

# Meaningful Use

California Area Best Practices Meeting  
Sacramento California  
Lunch Session

# Plan

- Discuss the purpose of meaningful use
- Explain the process of EHR Certification
- Discuss how Meaningful Use will be helpful in daily practice
- Identify resources for information and assistance regarding Meaningful Use

# Meaningful Use

Get certified EHR

Use a certified EHR  
in a meaningful way

# Timeline

Stage 1 Focus: Data capture and sharing

# Timeline

Stage 2 Focus: Advanced Clinical Practice

# Timeline

Stage 3 Focus: Improved Outcomes

TO Boldly Go Where No Data  
Has Gone Before

# Standards & Interoperability

*Patient Record*

1. Complete and accurate information
2. Better access to information
3. Patient engagement

# Standards & Interoperability

1. Complete and accurate information
2. Better access to information
3. Patient engagement

# Standards & Interoperability

1. Complete and accurate information
2. Better access to information
3. Patient engagement

How do we standardize and  
get interoperable

**RPMMS**

The logo for RPMMS features the letters in a bold, white, sans-serif font with a thick blue outline. The letters are set against a dark grey, multi-pointed starburst background. Each letter is enclosed within a thin, rounded rectangular border of a different color: 'R' is orange, 'P' is green, 'M' is purple, and 'S' is blue. The 'M' and 'S' are connected by a thin blue line at the bottom.

Use a Certified Electronic Health Record

# Certification

InfoGard Laboratories, Inc.

*an Office of the National Coordinator for Health IT-Authorized Testing and Certification Body (ONC-ATCB)*

certifies that the EHR Product listed below meets the mandatory certification criteria identified in the ONC Standards and Certification Criteria Final Rule as listed on the reverse.

**Resource and Patient Management System (RPMS)**

Certificate #: IG-2419-11-0050

Version: RPMS Suite (BCER) v1.0

Certified Date: April 1, 2011

by

Classification: Complete EHR

**Indian Health Service**

Practice Setting: Ambulatory

The complete list of certified EHR Products is posted on the ONC Certified HIT Product List (CHPL) website at:

<http://onc.chpl.force.com/enrcert>.

EHR is Certified by an Authorized Certification Body  
A certification number is assigned by the ONC

# Certification

The Certified Health IT Product List (CHPL) provides the authoritative, comprehensive listing of Complete EHRs and EHR Modules that have been tested and certified under the Temporary Certification Program maintained by the Office of the National Coordinator for Health IT (ONC). Each Complete EHR and EHR Module listed below has been certified by an ONC-Authorized Testing and Certification Body (ONC-ATCB) and reported to ONC. Only the product versions that are included on the CHPL are certified under the ONC Temporary Certification Program.

Please send suggestions and comments regarding the Certified Health IT Product List (CHPL) to [ONC.certification@hhs.gov](mailto:ONC.certification@hhs.gov), with "CHPL" in the subject line.

Vendors or developers with questions about their product's listing should contact the ONC-Authorized Testing and Certification Body (ONC-ATCB) that certified their product.

**USING THE CHPL WEBSITE**

To browse the CHPL and review the comprehensive listing of certified products, follow the steps outlined below:

1. Select your practice type by selecting the Ambulatory or Inpatient buttons below
2. Select the "Browse" button to view the list of CHPL products

To obtain a CMS EHR Certification ID, follow the steps outlined below:

1. Select your practice type by selecting the Ambulatory or Inpatient buttons below
2. Search for EHR Products by browsing all products, searching by product name or searching by criteria met
3. Add product(s) to your cart to determine if your product(s) meet 100% of the required criteria
4. Request a CMS EHR Certification ID for CMS registration or attestation from your cart page

**STEP 1: SELECT YOUR PRACTICE TYPE**

Performance Measures  
Clinical Quality Measures

# So Far

- ONC creates requirements for certified EHRs
  - RPMS EHR is stage I ambulatory and inpatient certified
- CMS creates requirements for using certified EHRs in a meaningful way
  - Performance Measures - how you use the EHR
  - Clinical Quality Measures - assess patient outcomes

# Complete and Accurate Information

[Login](#)

**View and Manage Your Health Records Online**  
To begin using PHR, click the link below to create an account and apply to view your Indian health system medical records.  
[Register to Use PHR](#)

**What is PHR?**  
Indian health system patients can use PHR to view and manage personal, family and community health information. Track medicines, lab results, allergies and more from the privacy of a personal computer.

**Who can use PHR?**  
Only an Indian health system patient who registers to use PHR and verifies their identity at an IHS facility can view their records.

# Meaningful Use

- Plan with your local and area Meaningful Use team
- Sign up with the REC
- Sign up for Meaningful Use (EPs & EHs)
- Install and use the Certified EHR (RPMS or other)

# For More Information

The screenshot shows the Indian Health Service website. At the top, it says "U.S. Department of Health and Human Services" and "www.hhs.gov". The main header is "Indian Health Service" with the tagline "The Federal Health Program for American Indians and Alaska Natives". There is a search bar and a navigation menu with letters A-Z. The page title is "Meaningful Use". The main content area contains several paragraphs and a list of objectives. A sidebar on the left lists navigation options like Home, EHR Incentive Payments, Toolkit, etc. A "Meaningful Use Listserv" box is on the right.

## Meaningful Use

The objectives of Meaningful Use of a certified Electronic Health Record (EHR) are to improve the safety, quality, and efficiency of care. Meaningful Use of EHRs can improve health care processes through the use of software applications that provide secure access, clinical decision support, performance reporting, and exchange of information with other providers of care. Systems such as these help to avoid preventable errors and allow for making better and more consistent decisions.

Under the provisions of the American Recovery and Reinvestment Act of 2009, the Centers for Medicare and Medicaid Services is authorized to make incentive payments for Medicare and Medicaid eligible professionals and eligible hospitals that demonstrate meaningful use of certified Electronic Health Record technology. These incentives provide additional resources to stimulate continued improvement throughout the health care system.

The vision which drives the achievement of meaningful use of EHR is one in which all patients are fully engaged in their healthcare, providers have real-time access to all medical information and tools to help ensure the quality and safety of the care provided while also affording improved access and elimination of health care disparities.

**The intent of Meaningful Use is using certified Electronic Health Record technology to:**

- Improve quality, safety, and efficiency of health care to reduce health disparities
- Engage patients and their families in their health care
- Improve coordination of care
- Improve population and public health
- Maintain privacy and security of patient information

**Achievement of Meaningful Use requires the following:**

- Adopt/Implement/Upgrade to a certified Electronic Health Record
- Demonstrate the meaningful use of a certified Electronic Health Record
