June 2008

PREFACE

The requirements and functionality outlined in the SRS *IHS Point of Sale Version 1.0 Patch 26* includes the following:

- New and updated POS 5.1 formats
- Emdeon hostfile name change

SECURITY

This patch uses the same security keys as described in the Pharmacy POS User manual Version 1.0.

TABLE OF CONTENTS

1.0   Introduction

Patch 26 of Pharmacy Point of Sale (ABSP) Version 1.0 contains the following changes:

(1) POS Formats that have been created or updated for use.

(2) Emdeon hostfile name change

Please review these changes and add a copy of them to any printed documentation your site may be using for ABSP V 1.0. These changes will be integrated into future versions of the software and user manuals and will no longer be considered an addendum at the time of the next release.

3.0   Emdeon Hostfile Name Change

On March 31, 2008, the IP address for Emdeon claims changed from 199.244.222.6 to 170.138.220.70. In POS patch 24, the post init routine was modified to update the ABSP DIAL OUT entry to **ENVOY DIRECT VIA T1 LINE,** which reflects the IP change to **emdeonserver.ihs.gov** and points to the new IP address (170.138.220.70).

If you are not able to resolve the DNS name at your site, you must manually change the IP address back to **199.244.222.6** in the **ABSP DIAL OUT** field.

3.1   Changing the IP Address for Emdeon Claims

This section provides instructions for changing the POS advanced settings to the new IP address.

To change the IP address for Emdeon claims:
