

Infection Prevention Excellence: Comprehensive Training for Safe Healthcare Practices

We're excited to announce a partnership between the Centers for Disease Control and Prevention-Health Systems Strengthening, Resilience and Training Branch and Indian Health Services-Office of Quality, Division of Quality Assurance and Patient Safety to bring informative sessions on a range of Infection Control and Prevention Topics.

Join us for an informative 2-day in-person training! This comprehensive training is designed for healthcare professionals to excel in infection control and prevention practices. Don't miss the opportunity to enhance your skills and contribute to creating a safe healthcare environment. Topics for this training include Infection Control Programs, Sterilization, High Level Disinfection, and Environmental Services. Reserve your spot today!

The healthcare audience for these in-person sessions include but is not limited to:

- Infection Control Officers/Infection Preventionists
- Staff with the responsibility of overseeing the ICP Program (dual hats, Physician IC Chair)
- Area Infection Control Consultants
- Supervisors of the ICP Programs
- Quality Managers
- Nursing Supervisors
- Dental Area Consultants
- Dental Staff with responsibility for Dental Infection Control
- EVS Managers
- Governing Board Members
- Area Leadership
- Facility Leadership

** Seats are limited for this in-person-only training. Supervisor approval for travel is required prior to registration. Continuing Education Units (CEU) will be available to participants who attend the full 2-day training.

SAVE THE DATE!

Training Date: March 24-25, 2026 (8:30 AM-4:00 PM Pacific Time)

Training Location: John E. Moss Federal Building, 650 Capitol Mall,

Sacramento CA, 95814
