## Preface

This Installation Guide is to be used to bring installations of VistA at Indian Health Services (IHS) up to the Veterans Administration version of VistA compatible with CPRS version 27. Since several of the applications within this environment have been modified to meet the specific needs of IHS, additional patches are included that will result in the IHS functionality being retained, while bringing the software current with CPRS v27. There will also be new IHS only functionality that will be added in EHR patch 11.

### **Purpose**

This manual provides the information that enables the installation team to successfully load all VistA mega builds as well as the application patches to the IHS environment for both M based code and GUI programs necessary to run the IHS software.

This document shows the detailed steps that must be followed for a successful installation.

### **Scope**

This manual provides the steps for installing EHR Patch 11.

### **Audience**

Information in this manual is intended for System Administrators who are responsible for installing the work environment and not for the general user population.

## 1.0 Introduction

This manual provides the information necessary to enable a system administrator to install the EHR Patch 11 work environment for a hospital or clinic.

### 1.1 Tips

- All user input should be in ALL CAPITAL LETTERS.
- Pressing Enter repeatedly generally takes you back to a prompt that you are familiar with.
- Typing a ^ exits the routine.
- There is often online Help available by typing ?, ?? or ????. There are various levels of online Help, depending on where you are in the application.
- When an input request is made, the system will usually respond with a default response. If you press Enter, the system will use the default response.
- A good option to try is typing ??, and then pressing Enter. This presents a list of options for input. For example, if you press Enter after “INPUT TO WHAT FILE: NEW PERSON//” prompt, it selects the NEW PERSON file. Typing ?? gives you a list of files you could choose instead.

### 1.2 Installation

**VERY IMPORTANT – READ CAREFULLY**

- EHR Patch 11 **MUST** be installed with no users on the system. There are too many routine updates to allow users access to the system while this is occurring. Find a time when the system can be shut down for approximately two hours so all the patches can be installed.
- As there will be no users on the system, you can answer NO to inhibit logins and disable options.
- **ALL** the patches in this manual **MUST** be installed and in the order given prior to allowing users back on the system. Installing only the Mega Builds will remove all IHS modifications to the system and cause multiple errors.
- The instructions advise to say NO to the menu rebuilds. However, *once all the builds are installed*, DO rebuild the MENUs. Many new options have been added, and a menu rebuild is required so they are all properly placed.
- The user may be asked for a starting time for a tasked job during installation. *Choose a time after the installation has finished.*

- Place TaskMan in a WAIT state while the installation is occurring. This prevents any automated tasks from starting while the installation is still proceeding
- If the site is an INPATIENT site, have the Clinical Applications Coordinator (CAC) available to begin any IV quick orders to infusion quick orders. Providers will not be able to use these quick orders until they are converted. The Order Menu (Management Menu in the CPRS Manager Menu) has two options for the CAC to use:

1. MR – Medication Quick Order Report

This report shows which medications must be converted. It is sent in a Mailman message to the user running the option.

2. CV – Convert IV Inpatient QO to Infusion QO

This option guides the CAC through the conversion.

## 2.0 Pre-Installation Patched

Each of the Mega Builds requires that certain patches be installed prior to running the Mega Build. The list below includes those patches. To verify that the patch already exists on the system, check the PACKAGE file (#9.4) to verify that the Patch Application History Sub-Field under the Version Field Multiple exist contains the information using the instructions below. These steps assume that the user has programmer rights and that a value for DUZ has been set. The user must also be in the correct UCI in order to install or validate software.

1. From a programmer's prompt, type **>D P^DI** and then press Enter.
2. At "Select Option:" prompt, type **?**. The following menu appears:

```
1 ENTER OR EDIT FILE ENTRIES
2 PRINT FILE ENTRIES
3 SEARCH FILE ENTRIES
4 MODIFY FILE ATTRIBUTES
5 INQUIRE TO FILE ENTRIES
6 UTILITY FUNCTIONS
7 OTHER OPTIONS
8 DATA DICTIONARY UTILITIES
9 TRANSFER ENTRIES
```

