September 2017

Resource Patient Management System

BEDD Emergency Department Dashboard

Superior Health Information Management
Now and for the Future

Office Hours Presenters:

- **Theresa Tsosie-Robledo**
Federal Lead, BEDD/AMER
- **Anthony Millkamp, MSN, RN-BC**
BEDD/AMER Development Team
- **Barbara Hess, DHA (Contractor)**
Applications Systems Analyst

Contents of Patch

- AMER p9
 - Fixes issue with HERE report sorting issues
- BEDD v2.0 p2
 - New functionality to create an ER visit through the BEDD GUI
 - The most visible change in the new version is the ability to log patients into the ED directly from the dashboard rather than doing this function in RPMS.
 - Admitting a patient to the EDD through BEDD IN follows a process similar to the AMER ADMISSION process.
 - Users can still create an ER visit through the RPMS AMER IN function.
 - Some functionality available in AMER IN is not available in BEDD IN.
 - Central Log Check-in to MSE Calculation
 - New navigational hyperlinks for each section of the ED Dashboard
 - Ability to log out of Stand-alone Dashboard Application
- TIU1018
 - New ER Patient Data Objects

BEDD IN Printing Set Up

- The BEDD IN option allows various documents associated with the visit to be printed. The following settings control the printing of these documents and also provide the ability to populate default device choices and the number of copies to print:
 - Print Labels (Default to 'Yes')
 - Print Regular Routing Slip (Default to 'Yes')
 - Med-Rec Worksheet Print Enable
 - BEDD Routing Slip Print Enable
 - Wristband/Embossed Card Print Enable
 - For sites that print wristbands utilizing the Embossed card printer functionality, the wristbands will print on "Save."
 - This version does not support printing BCMA patient wristbands using the PPW option in the ADT package. For these sites, most patients wristbands can be created using a label on the wristband label stock. For patients who will be admitted, the BCMA wristbands used on the inpatient wards need to be printed from RPMS using the PPW menu option.

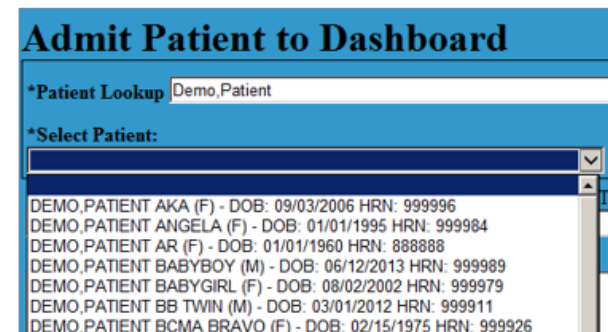

Printing Preferences		
Default Documents		
Print Labels (Default to 'Yes'):	# Copies:	Default Printer:
<input type="checkbox"/>	<input type="text"/>	<input type="text"/>
Print Regular Routing Slip (Default to 'Yes'):	# Copies:	Default Printer:
<input type="checkbox"/>	<input type="text"/>	<input type="text"/>
Optional Documents		
Med-Rec Worksheet Print Enable:	# Copies:	Default Printer:
<input type="checkbox"/>	<input type="text"/>	<input type="text"/>
BEDD Routing Slip Print Enable:	# Copies:	Default Printer:
<input type="checkbox"/>	<input type="text"/>	<input type="text"/>
Wristband/Embossed Card Print Enable:	# Copies:	Default Printer:
<input type="checkbox"/>	<input type="text"/>	<input type="text"/>

Using BEDD IN

1. Clicking the **BEDD-IN** button will open the new patient login screen.
2. Patient identifiers can be entered as they are now in RPMS:
 - By patient Last, First name **Demo, Patient**
 - By patient hospital number **999984**
 - By date of birth **MM/DD/YY** or **MM-DD-YYYY** or **M.D.YY**
 - By first letter of Last name followed by the last four digits of SSN
3. After entering the patient identifier, either click the **Search** button with your mouse or press the “Tab” key on your keyboard. (The “Tab” key is the most efficient way to move through the fields on the form).

The screenshot shows the 'Admit Patient to Dashboard' form. It includes a search bar with 'Patient Lookup' and a 'Search' button. Below the search bar is a 'Select Patient:' dropdown menu. The form has several sections: 'Admission Date/Time', 'Visit Type', and 'Clic: Type' (all dropdowns); 'Presenting Complaint' (text area); 'Transfer' section with 'Transfer from another facility' and 'Transferred from' (dropdowns), and 'Mode of transport to the ER' and 'Medical attendant present during transfer' (checkboxes); 'Means of Arrival' section with 'Mode of transport to the ER' (dropdown), 'Ambulance Number' (text), 'HBCN Billing Number' (text), and 'Ambulance Company' (dropdown); and 'Print Options' at the bottom with 'Print Labels' (checkbox), 'Number of copies' (dropdown), and 'Printer' (dropdown).

The screenshot shows the 'Admit Patient to Dashboard' form with the search results for 'Demo, Patient'. The search bar contains 'Demo, Patient' and the 'Search' button is highlighted. The 'Select Patient:' dropdown menu is open, showing a list of patient records with their names, genders, dates of birth, and hospital numbers (HRN).

Patient Name	Gender	DOB	HRN
DEMO, PATIENT AKA	(F)	09/03/2006	999996
DEMO, PATIENT ANGELA	(F)	01/01/1995	999984
DEMO, PATIENT AR	(F)	01/01/1960	888888
DEMO, PATIENT BABYBOY	(M)	06/12/2013	999989
DEMO, PATIENT BABYGIRL	(F)	08/02/2002	999979
DEMO, PATIENT BB TWIN	(M)	03/01/2012	999911
DEMO, PATIENT BCMA BRAVO	(F)	02/15/1975	999926

Using BEDD IN

4. Clicking the down arrow next to the **Select patient** box will display the available patient to choose from or, hold down the “Alt” key and then press the <DownArrow> to access the list of results using only the keyboard.
5. Enter the patient arrival time.
6. Enter their Chief Complaint.
7. For most patients, you can now click **save/close** to complete the registration process. The BEDD – IN button is preprogrammed to print patient labels when you save the patient registration.
