RESOURCE AND PATIENT MANAGEMENT SYSTEM

RPMS Uniform Data System Reporting System

(BUD)

Technical Manual

Version 11.0
January 2017

Office of Information Technology (OIT)
Division of Information Technology

Table of Contents

Preface

This manual contains the technical overview of the Resource and Patient Management System (RPMS) Uniform Data System (UDS) Reporting System for calendar year 2016. Please note that this manual contains information regarding the UDS 2016 reports, routines, files, and options only. For information regarding previous year's reports please see the technical manual for that year and version.

RPMS UDS Reporting is intended for use by Tribal or urban health facilities receiving grant funds for primary care system development programs administered by the Bureau of Primary Health Care (BPHC), Health Resources and Services Administration (HRSA). The RPMS UDS Reporting System provides passive extraction of patient and visit data from the Indian Health Service (IHS) RPMS to produce 10 of the 12 UDS report tables required annually by BPHC grantees.

> **Note:** Submit 2016 UDS data by February 15, 2017 to assure adequate time for review and correction of data errors prior to final submission. Changes to these data will be permitted until March 31, 2017.

The RPMS UDS Reporting System software will be reviewed annually and updated as needed as BPHC reporting requirements change.

Additional information about BPHC grants and BPHC UDS reporting can be found at the following Web site: https://bphc.hrsa.gov/datareporting/reporting/index.html.

Rules of Behavior

All RPMS users are required to observe Department of Health and Human Services (HHS) and IHS Rules of Behavior (ROB) regarding patient privacy and the security of both patient information and IHS computers and networks. This document provides both RPMS and UDS ROBs.

1.0   About this Manual

This manual provides the technical documentation for the RPMS UDS Reporting System for CY 2016.

1.1   Key Changes for Version 11.0

1.1.1   Menu Changes

- Reports Menu Changes

    − Added UD16 UDS 2016 … menu option.
    − Removed UD07 UDS 2007 … menu option.

1.1.2   Table 3A

Renamed table to Patients by Age and by Sex Assigned at Birth.

1.1.3   Table 3B

- Renamed table to Demographic Characteristics.

- Added new sections for Patients by Sexual Orientation and Patients by Gender Identity.

1.1.4   Table 5–Staffing and Utilization

Added three new staff categories: Dental Therapists, Community Health Workers (CHWs), and Quality Improvement (QI).

1.1.5   Table 6A– Selected Diagnoses and Services Rendered

Removed ICD-9 codes.

1.1.6   Table 6B–Quality of Care Measures

- Aligned many measures with Centers for Medicare and Medicaid Services (CMS') electronic-Clinical Quality Measures (e-CQM).

- Added Systemized Nomenclature of Medicine (SNOMED) codes to many measures.

- Section C – Childhood Immunization Status:

    − Denominator changed to patients age 2

- – Added 1 Hepatitis A, 2 or 3 rotavirus, and 2 influenza vaccines to those required
- Section D – Cervical Cancer Screening:
  - – Denominator changed to patients age 23 through 64
  - – Numerator no longer includes patients with Pap and HPV for those over 30
- Section F – Preventive Care and Screening: BMI Screening and Follow-Up:
  - – Added denominator exclusions for patients receiving palliative care, refusal of height and/or weight, or other medical reason
- Section G – Preventive Care and Screening: Tobacco Use: Screening and Cessation Intervention:
  - – Denominator includes patients with either at least two medical visits or one preventative visit during the report period
  - – Added denominator exclusions for patients with medical reason for not screening for tobacco use
- Section H – Use of Appropriate Medications for Asthma:
  - – Denominator changed to patients age 5 through 64
  - – Denominator does not include criteria of two visits ever
  - – Added denominator exclusions for patients with emphysema, COPD, cystic fibrosis, or acute respiratory failure
  - – Removed exclusion of allergic reaction to asthma medications
- Section K – Colorectal Cancer Screening:
  - – Denominator changed to patients age 50 through 75
- Section M – Preventive Care and Screening: Screening for Clinical Depression and Follow-Up Plan:
  - – Added denominator exclusions for patients with refusal or who are in urgent or emergent situations
  - – Changed logic so that follow-up plan must be on the same day as the positive screen
- Section N – Oral Health Sealant for Children 6–9 Years:
  - – Denominator includes criteria that patient must have a dental visit during the report period