3. At "Select Option" prompt, select **ENTER or EDIT FILE ENTRIES** and then press Enter.
4. At "INPUT TO WHAT FILE:" prompt, select **PACKAGE//**, and then press Enter.
5. At "EDIT WHICH FIELD:" prompt, select **ALL// VERSION (multiple)**, and then press Enter.
6. At the "EDIT WHICH VERSION SUB-FIELD: ALL//" prompt, select **PATCH APPLICATION HISTORY (multiple)**, and then press Enter.
7. At the "EDIT WHICH PATCH APPLICATION HISTORY SUB-FIELD:" prompt, select **ALL//, then EDIT VERSION SUB-FIELD:, and then EDIT FIELD:**, and then press Enter.
8. At the "Select PACKAGE NAME: LEXICON UTILITY" prompt, type **LEX**, and then press Enter.
9. At the "Select VERSION:" prompt, type **2.0//**, and then press Enter.
10. At the "Select PATCH APPLICATION HISTORY: 54//?" prompt, type **PATCH APPLICATION HISTORY** and then press Enter.
11. At the "Do you want the entire 54-Entry PATCH APPLICATION HISTORY List?" prompt, type **Y (Yes)**, and then press Enter. The following appears:

Choose from:

45 SEQ #43  
50 SEQ #48  
6 SEQ #7  
7 SEQ #6  
8 SEQ #8  
9 SEQ #9

You may enter a new PATCH APPLICATION HISTORY, if you wish.  
Answer must be 8-15 characters in length.

12. At the “Select PATCH APPLICATION HISTORY:” prompt, type **54//**, and then press Enter. The following appears:

```
PATCH APPLICATION HISTORY: 54//  
DATE APPLIED: APR 21, 2010//  
APPLIED BY: USER, DEMO//  
DESCRIPTION: No existing text
```

13. At the “Edit?” prompt, type **NO//**, and then keep pressing Enter until exited. The following appears:

```
Select PATCH APPLICATION HISTORY:  
Select PACKAGE NAME:  
Select OPTION
```

## 2.1 CPRS Required Patched

The following patches must be installed prior to loading each of the Mega Builds:

1. Mega Build I (ehr\_0110.11mb1.k)
  - LEX\*2.0\*25
2. Mega Build II (ehr\_0110.11mb2.k)
  - PXR\*1.5\*12
  - SD\*5.3\*478
  - GMTS\*2.7\*66
  - TIU\*1.0\*112
3. Mega Build III (ehr\_0110.11mb3.k)
  - LR\*5.2\*311
  - TIU\*1.0\*178
  - TIU\*1.0\*179
  - PSN\*4.0\*86
  - PSN\*4.0\*88
  - PSN\*4.0\*84
  - PSN\*4.0\*104
4. Mega Build IV (ehr\_0110.11mb4.k)
  - DG\*5.3\*522
  - SD\*5.3\*316

- SD\*5.3\*285
  - DG\*5.3\*554
  - LR\*5.2\*348
5. Mega Build V (ehr\_0110.11mb5.k)
    - RA\*5.0\*72
    - DG\*5.3\*757
  6. Mega Build VI (ehr\_0110.11mb6.k)  
LR\*5.2\*365
  7. Mega Build VII (ehr\_0110.11mb7.k)  
HDI\*1.0\*8
  8. Mega Build VIII (ehr\_0110.11mb8.k)  
NONE
  9. Mega Build IX (ehr\_0110.11mb9.k)  
NONE

## 3.0 Required Builds

It is essential that all the required builds are installed on the database prior to beginning the EHR Patch 11 installation. Failure will potentially leave your database in a state of corruption that may require you to revert to the most recent backup.

- Kernel Version 8.0 Patch 1017, which includes:
  - xu\_\_0800.1017k
  - xt\_\_0730.1017k
  - di\_\_2200.1017k
  - xwb\_0110.1017k
  - xu\_\_0800va.1017k
- Radiology Version 5.0 Patch 1003 including bra\_0500.1003k
- Laboratory Version 5.2 Patch 1031
- PIMS Version 5.3 Patch 1015
- IHS PCC SUITE (BJPC) Version 2.0 Patch 8
- ADVERSE REACTION TRACKING (GMRA) Version 4.0 Patch 1005
- PROBLEM LIST (GMPL) Version 2.0 Patch 1001
- GEN. MED. REC. – VITALS (GMRV) Version 5.0 Patch 1001
- CONSULT/REQUEST TRACKING (GMRC) Version 3.0 Patch 1002
- TEXT INTEGRATION UTILITIES (TIU) Version 1.0 Patch 1010
- CLINICAL REMINDERS (PXRМ) Version 1.5 Patch 1009
- IHS PHARMACY MODIFICATIONS (APSP) Version 7.0 Patch 1014
- ELECTRONIC HEALTH RECORD (EHR) Version 1.1 Patch 10

**Note:** An environment checker is included at the beginning of ehr\_0110.11mb1. **DO NOT ATTEMPT** to install **ANY** of the EHR 11 patches if this check fails until you have installed the missing patches.

## 4.0 Installation Questions

Below is a listing of the questions a user will be asked while installed all the patches for EHR Patch 11. Keep this handy as you begin the process. Refer to Section 5.1 for the order of install.

