

AI in Tribal Healthcare

What becomes possible when the weight is lifted

Kurt Brenkus

CEO, Indigenous Pact PBC
IHS California Area Regional Meeting

CLINICAL QUALITY

What if your provider could see the pattern before it becomes a crisis?

Real-time insights at the point of care — not three months later in a report.

RECLAIMING TIME

What would your team build with 10 extra hours every week?

AI-assisted documentation alone gives providers 30–60 minutes back every day. That's not an efficiency metric. That's space and energy to build the next program.

GETTING STARTED

You can start this week. With the data you already have.

Your policies, procedures, grant reports, and institutional knowledge are already waiting to work harder for you.

**If these burdens
were lifted —
what would you build?**

AI Readiness Toolkit available as a leave-behind