1.1.7   Table 7–Quality of Care Indicators

- Aligned measures with CMS' e-CQM measures.
- Added SNOMED codes to measures.
- Section B – Controlling High Blood Pressure:

- Denominator changed to patients age 18 through 85
- Added denominator exclusions for patients with dialysis, renal transplant, or chronic kidney disease
- Denominator does not include criteria of two visits during the report period
- Section C – Diabetes: Hemoglobin A1c Poor Control:
  - Denominator changed to patients age 18 through 75
  - Denominator does not include criteria of two visits during the report period

1.1.8   Taxonomy Changes

None

2.0   Introduction

IHS RPMS UDS Reporting is intended for use by Tribal or urban health facilities receiving grant funds for primary care system development programs administered by the BPHC and HRSA. The RPMS UDS Reporting System provides passive extraction of patient and visit data from the RPMS to produce 10 of the 12 UDS reports. For each of the 10 reports, RPMS UDS also produces lists of all patients and related visits that are counted in the reports.

> **Note:** The UDS 2016 reports are due to BPHC on or before February 15, 2017 to assure adequate time for review and correction of data errors prior to final submission. Changes to these data will be permitted until March 31, 2017.
>
> RPMS UDS Reporting System software will be reviewed annually and updated as needed as BPHC reporting requirements change.

2.1   About the BPHC Uniform Data System

The BPHC UDS is an integrated reporting system used by all grantees of the following primary care programs administered by the BPHC, HRSA:

- Community Health Center, as defined in Section 330(e) of the Health Centers Consolidation Act as amended

- Migrant Health Center, as defined in Section 330(g) of the Act

- Health Care for the Homeless, as defined in Section 330(h) of the Act

- Public Housing Primary Care, as defined in Section 330(i) of the Act

BPHC collects data on its programs to ensure compliance with legislative mandates and to report to Congress, the Office of Management and Budget (OMB), and other policy makers on program accomplishments. To meet these objectives, BPHC requires that grantees annually submit a core set of information that is appropriate for monitoring and evaluating performance and for reporting on annual trends. The UDS is the vehicle used by BPHC to obtain this information.

UDS reports provide a comprehensive picture of all activities within the scope of BPHC-supported projects. Grantees should report on the total unduplicated number of patients and activities within the scope of projects supported by all BPHC primary care programs covered by the UDS.

See Quick Reference Guide for relevant excerpts from the BPHC UDS manual. Additional information can be obtained from the following Web site: https://bphc.hrsa.gov/datareporting/reporting/index.html.

2.2   RPMS UDS Reporting System Overview

The RPMS UDS Reporting System is a software tool that produces 10 of the 12 reports required annually by BPHC grantees. These reports provide an overview of patients and visits at a grantee facility, including number, age, gender, zip code of residence, race/ethnicity of patients, number of visits by provider type, by key diagnoses and services, quality of care indicators and health outcome, and disparities. The system produces the following reports:

- Patients by Zip Code

- Table 3A Patients by Age and Gender

- Table 3B Patients by Hispanic or Latino Identity/Race/Language

- Table 4 Selected Patient Characteristics

- Table 5 Staffing and Utilization (Column A)

- Table 5 Staffing and Utilization (Columns B and C)

- Table 6A Selected Diagnoses and Services Rendered

- Table 6B Quality of Care Indicators

- Table 7 Health Outcome and Disparities

- Table 9D Patient-Related Revenue

Additionally, RPMS UDS will provide the following lists to assist in verifying data:

- LST1–Lists for Tables Zip Code, 3A & 3B, 4, 5, and 6A

- LST2–Lists for Table 6B

- LST3–Lists for Table 7

Individual quarter reports for the entire calendar year can also be run.

> **Note:** Tables 6B and 7 must be run using the Full Calendar Year option. If these reports are run using the Quarterly options, the totals combined will not match the calendar year totals.

The RPMS UDS also includes an option to save all patients that meet the BPHC definition of a patient to an RPMS search template. That data can then be used to prepare the other needed reports that are submitted to BPHC.

> **Note:** BPHC reporting is based on calendar year (January through December) rather than fiscal year (October through September).

See the "Report Descriptions" section in the BUD User Manual for a description of the detailed logic for each report.

3.0　　Implementation and Maintenance

The RPMS UDS occupies the BUD namespace. Options, security locks and keys, templates, routines, and globals are namespaced "BUD."