- ehr\_0110.11mb1.k
- ehr\_0110.11mb2.k
- ehr\_0110.11mb3.k
- ehr\_0110.11mb4.k
- ehr\_0110.11mb5.k
- ehr\_0110.11mb6.k
- ehr\_0110.11mb7.k
- ehr\_0110.11mb8.k
- ehr\_0110.11mb9.k

These files should be located where the installation process can find them when prompted. For example, the installation program asks:

1. At the “Select Installation Option:” prompt, select **1 LOAD A DISTRIBUTION**, and then press Enter.
2. At the “Enter a Host File:” prompt, type **C:\TEMP\MEGA BUILD\_CPRS27\ehr\_0110.11mb1.k**, and then press Enter.

This information must be entered so that the installation routine can find the .KID file and Load it. At the end of the LOAD, the system displays the INSTALL NAME. The installer should make a note of this name as it will be asked when the INSTALL is done.

The following Installation Questions must be answered during installation of each individual Mega Build. Have the answers available before starting the installation to avoid delays in processing.

### 4.1 Mega Build I (ehr\_0110.11mb1)

1. At the “Incoming Mail Groups:” prompt, type the Coordinator for Mail Group **GMPL CODE SET VERSION UPDATES:**, and then press Enter. The following appears:

Want KIDS to Rebuild Menu Trees Upon Completion of Install?  
NOTE: This is asked several times.

- At the “Incoming Mail Groups:” prompt, type the Coordinator for Mail Group **ORCM CSV EVENT:**, and then press Enter. The following appears:

```
Build McKesson
VSN to Dispense Units Per Order Unit and Drug Description Data
```

## 4.2 Mega Build II (ehr\_0110.11mb2)

Build SR\*3.0\*100 has an Environmental Check Routine.

```
Want to RUN the Environment Check Routine?
Want KIDS to Rebuild Menu Trees Upon Completion of Install?
Note: This will be asked several times.
Do you have the completed pre-installation worksheet?
>>> New Site Parameter <<<
```

- Answer the following question to define the default site parameter related to the use of the Anesthesia Report at your facility. This response will be stored for each division defined in the SURGERY SITE PARAMETERS file (#133) and may be updated after this patch is installed.

```
Does this facility use the Anesthesia Report?
>>> Starting Date for Reports to be Signed Electronically <<<
```

During the post-installation process, all reports for completed cases with an operation date on or after the date selected will be identified to be signed electronically and stub entries will be created in TIU.

- Enter a starting date for reports to be signed electronically. For example,; **TODAY// (APR 22, 2010).**

```
>>> Making Reports for Historical Cases Viewable through CPRS <<<
```

This patch includes a post-installation process that moves designated reports for historical Surgery cases into TIU. By doing so, these reports, while unsigned electronically, are viewable within the CPRS Surgery tab. These electronically unsigned reports contain a disclaimer stating; "This information is provided from historical files and cannot be verified that the author has authenticated/approved this information. The authenticated source document in the patient's medical record should be reviewed to ensure that all information concerning this event has been reviewed or noted."

**Note:** The site parameters entered above will be applied in this process. For multi-divisional facilities, if different parameter settings should be applied for each division, or if for any reason the process to make reports for historical surgery cases viewable in CPRS should not be run during this patch installation, answer NO to this question. A new option is provided to run this process later.

Do you want to move reports during the patch installation?

If you need to move additional reports for a different date range, the **Make Reports Viewable in CPRS** option contained on the **Surgery Package Management Menu** can be used after this patch is installed. The post-installation process will be tasked to run immediately at the end of patch installation. The following actions will occur in the following order:

- a. Conversion of cases with documents in TIU filed by the Boston Prototype (Class III) software.
- b. Creation of stub entries in TIU for reports for cases completed on or after the date selected above as the starting date for reports to be signed electronically.
- c. Movement of reports for historical cases into TIU (if selected).

```
136 SURGERY PROCEDURE/DIAGNOSIS CODES
*BUT YOU ALREADY HAVE 'SURGERY TRANSCRIPTION' AS FILE #136!
Shall I write over your SURGERY TRANSCRIPTION File?
136 SURGERY PROCEDURE/DIAGNOSIS CODES (Partial Definition)
*BUT YOU ALREADY HAVE 'SURGERY TRANSCRIPTION' AS FILE #136!
Shall I write over your SURGERY TRANSCRIPTION File?
Want KIDS to INHIBIT LOGONs during the install?
Want to DISABLE Scheduled Options, Menu Options, and Protocols?
```

3. At the “Enter the Device you want to print the Install messages” prompt, you can queue the install by entering a **Q** at the device prompt. Or, type a caret (^) to abort the install.
4. At the “DEVICE: HOME//” prompt, type **VIRTUAL**, and then press Enter.

