatory or hospitalization visits (not on the same date) of AMI (one instance can be an Active Problem List) at least 90 days apart but no more than two years between first (most recent) and last diagnosis. AMI defined using BGP AMI DXS (HEDIS) taxonomy;

or

- Three different POVs of IHD on same day for ambulatory or hospitalization visit (one POV must be a primary diagnosis; one instance can be an Active Problem List). Defined using BQI IHD DXS;

or

- Three primary diagnosis POVs for any IHD or other specific cerebrovascular or peripheral vascular disease diagnoses or procedures for ambulatory or hospitalization visits at least 90 days apart but no more than five years between first and last diagnosis (one instance can be an Active Problem List). Defined using taxonomies BQI IHD DXS taxonomy; BQI KNOWN CVD-MULT DXS; BQI KNOWN CVD-MULT PROCEDURES; BQI KNOWN CVD-MULT CPTS.

Aspirin/ASA Medications

- Site defined Medications: V Medications in DM AUDIT ASPIRIN DRUGS taxonomy

- NDC (National Drug Codes): V Medications as predefined in BAT ASTHMA INHLD STEROIDS NDC taxonomy

Anti Platelet Medications

- Site defined Medications: V Medications in BGP ANTIPLATELET DRUGS taxonomy

- VA Drug Class: V Medications as predefined in BGP CMS ANTI-PLATELET CLASS NDC taxonomy
• Warfarin - Site defined Medications: V Medications in BGP CMS WARFARIN MEDS taxonomy

• NDC (National Drug Codes): V Medications as predefined in BAT ASTHMA INHLD STEROIDS NDC taxonomy Medication Contraindications: Defined in RPMS Clinical Reporting System logic document.

**Best Practice Prompt Text**

No ASA prescribed: Patient is not documented as being on ASA, Warfarin medications or any other anti platelet therapy consider aspirin or alternative, if not contraindicated.

*Site Configurable?* No.

**B.35 CVD Known: No Beta Blocker**

**Description Field Text**

**Default Status:** On

**Denominator:** Patients with active CVD Known tag (iCare) with two of last three non-ER blood pressures in past two years are Systolic greater than 130 or Diastolic greater than 80 *and* with no current prescriptions or contraindications for beta blocker medications.

**Definition (Frequency):** As needed when no current prescription.

**LOGIC DETAIL**

CVD Known tag (Proposed or Accepted): The patient is categorized in iCare with Known CVD if any of the following criteria are met:

• One ever of primary diagnosis POV for specific cerebrovascular or peripheral vascular disease diagnoses or procedures for CABG, PCI/PTCA, endarterectomy or carotid stent for ambulatory or hospitalization visits. Defined using the following taxonomies: BQI KNOWN CVD-1 DXS or BGP CMS PCI-PTCA DXS for primary diagnosis only; BGP CABG PROCES; BGP CABG CPTS; BGP CMS PCI-PTCA PROCEDURES; BGP CMS PCI PTCA CPTS; BQI KNOWN CVD-1 PROCEDURES; BQI KNOWN CVD-1 CPTS;

  or

• Two primary diagnosis POVs ever for ambulatory or hospitalization visits (not on the same date) of AMI (one instance can be an Active Problem List) at least 90 days apart but no more than two years between first (most recent) and last diagnosis. AMI defined using BGP AMI DXS (HEDIS) taxonomy;
• Three different POVs of IHD on same day for ambulatory or hospitalization visit (one POV must be a primary diagnosis; one instance can be an Active Problem List). Defined using BQI IHD DXS taxonomy; or

• Three primary diagnosis POV for any IHD or other specific cerebrovascular or peripheral vascular disease diagnoses or procedures for ambulatory or hospitalization visits at least 90 days apart but no more than five years between first and last diagnosis (one instance can be an Active Problem List). Defined using taxonomies BQI IHD DXS; BQI KNOWN CVD-MULT DXS; BQI KNOWN CVD-MULT PROCEDURES; BQI KNOWN CVD-MULT CPTS.

**Beta Blocker Medications**

• Site defined Medications: V Medications in BGP HEDIS BETA BLOCKER MEDS taxonomy

• NDC (National Drug Codes): V Medications as predefined in BGP HEDIS BETA BLOCKER NDC taxonomy

• VA Drug Class: V Medications as predefined in BGP CMS BETA BLOCKER CLASS taxonomy

Beta Blocker Contraindications: Defined in RPMS Clinical Reporting System logic document.

**Best Practice Prompt Text**

No Beta Blocker prescribed: Patient is not documented as currently on a beta blocker medication. This patient should be on a beta blocker, if not contraindicated.

**B.36 CVD Known: No Exercise Education**

**Description Field Text**

**Default Status:** On

**Denominator:** Patients with active CVD Known tag (iCare) with no documented exercise education in the past year.

**Definition (Frequency):** As needed when no exercise education is documented.

**Logic Detail**

CVD Known tag (Proposed or Accepted): The patient is categorized in iCare with Known CVD if any of the following criteria are met:
- One ever of primary diagnosis POV for specific cerebrovascular or peripheral vascular disease diagnoses or procedures for CABG, PCI/PTCA, endarterectomy or carotid stent for ambulatory or hospitalization visits. Defined using the following taxonomies: BQI KNOWN CVD-1 DXS or BGP CMS PCI-PTCA DXS for primary diagnosis only; BGP CABG PROCES; BGP CABG CPTS; BGP CMS PCI-PTCA PROCEDURES; BGP CMS PCI PTCA CPTS; BQI KNOWN CVD-1 PROCEDURES; BQI KNOWN CVD-1 CPTS; or

- Two primary diagnosis POVs ever for ambulatory or hospitalization visits (not on the same date) of AMI (one instance can be an Active Problem List) at least 90 days apart but no more than two years between first (most recent) and last diagnosis. AMI defined using BGP AMI DXS (HEDIS) taxonomy; or

- Three different POVs of IHD on same day for ambulatory or hospitalization visit (one POV must be a primary diagnosis; one instance can be an Active Problem List). Defined using BQI IHD DXS taxonomy; or

- Three primary diagnosis POV for any IHD or other specific cerebrovascular or peripheral vascular disease diagnoses or procedures for ambulatory or hospitalization visits at least 90 days apart but no more than five years between first and last diagnosis (one instance can be an Active Problem List). Defined using taxonomies BQI IHD DXS; BQI KNOWN CVD-MULT DXS taxonomy; BQI KNOWN CVD-MULT PROCEDURES; BQI KNOWN CVD-MULT CPTS taxonomy.

**Exercise Education**

Defined using taxonomy BQI EXERCISE COUNSELING DXS

Patient Education Codes: V Patient Ed Codes containing “EX”

**Best Practice Prompt Text**

No Recent Exercise Education: Discuss and document exercise education with this patient.

**Site Configurable?** No.

**B.37 CVD Known: No LDL**

**Description Field Text**

**Default Status:** On

**Denominator:** Patients with active CVD Known tag (iCare) with no documented LDL test result value in the past year.
**Definition (Frequency)**: As needed.

**Logic Detail**

CVD Known tag (Proposed or Accepted): The patient is categorized in iCare with Known CVD if any of the following criteria are met:

- One ever of primary diagnosis POVs for specific cerebrovascular or peripheral vascular disease diagnoses or procedures for CABG, PCI/PTCA, endarterectomy or carotid stent for ambulatory or hospitalization visits. Defined using the following taxonomies: BQI KNOWN CVD-1 DXS or BGP CMS PCI-PTCA DXS for primary diagnosis only; BGP CABG PROCS; BGP CABG CPTS; BGP CMS PCI-PTCA PROCEDURES; BGP CMS PCI PTCA CPTS; BQI KNOWN CVD-1 PROCEDURES; BQI KNOWN CVD-1 CPTS; or

- Two primary diagnosis POVs ever for ambulatory or hospitalization visits (not on the same date) of AMI (one instance can be an Active Problem List) at least 90 days apart but no more than two years between first (most recent) and last diagnosis. AMI defined using BGP AMI DXS (HEDIS) taxonomy; or

- Three different POVs of IHD on same day for ambulatory or hospitalization visit (one POV must be a primary diagnosis; one instance can be an Active Problem List). Defined using BQI IHD DXS taxonomy; or

- Three primary diagnosis POV for any IHD or other specific cerebrovascular or peripheral vascular disease diagnoses or procedures for ambulatory or hospitalization visits at least 90 days apart but no more than five years between first and last diagnosis (one instance can be an Active Problem List). Defined using taxonomies BQI IHD DXS; BQI KNOWN CVD-MULT DXS; BQI KNOWN CVD-MULT PROCEDURES; BQI KNOWN CVD-MULT CPTS.

**LDL Test**

- Site defined Lab Tests: V Lab site defined tests in DM AUDIT LDL CHOLESTEROL TAX taxonomy

- LOINC Codes: V Lab as predefined in BGP LDL LOINC CODES taxonomy

**Note**: CPT Codes will not be used to identify this test because a result value is required.

**Best Practice Prompt Text**

No LDL: Patient has no documented LDL value in the past year. Needs Lipid evaluation, either fasting lipid or lipid profile with direct LDL.

**Site Configurable?** No.
B.38  CVD Known: No Nutrition Education

**Description Field Text**

**Default Status:** On

**Denominator:** Patients with active CVD Known tag (iCare) with no documented nutrition education in the past year.

**Definition (Frequency):** As needed when no nutrition education is documented.

**Logic Detail**

CVD Known tag (Proposed or Accepted): The patient is categorized in iCare with Known CVD if any of the following criteria are met:

- One ever of primary diagnosis POV for specific cerebrovascular or peripheral vascular disease diagnoses or procedures for CABG, PCI/PTCA, endarterectomy or carotid stent for ambulatory or hospitalization visits. Defined using the following taxonomies: BQI KNOWN CVD-1 DXS or BGP CMS PCI-PTCA DXS for primary diagnosis only; BGP CABG PROCS; BGP CABG CPTS; BGP CMS PCI-PTCA PROCEDURES; BGP CMS PCI PTCA CPTS; BQI KNOWN CVD-1 PROCEDURES; BQI KNOWN CVD-1 CPTS; *or*

- Two primary diagnosis POVs ever for ambulatory or hospitalization visits (not on the same date) of AMI (one instance can be an Active Problem List) at least 90 days apart but no more than two years between first (most recent) and last diagnosis. AMI defined using BGP AMI DXS (HEDIS) taxonomy; *or*

- Three different POVs of IHD on same day for ambulatory or hospitalization visit (one POV must be a primary diagnosis; one instance can be an Active Problem List). Defined using BQI IHD DXS taxonomy; *or*

- Three primary diagnosis POV for any IHD or other specific cerebrovascular or peripheral vascular disease diagnoses or procedures for ambulatory or hospitalization visits at least 90 days apart but no more than five years between first and last diagnosis (one instance can be an Active Problem List). Defined using taxonomies BQI IHD DXS; BQI KNOWN CVD-MULT DXS; BQI KNOWN CVD-MULT PROCEDURES; BQI KNOWN CVD-MULT CPTS.

**Nutrition Education**

- Defined by using taxonomy BGP DIETARY SURVEILLANCE DXS
- Patient Education Codes: V Patient Ed Codes containing “N” or “-MNT”
**Best Practice Prompt Text**

No Recent Nutrition Education: Discuss and document nutrition education with this patient.

**Site Configurable?** No.

**B.39 CVD Known: No Recent EKG**

**Description Field Text**

**Default Status:** On

**Denominator:** Patients with active CVD Known tag (iCare) with no documented EKG in the past year.

**Definition (Frequency):** As needed when no recent EKG is documented.

**Logic Detail**

CVD Known tag (Proposed or Accepted): The patient is categorized in iCare with Known CVD if any of the following criteria are met:

- One ever of primary diagnosis POV for specific cerebrovascular or peripheral vascular disease diagnoses or procedures for CABG, PCI/PTCA, endarterectomy or carotid stent for ambulatory or hospitalization visits. Defined using the following taxonomies: BQI KNOWN CVD-1 DXS or BGP CMS PCI-PTCA DXS for primary diagnosis only; BGP CABG PROCES; BGP CABG CPTS; BGP CMS PCI PTCA PROCEDURES; BGP CMS PCI PTCA CPTS; BQI KNOWN CVD-1 PROCEDURES; BQI KNOWN CVD-1 CPTS; or

- Two primary diagnosis POVs ever for ambulatory or hospitalization visits (not on the same date) of AMI (one instance can be an Active Problem List) at least 90 days apart but no more than two years between first (most recent) and last diagnosis. AMI defined using BGP AMI DXS (HEDIS) taxonomy; or

- Three different POVs of IHD on same day for ambulatory or hospitalization visit (one POV must be a primary diagnosis; one instance can be an Active Problem List). Defined using BQI IHD DXS taxonomy; or

- Three primary diagnosis POV for any IHD or other specific cerebrovascular or peripheral vascular disease diagnoses or procedures for ambulatory or hospitalization visits at least 90 days apart but no more than five years between first and last diagnosis (one instance can be an Active Problem List). Defined using taxonomies BQI IHD DXS; BQI KNOWN CVD-MULT DXS; BQI KNOWN CVD-MULT PROCEDURES; BQI KNOWN CVD-MULT CPTS.
Defined using BQI EKG PROCEDURES taxonomy.

**Best Practice Prompt Text**

No EKG has been documented in past year. EKG is due for this patient.

**Site Configurable?** No.

**B.40 CVD Known: No Statin**

**Description Field Text**

**Default Status**: On

**Denominator**: Patients with active CVD Known tag (iCare) with no current prescriptions or contraindications for Statin medications.

**Definition (Frequency)**: As needed when no current prescription.

**Logic Detail**

CVD Known tag (Proposed or Accepted): The patient is categorized in iCare with Known CVD if any of the following criteria are met:

- One ever of primary diagnosis POV for specific cerebrovascular or peripheral vascular disease diagnoses or procedures for CABG, PCI/PTCA, endarterectomy or carotid stent for ambulatory or hospitalization visits. Defined using the following taxonomies: BQI KNOWN CVD-1 DXS or BGP CMS PCI-PTCA DXS for primary diagnosis only; BGP CABG PROCES; BGP CABG CPTS; BGP CMS PCI PTCA CPTS; BQI KNOWN CVD-1 PROCEDURES; BQI KNOWN CVD-1 CPTS; or

- Two primary diagnosis POVs ever for ambulatory or hospitalization visits (not on the same date) of AMI (one instance can be an Active Problem List) at least 90 days apart but no more than two years between first (most recent) and last diagnosis. AMI defined using BGP AMI DXS (HEDIS) taxonomy; or

- Three different POVs of IHD on same day for ambulatory or hospitalization visit (one POV must be a primary diagnosis; one instance can be an Active Problem List). Defined using BQI IHD DXS taxonomy; or

- Three primary diagnosis POV for any IHD or other specific cerebrovascular or peripheral vascular disease diagnoses or procedures for ambulatory or hospitalization visits at least 90 days apart but no more than five years between first and last diagnosis (one instance can be an Active Problem List). Defined using taxonomies BQI IHD DXS; BQI KNOWN CVD-MULT DXS; BQI KNOWN CVD-MULT PROCEDURES; BQI KNOWN CVD-MULT CPTS.
**Statin Medications**

Site defined Medications: V Medications in BGP HEDIS STATIN MEDS taxonomy

NDC (National Drug Codes): V Medications as predefined in BGP HEDIS STATIN NDC taxonomy

Statin Contraindications: Defined in RPMS Clinical Reporting System logic document.

**Best Practice Prompt Text**

No Statin prescribed: Patient is not documented as currently on a Statin medication. Consider prescribing a Statin medication or another lipid lowering agent, if not contraindicated.

Site Configurable? No.

**B.41 CVD Known: Tobacco Use Intervention**

**Description Field Text**

**Default Status:** On

**Denominator:** Patients with active CVD Known tag (iCare) who are documented tobacco users (smoker or smokeless) with no documented tobacco intervention after most recent tobacco use diagnosis.

**Definition (Frequency):** As needed when no tobacco intervention is documented.

**Logic Detail**

CVD Known tag (Proposed or Accepted): The patient is categorized in iCare with Known CVD if any of the following criteria are met:

- One ever of primary diagnosis POV for specific cerebrovascular or peripheral vascular disease diagnoses or procedures for CABG, PCI/PTCA, endarterectomy or carotid stent for ambulatory or hospitalization visits. Defined using the following taxonomies: BQI KNOWN CVD-1 DXS or BGP CMS PCI-PTCA DXS for primary diagnosis only; BGP CABG PROCs; BGP CABG CPTS; BGP CMS PCI-PTCA PROCEDURES; BGP CMS PCI PTCA CPTS; BQI KNOWN CVD-1 PROCEDURES; BQI KNOWN CVD-1 CPTS; or

- Two primary diagnosis POVs ever for ambulatory or hospitalization visits (not on the same date) of AMI (one instance can be an Active Problem List) at least 90 days apart but no more than two years between first (most recent) and last diagnosis. AMI defined using BGP AMI DXS (HEDIS) taxonomy; or
• Three different POVs of IHD on same day for ambulatory or hospitalization visit (one POV must be a primary diagnosis; one instance can be an Active Problem List). Defined using BQI IHD DXS taxonomy; or

• Three primary diagnosis POV for any IHD or other specific cerebrovascular or peripheral vascular disease diagnoses or procedures for ambulatory or hospitalization visits at least 90 days apart but no more than five years between first and last diagnosis (one instance can be an Active Problem List). Defined using taxonomies BQI IHD DXS; BQI KNOWN CVD-MULT DXS; BQI KNOWN CVD-MULT PROCEDURES; BQI KNOWN CVD-MULT CPTS.

Tobacco Use

• Health Factors: most recent V Health Factor TBD BGP TOBACCO USER HLTH FACTORS taxonomy

• V POV or Problem List: defined in BGP GPRA SMOKING DXS taxonomy

• V Dental: defined in taxonomy BGP TOBACCO CESS DENTAL CODE

• Procedures (CPT Codes): defined in BGP TOBACCO USER CPTS taxonomy

Tobacco Intervention or Cessation:

• Procedures (CPT Codes): defined in BGP TOBACCO INTERVENTION CPTS taxonomy

• Clinic: Visit Clinic Code 94 (Tobacco Cessation Clinic)

• Patient Education Codes: V Patient Ed Codes containing “TO-,” “-TO,” “-SHS,” 305.1, 649.00-649.04

• Site defined Medications: V Medications in BGP CMS SMOKING CESSATION MEDS taxonomy or med name containing “Nicotine Patch,” “Nicotine Polacrilex,” “Nicotine Inhaler,” or “Nicotine Nasal Spray”

• NDC (National Drug Codes): V Medications as predefined in BGP CMS SMOKING CESSATION NDC taxonomy

• V Dental: defined in taxonomy BGP TOBACCO CESS DENTAL CODE

Best Practice Prompt Text

Tobacco Cessation: Patient is documented as a current Tobacco User. Consider tobacco cessation intervention.

Site Configurable? No.
B.42 CVD Significant Risk: HDL Not at Goal

**Description Field Text**

**Default Status**: On

**Denominator**: Patients with active CVD At Significant Risk (ASR) tag (iCare) with most recent HDL within past five years NOT at goal, defined as equal to or greater than 40 for males or equal to or greater than 45 for females.

