

RESOURCE AND PATIENT MANAGEMENT SYSTEM

# Clinical Reporting System

(BGP)

## Technical Manual

Version 14.1  
May 2014

Office of Information Technology (OIT)  
Division of Information Resource Management  
Albuquerque, New Mexico

## Document Version History

Version	Date	Notes
1.0	August 2005	Initial version
8.0	August 2008	Updated to include changes to the logic descriptions and performance measures for FY 2008 and reformatted
9.0	June 2009	Updated for version 9.0
10.0	May 2010	Updated for version 10.0
11.0	January 2011	Updated for version 11.0
11.1	May 2011	Updated for version 11.1
12.0	December 2011	Updated for version 12.0
12.1	April 2012	Updated for version 12.1
13.0	November 2012	Updated for version 13.0
14.0	November 2013	Updated for version 14.0
14.1	May 2014	Updated for version 14.1

## Preface

This manual contains the technical manual for the Clinical Reporting System (CRS) Version 14.1, which adds fiscal year (FY) 2014 clinical performance measures to existing FY 2002 through FY 2013 measures.

## 1.0 Introduction

This manual provides Indian Health Service (IHS) site managers with a technical description of the Clinical Reporting System routines, files, menus, cross references, globals, and other necessary information required to effectively manage the system.

All routines, files, options, and keys have a namespace starting with the letters “BGP.”

The file number range for this package is 90240, 90370–90553, 90530–90539, 90552–90599.

The Government Performance and Results Act (GPRA) requires federal agencies to report annually on how the agency measured against the performance targets set in its annual plan. The IHS GPRA measures include clinical prevention and treatment, quality of care, infrastructure, and administrative efficiency functions.

The IHS Clinical Reporting System (CRS) is a Resource and Patient Management System (RPMS) software application designed for national reporting, as well as Area Office and local monitoring of clinical GPRA and developmental measures. CRS was first released for FY 2002 performance measures (as GPRA+) and is based on a design by the Aberdeen Area Office (GPRA2000).

This manual provides technical information for the CRS Version 14.1. Version 14.1 adds fiscal year (FY) 2014 clinical performance measures to existing FY 2002 through FY 2013 measures.

CRS is the reporting tool used by the IHS Office of Planning and Evaluation to collect and report clinical performance results annually to the Department of Health and Human Services (HHS) and to Congress.

Each year, an updated version of CRS software is released to reflect changes in the logic descriptions of the different denominators and numerators. Additional performance measures may also be added. Local facilities can run reports as often as they want and can also use CRS to transmit data to their Area Office. The Area Office can use CRS to produce an aggregated Area Office report for either annual GPRA or Area Office director performance reports.

CRS produces reports on demand from local RPMS databases for both GPRA and developmental clinical performance measures that are based on RPMS data, thus eliminating the need for manual chart audits for evaluating and reporting clinical measures.

To produce reports with comparable data across every facility, the GPRA measures definitions were “translated” into programming code with the assistance of clinical subject matter experts. CRS uses predefined taxonomies to find data items in the RPMS Patient Care Component to determine if a patient meets the performance measure criteria. Taxonomies contain groups of codes (e.g., diagnoses or procedures) or site-specific terms. Each performance measure topic has one or more defined denominators and numerators.

Administrative and clinical users can review individual or all measures at any time to:

- Identify potential data issues in their RPMS; for example, missing or incorrect data.
- Monitor their site’s performance against past national performance and upcoming agency goals.
- Identify specific areas where the facility is not meeting the measure in order to initiate business process or other changes.
- Quickly measure impact of process changes on performance measures.
- Identify IHS Area Offices meeting or exceeding measures to provide lessons learned.