**Note:** This prints information to your screen.

### 4.3 Mega Build III (ehr\_0110.11mb3)

Build OR\*3.0\*195 has an Environmental Check Routine.

```
Want to RUN the Environment Check Routine?
Want KIDS to Rebuild Menu Trees Upon Completion of Install?
```

**Note:** This question will be asked several times.

1. At “Enter when to Queue the Tally job to run in date@time format:” prompt Queue the task to run in about one hour following the install. That way it will not conflict with other patches and then press Enter.
2. The following appears:

```
Want KIDS to INHIBIT LOGONs during the install?
Want to DISABLE Scheduled Options, Menu Options, and Protocols?
```

3. Enter the device you want to print the Install messages. You can queue the install by entering a **Q** at the device prompt. Or, type a caret (^) to abort the install.
4. At DEVICE: HOME//, type VIRTUAL, and then press Enter.

**Note:** This prints the information to your screen.

#### 4.4 Mega Build IV (ehr\_0110.11mb4)

Build OR\*3.0\*215 has an Environmental Check Routine.

```
Want to RUN the Environment Check Routine?
Want KIDS to Rebuild Menu Trees Upon Completion of Install?
```

**Note:** This will be asked several times.

1. At the “Incoming Mail Groups:” prompt, type the Coordinator for Mail Group **'PSO EXTERNAL DISPENSE ALERTS':**, and then press Enter.
2. At the “Incoming Mail Groups:” prompt, type the Coordinator for Mail Group **'OR DRUG ORDER CANCELLED':**, and then press Enter. The following appears:

```
Want KIDS to INHIBIT LOGONs during the install?
Want to DISABLE Scheduled Options, Menu Options, and Protocols?
```

3. Enter the Device you want to print the Install messages. You can queue the install by entering a **Q** at the device prompt. Or, type a caret (^) to abort the install.
4. At the “DEVICE: HOME//” prompt, type **VIRTUAL**, and then press Enter.

**Note:** This prints the information to your screen.

#### 4.5 Mega Build V (ehr\_0110.11mb5)

Build PSO\*7.0\*254 has an Environmental Check Routine.

```
Want to RUN the Environment Check Routine?
Want KIDS to Rebuild Menu Trees Upon Completion of Install?
```

**Note:** This question will be asked several times.

1. At the “Incoming Mail Groups:” prompt, type the Coordinator for Mail Group 'SR TRANSPLANT':, and then press Enter.

The post-install routine included with this patch sends out a Mailman message with the list of Pharmacy Divisions in your site along with their related National Provider Identifier (NPI) Institution, which is being automatically assigned by this patch. It also indicatea if there were problems in the automatic assignment, which will have to be followed-up by an Outpatient Pharmacy user as outlined in the patch description.

2. Enter the Outpatient Pharmacy user(s) (e.g., Pharmacy ADPAC or designee) who should receive this message (at least one user is required). The user entered should be the person responsible for the maintenance of the PSO Site Parameters. The message will also be sent to the user installing the patch.

```
PHARMACY USER: ?
ANOTHER ONE:
Want KIDS to INHIBIT LOGONs during the install?
Want to DISABLE Scheduled Options, Menu Options, and Protocols?
```

3. Enter the device you want to print the Install messages. You can queue the install by entering a **Q** at the device prompt. Or, type a caret (^) to abort the install.
4. At the “DEVICE: HOME//” prompt, type **VIRTUAL**, and then press Enter. The following appears:

**Note:** A build PSO\*7.0\*254 has an Environmental Check Routine.

```
Want to RUN the Environment Check Routine?
Want KIDS to Rebuild Menu Trees Upon Completion of Install?
```

**Note:** This question will be asked several times.

5. At the “Incoming Mail Groups:” prompt, type the Coordinator for Mail Group 'SR TRANSPLANT':, and then press Enter.

The post-install routine included with this patch sends out a Mailman message with the list of Pharmacy Divisions in your site, along with their related National Provider Identifier (NPI) Institution, which is being automatically assigned by this patch. It also indicates if there were problems in the automatic assignment, which will have to be followed-up by an Outpatient Pharmacy user as outlined in the patch description.

