

IHS National GPRA/GPRAMA Results

FINAL FY 2025 & CURRENT FY 2026

Introduction

IHS clinical GPRA/GPRAMA results are calculated from the Integrated Data Collection System (IDCS), a data mart within the National Data Warehouse (NDW) General Data Mart. Service unit/health program data is exported to the NDW by reporting sites for inclusion in GPRA results.

The measure logic is programmed centrally within the IDCS data mart and mimics the CRS measure logic, which is located here: [CRS Software | Clinical Reporting System \(CRS\)](#)

National GPRA/GPRAMA Results include data from all IHS, Tribal, and Urban Indian health programs who submit their data to the National Data Warehouse.
