## 1.0 Introduction

Please review these changes and add a copy of them to any printed documentation your site may be using for the Clinical Reporting System version 8.0. These changes will be integrated into future versions of the software and user manuals and will no longer be considered an addendum at the time of the next release.

Patch 3 of the Clinical Reporting System version 8.0 contains the changes listed below. There are no changes to performance measure logic for any report.

- **Executive Order (EO) Quality Transparency Measures Report:** For the hard-coded report option, removed the patient beneficiary population prompt.
- **Area EO Quality Transparency Measures Report:** (1) For the hard-coded report option, removed the prompt for report period. (2) In the roll and scroll version of CRS, added the prompt that asks the user if the report is to be run for the Area Aggregate report or for a facility report.
- **New 2009 National GPRA Report:** Added menu option “GP9” that enables users to run the National GPRA Report for the report period of July 1, 2008 – June 30, 2009 (GPRA year 2009) using the performance measure logic as it exists in CRS 2008 Version 8.0 Patch 2.
- **New 2009 Area Aggregate National GPRA Report:** Added menu option “AGP9” that runs the Area Aggregate National GPRA Report for the report period of July 1, 2008 – June 30, 2009 (GPRA year 2009) using the performance measure logic as it is exists in CRS 2008 Version 8.0 Patch 2.
- **GPRA Measure Forecast Patient List:** In the sections describing how the performance measures can be met, updated all of the dates to reflect GPRA year 2009. Also corrected minor logic problems with four performance measures.
- **Visual CRS GPRA Performance Report:** Fixed a problem when the user-defined reporting period was selected with a report end date occurring in the month of October.
- **Updated CRS Graphical User Interface (Visual CRS):** The GUI contains all functionality included in CRS 2008 Version 8.0 Patch 3.

## 2.0 Patch 3

Patch 3 changes listed in the previous section are described in detail in the sections below.

### 2.1 Change 1

In the Executive Order (EO) Quality Transparency Measures Report, the prompt that asks the user the type of beneficiary population (e.g. AI/AN only) was removed since it is set to include only American Indian/Alaska Native patients in the report.

### 2.2 Change 2

In the Area Executive Order (EO) Quality Transparency Measures Report, hard-coded report option, removed the prompt for report period. This prompt was used for testing by the CRS staff and was inadvertently left in. The hard-coded report option for CRS 2008 will run the report for the report period of July 1, 2007 – June 30, 2008. (2) In the roll and scroll version of CRS, added the prompt that asks the user if the report is to be run for the Area Aggregate report or for a facility report. In CRS 8.0 Patch 2, this prompt was left out.

### 2.3 Change 3

Added a new 2009 National GPRA Report (roll and scroll menu option “GP9”) that enables users to run the National GPRA Report for the report period of July 1, 2008 – June 30, 2009 (GPRA year 2009) using the performance measure logic as it exists in CRS 2008 Version 8.0 Patch 2. This option will enable facilities to run and export their 2009 National GPRA Report data and will provide an estimate of how well they are performing for 2009. An Area Aggregate report is also added, as described below. This report contains the 2009 performance measure descriptions (i.e. 2009 GPRA targets) as they were previously identified on February 7, 2008. However, the 2009 targets are subject to change since they are related to 2008 performance.

For instructions on running this report, please follow the steps in the CRS Version 8.0 User Manual, section 5.2.2 Running the National GPRA Report except for step 5, type **GP9** to run the 2009 National GPRA Report.

### 2.4 Change 4

Added a new 2009 Area Aggregate National GPRA Report (roll and scroll menu option “AGP9”) that runs the Area Aggregate National GPRA Report for the report period of July 1, 2008 – June 30, 2009 (GPRA year 2009) using the performance measure logic as it exists in CRS 2008 Version 8.0 Patch 2.

For instructions on running this report, please follow the steps in the CRS Version 8.0 User Manual, section 6.2.1 Run Area National GPRA Report except for step 1, type **AGP9** to run the 2009 Area National GPRA Report.

## 2.5 Change 5

In the GPRA Measure Forecast Patient List, sections describing how the performance measures can be met, updated all of the dates to reflect GPRA year 2009. Also corrected minor logic problems with four performance measures as described below.

- **Diabetes Nephropathy Assessment:** Fixed problem with incorrect overdue date being displayed for patients with screening that occurred prior to the current GPRA year.
- **Annual Dental Exam:** Fixed problem with overdue date not being displayed when patient has never had an exam.
- **Influenza Immunization:** Fixed problem with not displaying date of last influenza immunization when the immunization occurred prior to the current GPRA year.
- **Colorectal Cancer Screening:** Fixed problem with not including the list when the patient's last screening is more than one year old.

## 2.6 Change 6

Fixed a problem in the Visual CRS GPRA Performance Report when the user-defined reporting period was selected with a report end date occurring in the month of October. Reports with this time period were erroneously being run for the report period of January 2 of the prior year to January 1 of the current year.

## 2.7 Change 7

Updated the CRS Graphical User Interface (Visual CRS) so that is now contains all functionality included in CRS 2008 Version 8.0 Patch 3.
