## Leading the Way to a Primary Care Medical Home

Carolyn Shepherd, MD 5/19/2014 IHS/CAL carolynmshepherd@gmail.com

## Objectives

- Describe the role of leadership in adoption of PCMH practices
- List strategies and methodologies for incorporating PCMH guidelines into clinic operations
- Describe potential financial benefits of the PCMH model (total cost of care, retention and recruitment)

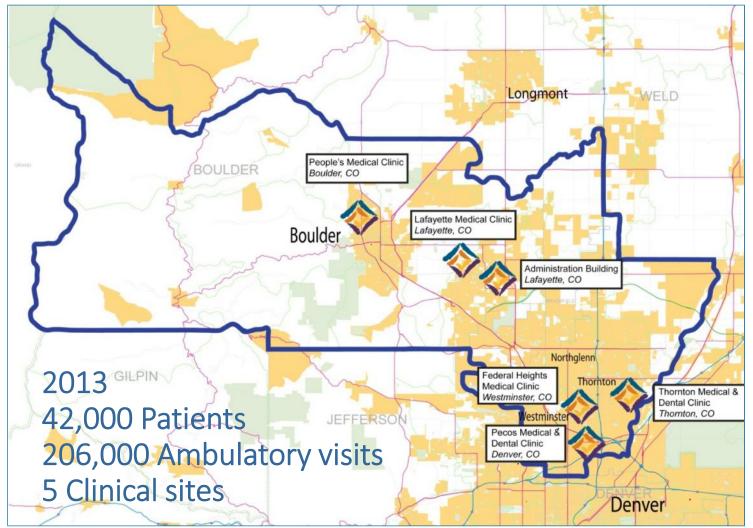

# Conversation for today

- Challenges in Healthcare and the Safety Next
- Is PCMH the answer?
- What is the leader's role
- How did Clinica get to PCMH recognition
- Tools for leading change
  - Change management strategies
  - Performance improvement
  - Population based management
  - Leadership time matrix
- Team based care models
- Role of IT
- Benefits to Clinica of PCMH transformation

## **Clinica Family Health Services**

## **Clinica Family Health Services**

- 50% uninsured
- 40% Medicaid until 1/1/14
- 56% < Poverty
- 98% < 200% of Poverty
- 44% 18 and under
- 26% women ages 20-44
- 1700 deliveries in 2012
- 60% prefer to speak in a language other than English

## **Clinica Family Health Services**

- 46 Physical Health Providers
- •14 Behavioral Health Providers
- •8 Dental Providers
- •Clinic in the Homeless Shelter Mental Health Center
- •2 Full Pharmacies, 2 Pharmacy Outlets, 2 Schools of Pharmacy
- Total Staff over 400
- Admit to 2 community hospitals
- Community-wide EHR in the iPN

## Healthcare in Transition

### Issues

- Changing payment
- Aging population, growth of the insured
- Variation in safety, reliability and care

- Chronic disease epidemic
- Health care costs are rising

### Impact

- Caught between two business models
- Access problems
- Preventable harm and unjust disparities
- Unsustainable ineffective care models
- Lack resources to meet other social needs

Adapted from IHI

#### U.S. | REMAKING MEDICINE

#### In New Health Care Era, Blessings and Hurdles

By ABBY GOODNOUCH MARCH 30, 2014

WATCH TRAILER

LOUISVILLE, Ky. — In a plain brown health clinic on a busy boulevard here, the growing pains of the Affordable Care Act are already being felt — almost too sharply for the harried staff trying to keep up with the flow of patients.

Tamekia Toure, 40, is typical of the clinic's new patients, a single mother and recent arrival from Alabama with diabetes, high blood pressure, chronic pain and, for much of her adult life, no health insurance. For her, the new law is a godsend, providing Medicaid coverage that she would not have received before.

Then there is Donna Morse, 61, a widowed dental hygienist and yoga buff who is long overdue for a mammogram and blood work. She lost her insurance last year because it did not meet the new law's standards. Now she has a new plan with much higher premiums, and

#### Treating the Newly Insured

In Kentucky, 80 percent of the Affordable Care Act's newly insured have Medicaid. At Family Health Centers in Louisville, serving these patients is both a challenge and a potential financial boon.

which few doctors and hospitals will accept. So she too, warily, has landed at the clinic, one of seven here called Family Health Centers.