3.1　　System Requirements

- Kernel 8.0 or higher

- FileMan 21 or higher

- Uniform Data System V10.0 (bud_1000.k)

- Clinical Reporting System V17.0 or higher (bgp_1700.k)

3.2　　Security Keys

Table 3-1 provides a list of security keys and their descriptions.

Table 3-1: Security Keys

Name	Descriptive Name	Description
BUDZMGR	BUD MANAGER UTILITIES	This key unlocks the manager utilities menu option. Give this key to the person in charge of UDS reporting.
BUDZMENU	BUD MAIN MENU–UDS	This key unlocks the main UDS menu. It should be assigned to all users who need to run UDS reports.

4.0   Routines

Table 4-1 Lists routine names and a description of each. The description includes the date the routine was created.

Table 4-1: Routines

BUD LIST ORPHANS	Incomplete Visits related to Table 6
BUD LIST T3A/T3B	All Users w/Visits, by Age, Gender, Race (3A & 3B)
BUD LIST T5A	Provider/Staff List (Table 5 col A)
BUD LIST T6	All Users by Selected Primary Diagnosis (Table 6)
BUD LIST TABLE 5 2	Visits w/Uncategorized Primary Prov (Table 5 B&C)
BUD MANAGER UTILITIES	Manager Utilities
BUD MENU LISTS	User (Patient) Lists
BUD PATIENT LISTS	User (Patient) Lists
BUD REPORTS	Reports
BUD SETUP LOCATIONS	Update/Review Site Parameters
BUD TABLE 3A	Table 3A: Users by Age and Gender
BUD TABLE 3B	Table 3B: Users by Race/Ethnicity & Linguistic Pref
BUD TABLE 5	Table 5 (b&c): Staffing and Utilization (cols b&c)
BUD TABLE 5A STAFF	Table 5 (a): Staffing List only (column A)
BUD TABLE 6	Table 6: Selected Diagnoses and Services Rendered
BUD3 03 MENU	UDS 2003
BUDMENU	RPMS UDS Reporting System

7.0   Internal Relations

All users should be given the access to the appropriate options and keys, as needed. All the options within this system are stand-alone options.

8.0   Security Keys

Section 3.2 provides a list of security keys and their descriptions.

9.0   Archiving and Purging

There is no archiving and purging in this package.

10.0   Documentation Resources

This section describes a few methods to generate online technical documentation.

10.1   How to Generate Online Documentation

The file number range for this package is 90345–90349 and 90660–90669.

All templates, routines, screen forms, etc. begin with BUD.

This section describes some methods by which UDS technical documentation can be generated. UDS software offers several help prompts and help screens throughout the program. In addition, there are several Kernel options that can generate on-line technical documentation.

Some of those documents are described in the following sections.

10.2   System Documentation

Online VPS system documentation can be generated using several Kernel options, including, but not limited to:

- %INDEX
- Menu Management
- Inquire Option
- Print Option File
- VA FileMan
- Data Dictionary Utilities
- List File Attributes

For more option listings and further information about other utilities that supply online technical information, see the Decentralized Hospital Computer Program (DHCP) Kernel Reference manual.

10.2.1   %INDEX

The %INDEX option analyzes the structure of a routine to determine in part, if the routine adheres to RPMS programming standards. The output can include the following components:

- Compiled list of errors and warnings
- Routine listing

- Local variables

- Global variables

- Naked globals

- Label references

- External references

Running %INDEX for a specified set of routines allows users to discover any deviations from RPMS programming standards that exist, and to see how routines interact with one another (i.e., which routines call or are called by other routines).

To run %INDEX for the UDS, specify the BUD namespace at the "Routine(s)?>" prompt and IHS/RPMS UNIFORM DATA SYSTEM V4.0 build at the "Build" prompt.

10.2.2   Inquire Option

The Inquire menu management option provides the following information about a specified option:

- Option name

- Menu text

- Option description

- Type of option

- Lock (if any)

In addition, all items on the menu are listed for each menu option. To secure information about UDS options, the BUD namespace must be specified.

10.2.3   Print Option File

The Print Option File utility generates a listing of options from the Option file (#19). All entries, a single option, or range of options can be printed. For a list of UDS options, see Section 6.3.