Users of the RPMS CRS include:

- Area Office and site quality improvement staff
- Compliance officers
- GPRA coordinators
- Clinical staff, such as physicians, nurses, nurse practitioners, and other providers
- Area Office directors
- Any staff involved with quality assurance initiatives
- Staff who run the various CRS reports

## 1.1 Key Changes in Version 14.1

### 1.1.1 Logic Changes to National GPRA/GPRAMA Report Measures

- GPRA Developmental Measures:

- Added the following new GPRA Developmental measures: Diabetes: Blood Pressure Control (BP less than (<) 140/90, or less than (<)150/90 for ages 60 and older); Adult Immunizations (Tdap/Td, Tdap, Influenza, Zoster, Pneumovax, combination measures); Childhood Immunizations (4:3:1:3\*:3:1:3); Controlling High Blood Pressure (BP less than (<) 140/90, or less than (<) 150/90 for ages 60 and older); Chlamydia Testing (added age breakdowns)
- Changed Childhood Immunizations measure for Hepatitis A to one dose
- Changed Cancer Screening: Mammogram Rates denominator to ages 52 through 74
- Updated codes in the following measures: Childhood Immunizations; Comprehensive Cancer Screening
- Diabetes: LDL Assessment: Changed measure from LDL less than or equal to (= <) 100 to LDL less than (<) 100.
- Diabetes: Nephropathy Assessment: Added CPT code S2065 to ESRD definition.
- Access to Dental Service: (1) Added ADA code 0191 to documented dental visit. (2) Added CPT codes D0190 and D0191 to documented dental visit.
- Influenza: Removed Procedure code 99.52 from influenza definition.
- Adult Immunizations: Removed Procedure code 99.55 from Pneumococcal definition.
- Childhood Immunizations: (1) Removed Procedure code 99.39 from DTP definition. (2) Removed Procedure code 99.36 from Diphtheria definition. (3) Removed Procedure code 99.38 from Tetanus definition. (4) Removed Procedure code 99.37 from Acellular Pertussis definition. (5) Removed Procedure code 99.41 from IPV definition. (6) Removed Procedure code 99.48 from MMR definition. (7) Removed Procedure code 99.45 from Measles definition. (8) Removed Procedure code 99.46 from Mumps definition. (9) Removed Procedure code 99.47 from Rubella definition.
- Cancer Screening: Pap Smear Rates: (1) Removed CPT code 88155 from Pap Smear definition. (2) Removed Procedure code 91.46 from Pap Smear definition. (3) Added ICD-10 code Z12.4 to Pap Smear definition.
- Controlling High Blood Pressure – Million Hearts: (1) Added CPT code S2065 to ESRD definition.
- Comprehensive CVD-Related Assessment: (1) Added CPT codes 92920, 92924, 92928, 92933, 92937, 92941, and 92943 to PCI definition.

### 1.1.2 Key Logic Changes to Non-GPRA Measures

For key logic changes to non-GPRA measures, please refer to the CRS 2014 (version 14.1) Selected Measures Report Performance Measure List and Definitions document located on the CRS Web site at

[http://www.ihs.gov/crs/documents/crsv14/SelectedMeasuresV14\\_1.pdf](http://www.ihs.gov/crs/documents/crsv14/SelectedMeasuresV14_1.pdf).

### 1.1.3 Additional Key Enhancements and Revisions

Added the ability to run National GPRA/GPRAMA by Designated Provider and GPRA Dashboard reports for multiple primary care providers at once.

## 2.0 Implementation and Maintenance

The Clinical Reporting System occupies the BGP namespace. Options, security locks/keys, templates, routines, and globals have the namespace BGP.

**Note:** This version of the CRS (v.14.1) only contains the 2014 files, options, routines, templates, etc. This was done at the request of the verification staff due to the size of this package. Version 14.0 is a requirement to install version 14.1. Please see the technical manual for previous versions for information about all previous versions.

### 2.1 System Requirements

IHS Clinical Reporting System version 14.0 (bgp\_1400.k) installed.

### 2.2 Security Keys

Table 2-1 provides security key information.

Table 2-1: BGP Security Keys

Name	Descriptive Name	Description
BGPZAREA	BGP AREA REPORT	This key unlocks the area report options on the main BGMENU. This key should only be assigned at the Area Office level.
BGPZMENU	BGP MAIN MENU–CRS	This key unlocks the main CRS menu. It should be assigned to all users who need to run GPRA/CRS reports.
BGPZ PATIENT LISTS	BGP PATIENT LISTS	This key allows the holder to obtain patient lists. The patient lists contain sensitive patient/clinical information. This key should only be given to those users who have a need for such information.
BGPZ SITE PARAMETERS	BGP SITE PARAMETERS	This key should be given to those with authority to update the site parameters.
BGPZ TAXONOMY EDIT	BGP TAXONOMY EDIT	This key should be given only to users who need to update taxonomies.

