## Preface

The purpose of this manual is to provide the information needed to use the latest enhancements to the Panel View window in the iCare (BQI) population management application.

This manual contains reference information about iCare views, examples of its processes, and step-by-step procedures to demonstrate how to perform activities related to the Panel View window in the latest version of the iCare application.

## 1.0 Introduction

iCare is a Windows-based, client-server graphical user interface (GUI) for the Indian Health Service (IHS) Resource and Patient Management System (RPMS). iCare retrieves critical patient information from various components of the RPMS database and brings it together under a single, user-friendly interface. iCare helps providers manage the care of their patients. Creating multiple panels of patients with common characteristics (e.g., age, diagnosis, community) allows users to personalize how they view patient data.

The information in this panel view–specific manual covers iCare Panel View functionality in iCare version 2.9 patch 6.

## 2.0 System Navigation

### 2.1 Panel View

Every panel, when opened, has a panel view. Each panel displays data about the patients in the selected panel. Access this window by using the **Open** function from the main view or double-clicking a record on a specific panel in the **Panel List** from the main view.

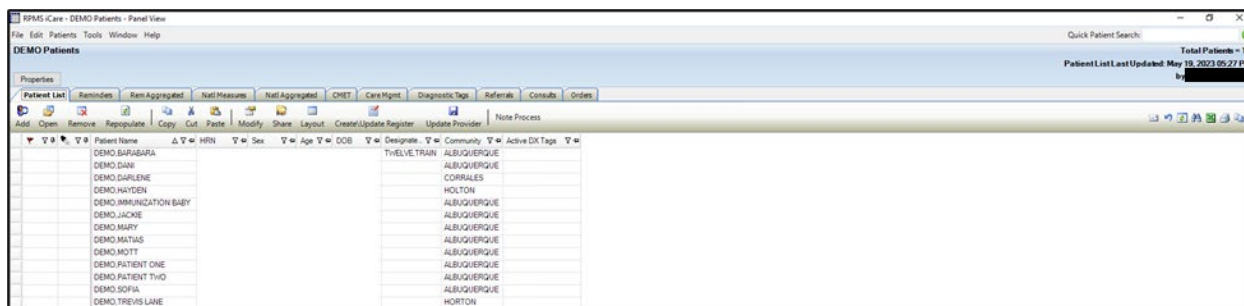

Figure 2-1: Sample **Panel View** window

**Note:** The **Repopulate** button will not display in the **Panel View** window if the patients in the panel were added manually (when the panel has no predefined logic).

Currently, there are 13 tabs in **Panel View**.

Figure 2-2: Loading Data progress information

The application displays the loading progress (in percentages) in the status bar when the panel contains many patients. This feature applies to all tabs except the **Rem Aggregated** (Reminder Aggregated) tab.

Cancel the load by clicking **Cancel**; the application displays the **Cancel display of data?** dialog as confirmation to cancel the loading process. Click **Yes** to cancel the load (otherwise, click **No**).

iCare allows more than one user to open the same shared panel simultaneously. The second and subsequent users to open the same panel will have read-only access to the panel content, like Word or Excel functionality. If the first user closes the panel, the second user will be notified that the panel is now available for edit access unless the user has only shared read-only access by the panel creator.

Any tab, once opened, can be viewed without re-loading the data.

## 2.1.1 Toolbar Buttons

There are essential toolbar buttons available for users.

Figure 2-3: Toolbar buttons

### 2.1.1.1 Add

**Note:** Add a patient to the current panel using the **Add** function or copy a patient from another panel and paste the patient data into the current panel.

Only the panel creator or the shared user with read/write access can add patient names to the current panel. This is a manual add function. A patient name can be added even if the panel was initially created from a pre-defined search definition. The panel stores the original definition as well as any patients added. This is important during the repopulate action.

Add a patient to the Panel View by doing one of the following:

- Clicking **Add** ()
- Selecting **Patients | Add Patient(s)**
- Selecting the **Add Patient(s)** option on the context menu

The **Select Patients** dialog displays.

| Patient Name            | HRN | SSN         | DOB          | DOD | Alias? |
|-------------------------|-----|-------------|--------------|-----|--------|
| DEMO, BARABARA          |     | XXX-XX-0123 | Nov 22, 2015 |     | N      |
| DEMO, DANI              |     | XXX-XX-5555 | Sep 23, 2015 |     | N      |
| DEMO, DARLENE           |     | XXX-XX-8963 | Jun 14, 1978 |     | N      |
| DEMO, HAYDEN            |     | XXX-XX-2198 | Mar 22, 1978 |     | N      |
| DEMO, IMMUNIZATION BABY |     | XXX-XX-4444 | Dec 31, 2015 |     | N      |
| DEMO, JACKIE            |     | XXX-XX-5987 | Nov 30, 2015 |     | N      |
| DEMO, MARY              |     | XXX-XX-1564 | Sep 23, 2015 |     | N      |
| DEMO, MATIAS            |     | XXX-XX-1567 | Nov 22, 2014 |     | N      |
| DEMO, MOTT              |     | XXX-XX-     | Aug 29, 2014 |     | N      |

Figure 2-4: **Select Patients** dialog

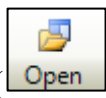

- Use any of the following to search for the patient in the **Search** field:
  - A few characters of the patient's last name
  - The patient's health record number (HRN)
  - The patient's SSN
  - The patient's date of birth
- Click **Find**. The retrieved records will display in the lower panel of the **Select Patients** dialog.
  - Refine the search (if needed) using the **Search** field again.
  - More than one row can be added by selecting multiple rows using the Ctrl and Shift keys while highlighting the row.
- When the correct patient(s) is highlighted, click **Add** to add the patient(s) to the **Patient List** tab on the **Panel View** window (otherwise, click **Close**).

### 2.1.1.2 Open

The **Open** function moves the focus to another window where the patient record (patient data information stored in the RPMS database) is viewable.

Highlight the patient's name and open the patient record by doing one of the following:

- Clicking **Open** (  )
- Selecting **Patients | Open Patient(s)**
- Selecting the **Open Patient(s)** option on the context menu
- Double-clicking the row in the grid
- Using the key combination **Ctrl+O**

This action opens your default tab of the **Patient Record** window.

Multiple patient records open in individual windows by highlighting more than one row.

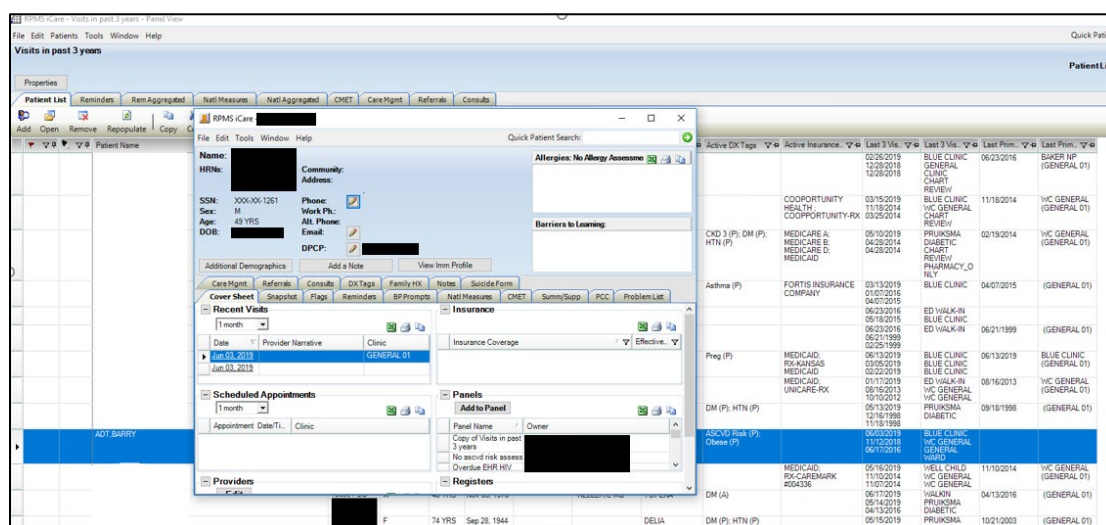

Figure 2-5: Patient View with patient selected using **Open (Patients)** option

### 2.1.1.3 Remove

The **Remove** function deletes one or more selected patients from the **Patient List** tab on the **Panel View** window. The removed patients are *not* deleted from the RPMS database but are only removed from your panel display. The remove function is limited to the panel creator or the shared user with read/write access.

The panel stores the original definition and any patients removed or added. This is important during the repopulate action.

Remove the highlighted patients by doing one of the following:

- Clicking **Remove** ()
- Selecting **Patients** | **Remove Patient(s)**
- Selecting the **Remove Patient(s)** option on the context menu
- Pressing the **Delete** key on your keyboard

After using the Delete function, the **Confirm patient remove** dialog displays, confirming the user would like to delete the selected patients. Click **Yes** to remove them (otherwise, click **No**).

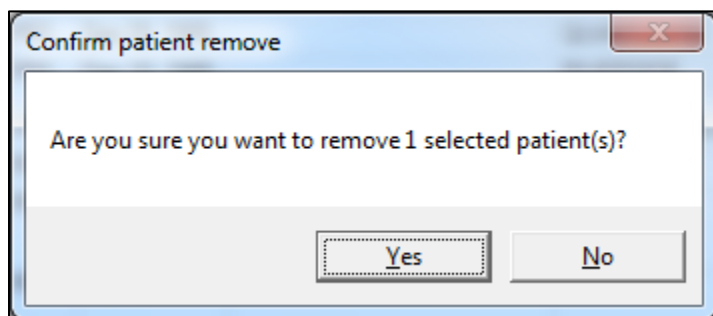

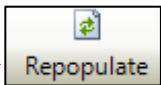

Figure 2-6: **Confirm patient remove** dialog

#### 2.1.1.4 Repopulate

The **Repopulate** function rebuilds the contents of the panel. This function reruns the panel definition against the cached data (from the nightly job), adds patients who meet the criteria, and removes patients who no longer meet the criteria. The **Repopulate** function is limited to the panel creator or the shared user with read/write access.

**Note:** The **Repopulate** button will not display on the Panel View if the patients in the panel were added manually (that is, the panel has no predefined logic).

Repopulate a panel by doing one of the following:

- Clicking **Repopulate** ()
- Selecting **Patients** | **Repopulate**
- Selecting the **Repopulate** option on the context menu

A warning message indicates that the patient list for this panel may be updated during repopulation and cannot be undone. Do you want to continue? Click **Yes** to repopulate the panel. Otherwise, click **No**.

Figure 2-7: **Repopulate Panel** dialog

If patients were manually edited (added or removed), the **Maintain Manual Changes** warning message indicates, “This panel has been edited manually (patients added or removed). Do you want to keep your manual change while repopulating?”

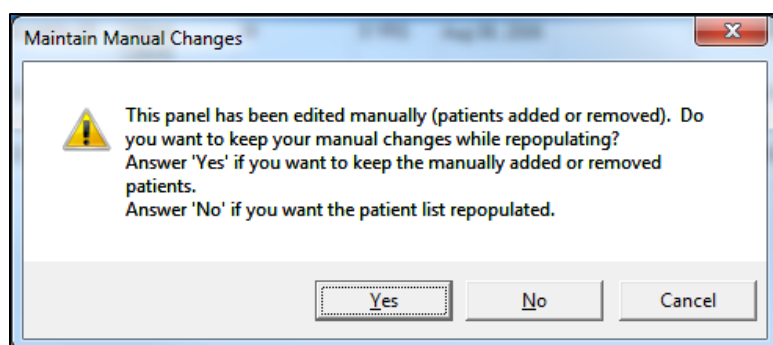

Figure 2-8: **Maintain Manual Changes** dialog

Click **Cancel** to cancel the repopulate process.

Click **Yes** to repopulate the panel and to keep the manually added or removed patients.

Click **No** to refresh the patient list. In this case, the patient list will be totally refreshed, any added patient names will be lost, and any deleted patient names will be added back to the panel.

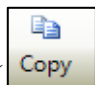

iCare displays the **Background populate** information message if a panel with many patients is refreshed. “Populating the panel may take some time. Do you want to run in the background?” Click **Yes** to run the repopulate process in the background. Otherwise, click **No** to repopulate in the foreground.

#### 2.1.1.5 Copy or Copy Patient(s)

The **Copy** function copies the selected patient’s information to the iCare clipboard. Go to another panel view (for a different patient panel) and paste the patient’s information.

Copy the selected patient's information by doing one of the following:

- Clicking **Copy** (  ).
- Selecting **Patients** | **Copy Patient(s)**.
- Selecting the **Copy Patient(s)** option on the context menu.
- Using the keyboard combination **Ctrl+C**.

Use the **Select All** function to select all the patients on the current **Panel View** window. Once the patients are selected, copy-paste them into another panel, for example.

Select all the patients by doing one of the following:

- Selecting **Edit** | **Select All**.
- Using the keyboard combination **Ctrl+A**.

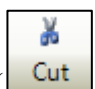

Select the **Deselect All** option on the **Edit** menu to deselect the patients.

#### 2.1.1.6 Cut

The **Cut** function copies the selected patient's information to the iCare clipboard and removes the selected patient from the current panel view. Go to another panel view (for a different patient panel) and paste the patient's information. The **Cut** function is limited to the panel creator or the shared user with read/write access. This function helps move patients from one panel to another.

Cut the selected patient's information by doing one of the following:

- Clicking **Cut** (  )
- Selecting **Patients** | **Cut Patient(s)**
- Selecting the **Cut Patient(s)** option on the context menu
- Using the keyboard combination **Ctrl+X**

Move to another patient panel and use the **Paste** function.

#### 2.1.1.7 Paste

The **Paste** function places the contents of the iCare clipboard (containing patient data) into the current panel view (this cannot duplicate patient data). If duplicate patients are in the paste operation, the system displays a message about this condition. The **Paste** function is limited to the panel creator or the shared user with read/write access.

Patients who are pasted into a panel are considered “manually added.” This means they are members of the panel manually selected to be on the patient list and, therefore, considered outside of the existing patient list due to the panel’s search logic.

Paste the contents of the iCare clipboard by doing one of the following:

- Clicking **Paste** (  )
- Selecting **Patients** | **Paste Patient(s)**
- Selecting the **Paste Patient(s)** option on the context menu
- Using the keyboard combination **Ctrl+V**

The patients on the clipboard are added to the current panel view. (A warning message will display if no patients are on the iCare clipboard.)

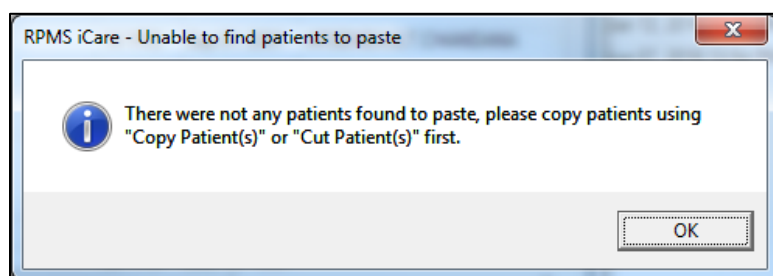

Figure 2-9: **Unable to find patients to paste** dialog

If a duplicate patient is to be pasted, the duplicate patient message indicates that the patient “already exists in the panel. To avoid duplicate patients, this patient will not be pasted.” Click **OK** to dismiss the message.

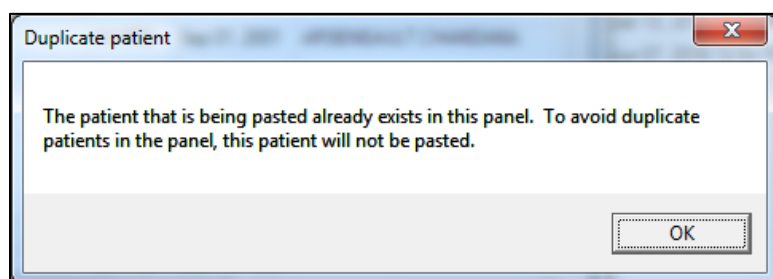

Figure 2-10: **Duplicate patient** dialog

### 2.1.1.8 Modify

The **Modify** function modifies the patient panel definition information. This function is limited to the panel creator or the shared user with read/write access.

Modify the current panel by doing one of the following:

- Clicking **Modify** (  )
- Selecting **Patients** | **Modify**

The **Panel Definition** window for the panel displays.

#### 2.1.1.9 Share

The **Share** function defines users who can share the current panel. This function is limited to the panel creator or the shared user with read/write access.

Share the patient panel by doing one of the following:

- Clicking **Share** (  )
- Selecting **Patients** | **Share**

The **Panel Definition** window opens to the **Sharing** tab of the **Panel Definition** window.

#### 2.1.1.10 Layout

The **Layout** function defines which data columns to show in the current panel, the order of the columns chosen for display, and the initial sort order of the patients in the list. If you save the panel changes, this layout information is stored with the panel. Users with read-only access can change the layout of a panel.

Select the view layout function by doing one of the following:

- Clicking **Layout** (  )
- Selecting **Patients** | **Layout**.

The **Patient List Layout** window opens, showing the current layout for the panel.

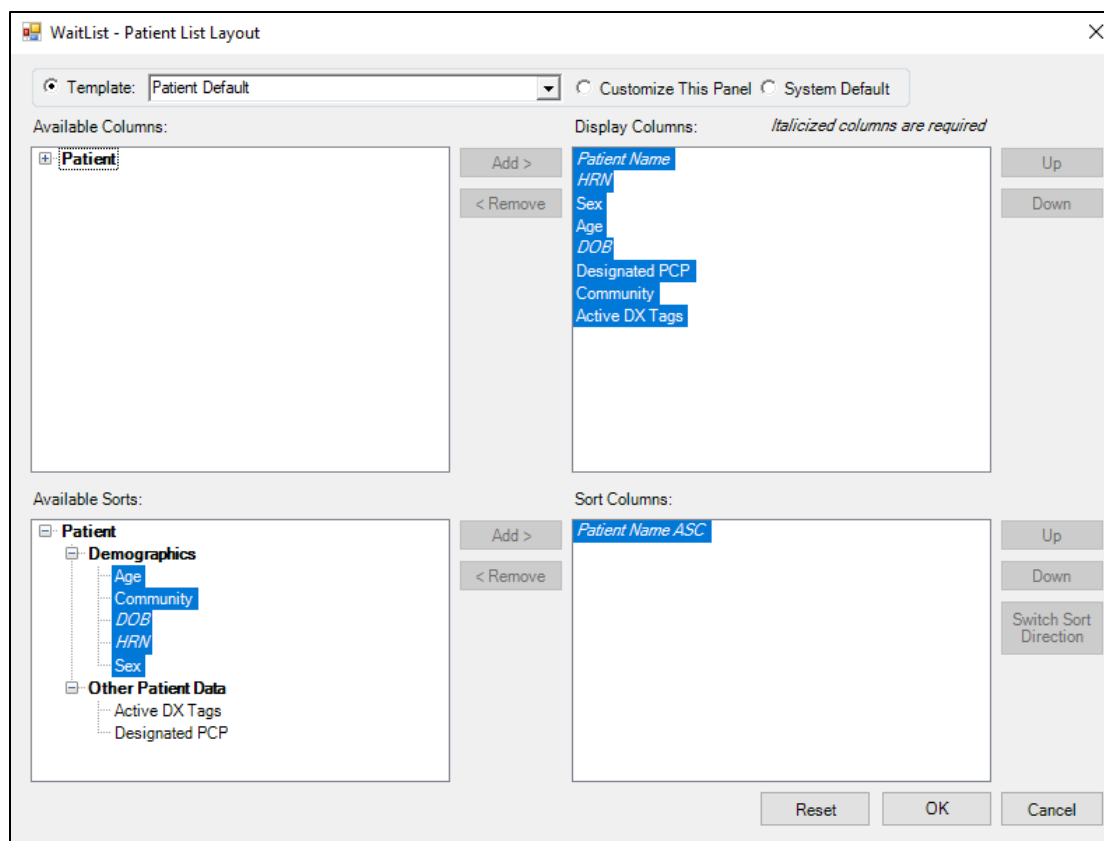

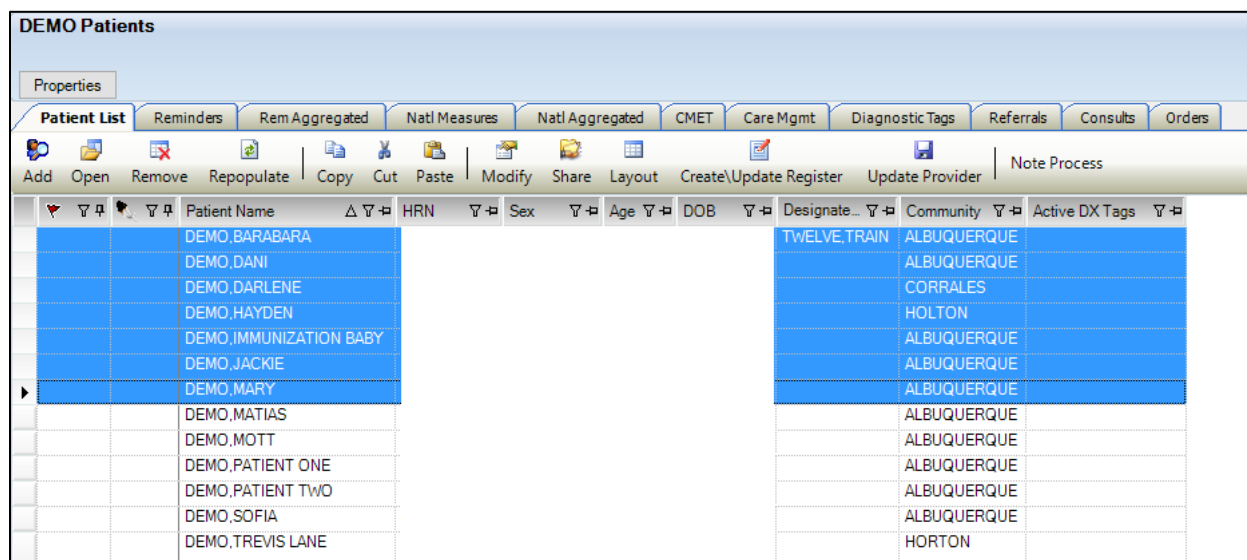

Figure 2-11: **Patient List Layout** window

Section 4.3.2 provides information about using the various features on the layout window.

### 2.1.1.11 Create\Update Register

The **Create\Update Register** function will either add the selected patients to a newly defined register or add patients to an existing register. Users can only modify registers that they are authorized to update.

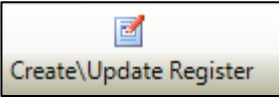

Select the patients by highlighting the selected patients:

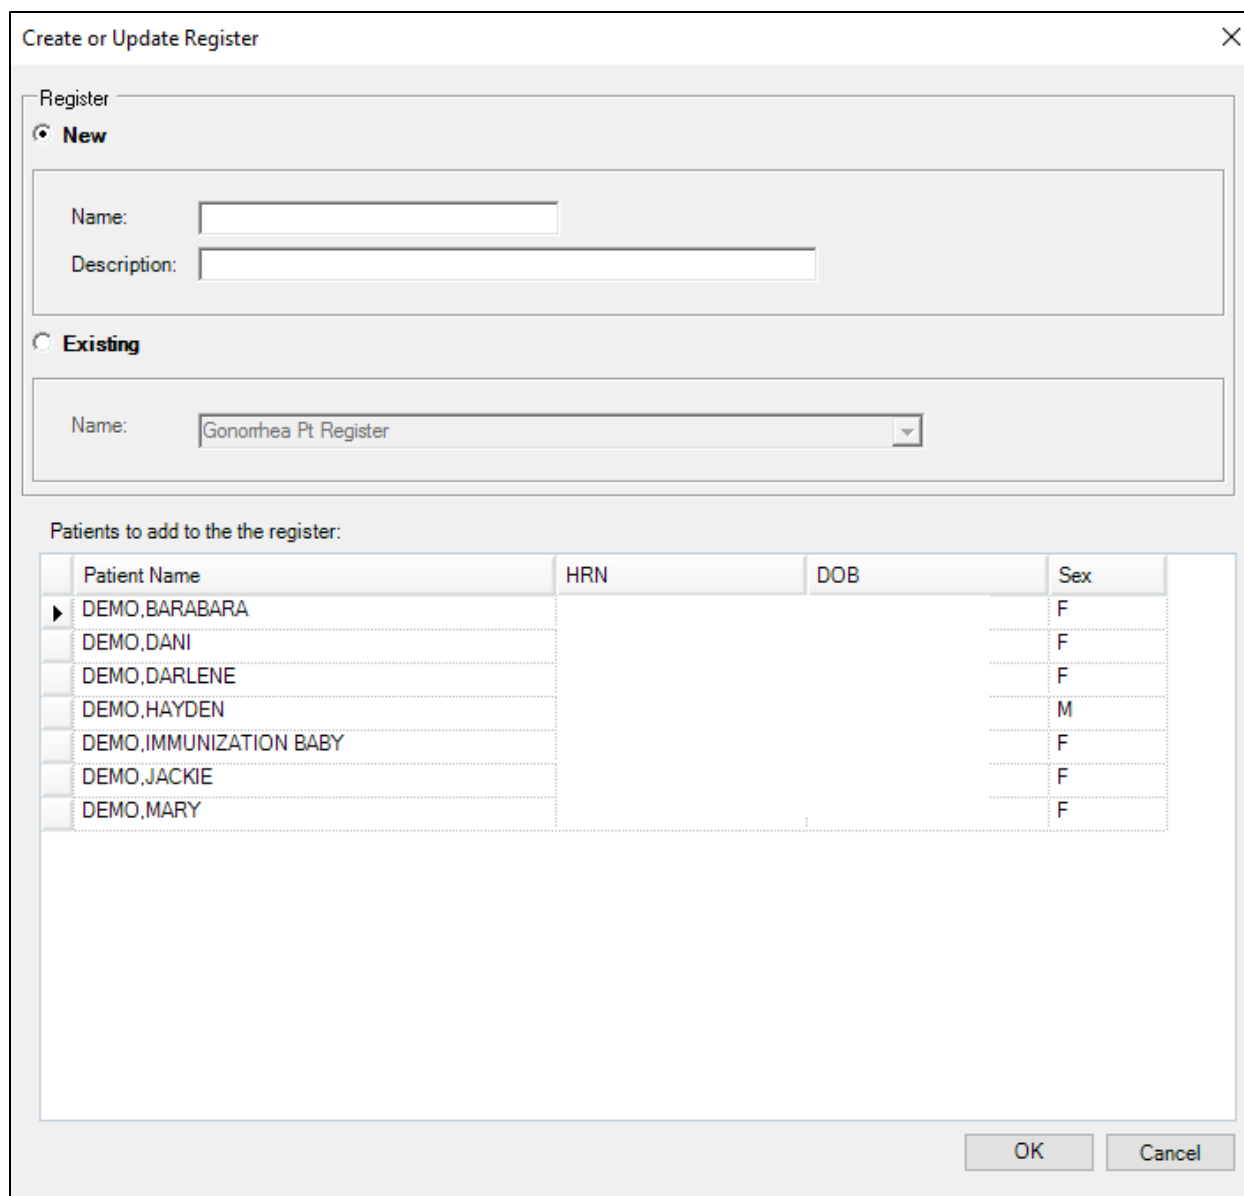

| Patient Name            | HRN | Sex | Age | DOB | Designate...  | Community   | Active DX Tags |
|-------------------------|-----|-----|-----|-----|---------------|-------------|----------------|
| DEMO, BARABARA          |     |     |     |     | TWELVE, TRAIN | ALBUQUERQUE |                |
| DEMO, DANI              |     |     |     |     |               | ALBUQUERQUE |                |
| DEMO, DARLENE           |     |     |     |     |               | CORRALES    |                |
| DEMO, HAYDEN            |     |     |     |     |               | HOLTON      |                |
| DEMO, IMMUNIZATION BABY |     |     |     |     |               | ALBUQUERQUE |                |
| DEMO, JACKIE            |     |     |     |     |               | ALBUQUERQUE |                |
| DEMO, MARY              |     |     |     |     |               | ALBUQUERQUE |                |
| DEMO, MATIAS            |     |     |     |     |               | ALBUQUERQUE |                |
| DEMO, MOTT              |     |     |     |     |               | ALBUQUERQUE |                |
| DEMO, PATIENT ONE       |     |     |     |     |               | ALBUQUERQUE |                |
| DEMO, PATIENT TWO       |     |     |     |     |               | ALBUQUERQUE |                |
| DEMO, SOFIA             |     |     |     |     |               | ALBUQUERQUE |                |
| DEMO, TREVIS LANE       |     |     |     |     |               | HORTON      |                |

Figure 2-12: **Patient List** selection

Select the **Create\Update Register** function by doing one of the following:

- Clicking **Create\Update Register** ()
- Selecting **Patients | Create\Update Register**

The default selection is **New** (create a new register). Enter the name. The name must be a unique register name. Enter a description of the register.

The dialog box is titled "Create or Update Register" and has a close button (X) in the top right corner. It contains two main sections: "New" and "Existing".

**Register Section:**

- New:** This section is selected with a radio button. It contains two text input fields: "Name:" and "Description:".
- Existing:** This section is unselected. It contains a "Name:" label followed by a drop-down menu showing "Gonorrhea Pt Register".

**Patients to add to the the register:**

Below the register selection, there is a table with the following data:

| Patient Name           | HRN | DOB | Sex |
|------------------------|-----|-----|-----|
| DEMO,BARABARA          |     |     | F   |
| DEMO,DANI              |     |     | F   |
| DEMO,DARLENE           |     |     | F   |
| DEMO,HAYDEN            |     |     | M   |
| DEMO,IMMUNIZATION BABY |     |     | F   |
| DEMO,JACKIE            |     |     | F   |
| DEMO,MARY              |     |     | F   |

At the bottom right of the dialog box are "OK" and "Cancel" buttons.

Figure 2-13: **Create or Update Register** dialog, new register

- Click **Existing** if adding the selected patients to an existing register. A drop-down of the registers that you are authorized for will be available for your selection.

Figure 2-14: **Create or Update Register** dialog, existing register

Registers in RPMS are a part of the case management system. Additional updates can be made there.

Figure 2-15: Existing **Case Management System** options

### 2.1.1.12 Update Provider

The **Update Provider** function updates the designated primary care provider (DPCP) for selected patients with the entered provider. In iCare v2.9 p6, this has been changed to allow the user to batch update any provider category. The user must have either the DSPM Editor (BQIZDSPM) or a Designated Specialty Provider Management System (BDPZMENU) security key. The message in Figure 2-16 displays if the user does not have one of the above-listed keys.

Figure 2-16: **Insufficient Access Rights** dialog

Select a list of patients to update their provider.

Figure 2-17: Patient selection list

Select the **Update Provider** function by doing one of the following:

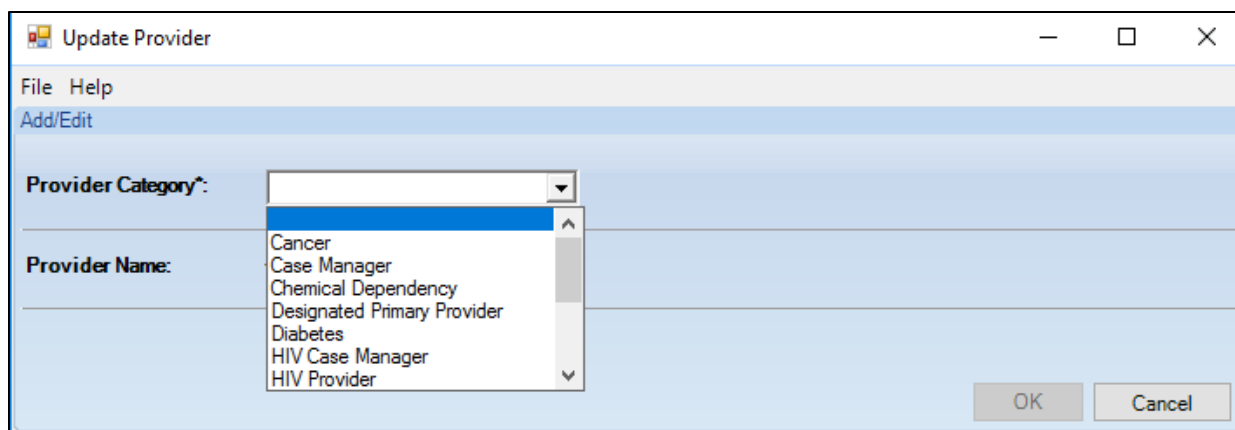

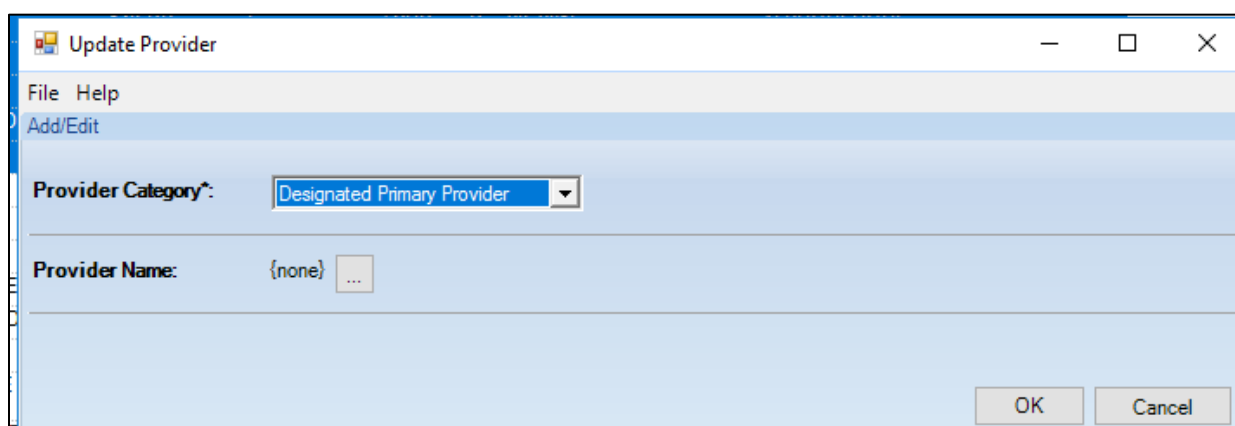

- Clicking **Update Provider** ()
- Selecting **Patients | Update Provider**

The **Update Provider** window opens, showing the update provider form.