6. Enter the Outpatient Pharmacy user(s) (e.g., Pharmacy ADPAC or designee) who should receive this message (at least one user is required). The user entered should be the person responsible for the maintenance of the PSO Site Parameters. The message is also sent to the user installing the patch.

```
PHARMACY USER: ?
ANOTHER ONE:
Want KIDS to INHIBIT LOGONs during the install?
Want to DISABLE Scheduled Options, Menu Options, and Protocols?
```

7. Enter the Device you want to print the Install messages. You can queue the install by entering a **Q** at the device prompt. Or, type a caret (^) to abort the install.
8. At the “DEVICE: HOME//” prompt, type **VIRTUAL**, and then press Enter.

**Note:** This prints information on your screen.

## 4.6 Mega Build VI (ehr\_0110.11mb6)

Build PSU\*4.0\*3 has an Environmental Check Routine.

```
Want to RUN the Environment Check Routine?
Want KIDS to Rebuild Menu Trees Upon Completion of Install?
```

**Note:** This question will be asked several times.

```
Want KIDS to INHIBIT LOGONs during the install?
Want to DISABLE Scheduled Options, Menu Options, and Protocols?
```

1. Enter the device you want to print the Install messages. You can queue the install by entering a **Q** at the device prompt. Or, type a caret (^) to abort the install.
2. At the “DEVICE: HOME//”, type **VIRTUAL**, and then press Enter.

**Note:** This displays information on your screen.

## 4.7 Mega Build VII (ehr\_0110.11mb7)

Build PSS\*1.0\*123 has an Environmental Check Routine.

```
Want to RUN the Environment Check Routine?
Want KIDS to Rebuild Menu Trees Upon Completion of Install?
Note: This question will be asked several times.
Install Questions for GMRC*3.0*50:
Print Full Patient Names on pre-install report?
Checking Install for Package PSS*1.0*129
Will first run the Environment Check Routine, PSS129EN
```

Upon completion of the Post Install, a mail message will be sent to the patch installer, and at least one pharmacy user. Enter one or more Pharmacy users (e.g., Pharmacy ADPAC or designee) who should receive this message.

```
Enter Pharmacy User:
Note: Type name here.
Enter Pharmacy User:
Continue with install?
```

1. At the “Incoming Mail Groups:” prompt, type the Coordinator for Mail Group **'PSO REJECTS BACKGROUND MESSAGE':**, and then press Enter. The following appears:

```
115          NUTRITION PERSON
*BUT YOU ALREADY HAVE 'DIETETICS PATIENT' AS FILE #115!
Shall I write over your DIETETICS PATIENT File?
119.8        NUTRITION EVENTS
*BUT YOU ALREADY HAVE 'DIETETIC EVENTS' AS FILE #119.8!
Shall I write over your DIETETIC EVENTS File?
Want KIDS to INHIBIT LOGONs during the install?
Want to DISABLE Scheduled Options, Menu Options, and Protocols?
```

2. Type the device you want to print the Install messages. You can queue the install by entering a **Q** at the device prompt. Or, type a caret (^) to abort the install.
3. At the “DEVICE: HOME//” prompt, type **VIRTUAL**, and then press Enter.

**Note:** This will display information to your screen.

## 4.8 Mega Build VIII (ehr\_0110.11mb8)

```
Want KIDS to Rebuild Menu Trees Upon Completion of Install?
```

**Note:** This question will be asked several times.

```
Want KIDS to INHIBIT LOGONs during the install?
Want to DISABLE Scheduled Options, Menu Options, and Protocols?
```

1. Enter the device you want to print the Install messages. You can queue the install by entering a **Q** at the device prompt. Or, type a caret (^) to abort the install.
2. At the “DEVICE: HOME//” prompt, type **VIRTUAL**, and then press Enter.

## 4.9 Mega Build IX (ehr\_0110.11mb9)

```
Want KIDS to Rebuild Menu Trees Upon Completion of Install?
```

**Note:** This question will be asked several times.

Want KIDS to INHIBIT LOGONs during the install?  
Want to DISABLE Scheduled Options, Menu Options, and Protocols?

1. Enter the device you want to print the Install messages. You can queue the install by entering a **Q** at the device prompt. Or, type a caret (^) to abort the install.
2. At the “DEVICE: HOME//” prompt, type **VIRTUAL**, and then press Enter.

**Note:** This will display information on your screen.

## 5.0 Installation Instructions

The following is the actual installation dialog for each of the Mega Builds. These instructions assume that the installer has Programmer rights, is in the correct UCI, and has a value set for DUZ. If not, refer to the Contact Information section for whom to contact for assistance.

EHR11 needs to be installed with NO users on the system. Because of the extremely large numbers of routines being edited, there will be multiple errors if users remain on the system. The EHR will need to be shut down and no log-ins allowed.