**Definition (Frequency)**: As needed when recent HDL not at goal.

**Logic Detail**

CVD ASR tag (Proposed or Accepted). If patient is not categorized with either Known CVD or At Highest Risk and meets either of the following criteria:

- Greater than (> ) age 18 and at least two CVD Risk Factors; **or**
- Male equal to or greater than age (>=) 45 **or** Female equal to or greater than age (>=) 55; and at least 1 CVD Risk Factor.

CVD Risk Factor defined as any one of the following:

- Current Smoker: the patient has at least two primary or secondary POVs ever for ambulatory or hospitalization visits (not on the same date) or one instance on the Active Problem List or most recent tobacco Health Factor or CPT. Smoking defined using taxonomy BGP SMOKER ONLY DXS or BGP SMOKING HLTH FACTORS or BGP SMOKER CPTS.
- Prediabetes Metabolic Syndrome: the patient has at least two primary or secondary diagnosis POVs ever for ambulatory or hospitalization visits (not on the same date) or one instance on the Active Problem List. Defined using BGP PRE DM MET SYN DX taxonomy.
- Hypertension: the patient has at least three primary or secondary diagnosis POVs for ambulatory or hospitalization visits separated by 90 days or one instance on the Active problem list. Defined using BGP HYPERTENSION DXS taxonomy.
- Obese: The adult patient’s most recent BMI is equal to or greater than (=>) 30.
- High Blood Pressure: Two of last three non-ER blood pressures are Systolic equal to or greater than (=>) 140 or Diastolic equal to or greater than (=>) 90.
- Most recent HDL lab test is less than (<) 40 for men or less than (<) 45 for women. HDL defined by the site in DM AUDIT HDL TAX Taxonomy or pre-defined LOINC codes (BGP HDL LOINC CODES).

Evidence of High Cholesterol defined as any one of the following:
• Prescription for Statin medication in the past year defined by the site in the DM AUDIT STAIN DRUGS taxonomy or predefined NDC or class codes (BQI STATIN MEDS CLASS or BQI STATIN NDC taxonomies).

• Hyperlipidemia: At least two primary or secondary POVs ever for ambulatory or hospitalization visits (not on the same date) or one instance on the Active Problem List. Defined using BQI HYPERLIPIDEMIA DXS taxonomy.

• LDL lab test value equal to or greater than (=>) 160 in past five years. Test is defined by the site in DM AUDIT LDL CHOLESTEROL TAX taxonomy or BGP LDL LOINC CODES taxonomy.

• Total cholesterol value equal to or greater than (=>) 240 in past five years. Test is defined by the site in DM AUDIT CHOLESTEROL TAX taxonomy or BGP TOTAL CHOLESTEROL LOINC taxonomy.

• Non HDL equal to or greater than (=>) 190 in past five years, defined as value of Total Cholesterol minus value of HDL, both results documented on the same date.

Evidence of Nephropathy defined as any one of the following:

• Patients with at least two instances (primary diagnosis POV, Procedure or CPT for ambulatory or hospitalization visits) or one instance on Active Problem List in past five years. Defined using taxonomies BGP NEPHROPATHY DXS or BGP NEPHROPATHY PROCEDURES or BGP NEPHROPATHY CPTS.

• Two Creatinine test results equal to or greater than (=>) 2.0 over past year, separated by at least 90 days. Creatinine test defined by the site in taxonomy DM AUDIT CREATININE TAX or BGP CREATININE LOINC CODES.

• Two Estimated GFR values less than or equal to (<=) 30 over past year, separated by at least 90 days. Estimated GFR test defined by the site in BGP GPRA ESTIMATED GFR TAXonomy or BGP ESTIMATED GFR LOINC taxonomy.

**HDL Test**

Site defined Lab Tests: V Lab site defined tests in DM AUDIT HDL TAX taxonomy

LOINC Codes: V Lab as predefined in BGP HDL LOINC CODES taxonomy

**Best Practice Prompt Text**

HDL Goal: On [date of test], patient’s HDL was [xx]. Patient not at HDL goal [xx]. Consider intensified therapy.
Site Configurable? No.

B.43 CVD Significant Risk: High BP

Description Field Text

Default Status: On

Denominator: Patients with active CVD ASR (CVD ASR) tag (iCare) with two of last three non-ER blood pressures in past two years are Systolic greater than 140 or Diastolic greater than 90.

Definition (Frequency): As needed when blood pressure is elevated.

LOGIC DETAIL

CVD ASR tag (Proposed or Accepted). If patient is not categorized with either Known CVD or AHR and meets either of the following criteria:

- Greater than (> or equal to) age 18 and at least 2 CVD Risk Factors; or
- Male equal to or greater than age (=> or equal to) 45 or Female equal to or greater than age (=> or equal to) 55; and at least one CVD Risk Factor.

CVD Risk Factor defined as any one of the following:

- Current Smoker: the patient has at least two primary or secondary POVs ever for ambulatory or hospitalization visits (not on the same date) or one instance on the Active Problem List or most recent tobacco Health Factor or CPT. Smoking defined using taxonomy BGP SMOKER ONLY DXS or BGP SMOKING HLTH FACTORS or BGP SMOKER CPTS.
- Prediabetes Metabolic Syndrome: the patient has at least two primary or secondary diagnosis POVs ever for ambulatory or hospitalization visits (not on the same date) or one instance on the Active Problem List. Defined using BGP PRE DM MET SYN DX taxonomy.
- Hypertension: the patient has at least three primary or secondary diagnosis POVs for ambulatory or hospitalization visits separated by 90 days or one instance on the Active problem list. Defined using BGP HYPERTENSION DXS taxonomy.
- Obese: The adult patient's most recent BMI is equal to or greater than (=> or equal to) 30.
- High Blood Pressure: two of last three non-ER blood pressures are Systolic equal to or greater than (=> or equal to) 140 or Diastolic equal to or greater than (=> or equal to) 90.
- Most recent HDL laboratory test is less than (< or equal to) 40 for men or less than (< or equal to) 45 for women. HDL defined by the site in taxonomy DM AUDIT HDL TAX or BGP HDL LOINC CODES.
Evidence of High Cholesterol defined as any one of the following:

- Prescription for Statin medication in the past year defined by the site in taxonomy DM AUDIT STAIN DRUGS or BQI STATIN MEDS CLASS or BQI STATIN NDC.
- Hyperlipidemia: At least two primary or secondary POVs ever for ambulatory or hospitalization visits (not on the same date) or one instance on the Active Problem List. Defined using BQI HYPERLIPIDEMIA DXS taxonomy.
- LDL lab test value equal to or greater than (=>) 160 in past five years. Test is defined by the site in DM AUDIT LDL CHOLESTEROL TAX taxonomy or BGP LDL LOINC CODES taxonomy.
- Total cholesterol value equal to or greater than (=>) 240 in past five years. Test is defined by the site in DM AUDIT CHOLESTEROL TAX taxonomy or BGP TOTAL CHOLESTEROL LOINC taxonomy. Non HDL equal to or greater than (=>) 190 in past five years, defined as value of Total Cholesterol minus value of HDL, both results documented on the same date.

Evidence of Nephropathy defined as any one of the following:

- Patients with at least two instances (primary diagnosis POV, Procedure or CPT for ambulatory or hospitalization visits) or one instance on Active Problem List in past five years. Defined using taxonomies BGP NEPHROPATHY DXS or BGP NEPHROPATHY PROCEDURES or BGP NEPHROPATHY CPTS.
- Two Creatinine test results equal to or greater than (=>) 2.0 over past year, separated by at least 90 days. Creatinine test defined by the site in taxonomy DM AUDIT CREATININE TAX or BGP CREATININE LOINC CODES.
- Two Estimated GFR values less than or equal to (<=) 30 over past year, separated by at least 90 days. Estimated GFR test defined by the site in BGP GPRA ESTIMATED GFR TAXonomy or BGP ESTIMATED GFR LOINC taxonomy.

**Best Practice Prompt Text**

High BP: This patient's recent documented BP is greater than (> or equal to 140/90. Consider intensified medical therapy.

**Site Configurable?** No.

**B.44 CVD Significant Risk: High LDL**

**Description Field Text**

**Default Status**: On
**Denominator**: Patients with active CVD ASR tag (iCare) with most recent LDL test result within the past year is greater than 160.

**Definition (Frequency)**: As needed when recent LDL result is higher than 160.

**Logic Detail**

CVD ASR tag (Proposed or Accepted). If patient is not categorized with either Known CVD or AHR and meets either of the following criteria:

- Greater than (> ) age 18 and at least 2 CVD Risk Factors; or
- Male equal to or greater than age (≥ ) 45 or Female equal to or greater than age (≥) 55; and at least 1 CVD Risk Factor.

CVD Risk Factor defined as any one of the following:

- **Current Smoker**: the patient has at least two primary or secondary POVs ever for ambulatory or hospitalization visits (not on the same date) or one instance on the Active Problem List or most recent tobacco Health Factor or CPT. Smoking defined using taxonomy BGP SMOKER ONLY DXS or BGP SMOKING HLTH FACTORS or BGP SMOKER CPTS.
- **Prediabetes Metabolic Syndrome**: the patient has at least two primary or secondary diagnosis POVs ever for ambulatory or hospitalization visits (not on the same date) or one instance on the Active Problem List. Defined using BGP PRE DM MET SYN DX taxonomy.
- **Hypertension**: the patient has at least three primary or secondary diagnosis POVs for ambulatory or hospitalization visits separated by 90 days or one instance on the Active problem list. Defined using BGP HYPERTENSION DXS taxonomy.
- **Obese**: The adult patient's most recent BMI is equal to or greater than (≥) 30.
- **High Blood Pressure**: two of last three non-ER blood pressures are Systolic equal to or greater than (≥) 140 or Diastolic equal to or greater than (≥) 90.
- **Most recent HDL laboratory test is less than (<) 40 for men or less than (<) 45 for women. HDL defined by the site in taxonomy DM AUDIT HDL TAX or BGP HDL LOINC CODES.**

Evidence of High Cholesterol defined as any one of the following:

- **Prescription for Statin medication in the past year defined by the site in taxonomy DM AUDIT STAIN DRUGS or BQI STATIN MEDS CLASS or BQI STATIN NDC.**
• Hyperlipidemia: At least two primary or secondary POVs ever for ambulatory or hospitalization visits (not on the same date) or one instance on the Active Problem List. Defined using BQI HYPERLIPIDEMIA DXS taxonomy.

• LDL lab test value equal to or greater than (=>) 160 in past five years. Test is defined by the site in DM AUDIT LDL CHOLESTEROL TAX taxonomy or BGP LDL LOINC CODES taxonomy.

• Total cholesterol value equal to or greater than (=>) 240 in past five years. Test is defined by the site in DM AUDIT CHOLESTEROL TAX taxonomy or BGP TOTAL CHOLESTEROL LOINC taxonomy.

• Non HDL equal to or greater than (=>) 190 in past five years, defined as value of Total Cholesterol minus value of HDL, both results documented on the same date.

Evidence of Nephropathy defined as any one of the following:

• Patients with at least two instances (primary diagnosis POV, Procedure or CPT for ambulatory or hospitalization visits) or one instance on Active Problem List in past five years. Defined using taxonomies BGP NEPHROPATHY DXS or BGP NEPHROPATHY PROCEDURES or BGP NEPHROPATHY CPTS.

• Two Creatinine test results equal to or greater than (=>) 2.0 over past year, separated by at least 90 days. Creatinine test defined by the site in taxonomy DM AUDIT CREATININE TAX or BGP CREATININE LOINC CODES.

• Two Estimated GFR values less than or equal to (<=) 30 over past year, separated by at least 90 days. Estimated GFR test defined by the site in BGP GPRA ESTIMATED GFR TAX taxonomy or BGP ESTIMATED GFR LOINC taxonomy.

**LDL Test**

• Site defined Lab Tests: defined in DM AUDIT LDL CHOLESTEROL TAX taxonomy

• LOINC Codes: predefined in BGP LDL LOINC CODES taxonomy

**Note** CPT Codes will not be used to identify this test because a result value is required.

**Best Practice Prompt Text**

High LDL: On [date of test], patient's LDL was [xx]. Intensify therapy and reevaluate in two months.

**Site Configurable?** No.
B.45 CVD Significant Risk: Low LDL

Description Field Text

Default Status: On

Denominator: Patients with active CVD At Significant Risk (ASR) tag (iCare) with current prescription or contraindicated for Statin medications and with most recent LDL test result in the past year equal to or less than (\(<\)) 160 and most recent HDL result in the past year less than (\(<\)) 40.

Definition (Frequency): As needed.

Logic Detail

CVD ASR tag (Proposed or Accepted). If patient is not categorized with either Known CVD or At Highest Risk and meets either of the following criteria:

- Greater than (\(>\)) age 18 and at least 2 CVD Risk Factors; or
- Male equal to or greater than age (\(\geq\)) 45 or female equal to or greater than age (\(\geq\)) 55; and at least 1 CVD Risk Factor.

CVD Risk Factor defined as any one of the following:

- Current Smoker: the patient has at least two primary or secondary POVs ever for ambulatory or hospitalization visits (not on the same date) or one instance on the Active Problem List or most recent tobacco Health Factor or CPT. Smoking defined using taxonomy BGP SMOKER ONLY DXS or BGP SMOKING HLTH FACTORS or BGP SMOKER CPTS.
- Prediabetes Metabolic Syndrome: the patient has at least two primary or secondary diagnosis POVs ever for ambulatory or hospitalization visits (not on the same date) or one instance on the Active Problem List. Defined using BGP PRE DM MET SYN DX taxonomy.
- Hypertension: the patient has at least three primary or secondary diagnosis POVs for ambulatory or hospitalization visits separated by 90 days or one instance on the Active problem list. Defined using BGP HYPERTENSION DXS taxonomy.
- Obese: The adult patient's most recent BMI is equal to or greater than (\(\geq\)) 30.
- High Blood Pressure: two of last three non-ER blood pressures are Systolic equal to or greater than (\(\geq\)) 140 or Diastolic equal to or greater than (\(\geq\)) 90.
- Most recent HDL laboratory test is less than (\(<\)) 40 for men or less than (\(<\)) 45 for women. HDL defined by the site in taxonomy DM AUDIT HDL TAX or BGP HDL LOINC CODES.
Evidence of High Cholesterol defined as any one of the following:

- Prescription for Statin medication in the past year defined by the site in taxonomy DM AUDIT STAIN DRUGS or BQI STATIN MEDS CLASS or BQI STATIN NDC.

- Hyperlipidemia: At least two primary or secondary POVs ever for ambulatory or hospitalization visits (not on the same date) or one instance on the Active Problem List. Defined using BQI HYPERLIPIDEMIA DXS taxonomy.

- LDL lab test value equal to or greater than (=>) 160 in past five years. Test is defined by the site in DM AUDIT LDL CHOLESTEROL TAX taxonomy or BGP LDL LOINC CODES taxonomy.

- Total cholesterol value equal to or greater than (=>) 240 in past five years. Test is defined by the site in DM AUDIT CHOLESTEROL TAX taxonomy or BGP TOTAL CHOLESTEROL LOINC taxonomy.

- Non HDL equal to or greater than (=>) 190 in past five years, defined as value of Total Cholesterol minus value of HDL, both results documented on the same date.

Evidence of Nephropathy defined as any one of the following:

- Patients with at least two instances (primary diagnosis POV, Procedure or CPT for ambulatory or hospitalization visits) or one instance on Active Problem List in past five years. Defined using taxonomies BGP NEPHROPATHY DXS or BGP NEPHROPATHY PROCEDURES or BGP NEPHROPATHY CPTS.

- Two Creatinine test results equal to or greater than (=>) 2.0 over past year, separated by at least 90 days. Creatinine test defined by the site in taxonomy DM AUDIT CREATININE TAX or BGP CREATININE LOINC CODES.

- Two Estimated GFR values less than or equal to (<=) 30 over past year, separated by at least 90 days. Estimated GFR test defined by the site in BGP GPRA ESTIMATED GFR TAX taxonomy or BGP ESTIMATED GFR LOINC taxonomy.

**LDL Test**

- Site defined Lab Tests: defined in DM AUDIT LDL CHOLESTEROL TAX taxonomy

- LOINC Codes: predefined in BGP LDL LOINC CODES taxonomy

**Note:** CPT Codes will not be used to identify this test because a result value is required.

**HDL Test**
Site defined Lab Tests: defined in DM AUDIT HDL TAX taxonomy
LOINC Codes: predefined in BGP HDL LOINC CODES taxonomy

Note: CPT Codes will not be used to identify this test because a result value is required.

Statin Medications

- Site defined Medications: defined in BGP HEDIS STATIN MEDS taxonomy
- NDC (National Drug Codes): predefined in BGP HEDIS STATIN NDC taxonomy
- Statin Contraindications: Defined in RPMS Clinical Reporting System logic document.

Best Practice Prompt Text
Low HDL: On [date of test], patient’s HDL was [xx]. Consider therapeutic lifestyle changes and medical intervention if needed.

Site Configurable? No.

B.46 CVD Significant Risk: Missing Risk Factors

Description Field Text

Default Status: On

Denominator: Patients with active CVD ASR tag (iCare) who are not documented in RPMS for any or all of the following CVD risk factors:

- Tobacco Use Screen in the past year; and/or
- Total Cholesterol test in past five years; and/or
- HDL with result in past five years; and/or
- LDL with result in past five years; and/or
- Blood Pressure in the past year.

Definition (Frequency): As needed when any risk factors are missing.

Logic Detail
CVD ASR tag (Proposed or Accepted). If patient is not categorized with either Known CVD or AHR and meets either of the following criteria:

- Greater than (>) age 18 and at least 2 CVD Risk Factors; or
- Male equal to or greater than age (=>) 45 or Female equal to or greater than age (=>) 55; and at least 1 CVD Risk Factor.

CVD Risk Factor defined as any one of the following:

- Current Smoker: the patient has at least two primary or secondary POVs ever for ambulatory or hospitalization visits (not on the same date) or one instance on the Active Problem List or most recent tobacco Health Factor or CPT. Smoking defined using taxonomy BGP SMOKER ONLY DXS or BGP SMOKING HLTH FACTORS or BGP SMOKER CPTS.

- Prediabetes Metabolic Syndrome: the patient has at least two primary or secondary diagnosis POVs ever for ambulatory or hospitalization visits (not on the same date) or one instance on the Active Problem List. Defined using BGP PRE DM MET SYN DX taxonomy.

- Hypertension: the patient has at least three primary or secondary diagnosis POVs for ambulatory or hospitalization visits separated by 90 days or one instance on the Active problem list. Defined using BGP HYPERTENSION DXS taxonomy.

- Obese: The adult patient's most recent BMI is equal to or greater than (=>) 30.

- High Blood Pressure: two of last three non-ER blood pressures are Systolic equal to or greater than (=>) 140 or Diastolic equal to or greater than (=>) 90.

- Most recent HDL laboratory test is less than (<) 40 for men or less than (<) 45 for women. HDL defined by the site in taxonomy DM AUDIT HDL TAX or BGP HDL LOINC CODES.

Evidence of High Cholesterol defined as any one of the following:

- Prescription for Statin medication in the past year defined by the site in taxonomy DM AUDIT STAIN DRUGS or BQI STATIN MEDS CLASS or BQI STATIN NDC.

- Hyperlipidemia: At least two primary or secondary POVs ever for ambulatory or hospitalization visits (not on the same date) or one instance on the Active Problem List. Defined using BQI HYPERLIPIDEMIA DXS taxonomy.