Figure 2-18: Update Provider form

### Provider Category

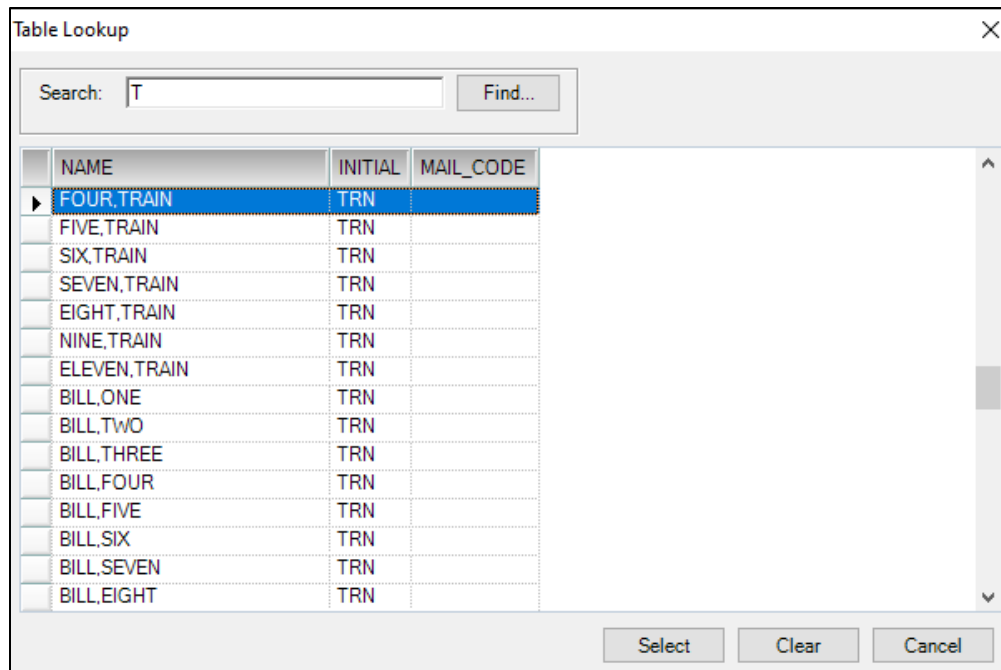

Select the Provider Category you wish to update. Previously, only the designated primary care provider (DPCP) could be updated. Now, you can change any defined provider categories (specialty providers). Select the provider category from the drop-down list.

Figure 2-19: **Provider Category** listFigure 2-20: **Provider Category** selection

Click **Lookup** ()

### **Add or Change**

To change or add a provider, enter the provider's name in the **Search** field and click **Find**.

Figure 2-21: **Table Lookup** dialog, **Search** function

Highlight the provider and click the **Select** button. It will return with the selected provider. Click the **OK** button.

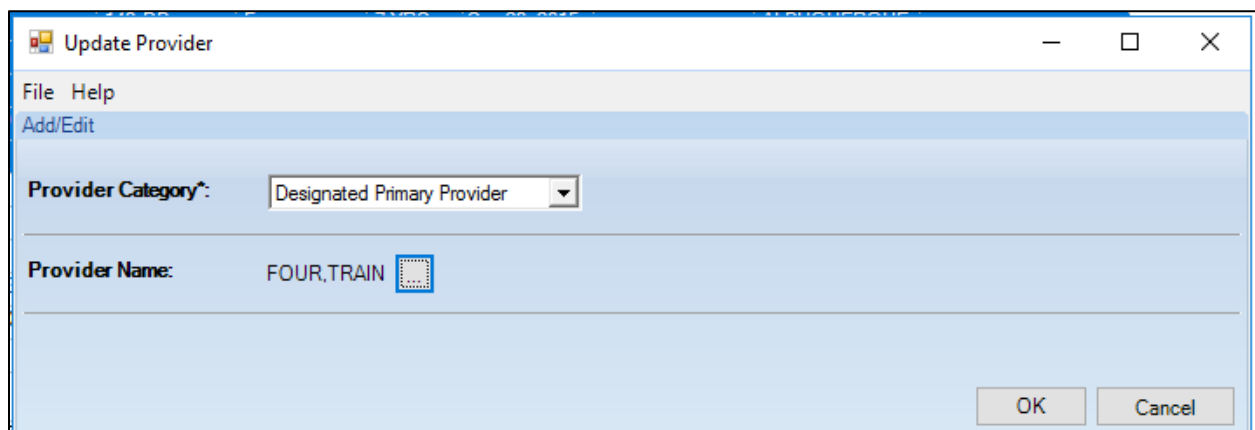

Figure 2-22: Update selected Provider Category and Provider Name

Click **Yes** to confirm saving to RPMS.

Figure 2-23: Confirm save to RPMS message

Click **OK** to refresh.

Figure 2-25: **Patient List** tab

## Remove

To remove the provider from all selected patients for the Provider Category, leave the **Search** field blank and click the **Clear** button. It will return to the **Add/Edit** screen. Click **OK**.

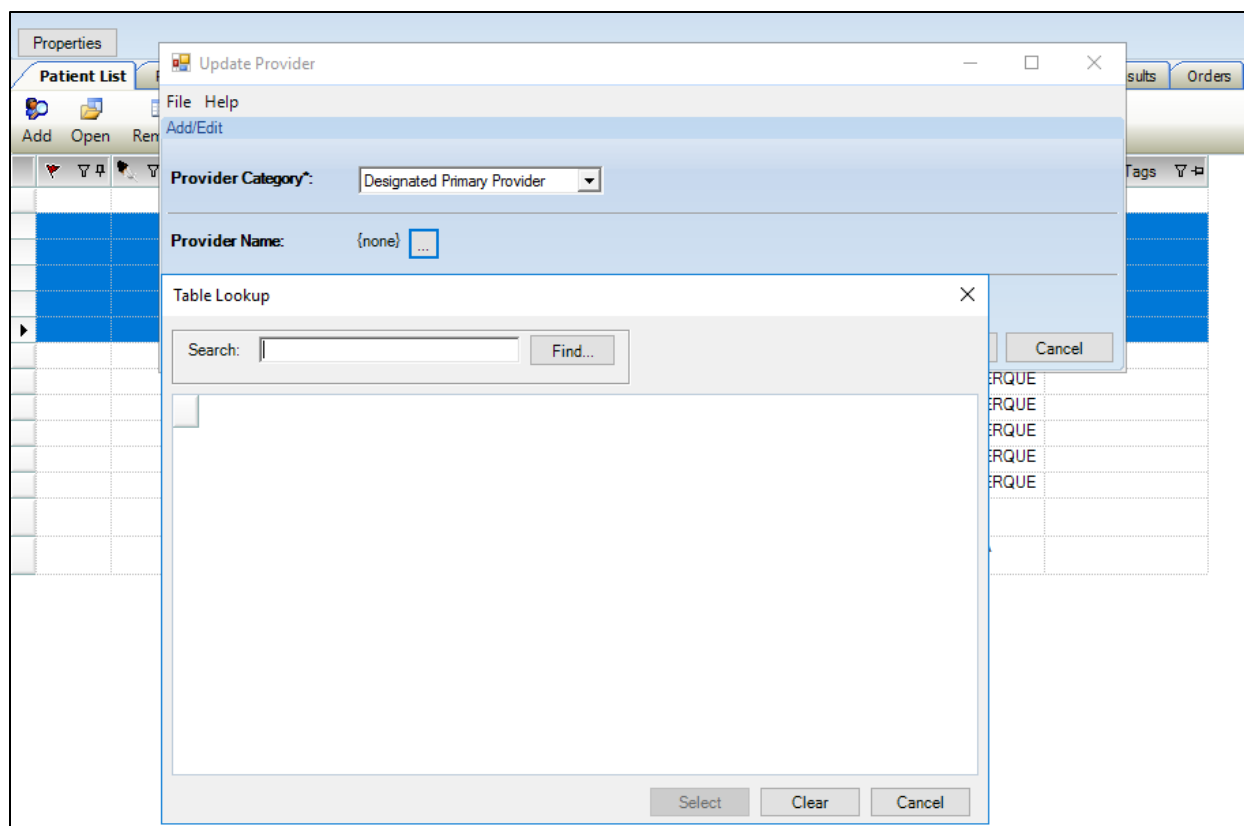

Figure 2-26: Update selected Provider Category selection

Click **Yes** to confirm saving to RPMS.

Figure 2-27: Confirm to save to RPMS message

Click **OK** to refresh.

Figure 2-28: Provider data has been successfully saved

The selected Provider Category column should be cleared for the selected providers. To confirm, add the **Provider Category (Specialty Providers)** column to the layout before updating to confirm the changes.

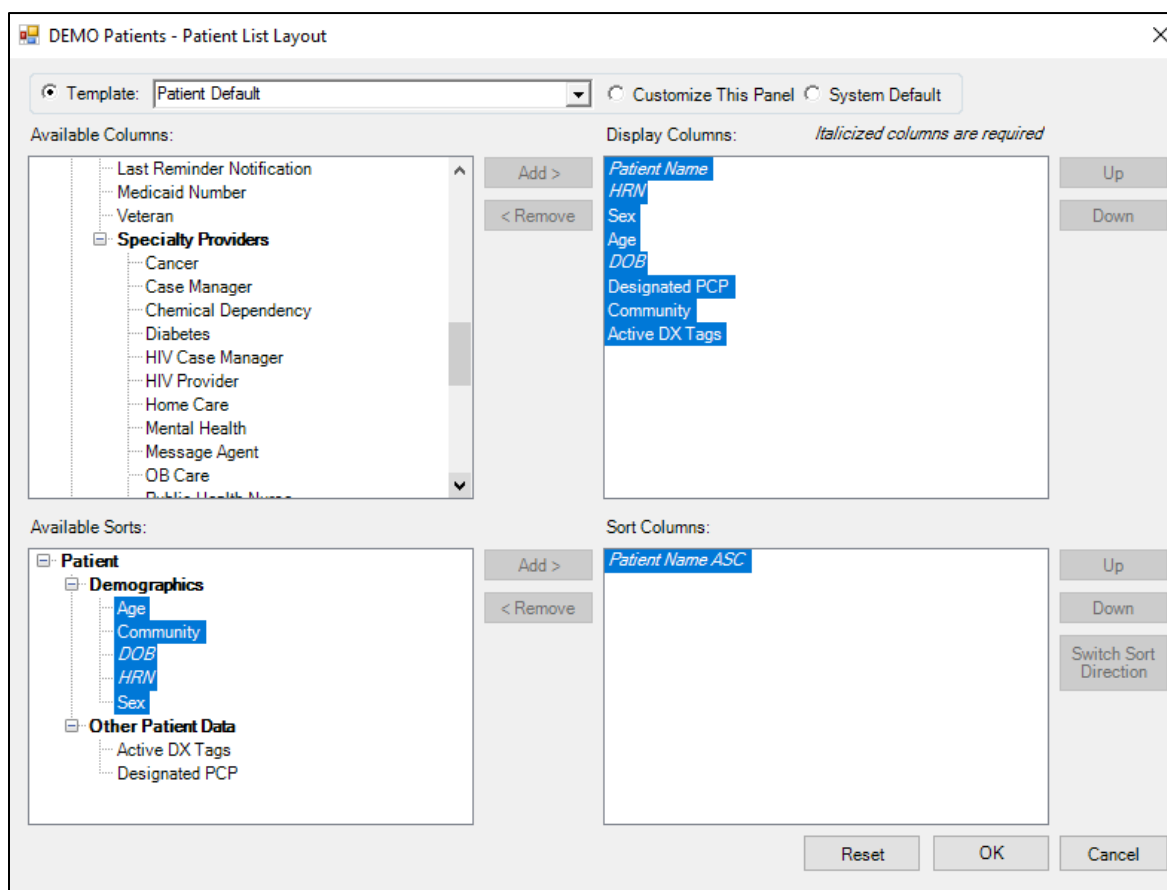

Figure 2-29: Specialty Providers list from Patient layout

Occasionally, specific categories might not be updated if the patient's record was somehow out of synchronization. In those cases, it may be necessary to remove the provider by one of the following RPMS menus:

Update Primary Care Provider [BSDPCP EDIT 1PAT]

## 2.1.1.13 Note Process

The **Note Process** function allows the user to create a letter or phone note for the selected patients. The default is LETTER. To use the Note Process, the user must have an electronic signature set up in RPMS and default telephone and letter clinics set up in User Preferences; see Section 4.3.1. See Section 3.12.2.2 for more information on letters or notes.

Figure 2-31: Note Process dialog

Click **Create** to start the letter or note.

Figure 2-32: **Add TIU Note - Batch Mode** window

## 2.1.2 Additional Toolbar Items

The buttons on the right side of any iCare window have many of the same functionality as other iCare views. For Panel View, there is one button that does not exist elsewhere in iCare: the **Mail Merge** button.

Figure 2-33: Right-side toolbar

These buttons might not be visible; in that case, click the drop-down list (  ) button.

The application provides hover help for each button.

### 2.1.2.1 Mail Merge

The iCare application provides the capability to export patient demographic data in a format that word-processing mail merge files can use. This is a demographic data export for the Letter Generation function.

Follow these steps:

1. Select the patients to include in the mail merge process.
2. Click the **Mail Merge** (📧) button (or select **Tools | Mail Merge**) to display the **Export** dialog.

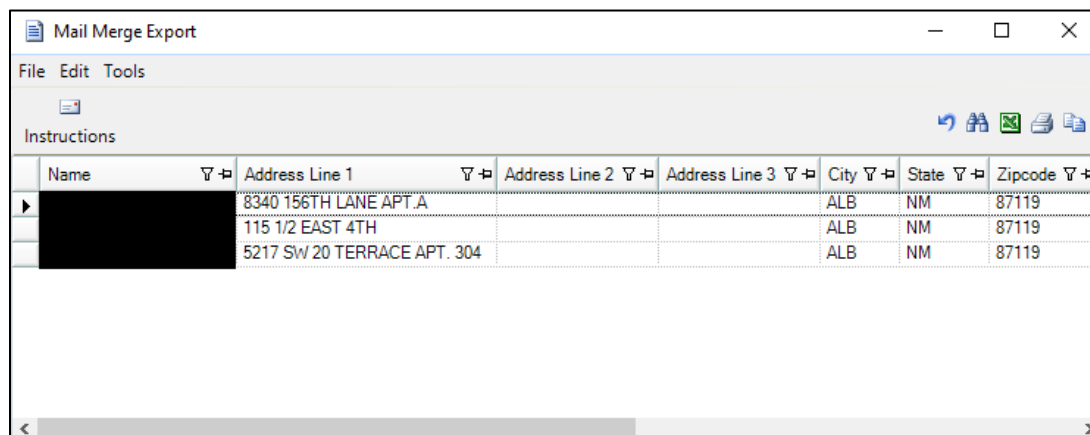

Figure 2-34: **Mail Merge Export** dialog

Section 2.1.2 provides information about using the buttons on the right side of the toolbar.

3. Click the **Instructions** (📖) button to display the **Mail Merge Instructions** pop-up. Here are the instructions for completing the mail merge process.

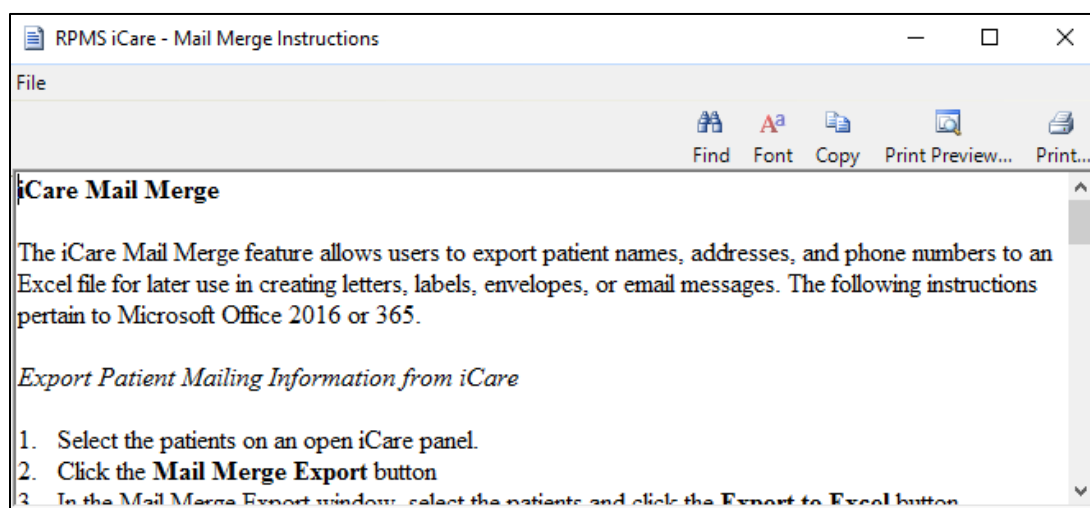

Figure 2-35: **Mail Merge Instructions** pop-up

**Note:** Print the contents by clicking the **Print** button or selecting **File | Print**.

Section 4.1 provides information about the **File** menu and buttons on the pop-up.

### 2.1.2.2 Reset View

Click the **Reset View** () button (or select **Tools | Reset View**) to return the current view to the default view. Use this feature to change the view, such as resizing the column width. This is the same as using the **Ctrl+R** key combination.

### 2.1.2.3 Refresh

Click the **Refresh** () button (or select **Tools | Refresh**) to update any RPMS field values on the current window with new data from the server. This is the same as pressing F5 on your keyboard.

### 2.1.2.4 Search

Click the **Search** () button (or select **Tools | Search** or use the **Ctrl+F** key combination) to display the **Search** dialog.

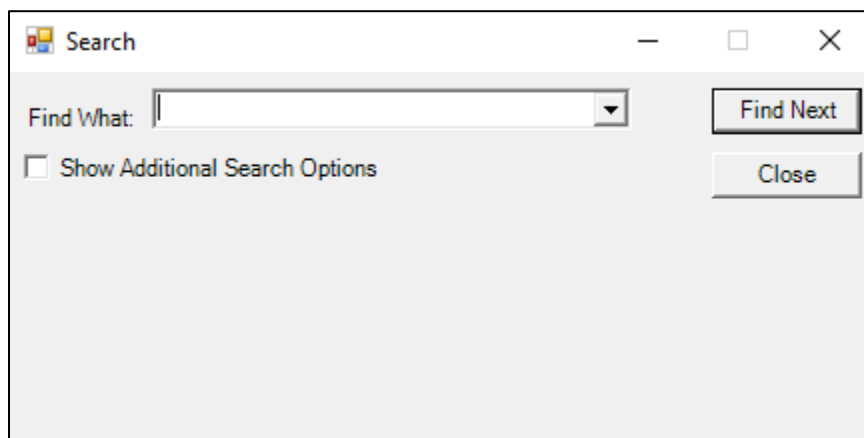

Figure 2-36: **Search** dialog

If the **Show Additional Search Options** check box is not selected, the search looks in all columns for a match.

If the **Show Additional Search Options** check box is selected, the **Search** dialog changes to show more options for the search.

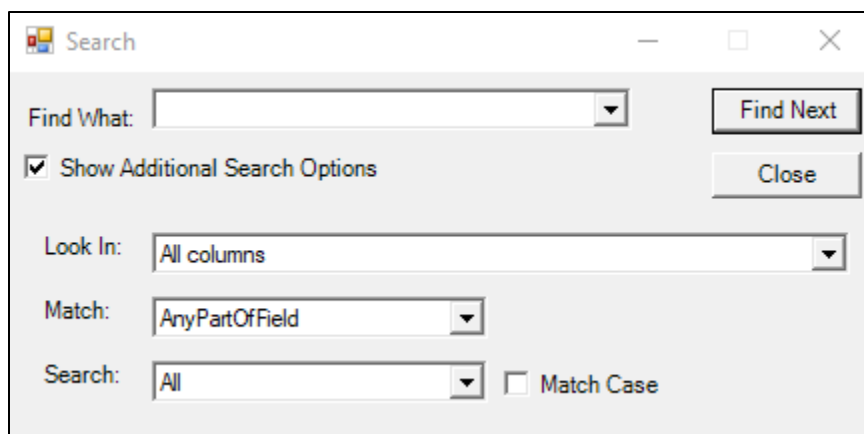

Figure 2-37: **Search** dialog with additional search options

Type the search criteria in the **Find What** free text field. The remaining fields determine the criteria for the search.

If the **Match Case** check box is selected, the search will match the case of the text in the **Find What** field.

### Look In Field

Click the drop-down list for the **Look In** field to view the options. The highlighted option determines which part of the window to search.

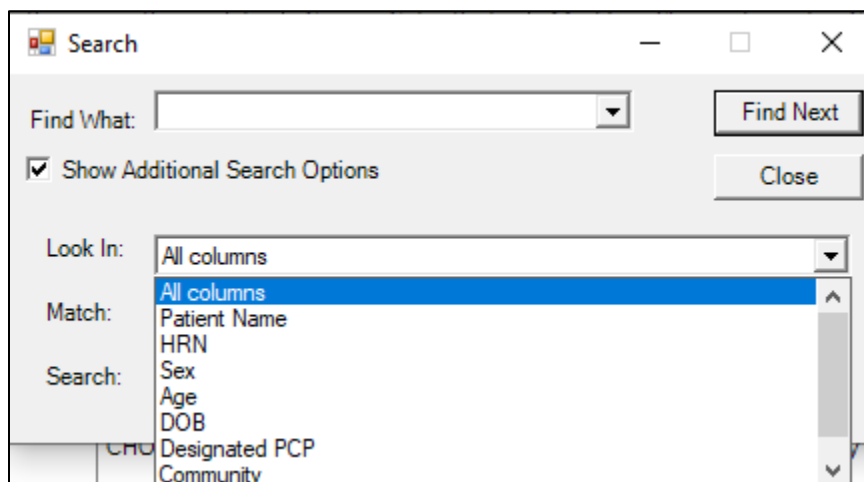

Figure 2-38: Sample options for the **Look In** field

The highlighted items in the upper part of the list determine the options in the lower part. For example, if the **Look In** field contained **All columns**, the list of the column names would appear in the lower part of the drop-down list.

### Match Field

Click the drop-down list for the **Match** field to view the options for that field.

Figure 2-39: Sample options for the **Match** field

The highlighted option determines what part of the **Find What** field will be matched in the search.

### Search Field

Click the drop-down list for the **Search** field to view the options.

Figure 2-40: Sample options for the **Search** field

The highlighted option determines the direction of the search.

After all fields are populated with the search criteria, click the **Find Next** button. (Otherwise, click **Close**.)

The matching text will be highlighted (in the grid) if a match is found. To continue the exact search, click the **Find Next** button again; repeat this process as needed.

The **Datagrid Search Results** message will display if a match is not found.

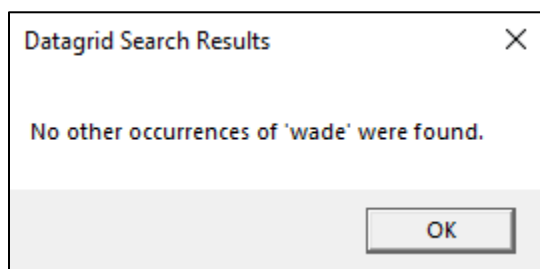

Figure 2-41: **Datagrid Search Results** message

Click **OK** to close the message and return to the **Search** dialog.

#### 2.1.2.5 Export to Excel

Export the information in the grid to Excel by clicking the **Export to Excel** () button (or by selecting **Tools | Excel Export** or pressing **Ctrl+E**).

The application displays a warning message about the export.

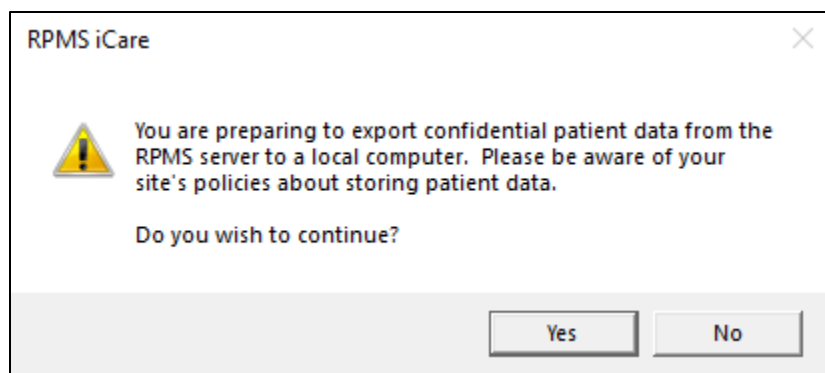

Figure 2-42: Warning message about exporting patient data

- Click **No** to dismiss the warning and to exit the export process.
- Click **Yes** to continue the export process and display the **Save As** dialog.

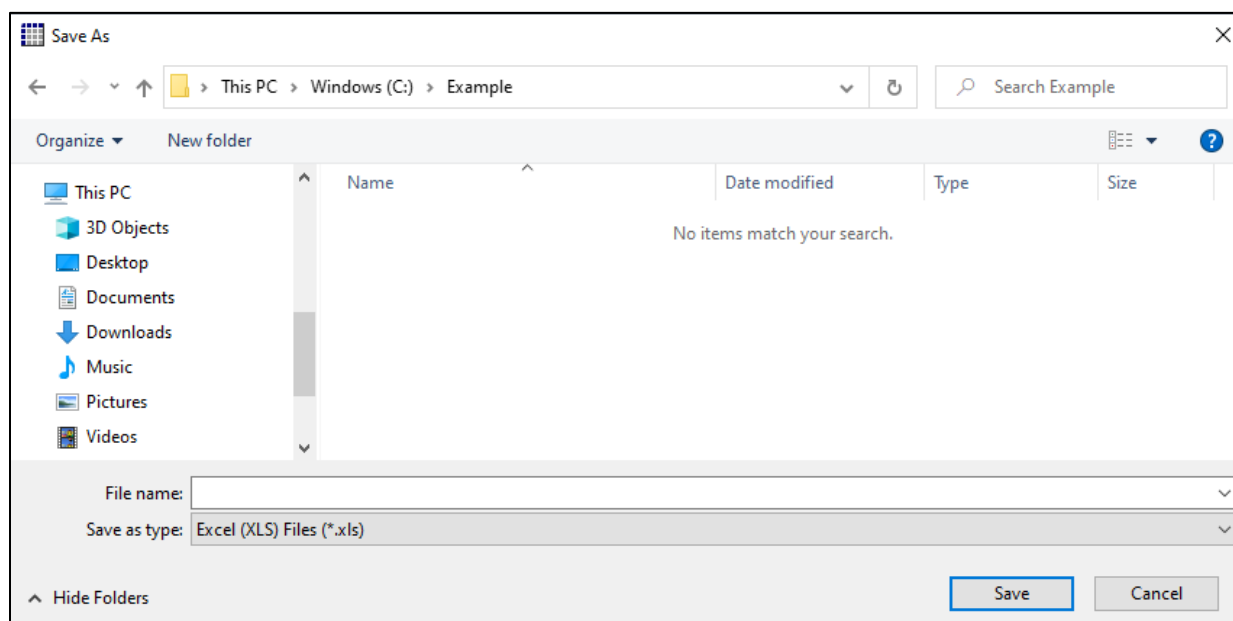

Figure 2-43: Sample **Save As** dialog

Make sure the file location displays in the **Save in** field.

Type the name in the **File name** field. The system will add an XLS extension to the field name (automatically).

Click **Save**. (Otherwise, click **Cancel**.) The Export Panel message, “Excel export has been created” displays when the save command is complete; click **OK** to dismiss the message.

The application provides a Confidential Patient Information header when the Excel document is viewed.

### 2.1.2.6 Print

Print selected rows will print the selected patients' information.

Copy the selected patients' information by doing the following:

- Selecting the patients by selecting the rows or selecting all using **Ctrl+A**.
- Clicking the **Print** () button (or selecting **Tools | Print** or pressing **Ctrl+P**).

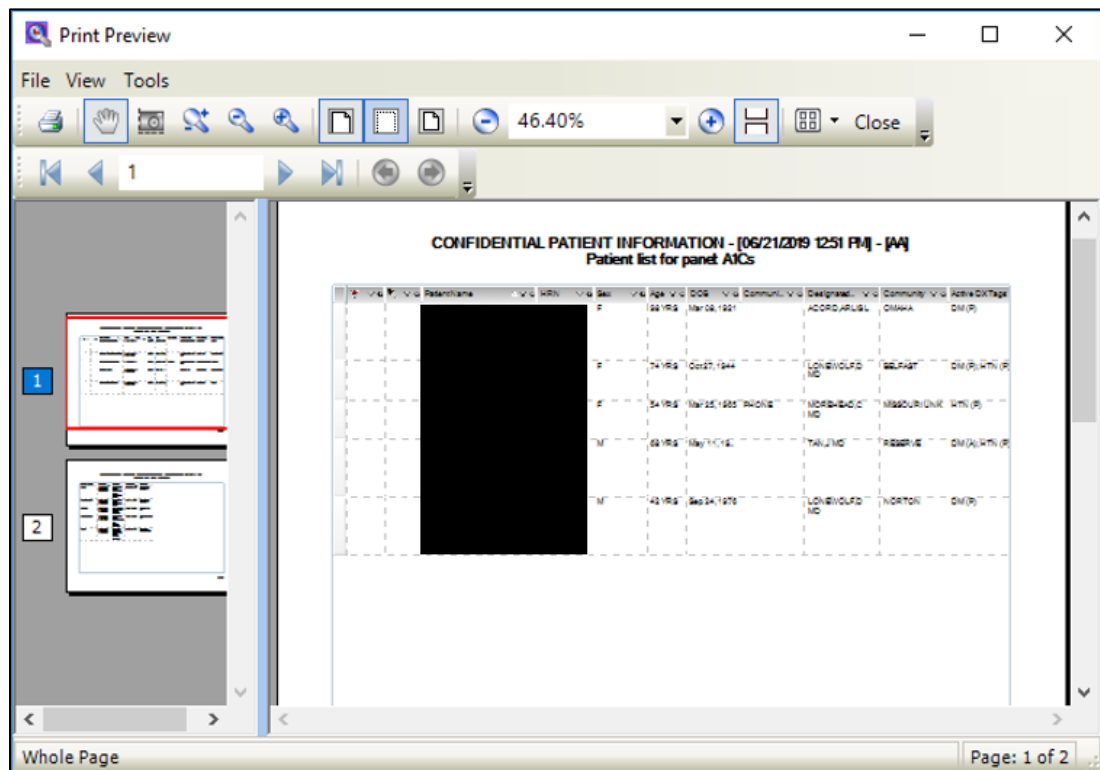

Figure 2-44: **Print Preview** dialog

### 2.1.2.7 Copy

Copy selected rows of the selected patients' information to the iCare clipboard. Then, paste the patients' information from the clipboard.

Copy the selected patients' information by doing one of the following:

- Selecting the patients by selecting the rows or selecting all pressing **Ctrl+A**.
- Clicking the **Copy** button (or selecting **Tools | Copy Rows to Clipboard** or pressing **Ctrl+Shift+C**).

### 2.1.3 Additional Information

Information about the panel displays in different parts of the window.

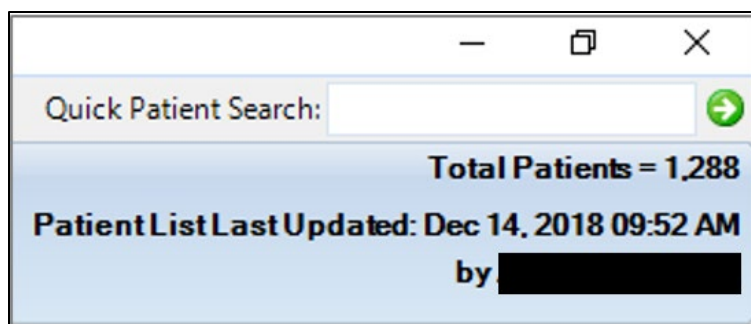

Figure 2-45: Top right

- **Total Patients:** The number of patients in the panel.
- **Patient List Last Updated:** The date and time the patient list was last repopulated, either manually or auto-repopulated.
- **By:** The name of the user who last repopulated the patient list.

Figure 2-46: Bottom right of panel

Information about the current layout, how many rows are selected, if the view is filtered, and how many visible rows are out of the total.

Figure 2-47: Top left

The panel's name and a **Properties** button describe the panel's definition.

## 2.1.4 Properties

Click the **Properties** button above the tabs in the Panel Information area (or select **File | Panel Properties**) to view the properties of the current panel. Click **OK** to dismiss the pop-up.

