

Reese Weber, MBA, CISSP
Chief Information Security and Privacy Officer
Indian Health Service
California Area Office

Interconnection Security Agreements (ISAs)

- O This agreement defines procedures of reciprocal cooperation and coordination between IHS and a tribal-entity. "All Tribal IT or Urban IT systems that will be connected to the IHS network, regardless of the nature of the connection, require... an ISA to be submitted and approved prior to activation of the connection." Indian Health Manual, Part 8 Chapter 15.
- O ISAs are implemented at the national, area, or facility level. Partners conducting business with a single facility should have an agreement with the local area and/or facility. Partners with national contracts, or separate contracts operating within many different IHS areas, should have a national agreement with the IHS Office of Information Technology.

Information Technology Access Control

- The Information Technology Access Control (ITAC) system is a web-based system that records access to information systems
- Can be utilized to record access to any system, even tribal/urban/local systems
- Fulfills HIPAA access control record requirements

Malicious Traffic Notifications

- HHS and IHS both have Computers
 Security Incident Response Teams (CSIRT)
 that are constantly using software to scan
 the network for malicious files
- HHS and/or IHS CSIRT notifies ISSO, ISSO works with the site to identify users/systems and mitigate the risks.

RiskVision incident HHS_CSIRC_ID has been created to track this incident.

HHS CSIRC findings:

* Source IP(s): 198.45.3.26

* Destination IP(s): 216.119.115

* Destination Host: mail.kimaw[.]org

* Date/Time: 2018-10-17T16:13

* Traffic Type: HTTP GET Request/Malicious .doc file

*MD5: 25b19fcb6d4e793a165a9cdc5834d6a8

Critical Patching Notifications

- HHS regularly scans all systems on the domains for patch compliance, especially during pervasive attacks
- IHS also does the same sort of scans, using resources like Tenable and Nessus scans.
- HQ notifies Each Area ISSOs of affected systems, or vulnerable systems
- ISSOs disseminate to appropriate contacts for remediation, provides instructions and offers assistance in regards to mitigation.

Global Cyber Attacks

save became victim of the PETYA RANSOMWARE

The harddisks of your computer have been encrypted with an military grade encryption algorithm. There is no way to restore your data without a specia key. You can purchase this key on the darknet page shown in step 2.

To purchase your key and restore your data, please follow these three easy steps:

- 1. Download the Tor Browser at "https://www.torproject.org/". If you need help, please google for "access onion page".
- 2. Visit one of the following pages with the Tor Browser:

http://petya37h5tbhyvki.onion/N19fvE http://petya5koahtsf7sv.onion/N19fvE

3. Enter your personal decryption code there:

Additional Services by IHS

Services Offered by HQ:

- Firewall management and support
- Network device management
- IHS Web Account Management

Services Offered by Area Office:

- Disaster Recovery Planning
- Backup planning
- Access Control implementation
- Account/access reconciliation
- ISSA tracking