- LDL lab test value equal to or greater than (=>) 160 in past five years. Test is defined by the site in DM AUDIT LDL CHOLESTEROL TAX taxonomy or BGP LDL LOINC CODES taxonomy.

- Total cholesterol value equal to or greater than (=>) 240 in past five years. Test is defined by the site in DM AUDIT CHOLESTEROL TAX taxonomy or BGP TOTAL CHOLESTEROL LOINC taxonomy.
• Non HDL equal to or greater than (=>) 190 in past five years, defined as value of Total Cholesterol minus value of HDL, both results documented on the same date.

Evidence of Nephropathy defined as any one of the following:

• Patients with at least two instances (primary diagnosis POV, Procedure or CPT for ambulatory or hospitalization visits) or one instance on Active Problem List in past five years. Defined using taxonomies BGP NEPHROPATHY DXS or BGP NEPHROPATHY PROCEDURES or BGP NEPHROPATHY CPTS.

• Two Creatinine test results equal to or greater than (=>) 2.0 over past year, separated by at least 90 days. Creatinine test defined by the site in taxonomy DM AUDIT CREATININE TAX or BGP CREATININE LOINC CODES.

• Two Estimated GFR values less than or equal to (<=) 30 over past year, separated by at least 90 days. Estimated GFR test defined by the site in BGP GPRA ESTIMATED GFR TAX taxonomy or BGP ESTIMATED GFR LOINC taxonomy.

**Tobacco Use Screen**

• Health Factors: defined in TBD BGP TOBACCO USER HLTH FACTORS taxonomy

• V POV or Problem List: defined in BGP GPRA SMOKING DXS taxonomy

• V Dental: defined in taxonomy BGP TOBACCO CESS DENTAL CODE

• Procedures (CPT Codes): defined in BGP TOBACCO USER CPTS taxonomy

**Total Cholesterol Test**

• Site defined Lab Tests: defined in DM AUDIT CHOLESTEROL TAX taxonomy

• LOINC Codes: predefined in BGP TOTAL CHOLESTEROL LOINC taxonomy

**Note:** CPT Codes will not be used to identify this test because a result value is required.

**HDL Test**

• Site-Defined Lab Tests: defined in DM AUDIT HDL TAX taxonomy

• LOINC Codes: predefined in BGP HDL LOINC CODES taxonomy

**Note:** CPT Codes will not be used to identify this test because a result value is required.
LDL Test

- Site-Defined Lab Tests: defined in DM AUDIT LDL CHOLESTEROL TAXonomy
- LOINC Codes: predefined in BGP LDL LOINC CODES taxonomy

**Note:** CPT Codes will not be used to identify this test because a result value is required.

Best Practice Prompt Text

Missing information regarding: CVD Risk Factors: This patient may be at risk for CVD. Currently unable to calculate level of risk for this patient and assist in treatment recommendations because the following data is missing [list specifics].

Site Configurable? No.

B.47 CVD Significant Risk: No ASA/Antiplatelet

**Description Field Text**

**Default Status**: On

**Denominator**: Patients with active CVD ASR tag (iCare) with no current prescriptions or contraindications for Aspirin/ASA, Warfarin or other Anti Platelet medications.

**Definition (Frequency)**: As needed when no current prescription.

**Logic Detail**

CVD ASR tag (Proposed or Accepted). If patient is not categorized with either Known CVD or AHR and meets either of the following criteria:

- Greater than (> ) age 18 and at least 2 CVD Risk Factors; or
- Male equal to or greater than age ( => ) 45 or female equal to or greater than age ( => ) 55; and at least 1 CVD Risk Factor.

A Risk Factor defined as any one of the following:

- Current Smoker: the patient has at least two primary or secondary POVs ever for ambulatory or hospitalization visits (not on the same date) or one instance on the Active Problem List or most recent tobacco Health Factor or CPT. Smoking defined using taxonomy BGP SMOKER ONLY DXS or BGP SMOKING HLTH FACTORS or BGP SMOKER CPTS.
• Prediabetes Metabolic Syndrome: the patient has at least two primary or secondary diagnosis POVs ever for ambulatory or hospitalization visits (not on the same date) or one instance on the Active Problem List. Defined using BGP PRE DM MET SYN DX taxonomy.

• Hypertension: the patient has at least three primary or secondary diagnosis POVs for ambulatory or hospitalization visits separated by 90 days or one instance on the Active problem list. Defined using BGP HYPERTENSION DXS taxonomy.

• Obese: The adult patient's most recent BMI is equal to or greater than (\( \geq \)) 30.

• High Blood Pressure: two of last three non-ER blood pressures are Systolic equal to or greater than (\( \geq \)) 140 or Diastolic equal to or greater than (\( \geq \)) 90.

• Most recent HDL laboratory test is less than (\(<\)) 40 for men or less than (\(<\)) 45 for women. HDL defined by the site in taxonomy DM AUDIT HDL TAX or BGP HDL LOINC CODES.

Evidence of High Cholesterol defined as any one of the following:

• Prescription for Statin medication in the past year defined by the site in taxonomy DM AUDIT STAIN DRUGS or BQI STATIN MEDS CLASS or BQI STATIN NDC.

• Hyperlipidemia: At least two primary or secondary POVs ever for ambulatory or hospitalization visits (not on the same date) or one instance on the Active Problem List. Defined using BQI HYPERLIPIDEMIA DXS taxonomy.

• LDL lab test value equal to or greater than (\( \geq \)) 160 in past five years. Test is defined by the site in DM AUDIT LDL CHOLESTEROL TAX taxonomy or BGP LDL LOINC CODES taxonomy.

• Total cholesterol value equal to or greater than (\( \geq \)) 240 in past five years. Test is defined by the site in DM AUDIT CHOLESTEROL TAX taxonomy or BGP TOTAL CHOLESTEROL LOINC taxonomy.

• Non HDL equal to or greater than (\( \geq \)) 190 in past five years, defined as value of Total Cholesterol minus value of HDL, both results documented on the same date.

Evidence of Nephropathy defined as any one of the following:

• Patients with at least two instances (primary diagnosis POV, Procedure or CPT for ambulatory or hospitalization visits) or one instance on Active Problem List in past five years. Defined using taxonomies BGP NEPHROPATHY DXS or BGP NEPHROPATHY PROCEDURES or BGP NEPHROPATHY CPTS.
• Two Creatinine test results equal to or greater than (=>) 2.0 over past year, separated by at least 90 days. Creatinine test defined by the site in taxonomy DM AUDIT CREATININE TAX or BGP CREATININE LOINC CODES.

Two Estimated GFR values less than or equal to (<=) 30 over past year, separated by at least 90 days. Estimated GFR test defined by the site in BGP GPRA ESTIMATED GFR TAX taxonomy or BGP ESTIMATED GFR LOINC taxonomy.

**Aspirin/ASA Medications**

• Site defined Medications: defined in DM AUDIT ASPIRIN DRUGS taxonomy

• NDC (National Drug Codes): predefined in BAT ASTHMA INHLD STEROIDS NDC taxonomy

**Anti Platelet Medications**

• Site defined Medications: defined in BGP ANTIPLATELET DRUGS taxonomy

• VA Drug Class: predefined in BGP CMS ANTI-PLATELET CLASS NDC taxonomy

**Warfarin**

• Site defined Medications: defined in BGP CMS WARFARIN MEDS taxonomy

• NDC (National Drug Codes): predefined in BAT ASTHMA INHLD STEROIDS NDC taxonomy

• Medication Contraindications: Defined in RPMS Clinical Reporting System logic document.

**Best Practice Prompt Text**

• Treatment Recommendation: Patient has two or more risk factors for cardiovascular disease and has no documentation of ASA, Warfarin medications or any other anti-platelet therapy. Consider aspirin therapy, if not contraindicated.

**Site Configurable?** No.

### B.48 CVD Significant Risk: No Exercise Education

**Description Field Text**

**Default Status**: On
**Denominator:** Patients with active CVD ASR tag (iCare) with no documented exercise education in the past year.

**Definition (Frequency):** As needed when no exercise education is documented.

**Logic Detail**

CVD ASR tag (Proposed or Accepted). If patient is not categorized with either Known CVD or AHR and meets either of the following criteria:

- Greater than (> age 18 and at least 2 CVD Risk Factors; or
- Male equal to or greater than age (=>) 45 or female equal to or greater than age (=>) 55; and at least 1 CVD Risk Factor.

A Risk Factor defined as any one of the following:

- **Current Smoker:** the patient has at least two primary or secondary POVs ever for ambulatory or hospitalization visits (not on the same date) or one instance on the Active Problem List or most recent tobacco Health Factor or CPT. Smoking defined using taxonomy BGP SMOKER ONLY DXS or BGP SMOKING HLTH FACTORS or BGP SMOKER CPTS.
- **Prediabetes Metabolic Syndrome:** the patient has at least two primary or secondary diagnosis POVs ever for ambulatory or hospitalization visits (not on the same date) or one instance on the Active Problem List. Defined using BGP PRE DM MET SYN DX taxonomy.
- **Hypertension:** the patient has at least three primary or secondary diagnosis POVs for ambulatory or hospitalization visits separated by 90 days or one instance on the Active problem list. Defined using BGP HYPERTENSION DXS taxonomy.
- **Obese:** The adult patient's most recent BMI is equal to or greater than (=>) 30.
- **High Blood Pressure:** two of last three non-ER blood pressures are Systolic equal to or greater than (=>) 140 or Diastolic equal to or greater than (=>) 90.
- **Most recent HDL laboratory test is less than (<) 40 for men or less than (<) 45 for women. HDL defined by the site in taxonomy DM AUDIT HDL TAX or BGP HDL LOINC CODES.**  

Evidence of High Cholesterol defined as any one of the following:

- **Prescription for Statin medication in the past year defined by the site in taxonomy DM AUDIT STAIN DRUGS or BQI STATIN MEDS CLASS or BQI STATIN NDC.**
• Hyperlipidemia: At least two primary or secondary POVs ever for ambulatory or hospitalization visits (not on the same date) or one instance on the Active Problem List. Defined using BQI HYPERLIPIDEMIA DXS taxonomy.

• LDL lab test value equal to or greater than (≥) 160 in past five years. Test is defined by the site in DM AUDIT LDL CHOLESTEROL TAX taxonomy or BGP LDL LOINC CODES taxonomy.

• Total cholesterol value equal to or greater than (≥) 240 in past five years. Test is defined by the site in DM AUDIT CHOLESTEROL TAX taxonomy or BGP TOTAL CHOLESTEROL LOINC taxonomy.

• Non HDL equal to or greater than (≥) 190 in past five years, defined as value of Total Cholesterol minus value of HDL, both results documented on the same date.

Evidence of Nephropathy defined as any one of the following:

• Patients with at least two instances (primary diagnosis POV, Procedure or CPT for ambulatory or hospitalization visits) or one instance on Active Problem List in past five years. Defined using taxonomies BGP NEPHROPATHY DXS or BGP NEPHROPATHY PROCEDURES or BGP NEPHROPATHY CPTS.

• Two Creatinine test results equal to or greater than (≥) 2.0 over past year, separated by at least 90 days. Creatinine test defined by the site in taxonomy DM AUDIT CREATININE TAX or BGP CREATININE LOINC CODES.

• Two Estimated GFR values less than or equal to (≤) 30 over past year, separated by at least 90 days. Estimated GFR test defined by the site in BGP GPRA ESTIMATED GFR TAX taxonomy or BGP ESTIMATED GFR LOINC taxonomy.

Exercise Education

Defined using taxonomy BQI EXERCISE COUNSELING DXS

Patient Education Codes: V Patient Ed Codes containing “EX”

Best Practice Prompt Text

No Recent Exercise Education: Discuss and document exercise education with this patient.

Site Configurable? No.
B.49 CVD Significant Risk: No Nutrition Education

Description Field Text

Default Status: On

Denominator: Patients with active CVD ASR tag (iCare) with no documented nutrition education in the past year.

Definition (Frequency): As needed when no nutrition education is documented.

Logic Detail

CVD ASR tag (Proposed or Accepted). If patient is not categorized with either Known CVD or AHR and meets either of the following criteria:

- Greater than (> ) age 18 and at least 2 CVD Risk Factors; or
- Male equal to or greater than age (=>) 45 or Female equal to or greater than age (=>) 55; and at least 1 CVD Risk Factor.

A Risk Factor defined as any one of the following:

- Current Smoker: the patient has at least two primary or secondary POVs ever for ambulatory or hospitalization visits (not on the same date) or one instance on the Active Problem List or most recent tobacco Health Factor or CPT. Smoking defined using taxonomy BGP SMOKER ONLY DXS or BGP SMOKING HLTH FACTORS or BGP SMOKER CPTS.
- Prediabetes Metabolic Syndrome: the patient has at least two primary or secondary diagnosis POVs ever for ambulatory or hospitalization visits (not on the same date) or one instance on the Active Problem List. Defined using BGP PRE DM MET SYN DX taxonomy.
- Hypertension: the patient has at least three primary or secondary diagnosis POVs for ambulatory or hospitalization visits separated by 90 days or one instance on the Active problem list. Defined using BGP HYPERTENSION DXS taxonomy.
- Obese: The adult patient's most recent BMI is equal to or greater than (=>) 30.
- High Blood Pressure: two of last three non-ER blood pressures are Systolic equal to or greater than (=>) 140 or Diastolic equal to or greater than (=>) 90.
- Most recent HDL laboratory test is less than (<) 40 for men or less than (<) 45 for women. HDL defined by the site in taxonomy DM AUDIT HDL TAX or BGP HDL LOINC CODES.

Evidence of High Cholesterol defined as any one of the following:
• Prescription for Statin medication in the past year defined by the site in taxonomy DM AUDIT STAIN DRUGS or BQI STATIN MEDS CLASS or BQI STATIN NDC.

• Hyperlipidemia: At least two primary or secondary POVs ever for ambulatory or hospitalization visits (not on the same date) or one instance on the Active Problem List. Defined using BQI HYPERLIPIDEMIA DXS taxonomy.

• LDL lab test value equal to or greater than (=>) 160 in past five years. Test is defined by the site in DM AUDIT LDL CHOLESTEROL TAX taxonomy or BGP LDL LOINC CODES taxonomy.

• Total cholesterol value equal to or greater than (=>) 240 in past five years. Test is defined by the site in DM AUDIT CHOLESTEROL TAX taxonomy or BGP TOTAL CHOLESTEROL LOINC taxonomy.

• Non HDL equal to or greater than (=>) 190 in past five years, defined as value of Total Cholesterol minus value of HDL, both results documented on the same date.

Evidence of Nephropathy defined as any one of the following:

• Patients with at least two instances (primary diagnosis POV, Procedure or CPT for ambulatory or hospitalization visits) or one instance on Active Problem List in past five years. Defined using taxonomies BGP NEPHROPATHY DXS or BGP NEPHROPATHY PROCEDURES or BGP NEPHROPATHY CPTS.

• Two Creatinine test results equal to or greater than (=>) 2.0 over past year, separated by at least 90 days. Creatinine test defined by the site in taxonomy DM AUDIT CREATININE TAX or BGP CREATININE LOINC CODES.

• Two Estimated GFR values less than or equal to (<=) 30 over past year, separated by at least 90 days. Estimated GFR test defined by the site in BGP GPRA ESTIMATED GFR TAX taxonomy or BGP ESTIMATED GFR LOINC taxonomy.

Nutrition Education

Defined by using taxonomy BGP DIETARY SURVEILLANCE DXS

Patient Education Codes: V Patient Ed Codes containing " N" or "-MNT"

Best Practice Prompt Text

No Recent Nutrition Education: Discuss and document nutrition education with this patient.

Site Configurable? No.
B.50  CVD Significant Risk: TG Not at Goal

Description Field Text

Default Status: On

Denominator: Patients with active CVD ASR tag (iCare) with most recent Triglyceride (TG) test result within the past five years is 150–499.

Definition (Frequency): As needed when recent TG not at goal.

Logic Detail

CVD At Significant Risk tag (Proposed or Accepted). If patient is not categorized with either Known CVD or AHR and meets either of the following criteria:

- Greater than (> age 18 and at least 2 CVD Risk Factors; or
- Male equal to or greater than age (=>) 45 or Female equal to or greater than age (=>) 55; and at least one CVD Risk Factor.

A Risk Factor defined as any one of the following:

- Current Smoker: the patient has at least two primary or secondary POVs ever for ambulatory or hospitalization visits (not on the same date) or one instance on the Active Problem List or most recent tobacco Health Factor or CPT. Smoking defined using taxonomy BGP SMOKER ONLY DXS or BGP SMOKING HLTH FACTORS or BGP SMOKER CPTS.
- Prediabetes Metabolic Syndrome: the patient has at least two primary or secondary diagnosis POVs ever for ambulatory or hospitalization visits (not on the same date) or one instance on the Active Problem List. Defined using BGP PRE DM MET SYN DX taxonomy.
- Hypertension: the patient has at least three primary or secondary diagnosis POVs for ambulatory or hospitalization visits separated by 90 days or one instance on the Active problem list. Defined using BGP HYPERTENSION DXS taxonomy.
- Obese: The adult patient's most recent BMI is equal to or greater than (=>) 30.
- High Blood Pressure: two of last three non-ER blood pressures are Systolic equal to or greater than (=>) 140 or Diastolic equal to or greater than (=>) 90.
- Most recent HDL laboratory test is less than (<) 40 for men or less than (<) 45 for women. HDL defined by the site in taxonomy DM AUDIT HDL TAX or BGP HDL LOINC CODES.

Evidence of High Cholesterol defined as any one of the following:
• Prescription for Statin medication in the past year defined by the site in taxonomy DM AUDIT STAIN DRUGS or BQI STATIN MEDS CLASS or BQI STATIN NDC.

• Hyperlipidemia: At least two primary or secondary POVs ever for ambulatory or hospitalization visits (not on the same date) or one instance on the Active Problem List. Defined using BQI HYPERLIPIDEMIA DXS taxonomy.

• LDL lab test value equal to or greater than (=>) 160 in past five years. Test is defined by the site in DM AUDIT LDL CHOLESTEROL TAX taxonomy or BGP LDL LOINC CODES taxonomy.

• Total cholesterol value equal to or greater than (=>) 240 in past five years. Test is defined by the site in DM AUDIT CHOLESTEROL TAX taxonomy or BGP TOTAL CHOLESTEROL LOINC taxonomy.

• Non HDL equal to or greater than (=>) 190 in past five years, defined as value of Total Cholesterol minus value of HDL, both results documented on the same date.

Evidence of Nephropathy defined as any one of the following:

• Patients with at least two instances (primary diagnosis POV, Procedure or CPT for ambulatory or hospitalization visits) or one instance on Active Problem List in past five years. Defined using taxonomies BGP NEPHROPATHY DXS or BGP NEPHROPATHY PROCEDURES or BGP NEPHROPATHY CPTS.

• Two Creatinine test results equal to or greater than (=>) 2.0 over past year, separated by at least 90 days. Creatinine test defined by the site in taxonomy DM AUDIT CREATININE TAX or BGP CREATININE LOINC CODES.

• Two Estimated GFR values less than or equal to (<=) 30 over past year, separated by at least 90 days. Estimated GFR test defined by the site in BGP GPRA ESTIMATED GFR TAX taxonomy or BGP ESTIMATED GFR LOINC taxonomy.