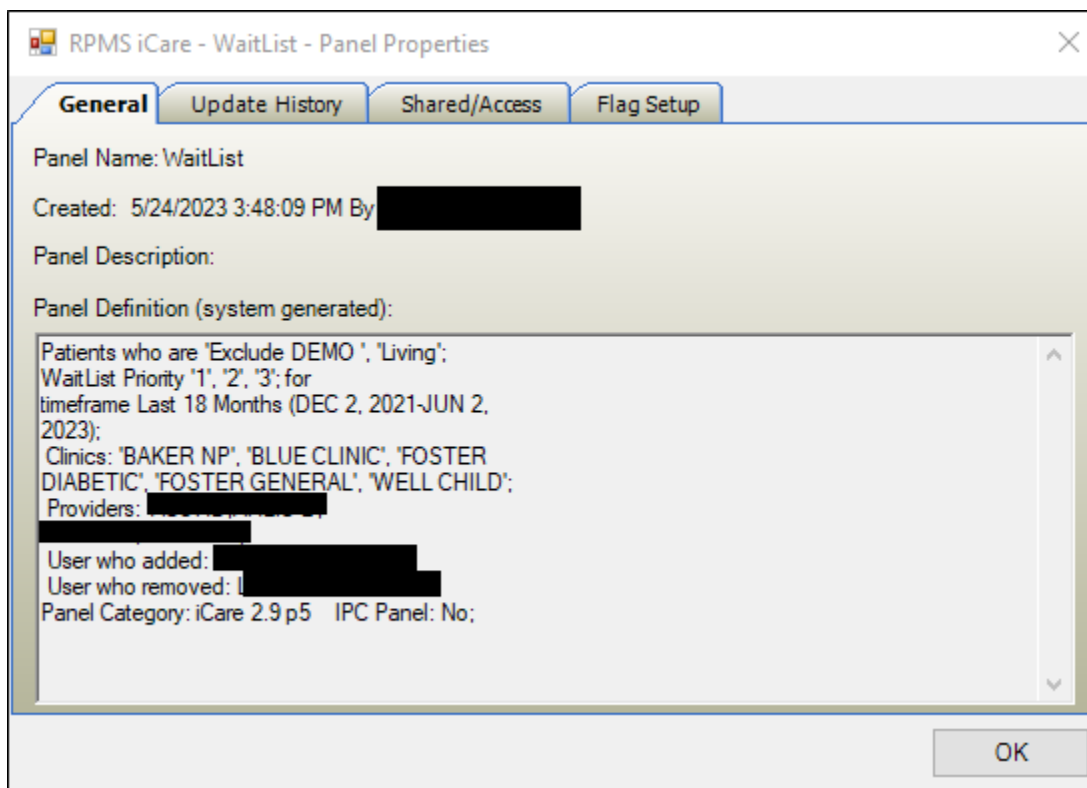

Figure 2-48: Sample **Panel Properties** pop-up

- The **General** tab provides information about the panel name, when it was created and who created it, the panel description, and any filters used to create it.
- The **Update History** tab provides information about the auto-repopulate status of the panel, when the panel definition was last modified and who modified it, when the patient list was last populated and who modified it, and when the patient list was manually updated.
- The **Shared/Access** tab provides information about the shared users for the current panel and their access rights.
- The **Flag Setup** tab provides information about the timeframes for the flag types (defined in User Preferences).

Click **OK** to dismiss the pop-up.

### 2.1.5 User Preferences

Users may hide tabs that they do not use or choose to change the opening tab. The default opening tab is Patient List. Users can adjust their views by selecting **User Preferences** under **Tools**.

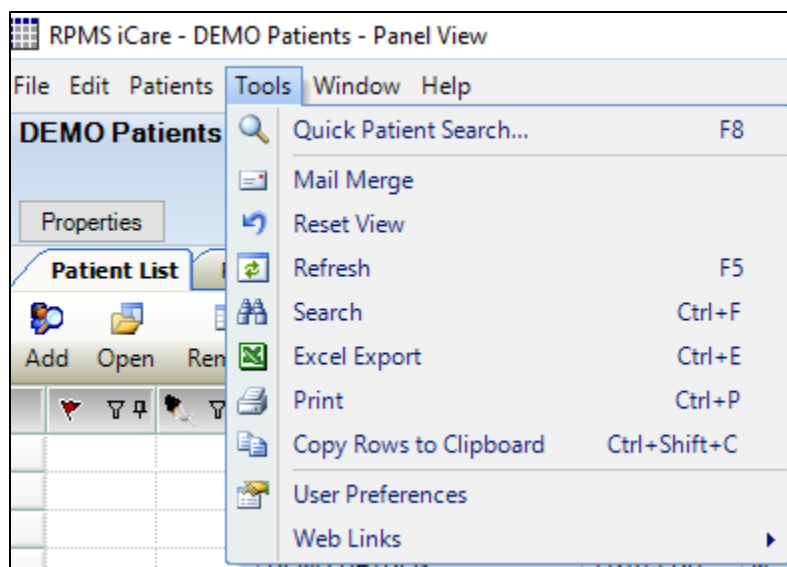

Figure 2-49: Tools list

In the **User Preferences** dialog, click the **Panel View** tab to display a list of available tabs that can be hidden by unchecking the corresponding box. Select a **Starting Tab** to choose the first panel that appears when a panel is opened. There can be only one Starting Tab selection, and at least one Starting Tab must be selected.

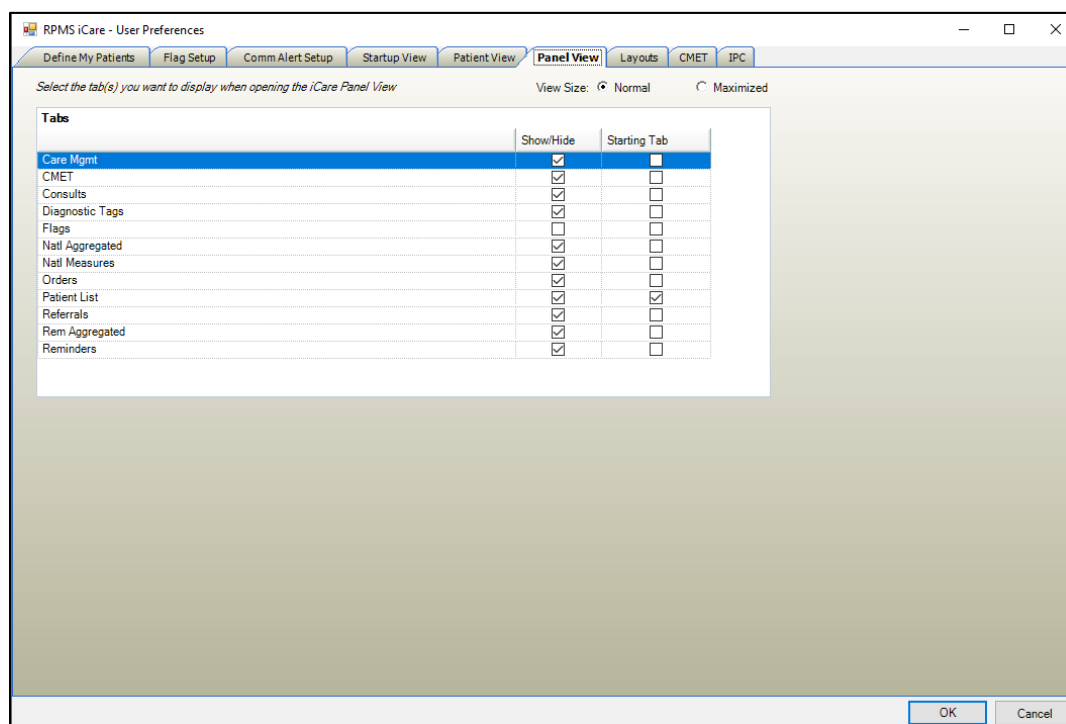

Figure 2-50: User Preferences Panel View list

## 3.0 Package Management

Section 2.1.2 provides information about the buttons on the right side of the toolbar.

### 3.1 Patient List Tab

The **Patient List** tab of the **Panel View** window displays data about the patients in the panel. The default grid displays the standard demographic columns (Patient Name, HRN, Sex, Age, DOB [date of birth]) in addition to the diagnostic tag-related data and the condition-specific (register) fields.

Users can create notes via the **Note Process** button.

| Patient Name           | HRN | Sex | Age | DOB | Designate... | Community   | Active DX Tags |
|------------------------|-----|-----|-----|-----|--------------|-------------|----------------|
| DEMO.BARABARA          |     |     |     |     | TWELVE,TRAIN | ALBUQUERQUE |                |
| DEMO.DANI              |     |     |     |     |              | ALBUQUERQUE |                |
| DEMO.DARLENE           |     |     |     |     |              | CORRALES    |                |
| DEMO.HAYDEN            |     |     |     |     |              | HOLTON      |                |
| DEMO.IMMUNIZATION BABY |     |     |     |     |              | ALBUQUERQUE |                |
| DEMO.JACKIE            |     |     |     |     |              | ALBUQUERQUE |                |
| DEMO.MARY              |     |     |     |     |              | ALBUQUERQUE |                |
| DEMO.MATIAS            |     |     |     |     |              | ALBUQUERQUE |                |
| DEMO.MOTT              |     |     |     |     |              | ALBUQUERQUE |                |
| DEMO.PATIENT ONE       |     |     |     |     |              | ALBUQUERQUE |                |
| DEMO.PATIENT TWO       |     |     |     |     |              | ALBUQUERQUE |                |
| DEMO.SOFIA             |     |     |     |     |              | ALBUQUERQUE |                |

Figure 3-1: Sample **Patient List** tab

#### 3.1.1 Patient List Tab Layout

Review the status bar in the current layout to identify which template is used. For example, it could read the current layout: system default.

The status bar shows information about the rows in the panel. Visible rows will be smaller than total rows if a filter has been applied.

|                                 |                  |                  |                |
|---------------------------------|------------------|------------------|----------------|
| Current Layout: Patient Default | Selected Rows: 0 | Visible Rows: 14 | Total Rows: 14 |
|---------------------------------|------------------|------------------|----------------|

Figure 3-2: Sample row information

Sort/filter the columns and perform other functions on the columns.

Table 3-1 provides information about the default columns on the **Patient List** tab.

Table 3-1: Standard patient demographic information

| Column   | Information  |
|--|--|
| Flag indicator  | Displays when a patient has a flag. This column is always the first and can only be removed by turning all flags off in the User Preferences.  |
|                 | The feather indicator in this column means an open CMET with an overdue step. Go to the CMET Tracked Events sub-tab to review this condition.  |
| Patient Name   | Required field that will link to the patient record if you double-click the name.  |
| HRN  | Patient's health record number. The HRN will display the HRN number followed by the facility code. An HRN with an asterisk (*) is an inactive HRN for that facility.                           |
| Sex  | F (for female), M (for male), or U (for unknown).  |
| Age  | The patient's age as of today.   |
| DOB  | Patient's date of birth.   |
| Designated PCP   | Designated primary care provider, if any. Not all facilities use this field to empanel patients.   |
| Community  | Patient's community of residence.  |
| Active DX Tags   | One or more predefined diagnosis definitions (tags) that iCare has proposed for the patient with a Proposed or Active status. Section 3.1.1.1 provides more information about diagnostic tags. |

View the community alert text by hovering your mouse over the Community Alert icon () , if any. The icon does not affect the sorting of the Community column.

### 3.1.1.1 Diagnostic Tags

iCare provides a diagnosis tagging function that runs as a background process on your RPMS server and reviews all patient data. Tagging is a term that refers to running a series of logic algorithms on one or multiple patients that identifies (tags) them with one or more of the predefined diagnosis categories listed below:

- ASCVD At Risk (ASCVD Risk)
- ASCVD Known (ASCVD Kn)
- Asthma (Asthma)
- COPD (COPD)
- Chronic Kidney Dis NOS (CKD NOS)
- Chronic Kidney Dis Stg 1 (CKD 1)
- Chronic Kidney Dis Stg 2 (CKD 2)
- Chronic Kidney Dis Stg 3 (CKD 3)
- Chronic Kidney Dis Stg 4 (CKD 4)

- Chronic Kidney Dis Stg 5 (CKD 5)
- Diabetes (DM)
- End Stage Renal Disease (ESRD)
- Glaucoma (Glau)
- HIV/AIDS (HIV)
- Hypertension (HTN)
- Obese (Obese)
- PreDM Metabolic Syndrome (PreDM)
- Pregnant (Preg)
- Tobacco Users (Smokers) (Smoker)

iCare will classify tags into one of five statuses: proposed (pending) (P), accepted (A), not accepted (NA), no longer valid (NLV), and superseded (S). In the **Active DX Tags** column on any panel view, the status value should be concatenated with the tag name, e.g., Asthma (A), CVD AHR (P), DM (A).

The detailed logic for each diagnosis tag can be found in the Diagnostic Tag glossary (found by selecting that option on the Help menu).

### 3.1.1.2 Patient Classified as Sensitive

A “sensitive patient” is preceded by the () symbol in the **Patient Name** column.

Double-click the sensitive patient record. If one of the following conditions exists:

- The patient is sensitive, and the user is not a DG SENSITIVITY key holder
- or*
- The patient is an employee, and the user is not a DG SENSITIVITY OFFICER key holder

Then, the application displays a warning message.

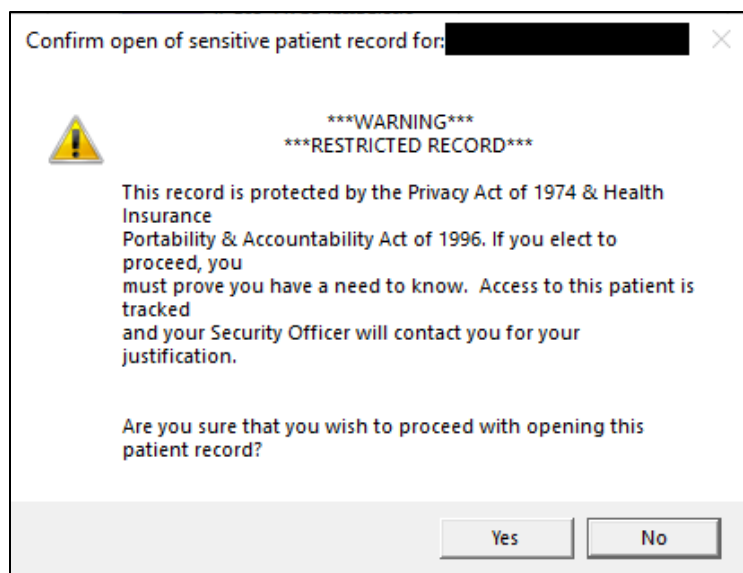

Figure 3-3: Sample sensitive patient warning message

Click **Yes** to open the patient record. Otherwise, click **No**.

## 3.2 Reminders Tab

The **Reminders** tab displays reminders pulled from RPMS: Health Summary report reminders, EHR Clinical Reminders, HMS Reminders, Care Management Event Tracking (CMET) Reminders, and Immunization Forecaster Reminders. The default view is the Health Summary Reminders.

Ready

Current Layout: Reminders Default | Selected Rows: 1 | Visible Rows: 13 | Total Rows: 13

Figure 3-4: Sample Reminders tab

The Reminders Glossary contains information about each of the reminders. To view this glossary, select **Help | Reminders Glossary**.

### 3.2.1 Reminders Tab Layout

The default view displays the standard patient demographic columns (see Figure 3-4) plus selected active reminders.

Table 3-2: Sample **Reminders** tab

| Column             | Information  |
|--------------------|--|
| Individual Columns | There are individual columns for each active reminder. |

Double-click any row in the grid to access the **Reminders** tab of the **Patient Record** window.

The default sort order is alphabetical by patient name.

You can sort/filter the columns and perform other functions on the columns.

#### 3.2.1.1 Due/Overdue Dates

A date will display under each reminder column if the test or procedure is due. As shown in Figure 3-5, a yellow triangle icon displays if the test or procedure is overdue.

Figure 3-5: Sample overdue date for pelvic exam reminder

#### 3.2.1.2 Tooltip for Reminder

Hover your mouse over a reminder column heading to view information about it. The information is pulled from the Reminders application. The reminder tooltip will indicate the type of reminder by source and category.

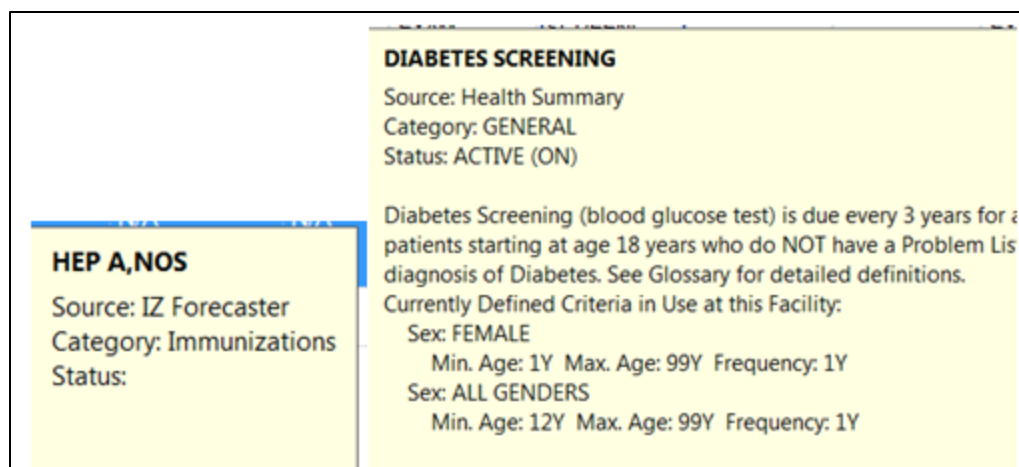

Figure 3-6: Reminder hover text

### 3.2.2 Reminders Tab Toolbar

The reminder logic is calculated and cached for display. The reminder logic is updated nightly by the nightly background job and once a week by the weekly job. The toolbar shows the date for which the data is effective.

Section 2.1.2 provides information about the buttons on the right side of the toolbar window.

#### 3.2.2.1 Add

Click the **Add** button if there are patients to be manually added to the panel.

#### 3.2.2.2 Remove

Highlight patients and click the **Remove** button if patients are to be manually removed from the panel.

#### 3.2.2.3 Copy Patient(s)

Highlight patients and click the **Copy Patient(s)** button if there are patients to be copied to another panel.

#### 3.2.2.4 Layout

See Section 3.2.3 for information about the **Reminders Layout** button.

#### 3.2.2.5 Note Process

Highlight patients and click the **Note Process** button if letters or notes are to be created for the selected patients. See Section 2.1.1.13 for more information on how the Note Process works.

### 3.2.3 Layout

The **Layout** function determines which reminder columns to display for the current panel and the order and sorting that should be used.

To change the layout, do one of the following:

- Click the **Layout** () button.
- Select **Reminders | Layout**.

The **Reminders Layout** screen will display for the current panel. Select the **Reminders** columns that will display on the panel.

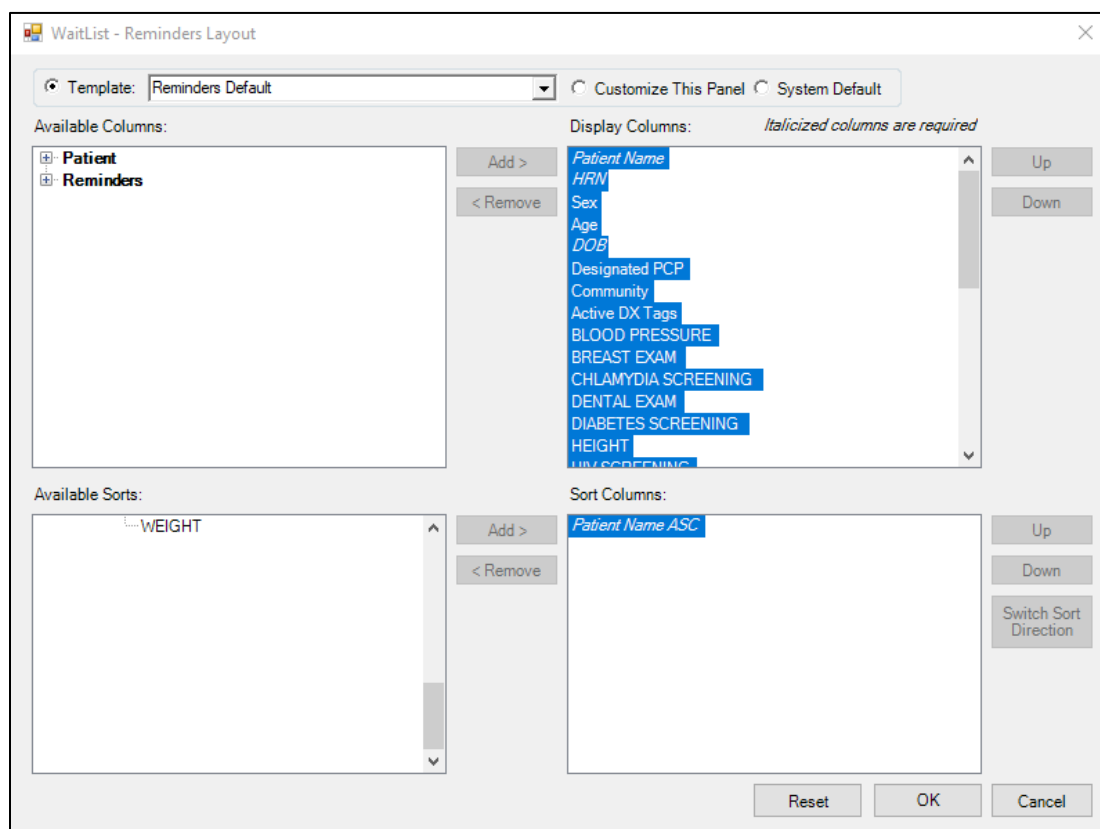

Figure 3-7: **Reminders Layout** window

There are three options to configure your display of data: **Template**, **Customize**, or **System Default**. Templates can be managed in Template Management. Choose the one appropriate for this panel if there are multiple reminder-type templates. A template can be used repeatedly for many different panels.

Figure 3-8: Template selection

Select **Customize**, and the configuration is only valid for this panel. **System Default** is the standard view released with iCare.

Update the Reminders columns by selecting **Reminders**, picking the appropriate source (on the **Reminders Layout** window), and adding them to the **Display Columns**. Section 4.3.2 provides information about manipulating the columns in the layout.

### 3.2.3.1 Status of Background Jobs

To check on the status of the background jobs, do one of the following:

- Click the **Background Jobs** () button.
- Select **File | Background Jobs**.

The action accesses the **RPMS iCare - Background Jobs** window. Section 4.1.1 provides information about this window.

## 3.3 Rem Aggregated Tab

The **Reminders Aggregated** tab displays the percentages and counts of patients within a panel that has or has not met reminder criteria. Active reminders are reminders that are turned on at a site. The aggregated values of reminders will be calculated when the view is opened.

Figure 3-9: Sample **Rem Aggregated** tab

### 3.3.1 Rem Aggregated Tab Layout

The default view displays the fields on the **Reminders Aggregated** tab in the order as listed in Table 3-3.

Table 3-3: Reminder Aggregated columns

| Column              | Meaning   |
|---------------------|---|
| Source              | The name of the source for the reminder. The following reminders will be organized into source: Asthma Reminders, CMET Reminders, EHR Clinical Reminders, Health Summary Reminders, and HIV/AIDS Reminders. |
| Category            | The name of the category for the source.  |
| Reminder Name       | The name of the reminder.   |
| # Patients Eligible | The total number of patients in this panel who need individual reminders.   |
| # Patients Current  | Current is defined as any due date in the future (not including today).   |

| Column             | Meaning  |
|--------------------|--|
| % Current          | The total percentage of patients in this panel waiting for an individual reminder is [# Patient Current] divided by [#Patients Eligible]. Because of the one-month grace period for the overdue definition, the total percentage of current and overdue cannot equal 100%.   |
| # Patients Overdue | Overdue is the due date equal to or before [today – 30 days]. This means the reminder is NOT counted as overdue for performance purposes until at least a month. The total of the Patients Current and the Patients Overdue cannot equal the total number of Patients Eligible because of the one-month grace period for the overdue definition. |
| % Overdue          | The total percentage of patients in this panel who are overdue for an individual reminder. That is [Patients Overdue] divided by [Patients Eligible]. Because of the one-month grace period, the total percentage of Patients Current and Patients Overdue might not equal 100%.   |

You can sort/filter the columns and perform other functions on the columns.

### 3.3.2 Rem Aggregated Tab Toolbar

The toolbar displays the date/time the data is effective.

Section 2.1.2 provides information about the buttons on the right side of the toolbar.

To check on the status of the background jobs, do one of the following:

- Click the **Background Jobs** () button.
- Select **File | Background Jobs**.

This action accesses the **RPMS iCare - Background Jobs** window. Section 4.1.1 provides information about this window.

## 3.4 Natl Measures Tab

The **Natl Measures** tab displays IHS national clinical performance measures as defined and reported in the RPMS Clinical Reporting System (CRS). iCare uses CRS performance logic to display whether patients meet annual performance goals.

### 3.4.1 What Is National Performance (GPRA)?

The Government Performance and Results Act (GPRA) requires federal agencies to report annually to Congress on how the agency measured up against the performance targets set in its annual plan.

Most performance measures have a denominator and a numerator defined as:

- The denominator is the total population being reviewed.
- The numerator is the number of patients from the denominator who meet the definition of the measure.

Some measures are just a count, such as Sealants and Topical Fluorides.

**Measure example:** GPRA Measure Cancer Screening: Pap Smear Rates: Maintain the proportion of female patients ages 21 through 64 without a documented history of hysterectomy who have had a Pap screen within the past three years at the previous year's level (60.0%).

The denominator is the total population being reviewed for a specific measure. For the Pap smear measure, the denominator is all female patients ages 21 through 64 at the beginning of the report period. The numerator is the number of patients in the denominator who meet specific criteria. For a Pap smear, the numerator is the number of patients in the denominator who had either a Pap smear, defined by specific codes, documented in RPMS any time in the three years before the end of the reporting period or a refusal of a Pap smear in the past year.

If you are unfamiliar with your facility's policies and practices related to national performance reporting, talk with your site GPRA coordinator.

### 3.4.2 Natl Measures Tab Buttons

Each tab has a standard left-side group of buttons on the toolbar and a right-side group on the toolbar. See Section 2.1.2 for information on the left-side toolbar buttons.

#### 3.4.2.1 Add

Click the **Add** button if there are patients to manually add to the panel.

#### 3.4.2.2 Remove

Highlight patients and click the **Remove** button if patients are to be manually removed from the panel.

#### 3.4.2.3 Copy

Highlight patients and click the **Copy** button if patients are to be copied to another panel.

#### 3.4.2.4 Layout

See Section 3.4.4.1 for information about the **Natl Measures Layout** button.

#### 3.4.2.5 Note Process

Highlight patients and click the **Note Process** button if letters or notes are to be created for the selected patients. See Section 2.1.1.13 for more information on the Note Process.

### 3.4.3 Natl Measures Tab Layout

The default view displays the standard patient demographic columns (see Figure 3-10) plus the active National GPRA measures.

Table 3-4: Natl Measures columns

| Column             | Information                           |
|--------------------|---------------------------------------|
| Individual columns | The value of the performance was met. |

Double-clicking any record in the grid opens the patient record window to the **Natl Measures** tab.

There is hover help for each performance column that displays the GPRA definition.

You can find information about all the measures in the National Measures Glossary by selecting **Help | Natl Measures Glossary**.

You can sort/filter the columns and perform other functions on the columns.

### 3.4.4 Natl Measures Tab Toolbar

The toolbar shows the date/time for which the data is effective.

Section 2.1.2 provides more information about the buttons on the right side of the toolbar.

#### 3.4.4.1 Layout

The **Layout** function determines which performance measures columns to display and the order and sorting that should be used in the current panel.

To change the layout, do one of the following:

- Click the **Layout** (  ) button.
- Select **National Measures | Layout**.

The **Natl Measures Layout** window for the current panel displays.

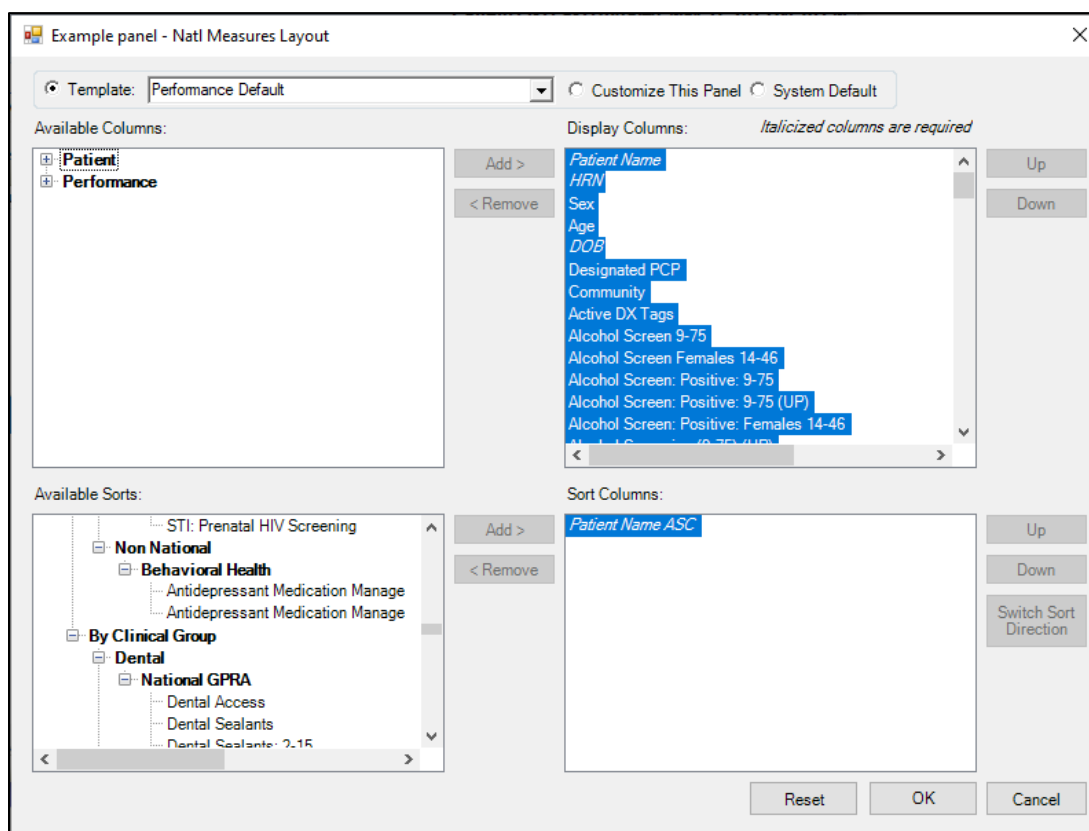

Figure 3-11: **Natl Measures Layout** window

If you choose to add the **CRS Pop** column (under **Patient | Demographics**) to the **National Measures** tab, it will display the values describing the population category defined by CRS. The CRS population categories include UP (user population), AC (active clinical), AD (active diabetic), etc. The population is a text string from the Denominator column of the CRS Patient List report that will be calculated for each patient within the weekly performance measures background process.

Section 4.3.2 provides information about using the features of the layout window.

### 3.4.4.2 Status of Background Jobs

To check on the status of the background jobs, do one of the following:

- Click the **Background Jobs** () button.
- Select **File | Background Jobs**.

This action accesses the **RPMS iCare - Background Jobs** window. Section 4.1.1 provides information about this window.

## 3.5 Natl Aggregated Tab

The **National Aggregated** tab information is based on the format of the summary page from the CRS National GPRA report. It displays a summarized overview of the national performance measure data for patients in the viewed panel.

|----------------------------------|---|
| Category                         | The name of the category associated with the measure.   |
| Clinical Group                   | The name of the clinical performance group.   |
| Measure Name                     | The measure title is derived from the Summary Report (iCare pulls from the first column of the CRS Summary Report). The hover help displays a description of the performance logic for each cell in the column. |
| # Patients in Denominator        | The total number of patients in this panel who meet the denominator definition.   |
| # Patients in Numerator          | The total number of patients in this panel who meet the numerator definition.   |
| % Met                            | The percentage of the panel that meets the measure is derived by dividing the denominator total by the numerator total.   |
| <i>year</i> Goal                 | The value will be the same as displayed in the GPRA column on the summary page from the CRS National GPRA report. The <i>year</i> is the most recent year with final goals recorded.                            |
| IHS Current National Performance | The value will be the same as that displayed in the Nat'l column on the summary page from the CRS National GPRA report.   |

You can sort/filter the columns and perform other functions on the columns.

### 3.5.2 Natl Aggregated Tab Toolbar

The toolbar shows the date/time for which the data is current.

Section 2.1.2 provides more information about the buttons on the right side of the toolbar.

To check on the status of the background jobs, do one of the following:

- Click the **Background Jobs** () button.
- Select **File | Background Jobs**.

This action accesses the **RPMS iCare - Background Jobs** window. Section 4.1.1 provides information about this window.

## 3.6 CMET Tab

The **CMET** tab on the **Panel View** displays data related to the Events, Tracked Events, and Follow-up Events for the panel of patients. Please see the *Care Management Event Tracking User Manual* for details.

Figure 3-13: Sample **CMET** tabs

### 3.6.1 Events Sub-Tab

The **Events** sub-tab provides last mined data on the date displayed on this **Events** window.

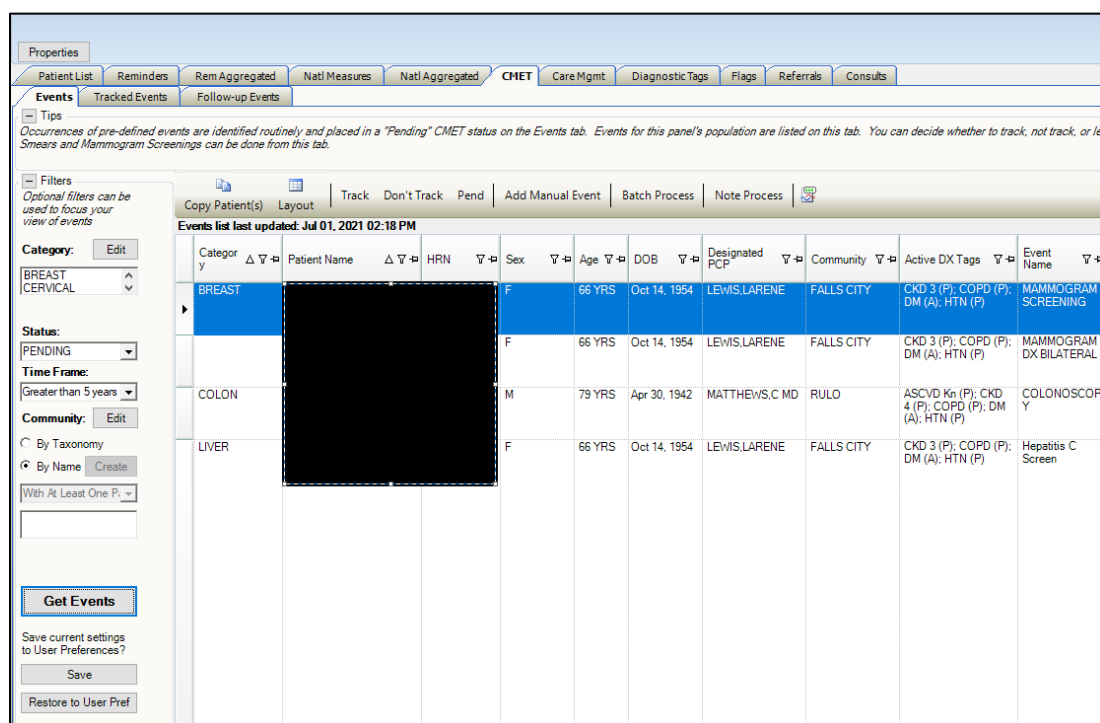

Figure 3-14: Sample **Events** sub-tab

Table 3-6 provides information about the default columns.

