1.0 **Introduction**

Please review these changes and add a copy of them to any printed documentation your site may be using for ABM 2.5. These changes will be integrated into future versions of the software and user manuals and will no longer be considered an addendum at the time of the next release.

Patch 1 of Third Party Billing version 2.5 contains the following changes:

- Three new 837-compliant modes of export (section 2.0)
- A need for person class data on file for each provider (section 3.0)
2.0 Selecting an 837 Format Export Mode

Patch 1 of the Third Party Billing package addresses issues related to recent HIPAA Title II requirements. This patch contains three new export modes and software to generate ANSI 837 claims. The new export modes are 837 Institutional, 837 Professional, and 837 Dental. When you are selecting a mode of export for an insurer’s visit type, you will see 3 additional modes of export.

When an existing insurer is ready to receive their bills in the 837 format, you will need to change the mode of export to one of these three new export modes.