### 5.1 Installation Order

The mega builds **MUST** be installed in numeric order. **DO NOT ATTEMPT** to install them in any other order or it may result in database corruption!

Each mega build is comprised of 10-100 individual VA patches. After loading each mega build, scroll back and verify that none of the VA patches failed an environment check. If they did, the site **MUST** load the missing patch before proceeding.

**DO NOT NEGLECT THIS STEP!**

1. ehr\_0110.11mb1.k
2. ehr\_0110.11mb2.k
3. ehr\_0110.11mb3.k
4. ehr\_0110.11mb4.k
5. ehr\_0110.11mb5.k
6. ehr\_0110.11mb6.k
7. ehr\_0110.11mb7.k
8. ehr\_0110.11mb8.k
9. ehr\_0110.11mb9.k

**DO NOT ATTEMPT** to install ehr\_0110.11k **UNTIL AFTER ALL** the mega builds identified above have been successfully installed. This is the final step of the install.

10. ehr\_0110.11k

This patch puts IHS modifications back in the routines. DO NOT ATTEMPT to run the EHR until this build is installed.

## 5.2 Mega Build I (ehr\_0110.11mb1)

1. At the “Select OPTION NAME:” prompt, type **INS,MENU**, and then press Enter. The following appears:

```

1      INSTALLATION  XPD INSTALLATION MENU  Installation
2      INSURER FILE MENU  AG TM INS MENU    Insurer File Menu
3      INSURER FILE MENU  ABMD TM INS MENU  Insurer File Menu
Select 1:3:

```

2. Select **1 XPD INSTALLATION MENU Installation**, and then press Enter. The following appears:

```

1      Load a Distribution
2      Verify Checksums in Transport Global
3      Print Transport Global
4      Compare Transport Global to Current System
5      Backup a Transport Global
6      Install Package(s)
Restart Install of Package(s)
Unload a Distribution

```

3. Select **1 Load a Distribution**, and then press Enter.
4. At the “Enter a Host File:” prompt, type **YOUR DIRECTORY\ehr\_0110.11\_mb1.k**, and then press Enter.

**Note:** The location of the **ehr\_0110.11mb1.k** file may not be in this folder. This is determined individually for each installation.

The following appears:

```

KIDS Distribution saved on Aug 08, 2007@14:36:33

Note: You already have the 'SURGERY' File.
    133    SURGERY SITE PARAMETERS (Partial Definition)
Note: You already have the 'SURGERY SITE PARAMETERS' File.

```

11. At the “Want KIDS to Rebuild Menu Trees Upon Completion of Install? YES//” prompt, type **NO**, and then press Enter.
12. At the “Do you have the completed pre-installation worksheet? NO//” prompt, type **YES**, and then press Enter.

**New Site Parameter:** Answer the following question to define the default site parameter related to the use of the Anesthesia Report at your facility. This response will be stored for each division defined in the SURGERY SITE PARAMETERS file (#133) and may be updated after this patch is installed.

13. At the “Does this facility use the Anesthesia Report? NO//” prompt, type **NO**, and then press Enter.

Starting Date for Reports to be Signed Electronically during the post-installation process, all reports for completed cases with an operation date on or after the date selected will be identified to be signed electronically and stub entries will be created in TIU.

14. At the “Enter starting date for reports to be signed electronically:” prompt, type **TODAY//(APR 22, 2012)**, and then press Enter.

At this point, you may make reports for historical cases viewable through CPRS. See Appendix A: for details.

15. At the “Do you want to move reports during the patch installation?” prompt, type **NO//** and then press Enter

16. Press Enter to continue. The following appears:

**Note:** The post-install routine included with this patch sends out a Mailman message with the list of Pharmacy Divisions in your site, along with their related National Provider Identifier (NPI) Institution, which is automatically assigned by this patch. It also indicates if there were problems in the automatic assignment, which must be followed-up by an Outpatient Pharmacy user as outlined in the patch description.

18. At the following prompts, type the **Outpatient Pharmacy** user(s), (for example, Pharmacy ADPAC or designee) who should receive this message. (At least one user is required.) The user entered should be the person responsible for the maintenance of the PSO Site Parameters. The message will also be sent to the user installing the patch.