Table 3-6: Default columns

| Column       | Meaning   |
|--------------|---|
| Category     | The event categories are Breast, Cervical, Colon, Skeletal, and STI.  |
| Patient Name | Required field that links to the Events sub-tab of the CMET tab on the patient record if you double-click the name. |

| Column                  | Meaning   |
|-------------------------|---|
| HRN                     | Patient's Health Record Number.   |
| Sex                     | F (for female) or M (for male)  |
| Age                     | The patient's age today.  |
| DOB                     | Patient's date of birth   |
| Designated PCP          | Designated primary care provider, if any. Not all facilities use this field to empanel patients.                    |
| Community               | Patient's community of residence.   |
| Active DX Tags          | Predefined Diagnosis definitions (tags) that iCare has proposed for this patient are based on the tagging function. |
| Event Name              | Name of the event.  |
| Event Date              | The date associated with the event.   |
| Expanded Event          | The definition of the event was expanded for display only.  |
| Result                  | The date of the result of the event. This cell also has hover help, such as V Radiology.                            |
| Expanded Result         | The expanded view of the result value.  |
| Status                  | The status of the event.  |
| Status Comments         | Text of any comments about the status.  |
| Last Modified Date/Time | The date and time the record was last modified.   |
| Last Modified By        | The name of the person who last modified the record. The initial job means it is the initial record.                |

Double-click the underlined **Event Date** to access the **Visit Detail** pop-up.

Double-click the underlined **Result Date** to access a particular detail pop-up, for example, Women's Health Detail.

You can sort/filter the columns and perform other functions on the columns.

### 3.6.1.1 Events Tab Buttons

Each tab has a standard left-side group of buttons on the toolbar and a right-side group on the toolbar. See Section 2.1.2 for information on the right-side toolbar buttons.

#### Copy Patient(s)

Highlight patients and click the **Copy Patient(s)** button if there are patients to be copied to another panel.

**Layout**

See Section 0 for information about the **Events Layout** button.

**Track**

Refer to the *CMET User Manual*.

**Don't Track**

Refer to the *CMET User Manual*.

**Pend**

Refer to the *CMET User Manual*.

**Add Manual Event**

Refer to the *CMET User Manual*.

**Batch Process**

Refer to the *CMET User Manual*.

**Note Process**

Highlight patients and click the **Note Process** button if letters or notes are to be created for the selected patients. See Section 2.1.1.13 for more information on the Note Process.

**3.6.1.2 Events Sub-Tab Toolbar**

The toolbar shows the date/time the data is effective.

Section 2.1.2 provides information about the buttons on the right side of the window.

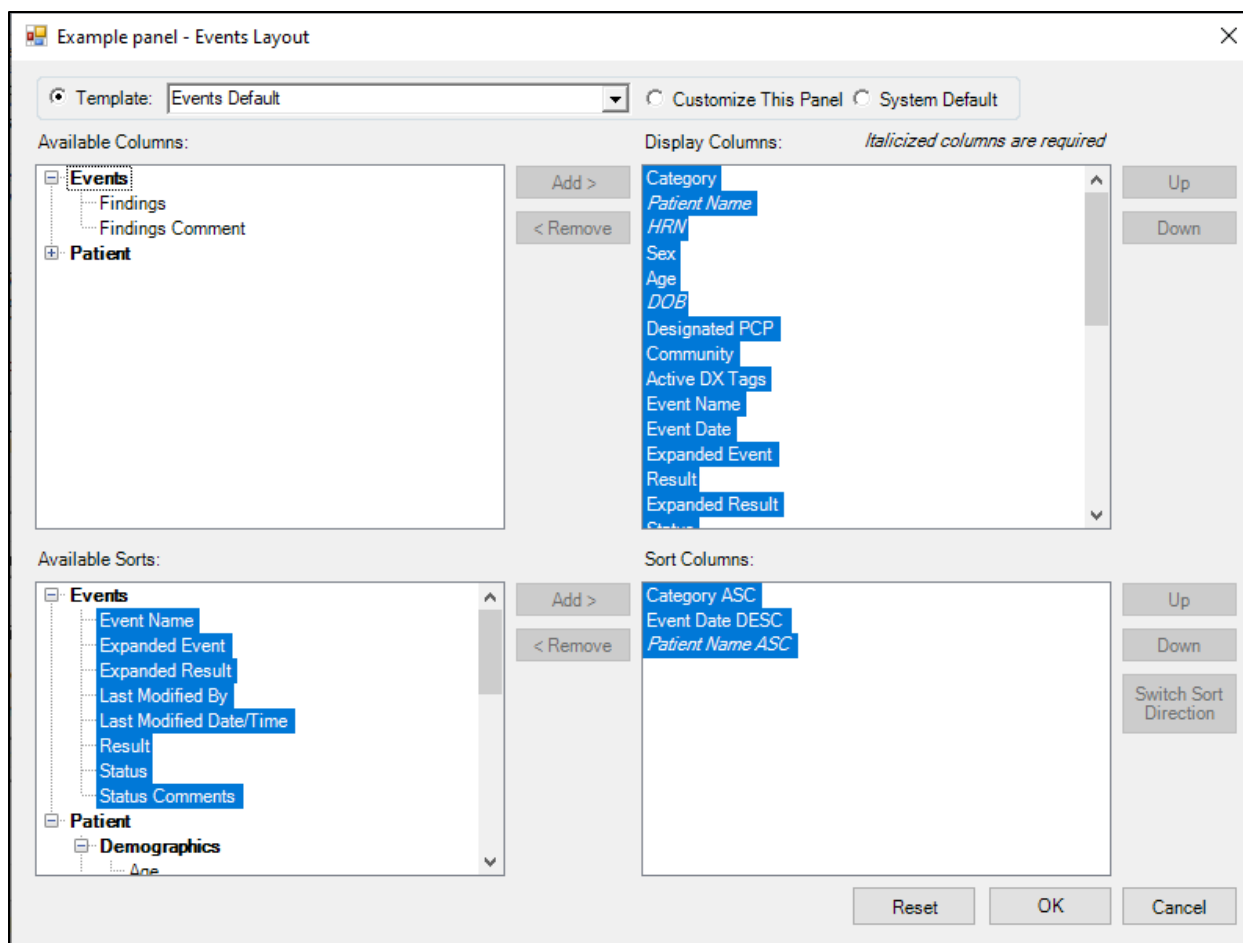

**Layout**

The **Layout** function determines the current panel's columns on the **Events** sub-tab.

You can select the layout function by doing one of the following:

- Clicking the **Layout** () button.
- Selecting **File | Layout**.
- Selecting **CMET | Events | Layout**.

This action accesses the **Events Layout** window.

Figure 3-15: **Events Layout** window

Section 4.3.2 provides information about using the features of the layout window.

### 3.6.2 Tracked Events Sub-Tab

The current panel's CMET events identified as Tracked will display on the **Tracked Events** sub-tab.

| Category   | Patient Name | HRN | Sex | Age    | DOB          | Designated PCP | Community      | Active DX Tags | Event Name          | Event Date   | Preceding Event | Results      | Finding(s) | Interpretation | Follow-up(s) | Patient Notification(s) | State |
|------------|--------------|-----|-----|--------|--------------|----------------|----------------|----------------|---------------------|--------------|-----------------|--------------|------------|----------------|--------------|-------------------------|-------|
| BREAST     |              |     | F   | 63 YRS | Jan 02, 1958 |                | HORTON         |                | MAMMOGRAM SCREENING | May 03, 2019 |                 |              |            |                |              |                         | OPEN  |
| INFECT DIS |              |     | F   | 28 YRS | Jan 17, 1993 |                | WHITE CLOUD    |                | COVID               | Jan 22, 2021 |                 | Jan 22, 2021 |            |                |              |                         | OPEN  |
|            |              |     | M   | 50 YRS | Jul 03, 1970 |                | COON LILA      |                | COVID               | Jan 22, 2021 |                 | Jan 22, 2021 |            |                |              |                         | OPEN  |
|            |              |     | M   | 40 YRS | Dec 07, 1980 |                | HIAIATHA       |                | COVID               | Jan 20, 2021 |                 | Jan 20, 2021 |            |                |              |                         | OPEN  |
|            |              |     | M   | 60 YRS | Oct 01, 1960 |                |                |                | COVID               | Jan 18, 2021 |                 | Jan 18, 2021 |            |                |              |                         | OPEN  |
|            |              |     | F   | 66 YRS | Oct 14, 1954 |                | LEWIS LARENE   |                | COVID               | Dec 29, 2020 |                 | Dec 29, 2020 |            |                |              |                         | OPEN  |
|            |              |     | M   | 79 YRS | Apr 30, 1942 |                | MATTHEWS, C MD |                | COVID               | Dec 01, 2020 |                 | Dec 01, 2020 |            |                |              |                         | OPEN  |

Figure 3-16: Sample **Tracked Events** sub-tab

### 3.6.2.1 Tracked Events Tab Buttons

Each tab has a standard left-side group of buttons on the toolbar and a right-side group on the toolbar. See Section 2.1.2 for information on the right-side toolbar buttons.

#### Copy Patient(s)

Highlight patients and click the **Copy Patient(s)** button if there are patients to be copied to another panel.

#### Layout

See Section 3.6.2.2 for information about the **Event Layout** button.

#### Reopen

Refer to the *CMET User Manual*.

#### Close

Refer to the *CMET User Manual*.

#### Batch Process

Refer to the *CMET User Manual*.

#### Open CMET Worksheet

Refer to the *CMET User Manual*.

#### Note Process

Highlight patients and click the **Note Process** button if letters or notes are to be created for the selected patients. See Section 2.1.1.13 for more information on the Note Process.

### 3.6.2.2 Tracked Events Sub-Tab Layout

You can sort/filter the columns and perform other functions on the columns.

Table 3-7 provides information about the columns.

Table 3-7: Tracked Events sub-tab columns

| Column       | Meaning  |
|--------------|--|
| Category     | The categories of the tracked events are Breast, Cervical, and Colon, Skeletal, STI.                                   |
| Patient Name | A required field will link to the Tracked Events sub-tab of the CMET tab on the patient record if you double-click it. |
| HRN          | Patient's Health Record Number.  |

| Column                      | Meaning   |
|-----------------------------|---|
| Sex                         | F (for female) or M (for male)  |
| Age                         | The patient's age today.  |
| DOB                         | Patient's date of birth.  |
| Designated PCP              | Designated primary care provider, if any. Not all facilities use this field to empanel patients.  |
| Community                   | Patient's community of residence.   |
| Active DX Tags              | Predefined diagnosis definitions (tags) that iCare has proposed for this patient are based on the tagging function.   |
| 1 - Event                   | Name of the event.  |
| Event Date                  | The date associated with the event.   |
| Preceding Event             | Contains the date of the preceding event—double-click this underlined date to open the Tracked Events of the CMET tab on the patient record. The chain of events in the same category displays. In addition, there is hover help when you move your mouse over the date (for example, PAP SMEAR 139). |
| Results                     | The date of the result of the event. Hover help will describe where the result came from (V-RADIOLOGY, V-LAB).  |
| 2 - Finding(s)              | The icons indicate if the event has any findings.   |
| Interpretation              | The interpretation of the finding.  |
| 3 - Follow-up(s)            | The icon indicates if the event has follow-up data.   |
| 4 - Patient Notification(s) | The icon indicates if the event has any patient notification data.  |
| State                       | The state of the tracked event (Open or Closed).  |

When the **2 - Finding(s)** cell contains the following:

- The feather () icon indicates that the element is overdue; hover your mouse over the icon to view the due date (the tickler).
- The check () icon indicates that the step is complete; hover your mouse over the icon to view the finding due date and the finding value.
- Blank indicates that the element is not complete but is not overdue.

When the **3 - Follow-up(s)** cell contains the check icon, the step is complete; hover your mouse over the icon to view the follow-up date and the follow-up type. If it is blank, this indicates that the element is not complete but is not overdue.

When the **4 - 4-Patient Notification(s)** cell contains the check icon, the step is complete; hover your mouse over the icon to view the notification date and the notification method. If it is blank, this indicates that the element is not complete but is not overdue.

The **Results** column will display the date (Linked) if results have been mined during the nightly job. The data link will be the most recent result. However, help will describe where the result came from, for example, v-lab.

## Layout

Use the **Layout** function to determine the columns on the **Tracked Events** sub-tab for the current panel.

Select the **Layout** function by doing one of the following:

- Clicking the **Layout** ( **Layout**) button.
- Selecting **File | Layout**.
- Selecting **CMET | Tracked Events | Layout**.

This action accesses the **Tracked Events Layout** window.

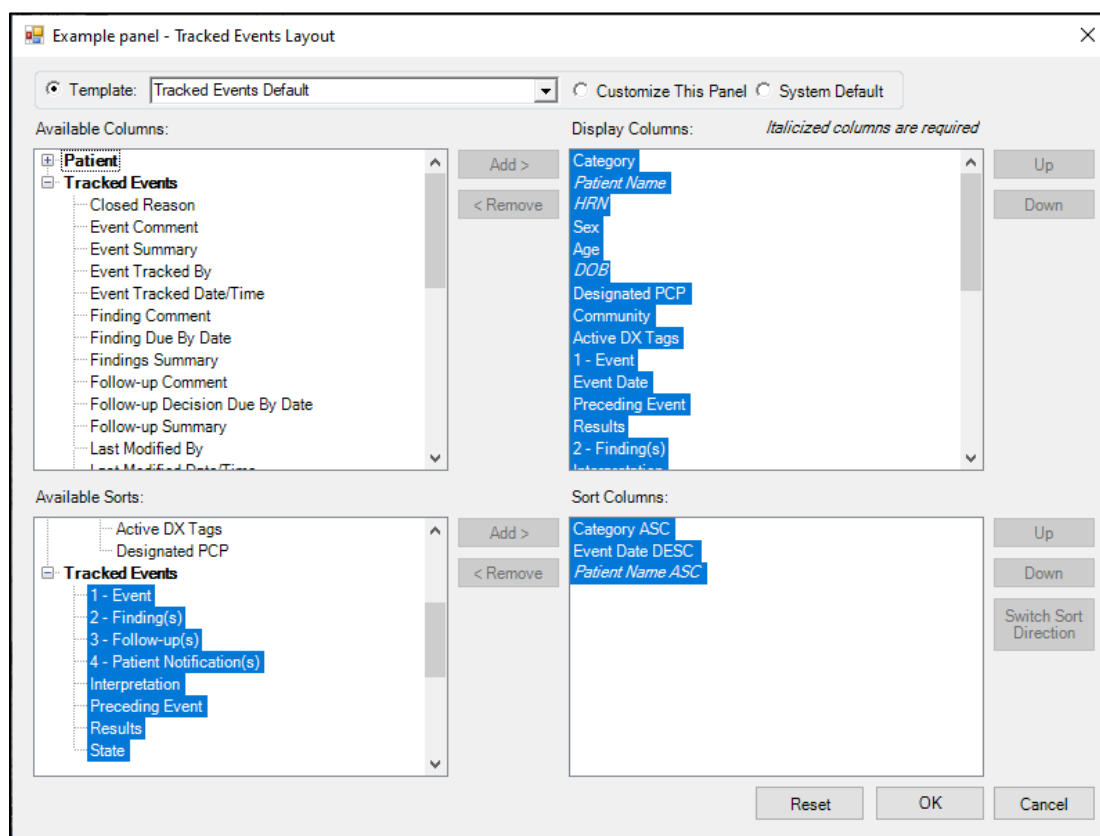

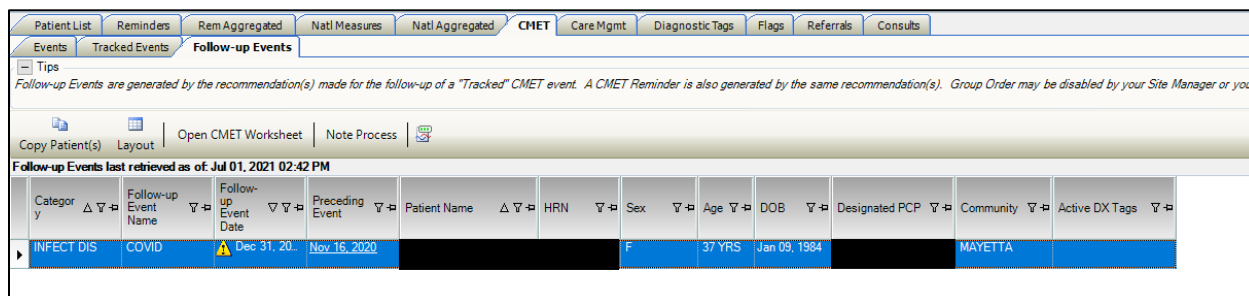

Figure 3-17: **Tracked Events Layout** window

Section 4.3.2 provides information about using the features of the **Layout** window.

### 3.6.3 Follow-up Events Sub-Tab

The **Follow-up Events** sub-tab contains what you want to do for follow-up. The follow-up events are generated by the recommendation(s) made for the follow-up of the Tracked CMET event.

| Category   | Follow-up Event Name | Follow-up Event Date | Preceding Event | Patient Name | HRN        | Sex | Age    | DOB          | Designated PCP | Community | Active DX Tags |
|------------|----------------------|----------------------|-----------------|--------------|------------|-----|--------|--------------|----------------|-----------|----------------|
| INFECT DIS | COVID                | Dec 31, 20           | Nov 16, 2020    | [REDACTED]   | [REDACTED] | F   | 37 YRS | Jan 09, 1984 | [REDACTED]     | MAYETTA   | [REDACTED]     |

Figure 3-18: Sample **Follow-up Events** sub-tab

The Follow-up Event Name and Date are pulled from step 3 of the CMET process. This is the provider's recommendation for follow-up. The date is the date due for the follow-up.

A CMET reminder is also generated by the same recommendation(s).

#### 3.6.3.1 Follow-up Events Tab Buttons

Each tab has a standard left-side group of buttons on the toolbar and a right-side group on the toolbar. See Section 2.1.2 for information on the right-side toolbar buttons.

##### Copy Patient(s)

Highlight patients and click the **Copy Patient(s)** button if there are patients to be copied to another panel.

##### Layout

See Section 3.6.3.2 for information about the **Event Layout** button.

##### Open CMET Worksheet

Refer to the *CMET User Manual*.

##### Note Process

Highlight patients and click the **Note Process** button if letters or notes are to be created for the selected patients. See Section 2.1.1.13 for more information on how the Note Process works.

### 3.6.3.2 Follow-up Events Sub-Tab Layout

The data on the **Follow-up Events** sub-tab is effective as of the date on the window.

Table 3-8 provides information about the columns.

Table 3-8: Follow-up Events sub-tab columns

| Column               | Meaning   |
|----------------------|---|
| Category             | The category for the Follow-up Event: Breast, Cervical, Colon, and Skeletal.  |
| Follow-up Event Name | The name of the event.  |
| Follow-up Event Date | The follow-up date for the event.   |
| Preceding Event      | Contains the date of the preceding event—double-click this underlined date to open the Follow-up Events of the CMET tab on the patient record. The chain of events in the same category displays. |
| Patient Name         | Required field that will link to the Follow-up Events sub-tab of the CMET tab on the patient record if you double-click the name.   |
| HRN                  | Patient's Health Record Number.   |
| Sex                  | F (for female) or M (for male)  |
| Age                  | The patient's age today.  |
| DOB                  | Patient's date of birth (required)  |
| Designated PCP       | Designated primary care provider, if any. Not all facilities use this field to empanel patients.  |
| Community            | Patient's community of residence.   |
| Active DX Tags       | Predefined Diagnosis definitions (tags) that iCare has proposed for this patient are based on the tagging function.   |

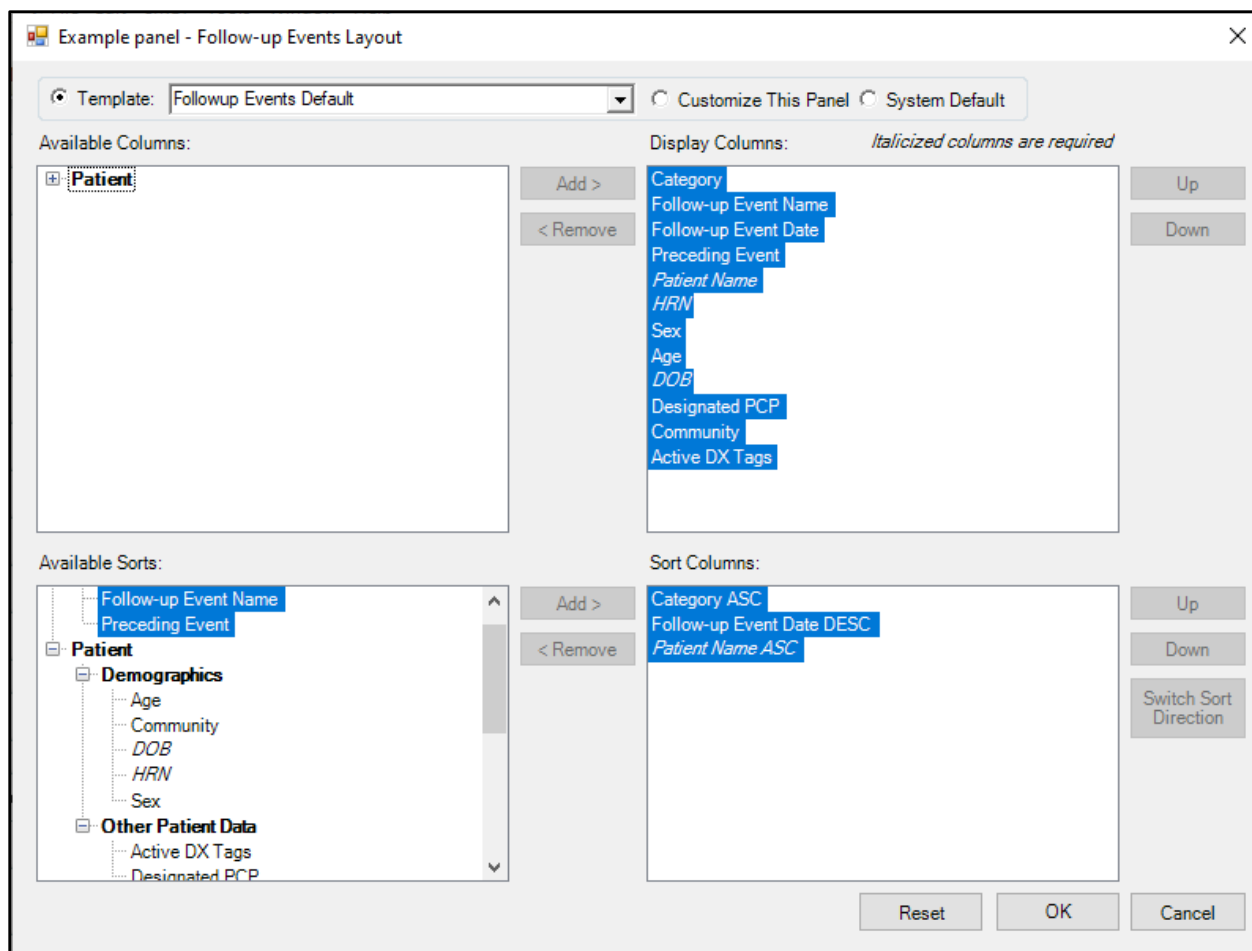

### Layout

Use the **Layout** function to determine the columns on the **Follow-up Events** sub-tab for the current panel.

Select the layout function by doing one of the following:

- Clicking the **Layout** () button.
- Selecting **File | Layout**.
- Selecting **CMET | Follow-up Events | Layout**.

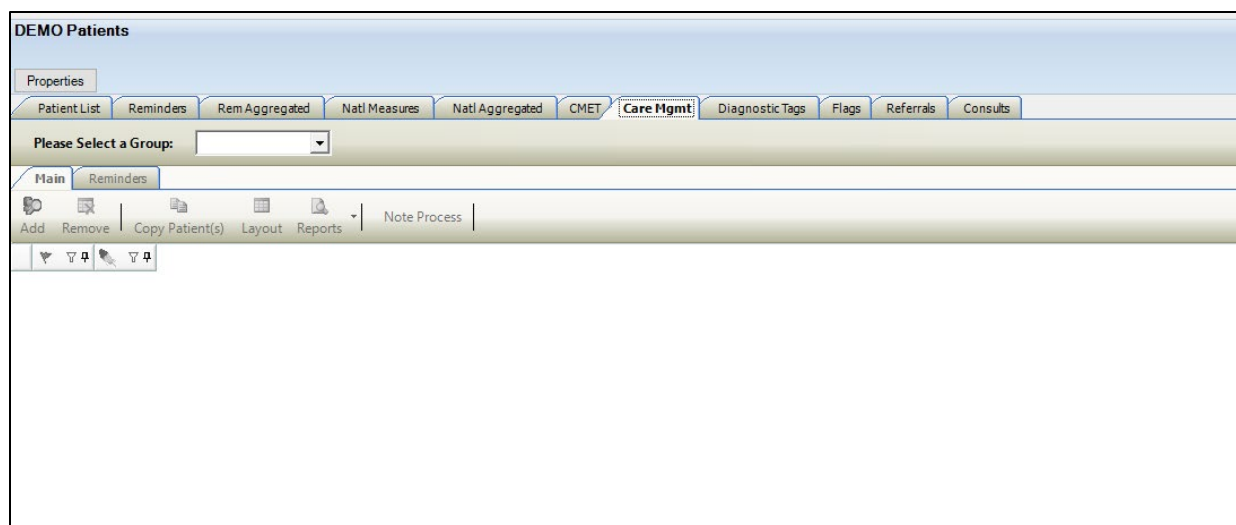

This action accesses the **Follow-up Events Layout** window.

Figure 3-19: **Follow-up Events Layout** window

Section 4.3.2 provides information about using the features of the **Layout** window.

### 3.7 Care Mgmt Tab

The **Care Mgmt** tab displays data related to various groups of patients in the panel.

Figure 3-20: Sample **Care Mgmt** tab

This tab displays information from the register (shown in the **Please Select a Group** field) for the patients in the panel. You must select an option for this field to view the data.

Figure 3-21: Various groups for the **Care Mgmt** tab

iCare provides you with specific underlying care management groups. The underlying RPMS application for the HIV/AIDS Register option is BKM.

The current list of Care Management groups are:

- Asthma
- Childhood Immun
- COPD
- COVID
- Diabetes
- DM Audit
- Hep C

- HIV/AIDS
- Immunizations
- Pain Management
- Pediatric
- Prenatal
- STI/STD

### 3.7.1 Main Sub-Tab

The **Main** sub-tab displays specific information about the patients in the panel. Each Care Mgmt group has its layout.

| <u>Panel View Tab</u>        |   | <u>Layout in Use</u>        |
|------------------------------|---|-----------------------------|
| <b>Care Mgmt Groups (CM)</b> |   |                             |
| <i>Asthma</i>                | <input type="button" value="Edit"/>     | Asthma Default              |
| <i>Childhood Immun</i>       | <input type="button" value="Edit"/>     | Childhood Immun Default     |
| <i>COPD</i>                  | <input type="button" value="Edit"/>     | COPD Default                |
| <i>COVID</i>                 | <input type="button" value="Edit"/>     | COVID Default               |
| <i>Diabetes</i>              | <input type="button" value="Edit"/>     | Diabetes Default            |
| <i>DM Audit</i>              | <input type="button" value="Edit"/>     | DM Audit Default            |
| <i>Hep C</i>                 | <input type="button" value="Edit"/>     | Hep C Default               |
| <i>HIV/AIDS</i>              | <input type="button" value="Edit"/>     | HIV/AIDS Default            |
| <br><i>Immunizations</i>     | <br><input type="button" value="Edit"/> | <br>Immunizations Default   |
| <br><i>Pain Management</i>   | <br><input type="button" value="Edit"/> | <br>Pain Management Default |
| <i>Pediatric</i>             | <input type="button" value="Edit"/>     | Pediatric Default           |
| <i>Prenatal</i>              | <input type="button" value="Edit"/>     | Prenatal Default            |
| <i>STI/STD</i>               | <input type="button" value="Edit"/>     | STI/STD Default             |

Figure 3-22: Layouts for the **Care Mgmt** tab

When you select a Care Mgmt group, the default layout will display.

| Patient Name           | HRN | Sex | Age | DOB | Designated PCP | Community   | Active DX Tags | Current C... | Current C... | Current C... |
|------------------------|-----|-----|-----|-----|----------------|-------------|----------------|--------------|--------------|--------------|
| DEMO.BARABARA          |     |     |     |     | TWELVE, TRAIN  | ALBUQUERQUE |                |              |              |              |
| DEMO.DANI              |     |     |     |     |                | ALBUQUERQUE |                |              |              |              |
| DEMO.DARLENE           |     |     |     |     |                | CORRALES    |                |              |              |              |
| DEMO.HAYDEN            |     |     |     |     |                | HOLTON      |                |              |              |              |
| DEMO.IMMUNIZATION BABY |     |     |     |     |                | ALBUQUERQUE |                |              |              |              |
| DEMO.JACKIE            |     |     |     |     |                | ALBUQUERQUE |                |              |              |              |
| DEMO.MARY              |     |     |     |     |                | ALBUQUERQUE |                |              |              |              |

Figure 3-24: Sample **Main** sub-tab view for HIV/AIDS

**Note:** The **Main** sub-tab displays for all groups. The **Reminders** sub-tab only displays for the HIV/AIDS group.

### 3.7.1.1 Main Sub-Tab Toolbar

Section 2.1.2 provides information about the buttons on the right side of the toolbar.

#### Add

Click the **Add** button if there are patients to be manually added to the panel.

## Remove

Highlight patients and click the **Remove** button if patients are to be manually removed from the panel.

## Copy Patient(s)

Highlight patients and click the **Copy Patient(s)** button if there are patients to be copied to another panel.

## Layout

See Section 3.4.4.1 for information about the **Natl Measures Layout** button.

## Note Process

Highlight patients and click the **Note Process** button if letters or notes are to be created for the selected patients. See Section 2.1.1.13 for more information on the Note Process.

## Main Sub-Tab Layout

Each default view displays the standard patient demographic columns (see Section A.1) plus columns unique to each group in a named default template. Columns are designated as required, default, or optional. Required columns cannot be removed from the layout. Default columns always display in the default view but can be removed from the layout. Optional columns do not display and must be added to the layout to be seen.

You can sort/filter the columns and perform other column functions.

### 3.7.1.2 Layout

Each Care Mgmt Group has specific columns for its layout. Each group has a default layout.

Click the **Layout** button (or select **Care Mgmt | Main | Layout**) to display the panel's columns layout.

Section 4.3.2 provides information about using the features of the layout window.

### 3.7.1.3 Additional Buttons

**Note:** The Additional buttons do not apply to those groups where there is no corresponding diagnostic tag, e.g., Hep C, Immunizations, and Pediatric.

You use the **Accept**, **Not Accept**, **Propose**, and **Add Tag** buttons to change the status on an existing record (or select **Care Mgmt | Main** to select a status to change).

Select the patient record whose status you want to change and click the appropriate **Status Change** button to display the **Update Diagnostic Tag** dialog.

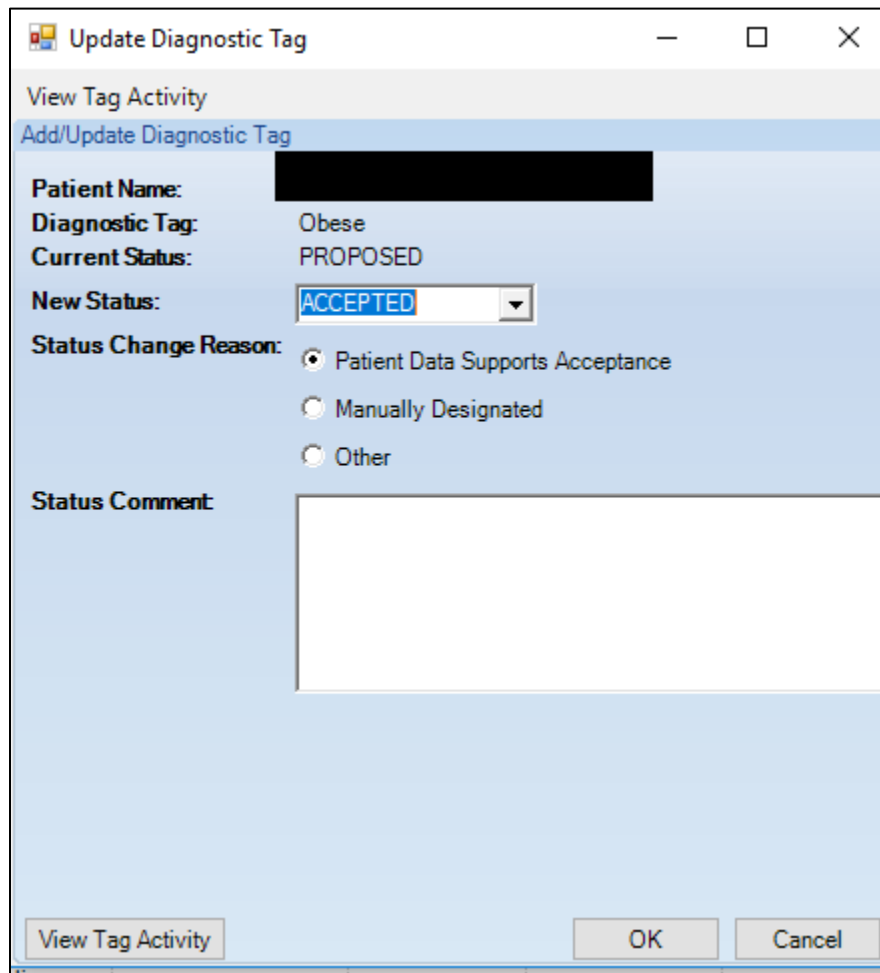

Figure 3-25: Sample **Update Diagnostic Tag** dialog

All fields are required for this dialog.