10.2.4   List File Attributes

This VA FileMan option allows users to generate documentation pertaining to files and file structure. The standard format of this option provides the following data dictionary information for a specified file:

- File name and description

- Identifiers

- Cross-references

- Files pointed to by the file specified

- Files that point to the file specified

- Input, print, and sort templates

In addition, the following applicable data is supplied for each field in the file:

- Field name, number, title, and description

- Global location

- Help prompt

- Cross-references

- Input transform

- Date last edited

- Notes

Using the Global Map format of this option generates an output that lists the following information:

- All cross-references for the file selected

- Global location of each field in the file

- Input, print, and sort templates

For a comprehensive listing of UDS files, see Section 5.1.

10.3   Online Help

In addition to system documentation, RPMS includes special help displays for most menu options and data entry prompts. Typing a single question mark "**?**" at the "Select . . . Option" prompt displays information related to the current option, where:

Table 10-1: Help Displays

Typing . . .	Displays . . .
A single question mark (**?**)	A list of all options accessible from the current option.
Two question marks (**??**)	A list of all accessible options and their formal names
Three question marks (**???**)	A brief description for each option in a menu.
A single question mark (**?**) followed by an option name (**?OPTION**)	Extended help, if available, for that option

11.0   Standards and Conventions Requirements

There are no new Standards and Conventions exemptions within this application.

Glossary

Archiving

The storage of historical or little-used data off-line (often on tape).

Banner

A line of text with a user's name and domain.

Browser

An interactive application that displays ASCII text on a terminal that supports a scroll region. The text can be in the form of a word-processing field or sequential local or global array. The user can navigate freely within the document.

Cross-Reference

An indexing method whereby files can include pre-sorted lists of entries as part of the stored database. Cross-references (x-refs) facilitate look-up and reporting.

Entry Point

A point within a routine that is referenced by a "DO" or "GOTO" command from a routine internal to a package.

File

A set of related records or entries treated as a single unit.

FileMan

The database management system for RPMS.

Global

In MUMPS, global refers to a variable stored on disk (global variable) or the array to which the global variable may belong (global array).

INDEX (%INDEX)

A Kernel utility used to verify routines and other Massachusetts General Hospital (M) Utility Multi-Programming System (MUMPS) code associated with a package. Checking is done per current ANSI MUMPS standards and RPMS programming standards. This tool can be invoked through an option or from direct mode (>D ^%INDEX).

Kernel

> The set of MUMPS software utilities that function as an intermediary between the host operating system and application packages, such as Laboratory and Pharmacy. The Kernel provides a standard and consistent user and programmer interface between application packages and the underlying MUMPS implementation. These utilities provide the foundation for RPMS.

Menu

> A list of choices for computing activity. A menu is a type of option designed to identify a series of items (other options) for presentation to the user for selection. When displayed, menu-type options are preceded by the word "Select" and followed by the word "option," as in Select Menu Management option: (the menu's select prompt).

Namespace

> A unique set of 2 to 4 alpha characters that are assigned by the database administrator to a software application.

Option

> An entry in the Option file. As an item on a menu, an option provides an opportunity for users to select it, thereby invoking the associated computing activity. Options may also be scheduled to run in the background, not interactively, by TaskMan.

Routine

> A program or sequence of instructions called by a program that may have some general or frequent use. MUMPS routines are groups of program lines that are saved, loaded, and called as a single unit via a specific name.

Utility

> A callable routine line tag or function. A universal routine usable by anyone.

Variable

> A character or group of characters that refers to a value. MUMPS recognizes three types of variables: local variables, global variables, and special variables. Local variables exist in a partition of the main memory and disappear at sign-off. A global variable is stored on disk, potentially available to any user. Global variables usually exist as parts of global arrays.

Acronym List

Acronym	Term Meaning
ANSI	American National Standards Institute
BPHC	Bureau of Primary Health Care
CHW	Community Health Worker
CMS	Centers for Medicare and Medicaid Services
COPD	Chronic Obstructive Pulmonary Disease
e-CQM	Electronic-Clinical Quality Measure
CY	Calendar Year
DHCP	Decntralized Hospital Computer Program
HHS	Department of Health and Human Services
HRSA	Health Resources and Services Administration
ICD	International Classification of Diseases.
IHS	Indian Health Service
MUMPS	Massachusetts General Hospital (M) Utility Multi Programming System
OMB	Office of Management and Budget
QI	Quality Improvement
ROB	Rules of Behavior
RPMS	Resource and Patient Management System
SNOMED	Systemized Nomenclature of Medicine
UDS	Uniform Data System