## 3.0 Routines

This section includes a table that lists BGP routines and their descriptions.

Please note that the only routines distributed in Version 14.1 are the BGP4\* routines. Previous versions of CRS contain the other routines. This was done at the request of the verification staff and is due to the large size of the build.

### 3.1 Routines and Descriptions

Table 3-1 provides a list of routines with comprehensive descriptions of the function.

Table 3-1: BGP Routines

Routine	Description

## 4.0 Files and Tables

### 4.1 File List

Table 4-1 provides information for files and tables. Please note that only files beginning with BGP 14 are distributed with version 14.1; all others were distributed in version 8.0, which is a requirement for installation of version 9.0 and thus all subsequent versions.

Table 4-1: BGP File List

File	Global	Filename
90241.01	^BGPCTRL(	BGP CONTROL FILE
90241.02	^BGPSITE(	BGP SITE PARAMETERS
90241.03	^BGPSCAT(	BGP SUMMARY CATEGORIES

## 4.4 Table File

The following six files have over 1,000 fields per file. These files are used to hold calculated data values for the GPR reports. To conserve space in this document, the table files are not listed here. To generate a listing, use the ^XBFLD or FM data dictionary listing utility to list the data dictionary in detail.

## 6.2 Callable Routines

Published entry points for use by iCARE:

Routine: BGP3D10

BQI(DFN,BQIGREF);PEP-iCare EP

- Description

Entry point called by the iCare module, returns GPRA data by global reference

- DFN = Patient internal entry number

- BQIGREF = Global reference to store data

## 6.3 Published Entry Points

<b>Note:</b> There are no Published Entry Points for this application.

## 7.0 Security Keys

Table 2-1 provides the BGP security keys and their descriptions.

## **8.0 Archiving and Purging**

There is no archiving and purging in this package.

## 9.0 Documentation Resources

This section describes a few methods to generate online technical documentation.

### 9.1 How to Generate Online Documentation

The file number range for this package is 90240, 90370, 90530–90539 and 90552–90599. The namespace is BGP. All templates, routines, screen forms, etc., begin with BGP.

This section describes some methods by which users can generate IHS RPMS CRS technical documentation. Online technical documentation pertaining to the IHS RPMS clinical reporting software, in addition to that which is located in the help prompts and on the help screens throughout the IHS RPMS Clinical Reporting package, can be generated through the use of several kernel options. These include, but are not limited to, the sections that follow.

### 9.2 System Documentation

Online VPS system documentation can be generated through the use of several kernel options, including, but not limited to:

- %INDEX
- Menu Management
- Inquire Option
- Print Option File
- VA FileMan
- Data Dictionary Utilities
- List File Attributes

For more option listings and further information about other utilities that supply online technical information, see the Decentralized Hospital Computer Program (DHCP) Kernel Reference manual.

#### 9.2.1 %INDEX

The %INDEX option analyzes the structure of a routine to determine, in part, if the routine adheres to RPMS programming standards. The output can include the following components:

- Compiled list of errors and warnings
- Routine listings

- Local variables
- Global variables
- Naked globals
- Label references
- External references

Running %INDEX for a specified set of routines allows users to discover any deviations from RPMS programming standards that exist, and to see how routines interact with one another (i.e., which routines call or are called by other routines).

To run %INDEX for the IHS RPMS Clinical Reporting package, specify the BGP namespace at the “Routine(s)?>” prompt.

## 9.2.2 Inquire Option

The Inquire menu management option provides the following information about a specified option:

- Option name
- Menu text
- Option description
- Type of option
- Lock (if any)

In addition, all items on the menu are listed for each menu option. To secure information about IHS RPMS Clinical Reporting options, you must specify the BGP namespace.

## 9.2.3 Print Option File

**Note:** The Print Option File utility generates a listing of options from the Option file (#19). Print all entries, a single option, or range of options. For a list of IHS RPMS Clinical Reporting options, see Section 9.1. There are no Published Entry Points for this application.