David Elson, 60, who has been coming to Family Health Centers for several years now, is a self-employed businessman with a multitude of health problems and medical bills. Despite chronic ailments, he went without insurance for years before enrolling in a subsidized private plan. He has not paid the first month's premium, and could well fall back into the ranks of the uninsured.

## PCMH Vision and IHS/CAL

- 1. Patients are thrilled with the quality and ease of accessing care and they get what they want and need when they want and need it, creating stellar clinical outcomes.
- 2. Staff and providers are extremely happy with their work, recruitment and retention are not problems. Your work life balance is excellent.
- 3. There is great communication and collaboration across the continuum of care in your community where your partners embrace your patients when they need their care.
- 4. Your community is healthier than it was 10 years ago and there are no disparities in healthcare. The cost of health care is going down in your community because health is increasing.

## AHRQ Definition for PCMH

- **Patient-centered:** A partnership among practitioners, patients, and their families ensures that decisions respect patients' wants, needs, and preferences, and that patients have the education and support they need to make decisions and participate in their own care.
- **Comprehensive:** A team of care providers is wholly accountable for a patient's physical and mental health care needs, including prevention and wellness, acute care, and chronic care.
- **Coordinated:** Care is organized across all elements of the broader health care system, including specialty care, hospitals, home health care, community services and supports.
- Accessible: Patients are able to access services with shorter waiting times, "after hours" care, 24/7 electronic or telephone access, and strong communication through health IT innovations.
- **Committed to quality and safety:** Clinicians and staff enhance quality improvement to ensure that patients and families make informed decisions about their health.

## What we know about PCMH

- Reduces hospitalizations
- Reduces ER visits
- Costs reduction per patient
- Decreased staff burnout
- Improved patient experience
- Improved HEDIS scores

(Reid RJ, et al. The Group Health Medical Home at Year Two: Cost Savings, Higher Patient Satisfaction, And Less Burnout for Providers Health Affairs 29:5 (2010): 835-843)

## Plan-its all about behavior change

- 1. Help people understand the gathering storm
- 2. Create a "critical mass" leadership team
- 3. Create a vision for PCMH
- 4. Communication of the vision and the plan
- 5. Remove barriers to new behaviors

Cont.

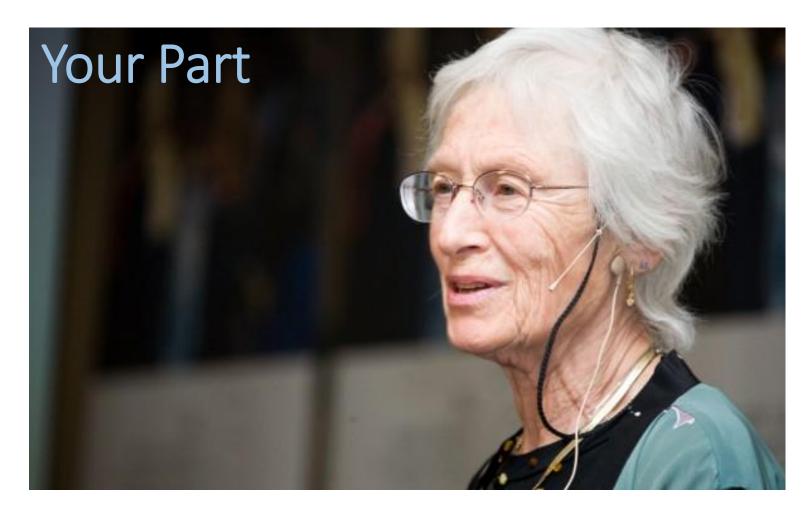

## Plan-its all about behavior change

- 6. Recognizing and celebrating successes
- 7. Create a "critical mass" implementation team
- 8. Ensure that behavior changes become the culture
  - Spread and sustainability
  - Structure and process in place for this
  - Be a learning organization
- 9. Get patients involved

"There is lots of evidence that a good relationship with a freely chosen primary-care doctor, preferably over several years, is associated with better care, more appropriate care, better health, and much lower health costs."