Triglyceride (TG) Test

Site defined Lab Tests: defined in DM AUDIT TRIGLYCERIDE TAX taxonomy

LOINC Codes: predefined in BGP TRIGLYCERIDE LOINC CODES taxonomy

Note: CPT Codes will not be used to identify this test because a result value is required.

Best Practice Prompt Text

TG Goal: On [date of test], patient's TG was [xx]. Consider intensified therapy.
Site Configurable? No.

B.51 CVD Significant Risk: TG Recommendation

Description Field Text

Default Status: On

Denominator: Patients with active CVD ASR tag (iCare) with most recent Triglyceride (TG) test result within the past five years is equal to or greater than 500.

Definition (Frequency): As needed when recent TG result is 500 or higher.

Logic Detail

CVD At Significant Risk tag (Proposed or Accepted). If patient is not categorized with either Known CVD or At Highest Risk and meets either of the following criteria:

- Greater than (>) age 18 and at least two CVD Risk Factors; or
- Male equal to or greater than age (=>) 45 or female equal to or greater than age (=>) 55; and at least 1 CVD Risk Factor.

A Risk Factor defined as any one of the following:

- Current Smoker: the patient has at least two primary or secondary POVs ever for ambulatory or hospitalization visits (not on the same date) or one instance on the Active Problem List or most recent tobacco Health Factor or CPT. Smoking defined using taxonomy BGP SMOKER ONLY DXS or BGP SMOKING HLTH FACTORS or BGP SMOKER CPTS.
- Prediabetes Metabolic Syndrome: the patient has at least two primary or secondary diagnosis POVs ever for ambulatory or hospitalization visits (not on the same date) or one instance on the Active Problem List. Defined using BGP PRE DM MET SYN DX taxonomy.
- Hypertension: the patient has at least three primary or secondary diagnosis POVs for ambulatory or hospitalization visits separated by 90 days or one instance on the Active problem list. Defined using BGP HYPERTENSION DXS taxonomy.
- Obese: The adult patient's most recent BMI is equal to or greater than (=>) 30.
- High Blood Pressure: two of last three non-ER blood pressures are Systolic equal to or greater than (=>) 140 or Diastolic equal to or greater than (=>) 90.
• Most recent HDL laboratory test is less than (<) 40 for men or less than (<) 45 for women. HDL defined by the site in taxonomy DM AUDIT HDL TAX or BGP HDL LOINC CODES.

Evidence of High Cholesterol defined as any one of the following:

• Prescription for Statin medication in the past year defined by the site in taxonomy DM AUDIT STAIN DRUGS or BQI STATIN MEDS CLASS or BQI STATIN NDC.

• Hyperlipidemia: At least two primary or secondary POVs ever for ambulatory or hospitalization visits (not on the same date) or one instance on the Active Problem List. Defined using BQI HYPERLIPIDEMIA DXS taxonomy.

• LDL lab test value equal to or greater than (=>) 160 in past five years. Test is defined by the site in DM AUDIT LDL CHOLESTEROL TAX taxonomy or BGP LDL LOINC CODES taxonomy.

• Total cholesterol value equal to or greater than (=>) 240 in past five years. Test is defined by the site in DM AUDIT CHOLESTEROL TAX taxonomy or BGP TOTAL CHOLESTEROL LOINC taxonomy.

• Non HDL equal to or greater than (=>) 190 in past five years, defined as value of Total Cholesterol minus value of HDL, both results documented on the same date.

Evidence of Nephropathy defined as any one of the following:

• Patients with at least two instances (primary diagnosis POV, Procedure or CPT for ambulatory or hospitalization visits) or one instance on Active Problem List in past five years. Defined using taxonomies BGP NEPHROPATHY DXS or BGP NEPHROPATHY PROCEDURES or BGP NEPHROPATHY CPTS.

• Two Creatinine test results equal to or greater than (=>) 2.0 over past year, separated by at least 90 days. Creatinine test defined by the site in taxonomy DM AUDIT CREATININE TAX or BGP CREATININE LOINC CODES.

• Two Estimated GFR values less than or equal to (<=) 30 over past year, separated by at least 90 days. Estimated GFR test defined by the site in BGP GPRA ESTIMATED GFR TAXonomy or BGP ESTIMATED GFR LOINC taxonomy.

**Triglyceride (TG) Test**

Site defined Lab Tests: defined in DM AUDIT TRIGLYCERIDE TAXonomy

LOINC Codes: predefined in BGP TRIGLYCERIDE LOINC CODES taxonomy

**Note:** CPT Codes will not be used to identify this test because a result value is required.
**Best Practice Prompt Text**

TG Recommendation: On [date of test], patient's TG was greater than (> 500 [xx]. Confirm fasting sample and strongly consider drug therapy to avoid pancreatitis.

Site Configurable? No.

**B.52 CVD Significant Risk: Tobacco Use Intervention**

**Description Field Text**

Default Status: On

Denominator: Patients with active CVD ASR tag (iCare) who are documented tobacco users (smoker or smokeless) with no documented tobacco intervention after most recent tobacco use diagnosis.

Definition (Frequency): As needed when no tobacco intervention is documented.

**Logic Detail**

CVD ASR tag (Proposed or Accepted). If patient is not categorized with either Known CVD or AHR and meets either of the following criteria:

- Greater than (> age 18 and at least 2 CVD Risk Factors; or
- Male equal to or greater than age (≥ 45) or Female equal to or greater than age (≥ 55); and at least one CVD Risk Factor.

A Risk Factor defined as any one of the following:

- Current Smoker: the patient has at least two primary or secondary POVs ever for ambulatory or hospitalization visits (not on the same date) or one instance on the Active Problem List or most recent tobacco Health Factor or CPT. Smoking defined using taxonomy BGP SMOKER ONLY DXS or BGP SMOKING HLTH FACTORS or BGP SMOKER CPTS.
- Prediabetes Metabolic Syndrome: the patient has at least two primary or secondary diagnosis POVs ever for ambulatory or hospitalization visits (not on the same date) or one instance on the Active Problem List. Defined using BGP PRE DM MET SYN DX taxonomy.
- Hypertension: the patient has at least three primary or secondary diagnosis POVs for ambulatory or hospitalization visits separated by 90 days or one instance on the Active problem list. Defined using BGP HYPERTENSION DXS taxonomy.
- Obese: The adult patient's most recent BMI is equal to or greater than (≥) 30.
• High Blood Pressure: two of last three non-ER blood pressures are Systolic equal to or greater than (=>) 140 or Diastolic equal to or greater than (=>) 90.

• Most recent HDL laboratory test is less than (<) 40 for men or less than (<) 45 for women. HDL defined by the site in taxonomy DM AUDIT HDL TAX or BGP HDL LOINC CODES.

Evidence of High Cholesterol defined as any one of the following:

• Prescription for Statin medication in the past year defined by the site in taxonomy DM AUDIT STAIN DRUGS or BQI STATIN MEDS CLASS or BQI STATIN NDC.

• Hyperlipidemia: At least two primary or secondary POVs ever for ambulatory or hospitalization visits (not on the same date) or one instance on the Active Problem List. Defined using BQI HYPERLIPIDEMIA DXS taxonomy.

• LDL lab test value equal to or greater than (=>) 160 in past five years. Test is defined by the site in DM AUDIT LDL CHOLESTEROL TAX taxonomy or BGP LDL LOINC CODES taxonomy.

• Total cholesterol value equal to or greater than (=>) 240 in past five years. Test is defined by the site in DM AUDIT CHOLESTEROL TAX taxonomy or BGP TOTAL CHOLESTEROL LOINC taxonomy.

• Non HDL equal to or greater than (=>) 190 in past five years, defined as value of Total Cholesterol minus value of HDL, both results documented on the same date.

Evidence of Nephropathy defined as any one of the following:

• Patients with at least two instances (primary diagnosis POV, Procedure or CPT for ambulatory or hospitalization visits) or one instance on Active Problem List in past five years. Defined using taxonomies BGP NEPHROPATHY DXS or BGP NEPHROPATHY PROCEDURES or BGP NEPHROPATHY CPTS.

• Two Creatinine test results equal to or greater than (=>) 2.0 over past year, separated by at least 90 days. Creatinine test defined by the site in taxonomy DM AUDIT CREATININE TAX or BGP CREATININE LOINC CODES.

• Two Estimated GFR values less than or equal to (<=) 30 over past year, separated by at least 90 days. Estimated GFR test defined by the site in BGP GPRA ESTIMATED GFR TAX taxonomy or BGP ESTIMATED GFR LOINC taxonomy.

Tobacco Use

• Health Factors: defined in TBD BGP TOBACCO USER HLTH FACTORS taxonomy
• V POV or Problem List: defined in BGP GPRA SMOKING DXS taxonomy
• V Dental: defined in taxonomy BGP TOBACCO CESSION DENTAL CODE
• Procedures (CPT Codes): BGP TOBACCO USER CPTS taxonomy

**Tobacco Intervention or Cessation**

• Procedures (CPT Codes): defined in BGP TOBACCO INTERVENTION CPTS taxonomy
• Clinic: Visit Clinic Code 94 (Tobacco Cessation Clinic)
• Patient Education Codes: V Patient Ed Codes containing “TO-,” “-TO,” “-SHS,” 305.1, 649.00-649.04
• Site defined Medications: in BGP CMS SMOKING CESSION MEDS taxonomy or med name containing “Nicotine Patch,” “Nicotine Polacrilex,” “Nicotine Inhaler,” or “Nicotine Nasal Spray”
• NDC (National Drug Codes): predefined in BGP CMS SMOKING CESSION NDC taxonomy
• V Dental: BGP TOBACCO CESSION DENTAL CODE

**Best Practice Prompt Text**

Tobacco Cessation: Patient is documented as a current Tobacco User. Consider tobacco cessation intervention.

**Site Configurable?** No.

---

**B.53 Hearing Inquiry**

**Description Field Text**

**Default Status:** On

**Denominator:** All patients ages 65 and older.

**Definition (Frequency):** N/A. This prompt appears routinely once the patient is age 65.

**Best Practice Prompt Text**

Patient is over 64 years old. Consider inquiring about hearing difficulties at least every two years.

**Site Configurable?** Yes: ages only.
**Tooltip Text**
This patient is 65 or older and should be asked about hearing difficulties at least every two years.

**B.54 Rubella Vaccination (Adult)**

**Description Field Text**

**Default Status:** Off

**Denominator:** Patients who are not documented as immune or with no documented rubella immunization since age one year.

- Born in 1957 or later who are at least 18; or
- Females who were born in 1957 or earlier and are currently less than age 50 years

**Note:** No longer applicable

**Definition (Frequency):** Once at or after age one year.

**Logic Detail**

**Rubella Vaccination:**

- Immunization/CVX Codes: V Immunization or Refusal 3, 4, 6, 38, 94
- Rubella Immunity Status: Health Factor: V Health Factor category Rubella Immunity Status: Immune, Non-Immune, Indeterminate

Different messages are displayed based on the patient’s documented Immunity Status.

**Best Practice Prompt Text**

A Rubella Immunization is due after age one; this adult (18+) patient born in 1957 or later has no documented immunization. [RUBELLA]

Currently Define Criteria is Use at this Facility

**Tooltip Text**

A rubella immunization is due after age one; this adult (18+) patient born in 1957 or later has no documented immunization.

**B.55 Strabismus/Amblyopia Screen**

**Description Field Text**

**Default Status:** On
**Denominator**: All patients from ages two to three years.

**Definition (Frequency)**: One time. This prompt will continue to appear for patients through age 4 years, until the test is documented.

**Best Practice Prompt Text**

Consider checking for strabismus and amblyopia.

**Site Configurable?**: No.

**Tooltip Text**

The U.S. Preventive Services Task Force (USPSTF) recommends screening children younger than five years for amblyopia, strabismus, and visual acuity.
Appendix C: Asthma Supplement Logic

Below is the logic for the Asthma Supplement.

Section Name: Heading
Order: 1

Description: Displays general information about the patient and facility.

Logic/Source
1st row: Standard printed report header “Confidential Patient Information”; report date and time; user initials

2nd row: “Asthma Patient Care Summary”; page number

3rd row: Patient last name, first name; HRN

4th row: DOB; Age; Sex; Asthma Diagnostic Tag: [Tag Status], if current status is Proposed or Accepted] or “None” or—if site is not running iCare, text should be “Data Not Available”

5th row: Patient’s assigned providers from the Designated Specialty Provider Management (BDP) application

Note: The Supplement should observe the same business rule about displaying the HIV Provider as will be applied to Health Summary.

Section Name: Heading Pages 2 and up
Order: 2

Description: Displays at the top of the summary if the summary is more than one page.

Logic/Source
1st row: “Confidential” header as above

2nd row: “Asthma Patient Care Summary”; Page #

Section Name: Problem List
Order: 3
**Description**: Indicates whether asthma diagnosis is on the patient’s problem list, with (1) a classification (Asthma Severity); (2) an onset date, if any, (3) date record was last updated; and (4) any associated notes.

**Logic/Source**

**Logic**: Patient, who has a Problem List diagnosis (ICD code) of Asthma, defined as taxonomy BGP ASTHMA DXS.

**Display Text**: If the criteria is met, the system displays [Problem ID] [Provider narrative] ([ICD DX code]), e.g. “DIH3 Asthma (J45.909)”

**Asthma Severity**: [value] or “None Documented”

**Date of Onset**: [Date of Onset] or “None Documented”

**Date Last Updated**: [Date Last Updated]

**Note ID**: Entry Date (if any) Note Narrative. If the criterion is not met, the system displays: “ASTHMA IS NOT ON THIS PATIENT'S PROBLEM LIST; CONSIDER ADDING.”

**Section Name**: 

**Order**: 4

**Description**: 

**Logic/Source**

**Section Name**: Most Recent Control

**Order**: 5

**Description**: Displays the patient’s most recent asthma control and the date documented.

**Logic/Source**

**V Asthma**: Control field – most recent documented

**Display**: “Most Recent Control: [Visit Date] [Control]

**Section Name**: Asthma-Related Family Health History

**Order**: 6

**Description**: Displays any documented family history related to asthma, using same display as Health Summary.
**Logic/Source**

If FamHX diagnosis for any Relation is Z82.5 or defined in BGP ASTHMA DXS, display the Health Summary format

If none, display “None Documented”

**Section Name: Personal Best Peak Flow**

**Order:** 7

**Description:** Displays the patient’s highest BPF measurement and date documented.

**Logic/Source**

V Measurements: BPF field–review all documented values and display the highest number

**Display:** “Personal Best Peak Flow [value] on [Visit Date]” or “None Documented”

**Section Name: Peak Flow Zones**

**Order:** 8

**Description:** Displays hard-coded text explaining the “green,” “yellow,” and “red” zones for peak flow measurements.

Also displays the patient’s BPF calculation for the green, yellow, and red zone. This calculation is also calculated in the AAP.

**Logic/Source**

Use the patient’s highest BPF, if any, to calculate and display the three zones defined below.

**Display:**

Green (80–100%): xx–xx liters/minute

Yellow (50–79%): xx–xx liters/minute

Red (< 50%): < xx liters/minute

If no BPF, display “Peak Flow Zones could not be calculated; BPF must be documented.”

**Section Name: Date of last AAP**

**Order:** 9

**Description:** Displays the date of the last AAP.
Logic/Source

The Action Plan is in the process of being moved from BAT to Patient Education, once the DBA releases the new PatEd AUPN patch. The supplement may need to look at both sources.

BAT Source

Pull from FILE: ASTHMA REGISTER / GLOBAL: ^BATREG( / FILE #: 90181.01

File #: .093

File Name: DATE OF ASTHMA MANAGEMENT PLAN

Subscript: COMPUTED

PED Source

V PED–ASM-SMP value

Display: “Date of Last Asthma Action Plan [visit date or BAT data]

If there is no date, “Needs to be reviewed” displays. If the date has exceeded one year, add “Needs to be reviewed” after the date.

Section Name: Triggers

Order: 10

Description: Displays the most recent entry for each asthma trigger, and date.

Logic/Source

V Health Factors: Asthma Triggers category

Section Name: Last Recorded Tobacco Health Factor

Order: 11

Description: Displays the most recent Tobacco Health Factor and the date entered.

Logic/Source

V Health Factors: Tobacco category

Display: “Last Recorded TOBACCO Health Factor: [Visit Date] [Health Factor]

Section Name: Last 5 Visits with Lung Function Measurements

Order: 12
Description: Displays the last five visits in which lung function measurements (FEV1/FVC, Peak Flow, FEF 25–75) were documented.

Logic/Source
V Measurements

Lung function measurements are:

1st column: [Visit Date]

2nd column: FEV1/FVC (FVFC)–Displays both values, then the calculations (e.g., 4/6 (0.66)). If there are multiple values for a single visit, display the highest number.

3rd column: Highest Visit Peak Flow–If there are multiple values for a single visit, display the highest number.

4th column: FEF 25–75 (FEF)

See example Asthma Supplement below for guidance.

Section Name: Asthma Symptom Free Days
Order: 13

Description: Displays results from the last three visits in the past year, and date recorded.

Logic/Source
V Measurements: ASFD

Display Visit Date and # of Days

In addition, if most recent visit is more than one year old, then the following displays: “Asthma Symptom Free Days should be reviewed at every Asthma visit.”

Section Name: Asthma Work/School Days Missed
Order: 14

Description: Displays results from the last three visits in the past year, and date recorded.

Logic/Source
V Measurements: ADM

In addition, if last visit is more than one year old, then the following displays: “Asthma work/school days missed should be reviewed at every Asthma visit.”
Section Name: Number of Reliever Fills in past 6 months
Order: 15

Description: Displays tally of Reliever Fills in the past 6 months.

Logic/Source
Source: V Medication

Logic: Counts number of prescribed medications in past six months (183 days) as defined in any of the following taxonomies:

- BAT ASTHMA SHRT ACT RELV NDC
- BAT ASTHMA SHRT ACT RELV MEDS
- BAT ASTHMA SHRT ACT INHLR NDC
- BAT ASTHMA SHRT ACT INHLR MEDS
- BGP RA GLUCOCORTIOCOIDS
- BGP RA GLUCOCORTIOCOIDS CLASS

Order: 16

Section Name: Number of Controller Fills in Past 6 Months
Description: Displays a list of Controller Fills in the past six months.

Logic/Source
Source: V Medication

Logic: Counts number of prescribed medications in past six months (183 days) as defined in any of the following taxonomies:

- BAT ASTHMA CONTROLLER MEDS
- BAT ASTHMA CONTROLLER NDC
- BAT ASTHMA INHALED STEROIDS
- BAT ASTHMA INHLD STEROIDS NDC
- BAT ASTHMA LEUKOTRIENE MEDS
- BAT ASTHMA LEUKOTRIENE NDC

Section Name: Asthma Medications (Replaced by Two Separate Sections: Reliever Medications (Filled in Last Six Months) and Controller Medications (Filled in Last Six Months))
Order: 17
Description: Displays asthma-related prescriptions filled in the past six months, organized by Relievers, then Controllers.

Add legend/key to the top of the listing that identifies the information in each column: Date filled, Status, Medication name, strength, instructions, # of times filled this year, # of refills left.

Add two more character spaces on the date to ensure that there is enough room for MM/DD/YYYY format. The current supplement cuts off dates with this format.

