1.0 Introduction

Please review these changes and add a copy of them to any printed documentation your site may be using for the Clinical Reporting System version 7.0. These changes will be integrated into future versions of the software and user manuals and will no longer be considered an addendum at the time of the next release.

Patch 1 of the Clinical Reporting System version 7.0 contains the following changes:

- Added additional CPT codes for mammography screening in the Cancer Screening: Mammogram Rates topic and identified several existing codes as old codes.
- Added new ADA code for topical fluoride in the Topical Fluoride topic and identified two existing codes as old codes.
- Fixed software bug for the CRS graphical user interface (GUI), Selected Measures with Patient Panel option.
- Fixed software bug for the CRS site parameters that affected exporting height and weight data in the National GPRA Report file for the Area Office.
2.0 Patch 1

Patch 1 of the Clinical Reporting System version 7.0 contains the following changes:

- Added additional codes for mammography screening in the Cancer Screening: Mammogram Rates topic.
- Added new ADA code for topical fluoride in the Topical Fluoride topic and identified two existing codes as old codes.
- Fixed software bug for the CRS graphical user interface (GUI), Selected Measures with Patient Panel option.
- Fixed software bug for the CRS site parameters that affected exporting height and weight data in the National GPRA Report file for the Area Office.

2.1 Change 1

For Cancer Screening: Mammogram Rates, CPT codes 76090-76091 have been noted as old codes in the CRS logic because these codes were inactivated effective January 1, 2007 and replaced by new codes. The new codes that replaced them are 77055 Diagnostic mammogram, unilateral; 77056 Diagnostic mammogram, bilateral; and 77057 Screening mammogram, bilateral. These codes have been added to the CRS logic. In addition, codes for magnetic resonance imaging (MRI) have been added to the CRS logic. The codes added are 77058 Magnetic resonance imaging, breast, without and/or with contrast material(s), unilateral and 77059, Magnetic resonance imaging, breast, without and/or with contrast material(s), bilateral.

The table below provides the updated CRS logic for Cancer Screening: Mammogram Rates in section 3.3 of the CRS User Manual.

| **Cancer Screening:** Mammogram Rates | **Changes from Version 7.0, as noted below.**
|
| Carolyn Aoyama | **Denominators:** 1) **GPRA:** Female Active Clinical patients ages 52 through 64, without a documented bilateral mastectomy or two separate unilateral mastectomies. 2) Female Active Clinical patients ages 40 and older without a documented history of bilateral mastectomy or two separate unilateral mastectomies. **Numerators:** **GPRA:** Patients with documented mammogram in past two years or refusal in past year. A) Patients with documented refusal in past year. **Definitions:** 1) **Bilateral Mastectomy:** V CPT: 19180.50 or 19180 w/modifier 09950 (modifier codes .50 and 09950 indicate bilateral); 19200.50 or 19200 w/modifier 09950; 19220.50 or 19220 w/modifier 09950; 19240.50 or 19240 w/modifier 09950; ICD Operation codes: 85.42; 85.44; 85.46; 85.48 2) **Unilateral Mastectomy:** Requires two separate occurrences for either CPT or procedure codes on 2 different dates of service. V CPT: 19180, 19200, 19220, 19240; V Procedures: 85.41, 85.43, 85.45, 85.47 3) **Mammogram:** A) V Radiology or V CPT: 77055 Diagnostic mammogram, unilateral; 77056 Diagnostic mammogram, bilateral; 77057 Screening mammogram, bilateral; 77058 Magnetic resonance imaging, breast, without and/or with contrast material(s), unilateral; 77059, Magnetic resonance imaging, breast, without and/or with contrast material(s), bilateral; 76090 (old code), 76091 (old code), 76092 (old code), G0206 (Diagnostic Mammography, Unilateral), G0204 (Diagnostic Mammography, Bilateral), G0202 (Screening Mammography, Bilateral); B) POV: V76.11, V76.12; C) V Procedures: 87.36, 87.37 (removed 87.35); D) Women’s Health: Screening Mammogram, Mammogram Dx Bilat, Mammogram Dx Unilat 4) **Refusal Mammogram:** V Radiology MAMMOGRAM for CPT 77055, 77056, 77057, 77058, 77059, 76090 (old code), 76091 (old code), 76092 (old code), G0206, G0204, G0202. **GPRA Description:** During FY 2007, maintain the proportion of female patients ages 50 through 64 who have had mammography screening within the last 2 years at the FY 2006 rate of 41%. **Patient List:** Women 40+ with mammogram/refusal, if any.

