1.0 Introduction

Please review these changes, and add a copy of them to any printed documentation your site may be using for BJPC v2.0. These changes will be integrated into future versions of the software and user manuals. These changes will no longer be considered an addendum at the time of the next version release.

This addendum only provides written guidance on changes made in the patch that are relevant to the user. To see a list of all changes please refer to the patch notes for each of the respective patches.

1.1 Summary of Changes

Patch 20 includes the following changes to the BJPC APCD functionality.

- Ability to resequence POVs under One Patient's Visit selection item in EHRD and PEHR added.
- Secondary provider added as EHRD sort election item.
- Ability to move POVs, Vitals, and PED from one visit to another with option MVD and MV2D added.
- Mnemonic RSPV and HIF added to data entry functionality.
- Secondary FileMan lookup added to data entry diagnosis mnemonics.
- Historical Infant feeding added to the selection item list under menu option HD.I.

2.0 Patch 20 Changes – Coding Queue

The following are coding queue changes implemented with Patch 20.

2.1 EHRD Secondary Provider Sort Selection

Menu option EHRD HER/PCC Coding Audit for Visits in Date Range includes the option to sort by one secondary provider.

```

Please enter the Providers whose visits you want to display
This will screen on the provider on the visit.

      Select one of the following:

      A          ALL Primary Providers
      S          Selected set or Taxonomy of Primary Providers
      O          ONE Primary Provider
      X          No Visit Primary Provider Assigned
      C          One Secondary Provider

Enter a code indicating which providers are of interest: A//
  
```

Figure 2-1: Provider Selection Choices

2.2 EHRD/PEHR Resequence POV – Selection Item O

The user can resequence primary and secondary POVs for a visit under the selection item O One Patient's Visits.

```

* an asterisk beside the visit number indicates the visit has an error
# VISIT DATE PATIENT NAME HRN FAC HOSP LOC S CL PRIM PROV
STATUS

1) 01/13/14@17:35 TEST,DONNA 13976 TST DEMO CLIN A 01 ST CYR,DON I

Figure 2-2: Resequence POV Selection Item under One Patient's Visits

3.0 Patch 20 – Mnemonic Changes

3.1 Secondary FileMan Diagnosis Lookup

PCC diagnosis mnemonics PV, COC, SPV, PPV, IPV, ECOD, ECO2, EC03 and ADX use a Lexicon lookup as the first diagnosis search. A secondary FileMan diagnosis lookup will automatically search for the diagnosis if the Lexicon lookup does not find a match.

```
Purpose of Visit      ALLOWED      VISIT RELATED ONLY
Enter PURPOSE OF VISIT: v80
      A suitable term could not be found based on user input

now trying secondary fileman lookup... ??
      No matches found
Enter PURPOSE OF VISIT:
```

Figure 3-1: Secondary Fileman Lookup Message

3.2 Mnemonic RSPV (Resequence PVs)

Mnemonic RSPV is used to resequence visit primary and secondary POVs through data entry.

```
MNEMONIC: rspv      Resequence POVS      ALLOWED      VISIT RELATED ONLY

Visit Information

      Current Sequence of POV's

      1)  R51.      headache
      2)  M79.661  leg pain
      3)  J44.9    COPD

Do you want to resequence these POV's? N// YES

Please jot down the order using the numbers above that you wish the POV's
to be in.  For example, if there are 3 POV's and you want #3 first, #1
second
and #2 third, you would enter 3,1,2.

In what order do you want the POV's resequenced:  (1-3): 3,2,1

The POV's will be resequenced to the following order:
      1)  J44.9    COPD
      2)  M79.661  leg pain
      3)  R51.      headache

Do you want to continue to resequence these POV's? N// YES

```

Figure 3-2: Resequence POVs using RSPV Mnemonic

3.3 Mnemonic IF (Infant Feeding)

Use the Infant Feeding Choices (IF) mnemonic to document the feeding method of an infant patient for visit-related-only encounters. The options are:

- 1–Exclusive breastfeeding
- 2–Mostly breastfeeding
- 4–Mostly formula
- 5–Formula only

If the feeding choice is 2 or 4, the user is prompted for additional feeding choices (Milk, Fruit juice, Carbonated drink, sports drink, Glucose, Water).

```

MNEMONIC: IF Infant Feeding Choices ALLOWED VISIT-RELATED ONLY

4.0 Patch 20 – Miscellaneous Option Changes

4.1 Move Data Items from One Visit to Another (MVD)

The MVD option is used to move certain data items from one visit to another.

Patch 20 adds POVS, Vitals and PED to the selection list.

```

End of visit display, <ENTER> to Continue

      1)  MEDICATIONS
      2)  LAB TESTS
      3)  DENTAL
      4)  RADIOLOGY
      5)  MICROBIOLOGY
      6)  CPTS
      7)  TRAN CODES
      8)  MEDITECH CHARGES
      9)  BLOOD BANK
     10)  IMMUNIZATIONS
     11)  SKIN TESTS
     12)  EXAMS
     13)  POVS
     14)  VITALS (MEASUREMENTS)
     15)  PATIENT ED TOPICS
     16)  PROCEDURES
     17)  HEALTH FACTORS
     18)  NONE - QUIT

Choose WHICH DATA ITEM TO MOVE:  (1-18): 18//

```
