

INHERITING PATIENTS ON LEGACY OPIOIDS

Wednesday, May 18, 2022
10:00 AM PDT

SUBSTANCE USE DISORDERS IN PRIMARY CARE

Wednesday, June 15, 2022
10:00 AM PDT

The first of this two-part series, "Inheriting Patients on Opioids" will discuss the risks and benefits of changing opioid dose for patients on legacy opioids, along with a review of benzodiazepine co-prescription and use of buprenorphine. The second part of the series, "Substance Use Disorders in Primary Care" will include a review of substance use disorder treatment with an emphasis on panel management and harm reduction approaches specific to primary care settings. Facilitated discussions and Q&A sessions will follow each presentation.

CIAO is a learning hub for innovative training and technical assistance to support clinicians in providing compassionate chronic pain and opioid management. Learn more about CIAO at