## Your part: Seek and address barriers

- Organizational chart or in supporting structures (such as meetings)
- Space-physical or virtual
- Protocols or procedures
- Skills and orientation
- Aim and measurements
- Communication plan
- Identify champions, include pts
- Rewards, celebrations, acknowledgement

### **PCMH Transformation vs Recognition:** Understand where you are now

- 2 paths
  - To get you started
  - To demonstrate all that you have done
- Set your timelines appropriately
  - Using PCMH recognition as a framework to start your change management
  - Using PCMH recognition to document your location in the transformation journey

## PCMH Recognition: Measuring

- Both framework and measuring tools
  - NCQA
  - Joint Commission
  - AAAHC
  - State Based Programs

## **PCMH Recognition:** Planning Steps

Agree on why your are doing this

- Collect wheelbarrows full of bucks
- The storm is so big out there
- Keep up the Joneses
- Get people off your back
- Demonstrate your patient centeredness
- Map a leg of your transformation journey

## **PCMH Recognition :** Form a Team

- Formed a small team (4)
  - VP of Clinical Services
  - VP of Operations
  - Clinical Quality Manager
  - Clerical Support staff person
- Chose a team lead
  - Organized the documentation
  - Ensured all documentation present
  - Communicated with NCQA
  - Completed and submit NCQA application

## DSM OCD Dx:

**Diagnosis Search** 

Preferred ICD9 Code: Secondary ICD9 Code: Other ICD9 Code(s): C 300.3 Obsessive-compulsive disorders

Preferred SNOMED-CT: Other SNOMED CT Code(s):

Obsessive-compulsive disorder - 191736004 (exact match)

Lexical Definitions: An anxiety disorder characterized by recurrent, persistent obsessions or compulsions. Obsessions are the intrusive ideas, thoughts, or images that are experienced as senseless or repugnant. Compulsions are repetitive and seemingly purposeful behavior which the individual generally recognizes as senseless and from which the individual does not derive pleasure although it may provide a release from tension.

## Clinica PCMH Recognition Plan

- Must pass elements
  - Access, Continuity and Behavioral Health
- Use tools already developed for application process
- Solve problems once to create bandwidth for work
  - Apply tools that work for quality improvement
  - Covey's leadership matrix
- Vigilant about ceremoniously taking things off the plate
  - Enlist the staff and patients to help with this
- Contingency plans
  - New patients

# The Must-Pass Elements 2011

- PCMH 1
  - Element A: Access During Office Hours
- PCMH 2
  - Element D: Use Data for Population Management
- PCMH 3
  - Element C: Care Management
- PCMH 4
  - Element A: Support Self-Care Process
- PCMH 5
  - Element B: Referral Tracking and Follow-Up
- PCMH 6
  - Element C: Implement Continuous Quality Improvement

## The Must Pass Elements 2014

- PCMH 1-Element A: Patient-Centered Appointment Access.
- PCMH 2-Element D: The Practice Team.
- PCMH 3-Element D: Use Data for Population Management.
- PCMH 4-Element B: Care Planning and Self-Care Support.
- PCMH 5-Element B: Referral Tracking and Follow-Up.
- PCMH 6-Element D: Implement Continuous Quality Improvement.

## NCQA-PCMH Application

- Watch the webinar
- Put supporting materials for each element in one document
- Supporting materials may be used more than once
- Consider more than one example

# NCQA-PCMH Application

### Clearly identified supporting materials

### PPC1: ACCESS AND COMMUNICATION Element A: Access and Communication Processes

#### Item 1: Scheduling each patient with PCP for continuity of care

#### From Provider Manual:

| for conditions which may result in regar action such as child abuse and domestic violence                       |
|---|
| and they specifically require the patient's signature or the signature of a guardian.                           |
| Medical records should check with the primary care provider before sending any of these                         |
| "special release" documents.  |
| the second se |

- In accordance with state law, consents for HIV testing are required prior to performing any testing and are scanned into the patient's chart.
- Before records are printed, the primary care provider is asked to sign the release to assure the appropriateness of printing the record.

#### E. Chaperones

All providers will have access to a chaperone when caring for patients of any gender. Male providers performing gynecological exams and breast exams are encouraged to have a chaperone in the room during the exam.

