The age-adjusted diabetes death rate for the IHS service area population in 1999-2001 was 77.7 per 100,000 population. The diabetes death rate increased 47.2 percent from the rate experienced by the IHS service area during 1996-1998 (52.8). The 1999-2001 AI/AN rate is 3.1 times the U.S. all races rate of 25.2 for 2000.

In 1999-2001, the age-adjusted heart disease death rate for the IHS service area population was 243.8 per 100,000 population. The 1999-2001 AI/AN rate is 5 percent lower than the U.S. all-races rate of 257.9 in 2000.

In 1999-2001, the age-adjusted malignant neoplasm death rate for the IHS service area population was 184.1 per 100,000 population. The 1999-2001 AI/AN rate is 8.4 percent less than the U.S. all-races rate of 201.0 for 2000. Five IHS Areas have a rate greater than the U.S. all-races rate; Billings (297.1), Bemidji (278.2), Aberdeen (252.2), Alaska (249.5), and Oklahoma (205.7). The rate is adjusted for misreporting of AI/AN race on the state death certificate.

The infant mortality rate for the IHS service area population in 1999-2001 was 8.3 deaths per 1,000 live births. The AI/AN rate is 28 percent higher than the U.S. all-races rate (6.9 deaths per 1,000 live births for 2000). Two IHS Areas (Aberdeen and Alaska) had rates exceeding the U.S. all-races rate by over 50 percent. The rate is adjusted for misreporting of AI/AN race on the state death certificate.

In 1999-2001, the all-cause age-adjusted death rate for the IHS service area population was 1,099.0 deaths per 100,000 population. The AI/AN rate is 21 percent higher than the U.S. all-races rate of 872.0 for 2000. The Albuquerque Area had the highest rate of 20.6. Six IHS Areas including Alaska had more than double the U.S. all-races rate. The age adjusted rate is adjusted for misreporting of AI/AN race on the state death certificate.

The age-adjusted suicide death rate for the IHS service area population in 1999-2001 was 17.0 per 100,000 population. The AI/AN rate is 60 percent higher than the U.S. all-races rate of 10.6 for 2000. The Albuquerque Area had the highest rate of 20.6. Six IHS Areas including Alaska had more than double the U.S. all-races rate. The age adjusted rate is adjusted for misreporting of AI/AN race on the state death certificate.

The age-adjusted alcohol-related death rate for the IHS service area population in 1999-2001 was 43.2 per 100,000 population. The AI/AN rate is 6.3 times the U.S. all-races rate of 6.9 for 2000. The Aberdeen Area rate of 86.4 is 13 times the U.S. all-races rate and 5 times the lowest Area rate (Nashville, 18.3). The age adjusted rate is adjusted for misreporting of AI/AN race on the state death certificate.

In 1999-2001, the mortality rate for sudden infant death syndrome (SIDS) for the IHS service area population was 88.9 per 100,000 population. The AI/AN rate is 2.5 times higher than the U.S. all-races rate of 35.5 for 2000. The Nashville Area has the lowest rate among the IHS Areas (18.8), but it is still over one time the U.S. all-races rate. The highest Area rate (Billings, 132.9) is 3.7 times the U.S. all-races rate. The age adjusted rate is adjusted for misreporting of AI/AN race on the state death certificate.

In 1999-2001, the all-cause age-adjusted death rate for the IHS service area population was 1,059.0 per 100,000 population. The AI/AN rate is 2.5 times higher than the U.S. all-races rate of 43.2 for 2000. The Aberdeen Area rate of 1,447.0 is 3.6 times the U.S. rate while two other Area rates (Aberdeen and Tucson) are at least double the U.S. all-races rate. The age adjusted rate is adjusted for misreporting of AI/AN race on the state death certificate.

In 1999-2001, the all-cause age-adjusted suicide death rate for the IHS service area population was 17.0 per 100,000 population. The AI/AN rate is 60 percent higher than the U.S. all-races rate of 10.6 for 2000. The Alaska Area rate (38.5) is 3.6 times the U.S. rate while two other Area rates (Aberdeen and Tucson) are at least double the U.S. all-races rate. The age adjusted rate is adjusted for misreporting of AI/AN race on the state death certificate.

In 1999-2001, the all-cause age-adjusted alcohol-related death rate for the IHS service area population was 43.2 per 100,000 population. The AI/AN rate is 6.3 times the U.S. all-races rate of 6.9 for 2000. The Aberdeen Area rate of 86.4 is 13 times the U.S. all-races rate and 5 times the lowest Area rate (Nashville, 18.3). The age adjusted rate is adjusted for misreporting of AI/AN race on the state death certificate.