## 9.2.4 List File Attributes

This VA FileMan option allows users to generate documentation pertaining to files and file structure. The standard format of this option provides the following data dictionary information for a specified file:

- File name and description

- Identifiers
- Cross-references
- Files pointed to by the file specified
- Files that point to the file specified
- Input, print, and sort templates

In addition, the following applicable data is supplied for each field in the file:

- Field name, number, title, and description
- Global location
- Help prompt
- Cross-references
- Input transform
- Date last edited
- Notes

Using the Global Map format of this option generates an output that lists the following information:

- All cross references for the file selected
- Global location of each field in the file
- Input, print, and sort templates

For a comprehensive listing of CLINICAL files, see Section 4.0

### 9.3 Online Help

In addition to system documentation, RPMS includes special help displays for most menu options and data entry prompts. Typing ? at the “Select Option” prompt displays information related to the current option, where:

Typing	Displays
A single question mark (?)	A list of all options accessible from the current option
Two question marks (??)	A list of all accessible options and their formal names
Three question marks (???)	A brief description for each option in a menu
A single question mark (?) followed by an option name (? <b>OPTION</b> )	Extended help, if available, for that option

## 10.0 SAC Requirements

This program uses a standard global for export of data to the Area Office. The global is called ^BGPDATA (and is killed at the root level in various routines).

The kill of these unsubscripted globals has been approved by the Standards and Conventions committee.

## Glossary

### Archiving

The storage of historical or little-used data off-line (often on tape).

### Banner

A line of text with a user's name and domain.

### Browser

An interactive application that displays ASCII text on a terminal that supports a scroll region. The text can be in the form of a word-processing field or sequential local or global array. The user is allowed to navigate freely within the document.

### Callable Entry Points

Places in a routine that can be called from an application program.

### Caret (^)

A circumflex, also known as an "up-hat," used as a piece delimiter in a global. The caret is denoted as "^" and is typed by pressing SHIFT-6 on the keyboard.

### Cross Reference

An indexing method whereby files can include presorted lists of entries as part of the stored database. Cross references (x-refs) facilitate look-up and reporting.

### Entry Point

A point within a routine that is referenced by a "DO" or "GOTO" command from a routine internal to a package.

### File

A set of related records or entries treated as a single unit.

### FileMan

The database management system for RPMS.

### Global

In MUMPS, global refers to a variable stored on disk (global variable) or the array to which the global variable may belong (global array).

### ICD

International Classification of Diseases.

**INDEX (%INDEX)**

A kernel utility used to verify routines and other MUMPS code associated with a package. Checking is done according to current ANSI MUMPS standards and RPMS programming standards. This tool can be invoked through an option or from direct mode (>D ^%INDEX).

**IRM**

Information Resource Management. The IHS personnel responsible for information systems management and security.

**Kernel**

The set of MUMPS software utilities that function as an intermediary between the host operating system and application packages, such as Laboratory and Pharmacy. The kernel provides a standard and consistent user and programmer interface between application packages and the underlying MUMPS implementation. These utilities provide the foundation for RPMS.

**Menu**

A list of choices for computing activity. A menu is a type of option designed to identify a series of items (other options) for presentation to the user for selection. When displayed, menu-type options are preceded by the word "Select" and followed by the word "option," as in "Select Menu Management option:" (the menu's select prompt).

**Namespace**

A unique set of 2 to 4 alpha characters that are assigned by the database administrator to a software application.

**Option**

An entry in the Option file. As an item in a menu, an option provides an opportunity for users to select it, thereby invoking the associated computing activity. Options may also be scheduled to run in the background, non-interactively, by TaskMan.

**Patient Care Component (PCC)**

The central repository for data in the Resource and Patient Management System (RPMS).

**Queuing**

A request that a job be processed at a later time rather than within the current session.

**Routine**

A program or sequence of instructions called by a program that may have some general or frequent use. MUMPS routines are groups of program lines that are saved, loaded, and called as a single unit via a specific name.

**UCI**

User Class Identification. A computing area.

**Utility**

A callable routine line tag or function. A universal routine usable by anyone.

**Variable**

A character or group of characters that refers to a value. MUMPS recognizes three types of variables: local variables, global variables, and special variables. Local variables exist in a partition of the main memory and disappear at signoff. A global variable is stored on disk, potentially available to any user. Global variables usually exist as parts of global arrays.

## Contact Information

If you have any questions or comments regarding this distribution, please contact the OIT Help Desk (IHS).
