

# California Area Injury Prevention Program

## Car Seat Observational Survey Training

June 1, 2021

9:30 AM—11:00 AM

This course was created by the California Area IHS Environmental Health Program to help you perform car seat observational surveys used to evaluate your car seat distribution program's impact on car seat usage in your community

### What you will learn in this training:

- Why we do car seat observational surveys
- Survey site selection
- Assembling and training your survey team
- Best practices for performing a car seat observational survey
- How to design and complete a car seat observational survey form
- How to analyze car seat observational survey data
- How to apply the principles of car seat observational surveys to bike helmet observational surveys

There is **NO COST** for this training

By attending this training you will make your car seat distribution program eligible for a positive funding factor applied to your next California Area Injury Prevention mini-grant application in 2022

To Register visit the IHS EHSC website