The available **Status Change Reason** option buttons change according to what you select in the **New Status** field.

The **Not Accept** function cannot be performed on multiple patients or tags.

Section 3.10.3 provides information about the fields and the **View Tag Activity** button on this dialog.

### 3.7.1.4 Add Tag

**Note:** The **Add Tag** button does not apply to Hep C, Immunizations, and Pediatric groups since there is no corresponding diagnostic tag.

Select a patient to whom you want to add a tag, then click the **Add Tag** () button (or select **Care Mgmt | Main | Add Tag**) to display the **Add Diagnostic Tag** dialog. This manual add allows a provider to manually assign one or more diagnosis tags to patients that did not meet the tag's criteria for being proposed automatically. Section 3.10.2.3 provides information about using the **Add Tag** button.

### 3.7.1.5 Update

**Note:** The **Update** button applies to the HIV/AIDS group only.

Batch update register data for selected patients by clicking the **Update** () button (or by selecting **Care Mgmt | Main | Update**). The **Batch Update Data** dialog will display. Refer to the *HIV Management System User Manual* for more information.

### 3.7.1.6 Reports Button

**Note:** The **Reports** button applies to the HIV/AIDS group only.

Select one or more patients and click the drop-down list on the **Reports** () button to view the Quality of Care report (or select **Care Mgmt | Main | Reports**). The reports define their scope based on the patients of a given panel.

Refer to the *HIV Management System User Manual* for more information.

## 3.7.2 Reminders Sub-Tab for HIV/AIDS Register

The **Reminders** sub-tab view displays the disease/register-specific reminders for the patient. Refer to the *HIV Management System User Manual* for more information.

## 3.8 Diagnostic Tags Tab

The **Diagnostic Tags** tab provides a comprehensive view of all tag history for a patient (regardless of the tag status), provides auto-accept and auto-reject capabilities, allows the user to accept proposed tags for multiple patients, allows the user to reject proposed tags, and allows the user to update a tag status.

Selected Rows: 1 Visible Rows: 63 Total Rows: 63

Figure 3-26: Sample **Diagnostic Tags** tab

Tags identified through iCare's execution of the pre-defined tag criteria will start with an initial tag status of **PROPOSED**. From there, you have several options, including accepting not accepting a tag's validity for any patient. These statuses are editable from within this tab.

### 3.8.1 Diagnostic Tags Tab Layout

Table 3-10 provides information about the columns.

Table 3-9: Diagnostic Tags tabs columns

| Column       | Meaning   |
|--------------|---|
| Patient Name | Required field that will link to the patient record if you double-click the name.   |
| HRN          | Patient's Health Record Number.   |
| DOB          | Patient's date of birth.  |
| Age          | Patient's age.  |
| Tag Name     | The name of the tag for the patient.  |
| Status       | <p>ACCEPTED means the patient is a member of specified formal case management registers with the status of Active, Deceased, Transient, Non-IHS, Lost to Follow-Up, or Noncompliant.</p> <p>PROPOSED means the patient has the status Un-reviewed or Inactive in the register.</p> <p>NO LONGER VALID: The RPMS data no longer supports the tag.</p> <p>SUPERCEDED means the level of the tag has gone to a higher level.</p> |

| Column               | Meaning   |
|----------------------|---|
| Status Change Reason | The reason the status changed can be System Generated (system), RPMS Data No Longer Supports Tab (system), Patient Data Does Not Support Acceptance (user), Manually Designated (user), Other (user—with required comment field), on Existing RPMS Register (system). |
| Status Comment       | The text of any comments entered about the status change (used with the Other status change reason).  |
| Last Updated         | The date the content of the panel was last updated by a manual (user) repopulate, by an auto-repopulate, or the panel created date if the panel has never been repopulated.   |
| Last Updated By      | The name of the user who either created or last repopulated the panel (in some instances, it may contain the name of a process like SYSTEM UPDATE instead of a person).   |

There is hover help for the **Tag Name** cell that shows the tag's name.

Double-click any record to go to the **Diagnostic Tags** tab of the **Patient Record** window.

You can find information about all the tags in the **Diagnostic Tag Glossary** (select **Help | Diagnostic Tag Glossary**).

You can sort/filter the columns and perform other functions on the columns.

### 3.8.2 Diagnostic Tags Toolbar

The toolbar shows the date/time for which the data is effective.

iCare will classify tags into one of five statuses: proposed (pending) (P), accepted (A), not accepted (NA), no longer valid (NLV), and superseded (S). Those tags with a classification of NA will not display.

Section 2.1.2 provides information about the buttons on the right side of the toolbar.

#### 3.8.2.1 Add

Click the **Add** button if there are patients to be manually added to the panel.

#### 3.8.2.2 Remove

Highlight patients and click the **Remove** button if patients are to be manually removed from the panel.

#### 3.8.2.3 Copy Patient(s)

This action copies the patient's information to the clipboard.

Select one or more patients and then do one of the following:

- Click the **Copy Patient(s)** () button.
- Select **Diagnostic Tags | Copy Patient(s)**.
- Use the keyboard combination **Ctrl+C**.

You must go to another panel view (for a different patient panel) and paste the patient's information.

#### 3.8.2.4 Note Process

Highlight patients and click the **Note Process** button if letters or notes are to be created for the selected patients. See Section 2.1.1.13 for more information on the Note Process.

#### 3.8.2.5 Change Status

You use the **Accept**, **Not Accept**, and **Proposed** buttons to change the status on an existing record (or select **Care Mgmt | Main** to select a status to change). Section 3.9.1.5 provides information about using these buttons.

#### 3.8.2.6 Add Tag

Select a patient to whom you want to add a tag, then click the **Add Tag** () button (or select **Diagnostic Tags | Add Tag**) to display the **Add Diagnostic Tag** dialog. This manual add allows a provider to manually assign one or more diagnosis tags to patients that did not meet the tag's criteria for being proposed automatically.

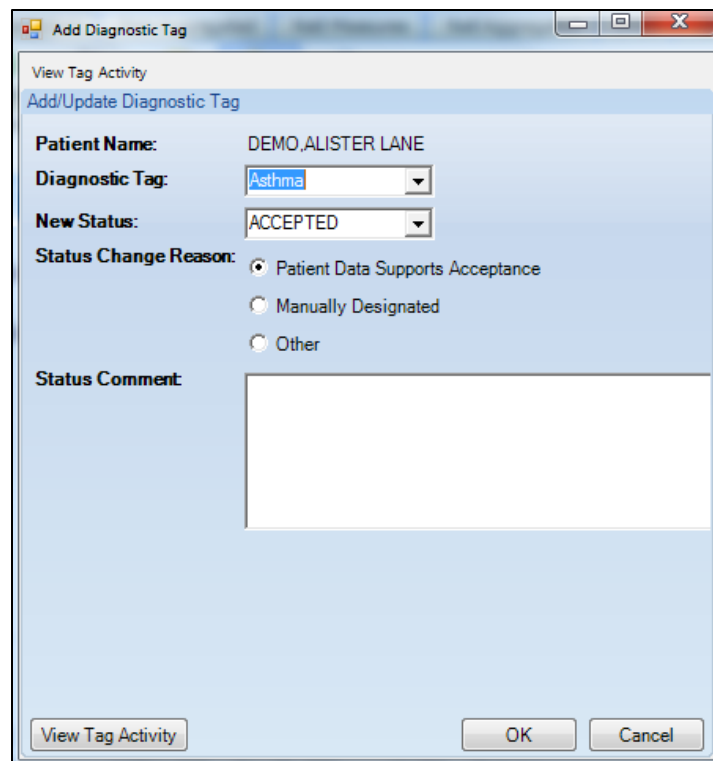

The image shows a Windows-style dialog box titled "Add Diagnostic Tag". It has a standard title bar with minimize, maximize, and close buttons. The dialog is divided into two sections. The top section, "View Tag Activity", contains a link "Add/Update Diagnostic Tag". Below this, there are four labeled fields: "Patient Name:" with the text "DEMO,ALISTER LANE"; "Diagnostic Tag:" with a dropdown menu showing "Asthma"; "New Status:" with a dropdown menu showing "ACCEPTED"; and "Status Change Reason:" with three radio button options: "Patient Data Supports Acceptance" (which is selected), "Manually Designated", and "Other". The bottom section, "Status Comment:", contains a large empty text area. At the bottom of the dialog are three buttons: "View Tag Activity", "OK", and "Cancel".

Figure 3-27: **Add Diagnostic Tag** dialog

This dialog shows information about the patient named in the **Patient Name** field (the one you selected).

After completing the dialog, click **OK** to add the information to the **Diagnostic Tags** tab on the **Panel View**. (Otherwise, click **Cancel**.)

### 3.8.2.7 Tag Activity

You can view existing tag activity about the patient by clicking the **View Tag Activity** button. The **Diagnostic Tag Activity** pop-up displays. Section 3.10.3 provides more information about this pop-up.

### 3.8.2.8 Fields on Add Diagnosis Tag Dialog

All fields are required.

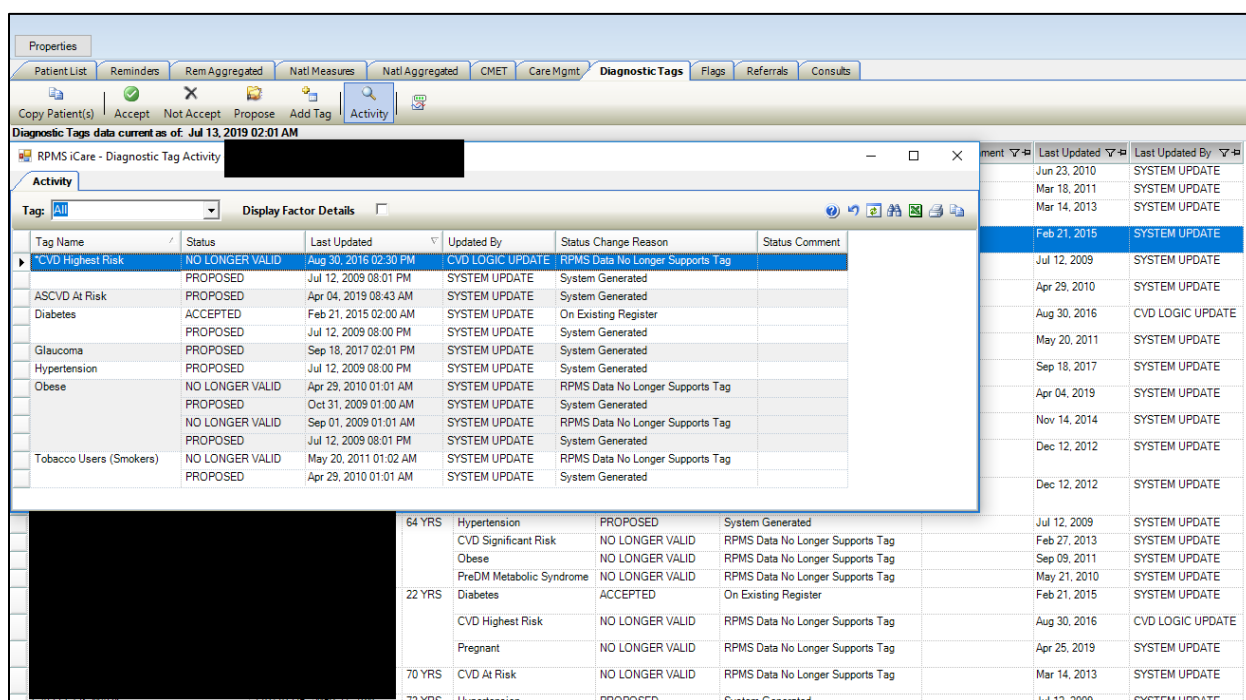

- **Patient Name:** The patient's name to add tag information (application populated).
- **Diagnostic Tag:** The diagnostic tag to add for the patient. Select an option from the drop-down list to populate this field.
- **New Status:** The status of the tag being added.
  - **ACCEPTED:** This option allows you to accept a proposed tag to provide an affirmation of its validity for a given patient.

- **NOT ACCEPT:** This option allows you to disapprove or not accept a diagnostic tag proposed for a patient.
- **PROPOSED:** This option allows you to change the status of a diagnosis tag back to Proposed so that further review can occur.
- **Reason:** Click the appropriate reason for adding the tag.
  - **Patient Data Supports Acceptance:** Use this when the patient data does support the tag.
  - **Manually Designated:** Use this to change the tag status manually.
  - **Other:** Use this when the other reasons do not fit.
- **Status Comment:** Type the reason for the change in this free text field. This feature provides a rich audit history for reasons for providers' decisions to accept or not accept proposed tag assignments.

### 3.8.3 Activity

View existing tag activity for the selected patient by clicking the **Activity** button

() on the **Panel View** toolbar (or selecting **Diagnostic Tags | Activity**). The **RPMS iCare - Diagnostic Tag Activity** pop-up displays. This is a view-only pop-up. Multiple people can enter the tags, so this pop-up shows all the activity.

| Tag Name                | Status          | Last Updated          | Updated By       | Status Change Reason             | Status Comment |
|-------------------------|-----------------|-----------------------|------------------|----------------------------------|----------------|
| CVD Highest Risk        | NO LONGER VALID | Aug 30, 2016 02:30 PM | CVD LOGIC UPDATE | RPMS Data No Longer Supports Tag |                |

Figure 3-28: Sample Diagnostic Tags **Activity** pop-up

Section 2.1.2 provides information about the buttons on the right side of the toolbar.

Click the **Glossary** () button to display the Diagnostic Tag Glossary.

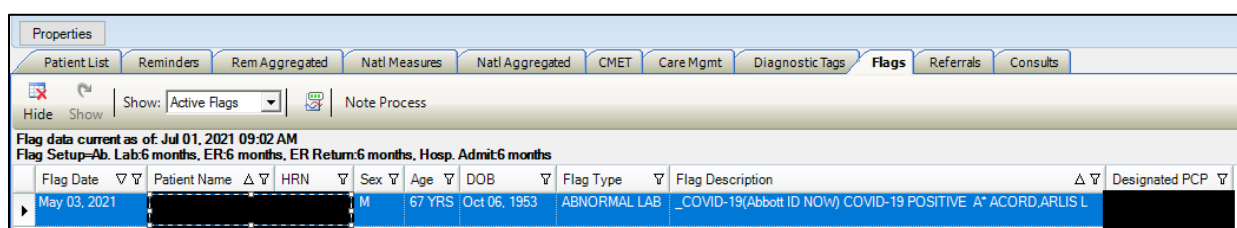

You can sort/filter the columns and perform other functions on the columns.

You can view various tags by selecting from the drop-down list for the **Tag** field.

If you select the **Display Factor Details** check box, the following columns will display: **Factor**, **Date**, **Item**, and **Value**. This allows you to view additional details about the tags. The default view is unchecked. You must dismiss the pop-up.

## 3.9 Flags Tab

The **Flags** tab of the panel view displays the flags for the patients in the open panel.

| Flag Date    | Patient Name | HRN        | Sex | Age    | DOB          | Flag Type    | Flag Description  | Designated PCP |
|--------------|--------------|------------|-----|--------|--------------|--------------|---|----------------|
| May 03, 2021 | [REDACTED]   | [REDACTED] | M   | 67 YRS | Oct 06, 1953 | ABNORMAL LAB | _COVID-19(Abbott ID NOW) COVID-19 POSITIVE A* ACORD,ARLIS L | [REDACTED]     |

Figure 3-29: Sample **Flags** tab

The **Flags** tab displays the flag type shown in the **Show** field.

You can change the default flag display by changing the flag settings under User Preferences.

Double-click any record on this tab to go to the **Flags** tab of the **Patient Record** window.

### 3.9.1 Flags Tab Layout

The default display lists the flags alphabetically by flag date (most recent first), patient name, and then flag type. No duplicate values display in the first column. This means if a particular date has more than one flag, the date will display only on the first row.

The iCare application will display an initial list of flags at first login only for the timeframe defined in the User Preferences. Likewise, you can change the flag view to display modified flag types or timeframes if you change the User Preferences. After changing the flag settings in User Preferences, refresh the flag view.

You can sort/filter the columns and perform other functions on the columns.

Table 3-10 provides information about the columns.

Table 3-10: Flags tab columns

| Column           | Meaning   |
|------------------|---|
| Flag Date        | The date the flag became active, e.g., the hospital admission date.                                 |
| Patient Name     | If you double-click the name, this field is required and will link to the patient's patient record. |
| HRN              | Patient's Health Record Number.   |
| Sex              | Either F (for Female) or M (for Male)   |
| Age              | Patient's age.  |
| DOB              | Patient's date of birth.  |
| Flag Type        | This can be Abnormal Lab Values, ER Visits, Unanticipated ER Return Visits, and Hospital Visits.    |
| Flag Description | A brief description of the event that caused the trigger.   |
| Designated PCP   | Designated primary care provider, if any. Not all facilities use this field to empanel patients.    |

The Flag Type column contains various flag types, as defined in Table 3-11.

Table 3-11: Flag types

| Flag Type                     | Meaning   |
|-------------------------------|---|
| Abnormal Lab Values Alert     | Based on the Kernel Alerts component, this flag type informs the user when a patient has abnormal lab values within a user-defined timeframe. The Abnormal Lab Values alerts, generated from the RPMS Laboratory application, reside in the Kernel Alerts component. Suppose the ALV alert is closed by the provider in Kernel Alerts. In that case, it will no longer display in iCare, regardless of the Flag Display Timeframe the user selects in the User Preferences. |
| ER Visit                      | This flag type informs the user when a patient has an emergency room visit within a user-defined timeframe. This flag is generated directly by iCare. ER visits (clinic code 30) are the trigger for this flag.   |
| Unanticipated ER Return Visit | This flag type informs the user when a patient has an emergency room visit designated as unanticipated within a user-defined timeframe. This flag is generated directly by iCare. ER visits (clinic code 30) with the Visit type Unscheduled Revisit is the trigger for this flag.  |
| Hospital Admission            | This flag type informs the user when a patient has a hospital visit within a user-defined timeframe. This flag is generated directly by iCare. Any visit with service category H where the discharge date is not the same day as the admission date is the trigger for this flag.   |

### 3.9.2 Flags Tab Toolbar

The text above the grid shows the flag setup information and how current the data is.

### 3.9.2.1 Show Field

The option selected on the **Show** field determines which flags display in this window. The choices are as follows:

- **Active Flags:** Active is defined as a flag that has not expired and has not been hidden by the users.
- **Hidden Flags:** The flags specified to be hidden using the **Hide** button.
- **All Flags:** All flags are hidden as well as active.

### 3.9.2.2 Hide

Hide a highlighted row in the Flag List grid by doing any of the following:

- Clicking the **Hide** () button.
- Selecting **File | Flags | Hide**.
- Selecting the **Hide** option on the context menu.
- Pressing F3 on your keyboard.

View hidden flags by selecting the **Hidden Flags** option on the **Show** field.

### 3.9.2.3 Show

If you need a hidden flag to re-appear in the current view, select it from the list on the **Hidden Flags** option (from the **Show** field) and do any of the following:

- Click the **Show** () button.
- Select **File | Flags | Show**.
- Select the **Show** option on the context menu.
- Press F4 on your keyboard.

### 3.9.2.4 Note Process

Highlight patients and click the **Note Process** button if letters or notes are to be created for the selected patients. See Section 2.1.1.13 for more information on the Note Process.

### 3.9.2.5 Status of Background Jobs

To check on the status of the background jobs, do one of the following:

- Click the **Background Jobs** () button.
- Select **File | Background Jobs**.

This action accesses the **RPMS iCare - Background Jobs** window. Section 4.1.1 provides information about this window.

### 3.9.3 Flags Tab Menu Options

The options on the **File** and **Tools** menus are the same as those on the **Patient List** tab. Section 4.0 provides more information about these menus.

The **Flags** menu is only available when the **Flags** tab is selected. The **Hide** and **Show** options work like the **Hide** and **Show** action buttons. The **Refresh** option refreshes the flag display to show the most recent changes.

## 3.10 Referrals Tab

The **Referrals** tab displays referral data for the panel of patients.

| Patient Name | HRN | Sex | Age    | DOB          | Designated PCP | Community         | Active DX Tags | Referral Date | Referral #    | Referring Provider | Status | Facility Referred To   | Patient Type | Referral Type |
|--------------|-----|-----|--------|--------------|----------------|-------------------|----------------|---------------|---------------|--------------------|--------|------------------------|--------------|---------------|
|              |     | F   | 41 YRS | Jan 01, 1980 |                | ALBUQUERQUE       |                | Feb 22, 2016  | 2021011600009 | HISTIA AMAND A     | ACTIVE | ABC VENDOR             | OUTPATIENT   | CHS           |

Figure 3-30: Sample **Referrals** tab

### 3.10.1 Referrals Tab Layout

The default view displays the standard patient demographic columns (see Figure 3-30) plus specific Referral columns.

Table 3-12: Referrals tab

| Column             | Information                                     |
|--------------------|---|
| Individual columns | There are individual columns for each referral. |

Double-click any row in the grid to access the **Referrals** tab of the **Patient Record** window.

The default sort order is alphabetical by patient name.

You can sort/filter the columns and perform other functions on the columns.

### 3.10.2 Referrals Tab Toolbar

The toolbar shows the date/time for which the data is effective.

Section 2.1.2 provides more information about the buttons on the right side of the toolbar.

#### 3.10.2.1 Add

Click the **Add** button if there are patients to be manually added to the panel.

#### 3.10.2.2 Remove

Highlight patients and click the **Remove** button if patients are to be manually removed from the panel.

#### 3.10.2.3 Copy

Highlight patients and click the **Copy** button if patients are to be copied to another panel.

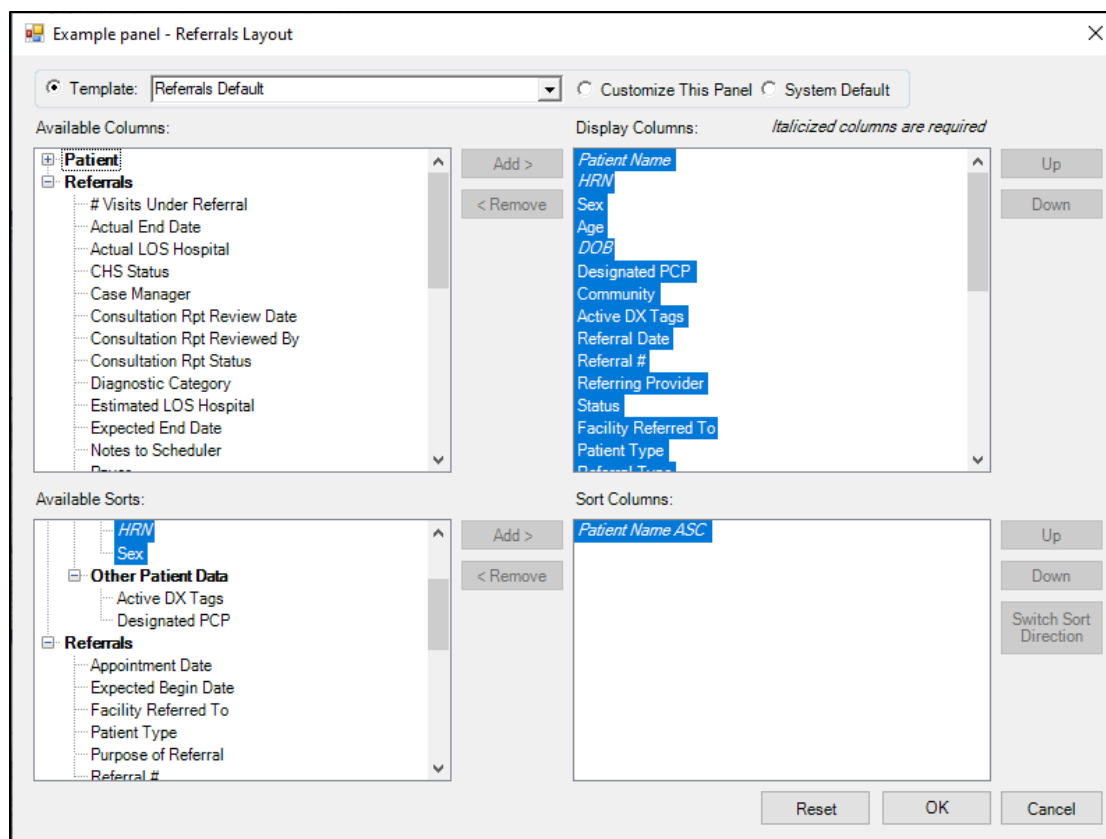

#### 3.10.2.4 Layout

The **Layout** function determines which referral columns to display for the current panel and the order and sorting that should be used.

To change the layout, do one of the following:

- Click the **Layout** () button.
- Select **Referrals | Layout**.

The **Referrals Layout** screen will display for the current panel. Select the **Referrals** columns you want to display on your panel.

Figure 3-31: **Referrals Layout** window

Section 4.3.2 provides information about manipulating the columns of the view.

### 3.10.2.5 Note Process

Highlight patients and click the **Note Process** button if letters or notes are to be created for the selected patients. See Section 2.1.1.13 for more information on the Note Process.

## 3.11 Consults Tab

The **Consults** tab displays consult data for the panel of patients.

| Patient List   Reminders   Rem Aggregated   Natl Measures   Natl Aggregated   CMET   Care Mgmt   Diagnostic Tags   Flags   Referrals   Consults |     |     |         |              |                  |              |                               |              |             |         |                  |              |              |              |

Figure 3-32: Sample **Consults** tab

### 3.11.1 Consults Tab Layout

The default view displays the standard patient demographic columns (see Figure 3-32) plus specific Consult columns.

Table 3-13: Consults tab

| Column             | Information                                    |
|--------------------|--|
| Individual columns | There are individual columns for each consult. |

Double-click any row in the grid to access the **Consults** tab of the **Patient Record** window.

The default sort order is alphabetical by patient name.

You can sort/filter the columns and perform other functions on the columns.

### 3.11.2 Consults Tab Toolbar

The toolbar shows the date/time for which the data is effective.

Section 2.1.2 provides more information about the buttons on the right side of the toolbar.

### 3.11.2.1 Add

Click the **Add** button if there are patients to be manually added to the panel.

### 3.11.2.2 Remove

Highlight patients and click the **Remove** button if patients are to be manually removed from the panel.

### 3.11.2.3 Copy

Highlight patients and click the **Copy** button if patients are to be copied to another panel.

### 3.11.2.4 Layout

The **Layout** function determines which consult columns to display for the current panel and the order and sorting that should be used.

To change the layout, do one of the following:

- Click the **Layout** () button.
- Select **Consults | Layout**.

The **Consults Layout** screen will display for the current panel. Select the **Consults** columns you want to display on your panel.

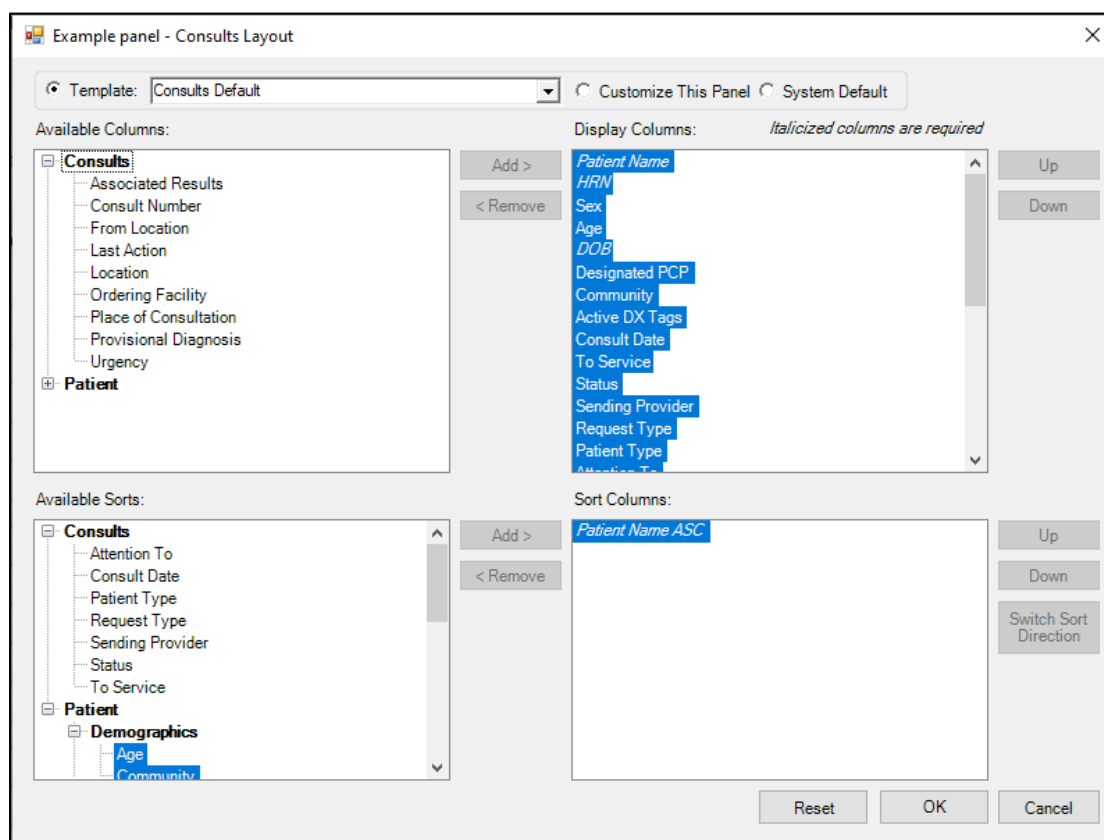

Figure 3-33: **Consults Layout** window

Section 4.3.2 provides information about manipulating the columns in the layout.

### 3.11.2.5 Note Process

Highlight patients and click the **Note Process** button if letters or notes are to be created for the selected patients. See Section 2.1.1.13 for more information on the Note Process.

## 3.12 Definition Details

The **Definition Details** tab displays certain types of data based on the panel definition for the panel of patients. Suppose the panel is defined using Allergies, Scheduled Appts, CPT, Exams, ER, High Risk/Immunocompromised Conditions, Health Factors, Immunizations, Inpatient, Labs, Measurements, Medications, Notes, Orders, Patient Education, POV, Problems, Reminders, Visits, or Waitlists. In that case, an additional **Definition Details** tab will be visible in Panel View.

Figure 3-34: **Definition Details** display

The **Definition Details** tab will generally be before the **Referrals** and the **Consults** tab. If the Panel Definition has only one of the above-listed groups, it will automatically default when clicking on the **Definition Details** tab.

Figure 3-35: **Definition Details** default of Medications

Otherwise, you must select the group to see the detailed information.

Figure 3-36: **Definition Details** for Exams and Measurements

### 3.12.1 Definition Details Layout

The default view displays the standard patient demographic columns (see Figure 3-34) plus selected individual columns for the group.

Table 3-14: Definition details

| Column             | Information   |
|--------------------|---|
| Individual columns | There are individual columns for each Definition Details group. |

Double-click any row in the grid to access the patient record for the selected patient.

The default sort order is alphabetical by patient name.

You can sort/filter the columns and perform other functions on the columns.

### 3.12.2 Definitions Detail Toolbar

Section 2.1.2 provides more information about the buttons on the right side of the toolbar.

The standard buttons for the Definitions Detail toolbar are **Copy Patient(s)**, **Layout**, **Note Process**, and **Background Job**.

Figure 3-37: Definition Details toolbar

Reminder Notifications has an additional button, **Notification Process**.

Figure 3-38: Definition Details toolbar for reminder notifications

#### 3.12.2.1 Copy Patient(s)

This action copies the patient's information to the clipboard.

#### 3.12.2.2 Layout

The **Layout** function determines which Definition Details columns to display for the current panel and group, and the order and sorting that should be used.

Each group has its list of columns.

To change the layout, do the following:

- Select the group.
- Click the **Layout** button.

The appropriate **Group Layout** screen will display for the current panel. You can select the **Group** columns you want to display on your panel.

