

MU Clinical Quality Measures Decoder

Report Period: Oct 01, 2010 to Dec 29, 2010
 Previous Period: Oct 01, 2009 to Dec 29, 2009
 Eligible Professional (EP): USER, SUPER

Warning: The Meaningful Use reports do not verify that the EP selected for the reports meets the CMS EHR Incentive Program eligibility criteria. The EP must make that determination.

MU EP CLINICAL QUALITY MEASURES PERFORMANCE SUMMARY							
NQF	PQRI	Measure	# Excl	# Den	# Num	Report Period	Previous Period
0421	128	Adult Weight Screening and Follow-Up					
		65+ w/ BMI + Plan if req	0	4	0	0.0%	0.0%
		18-64 w/ BMI + Plan if req	1	9	7	87.5%	0.0%
0013	237	Hypertension Blood Pressure Measurement					
		18+ w/ 2 BP Recorded	0	3	0	0.0%	0.0%
0028a	114	Preventive Care and Screening: Tobacco Use Assessment					
		18+ screening w/ in 24 mos	0	10	9	90.0%	0.0%
0028b	115	Preventive Care and Screening: Tobacco Cessation Intervention					
		18+ cessation counsel/agent w/in 24	0	5	4	80.0%	0.0%

Patient Populations: Each measure may have 1 or more targeted populations depending on the specific measure. If more than one patient population exists, all values must be reported.

Exclusions: If a patient meets the exclusion criteria allowed for a specific measure, they will be counted in the exclusions column and the value will be > 0. If no patients meet the exclusion criteria, the value will = 0. If a patient meets the exclusions, they are not counted in the denominator column.

Numerator: A subset of the patient population in the denominator who meet the measure criteria whom a process or outcome of care actually occurs.

Denominator: The total number of patients that meet the measure population criteria, minus exclusions.