Logic/Source
Prescribed asthma-related medications for the past six months (183 days), organized by Relievers and Controllers.

V Medication

Relievers defined as:

- BAT ASTHMA SHRT ACT RELV NDC
- BAT ASTHMA SHRT ACT RELV MEDS
- BAT ASTHMA SHRT ACT INHLR NDC
- BAT ASTHMA SHRT ACT INHLR MEDS
- BGP RA GLUCOCORTIOCOIDS
- BGP RA GLUCOCORTIOCOIDS CLASS

Controllers defined as:

- BAT ASTHMA CONTROLLER MEDS
- BAT ASTHMA CONTROLLER NDC
- BAT ASTHMA INHALED STEROIDS
- BAT ASTHMA INHLD STEROIDS NDC
- BAT ASTHMA LEUKOTRIENE MEDS
- BAT ASTHMA LEUKOTRIENE NDC

Section Name: Last of each Asthma Patient Education Done

Order: 18

Description: Displays the most recent of each asthma-related patient education events. Displays the education mnemonic, topic, level of understanding, date of education, and any goals data.

Add legend/key to the top of the listing that identifies the information in each column.
Logic/Source

Include any V PED topics:

- ASM-*
- 493-*
- PL
- M-MDI
- M-NEB

- Display as three columns: Topic, Level of Understanding, and Date
- Display goal code and goal comment on indented line underneath
- Sort alphabetically by topic.
Appendix D: Health Factors

Please refer to the “Health Factor and Exam Codes Documentation Guide” for a complete listing of Health Factors and guidance for assessing and documenting results.
Appendix E: Exam Codes

Please refer to the “Health Factor and Exam Codes Documentation Guide” for a complete listing of Exam Codes and guidance for assessing and documenting results.
Appendix F: Health Summary Form

Use this form as a guide to help you plan for and request a new health summary type.

To: Health Summary Coordinator/Site Manager

From:

Instructions for filling out this request form: Please complete all of the items below. Identify the order in which the component should display, the name of the component, any alternate name you would like displayed, the maximum number of occurrences and the time limit for display of data, and any specific items that need to be selected individually. Note that you will need to specify individual items for the lab test, health factors, and HMR components. You will also need to indicate the names of any measurement panels or flowsheets, if you have chosen these components.

Health Summary Type Name:

ICD Text Display: ___ Long ___ Short ___Code Only ___None

Provider Narrative Displayed? ___ Yes ___ No

Clinic Name Displayed? ___ Yes ___ No
Appendix G: Health Summary Data Components

Health Summaries are composed of a series of data groupings called *components*. These components encompass a wide variety of information regarding a patient’s health status. Each component represents a major class of PCC data; for example, active problems or measurements.

The following list contains the components that appear in the Health Summaries. Many of these components are displayed in the standard Health Summaries distributed with this package. These components can be used to create customized Health Summaries that meet the needs of providers at the user’s facility. (Refer to the Section 3.6 of this manual for detailed instructions on developing customized health summaries.)

Some of these components can be modified to display only certain types and amounts of data; for instance, the last two years of only height and weight values in the Measurement Panel. Different components might display the same class of data in different ways; for example, the ten most recent outpatient visits or all outpatient visits during the past five years.

Each of the following components is described in detail in this section. A sample printout of each is provided for reference.

- ACTIVE WAIT LIST ENTRIES
- ALLERGIES (FROM PROBLEM LIST)
- ALLERGIES/ADVERSE REACTIONS (B
- ALLERGIES/ADVERSE REACTIONS (D
- AMI
- BEHAVIORAL HEALTH
- BEST PRACTICE PROMPTS
- BLOOD BANK–MOST RECENT

• TREATMENTS/REGIMEN BY PROBLEM
• TREATMENTS PROVIDED
• VISIT INSTRUCTIONS BY DATE
• VISIT INSTRUCTIONS BY PROBLEM
• WELL CHILD EXAM
G.1 Display Format

The separate components of a Health Summary are delineated by dividing lines that frame the individual component headings. For example

```
-------------------------- DEMOGRAPHIC DATA ------------------------
```

Figure G-1: Example display format

If no data exist for a given component, the component heading will not appear. If data for a component exist, but have subsequently fallen outside the component’s restrictions of time or number of occurrences, then a heading appears, but no data are displayed. For example, the Most Recent Laboratory Data component displays laboratory results for the past two years only. If the patient had a glucose test taken three years ago and no other laboratory tests since then, this test result would not print in the Health Summary. Instead, only the component heading would display. However, if a patient has never had any laboratory tests, no heading will display.

Whether the Health Summary is printed or displayed on a video terminal, it will have a standard heading (see Figure G-2) that contains the following information on each page:

- Date and time the summary was produced
- Initials of the person who requested the report
- Patient’s name
- Health Record Number
- Health summary type
  - Page number

Figure G-2: Example heading

G.2 Data Restrictions

It is not always useful to display all of the data that exist for a given component, since some of the data might be very old and therefore irrelevant in planning for the care of the individual patient. For instance, a 65-year-old patient who has been receiving services at the user’s facility for 20 years will have had many visits during that time period. The user would probably not want all of these visits printed for the Outpatient/Field Visits component of the Health Summary. For this reason, the user will want to restrict the amount of data that will print for each component. For instructions on restricting the data that displays for each component, see the Supervisory Functions section.
The data displayed for each component can be restricted in the following manner:

- Specify the maximum number of occurrences to display for a component. For example, the following component is limited to the last five recorded visits.

```
---------- OUTPATIENT/FIELD VISITS (max 5 visits) ---------------
```

Figure G-3: Example of maximum visits

- Place a time restriction on the component. This restriction can be expressed in days, weeks, months, or years. In Figure G-4, only the visits that occurred within the past year will be printed.

```
---------- OUTPATIENT/FIELD VISITS (1 year) -------------------
```

Figure G-4: Example of time restriction

- Both the number of occurrences and the time period can be specified for a single component. When you have placed these two types of restrictions on a component, only the more restrictive of the two limits applies. In Figure G-5, the Outpatient/Field Visits were restricted to a maximum of ten occurrences or to the last two years. If the last 10 visits occurred within the past two years, all of the visits would print. If only four visits occurred in the past two years, although the patient had 10 total visits, only four visits would print.

```
--------- OUTPATIENT/FIELD VISITS (max 10 visits or 2 years) ------
```

Figure G-5: Example of number of occurrences and time period

Note that for each component, the data restriction displays, as shown in the previous examples. If no restrictions have been placed on the data to be displayed, no notation will display in the heading and all data in that class will be displayed, as shown below.

```
---------- OUTPATIENT/FIELD VISITS -----------------------------
```

Figure G-6: Example of no notation

The components included in the standard Health Summaries distributed with this package already contain restrictions on the data that will display for each.

**G.3 Active Wait List**

The Active Wait List component displays the wait list entries for the patient that was entered in the PIMS module.

```
---------- ACTIVE WAIT LIST ENTRIES ----------------------------
```

G.3 Active Wait List

The Active Wait List component displays the wait list entries for the patient that was entered in the PIMS module.

```
---------- ACTIVE WAIT LIST ENTRIES ----------------------------
```

G.3 Active Wait List

The Active Wait List component displays the wait list entries for the patient that was entered in the PIMS module.
G.4 Allergies (from Problem List)

The Allergies (from Problem List) component highlights the patient’s medication allergies typed into the PCC database in the patient’s active Problem List. If an allergy is recorded in the Problem List, it will display in the Allergies (from Problem List) component, as in below:

<table>
<thead>
<tr>
<th>Date Added/Recall Date</th>
<th>Wait List Name</th>
<th>Provider</th>
<th>Priority</th>
</tr>
</thead>
<tbody>
<tr>
<td>NOV 17, 2009/NOV 17, 2009</td>
<td>GENERAL</td>
<td>QVPROVIDER,BONNIE HIGH</td>
<td></td>
</tr>
</tbody>
</table>

Figure G-7: Example of Active Wait List component

Figure G-8: Example of the Allergies component

This component can also be used to identify patients with no known allergies. If an ICD code of R69 and a narrative of NKA or No Known Allergy are on the patient’s Problem List, the message “No Allergy Noted” displays, along with the date on which the code and narrative were entered into the PCC, as shown below:

```
------------------- ALLERGIES (FROM PROBLEM LIST) -------------------
NO ALLERGY NOTED ON JAN 7, 1995
```

Figure G-9: Example of No Allergy Noted message

If no allergies were recorded in the patient’s Problem List, the message “None Recorded” displays, as in Figure G-10.

```
------------------- ALLERGIES (FROM PROBLEM LIST) -------------------
***** NONE RECORDED *****
```

Figure G-10: Example of None Recorded message

Note that the information that displays in this section is entirely dependent on proper coding and the provider’s narrative.

Note that instead of deleting a problem from the list (as had been done in the past), the status field is set to D for deleted.

G.5 Allergies/Adverse Reactions (Brief) and Allergies/Adverse Reactions (Detailed)
Both the Allergies/Adverse Reactions (Brief) and Allergies/Adverse Reactions (Detailed) components list the patient’s allergies and adverse reactions that were entered into the RPMS database. Allergies/Adverse Reactions components include date of last allergy list review, provider doing the review, and last documented “No Active Allergies.” Inactive Allergies/Adverse Reactions do not display.

Figure G-11 is an example of the Allergies/Adverse Reactions (Brief) component display.

--- ALLERGIES/ADVERSE REACTIONS (BRIEF) (FROM ALLERGY TRACKING) ----
Adverse Reactions: SULFAMETHOXAZOLE (verified) - HIVES, RASH

Figure G-11: Example of brief allergies/adverse reactions component

Figure G-12 is an example of the same allergy/adverse reaction data in the Allergies/Adverse Reactions (Detailed) component display.

-- ALLERGIES/ADVERSE REACTIONS (DETAILED) (FROM ALLERGY TRACKING)---
ADVERSE REACTIONS:
noted: 2/4/08 SULFAMETHOXAZOLE (verified) -- HIVES, RASH

Figure G-12: Example of detailed allergies/adverse reactions component

The Allergies/Adverse Reactions (Detailed) component lists more in-depth information than Allergies/Adverse Reactions (Brief), such as status of whether it was verified as an adverse reaction and the date it was entered.

G.6 Behavioral Health

The Behavioral Health component reports information that was typed into the PCC database regarding active problems, inactive problems, and screenings related to behavioral health. You can restrict the display data by specific time range and/or number of visits. In the following example, the data is restricted to a maximum of 10 visits or seven years:

--------- BEHAVIORAL HEALTH (max 10 visits or 7 years) -----------
*************** BH ENCOUNTERS **********************
04/26/07 DEMO IND OPC F90.9 - ATTENTION-DEFICIT/HYPERACTIVITY DIS.
04/09/02 DEMO IND SMI OPC 62 - OTHER FAMILY LIFE PROBLEM

*************** BH ACTIVE PROBLEMS ***********************
1 01/11/08 (F32.9) DEPRESSIVE DISORDER NOS
   major depression, recurrent (ONSET: 05/12/02)
2 01/11/08 (F43.10) POST-TRAUMATIC STRESS DISORDER
   PTSD (ONSET: 11/24/03)

*************** BH INACTIVE PROBLEMS ***********************
<NONE>
********** BH Screening Exams **********

Figure G-13: Example of Behavioral Health Component

G.7 Blood Bank–Most Recent

The Blood Bank–Most Recent component reports information that has been typed into the PCC database regarding blood bank data for a specified date range.

G.8 Community Health Representative (CHR)

The CHR component reports information that has been entered into the IHS Community Health Representative Reporting system by Community Health Representatives (CHRs). Only data recorded in this system will display. For instance, if a CHR did not record the patient’s evaluation, no evaluation will display in the component. Unlike most other Health Summary components, the data displayed in this component is not retrieved from the PCC database, but directly from the CHR system.

The component displays the date of service, place of service, the CHR’s initials, purpose of visit, services provided, activity time, the CHR’s Service Unit, evaluation, and any referrals that correspond with the visit. These data items are shown in Figure G-14.

---------------- CHR (max 10 visits or 2 years) -------------------

07/14/06 HOME TS DIABETES MELLITUS (DM) - MONITOR PATIENT AT: 30
PT experiencing dizziness; referred to doctor
Referred BY: MEDICAL Referred TO: CHR

09/24/07 HOME HC MOVEMENT PROBLEM (MP) - PATIENT CARE AT: 15
Left leg - limited mobility after fall

10/31/07 COMMUNITY BD HYPERTENSION (HY) - HEALTH EDUCATION AT: 50
BP taken: 120/80. PT taking meds
EVALUATION: LEVEL OF UNDERSTANDING IMPROVED

Figure G-14: Example of CHR component

G.9 CPT Components

CPT (All by CPT Code), CPT (All by Date), and CPT (Most Recent of Each)

The components related to Current Procedural Terminology (CPT) display the CPT code, date, CPT narrative, units, facility, and clinic associated with specific patient CPTs. The display data can be restricted by specific time range and/or number of visits. In Figure G-15, the data is restricted to a maximum of five visits or two years.
Figure G-15: Example of CPT components

G.10 Demographics Components

The following provides information about the various demographic components.

Note that there are two new site parameters related to the Remarks section of the health summary. The first site parameter allows a site to specify how many lines of Remarks (Additional Patient Registration Information) will display in the Demographic component of the health summary. The second site parameter allows a site to define whether the first or last number of lines will display.
G.10.1 Demographic Data

The information displayed in the demographics components is extracted from the RPMS Patient Registration database. The data shown can be used by providers to identify and locate patients, as well as to plan contract services.

Each demographics component displays a different amount of demographic-related information.

Demographic Data displays the information listed below:

<table>
<thead>
<tr>
<th>Line Number</th>
<th>Data Items Displayed</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>• Patient Name</td>
</tr>
<tr>
<td></td>
<td>• Date of birth</td>

|             | Eligible to receive contract health services |
**G.10.3 Demographics–Brief**

The Demographics–Brief component is a subset of the data displayed in the Demographic Data component. The information in this component is obtained from the Patient Registration database and includes the following fields:

- NAME
- DOB
- AGE
- TRIBE
- HEALTH RECORD NUMBER
- ADDRESS
- PHONE
- WORK PHONE
- PREFERRED LANGUAGE
- PREFERRED METHOD OF RECEIVING REMINDERS
- ELIGIBILITY
- ADVANCE DIRECTIVES
- LAST UPDATED

The requester is unsure if the SSN should also be included.

In Figure G-16, the first section displays the Demographics–Brief information, the second section displays the Demographic Data information, and the third section displays the Demographics – W/O Remarks information.
Figure G-16: Example of Demographics components

**Demographics–Brief with Advanced Directives**

The Demographics–Brief w/Advance Directions component is a subset of the data displayed in the Demographic Data component. The information in this component contains Advance Directives information obtained from the Patient Registration database:

- NAME
- SEX
- DOB
- AGE
- SSN
- TRIBE
- ELIGIBILITY
- LOCATION
- HEALTH RECORD NUMBER
- ADDRESS
- PHONE
- WORK PHONE
- PREFERRED LANGUAGE
• PREFERRED METHOD OF RECEIVING REMINDERS
• ADVANCE DIRECTIVES
• LAST UPDATED
• LAST REGISTRATION UPDATE
• CMS REGISTER AND STATUS

-------- DEMOGRAPHICS - BRIEF W/ADV DIRECTIVES ---------------

Figure G-17: Example of Demographics - Brief w/Advance Directives component

G.11 Dental

The Dental component displays a detailed dental services history that includes the
dental visit date, site of service, ADA procedure code, and procedure description for
encounters that fall within the time and occurrence constraints (see Figure G-18). The
information for this component is extracted from the IHS Dental package.

---------- DENTAL (max 3 visits or 1 year) ---------------
FAILED DENTAL APPOINTMENTS:
04/21/97 CANCELLED
03/28/97 BROKEN
02/20/97 BROKEN

0150 (1) ORAL EXAM INIT.
0190 (1) DENTAL REVISIT
0274 (1) BW X-RAY (4)

Figure G-18: Example of Dental component
G.12 Diagnostic Procedure

This component displays EKG/ECG summaries within the date and time restrictions specified. The date of the procedure, EKG/ECG summary, and the results display.

```
------------- DIAGNOSTIC PROCEDURE (max 10 visits) ----------------
09/01/05 ECG SUMMARY RESULT: NORMAL
```

Figure G-19: Example of Diagnostic Procedure component

G.13 Directions to the Patient’s Home

This component prints directions to the patient’s home that have been entered in the Patient Registration System.

```
----------------DIRECTIONS TO PATIENT HOME-------------------------
Take I-11, then exit at Springfield.
Turn right at the bottom of the ramp, then make the first left.
The patient's house is on the far right.
```

Figure G-20: Example of Directions component

G.14 Education Assessment

This component displays the educational assessment information entered in the Health Factors system.

```
------------- EDUCATIONAL ASSESSMENT (max 3 visits) -------------
Most recent Health Factor recorded.
Learning Preference: DO/PRACTICE (MODERATE)
Readiness to Learn: RECEPTIVE (MODERATE)
Barriers to Learning: SOCIAL STRESSORS (HEAVY/SEVERE)
```

Figure G-21: Example of Education Assessment component

G.15 Elder Care 1 and 2

The Elder Care display component displays information regarding elder care, such as toileting, bathing, dressing, transfers, feeding, continence, finances, cooking, shopping, housework/chores, medications, transportation, change in functional status, and whether the patient is a caregiver.
G.16 Examinations–Most Recent

In the absence of any time or occurrence restrictions, this component displays each of the patient’s most recent examinations. The data for this component comes from exams that were recorded on the PCC Encounter Form and typed into the PCC database.

<table>
<thead>
<tr>
<th>Examination</th>
<th>Date</th>
</tr>
</thead>
<tbody>
<tr>
<td>General Exam</td>
<td>08/31/05</td>

</tr>
<tr>
<td>Pelvic Exam</td>
<td>11/06/05</td>
</tr>
<tr>
<td>General Development Exam</td>
<td>05/19/03</td>
</tr>
<tr>
<td>Vision Exam</td>
<td>08/06/03</td>
</tr>
</tbody>
</table>

Figure G-22: Example of Examinations component

G.17 Eye Care

The Eye Care component displays the patient’s last eyeglass prescription typed in the PCC database, as well as eye care measurements and the dates on which they were recorded. In this component, the heading VU means uncorrected vision and VC means corrected vision.

<table>

Figure G-23: Example of Eye Care component

G.18 Family Health History

Any family health history that was noted on the PCC Encounter Form and entered into the PCC database displays in this component. The health history is restricted to the V16*, V17*, V18*, and V19* ICD codes. The date that the information was noted on the Encounter Form is shown first, followed by the family health item. The family member and the diagnosis date appear only if recorded as part of the POV narrative on the PCC Encounter Form.

<table>

</tr>
</tbody>
</table>

G.19 Flowsheets

Flowsheets display selected categories of patient information in a tabular format. The information that can be displayed on a flowsheet consists of all or selected items in the following categories:

- Purpose of Visit
- Measurements
- Medications
- Examinations
- Laboratory Tests
- Patient Education

Because of differences among sites in naming data items, such as laboratory tests and medications, flowsheets must be created locally in order to print in Health Summaries. Create/Modify Flowsheet (MF) provides information about creating/modifying flowsheets. Section 4.10 provides information about creating/modifying flowsheets.