## 6.0 EHR Patch 11 Build

Now that all the updates have been installed, the final step is to install the EHR Patch 11 kids build and then the EHR Patch 11 GUI. The individual patches included with the EHR\*1.1\*11 build are:

APSP\*7.0\*1015

GMPL\*2.0\*1002

GMRC\*3.0\*1003

GMRA\*4.0\*1006

GMTS\*2.7\*1005

OR\*3.0\*1010

## 6.1 EHR Patch 11 KIDs Build

1. At the “Select OPTION NAME:” prompt, type **INST,MENU**, and then press Enter. The following appears:

```
Select Kernel Installation & Distribution System Option: Installation
 1      Load a Distribution
 2      Verify Checksums in Transport Global
 3      Print Transport Global
 4      Compare Transport Global to Current System
 5      Backup a Transport Global
 6      Install Package(s)
        Restart Install of Package(s)
        Unload a Distribution
```

2. At the “Select Installation Option:” prompt, select **1 Load a Distribution**, and then press Enter.
3. At the “Enter a Host File:” prompt, type **YOUR DIRECTORY\ehr\_0110.11k** and then press Enter.

**Note:** The location of the **ehr\_0110.11k** file may not be in this folder. This is determined individually for each installation.

The following appears:

**DO NOT FORGET TO REBUILD YOUR MENUS**

## 7.0 GUI Installation

A self-extracting archive (file `ehr_0110.11.exe`) is provided for installation of the client application components. These components are to be installed in a shared folder on a file server. The EHR application will automatically deploy components from this location to the client workstations. All users of the EHR application should have read-only access to this folder.

To install the client components to the shared folder, execute the self-extracting archive by double-clicking on the executable file. You must have read and write access to the shared folder to complete this installation. You will see the following dialog:

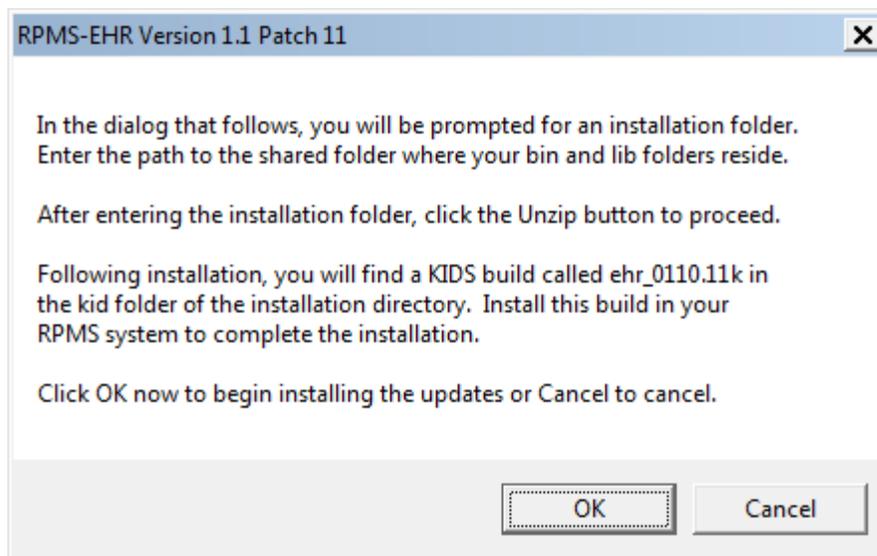

Figure 7-1: RPMS-EHR Version 1.1 Patch 11 dialog

Click **OK** to proceed. The following dialog box will appear.

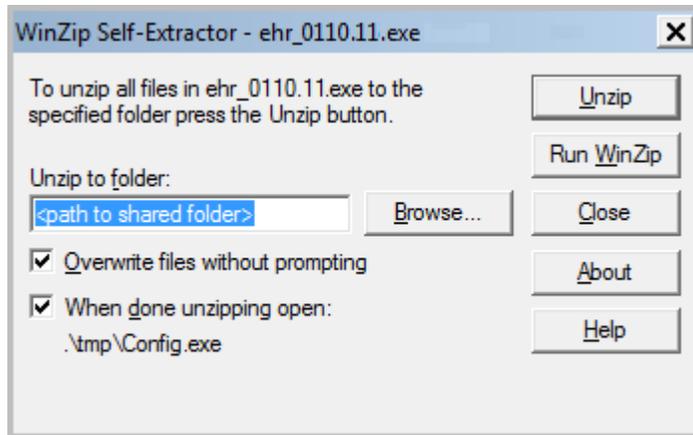

Figure 7-2: WinZip Self-Extractor – EHR\_0110.11.exe dialog

Enter the full path to the shared folder where the client files are to reside. If this is an update to an existing installation, this will be the folder that contains the ‘bin’ and ‘lib’ folders from the previous installation.

When the extraction process completes, you will see a confirmation dialog.