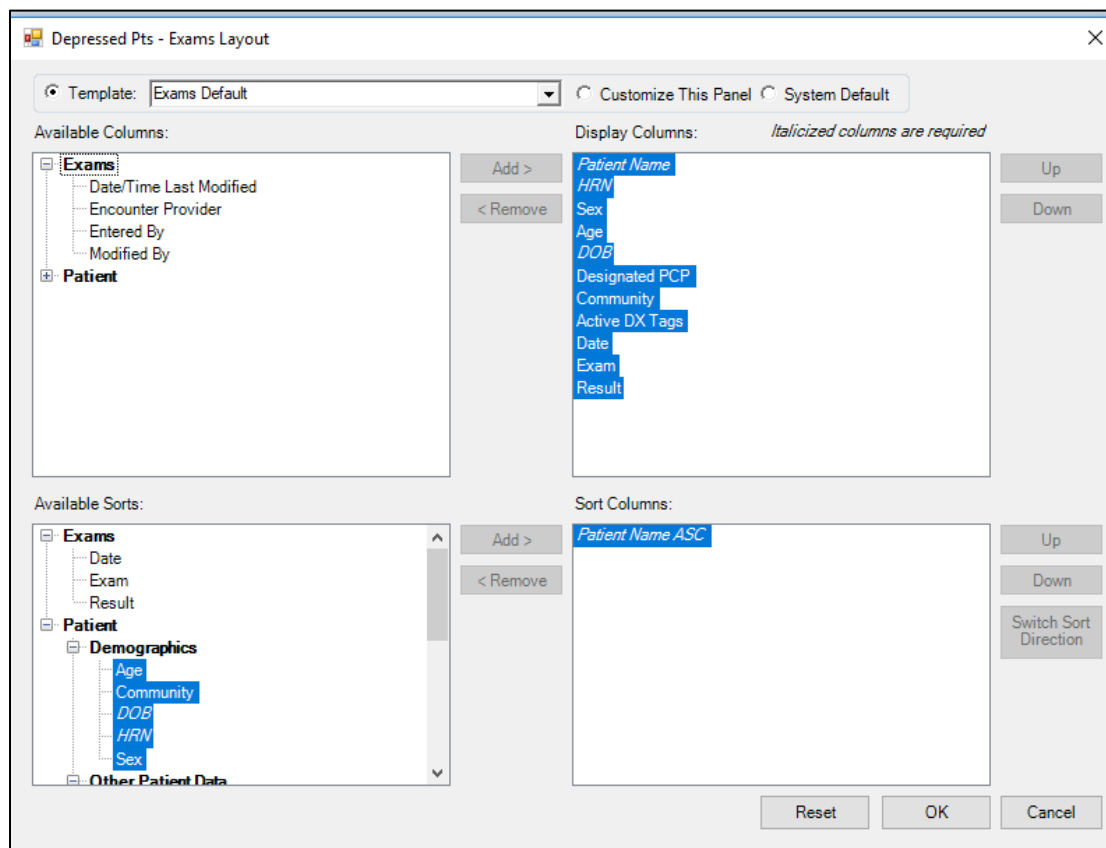

Figure 3-39: **Exams Layout** dialog

### 3.12.2.3 Note Process

The **Note Process** function allows the user to create a letter or phone note for the selected patients. The default is LETTER. To use the **Note Process** function, the user must have an electronic signature set up in RPMS and default telephone and letter clinics set up in User Preferences; see Section 4.3.1. See Section 3.12.2.2 for more information on letters and notes.

### 3.12.2.4 Notification Process

To use the **Notification Process** function, the user must have an electronic signature set up in RPMS and default telephone and letter clinics set up in User Preferences. See Section 4.3.1 for more information.

Select the patients for the notification process and click the **Notification Process** button.

OK Cancel

Figure 3-40: **Reminder Notification** window

The **Notification Type** field defaults to PHONE. The current selections are **PHONE**, **EMAIL**, and **LETTER**. Currently, only PHONE and LETTER work. Selecting EMAIL will gray out the **Create** button.

Click the **Create** button. You can manually write a note or use an existing TIU template to generate a note.

### TIU Note Fields

The default view displays the fields in the following order:

Table 3-15: TIU Note field

| Column           | Information  |
|------------------|--|
| Document Title   | Required field   |
| Subject          | Subject of the note.   |
| Show Templates   | Check the box when checked, which allows the user to use My Templates or Shared Templates. |
| My Templates     | Templates set up in EHR that only the user can access.                                     |
| Shared Templates | Templates set up in EHR that all users can access.   |

Work with your EHR CAC to help set up templates and discuss which document title is best for Reminder Notifications.

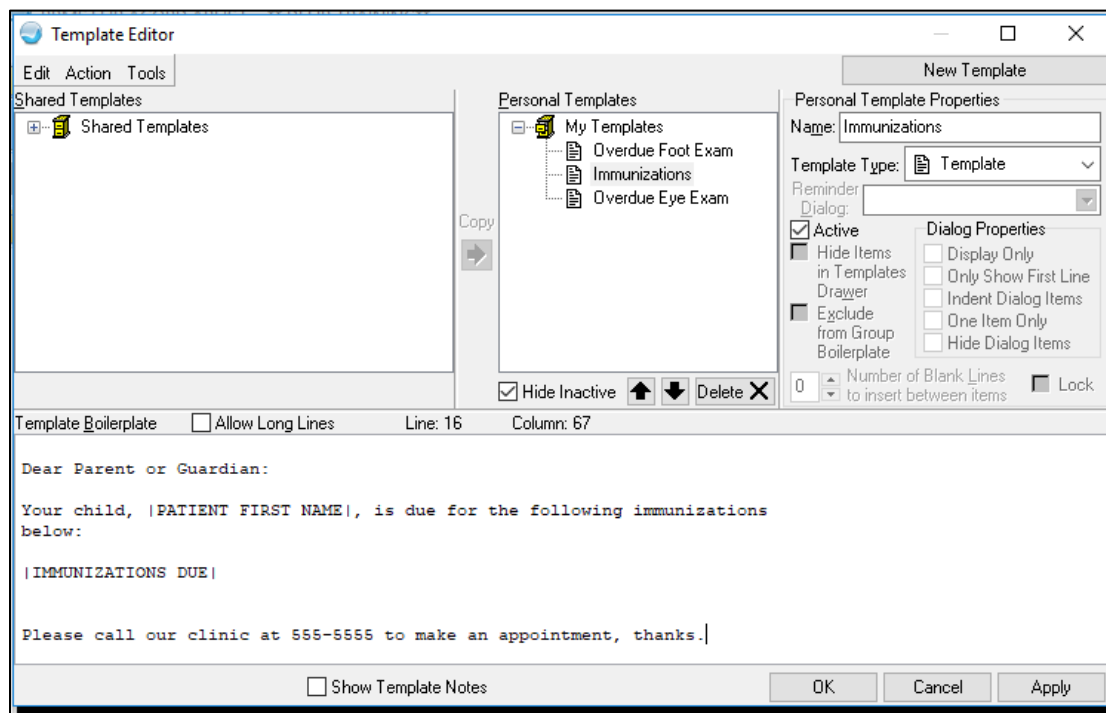

Figure 3-41: TIU Template layout

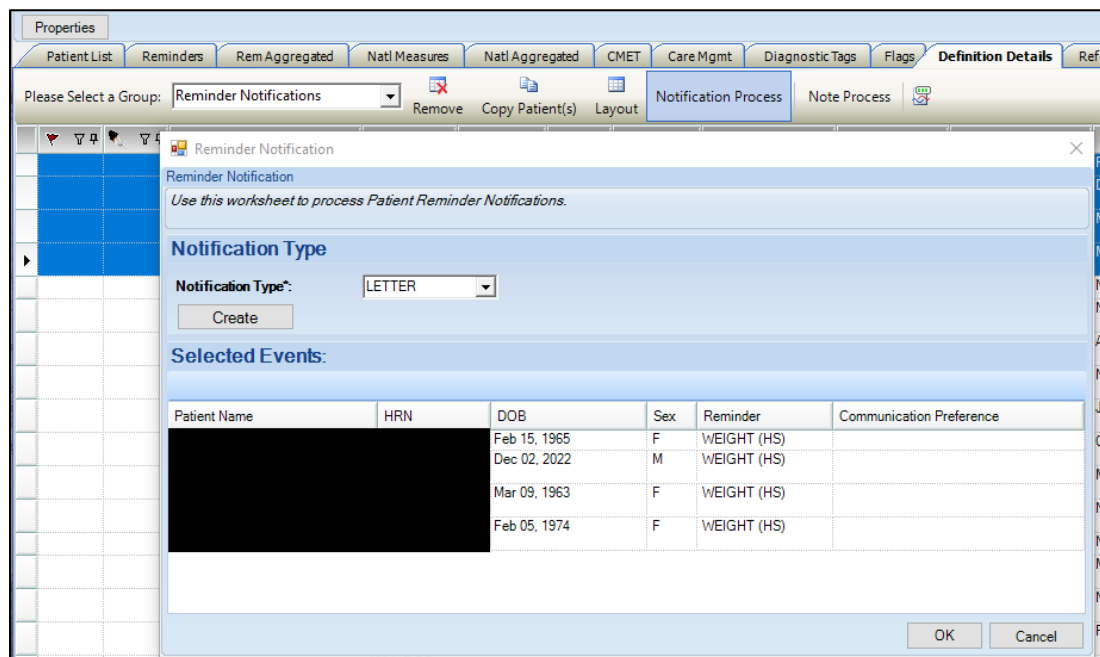

Figure 3-42: Patient selection

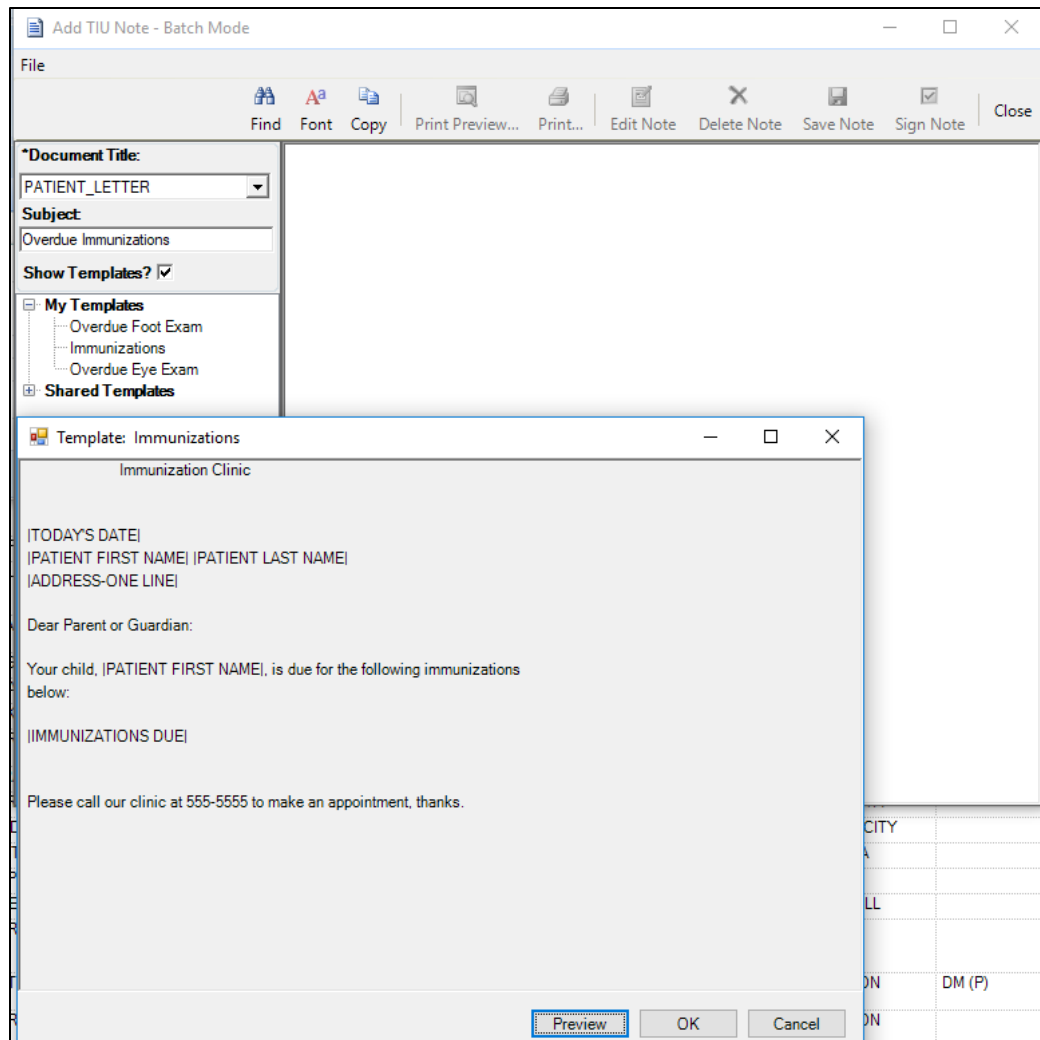

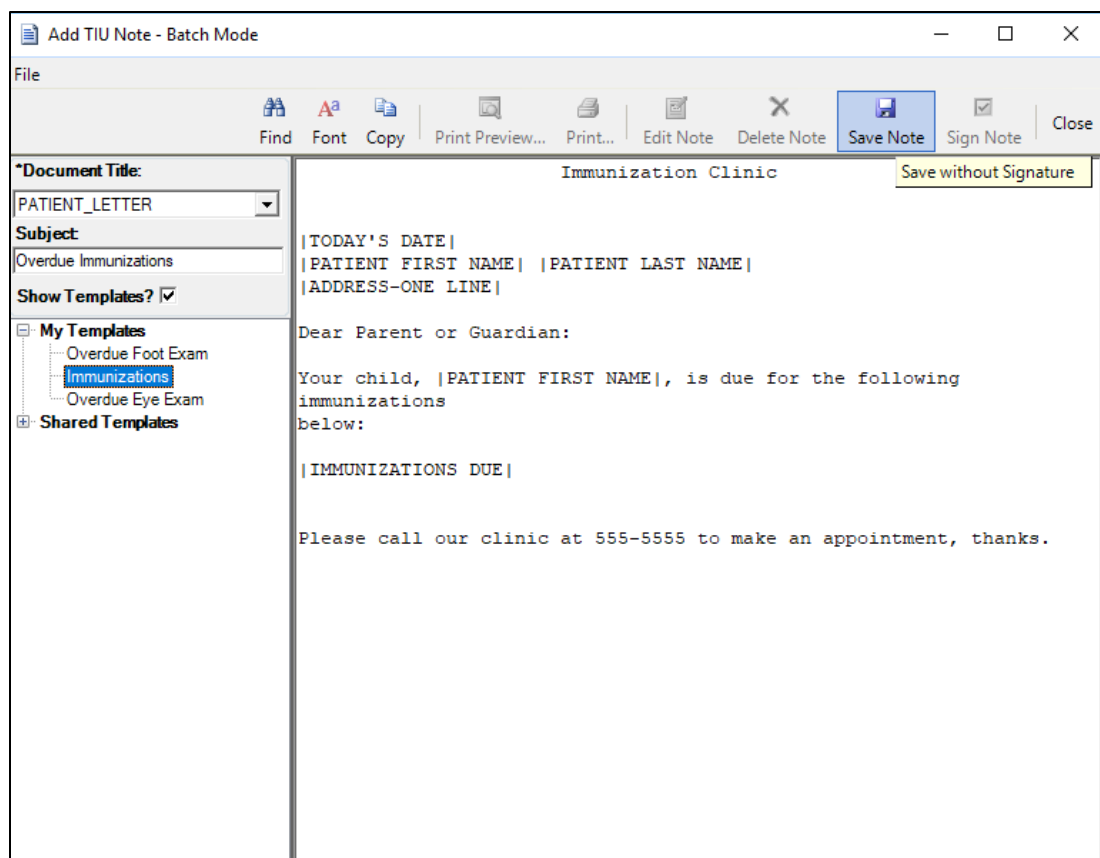

Figure 3-43: Document selection

Figure 3-44: Template selection and **Save Note** button

Once the **Save Note** button is no longer highlighted, it takes you back to the patient selection screen, where you click **OK**. You will be asked to confirm. At any time, you can click **Cancel** to exit.

Figure 3-45: Save confirmation message

Click **OK**, and you will be prompted to enter your electronic signature. You can still cancel at this point, and nothing will be saved.

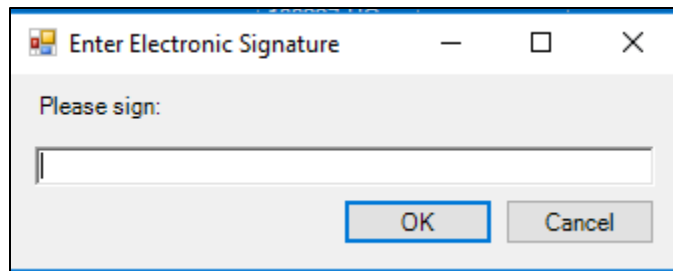

Figure 3-46: **Enter Electronic Signature** window

Once an electronic signature is entered, the document is saved for every selected patient. You will be asked if you want to print the notes.

Figure 3-47: **Print TIU Notes** confirmation

You can print preview the notes and then select a printer to print them.

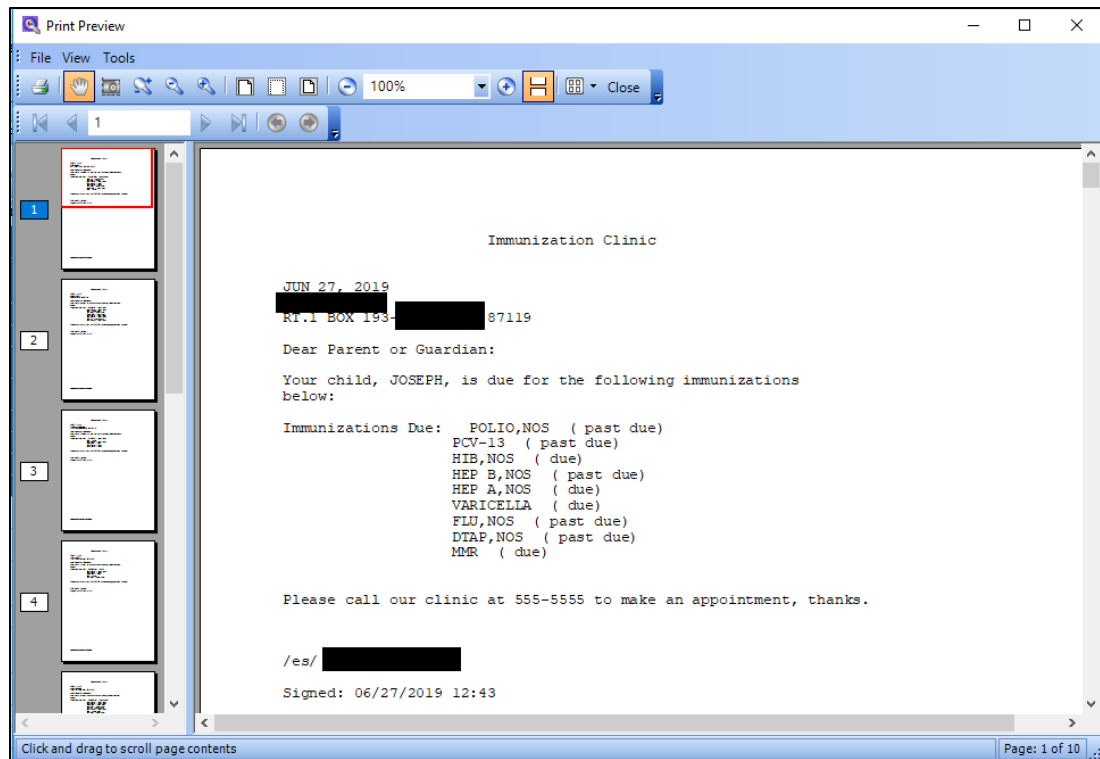

Figure 3-48: Print Preview dialog

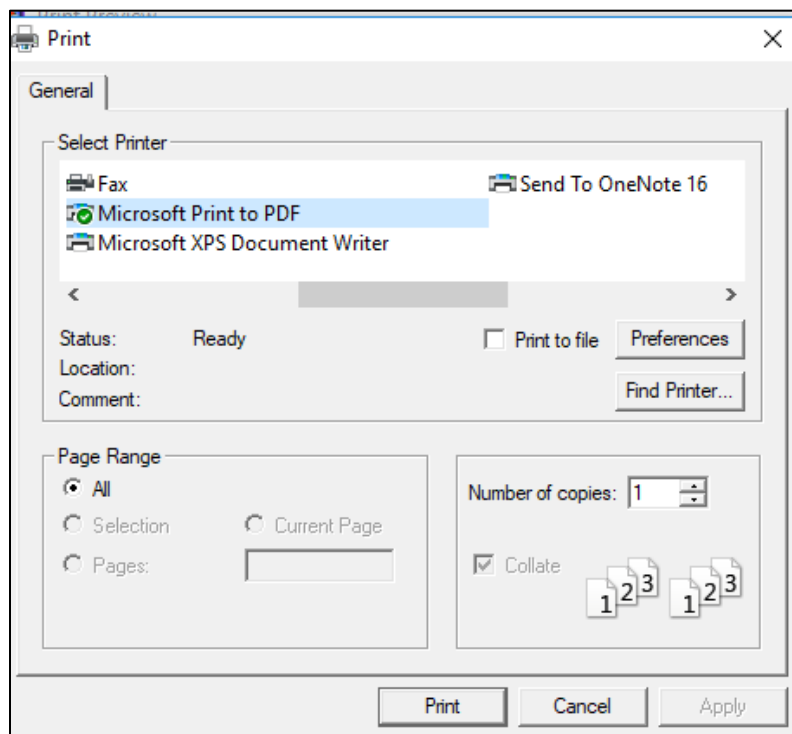

Figure 3-49: Printer selection

Check the printer before closing to ensure the letters print correctly. You will not be able to batch-print the letters later if there is a problem. They will only be able to be printed singly. The **Notification Date** and **Notification Type** will be filled in after closing the **Print** dialog.

**Find:** Find a string in the letter.

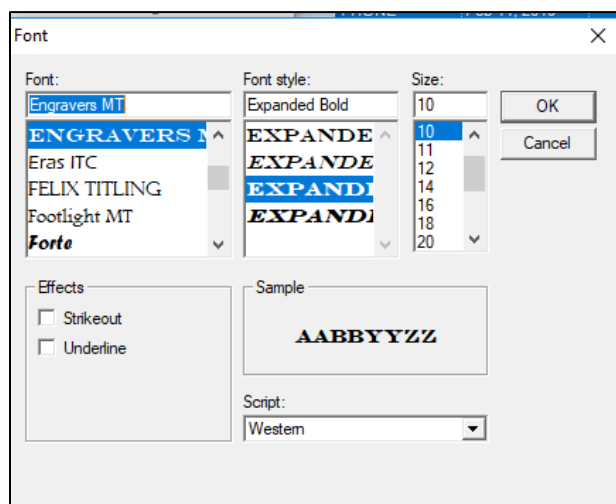

Figure 3-52: Changing fonts

**Font:** Change the default font.

**Copy:** Copy the text of the note.

**Print Preview:** Preview of the selected template.

**Print:** Disabled until saved and signed.

**Edit Note:** Disabled.

**Delete Note:** Disabled.

**Save Note:** When the note is completed.

**Sign Note:** Disabled until after the note is saved.

**Close:** When the note has been saved.

## 4.0 Package Operation

When given access to the iCare GUI, all users can create panels, view data, and perform actions without having any specific security keys. Certain keys can be given for more in-depth access. Any button needing additional access will display a message. For example, the **Update DPCP** button requires an additional security key.

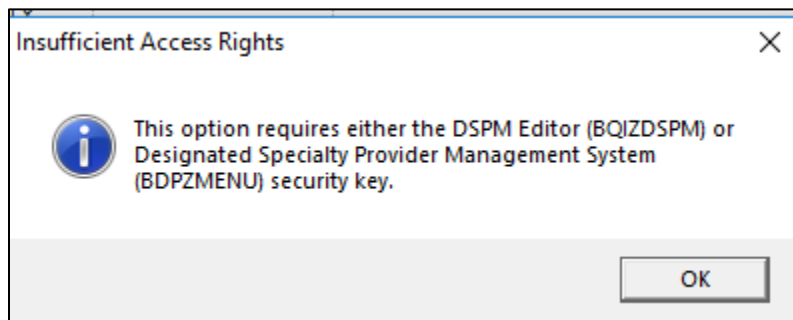

Figure 4-1: **Insufficient Access Rights** message

All views in iCare have **File**, **Edit**, **Tools**, **Window**, and **Help** options. Panel View additionally has a **Patient** option. Each view may have different selections within the options.

Figure 4-2: Main view options

### 4.1 File

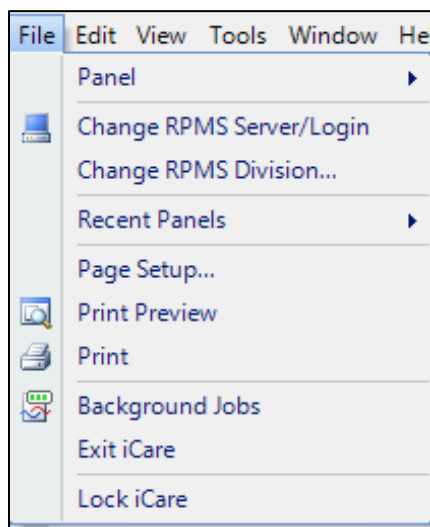

Figure 4-3: Main view **File** options

Figure 4-4: Panel View options

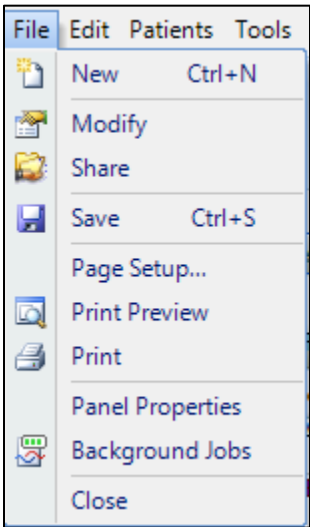

Figure 4-5: Panel View **File** options

4.1.1 Background Jobs

The **Background Jobs** icon can be found in iCare and the **File** menu. Clicking the icon or selecting the option displays the state of all the iCare background jobs.

Background jobs are scheduled by your Site Manager. It is recommended that they be run both nightly and weekly. Contact your Site Manager if you have any questions.

| Job     | Type                  | Start                 | End                   | Status | Next scheduled        |

Figure 4-6: Background jobs

Five individual iCare background jobs should be scheduled in TaskMan. The nightly job should be scheduled daily, and the four weekly jobs should be scheduled weekly (not simultaneously). The monthly and weekly IPC jobs are handled automatically via the nightly job.

If the **End** column is earlier than the **Start** column and is in red, then there may be a problem with that job.

Monitoring the background jobs is essential so that the data seen in iCare is current.

## 4.2 Edit

The **Edit** option is the same for all views.

Figure 4-7: **Edit** options

## 4.3 Tools

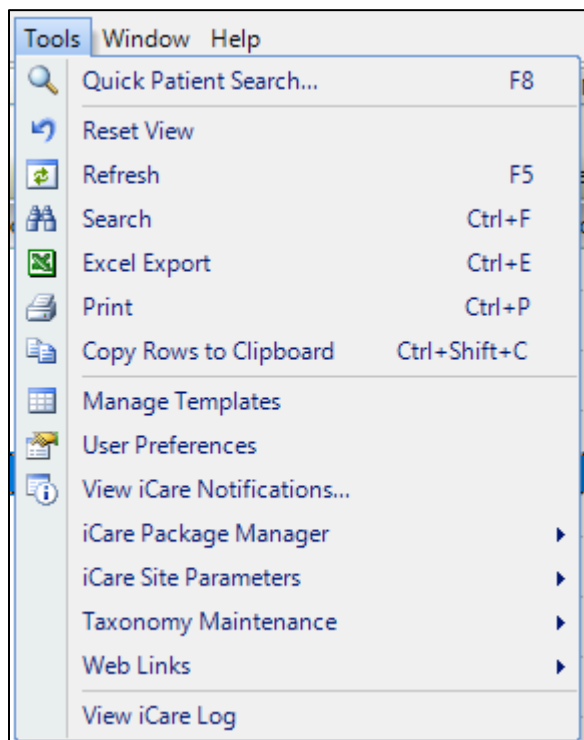

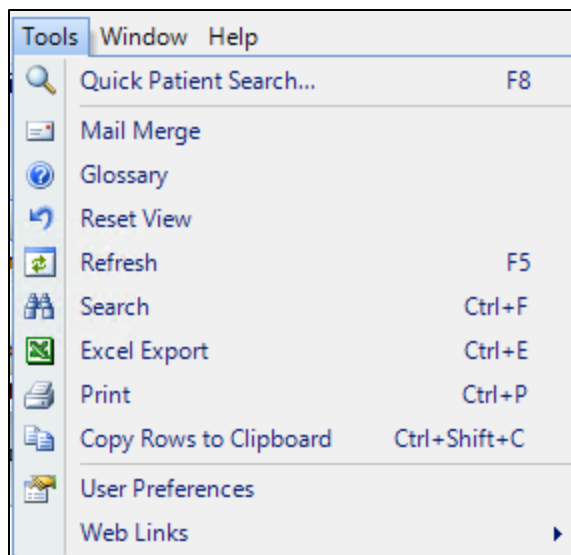

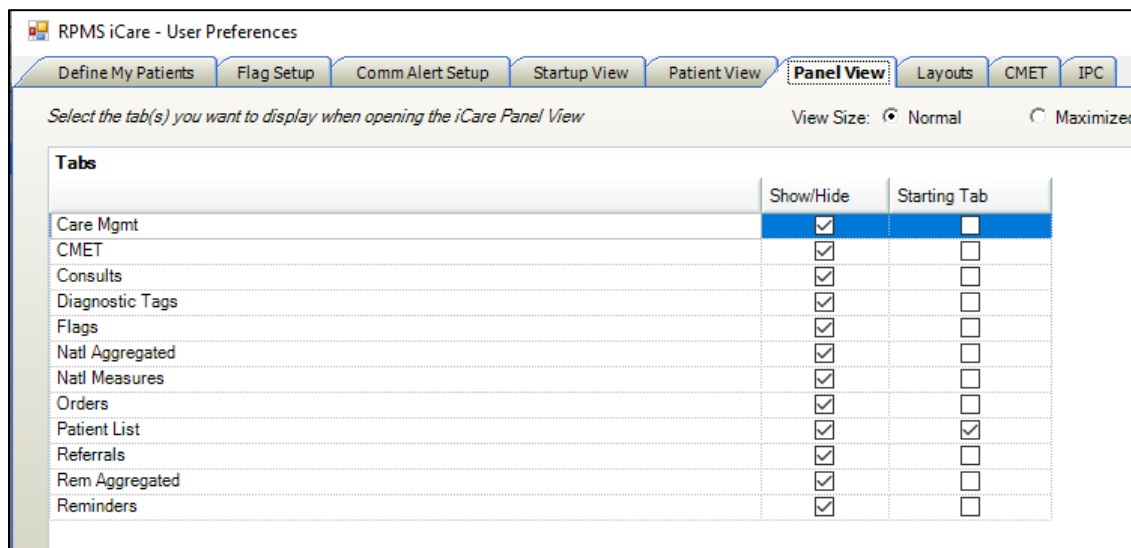

Figure 4-8: Main view **Tools** options

Figure 4-9: Other view **Tools** options

### 4.3.1 User Preferences

There is a user preference specifically for Panel View where the user can choose which tabs to display.

Figure 4-10: **User Preferences** dialog, **Panel View** tab

Select the tab you wish to have as your starting tab when you open a panel. All tabs default to **Show**. Deselect to **Hide** tabs that may not be of interest to you. The **Definition Details** tab will always display if the panel definition indicates.

Select whether the view size will be normal or maximized when opening iCare Panel View.

There is a user preference specifically for Patient View where the user can choose which tabs to have access to display. It also contains the default clinics needed for Letter, Telephone, and Chart Review notes.