#### F. Continuity

Continuity of care is recognized as one of the most important dimensions of quality care. When a new patient is seen for an appointment other than an acute visit, the patient is assigned that provider as a Primary Care Provider (PCP).

Because the PCP is not always available, the providers in the clinic have been arranged into teams. Every attempt will be made to schedule the patient with the PCP or their team member to improve continuity of clinical staff (medical assistant, case manager, social worker, provider, etc.). In order to help clients identify their PCP, we are using color-coded appointment and business cards. There are also pictures of the providers in the patient care areas at each clinic.

# **NCQA-PCMH** Application

- For chart review elements
  - Chart audits
  - Divided the work
  - First few charts together
    - Consensus on where looking for the data
- Several meetings to finalize and agree on documentation
- Business Support Specialist
  - Formatted all documents to be similar
  - Created system to guide reviewers to the documentation
  - Put headers and footers on all documents

# **NCQA-PCMH** Application Stats

- Over 200 woman hours for each application
- Began process in December 2009
- Submitted application May 2010
- Received NCQA Multi-site Level 3 Recognition July 2010
- Continued to work on must pass elements
- Began application process in December 2012
- Submitted in May 2013 (150 person hours)
- Received NCQA Multi-site Level 3 Recognition December 2013
- Now working on 2014 standards

# NCQA-PCMH Lessons Learned

- Single person for communication, keep log
- Multi-site application
  - Steps not very clear in the Policies and Procedures Handbook
    - How to apply?
    - When to apply?
    - How to document?
  - Ended up with a lot of rework, especially around the audits
- Study the Standards/Elements/Factors
- Unable to attend a Survey Tool learning session
  - Would have been very valuable in saving time
- Get started now

# After the Recognition

- No wheelbarrows \$\$
- Helping the Joneses
- Storm still out there
  - Recognition from healthcare leaders
  - Soon to be a floor, not a stretch goal
- Pushed us forward
  - Patient portal
  - Addressing the continuum of care
  - Better collaboration with the patient around the plan of care
  - Looking more at health
  - Dialing up competency in Motivational Interviewing, SFBT, CBT,

# Change Management

- Managing in the 21<sup>st</sup> Century Drucker
- Fifth Discipline Senge
- HBR 10 Must Reads On Leadership
- The Power of Habit Duhigg
- Switch Heath
- Drive Pink
- Leading Change Kotter
- Managing Transitions Bridges
  - Systems change
  - People transition from what they know to what is new

### Change Management:

- Agreement that there is a **P**roblem
- Paint a **P**icture (vision) of how it could be
- Have a well thought out **P**lan
- Describe what **P**art each person plays

Bridges

# Managing Transitions

### PROBLEM

#### Healthcare in Transition

#### Issues

- Changing payment
- Aging population, growth of the insured
  Variation in safety,

reliability and care

Health care costs are

• Chronic disease

epidemic

rising

 Caught between two business models
 Access problems

Impact

- Preventable harm and unjust disparities
- Unsustainable
   ineffective care models
- Lack resources to meet other social needs

#### Adapted from IHI

### **P**ICTURE

### PLAN

Plan-its all about behavior change

- 1. Help people understand the gathering storm
- 2. Create a "critical mass" leadership team
- 3. Create a vision PCMH vs Recognition
- 4. Communication of the vision and the plan
- 5. Removing barriers to new behaviors

### PART

"There is lots of evidence that a good relationship with a freely chosen primary-care doctor, preferably over several years, is associated with better care, more appropriate care, better health, and much lower health costs."

# Try Out the 4 P Model-15 min

- Share a small process you are trying to impact.
- Choose one problem per table to present.
- Record a 4 Ps plan on form on table
  - Problem definition and agreement
  - Picture of what would happen if the problem didn't exist
  - Plan to address problem, including removing barriers
  - Part each person needs to play