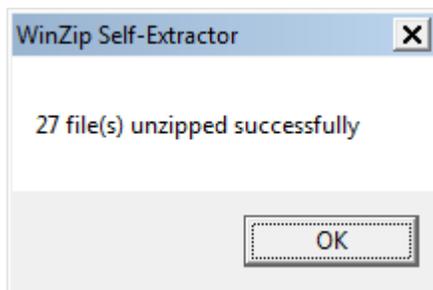

Figure 7-3: Confirmation dialog

Click **OK** to dismiss the dialog box. The EHR configuration dialog box appears.

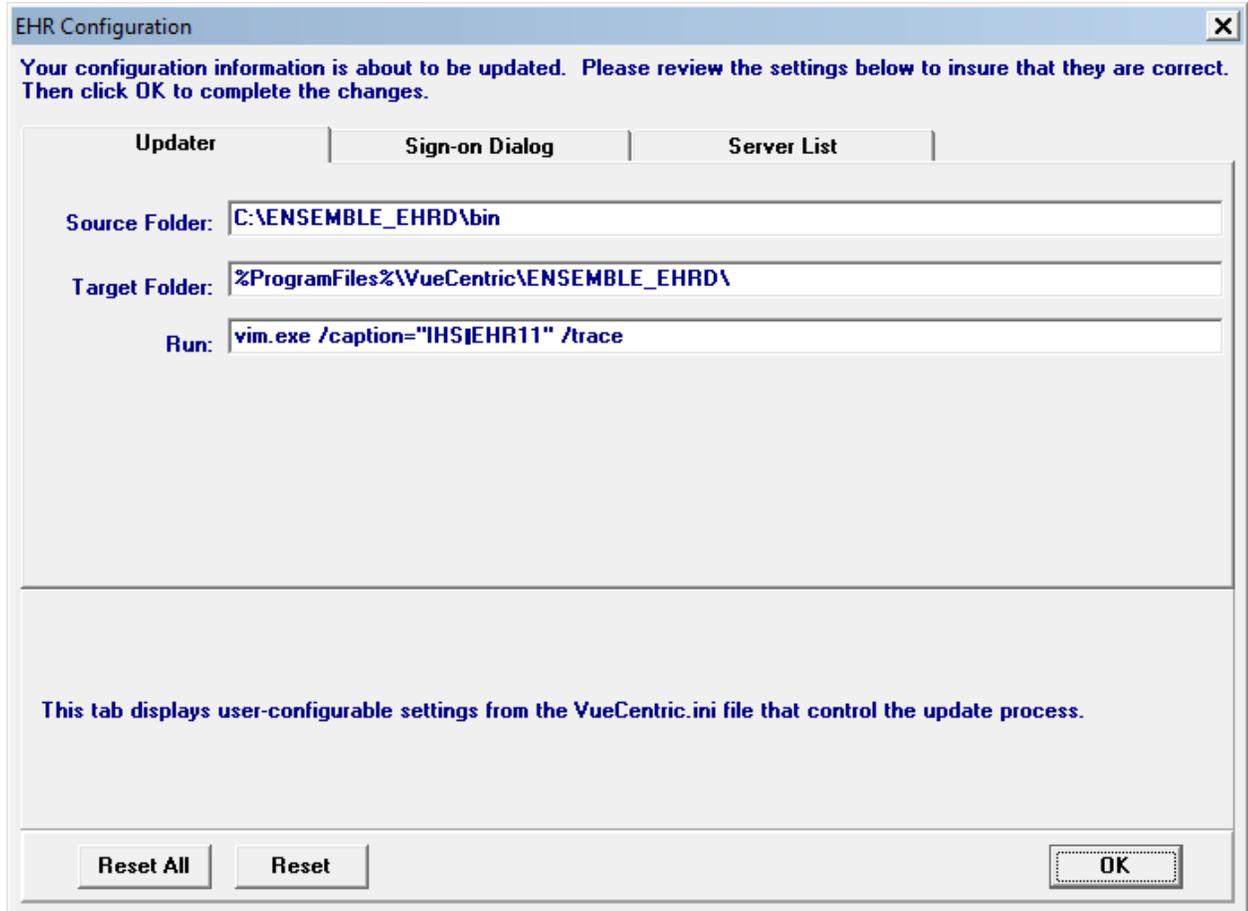

Figure 7-4: EHR Configuration dialog

If you are updating an existing installation, your current values will be displayed. Unless you have changed folder locations, you should not have to change these settings. The run setting can be left as is, or a custom caption can be added if desired.

Close the EHR Configuration dialog by clicking **OK**. You will see a splash screen that indicates that file versions are being updated. When the splash screen closes, the client installation is complete.

## Appendix A: List of Applications Updated with the CPRS 27 Mega Builds