Instances of the same data class type might appear more than once for a single visit. Each column can include all items of the specified type or be limited to specific instances for clarity. For example, in the Diabetic Flowsheet below, two items in the Measurement class appear twice: weight and BP.

A flowsheet can be automatically generated by the presence of specified ICD codes in the patient’s active problem list. For instance, you might create a diabetic flowsheet at your facility that contains the ICD codes for diabetes as the evoking codes. If a patient had an ICD code for diabetes in the active Problems List, the Diabetic Flowsheet would be printed in that patient’s Health Summary. For all other patients, the diabetic flowsheet would not display.

Figure G-24: Example of Family Health History component
G.20 Health Factors

The Health Factors component displays information about the patient concerning the following areas:

- Activity Level
- Alcohol/Drug
- Asthma Triggers
- Barriers to Learning
- Confidence in Managing Health Problems
- Diabetes Self-Monitoring
- Health Literacy
- Learning Preference
- Occupation
- Rubella Immunity Status
- TB Status
- Tobacco (Smoking)
- Tobacco (Smokeless—Chewing/Dip)
- Tobacco (Exposure)

Only information that was typed into the database will display in this component of the Health Summary. The Health Factors component can be customized to display either all health factors recorded for a patient or only selected categories; for example, only tobacco use information appears in Figure G-26.
G.21 Health Maintenance Reminders

The HMR system monitors procedures that should be performed periodically for patients depending on their previous diagnoses, age, and sex. These procedures include immunizations, measurements, laboratory tests, examinations, and skin tests. The display includes procedure name, date last performed, and next due date. Refer to the Health Maintenance Reminder section of this manual for more detailed information about HMRs.

----- HEALTH MAINTENANCE REMINDERS (max 5 visits or 6 years) -------

Figure G-27: Example of HMR component

G.22 History of Minor Surgery

The History of Minor Surgery component displays all of a patient’s minor surgeries. Surgeries classified as minor include ICD codes in the 23, 24, and 85 series and code 69.7. The surgery date, provider’s name, and a description of the surgery are displayed for this component.

------------ MINOR SURGERY HISTORY (max 5 years) -------------

| 08/25/07 SIGMA,JOHN SUTURE HEAD |
| 01/18/06 SIGMA,JOHN SUTURE REMOVAL |

Figure G-28: Example of Minor Surgery component

G.23 History of Surgery

Past surgical history displays in this component. Excluded are surgeries with ICD codes that display for the History of Minor Surgery component (Series 23, 24, and 85 and Code 69.7). Information regarding the patient’s past surgical procedures is documented in the Purpose of Visit section of the PCC Encounter Form by the provider, and is then typed into the database.
The date displayed for each procedure refers to the date the procedure was performed and is obtained from the provider’s narrative on the PCC Encounter Form. The provider’s name displays next followed by the provider’s narrative of the surgical procedure. The site where the procedure was performed displays only if that information was included in the provider narrative of the Encounter Form and typed into the database.

G.24 Hospitalization Stays

The Hospitalization Stays component displays the dates of admission and discharge, site of hospitalization, and a provider narrative of the discharge diagnosis for hospitalizations that fall within the time and occurrence constraints. Data for this component are entered into the database from either the CHS Hospital Services Form or the Clinical Record Brief–IHS Inpatient Services Form that is completed when the patient is discharged.

G.25 Imaging

The Imaging component will display the following fields:

- mm/dd/yyyy hh:mm
- [Imaging Title]
- Procedure Modifier
- CPT Code
- Interpreting Staff
- Exam Case Number
- Exam Status
- Report Status
- History
• Report
• Impression
• [Provider initials]

```

Figure G-31: Imaging Profile screen

G.26 Immunizations

The Immunizations component displays all immunization data that exist in the PCC database for the patient. Immunizations administered in the outpatient clinic, during a field contact, or in the ER are documented in a PCC Encounter Form and typed into the PCC database. Immunizations given at outside facilities are entered into the database by documentation of the immunization history in the PCC Encounter Form for entry into the database.

As illustrated in the following example, the type of immunization displays first and is followed by the date and site of administration. The immunizations are grouped by type and presented in date sequence with the most recent immunization displaying first. The series number also displays. In order for a series number to display on the health summary, it must have been recorded in the PCC Encounter Form.
--- IMMUNIZATIONS ---

IMMUNIZATION FORECAST:

IMMUNIZATION HISTORY:
- DTP 11/24/05 4 mths Demo Indian Hospital
- DTP 01/19/06 6 mths Demo Indian Hospital
- DTP 03/30/06 8 mths Demo Indian Hospital
- DTP 05/16/07 22 mths Demo Indian Hospital
- OPV 11/24/05 4 mths Demo Indian Hospital
- OPV 01/19/06 6 mths Demo Indian Hospital
- OPV 05/16/07 22 mths Demo Indian Hospital
- MMR 01/24/07 18 mths Demo Indian Hospital
- INFLUENZA 05/16/07 22 mths Demo Indian Hospital

Figure G-32: Example of Immunizations component

G.27 In-Hospital Visits

This component displays all of the patient’s visits with a service category of In-Hospital. These are visits in which a hospitalized patient was referred to an in-hospital clinic. For instance, the following example shows that the patient was referred to the diabetic clinic and to the physical therapy department during a hospital stay. The date of the encounter displays first, followed by the location of encounter, clinic to which patient was referred, and provider narrative.

--------- IN-HOSPITAL VISITS (max 10 visits or 5 years) ---------
- 02/19/03 SELLS HOSP DIABETIC DM TYPE II HTN
- 07/01/05 SELLS HOSP PHYSICAL T PHYSICAL THERAPY - WALKING EXERCISES

Figure G-33: Example of In-Hospital Visits component

G.28 Infant Feeding Choice Panel

This component displays information about birth weight, birth order, age formula was started, age breast feeding was stopped, and age solids were begun.

------------------ INFANT FEEDING CHOICE PANEL ---------------------
- BIRTH WEIGHT (kg)
- BIRTH ORDER
- FORMULA STARTED (age)
- BREAST STOPPED (age)
- SOLIDS BEGUN (age)

Figure G-34: Example of Infant Feeding Choice component
G.29 Inpatient Measurements by Date

This component lists, in reverse chronological order, the measurement name, date/time, value and associated qualifiers for measurements taken during the patient’s last hospitalization. If the patient is currently admitted, the current admissions measurements will display.

```
07/06/2012@07:15    BP    190/80     Qualifiers: STANDING, L ARM
07/06/2012@07:10    O2    50         Supplemental O2: 70%
                        Qualifier: AEROSOL/HUMIDIFIED MASK
```

Figure G-35: Example of Inpatient Measurements by Date

G.30 Inpatient Measurements by Measurement

This component lists, in alphabetical order, the measurement name, date/time, value and associated qualifiers for measurements taken during the patient’s last hospitalization. If the patient is currently admitted, the current admissions measurements will display.

```
BP    07/06/2012@07:15    190/80     Qualifiers: STANDING, L ARM
O2    07/06/2012@07:10    50         Supplemental O2: 70%
                        Qualifier: AEROSOL/HUMIDIFIED MASK
```

Figure G-36: Example of Inpatient Measurements by Measurement

G.31 Insurance Information

This component displays all insurance information that was typed into the Patient Registration database. It is updated as necessary by medical records technicians or the site’s social worker.

```
---------------------- INSURANCE INFORMATION ----------------------
INSURANCE  NUMBER  SUFF COV EL DATE  SIG DATE  END DATE
MEDICARE  123456789  A  A  01/01/07  10/14/07
BC/BS   444-55-5555        01/18/06
```

Figure G-37: Example of Insurance Information component

The headings that display in this component are described below.

</tr>
</tbody>
</table>

G.32 Laboratory Components

Three types of laboratory components are available for the Health Summary:

- Laboratory Data
- Laboratory Data–Most Recent
- Laboratory Data–Most Recent by Date

The link between the Laboratory System and the PCC database allows for retrieval of laboratory results for the laboratory components of the Health Summary. All results entered into the Laboratory System can be printed in the Health Summary.

If you are not using the Laboratory System, laboratory data can be entered into the PCC database via the Lab Log Data Entry option in the PCC Data Entry menu. The data can then be retrieved for inclusion on the Health Summary. It is strongly recommended that laboratory personnel type these results in the PCC database. When using this method, remember that only those laboratory results entered into the database will be displayed in the laboratory components.

If you construct a customized Health Summary, you can limit the test results displayed in either laboratory component by the amount and type of data. For example, you might want to develop a custom summary for the renal clinic that displays only electrolyte, BUN, and creatinine test results. You might also want to restrict the data by length of time or number of occurrences.

G.32.1 Laboratory Data

In the absence of any time or occurrence restrictions, the Laboratory Data component displays all of a patient’s laboratory test results. These results appear below the date on which the laboratory work was performed.

```
----------------- LABORATORY DATA (max 2 years) -----------------
02/08/88  02/15/88  02/22/88
FBS     310  260  210
```
G.32.2 Laboratory Data–Most Recent

This laboratory component displays only the most recent occurrence of each different laboratory test. The type of laboratory work that was ordered or performed is listed first, followed by the date, results, units, reference range, and an abbreviation indicating whether the test was accessioned (A), ordered (O), or resulted (R). The results in Figure G-39 were limited to the last two years.

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

G.32.3 Laboratory Data – Most Recent by Date

This laboratory component displays only the most recent occurrence of each different laboratory test organized by date. The type of laboratory work that was ordered or performed is listed first, followed by the result date and time, visit date, result, units, reference range, and an abbreviation indicating whether the test was accessioned (A), ordered (O), or resulted (R). The results in the following sample component were limited to the last five years.

<table>

</table>

G.33 Measurement Panels

The Measurement Panel component displays measurement data recorded on the PCC Encounter Form for the patient and fall within the Measurement Panel’s data restrictions.

| ---------- MEASUREMENT PANELS (max 5 visits or 5 years) ---------- |
Figure G-41: Example of Measurement Panels component

The most common Measurement Panels that display in Health Summaries are the adult or pediatric standard panels that are distributed with the Health Summary package. The display can be presented in standard or metric measurements, depending on which type has been selected for use at the user's facility. The sample shown above is the Adult Standard display. A site can also develop a customized measurement panel for use in health summaries. Section 4.8.2 provides more information on Measurement Panels.

The data displayed for this component example are restricted by number of occurrences and by time. Remember that the more restrictive of the two limits dominates. In this case, data are displayed for five visits. Regardless of the limits specified, the most recent measurement of any type requested will always display. A note will print at the bottom of the component if a measurement falls outside of the time limit restrictions. The date of the encounter on which a measurement has been recorded is shown to the left of the measurements.

The standard format for recording BP is utilized: the systolic reading is noted first, followed by the diastolic reading. The headings VU and VC refer to vision acuity measurements. Measurements displaying under the heading VU are for uncorrected vision; VC refers to corrected vision. These headings will always display, whether or not information of this type exists in the database. No headings that indicate the left eye measurement versus the right eye measurement are included. The left eye measurement is presented first, followed by the right eye measurement.

G.33.1 Measurements

The Measurements component displays the same data as the Measurement Panels component, but uses an unformatted, vertical display. The measurement type is indicated first, followed by the date the measurement was taken and the results. Decimals are used to indicate fractions for height, weight, and head circumference. Head circumference displays only on the Pediatric Health Summary.
G.34 Medication Reconciliation

This component will list the patient’s different medications based on status.

The types of medications and data that will be listed are:

- **Active**: drug name and strength, RX number, number of refills left, directions, and last filled date
- **Outside**: drug name and strength, directions
- **Change HOLD to ACTIVE NOT DISPENSED**: display the following: drug name and strength, RX number, number of refills left, directions, reason for hold.
- **Suspended**: drug name and strength, RX number, number of refills left, directions
- **Pending**: drug name and strength, number of refills left, directions
- **Chronic and Recently Expired**: drug name and strength, RX number, number of refills left, directions, last filled date, expired on date
- **Recently Discontinued**: drug name and strength, RX number, directions, discontinued on date

The headings for medications (ACTIVE, ACTIVE NOT DISPENSED, etc.) will display if there are medications associated with them (for example, if the patient has no ACTIVE NOT DISPENSED medications, nothing will show up for this section, not even the header).

All lines will be 70 characters long.

Expired medications only display if they either (a) become expired within the past 14 days (antibiotics, pan shots in the ER, etc.) or (b) are chronic medications within the last 120 days and the same medication does not appear with another status on the medication profile.

Discontinued medications only display if they are discontinued within the last 30 days and the same medication does not appear with another status on the medication profile.
**G.35 Medication Components**

Twelve types of medication components are available for display on the Health Summary:

- Medications–All
- Medications–All W/ #ISS & Alt Name
- Medications–All With Issue History
- Medications–Chronic
- Medications–Chronic & Acute W/Issue
- Medications–Chronic By Name
- Medications–Chronic Excluding D/C’E
- Medications–Controlled Substances
- Medications–Current
- Medications–Current by Name
- Medications–Most Recent by Group
- Medications–Most Recent of Each Medication
- Medications–Most Recent Short Form display

---

**ACTIVE MEDICATIONS**

1. ACETAMINOPHEN 120MG SUP,RTL  Rx #:3463396  Refills left: 1  
   Directions: UNWRAP AND INSERT 1 SUPPOSITORY INTO RECTUM EVERY 4 TO 6 HOURS IF NEEDED FOR PAIN OR FEVER  
   Last Filled: 12-03-09

2. COTRIMOXAZOLE SUSP    Rx #:3463383  Refills left: 1  
   Directions: SHAKE WELL AND TAKE 2.5ML (1/2 TEASPOONFUL) BY MOUTH 1/DAY  
   FOR 30 DAYS TAKE ONCE A DAY  
   Last Filled: 11-17-09

Figure G-43: An example of a Medication Reconciliation component
Several of the components display information in the same format, as shown and described here. Time and occurrence display restrictions can be applied to these components. The date indicates the date of the visit at which the medication was dispensed. The name of the medication that was prescribed displays next, followed by the quantity dispensed, the number of days the medication is intended to be taken, and an indication of whether the prescription might have run out or been discontinued. The provider’s directions for taking the medication (Sig) appear on the second line. Long Sigs will continue on subsequent lines. If the number of days specified for taking the medication has elapsed, the notation “Ran out” displays for a period of time after the expiration date, unless overridden by a prescription for the same medication. The notation “D/C” indicates that a provider has explicitly discontinued the medication. The term “On Hold” has been changed to “Active But Not Yet Dispensed.” All Medication components also include the date of the last medication review, last medication update, and last documented “No Active Medications.”

```
- ALL MEDICATIONS (INCLUDES DUPLICATE RX'S) (max 5 visits or 3 years) -
11/28/06 (C) AMOXICILLIN= 500MG CAP #4 (1 days) - Ran out 11/29/06

```

Figure G-44: An example of a Medications component

G.35.1 Medications–All

This component displays a patient’s complete medication history for the specified time frame. All instances of prescribed medications are displayed, including current, discontinued, and recently expired medications. Medications with expired prescriptions are displayed for twice the duration of the prescription up to a minimum of 60 days. For example, a medication that was prescribed for 30 days will continue to be displayed for 60 days past its expiration date. Information that is not displayed includes medications that are OTC, starting doses, or acute prescriptions that ran out at least 60 days ago.

G.35.2 Medications–All with Number Issued and Alt Name

This component displays a patient’s complete medication history for the specified time frame, as well as the issued and alternative name of the medication.

```
---------- MEDS - ALL WITH # ISSUED (max 3 years) ----------
MEDICATIONS DISPENSED SINCE Feb 05, 2005
(C) - Chronic Medication, (CRx) - Controlled Drug
```
G.35.3 Medications—All with Issue History

This component displays a patient’s complete medication history for the specified time frame, as well as the issue history.

Figure G-45: An example of Medications - All with Number Issued and Alt Name component

G.35.4 Medications—Chronic

This component displays an unduplicated list of current, discontinued, and recently expired medications prescribed for the patient in the time frame specified for the component. Only those medications that the pharmacist has indicated as chronic when dispensing will display for this component. The data displayed do not include those medications that are over-the-counter (OTC), starting doses, or acute prescription that ran out at least 60 days ago.

Figure G-46: An example of Medications - All with Issue History component
G.35.5 Medications—Chronic and Acute With Issue History

This component displays a list of chronic and acute medications for the specified time frame with the issue history.

------ MEDS - CHRONIC & ACUTE W/ ISSUE HISTORY (max 3 years) ------

Chronic Medications
11/28/06 AMOXICILLIN= 500MG CAP #4 (1 days) (expires 12/28/2006)
   TAKE FOUR CAPSULES BY MOUTH 1 HOUR PRIOR TO APPOINTMENT FOR INFECTION TREATMENT; TAKE UNTIL FINISHED
11/06/06 COTRIMOXAZOLE= DS 800MG/160MG TAB #10 (5 days)

Acute Medications
10/13/06 SILVER SULFADIAZINE 1% CREAM (25GM) #25 (7 days)
   Dispensed at: ER RX
   APPLY TO AFFECTED AREAS DAILY FOR 7 DAYS AS DIRECTED
04/07/06 ERYTHROMYCIN= 250MG TAB #80 (10 days) (expires 5/6/2006)
   TAKE TWO TABLETS BY MOUTH FOUR TIMES A DAY FOR INFECTION TREATMENT; TAKE UNTIL FINISHED

G.35.6 Medications—Chronic By Name

This component displays a patient’s chronic medications by name for a specified time frame.

------ CHRONIC MEDICATIONS - SORTED BY DRUG NAME (max 3 years) ------

11/28/06 (C) AMOXICILLIN= 500MG CAP #4 (1 days) -- Ran out 11/29/06
   TAKE FOUR CAPSULES BY MOUTH 1 HOUR PRIOR TO APPOINTMENT FOR INFECTION TREATMENT; TAKE UNTIL FINISHED
11/06/06 (C) BREVICON (28) #84 (84 days) -- Ran out 01/29/07
   TAKE 1 TABLET BY MOUTH EVERY DAY FOR BIRTH CONTROL 5 refills left.
11/06/06 (C) COTRIMOXAZOLE= DS 800MG/160MG TAB #10 (5 days) -- Ran out
11/11/06 TAKE 1 TABLET BY MOUTH TWICE A DAY FOR 5 DAYS FOR INFECTION TREATMENT; TAKE UNTIL FINISHED

Figure G-47: An example of Medications - Chronic component

Figure G-48: An example of Medications - Chronic and Acute with Issue History component

Figure G-49: An Example of Medications - Chronic by Name component
G.35.7 Medications–Chronic Excluding D/C’ed

This component displays a patient’s chronic medications by name, for a specified time frame, excluding discontinued medications.

Figure G-50: An example of Medications - Chronic Excluding D/C’ed component

G.35.8 Medications–Controlled Substances

The Controlled Substance component displays prescription information for any drug that contains 2, 3, 4, or 5 in the DEA, Special Handling field of the Drug file (50). It displays the medication name, quantity, days’ supply, all dispense dates (initial and refills), and provider.

G.35.9 Medications–Current

This component lists the last instance of each different medication prescribed for the patient during the specified time frame. The purpose of this component is to provide an unduplicated list of medications that were dispensed within the specified time frame. It does not include those medications that are over the counter (OTC), starting doses, or acute prescriptions that ran out at least 60 days ago.

G.35.10 Medications–Current by Name

This component lists the last instance of each different medication prescribed for the patient during the specified time frame, by name. The purpose of this component is to provide an unduplicated list of medications dispensed within the specified time frame. It does not include those medications that are OTC, starting doses, or acute prescriptions that ran out at least 60 days ago.
G.35.11 Medications–Most Recent by Group

This component displays medication data in a different format than the other four medication components. As shown in the sample below, the medication name displays first, followed by the last fill date and the quantity dispensed. The Sig appears on the second line of each entry. The data that display in this component are grouped into two sections: Last of Each Chronic Medication and Last of Each Other Medication. The first group, chronic medications, list the last fill of every medication designated as chronic with no restrictions for time and number of occurrences. The second group, other medications, restricts the display data by the time and occurrence parameters that the user specifies when adding this component to the health summary type.

<table>
<thead>
<tr>
<th>Last of Each Chronic Medication (no limit on days) Last fill date</th>
</tr>
</thead>
<tbody>
<tr>
<td>AMOXICILLIN= 500MG CAP     # 4  11/28/06</td>
</tr>
<tr>

</tr>
</tbody>
</table>

Figure G-52: An example of Medications - Most Recent of Each Medication component
G.35.13 Medications–Most Recent Short Form Display

This component follows the same logic as the most recent by group with the exception that the medication display is a short, abbreviated format.

--- MEDS - MOST RECENT SHORT FORM (max 3 years) ---
LAST OF EACH CHRONIC MEDICATION (no limit on days) Last fill date
AMOXICILLIN= 500MG CAP take four capsules by mouth 1 hour prior to appointment for infection treatment; take until finished # 4 1 day
Dispensed at:
COTRIMOXAZOLE= DS 800MG/160MG TAB take 1 tablet by mouth twice a day for 5 days for infection treatment; take until finished # 10 5 days 11/6/06
Dispensed at:

Figure G-53: An example of Medications - Most Recent Short Form Display component

G.36 Microbiology

This component displays microbiology-related tests, results, and collection and completion date for a specific time frame or occurrence.

- MICROBIOLOGY - See Lab for History and Details (max 10 visits or 5 years)
  RESULT COLL DATE COMP DATE
THROAT CULTURE  02/08/07  02/11/07

</tr>
</tbody>
</table>

Figure G-56: Example of Nutritional Risk Screening Exam component

G.39 Offspring History

Information about offspring births and deaths can be captured through the data entry process and are displayed in this component of a female patient’s Health Summary. The decision to enter offspring data and the convention for recording this information for the database are made at the facility level. The child’s birth date, name, sex, birth weight, gestational age, and APGAR scores are displayed in a linear fashion. If the child has died, the date and cause of death are displayed in parentheses following the birth information. Any data recorded for perinatal or neonatal complications are also displayed.

<table>
<thead>
<tr>

</tbody>
</table>

Figure G-57: Example of the Offspring History component
G.40 Outpatient Data

There are three components related to outpatient or field visits:

- Outpatient/Field Visits
- Outpatient Visits–Excluding CHR
- Outpatient Visits–Screened

G.41 Outpatient Field Visits

The Outpatient/Field Visits component displays visits (encounters) entered into the PCC database. These data are extracted from the information recorded in the POV section on the PCC Encounter Form. Although the component heading states that the data displayed are outpatient or field visits, data in this component can also include visits in the following service categories:

- Ambulatory
- Nursing Home
- Day Surgery
- Chart Review
- Observation
- Telecommunications

The date the encounter took place displays first, followed by the location of the encounter. The clinic location might also be included if the site has elected to have it displayed. The provider’s narrative displays in the last column. This narrative is either the provider’s verbatim narrative or an ICD narrative with or without the ICD code, depending on which type of display has been chosen by the site. The standard PCC distribution displays the provider narrative only. During data entry, the narrative is coded to an ICD-9 code and the code is retained for retrieval purposes, even though only the provider narrative can be displayed. See Section 3.6 for details on selecting the form of the data to display in this component.