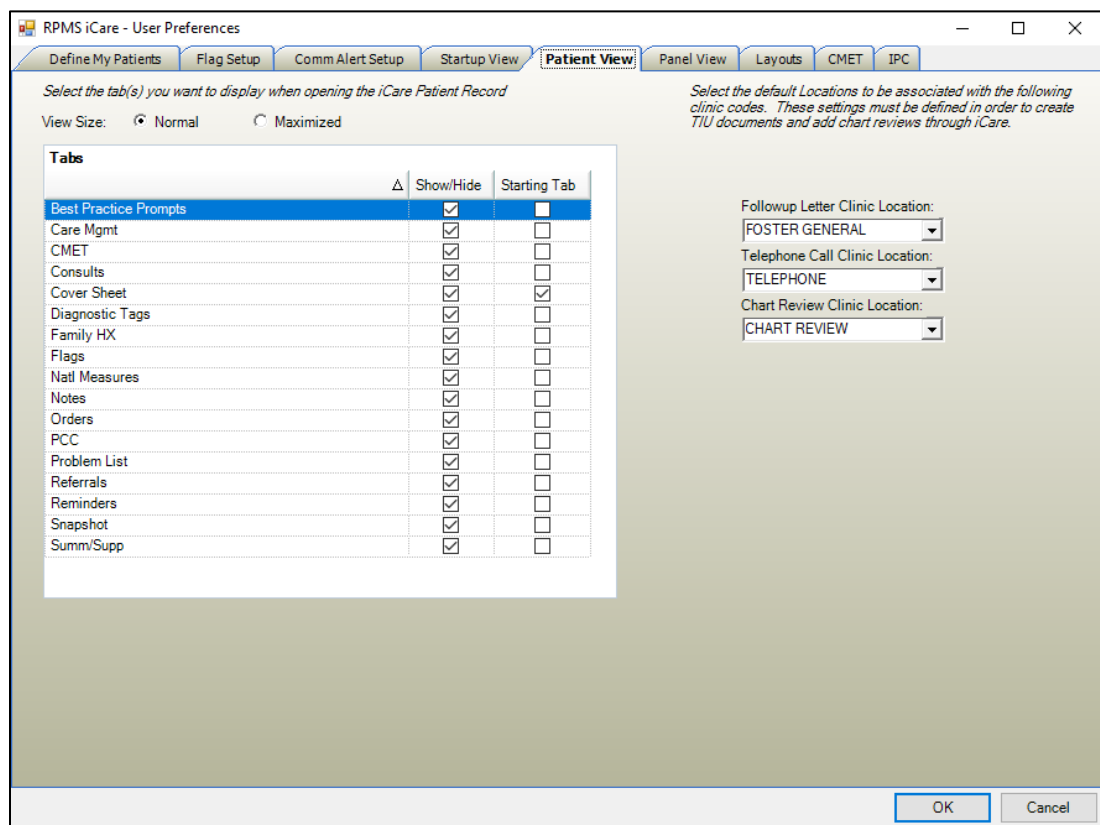

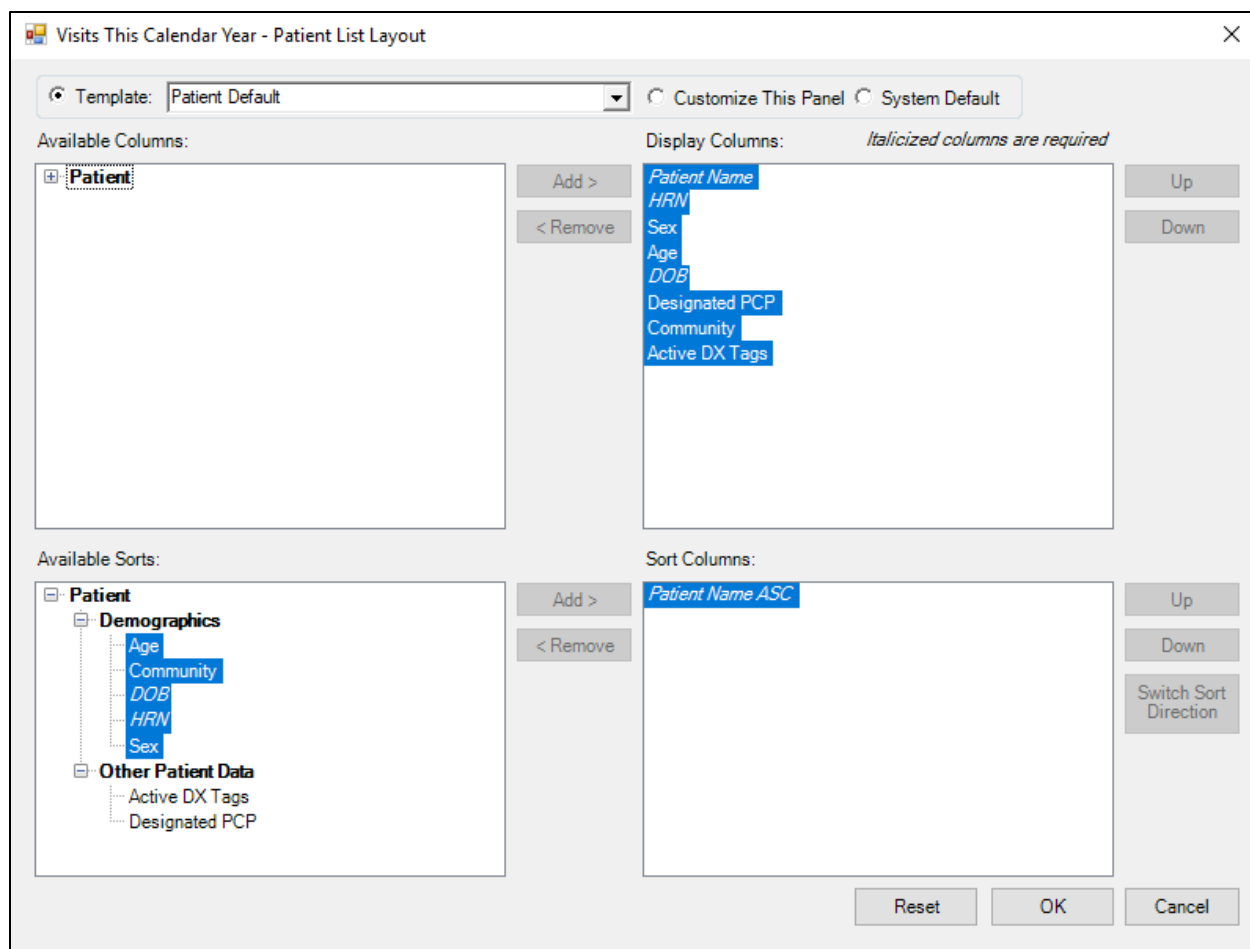

Figure 4-11: Patient View tab

### 4.3.2 Manage Templates

Views can be modified through Manage Templates or via the Layouts button. Every view in iCare has a default view template. Each view can be modified by customizing the view, modifying the default template, or creating a new one via Manage Templates. Clicking the **Layout** button opens the **Layout** window.

Figure 4-12: **Layout** window

Users can keep the template default view, customize the view for this panel only, or revert to the system default if the layout changes.

Figure 4-13: Views

You can pick from any selection of templates that exist for that view.

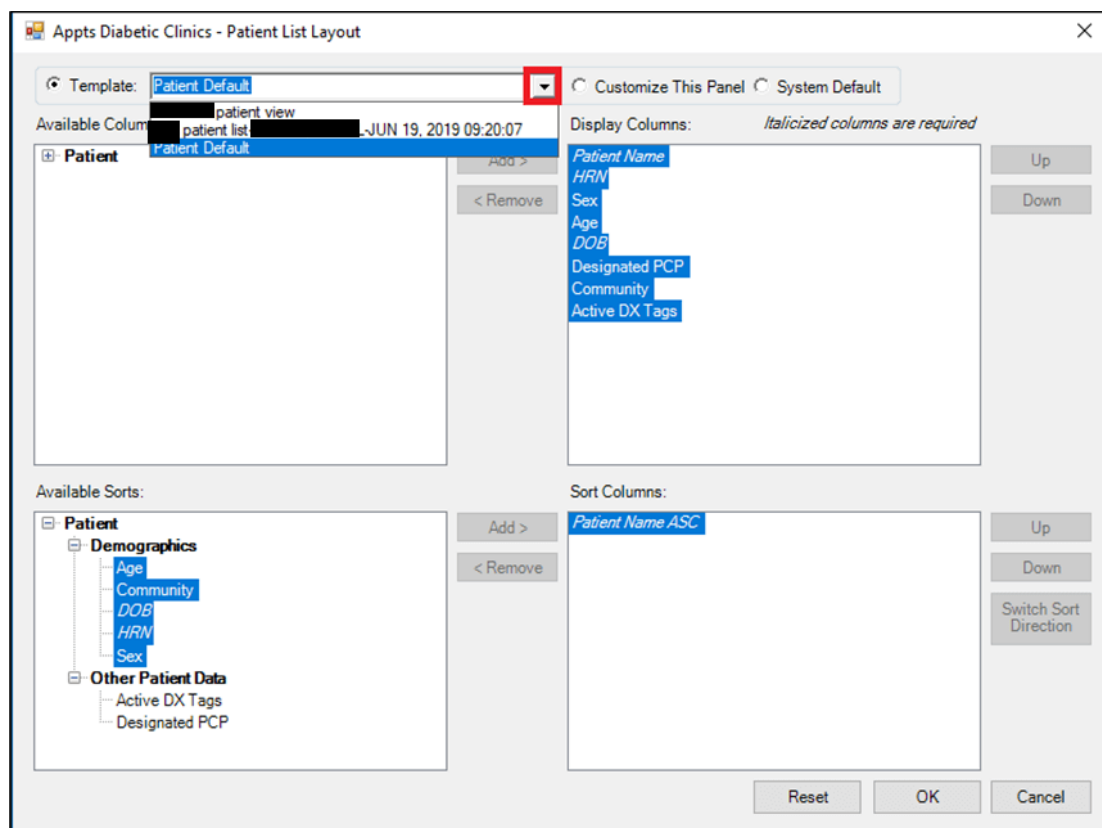

Figure 4-14: Template selection

Four boxes allow for the changing of data: **Available Columns** (data element columns available to view), **Display Columns** (data element columns already selected for the view), **Available Sorts** (data element columns available to sort the data by), and **Sort Columns** (data elements already selected for sorting).

See Appendix A for a list of the data element columns available for display for all layout views.

Use the **Add** and **Remove** buttons to move data elements back and forth from the **Available Columns** and **Display Columns** boxes and the **Available Sorts** and **Sort Columns**. They will be enabled if the **Customize This Panel** option button is selected.

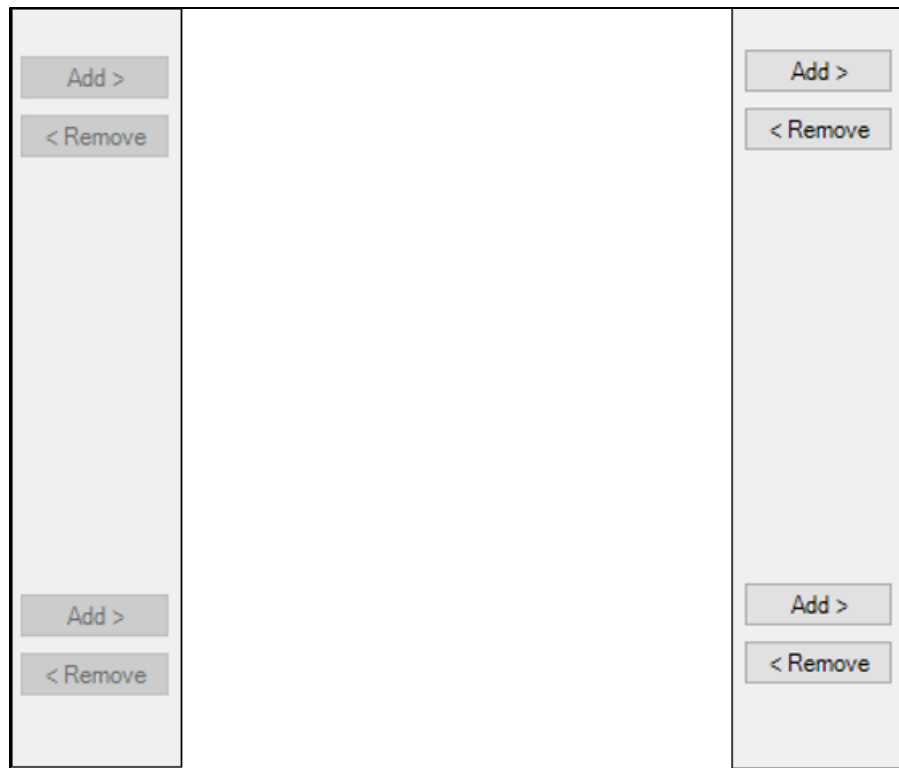

Figure 4-15: **Add** and **Remove** buttons

Customizing the view is only for this specific panel; if the layout is changed to template or system default, the customized view will be gone.

Users can always revert to the system default or a template.

Figure 4-16: **Up**, **Down**, and **Switch Sort Direction** buttons

The **Up** and **Down** buttons move the highlighted data elements up or down in the **Display Columns** or **Sort Columns** boxes. The **Switch Sort Direction** button changes the order of the sort from the default, ascending (A–Z), to descending (Z–A).

If you click the column heading to change the sort, it will automatically change the value in the **Sort Columns** box.

## Appendix A Panel View Columns

### A.1 Patient List

The default template for the Patient List tab is named Patient Default. Other tabs also have this view's required and default fields and their specific column fields.

#### A.1.1 Address

| Column           | Information  |
|------------------|--|
| Alt Phone        | The OTHER PHONE number from the patient registration     |
| City             | The city name of the patient's address                   |
| County           | The county of the patient's community                    |
| Email Address    | The current email address of the patient                 |
| Home Phone       | The PHONE NUMBER [RESIDENCE] from patient registration   |
| Location of Home | A description of where the patient's home might be found |
| State            | The state of the patient's address                       |
| Street Address   | The mailing address of the patient                       |
| Work Phone       | The WORK PHONE from patient registration                 |
| Zip Code         | The zip code of the patient's address                    |

#### A.1.2 Contacts

| Column                     | Information  |
|----------------------------|--|
| EC Address-City            | Emergency Contact's city                                   |
| EC Address-State           | Emergency Contact's state                                  |
| EC Address-Street          | Emergency Contact's street address                         |
| EC Address-Zip             | Emergency Contact's zip code                               |
| Emerg Contact Phone        | Emergency Contact's phone number                           |
| Emerg Contact Relationship | The relationship of the Emergency Contact to the patient.  |
| Emergency Contact Name     | Emergency Contact's name                                   |
| Father's Cell Phone        | The father's cell phone number                             |
| Father's Name              | The name of the patient's father from patient registration |
| Father's Phone             | The father's phone number                                  |
| Mother's Cell Phone        | The mother's cell phone number                             |
| Mother's Name              | The name of the patient's mother from patient registration |
| Mother's Phone             | The mother's phone number                                  |
| NOK Address-City           | Next of Kin's city   |

| Column             | Information   |
|--------------------|---|
| NOK Address-State  | Next of Kin's state                                 |
| NOK Address-Street | Next of Kin's street address                        |
| NOK Address-Zip    | Next of Kin's zip code                              |
| NOK Phone          | Next of Kin's phone number                          |
| NOK Relationship   | The relationship of the Next of Kin to the patient. |
| Next of Kin Name   | Next of Kin's name                                  |

### A.1.3 CRS Flag

| Column                  | Information  |
|-------------------------|--|
| CRS Active Clinical     | A patient who had an AMBULATORY, DAY SURGERY, HOSPITALIZATION, or OBSERVATION visit to a primary care clinic in the CRS report range |
| CRS DM DX Ever          | If a patient ever had diabetes (DM) diagnosis recorded in RPMS using taxonomy SURVEILLANCE DIABETES                                  |
| CRS DM DX Report Period | If the patient had a DM diagnosis in the Report Period   |
| CRS First DM Dx         | If the patient's First DM diagnosis was before the Report Period   |
| CRS One DM Visit        | If the patient had 1 DM visit in the Report Period   |
| CRS Two DM Visits       | If the patient had 2 DM visits in the Report Period  |

### A.1.4 Demographics

| Column                   | Information   |
|--------------------------|---|
| Alias(es)                | Any aliases that a patient has  |
| Beneficiary              | The patient's CLASSIFICATION/BENEFICIARY from patient registration, e.g., INDIAN/ALASKA NATIVE, NON-INDIAN SPOUSE, etc.                       |
| CRS Pop                  | Whether the patient is identified as User Population (UP) or Active Clinical (AC) by CRS  |
| Cause of Death           | In PCC, the Underlying Cause of Death (UCD) is where this information can be entered.   |
| Communication Preference | The method by which the patient has indicated they wish to be communicated with from patient registration—PHONE; EMAIL; LETTER; DO NOT NOTIFY |
| Date of Death            | If the patient has been marked as deceased, the date of death from the patient's registration   |
| Date/Time Added          | The date/time the patient was added to the panel.   |
| Ethnicity                | The ethnicity of the patient from patient registration  |
| Legal Name(s)            | Any legal names that the patient has  |

| Column             | Information  |
|--------------------|--|
| Manually Added     | Identifies if the patient was manually added or removed from the panel; if blank, then the patient was added via panel definition criteria |
| Other Tribes       | Any other tribes that the patient is associated with besides the TRIBE OF MEMBERSHIP   |
| Perf Met           | If the patient is YES for all applicable CRS measures or not   |
| Preferred Language | The language by which the patient prefers to communicate in  |
| Preferred Name     | The preferred name of the patient (when the flag is turned on)   |
| Race               | The race of the patient  |
| Tribe              | The TRIBE OF MEMBERSHIP of the patient   |
| Who Manually Added | The user who manually added a patient to the panel   |

### A.1.5 Measurement

Any active measurement found in the Measurement Type (File #9999999.07). Measurement updates are released in AUM releases. The iCare Nightly Background job will determine which measurement is active and will add any new ones to the list.

Table A-1: Measurement

| Column           | Information  |
|------------------|--|
| Last measurement | Displays the value and date of the last measurement type |

### A.1.6 Other Patient Data

| Column                         | Information   |
|--------------------------------|---|
| Active Insurance Coverage      | Any active insurance that the patient has                                       |
| Advanced Directives            | If the patient has any advanced directives on file in RPMS                      |
| Allergies                      | If the patient has any allergies  |
| Employer                       | The employer of the patient   |
| Last Immunization Notification | The last recorded immunization notification in iCare                            |
| Last Reminder Notification     | The last recorded reminder notification in iCare                                |
| Medicaid Number                | If the patient has Medicaid, the Medicaid number                                |
| Veteran                        | Whether the patient is a Veteran or not   |
| Specialty Providers            | The active Provider category a patient could be assigned to, e.g., Case Manager |

## A.1.7 Visit Related

| Column                           | Information  |
|----------------------------------|--|
| IPC Adolescent Qualify Dates     | The date the patient should have had an immunization visit if the patient was 13 years old. old during the IPC report period |
| IPC Depress Office Visit         | If the patient had a depression office visit   |
| IPC Flu Office Visit             | If a visit that meets the IPC Influenza Immunization Status encounter criteria   |
| IPC Last Office Visit            | The last office visit per IPC requirements usually has a specific visit CPT code.  |
| Last 3 Visit Clinics             | The clinics of the last three visits that the patient had (no visit type filter)   |
| The last 3 Visit Dates           | The dates of the last three visits that the patient had (no visit type filter)   |
| Last 5 Visit Clinics             | The clinics of the last five visits that the patient had (no visit type filter)  |
| The last 5 Visit Dates           | The dates of the last five visits that the patient had (no visit type filter)  |
| Last Appt Clinic                 | The clinic of the last appointment of the patient  |
| Last Appt Date                   | The date of the last appointment of the patient  |
| Last PC Visit Location           | The last location of encounter for the last ambulatory visit whose clinic is a primary care clinic                           |
| Last PC Visit POV Narrative      | The Purpose of Visit narrative of the last ambulatory visit whose clinic is a primary care clinic                            |
| Last PC Provider Narrative       | The provider's narrative of the last ambulatory visit, whose clinic is a primary care clinic                                 |
| Last Primary Care Visit Clinic   | The clinic of the last ambulatory visit which is a primary care clinic   |
| Last Primary Care Visit Date     | The date of the last ambulatory visit whose clinic was a primary care clinic   |
| Last Primary Care Visit Provider | The provider of the last ambulatory visit, whose clinic was a primary care clinic  |
| Last Visit Clinic                | The clinic of the last visit that the patient had (no visit type filter)   |
| Last Visit Date                  | The date of the last visit that the patient had (no visit type filter)   |
| Last Visit Date w DPCP           | The date of the last ambulatory or hospitalization visit where the assigned primary care provider was listed as a provider   |
| Last Visit Date/Time             | The date/time of the last visit that the patient had (no visit type filter)  |
| Last Visit Location              | The location of encounter for the last visit that the patient had (no visit type filter)                                     |
| Last Visit POV Narrative         | The Purpose of Visit narrative of the last visit that the patient had (no visit type filter)                                 |

| Column                        | Information  |
|-------------------------------|--|
| Last Visit Provider           | The provider of the last visit that the patient had (no visit type filter)   |
| Last Visit Provider Narrative | The provider's narrative of the last visit that the patient had (no visit type filter)                               |
| Next 3 Appt Clinics           | The clinics of the following three appointments that the patient is scheduled for                                    |
| Next 3 Appt Dates             | The dates of the following three appointments that the patient is scheduled for                                      |
| Next 5 Appt Clinics           | The clinics of the following five appointments that the patient is scheduled for                                     |
| Next 5 Appt Dates             | The dates of the following five appointments that the patient is scheduled for                                       |
| Next Appt Clinic              | The clinic of the next appointment that the patient is scheduled for   |
| Next Appt Date                | The date of the next appointment that the patient is scheduled for   |
| Next Appt Date/Time           | The date and time of the next appointment that the patient is scheduled for  |
| Next Appt Provider            | The name of the default provider is defined for the clinic of the next appointment that the patient is scheduled for |
| Number of No-Shows            | The number of no-show appointments that the patient has had in the past 12 months                                    |
| Number of Patients Cancels    | The number of appointments that the patient canceled in the past 12 months   |

## A.2 Reminders

There are five categories of reminders: Health Summary, EHR Clinical Reminders, IZ Forecaster, Care Management, and CMET. The default Reminders template displays the default Health Summary reminders.

Each night, the iCare Nightly Background job checks to see if reminders have been inactivated or if new reminders have been found (or activated). A notification message may be sent to you informing you of a newly added or newly deactivated/deleted reminder.

Table A-2: Reminders

| Status | Received                 | From | Notification Text   | Body |
|--------|--------------------------|------|---|------|
|        | Mar 27, 2019<br>08:11 AM |      | Reminder [DTAP, NOS] has been newly added. You may want to update your panel Reminder View layouts. |      |

### A.2.1 Default Health Summary Reminders

The default Health Summary Reminders belong to the category General. Health Summary Reminders can be activated or inactivated from the **Health Summary Maintenance Menu | Health Maintenance Reminders | Activate/Inactivate a Health Maintenance Reminder** menu option.

Table A-3: Health Summary Reminders

| Column             |
|--------------------|
| BLOOD PRESSURE     |
| BREAST EXAM        |
| DENTAL EXAM        |
| DIABETES SCREENING |
| HEIGHT             |
| HIV SCREENING      |
| PELVIC EXAM        |
| PHYSICAL EXAM      |
| WEIGHT             |

### A.2.2 Optional Health Summary Reminders

#### Behavioral Health

| Column                          |
|---------------------------------|
| ALCOHOL USE SCREENING           |
| DEPRESSION SCREENING            |
| DOMESTIC VIOLENCE/IPV SCREENING |

#### Cancer-Related

| Column                   |
|--------------------------|
| COLORECTAL CA-SCOPE/XRAY |
| MAMMOGRAM                |
| PAP SMEAR                |
| RECTAL                   |
| TOBACCO USE SCREENING    |

#### CVD-Related

| Column      |
|-------------|
| CHOLESTEROL |

**Elder**

| Column               |
|----------------------|
| FALL RISK ASSESSMENT |
| TONOMETRY            |
| VISUAL ACUITY EXAM   |

**Pediatric**

| Column               |
|----------------------|
| EPSDT Screening      |
| HCT/HGB              |
| HEAD CIRCUMFERENCE   |
| HEARING TEST         |
| NEWBORN HEARING TEST |
| PPD - TUBERCULOSIS   |
| URINALYSIS           |

**A.2.3 EHR Clinical Reminders**

EHR Clinical Reminders are divided into two types: national reminders and local reminders. National reminders are reminders released to all facilities, and local reminders are reminders created within a specific facility. Typically, national reminders start with IHS, and local reminders start with a local variation, such as the initials of the facility.

Only those reminders that are active will display in iCare. Reminders can be activated or inactivated using the **Reminder Definition Management | Activate/Inactivate Reminders** menu option. Reminders with the same name will show up looking like a duplicate reminder. During the iCare Nightly Background job, if such duplicate reminders are found, a notification message will be sent to any user designated as an iCare Package Manager (security key BQIZMGR).

Table A-4: EHR Clinical Reminders

| Status | Received                    | From | Notification Text                   | Body  |
|--------|-----------------------------|------|-------------------------------------|---|
|        | Jun 27,<br>2019 11:44<br>AM |      | Duplicate EHR<br>reminders<br>found | The following duplicate EHR reminders are active. Please get in touch with the EHR Reminder CAC to go to the Reminder Definition Management menu and inactivate the incorrect duplicate reminders.<br>DM Foot Exam [IHS-DIAB FOOT EXAM 2013] DM Foot Exam [IHS-DIAB FOOT EXAM 2015] |

## A.2.4 IZ Forecaster Reminders

IZ Forecaster or Immunization reminders are those reminders found to be due by the Forecaster interface. There may be other immunization reminders in the Health Summary or EHR Clinical Reminders, but they are not included in iCare.

Some examples of Immunization Forecaster immunizations are listed in the following table.

Table A-5: Example Immunization Forecaster immunizations

| Column     |
|------------|
| DTaP       |
| FLU, NOS   |
| HEP A, NOS |
| HEP B, NOS |
| HIB, NOS   |
| HPV, NOS   |
| MMR        |
| Men-B, NOS |
| MenCV4,NOS |
| PCV-13     |
| POLIO, NOS |
| Td-ADULT   |
| Tdap       |
| VARICELLA  |
| ZOS-Shgrx  |

## A.2.5 Care Management Reminders

Currently, the only specialized Care Management Reminders are for HIV patients and are a part of the HIV Management System (HMS).

Detail information about these reminders can be found in Appendix B of the *HIV/AIDS Management User Manual*.

## A.2.6 CMET Reminders

Every event in the CMET becomes a reminder if it is used as a follow-up event.

## A.3 National Measures

There are five categories of National Measures: National GPRA, Non-National, Other, IPC, and Developmental. The default Performance template displays the National GPRA measures.

Each night, the iCare Nightly Background job checks to see if a new version of IHS CLINICAL REPORTING (CRS) has been installed at your facility and will automatically update the list of measures. A notification will be sent when the new measures are updated.

Table A-6: National Measures

| Status | Received                    | From | Notification Text | Body  |
|--------|-----------------------------|------|-------------------|---|
|        | Mar 14,<br>2019 08:10<br>AM |      | CRS Updated       | The RPMS Clinical Reporting System (CRS) has been updated on your facility's server. This update may affect your iCare Natl Measures view because of new or inactivated performance measures. Please review your Natl Measures layout and update it as needed. The CRS UPDATE job is scheduled to run MAR 14, 2019, at 20:00. Your Natl Measures data will not be up-to date until this job has been completed. |

## A.4 CMET

Please refer to the *CMET User Manual* for the details on this tab.

## A.5 Care Management

The current Care Management groups are Asthma, Childhood Immun, COPD, COVID, Diabetes, DM Audit, Hep C, HIV/AIDS, Immunizations, Pain Management, Pediatric, Prenatal, and STI/STD.

Each group has its own list of columns. The DM Audit group is based on the current release of the Diabetes Audit (BDM). When a new DM Audit is installed in RPMS, the iCare Nightly Background job will determine if there are any new columns to be added or columns that should be inactivated.

Childhood Immun is based on the type and number of immunizations needed for patients from age 0 to age 17.

## A.5.1 Asthma

| Column                     | Information  |
|----------------------------|--|
| Asthma Severity            | The most recent Severity is documented in the Problem List Classification field. Values are: 1-Intermittent; 2-Mild Persistent; 3-Moderate Persistent; 4-Severe Persistent   |
| Asthma Tag Status          | Most recent diagnostic tag status for Asthma only if any   |
| Last Asthma Visit          | Date of most recent Asthma visit, defined as a face-to-face visit with ANY of the following asthma-related data elements documented: Severity, Control, Symptom-Free Days, Work/School Missed, or Patient Education  |
| Best Peak Flow             | The most recent Best Peak Flow value from the Measurements file  |
| Last Peak Flow             | The most recent Peak Flow value from the Measurements file, obtained from a peak flow meter during a visit   |
| Asthma Control             | What the designated asthma control is—WELL CONTROLLED; WELL CONTROLLED; VERY POORLY CONTROLLED   |
| FEV1/FVC                   | Most recent FEV1/FVC values from the Measurements file, obtained from spirometry measurements during a visit   |
| Last Action Plan           | The date of the most recent Action Plan was provided to this patient. Action Plans are available from the PCC Patient Wellness Handout.  |
| Last Flu Shot              | Date of most recent Influenza immunization   |
| Last Asthma ER/UC Visit    | Date of most recent visit to the ER or Urgent Care (clinic codes 80 or 30) with Asthma as the primary POV  |
| Last Asthma Hospital Visit | Date of most recent hospitalization (service category H) with Asthma as the primary POV  |
| Last Tobacco Health Factor | The most recent Tobacco Health Factor  |
| On Controller Meds         | Is this patient currently prescribed Asthma Controller medications?  |
| On Inhaled Steroids        | Is this patient currently prescribed Inhaled Steroid medications?  |
| On Reliever Meds           | Is this patient currently prescribed Asthma Reliever medications?  |
| Asthma Quality of Care     | All the following critical elements documented: Asthma Severity value ever; Asthma Control and Peak Flow or FEV1 measurement and Asthma Action Plan and Flu Shot in the past year; and current Controller medication prescription if Severity is Persistent (2, 3 ~or 4) |
| Symptom-Free Days          | The value of the most recent symptom-free days was documented in V Measurements.   |
| Work/School Days Missed    | Value of most recent Work/School Missed documented in V Measurements   |
| ASTHMA TRIGGERS            | ASTHMA TRIGGERS from Health Factors are separated into each trigger, e.g., air pollutants, dust mites, etc.  |

## A.5.2 Childhood Immun

The display can be adjusted however the user wishes all first shots, all series, etc. This is an example of how the column will look.

Table A-7: Childhood Immun

| Column  | Information  |
|---------|--------------|
| 1-DTaP  | DTaP shot 1  |
| 1-POLIO | Polio shot 1 |
| 1-HIB   | HIB shot 1   |
| 2-DTaP  | DTaP shot 2  |
| 2-POLIO | Polio shot 2 |
| 2-HIB   | HIB shot 2   |
| 3-DTaP  | DTaP shot 3  |
| 3-POLIO | Polio shot 3 |
| 3-HIB   | HIB shot 3   |
| 4-DTap  | DTaP shot 4  |

## A.5.3 COPD

| Column                  | Information  |
|-------------------------|--|
| Oximetry                | The most recent O2 measurement   |
| Spirometry              | The most recent FVFC measurement   |
| Pneumovax               | The most recent Pneumovax immunizations  |
| Tobacco Assessed        | When tobacco assessed  |
| Tobacco Health Factor   | The most recent tobacco health factor recorded   |
| Active Inhaled Steroids | Checks if the patient has an active medication from site-specified taxonomy BGP ASTHMA INHALED STEROIDS or BGP ASTHMA INHALED STEROIDS NDC |
| Abdominal Girth         | The most recent abdominal girth measurement  |

## A.5.4 COVID

| Column                   | Information   |
|--------------------------|---|
| Current COVID Lab Date   | The most recent COVID lab test date                         |
| Current COVID Lab        | The most recent COVID lab test name                         |
| Current COVID Lab Result | The most recent COVID lab test result                       |
| Previous COVID Lab Date  | The previous COVID lab test date is before the current one. |
| Previous COVID Lab       | The previous COVID lab test name before the current one.    |

| Column                               | Information  |
|--------------------------------------|--|
| Previous COVID Lab Result            | The previous COVID lab test result before the current one.   |
| COVID Immunization Series            | All COVID immunizations in V Immunization match the CVX codes in taxonomy, BQI COVID IZ CVX CODES.   |
| High-Risk Patient                    | <b>Yes</b> , if a patient has any High-Risk Conditions.  |
| COVID Referral                       | If the PURPOSE OF REFERRAL in a Referral contains COVID, this column will be <b>Yes</b> .  |
| COVID Addtl Dose                     | The date(s) of any additional COVID dose given to the patient using a CPT from taxonomy BQI COVID ADDTL DOSE CPTS.   |
| Immunocompromised Pt                 | If the patient has met any immunocompromised conditions, and no, if they have not.   |
| Immunocompromised Conditions         | The immunocompromised conditions that a patient has. See Appendix C for details.   |
| # High Risk Conditions               | The count of High-Risk Conditions that a patient has.  |
| Active Orders                        | <b>Yes</b> , if the patient has any orders that are currently active.  |
| Current Post-COVID Functional Status | The most recently entered Health Factor for the category Post COVID Functional Status.   |
| COVID Breakthrough Infection         | If the patient has a positive COVID-19 lab test from taxonomies BQI COVID BRKTHRU LOINC/BQI COVID BRKTHRU TAX 14 days or more after they completed the recommended doses, then the value is YES. |
| COVID Immun Status                   | Whether a COVID immunization is <b>Complete</b> or <b>Incomplete</b>   |
| COVID Immunization Refusals          | The date(s) of any COVID immunizations refusals by the patient   |
| COVID Treatment Meds                 | Any drugs in taxonomy BQI COVID DRUGS have been used to treat COVID patients since Jan 1, 2020.  |
| Confirmed COVID Dx Description       | The confirmed COVID diagnosis code from taxonomy BQI CONFIRMED COVID-19 DXS in the IPL.  |
| Confirmed COVID Dx Onset Date        | The Onset date that a confirmed COVID diagnosis from taxonomy BQI CONFIRMED COVID-19 DXS has in IPL.   |
| Covid Shot #1 Date                   | The date of the first COVID immunization shot.   |
| Covid Shot #1 Name                   | The name of the first COVID immunization (Moderna, Pfizer, etc.)   |
| Covid Shot #1 Location               | The location of the first COVID immunization.  |
| Covid Shot #1 Category               | The visit service category of the first COVID immunization (Ambulatory, Event Historical)  |
| Covid Shot #2 Date                   | The date of the second COVID immunization shot.  |
| Covid Shot #2 Name                   | The name of the second COVID immunization (Moderna, Pfizer, etc.)  |
| Covid Shot #2 Location               | The location of the second COVID immunization.   |

| Column                                  | Information  |
|---|--|
| Covid Shot #2 Category                  | The visit service category of the second COVID immunization (Ambulatory, Event Historical)                       |
| Covid Shot #3 Date                      | The date of the third COVID immunization shot.   |
| Covid Shot #3 Name                      | The name of the third COVID immunization (Moderna, Pfizer, etc.)   |
| Covid Shot #3 Location                  | The location of the third COVID immunization.  |
| Covid Shot #3 Category                  | The visit service category of the third COVID immunization (Ambulatory, Event Historical)                        |
| Current Post-COVID Functional Status    | The most recently entered Health Factor for the category Post COVID Functional Status.                           |
| High-Risk Conditions                    | A list of all High-Risk Conditions that a patient has. See Appendix B for details.                               |
| Immunosuppressed Meds                   | Any autoimmune suppress drugs from taxonomy ATX IMMUNOSUPPRESS DRUGS for immunocompromised patients.             |
| Occupation                              | The most recently entered Health Factor for the category Occupation.   |
| Personal History of COVID-19            | If someone entered a Personal History of COVID-19 (Z86.16) in IPL.   |
| Personal History of COVID-19 Onset Date | Date of Onset in IPL for Personal History of COVID-19 diagnosis.   |
| Previous Post-COVID Functional Status   | The previous health factor for the Post-COVID Functional Status category is before the current one.              |
| Probable COVID Dx Description           | The probable COVID diagnosis from taxonomy BQI PROBABLE COVID-19 DXS.  |
| Probable COVID Dx Onset Date            | The Onset date of a probable COVID diagnosis in the past 30 days in IPL from taxonomy BQI PROBABLE COVID-19 DXS. |
| Total # COVID Immunizations             | The total number of COVID-19 immunizations given to the patient was recorded in RPMS.                            |
| Total # COVID Labs                      | A count of all COVID Labs from V Lab that a patient has had.   |
| Travel History                          | The most recently entered Health Factor for the category Travel History.   |

### A.5.5 Diabetes

| Column      | Information   |
|-------------|---|
| DM Onset    | The date of the onset of Diabetes for this patient and where the date is documented |
| Last Height | The last height measurement taken for this patient                                  |
| Last Weight | The most recent weight measurement taken for this patient                           |

| Column                    | Information  |
|---------------------------|--|
| BMI                       | The value of the BMI calculated from the most recent height and weight measurements for the patient  |
| Tobacco User              | NO = Not a current tobacco user. YES = Current tobacco user. Taken from CRS measure Tobacco Use/Exposure Assessment 5+                                       |
| HTN Diagnosed?            | Has the patient been diagnosed with Hypertension?  |
| On ACE Inhibitor?         | Did the patient have an active ACE Inhibitor/ARB medication in the past year?  |
| Aspirin Use/Anti-platelet | The patient had an active aspirin/anti-platelet medication in the past year.   |
| Last 3 BP (non-ER)        | The last three blood pressure measures for this patient in a non-ER visit  |
| Depression                | If the patient has Depression on the Problem List, no depression screening is needed. Otherwise, has the patient had a depression screening in the past year |
| DM Foot Exam              | Has the patient had a foot exam in the past year?  |
| DM Eye Exam               | Has the patient had an eye exam in the past year?  |
| Dental Exam               | Has the patient had a dental exam in the past year?  |
| Last Dietician Visit      | The date of the patient's last visit to a dietician  |
| Seasonal Flu              | Returns the last recorded FLU immunization   |
| Pneumovax                 | The last Pneumovax immunization for this patient   |
| TD (10 years)             | Did the patient have a TD immunization in the past ten years   |
| Last TB Health Factor     | The last tobacco health factor entered for the patient.  |
| HbA1c                     | The most recent HbA1c test result for this patient   |
| Previous HbA1c            | The previous result from the most recent HbA1c lab test for this patient   |
| UACR (Quant A/C Ratio)    | The most recent UACR (Quant A/C Ratio) lab test for this patient   |
| Creatinine                | The most recent Creatinine lab test for this patient   |
| Estimated GFR             | The most recent Estimated GFR lab test for this patient  |
| Total Cholesterol         | The most recent Total Cholesterol lab test for this patient  |
| LDL Cholesterol           | The most recent LDL Cholesterol lab test for this patient  |
| HDL Cholesterol           | The most recent HDL Cholesterol lab test for this patient  |
| Triglycerides             | The most recent Triglyceride lab test for this patient   |
| Hep B Series Complete     | If the patient has completed the Hep B series of immunizations   |
| CVD Diagnosed?            | Has the patient been diagnosed with CVD?   |
| Non-HDL Cholesterol       | The most recent non-HDL Cholesterol lab test   |
| Last Chest Xray           | Date of the last Chest x-ray for the patient   |

| Column                   | Information  |
|--------------------------|--|
| Last Mammogram           | If applicable, the date of the patient's last mammogram                |
| Last Pap Smear           | If applicable, the date of the patient's last pap smear                |
| Last TB Test             | The last TB test for this patient                                      |
| Last Waist Circumference | The most recent waist circumference measurement taken for this patient |
| PPD Status               | The status of a PPD test for the patient                               |

### A.5.6 DM Audit

See Appendix A in the current *Diabetes Audit User Addendum Manual* for definitions. The columns enabled for iCare are as follows and can change when a new DM Audit is installed into RPMS.