# Change Management-its all about behavior

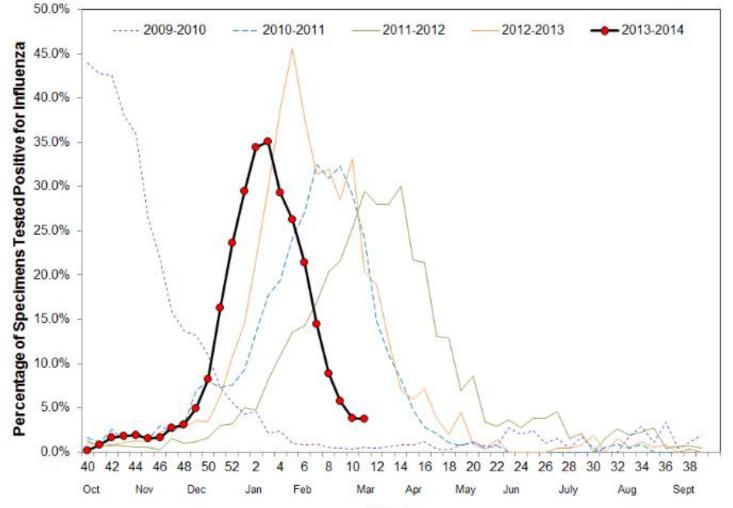

- 1. Establishing a sense of urgency by identifying potential crises/opportunities
- 2. Putting together a powerful team to lead change
- 3. Creating a vision
- 4. Communicating the new vision, strategies, and expected behavior
- 5. Removing obstacles to the change
- 6. Recognizing and rewarding short-term successes
- 7. Identifying people who can implement change
- 8. Ensuring that the changes become part of the institutional culture