### 2.2 Change 2

For Topical Fluoride, ADA codes 1201 and 1205 have been noted as old codes and new code ADA 1206 has been added to the CRS logic. These changes were made to comply with changes effective January 1, 2007 in the Current Dental Terminology (CDT) 2007/2008 coding book in which the CDT separated prophylaxis and application of fluoride and distinguished between topical fluoride and varnish. As a result, providers should cease using codes 1201 and to 1205 for topical fluoride application and use code 1203 (Topical application of fluoride [prophylaxis not included]; child) or 1204 (Topical application of fluoride [prophylaxis not included]; adult) for topical applications other than fluoride varnish. Code 1206 (Topical fluoride varnish; therapeutic application for moderate to high caries risk patients) should be indicated for the varnish.
The table below provides the updated CRS logic for Topical Fluoride in section 3.3 of the CRS User Manual.

<table>
<thead>

</thead>
<tbody>
<tr>
<td>Topical Fluoride Dental Program/Dr. Patrick Blahut</td>
<td>Changes from Version 7.0, as noted below. Numerators:</td>
</tr>
<tr>
<td>NATIONAL (reported to Congress)</td>
<td>1) GPRA: Count only (no percentage comparison to denominator). For patients meeting the User Population definition, the total number of patients with at least one topical fluoride treatment or refusal during the Report Period. A) Patients with documented refusal in past year. 2) Count only (no percentage comparison to denominator). For patients meeting the User Population definition, the total number of appropriate topical fluoride applications and refusals based on a maximum of four per patient per year. A) Number of documented refusals during past year.</td>
</tr>
<tr>
<td></td>
<td>Definitions:</td>
</tr>
<tr>
<td></td>
<td>1) Topical Fluoride Application: V Dental ADA codes 1201 (old code), 1203, 1204, 1205 (old code), or 1206; or V POV V07.31. A maximum of one application per patient per visit is allowed. A maximum of four topical fluoride applications are allowed per patient per year for the applications measure. 2) Refusal of Topical Fluoride Application: Refusal of ADA code 1201 (old code), 1203, 1204, 1205 (old code), or 1206. Refusals are only counted if a patient did not have a topical fluoride application during the Report Period. If a patient had both an application and a refusal, only the application will be counted.</td>
</tr>
<tr>
<td></td>
<td>GPRA Description: During FY 2007, maintain the number of American Indian and Alaska Native patients receiving at least one topical fluoride application at the FY 2006 rate of 95,439 patients.</td>
</tr>
<tr>
<td></td>
<td>Patient List: Patients who received at least one topical fluoride application during Report Period.</td>
</tr>
</tbody>
</table>

2.3 Change 3

In the CRS GUI, when a user chose to run the Selected Measures with Patient Panel Report, if the user tried to queue the report without first selecting a search template, an error would occur instead of displaying a warning message. The fix with this patch now displays a warning and allows the user to continue.

2.4 Change 4

If the site parameters were not revisited when CRS version 7.0 was installed, when the user ran the National GPRA Report and chose to export the data to the Area Office, the Area export file did not contain the height and weight data. This has been fixed to export the height and weight data if the site parameters were not redone, which means the export height/weight data site parameter is blank OR when the export height/weight data site parameter is set to “Yes.” The only time the height/weight data will not be included in the Area file is when the export height/weight data site parameter is set to “No.”