```
------- OUTPATIENT/FIELD VISITS (max 5 visits or 5 years) ---------
07/26/07 DEMO HO ER CONTACT DERMATITIS
02/05/07 DEMO HO W. I. C. WIC-RECERT
```

Figure G-58: Example of the Outpatient/Field Visits component

G.42 Outpatient Visits (Excluding CHR)

This component list the outpatient visits, excluding CHR visits, for a specific time frame.
G.43 Outpatient Visits (Screened)

The Outpatient Visits (Screened) component displays exactly the same information as the Outpatient/Field Visits component described above, except that it allows the user to screen out certain visits from the component by provider class or clinic. For example, the user could choose to exclude all visits to the Employee Health clinic.

--- OUTPATIENT/FIELD VISITS (Screened) (max 5 visits or 5 years) ---

Figure G-60: Example of the Outpatient/Field Visits (Screened) component

G.44 Patient Education

There are three components related to patient education:

- Patient Education
- Patient Education–Most Recent
- Patient Education–Most Recent by Topic

G.44.1 Patient Education Component

This component displays all instances of patient education provided within the date or visit constraints specified. The development of a standardized set of patient education topics and their entry into the PCC is a local option. The types of education provided must be determined by each site and then typed into the Education Topic file before any data will display in this component.
The types of information that can be displayed are illustrated in Figure G-61. The date of the patient encounter, the site, the type of patient education provided, and if supplied, the patient’s level of understanding of the education provided displays on a single line.

<table>
<thead>
<tr>
<th>Date</th>

Figure G-64: Example of the Patient Goals component

G.46 Patient Wellness Handout

This component displays the patient’s PWH. Refer to Section 4.15 for more detailed information.

G.47 Patient Wellness Handout Tally

This component displays the following information about each PWH type given to the patient: type of PWH given to patient; total number of that specific type given to the patient, and the dates that type was given to the patient. Section 4.15 provides more detailed information.

--- PATIENT WELLNESS HANDOUT TALLY (max 10 visits or 3 years) ---

<table>
<thead>
<tr>

<td>3</td>
<td>8/01/08 9/05/08 10/08/00</td>
</tr>
</tbody>
</table>

Figure G-65: Example of the Patient Wellness Handout Tally component
G.48 Personal Medical History

Past medical information not included in the patient’s active and inactive problem list but warrants documentation on the health summary displays in this component. Personal medical history is retrieved from data that are recorded in the Purpose of Visit section of the PCC Encounter Form and entered into the PCC database. The date the information was entered, the historical information, and the onset date are displayed.

<table>
<thead>
<tr>
<th>PERSONAL MEDICAL HISTORY (max 3 years)</th>

</thead>
<tbody>
<tr>
<td>10/02/05 HX HTN</td>
</tr>
<tr>
<td>10/23/06 HYSTERECTOMY (onset: 01/05)</td>
</tr>
</tbody>
</table>

Figure G-66: Example of the Personal Medical History component

G.49 Prenatal

This component lists the data pertaining to abdominal girt, cervix dilation, edema measurement, expected date of confinement, effacement, fundal height, fetal heart tones, last menstrual period, presentation (pregnancy), and station (pregnancy).

G.50 Problem List Data

Two Problem List components are available for inclusion in the Health Summary:

- Problems–Active
- Problems–Inactive

No time or visit restrictions can be placed on these components. Instead, the information displayed is controlled by provider instructions that are recorded in the PCC Encounter Form. By using the POV section of the form, the provider can maintain the active problem list by adding, updating, modifying, or appending data. Each data item that is printed in these components is described here. Both Problem-related components include the date of the last problem list review, problem list update, and date of the last documented “No Active Problems.”
G.51 Identification Number and Problem

Each problem is identified by a number that displays in the first column of the component. This number is assigned by the computer when the problem is entered into the database for the first time. The identification number is formed from an abbreviation of the site name at which the problem was entered and a sequence number specific to the individual patient at that facility. No two problems will ever have the same number, although two different numbers can have the same problem narrative. The date on which the problem was initially entered, and the date of the most recent modification to the problem will display after the problem identification number.

In the Active Problems example shown below, the problem Diabetes Mellitus is identified as number SX1. This problem was entered into the database at the San Xavier Health Center (SX) and was the first problem typed at that facility for the patient. Problem SX1 will always be Diabetes Mellitus. If Diabetes Mellitus were entered for this patient at a different facility (e.g., Sells) the problem would be assigned a number that identifies that facility and the sequence in which the problem was entered (e.g., SE3 Diabetes Mellitus). The dates shown in the two columns to the right of the problem number indicate when the problem was first entered and when it was last modified.

G.52 Problem Narrative

The problem narrative displays in the column on the right side of the component. The printed narrative appears in one of the following formats: (1) verbatim, (2) a long or short standard narrative based on ICD code, or (3) a combination of provider narrative and ICD narrative. The type of narrative displayed is designated locally by each site. The standard PCC component displays the provider narrative only; however, it can be modified by each site as needed.

G.53 Problem Notes

The active problems narrative can be enhanced by appending additional information in the form of notes. The second line in the Active Problems component sample (identification number SX1SX1) is a problem note. In this case, it is a note for Problem SX1, Diabetes Mellitus. Identification numbers of notes differ from problem numbers in that they have more characters and identify not only the note, but the problem to which they are appended. The first site prefix and sequence number (e.g., SX1) reference the problem to which the note is appended. The second site prefix and sequence number reference the site and sequence of the note’s addition to the problem. Although this number represents the combination of two numbers, it should be thought of as a single number that identifies the note.
Notes are displayed just below the narrative of the corresponding problem and are indented to highlight them and set them apart from problem narratives. Notes have several functions:

- To communicate treatment plans associated with the problem; for example, NEEDS FBS MONTHLY or STARTED INH 4/1/95
- To provide additional information about the problem that is not contained in the limited problem narrative, such as encounter date of the initial problem work-up or the precipitating factors that led to a disability

If the provider who is modifying the patient’s problem list uses a special numbering convention on the PCC Encounter Form, problems that share the same basic etiology can be displayed in diagnostically related groups in the Health Summary. These related diagnoses are grouped together under the primary diagnosis and their relationship to the primary diagnosis is indicated by the format of their identification numbers. In this example, the third and fourth lines (identification numbers SX1.1 and SX1.2) show the special numbering sequence the provider has indicated in the PCC Encounter Form. The primary diagnosis identification number (e.g., SX1) displays first, followed by a decimal point and a separate number that identifies the related problem (e.g., SX1.1). This number, similar to the note identification number, is the complete identification number of the related diagnosis.

G.53.1 Active Problems

This component provides a comprehensive listing of the patient’s active medical, social, and psychological problems. Active problems are those that currently affect the patient’s health or, if presently quiescent, are at high risk for recurrence.

<table>
<thead>
<tr>
<th>ENT. MODIFIED</th>
<th>ACTIVE PROBLEMS</th>
</tr>
</thead>
<tbody>

<td></td>
</tr>
<tr>
<td>SX8 09/92 01/23/94 HYPERTENSION</td>
<td></td>
</tr>
</tbody>
</table>

Figure G-67: Example of the Active Problems component

G.53.2 Inactive Problems

The Inactive Problems component displays a patient’s inactive medical, social, and psychological problems. Inactive problems are those that have been resolved but might recur in the future. These recurring problems may place the patient at increased risk (e.g., asbestos exposure) or leave residual physical findings. Note that conditions resolved by surgery are displayed in the History of Surgery component.
--- INACTIVE PROBLEMS ---

| ENT. MODIFIED | SX6 08/14/90 06/16/95 PYELONEPHRITIS |
| SX7 06/29/95 09/23/95 NX LEFT HIP FRACTURE |

Figure G-68: Example of the Inactive Problems component

**G.54 Public Health Nursing Visits**

The Public Health Nursing (PHN) component displays all visits for which a public health nurse was the primary provider. This component display is very similar to the Outpatient Visits component. The following additional data items are displayed in this component:

- Level of intervention
- Nsg Dx
- Type of decision making
- Short-term goals
- Psycho/social/environmental factors
- Long-term goals

These data items are captured in the Public Health Nursing PCC form. If typed into the PCC database, they will display in the Health Summary.

----- PUBLIC HEALTH NURSING VISITS (max 5 visits or 5 years) -----

| 12/15/05 DEMO PHN MCC F/U |
| 11/10/04 DEMO PHN FLU VACCINE |

Figure G-69: Example of the PHN component

**G.55 Radiology Data**

There are two components related to radiology: (1) Radiology Studies–Most Recent and (2) Radiology–Exams.

**G.55.1 Radiology Studies–Most Recent**

In the absence of any time or occurrence restrictions, this component displays the most recent result of each radiology study taken for the patient. The PCC linkage with the radiology system provides the data for this component.

The type of radiology study is listed first, followed by the date it was performed in parentheses. The results and the clinical impression also display in the component.
G.55.2 Radiology–Exams

In the absence of any time or occurrence restrictions, this component displays the most recent result for each radiology exam for the patient. The PCC linkage with the radiology system provides the data for this component.

The date of the radiology exam is listed first, followed by the description and additional comments. The results and the clinical impression also display in the component.

---------- RADIOLOGY EXAMS (max 5 visits or 10 years) ------------

02/21/01 CHEST 2 VIEWS PA&LAT (2/21/2001)

IMPRESSSION: Pectus excavatum. No evidence of pneumonia.

12/20/05 SPINE CERVICAL MIN 4 VIEWS (12/20/2005)

IMPRESSSION: CONCLUSION: Minimal degenerative changes as above. Dictated by:

John Sigma, M.D. on 12/20/2005 at 11:59 Approved by: John Sigma, M.D. on 12/20/2005 at 11:59 cc:

Figure G-71: Example of the Radiology Exams component

G.56 Referred Care

The Referred Care component lists the patient’s referral record within the date and occurrence restrictions specified. This component is available only at sites using the Referred Care Information System (RCIS) with the PCC link enabled. Each time a patient is referred to an outside facility for care, the referral information is entered into the RCIS. The data items included in the Referred Care component of the Health Summary include:

- Beginning date of service
- Whether the visit was for inpatient or outpatient services
- Referral status
- Initials of the referring provider
- Facility to which the patient was referred
- Diagnostic category
- Service category
G.57 Refusals/Declined Services

This component lists the patient’s refusals for service in the specified time frame.

---------- PATIENT REFUSALS FOR SERVICE (max 10 years) ----------

Nov 1, 2006 INTIMATE PARTNER VIOLENCE (EXAM)
Refusal Type: UNABLE TO SCREEN

Sep 1, 2006 INTIMATE PARTNER VIOLENCE (EXAM)
Refusal Type: UNABLE TO SCREEN

Figure G-73: Example of the Patient Refusals for Service component

G.58 Refusals/Declined Services -Most Recent of Each

This component lists the patient’s most recent refusals for service in the specified time frame for a particular type.

PATIENT REFUSALS FOR SERVICE - MOST RECENT OF EACH (max 10 years)

INTIMATE PARTNER VIOLENCE (UNABLE TO SCREEN) 11/1/2006

Figure G-74: Example of the Patient Refusals for Service - Most Recent of Each component
G.59 Reproductive History – Brief

This component only displays if data regarding the patient’s gravidity, parity, number of children, history of abortion, last menstrual period (LMP), or contraceptive method have been typed in the PCC database. If multiple EDD method data is entered, the latest information displays. If a Definitive EDD date exists, only the Definitive EDD data displays. The Reproductive History component will display only the information stored in the database; therefore, an incomplete history might display. The date each data item was obtained is shown as an aid in reviewing the patient’s chart for the timeliness of the data. If there is an item for which no data has been recorded, the notation “Not Recorded” follows the subheading. Subsequent reproductive information noted by the provider in the PCC Encounter Form replaces the previous data.

---

G.60 Reproductive History – All EDD

This component displays the information included in the Reproductive History – Brief component and multiple EDD dates and methods when entered.

G.61 Scheduled Encounter Data

This component obtains data from the Clinic Scheduling package. No information will display if the package is not used at your facility or if no scheduling data has been recorded for the patient.

Past appointments are displayed according to the date and visit count constraints. All future (pending) appointments are displayed with the length of each appointment and any special comments recorded. The user can display scheduled encounters with chart or scheduled encounters without chart required.
G.62 Skin Test Data

Two types of Skin Test components may appear in the Health Summary: (1) All or (2) Last 3 of Each. Skin test information is typed into the database from the PCC Encounter Form. Each of these components displays the type of skin test administered. If multiple skin tests of the same type were given, they are grouped together and displayed in date sequence, with the most recent test appearing first. The date the skin test was read is shown next, followed by the results of the test. The facility at which the test was administered is shown to the right of the test result. A sample component is shown in Figure G-76.

Figure G-76: Example of the Skin Tests component

G.62.1 Skin Tests–All

This component displays all skin tests administered to the patient and the test results.

G.62.2 Skin Tests–Last 3 of Each

This component limits the data displayed to only the last three instances of each skin test type administered.

G.63 Supplements

Supplements are specially written additions to the Health Summary that may be printed each time a Health Summary is generated. There are several supplements available:

- Asthma Patient Care Summary
- Anticoagulation
- Chronic Med Reorder Doc-Date
- Chronic Med Reorder Doc-Name
- Chronic Med Reorder Short Form
- Diabetic Care Summary
- Medication Reorder Doc By Date
- Medication Reorder Doc By Name
- Pre-Diabetes Care Summary

Section 4.8.10 provides more information about Supplements.
Below is an example of the Asthma Patient Care Summary supplement:

Figure G-84: Sample Pre-Diabetes Care Summary supplement

G.64 Treatment Contracts
This component displays the treatment contracts.

G.65 Treatments Provided
Treatments and procedures performed within the time and occurrence constraints appear in this component. The date of the patient encounter, the site, and the treatment or procedure performed display on a single line. The information that appears in this component is retrieved from the Treatments Provided file. The types of treatments and codes displayed in this component are determined at each site and must be typed into the Treatments Provided file. The data recording and entry conventions also must be locally developed.

------------TREATMENTS PROVIDED (max 5 visits or years)------------
12/10/07 DEMO HOSP FOOT CARE
  APPLY/REMOVE BRACE/SLING, CAST

Figure G-85: Example of the Treatments Provided component
G.66   Well Child Exam

This component displays the data for the Well Child Exam regarding patient education data, data gathered during a general health screening, age-specific physical exam, special risk screening, and behavioral health screening.

G.67   Health Summary Types

There are several predefined, standard health summary types delivered with the PCC Health Summary system distribution. The predefined types are:

- Adult Regular
- Behavioral Health
- Community Health Representative (CHR)
- Dental
- Diabetes Standard
- Immunization
- Patient Merge (Complete)
- Pediatric
- Problem List

These standard summary types contain the components that healthcare providers most commonly rely on to assess a patient’s health status and care needs. They differ in terms of primary focus and the data displayed. Each of the standard summary types is described in detail below.

The description of each health summary type includes a list of the components that are included and the display restrictions, if any, noted in parentheses following the component name. The restrictions are abbreviated as follows. The letter X signifies number of occurrences and the letter Y signifies years; for example, 5X/2Y indicates the data is limited to five occurrences or two years. The provider narrative is set to display in these summaries, as applicable.

In addition to the standard health summary types, the user can create additional types at a facility that are specific to a site, clinic, or health problem. The user will be able to select the components to appear on the summary, order of appearance, and the date and visit restrictions for each one. The procedures for building customized Health Summaries are described in detail in the Section 4.0.
G.67.1 Adult Regular

The Adult Regular Health Summary is the most frequently used summary type. Go to the Adult Regular Health Summary example to view an example. The comprehensive overview of the patient’s health status provided by the Adult Regular Health Summary maximizes the provider’s ability to plan for and provide care to outpatient, emergency room, and home health patients.

The components displayed on the Adult Regular Health Summary are listed below in the order in which they display in the report.

- Demographic Data
- Allergies (from problem list)
- Allergies/Adverse Reactions (from allergy tracking)
- Measurement Panels (5X/2Y)
- Active Problems
- History of Surgery
- Meds - most recent of each (max. 1 year)
- Scheduled Encounters (include chart REQ. and Walk Ins) (max 10 visits or 90 days)
- In Hospital Visits (max 10 visits or 2 years)
- Outpatient/Field Visits (max. 10 visits or 2 years)
- Referred Care (max. 10 visits or 2 years)
- Treatments Provided (max. 25 visits)
- Most Recent Radiology Studies (max. 10 visits or 5 years)
- Most Recent Laboratory Data (max. 1 year)
- Most Recent Examinations
- Immunizations
- Health Maintenance Reminders

G.67.2 Behavioral Health

The Behavioral Health Summary displays information

- Demographic Data
- Allergies (from problem list)
- PCC Active Problems
- In-Hospital Visits (max. 10 visits or 2 years)
• PCC Outpatient Visits (max. 10 visits or 2 years)
• PCC Current Medications (max. 1 year)
• Laboratory Data (max. 5 visits)
• Most Recent of Each Lab Test (max. 1 year)
• Behavioral Health (max. 20 visits or 2 years)
• PCC Measurements Taken (max. 3 visits or 2 years)
• Treatments Provided (max. 3 visits or 2 years)

G.67.3 Community Health Representative (CHR)
The Community Health Representative (CHR) Health Summary displays information typed in the CHR System. Patient-related data from the PCC also display. The following components display in the CHR Health Summary:
  • Demographic Data
  • CHR (max. 10 visits or 2 years)

G.67.4 Dental
The Dental Health Summary is printed prior to a patient’s dental visit. Both demographic and clinical information displays for use by administrative staff and healthcare providers. Below are the components that display:
  • Demographic Data
  • Allergies From Problem List
  • Measurement Panels (max. 5 visits or 2 years)
  • Active Problems
  • Outpatient/Field Visits (max. 10 visits or 2 years)
  • Dental (max. 10 visits or 3 years)

G.67.5 Diabetes EHR
The Diabetes EHR Summary is:
  • Minor Surgery History (max. 1 year)
  • History of Surgery
  • Referred Care (max 1 year)
G.67.6 Diabetes Standard