Kotter

# California Flu Season 2014 % detections of Influenza

Week

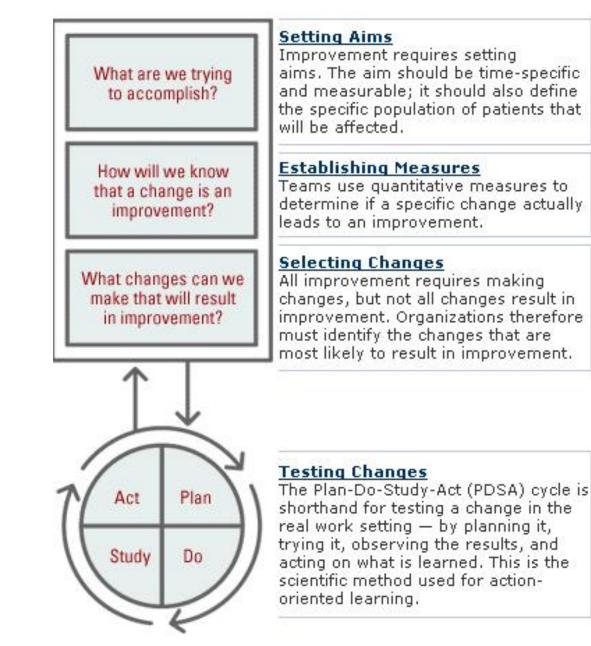

# Leadership Time Matrix

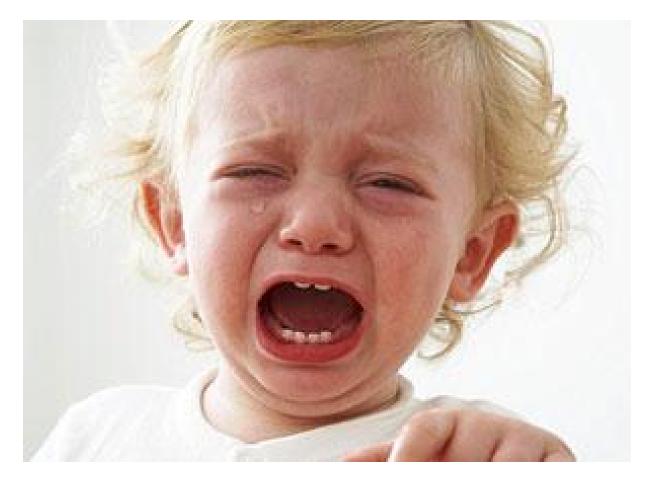

|                  | Urgent  | Not Urgent   |

# Making Data Useful

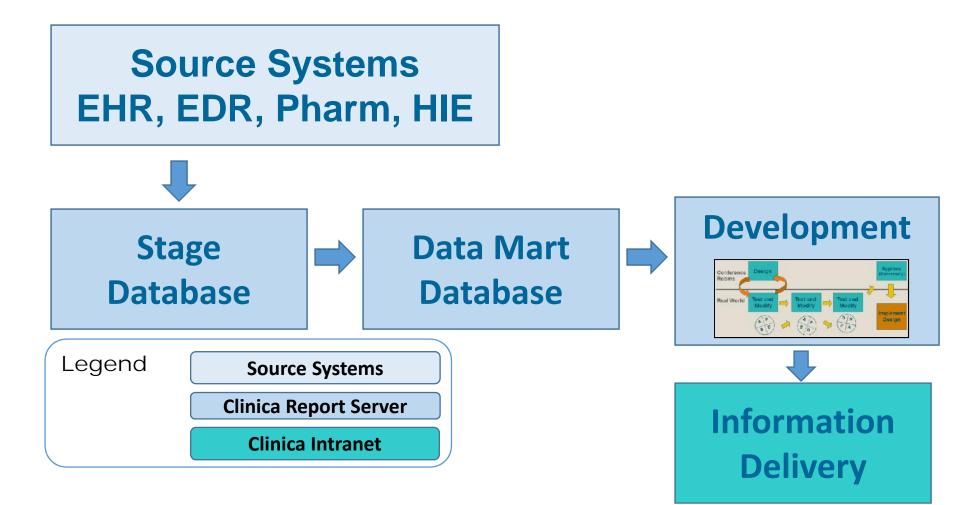

### Performance Improvement Methodology

### Data Warehouse Logical Architecture

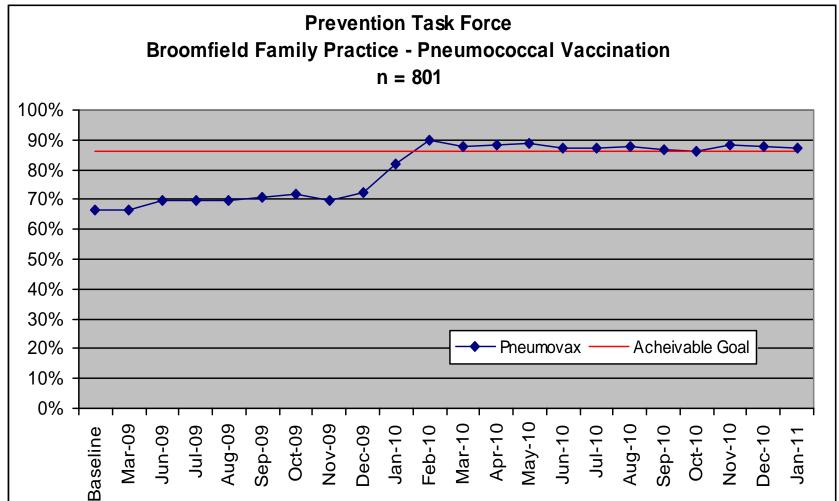

# Leverage EHR data

- Align data entry strategies with organizational goals
- Include parameters that are critical
- Always record important data in a structured format
- Design and test the data in the "real world" setting

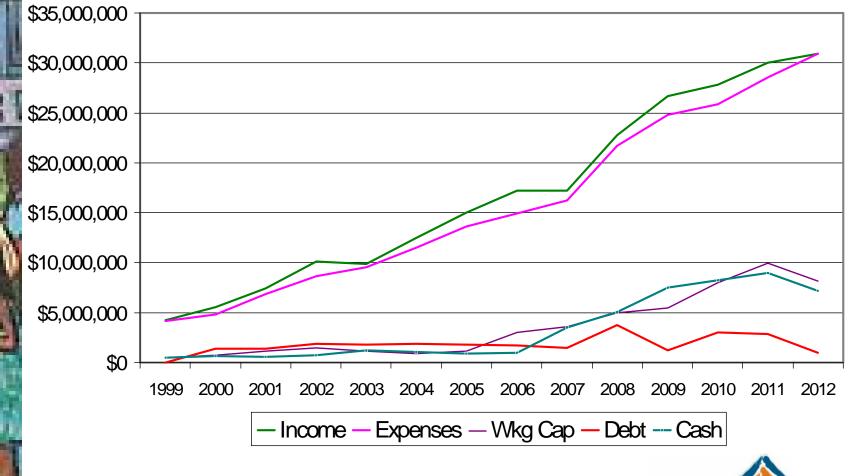

# Data for Teams
