Diabetes Coding Changes

• Five updated Diabetes Mellitus categories to reflect the current clinical classification and manifestations:
  • E08 Diabetes Mellitus *due to an underlying condition*
    • E08.22, Diabetes mellitus due to an underlying condition with diabetic chronic kidney disease
  • E09 *Drug or chemical induced* diabetes mellitus
    • E09.52, Drug or chemical induced diabetes mellitus with diabetic peripheral angiopathy with gangrene
Diabetes Coding Changes

- **E10** *Type 1* diabetes mellitus
  - E10.11, Type 1 diabetes mellitus with ketoacidosis with coma

- **E11** *Type 2* diabetes mellitus
  - E11.41, Type 2 diabetes mellitus with diabetic mononeuropathy

- **E13** *Other specified* diabetes mellitus
  - E13.341 Other specified diabetes mellitus with severe nonproliferative diabetic retinopathy with macular edema

*Note:* No longer use controlled and uncontrolled. Now classifies inadequately controlled, out of control, and poorly controlled diabetes mellitus by type with hyperglycemia.