The Diabetes Standard Health Summary is similar to the Adult Regular summary, but more detailed information is provided for assisting with the healthcare of the diabetic patient.

- Demographic Data
- Insurance Information
- Allergies (from problem list)
- Measurement Panels (max. 5 visits or 2 years)
- Reproductive History (female only)
- Active Problems
- Inactive Problems
- History of Surgery
- Health Factors
- Hospitalization Stays (max. 5 visits or 5 years)
- In-Hospital Visits (max. 10 visits or 2 years)
- Outpatient/Field Visits (max. 10 visits or 2 years)
- Referred Care (max. 10 visits or 2 years)
- Most Recent Patient Education (max. 5 visits or 2 years)
- Most Recent Laboratory Data (max. 1 year)
- Most Recent Examinations
- Immunizations
- All Skin Tests
- Health Maintenance Reminders
- Flowsheets (max. 1 year)
- Diabetes Patient Care Summary

G.67.7 Immunization

The Immunization Health Summary displays three components pertaining to the patient’s immunization history:

- Brief Demographics
- Immunizations
- All Skin Tests
G.67.8 Patient Merge (Complete)

The Patient Merge (Complete) Health Summary is included for use by PCC data entry staff to assist with record-keeping responsibilities. The components that display in this Health Summary are:

- Demographic Data
- Insurance Information
- Active Problems
- Inactive Problems
- Allergies (from problem list)
- Allergies/Adverse Reactions (from allergy tracking)
- Family Health History
- Personal Medical History
- Hospitalization Stays
- In-Hospital Visits
- Outpatient/Field Visits
- Public Health Nursing Visits
- CHR
- History of Surgery
- Minor Surgery History
- Reproductive History
- Scheduled Encounters (includes chart REQ and Walk Ins)
- Measurements
- Laboratory Data
- Microbiology
- All Medications (includes duplicate RXs)
- Immunizations
- All Skin Tests
- Most Recent Radiology Studies
- Diagnostic Procedure
- Most Recent Examinations
- Narrative Text
• Patient Education
• Patient Refusals for Service

G.67.9 Pediatric
The Pediatric Health Summary was specifically designed for use by pediatric healthcare professionals to assist in providing effective care for their patients. The components that display in this Health Summary are:
• Demographic Data
• Allergies (From Problem List)
• Allergies/Adverse Reactions (from Allergy Tracking)
• Outpatient/Field Visits (max. 10 visits or 2 years)
• In-Hospital Visits (max. 10 visits or 2 years)
• Referred Care (max. 1 year)
• Immunizations
• Health Maintenance Reminders

G.67.10 Problem List
The information presented in the Problem List Health Summary focuses on the patient’s current health problems and latent problems that could potentially affect the patient’s health in the future. This Health Summary displays four components:
• Brief Demographics
• Active Problems
• History of Surgery
Appendix H: Anticoagulation Supplement Logic

The Anticoagulation Supplement is available for patients who have a POV in the last year (365 days) with a diagnosis from BJPCAC THRPY INDICDXS.

The following fields are included in the supplement.

Appendix I: RPMS Rules of Behavior

The Resource and Patient Management (RPMS) system is a United States Department of Health and Human Services (HHS), Indian Health Service (IHS) information system that is FOR OFFICIAL USE ONLY. The RPMS system is subject to monitoring; therefore, no expectation of privacy shall be assumed. Individuals found performing unauthorized activities are subject to disciplinary action including criminal prosecution.

All users (Contractors and IHS Employees) of RPMS will be provided a copy of the Rules of Behavior (RoB) and must acknowledge that they have received and read them prior to being granted access to a RPMS system, in accordance IHS policy.

- For a listing of general ROB for all users, see the most recent edition of IHS General User Security Handbook (SOP 06-11a).
- For a listing of system administrators/managers rules, see the most recent edition of the IHS Technical and Managerial Handbook (SOP 06-11b).

Both documents are available at this IHS Web site: http://security.ihs.gov/.

The ROB listed in the following sections are specific to RPMS.

I.1 All RPMS Users

In addition to these rules, each application may include additional RoBs that may be defined within the documentation of that application (e.g., Dental, Pharmacy).

I.1.1 Access

RPMS users shall

- Only use data for which you have been granted authorization.
- Only give information to personnel who have access authority and have a need to know.
- Always verify a caller’s identification and job purpose with your supervisor or the entity provided as employer before providing any type of information system access, sensitive information, or nonpublic agency information.
- Be aware that personal use of information resources is authorized on a limited basis within the provisions Indian Health Manual Part 8, “Information Resources Management,” Chapter 6, “Limited Personal Use of Information Technology Resources.”

RPMS users shall not

- Retrieve information for someone who does not have authority to access the information.
• Access, research, or change any user account, file, directory, table, or record not required to perform their official duties.

• Store sensitive files on a PC hard drive, or portable devices or media, if access to the PC or files cannot be physically or technically limited.

• Exceed their authorized access limits in RPMS by changing information or searching databases beyond the responsibilities of their jobs or by divulging information to anyone not authorized to know that information.

I.1.2 Information Accessibility

RPMS shall restrict access to information based on the type and identity of the user. However, regardless of the type of user, access shall be restricted to the minimum level necessary to perform the job.

RPMS users shall

• Access only those documents they created and those other documents to which they have a valid need-to-know and to which they have specifically granted access through an RPMS application based on their menus (job roles), keys, and FileMan access codes. Some users may be afforded additional privileges based on the functions they perform, such as system administrator or application administrator.

• Acquire a written preauthorization in accordance with IHS policies and procedures prior to interconnection to or transferring data from RPMS.

I.1.3 Accountability

RPMS users shall

• Behave in an ethical, technically proficient, informed, and trustworthy manner.

• Log out of the system whenever they leave the vicinity of their personal computers (PCs).

• Be alert to threats and vulnerabilities in the security of the system.

• Report all security incidents to their local Information System Security Officer (ISSO)

• Differentiate tasks and functions to ensure that no one person has sole access to or control over important resources.

• Protect all sensitive data entrusted to them as part of their government employment.

• Abide by all Department and Agency policies and procedures and guidelines related to ethics, conduct, behavior, and information technology (IT) information processes.
I.1.4 Confidentiality

RPMS users shall

- Be aware of the sensitivity of electronic and hard copy information, and protect it accordingly.
- Store hard copy reports/storage media containing confidential information in a locked room or cabinet.
- Erase sensitive data on storage media prior to reusing or disposing of the media.
- Protect all RPMS terminals from public viewing at all times.
- Abide by all Health Insurance Portability and Accountability Act (HIPAA) regulations to ensure patient confidentiality.

RPMS users shall not

- Allow confidential information to remain on the PC screen when someone who is not authorized to that data is in the vicinity.
- Store sensitive files on a portable device or media without encrypting.

I.1.5 Integrity

RPMS users shall

- Protect their systems against viruses and similar malicious programs.
- Observe all software license agreements.
- Follow industry standard procedures for maintaining and managing RPMS hardware, operating system software, application software, and/or database software and database tables.
- Comply with all copyright regulations and license agreements associated with RPMS software.

RPMS users shall not

- Violate federal copyright laws.
- Install or use unauthorized software within the system libraries or folders.
- Use freeware, shareware, or public domain software on/with the system without their manager’s written permission and without scanning it for viruses first.

I.1.6 System Logon

RPMS users shall

- Have a unique User Identification/Account name and password.
• Be granted access based on authenticating the account name and password entered.
• Be locked out of an account after five successive failed login attempts within a specified time period (e.g., one hour).

I.1.7 Passwords

RPMS users shall
• Change passwords a minimum of every 90 days.
• Create passwords with a minimum of eight characters.
• If the system allows, use a combination of alpha-numeric characters for passwords, with at least one uppercase letter, one lower case letter, and one number. It is recommended, if possible, that a special character also be used in the password.
• Change vendor-supplied passwords immediately.
• Protect passwords by committing them to memory or store them in a safe place (do not store passwords in login scripts or batch files).
• Change passwords immediately if password has been seen, guessed, or otherwise compromised, and report the compromise or suspected compromise to their ISSO.
• Keep user identifications (IDs) and passwords confidential.

RPMS users shall not
• Use common words found in any dictionary as a password.
• Use obvious readable passwords or passwords that incorporate personal data elements (e.g., user’s name, date of birth, address, telephone number, or social security number; names of children or spouses; favorite band, sports team, or automobile; or other personal attributes).
• Share passwords/IDs with anyone or accept the use of another’s password/ID, even if offered.
• Reuse passwords. A new password must contain no more than five characters per eight characters from the previous password.
• Post passwords.
• Keep a password list in an obvious place, such as under keyboards, in desk drawers, or in any other location where it might be disclosed.
• Give a password out over the phone.
I.1.8 Backups
RPMS users shall

• Plan for contingencies such as physical disasters, loss of processing, and disclosure of information by preparing alternate work strategies and system recovery mechanisms.

• Make backups of systems and files on a regular, defined basis.

• If possible, store backups away from the system in a secure environment.

I.1.9 Reporting
RPMS users shall

• Contact and inform their ISSO that they have identified an IT security incident and begin the reporting process by providing an IT Incident Reporting Form regarding this incident.

• Report security incidents as detailed in the IHS Incident Handling Guide (SOP 05-03).

RPMS users shall not

• Assume that someone else has already reported an incident. The risk of an incident going unreported far outweighs the possibility that an incident gets reported more than once.

I.1.10 Session Timeouts
RPMS system implements system-based timeouts that back users out of a prompt after no more than 5 minutes of inactivity.

RPMS users shall

• Utilize a screen saver with password protection set to suspend operations at no greater than 10 minutes of inactivity. This will prevent inappropriate access and viewing of any material displayed on the screen after some period of inactivity.

I.1.11 Hardware
RPMS users shall

• Avoid placing system equipment near obvious environmental hazards (e.g., water pipes).

• Keep an inventory of all system equipment.

• Keep records of maintenance/repairs performed on system equipment.
RPMS users shall not
- Eat or drink near system equipment.

I.1.12 Awareness
RPMS users shall
- Participate in organization-wide security training as required.
- Read and adhere to security information pertaining to system hardware and software.
- Take the annual information security awareness.
- Read all applicable RPMS manuals for the applications used in their jobs.

I.1.13 Remote Access
Each subscriber organization establishes its own policies for determining which employees may work at home or in other remote workplace locations. Any remote work arrangement should include policies that
- Are in writing.
- Provide authentication of the remote user through the use of ID and password or other acceptable technical means.
- Outline the work requirements and the security safeguards and procedures the employee is expected to follow.
- Ensure adequate storage of files, removal, and nonrecovery of temporary files created in processing sensitive data, virus protection, and intrusion detection, and provide physical security for government equipment and sensitive data.
- Establish mechanisms to back up data created and/or stored at alternate work locations.

Remote RPMS users shall
- Remotely access RPMS through a virtual private network (VPN) whenever possible. Use of direct dial in access must be justified and approved in writing and its use secured in accordance with industry best practices or government procedures.

Remote RPMS users shall not
- Disable any encryption established for network, internet, and Web browser communications.
I.2 RPMS Developers

RPMS developers shall

- Always be mindful of protecting the confidentiality, availability, and integrity of RPMS when writing or revising code.
- Always follow the IHS RPMS Programming Standards and Conventions (SAC) when developing for RPMS.
- Only access information or code within the namespaces for which they have been assigned as part of their duties.
- Remember that all RPMS code is the property of the U.S. Government, not the developer.
- Not access live production systems without obtaining appropriate written access, and shall only retain that access for the shortest period possible to accomplish the task that requires the access.
- Observe separation of duties policies and procedures to the fullest extent possible.
- Document or comment all changes to any RPMS software at the time the change or update is made. Documentation shall include the programmer’s initials, date of change, and reason for the change.
- Use checksums or other integrity mechanism when releasing their certified applications to assure the integrity of the routines within their RPMS applications.
- Follow industry best standards for systems they are assigned to develop or maintain, and abide by all Department and Agency policies and procedures.
- Document and implement security processes whenever available.

RPMS developers shall not

- Write any code that adversely impacts RPMS, such as backdoor access, “Easter eggs,” time bombs, or any other malicious code or make inappropriate comments within the code, manuals, or help frames.
- Grant any user or system administrator access to RPMS unless proper documentation is provided.
- Release any sensitive agency or patient information.

I.3 Privileged Users

Personnel who have significant access to processes and data in RPMS, such as, system security administrators, systems administrators, and database administrators, have added responsibilities to ensure the secure operation of RPMS.
Privileged RPMS users shall

- Verify that any user requesting access to any RPMS system has completed the appropriate access request forms.
- Ensure that government personnel and contractor personnel understand and comply with license requirements. End users, supervisors, and functional managers are ultimately responsible for this compliance.
- Advise the system owner on matters concerning information technology security.
- Assist the system owner in developing security plans, risk assessments, and supporting documentation for the certification and accreditation process.
- Ensure that any changes to RPMS that affect contingency and disaster recovery plans are conveyed to the person responsible for maintaining continuity of operations plans.
- Ensure that adequate physical and administrative safeguards are operational within their areas of responsibility and that access to information and data is restricted to authorized personnel on a need-to-know basis.
- Verify that users have received appropriate security training before allowing access to RPMS.
- Implement applicable security access procedures and mechanisms, incorporate appropriate levels of system auditing, and review audit logs.
- Document and investigate known or suspected security incidents or violations and report them to the ISSO, Chief Information Security Officer (CISO), and systems owner.
- Protect the supervisor, superuser, or system administrator passwords.
- Avoid instances where the same individual has responsibility for several functions (i.e., transaction entry and transaction approval).
- Watch for unscheduled, unusual, and unauthorized programs.
- Help train system users on the appropriate use and security of the system.
- Establish protective controls to ensure the accountability, integrity, confidentiality, and availability of the system.
- Replace passwords when a compromise is suspected. Delete user accounts as quickly as possible from the time that the user is no longer authorized system. Passwords forgotten by their owner should be replaced, not reissued.
- Terminate user accounts when a user transfers or has been terminated. If the user has authority to grant authorizations to others, review these other authorizations. Retrieve any devices used to gain access to the system or equipment. Cancel logon IDs and passwords, and delete or reassign related active and backup files.
• Use a suspend program to prevent an unauthorized user from logging on with the current user's ID if the system is left on and unattended.

• Verify the identity of the user when resetting passwords. This can be done either in person or having the user answer a question that can be compared to one in the administrator’s database.

• Shall follow industry best standards for systems they are assigned to, and abide by all Department and Agency policies and procedures.

Privileged RPMS users shall not

• Access any files, records, systems, etc., that are not explicitly needed to perform their duties.

• Grant any user or system administrator access to RPMS unless proper documentation is provided.

• Release any sensitive agency or patient information.
Glossary

Caret (^)
A circumflex, also known as a “hat” or “up-hat,” that is primarily used for exiting a task. The up-hat is denoted as “^” (caret) and is typed by simultaneously pressing SHIFT+6 on the keyboard.

Component
A segment of the Health Summary that groups data into sections.

Device
A printer, video terminal, or other type of hardware or equipment associated with a computer. The Health Summary system will prompt you to specify a particular device on which to generate output.

Evoking Codes
Codes recorded on a patient’s problem list that triggers specific data to print in the Health Summary. For example, a diabetic flowsheet will contain evoking codes so that it prints only in the Health Summary of a patient who has a code for diabetes in the Problem List.

Flowsheet
A tabular format for organizing and displaying data in a special section of the Health Summary.

Health Summary
A summary of a patient’s demographic and clinical information compiled from information in the Patient Care Component (PCC) database of the Resource and Patient Management System.

ICD codes
A set of numeric codes used in the healthcare industry to label and classify various diseases and health problems. (See ICD.)

Key
A means of securing menus to limit access. To use certain functions, such as those on a manager’s menu, the user must be assigned the appropriate key by the site manager.

Menu
A list of choices (see Option) for computing activity presented on the screen for the user to select.
Mnemonic
Two- to four-letter designations used to select menu options and enter data that facilitate these tasks by reducing the number of required keystrokes.

Option
As an item on a menu, an option provides an opportunity for users to select it, thereby invoking the associated computing activity.

Panel
A tabular format for presenting a series of clinical measurements or results in the Health Summary.

Patient Care Component (PCC)
The central repository for data in the Resource and Patient Management System.

Problem List
A list of health problems, related notes, and treatment plans for a patient that are recorded and updated as part of the patient’s health record.

Queuing
Requesting that a job be processed at a later time rather than in the current session.

ENTER Key
Also known as the RETURN key, this key on the computer keyboard tells the computer to execute a command or store the information typed.

Resource and Patient Management System (RPMS)
The Resource and Patient Management System is the set of computer programs used for managing data at the Indian Health Service.

Submenu
A menu which is underlying or accessible from a primary menu. (See Menu) A software program typically contains a single primary menu and many submenus.