Table A-8: DM Audit

| Column                        |
|-------------------------------|
| DM Diagnosis Date             |
| DM Type                       |
| Tobacco Use                   |
| Tob Cessation Counsel         |
| Electronic Nicotine           |
| Last Height                   |
| Last Weight                   |
| BMI                           |
| HTN Documented                |
| Blood Pressure                |
| DM Foot Exam                  |
| DM Eye Exam                   |
| Dental Exam                   |
| Depression (Active Problem)   |
| Depression Screening          |
| Diet Instruction              |
| Physical Activity Instruction |
| DM Education                  |
| Insulin                       |
| Sulfonylurea                  |
| Glinide                       |
| Metformin                     |

| Column                       |
|------------------------------|
| Acarbose                     |
| Pioglitazone                 |
| DPP4 inhibitors              |
| Amylin Analogues             |
| GLP-1 analog                 |
| Bromocriptine                |
| Colesevelam                  |
| SGLT-2 inhibitor             |
| ACE/ARB                      |
| Statin                       |
| CVD Documented               |
| TB Test Done                 |
| TB Test Result               |
| TB Result (Pos), Tx Complete |
| TB Result (Neg)              |
| Seasonal Flu Vaccine         |
| Pneumovax Ever               |
| Td/TDAP (past 10 yrs.)       |
| Tdap (ever)                  |
| Hep B Series                 |
| HbA1c (most recent)          |
| Total Cholesterol            |
| HDL Cholesterol              |
| LDL Cholesterol              |
| Triglycerides                |
| CREATININE                   |
| Estimated GFR                |
| UACR                         |
| Combined Measure             |
| eGFR and UACR                |
| ENDS Status                  |
| Hep C Dx Ever                |
| Hep C Screened               |
| LEAMP                        |
| Retinopathy DX               |

### A.5.7 Hep C

| Column                    | Information  |
|---------------------------|--|
| HCV Antibody Test         | The most recent lab test from site-specified taxonomy BQI HCV ANTIBODY TAX   |
| HCV RNA Test              | The most recent lab test from site-specified taxonomy BQI HCV RNA TAX  |
| AST Test                  | The most recent lab test from site-specified taxonomy DM AUDIT AST TAX   |
| ALT Test                  | The most recent lab test from site-specified taxonomy DM AUDIT ALT TAX   |
| Platelet Test             | The most recent lab test from site-specified taxonomy BQI PLATELET TAX   |
| HCV Viral Load Test       | The most recent lab test from site-specified taxonomy BQI HCV VIRAL LOAD TAX   |
| HCV Genotype Test         | The most recent lab test from site-specified taxonomy BQI HEP C GENOTYPE TESTS   |
| HIV Test                  | The most recent lab test from site-specified taxonomy BGP HIV TEST TAX   |
| Fibroscan                 | The most recent Fibroscan procedure from taxonomy BQI FIBROSCAN CPT PROC   |
| Liver Ultrasound          | The most recent Liver Ultrasound procedure from taxonomy BQI LIVER ULTRASOUND CPT  |
| Hep B                     | Hepatitis B immunization series  |
| Hep A                     | Hepatitis A immunization series  |
| Current HCV Status        | This is the current HCV status from Health Factors.  |
| FIB-4 Calculation         | The FIB-4 calculation is based on the patient's age and the ALT, AST, and Platelet lab test values. The calculation will look at the most recent lab values in the past two years. Optimally, the three labs would be on the same day, but if they are not, they should be within 30 days of each other. |
| First Hep C Dx            | The first Hepatitis C diagnosis is in the Problem or Purpose of Visit files.   |
| Pregnant After DX         | If the patient was pregnant after the first Hepatitis C diagnosis  |
| <i>Other Lab Tests</i>    | The most recent other identified lab test from site-specified taxonomy BQI HCV OTHER LAB TESTS   |
| <i>Baseline Lab Tests</i> | The baseline value (and date) and the most recent value (and date) for any lab test from site-specified taxonomy BQI HCV BASELINE LAB TESTS  |

### A.5.8 HIV/AIDS

See Section 2.1 in the *HIV/AIDS Management User Manual* for listing and definitions.

## A.5.9 Immunizations

| Column                         | Information  |
|--------------------------------|--|
| <i>Immunization Short name</i> | Any active immunization found in the IMMUNIZATION File #9999999.14 |

## A.5.10 Pediatric

| Column                   | Information  |
|--------------------------|--|
| Activity Level           | The most recent ACTIVITY LEVEL health factor   |
| Weight                   | The most recent weight measurement   |
| Height                   | The most recent height measurement   |
| BMI                      | The most recent body mass index measurement  |
| BMI Percentile           | The most recent body mass index percentile measurement   |
| Head Circumference       | The most recent head circumference measurement   |
| Last Infant Feeding      | The most recent entered infant feeding data  |
| Infant Feeding 2mos      | Patients who were screened for infant feeding choice at the age of two months (45–89 days)       |
| Infant Feeding 6mos      | Patients who were screened for infant feeding choice at the age of six months (165–209 days)     |
| Infant Feeding 9mos      | Patients who were screened for infant feeding choice at the age of nine months (255–299 days)    |
| Infant Feeding 1yr       | Patients who were screened for infant feeding choice at the age of 1 year (350–394 days)         |
| Lead Screening           | The most recent blood lead test from site-specified taxonomy BQI BLOOD LEAD TESTS                |
| Last Dental Visit        | The most recent dental visit   |
| ADD/ADHD Dx              | The most recent diagnosis from taxonomy BQI ADD/ADHD DXS   |
| Last 3 Well Child Visits | The last three visits where the Purpose of Visit was from SNOMED subset PXR BQI WELL CHILD VISIT |
| Last ASQ                 | All the most recent ASQ measurements   |
| Last Hearing Screening   | The most recent hearing exam   |
| Last Vision Screening    | The most recent eye exam or vision screening measurement   |

## A.5.11 Prenatal

| Column                   | Information                                  |
|--------------------------|--|
| Currently Pregnant?      | The value from the Reproductive Factors file |
| Definitive Delivery Date | The value from the Reproductive Factors file |

| Column                    | Information  |
|---------------------------|--|
| Estimated Gestational Age | The Estimated Gestational Age measurement (EGA) from the V Measurement file  |
| High Risk                 | Based on the prenatal problems prioritized in the prenatal package in EHR.   |
| Gravida                   | The Total Number of Pregnancies recorded in the Reproductive Factors file  |
| 3rd Trim RPR              | The third trimester is weeks 27–40, counted from the Definitive Delivery Date.<br><br>RPR lab test is determined from taxonomy BQI SYPHILIS REAGIN LOINC or BQI SYPHILIS REAGIN TEST TAX   |
| 3rd Trim TPA              | TPA lab test is determined from taxonomy BQI SYPHILIS TP-AB LOINC or BQI SYPHILIS TP-AB TEST TAX   |
| AOD (4P)                  | The current date and value of the Health Factor AOD (4PS)  |
| Abortions                 | The number of abortions recorded in the Reproductive Factors file  |
| BMI 1st Trimester         | Based on the definitive delivery date, this is the BMI value that is the most current during Trimester 1   |
| BMI 2nd Trimester         | Based on the definitive delivery date, this is the BMI value that is the most current during Trimester 2   |
| BMI 3rd Trimester         | Based on the definitive delivery date, this is the BMI value that is the most current during Trimester 3   |
| Ectopic Pregnancies       | Number of ectopic pregnancies recorded in the Reproductive Factors file  |
| Estimated Delivery Date   | Based on the most recent date of the EDD (LMP), EDD (ULTRASOUND), EDD (CLINICAL PARAMETERS), or EDD (METHOD UNKNOWN) dates from the Reproductive Factors file  |
| Full Term Births          | Number of full-term births recorded in the Reproductive Factors file   |
| Initial BMI               | Based on the definitive delivery date, this is the BMI value that occurred before the beginning of the first trimester.<br><br>This is to establish a baseline for the pregnancy.  |
| Initial RPR Lab           | The initial prenatal visit is determined by the date of the Initial Prenatal Visit note. If no note is found in the iCare Site Parameters - Pregnancy, it will look at CPT 0500F (INITIAL PRENATAL CARE VISIT) or CPT 0501F (PRENATAL FLOW SHEET). If no note or CPT is found, the date range is determined to be weeks 1–13, counting back from the Definitive Delivery Date.<br><br>RPR lab test is determined from taxonomy BQI SYPHILIS REAGIN LOINC or BQI SYPHILIS REAGIN TEST TAX |
| Initial TPA Lab           | TPA lab test is determined from taxonomy BQI SYPHILIS TP-AB LOINC or BQI SYPHILIS TP-AB TEST TAX   |
| Living Children           | Number of living children recorded in the Reproductive Factors file  |

| Column             | Information  |
|--------------------|--|
| Miscarriages       | Number of miscarriages recorded in the Reproductive Factors file   |
| Multiple Births    | Number of multiple births recorded in the Reproductive Factors file  |
| Postpartum RPR     | Postpartum is from the Definitive Delivery Date to 60 days past the Definitive Delivery Date.<br><br>RPR lab test is determined from taxonomy BQI SYPHILIS REAGIN LOINC or BQI SYPHILIS REAGIN TEST TAX  |
| Postpartum TPA     | TPA lab test is determined from taxonomy BQI SYPHILIS TP-AB LOINC or BQI SYPHILIS TP-AB TEST TAX   |
| Premature Births   | Number of premature births recorded in the Reproductive Factors file   |
| Syphilis Treatment | If a patient had a prescription found in RXNORM subsets: RXNO BQI BICILLIN (PCN G BENZ), RXNO BQI PCN G AQ CRYST INJ, RXNO BQI PCN G PROCAINE INJ (see Taxonomy View/Edit for matched drugs) during the expected pregnancy dates (definitive delivery date – 280 days) |
| Trimester 1 Dates  | The expected dates of the first trimester are based on the definitive delivery date (weeks 1–13, days 1–97)  |
| Trimester 2 Dates  | The expected dates of the second trimester are based on the definitive delivery date (weeks 14–26, days 98–188)  |
| Trimester 3 Dates  | The expected dates of the third trimester based on the definitive delivery date (weeks 27–40, days 189–280)  |
| Lab tests          | The most recent lab tests entered in site-specified taxonomy BQI PRENATAL TAX  |

### A.5.12 STI/STD

| Column                    | Information   |
|---------------------------|---|
| Last Chlamydia Dx         | The most recent diagnosis in the IPL using taxonomy BKM CHLAMYDIA DXS and SNOMED subset PXRMBQI CHLAMYDIA   |
| Last Gonorrhea Dx         | The most recent diagnosis in the IPL using taxonomy BQI GONORRHEA DXS and SNOMED subset PXRMBQI GONORRHEA   |
| Last Syphilis Dx          | The most recent diagnosis in the IPL using taxonomy BKM SYPHILIS DXS and SNOMED subset PXRMBQI PRIMARY SYPHILIS   |
| Last HIV Dx               | The most recent diagnosis in the IPL using taxonomy BQI HIV DXS and SNOMED subset PXRMBQI HIV INFECTION OR AIDS   |
| Most Recent Chlamydia Lab | The most recent lab test using taxonomies BQI C.TRACH SPECIFIC LOINC, BQI C.TRACH SPECIFIC TAX, BQI C.TRACH NON-SPECIFIC LOINC, BQI C.TRACH NON-SPECIFIC TAX, BQI CHLAMYDIA CULTURE LOINC, BQI CHLAMYDIA NUCLEIC LOINC, BQI CHLAMYDIA ANTIGEN LOINC |

| Column                         | Information  |
|--------------------------------|--|
| Most Recent Gonorrhea Lab      | The most recent lab test using taxonomies BKM GONORRHEA LOINC CODES, BKM GONORRHEA TEST TAX, BQI GONORRHEA NUCLEIC LOINC, BQI GONORRHEA CULTURE LOINC  |
| Most Recent HIV Lab            | The most recent lab test using taxonomies BQI HIV AB QUAL SCREEN LOINC, BQI HIV QUAL CONFIRM LOINC, BQI HIV AB QUAL SCREEN TAX, BQI HIV QUAL CONFIRM TAX, BQI HIV ID SPEC CONFIRM LOINC, BQI HIV QUAL NUC ACID LOINC, BQI HIV ID SPEC CONFIRM TAX, BQI HIV QUAL NUC ACID TAX, BQI HIV QUAL ANTIGEN LOINC, BQI HIV VIROLOGIC TEST LOINC, BQI HIV QUAL ANTIGEN TAX, BQI HIV VIROLOGIC TEST TAX, BQI HIV AB QUANT SCREEN LOINC, BQI HIV QUANT CONFIRM LOINC, BQI HIV AB QUANT SCREEN TAX, BQI HIV QUANT CONFIRM TAX, BQI HIV QUANT NUC ACID LOINC, BQI HIV QUANT ANTIGEN LOINC, BQI HIV QUANT NUC ACID TAX, BQI HIV QUANT ANTIGEN TAX |
| Most Recent Syphilis Lab       | The most recent lab test using taxonomies BQI SYPHILIS TP-AB LOINC, BQI SYPHILIS TP-AB TEST TAX, BQI SYPHILIS REAGIN LOINC, BQI SYPHILIS REAGIN TEST TAX   |
| Last Chancroid Dx              | The most recent diagnosis in the IPL using taxonomy BKM CHANCROID DXS and SNOMED subset PXRMBQI CHANCROID  |
| Last Genital Herpes Dx         | The most recent diagnosis in the IPL using taxonomy BKM GENITAL HERPES DX  |
| Last Genital Warts Dx          | The most recent diagnosis in the IPL using taxonomy BKM GENITAL WARTS DXS  |
| Last HPV Dx                    | The most recent diagnosis in the IPL using taxonomy BKM HPV DXS  |
| Last Hep B Dx                  | The most recent diagnosis in the IPL using taxonomy BKM HEP B DXS  |
| Last Hep C Dx                  | The most recent diagnosis in the IPL using taxonomy BKM HEP C DXS and SNOMED subset PXRMBQI HEPATITIS C VIRUS INF  |
| Last Lympho Venereum Dx        | The most recent diagnosis in the IPL using taxonomy BKM LGV DXS  |
| Last Trichomonas Dx            | The most recent diagnosis in the IPL using taxonomy BKM TRICHOMONIASIS DXS   |
| Most Recent Chancroid Lab      | The most recent lab test using taxonomy BQI CHANCROID OTHER LOINC  |
| Most Recent Genital Herpes Lab | The most recent lab test using taxonomies BQI HERPES SIMPLEX ANTIBODY LC, BQI HERPES SIMPLEX NUCL LOINC, BQI HERPES SIMPLEX CULT LOINC   |
| Most Recent Hep B Lab          | The most recent lab test using taxonomies BQI HEP B QUAL TEST LOINC, BQI HEP B QUANT TEST LOINC, BQI HEP B QUAL TEST TAX, BQI HEP B QUANT TEST TAX   |

| Column                | Information  |
|-----------------------|--|
| Most Recent Hep C Lab | The most recent lab test using taxonomies BQI HEP C QUAL TEST LOINC, BQI HEP C QUANT TEST LOINC, BQI HEP C QUAL TEST TAX, BQI HEP C QUANT TEST TAX, BQI HEP C ANTIBODY LOINC, BQI HEP C ANTIGEN LOINC, BQI HEP C NUCLEIC LOINC |

### A.5.13 Pain Management

| Column                                     | Information   |
|--|---|
| Current SUD Dx                             | IPL entries using SNOMED subset PICK BH-SUD.  |
| Pain Agreement Note                        | The most recent PAIN AGREEMENT Note is on file for this patient.  |
| Rescinded Pain Agree on Note               | The most recent RESCINDED PAIN AGREEMENT Note is on file for this patient.  |
| Informed Consent Note                      | The most recent INFORMED CONSENT Note is on file for this patient.  |
| Last Urine Drug Screen (UDS)               | The most recent Urine Drug Screen (UDS) lab test is on file for this patient. Uses taxonomy BQI URINE DRUG SCREEN TAX.  |
| Last PHQ9                                  | The most recent PHQ9 measurement.   |
| Last GAD7                                  | The most recent GAD7 measurement.   |
| GPRA SBIRT                                 | The value of the GPRA SBIRT measure for this patient.   |
| GPRA SBIRT: Positive Screen                | The value of the GPRA SBIRT: Positive Screen measure for this patient.  |
| GPRA SBIRT: Intervention                   | The value of the GPRA SBIRT: Intervention measure for this patient.   |
| # ER/UC Prescriptions                      | In the last 365 days, several Opioid prescriptions attributed to Clinic Code 30 = EMERGENCY MEDICINE and 80 = URGENT CARE using RXNORM subset RXNO BQI OPIOID PAIN MED. |
| Total # Prescriptions                      | In the last 365 days, the total number of prescriptions using RXNORM subset RXNO BQI OPIOID PAIN MED.   |
| Total # Prescriptions with <7 days' supply | In the last 365 days, the number of prescriptions had a less than 7-day supply using RXNORM subset RXNO BQI OPIOID PAIN MED.  |
| Admitted in the Last 90 Days               | Total number of hospital admissions at this facility in the last 90 days for the patient.   |
| # Inpatient Days past 90 days              | Total number of days the patient spent as an inpatient in the past 90 days.   |
| Current Inpatient?                         | Is the patient currently an inpatient at this facility?   |
| Last Opioid Prescription                   | The most recent prescription uses the RXNORM subset RXNO BQI OPIOID PAIN MED. Displays the drug name SIG Quantity Last Fill Date.                                       |

| Column                    | Information  |
|---------------------------|--|
| Last adj med - Gabapentin | The most recent prescription uses the RXNORM subset RXNO BQI GABAPENTINOID. Displays the drug name SIG Quantity Last Fill Date.      |
| Last adj med - Other meds | The most recent prescription uses the RXNORM subset RXNO BQI ADJUVANT PAIN MED. Displays the drug name SIG Quantity Last Fill Date.  |
| Last Nalaxone meds        | The most recent prescription using RXNORM subset RXNO BQI OPIOID OD POISN NALOX. Displays the drug name SIG Quantity Last Fill Date. |

## A.6 Diagnostic Tags

| Column               | Meaning   |
|----------------------|---|
| Patient Name         | Name of the patient   |
| HRN                  | Patient's Health Record Number  |
| DOB                  | Patient's date of birth   |
| Age                  | Patient's age today   |
| Tag Name             | Name of the diagnostic tag  |
| Status               | Status of the tag for the patient. Values are PROPOSED, ACCEPTED, NO LONGER VALID, or SUPERCEDED. |
| Status Change Reason | Standard reasons why the tag status would have changed.   |
| Status Comment       | A comment was entered by a user when updating a diagnostic tag.                                   |
| Last Updated         | The date that the tag was updated   |
| Last Updated By      | Who updated the tag? It could be a system process or a user who updated.                          |

## A.7 Flags

| Column           | Meaning  |
|------------------|--|
| Flag Date        | Date of the visit that meets the flag criteria   |
| Patient Name     | Name of the patient  |
| HRN              | Patient's Health Record Number   |
| Sex              | F (for female), M (for male), U (unknown), gender of patient at birth  |
| Age              | Patient's age today  |
| DOB              | Patient's date of birth  |
| Flag Type        | The flag type can be Abnormal Lab, Emergency Room Visit, etc.  |
| Flag Description | Information about the visit met the flag criteria, e.g., if it was not an abnormal lab, then provider, purpose of visit (POV) narrative. If an Abnormal Lab, the lab, result, range, abnormal, and ordering provider |

| Column         | Meaning  |
|----------------|--|
| Designated PCP | The primary care primary that the patient has been assigned to |

## A.8 Referrals

| Column                  | Information   |
|-------------------------|---|
| Referral Date           | Date the referral was initiated.  |
| Referral #              | The referral number   |
| Referring Provider      | Provider who is asking for the referral   |
| Status                  | Status of the referral - ACTIVE;APPROVED;CLOSED-COMPLETED;CLOSED-NOT COMPLETED  |
| Facility Referred To    | The primary vendor  |
| Patient Type            | Whether Inpatient or Outpatient   |
| Referral Type           | Type of referral—CHS;IHS (ANOTHER FACILITY);OTHER;IN-HOUSE  |
| Expected Begin Date     | The expected date for the services to begin (i.e., admission date for a hospitalization)                              |
| Appointment Date        | The date the services began   |
| Purpose of Referral     | Text of the purpose of the referral   |
| # Visits Under Referral | The number of outpatient visits that occurred under the authority of this referral                                    |
| Actual End Date         | The date the services ended   |
| Actual LOS Hospital     | The actual length of stay for a hospital admission  |
| CHS Status              | If the referral type is CHS, the status—PENDING; APPROVED; DENIED; PENDING APPEAL                                     |
| Case Manager            | The person who is managing this case  |
| Diagnostic Category     | The ICD diagnostic category of the referral   |
| Estimated LOS Hospital  | The estimated length of stay for a hospital admission   |
| Expected End Date       | The last date services were provided under the authority of this referral.  |
| Notes to Scheduler      | Notes to be seen by the appointment clerk or the person scheduling the appointment for the patient                    |
| Payor                   | The entity that is primarily responsible for paying for the treatment the patient will receive based on this referral |
| Priority                | A value indicating the priority of this referral  |
| Procedure Category      | The CPT service category for which this patient is being referred   |

| Column               | Information   |
|----------------------|---|
| Requesting Facility  | The facility requesting the referral  |
| Schedule with # days | The provider records how soon it is necessary to schedule an appointment for this referral. |

## A.9 Consults

| Column                | Information   |
|-----------------------|---|
| Consult Date          | Date of actual entry of consultation request into the file  |
| To Service            | The name of the service that will complete the consult  |
| Status                | Status of the consult   |
| Sending Provider      | The provider who originated the order   |
| Request Type          | Whether the order is a consult or procedure   |
| Patient Type          | If the service is to be rendered on an outpatient or inpatient basis  |
| Attention To          | The name of a person that is to be alerted about the new consult  |
| Associated Results    | The reason for requesting the consult or procedure request  |
| Consult Number        | The order number of the consult   |
| From Location         | The location that sent the order to the receiving location  |
| Last Action           | The last action that was taken on the consult.  |
| Location              | The location of the patient when the consult/request order was placed   |
| Ordering Facility     | If a consult/request is sent to another Institution, this is the SENDING hospital/institution.  |
| Place of Consultation | The place of consultation: Bedside, Consultant's Choice, On Call, Emergency Room, EKG Lab   |
| Provisional Diagnosis | The ordering clinician would specify the Provisional Diagnosis on the Consult Form.   |
| Urgency               | The urgency for this order (STAT, ROUTINE, NEXT AVAILABLE, EMERGENCY, TODAY, WITHIN 24 HOURS, WITHIN 48 HOURS, WITHIN 72 HOURS, etc.) |

## A.10 Orders

| Column            | Information  |
|-------------------|--|
| Order Date/Time   | Date and time that the order was entered into RPMS                             |
| Order Number      | The unique number assigned to the order  |
| Ordering Provider | The person who requested the order   |
| Order Class       | The patient's classification for this order is either Inpatient or Outpatient. |
| Order Status      | The status of the order  |

| Column            | Information  |
|-------------------|--|
| Order Group       | This is the service to which the order is referred that determines the display group in which the order appears. |
| Ordered Item      | The individual items of the class and group that were ordered  |
| Hospital Location | The internal location associated with the order  |
| Order Start Date  | If entered, the date that the order is to start  |
| Order Stop Date   | If entered, the date that the order is to stop   |
| Who Entered       | The person who entered the order   |

## A.11 Definition Details

### A.11.1 Allergies

| Column           | Information  |
|------------------|--|
| Causative Agent  | This is the agent to which the patient had an allergic reaction.       |
| Severity         | The severity of this allergic reaction.                                |
| Signs/symptoms   | The signs or symptoms that are associated with this allergic reaction. |
| Origination Date | Date/time this allergy/adverse reaction was entered into the system.   |

### A.11.2 Sched Appts

| Column                | Information   |
|-----------------------|---|
| Appointment Date/Time | The date and time the appointment was scheduled for               |
| Hosp Location         | The internal location or clinic that the appointment was made for |
| Appt Status           | The status of the appointment                                     |
| Appt Length           | How many minutes was the appointment for                          |
| Appt Made             | The date the appointment was entered.                             |
| Check-In Entered      | The date and time of the check-in were entered.                   |
| Checked In            | The date and time the patient checked in for the appointment      |
| Checked In By         | Who checked the patient in  |
| Checked Out           | The date and time the patient checked out from the appointment.   |
| Checked Out By        | Who checked the patient out                                       |
| Checked Out Entered   | The date and time the checkout was entered.                       |
| Entered By            | Who made the appointment?   |

### A.11.3 CPTs

| Column | Information       |
|--------|-------------------|
| Date   | Date of the visit |

| Column             | Information  |
|--------------------|--|
| CPT                | The CPT code and the description.  |
| Modifier 1         | A modifier of the CPT code   |
| Modifier 2         | A modifier of the CPT code   |
| Quantity           | The number of times this procedure was done to the patient during the encounter. |
| Provider           | The encounter provider   |
| Provider Narrative | The provider narrative   |

#### A.11.4 Exams

| Column                  | Information                                     |
|-------------------------|---|
| Date                    | Date of the visit                               |
| Exam                    | Name of the exam                                |
| Result                  | The exam result                                 |
| Date/Time Last Modified | The date/time that the record was last modified |
| Encounter Provider      | The encounter provider                          |
| Entered By              | Who entered the exam record?                    |
| Modified By             | Who last modified the exam record               |

#### A.11.5 ER Visits

| Column               | Information  |
|----------------------|--|
| Admit Date           | The date/time the person was admitted to the ER.         |
| Discharge Date       | The date/time the person was discharged from the ER.     |
| Discharge Acuity     | Acuity of the patient at discharge from the ER           |
| Discharge Type       | Type of discharge from the ER                            |
| Primary Diagnosis    | The patient's diagnosis                                  |
| Dx Narrative         | Diagnosis narrative                                      |
| Admitting Provider   | A provider who decided to admit the patient from the ER  |
| Discharge Nurse      | Nurse at the time of discharge                           |
| Discharge Provider   | Provider at the time of discharge                        |
| Presenting Complaint | Free text complaints of problems when coming into the ER |
| Transferred To       | Where the patient was transferred to                     |
| Transport Mode       | How the patient came to the ER                           |
| Triage Nurse         | The nurse who triaged the incoming patient               |
| Visit Type           | The type of ER visit                                     |

## A.11.6 High Risk\Immunocompromised

| Column                       | Information  |
|------------------------------|--|
| HR Condition                 | The name of the high-risk condition                      |
| HR Condition Code            | The code that determined the high-risk condition         |
| HR Onset Date                | The onset date of the high-risk condition                |
| HR Found In                  | Where the code was found that determined the condition   |
| Immunocompromised Condition  | The name of the immunocompromised condition              |
| Immunocompromised Code       | The code that determined the immunocompromised condition |
| Immunocompromised Onset Date | The onset date of the condition                          |
| Immunocompromised Found In   | Where the condition code was found                       |

## A.11.7 Health Factors

| Column                  | Information   |
|-------------------------|---|
| Visit Date              | The Visit Date where the health factor was entered            |
| Health Factor           | The individual health factor                                  |
| Health Factor Category  | The category of health factor                                 |
| Date/Time Last Modified | The date and time the health factor record was last modified. |
| Encounter Provider      | The provider who was the encounter provider                   |
| Entered By              | The person who entered the health factor record               |
| Modified By             | The person who last modified the health factor record         |

## A.11.8 Immunizations

| Column                  | Information   |
|-------------------------|---|
| Visit Date              | The Visit Date when the immunization was given            |
| Vaccination             | The full vaccine name of the vaccination                  |
| Vaccine Group           | The group that the vaccine is assigned to                 |
| Vaccine Short Name      | The short name of the vaccine                             |
| Admin Notes             | Any administration notes are written for the vaccination. |
| Date Entered            | The date the vaccination was entered                      |
| Date/Time Last Modified | The date and time the vaccination record was modified.    |
| Encounter Provider      | The provider associated with the vaccination event        |

| Column              | Information  |
|---------------------|--|
| Event Date/Time     | The immunization event date and time                         |
| Injection Site      | The injection site of the vaccination                        |
| Last Modified By    | Who last modified the vaccination record                     |
| Location            | The location where the vaccination is recorded as being done |
| Lot #               | The lot number of the vaccine                                |
| Series              | Which series of immunization type was given to the patient   |
| Service Category    | The category of the visit                                    |
| Vaccine Eligibility | The patient's vaccine eligibility                            |
| Who Entered         | A person who entered the vaccination record                  |

### A.11.9 Inpatient

|                    | Information   |
|--------------------|---|
| Admission Date     | Date patient admitted   |
| Admit Type         | Type of admission   |
| Attending Provider | Who the attending provider was                                    |
| Ward               | The ward(s) that the patient might have been in during their stay |
| Specialty          | The treatment specialty of the patient's stay                     |
| Discharge Date     | The date the patient was discharged                               |
| Discharge Type     | Type of discharge   |
| Diagnosis          | The initial admitting diagnosis                                   |
| Nurse              | Nurses who may have done notes on the patient during their stay   |
| Transfer Facility  | The facility where the patient might have been transferred to     |

### A.11.10 Labs

| Column               | Information   |
|----------------------|---|
| Date                 | The visit date of the lab                               |
| Lab Test             | The name of the lab test                                |
| Lab Result           | The result of the lab test                              |
| Normal/Abnormal      | Whether the result indicates if it is abnormal or not   |
| Ordering Physician   | Provider who ordered the lab test                       |
| Accession #          | The accession number of the lab test                    |
| Collection Date/Time | When the lab specimen was collected                     |
| Comment              | Any comment about the lab test                          |
| Location             | What facility location was the lab test associated with |

| Column           | Information  |
|------------------|--|
| Result Date/Time | The date and time of the lab test result.                    |
| Status           | The status of the lab test (resulted, accessioned, modified) |

### A.11.11 Measurements

| Column                  | Information  |
|-------------------------|--|
| Date                    | Visit date of the measurement  |
| Measurement             | The name of the measurement  |
| Result                  | The measurement result   |
| Date/Time Last Modified | The date and time the measurement was last modified.                 |
| Encounter Provider      | The visit provider   |
| Entered By              | Who entered the measurement record                                   |
| Modified By             | Who last modified the measurement record                             |
| Percentile              | If the patient's age is less than 16, based on the height and weight |
| Qualifier(s)            | The qualifier associated with the vital type of this measurement     |
| Supplemental O2         | The information on the supplemental oxygen                           |
| VC/VU Numerator         | Vision Corrected/Vision Uncorrected value                            |

### A.11.12 Medications

| Column              | Information                                       |
|---------------------|---|
| Date                | The visit date of the medication record           |
| Medication          | The name of the medication                        |
| Instructions        | Are any specific medication instructions          |
| Days                | Number of days the medication is prescribed for   |
| Quantity            | The quantity of the medication                    |
| Ordering Physician  | A provider who ordered the medication             |
| # of Refills        | The number of refills allowed for this medication |
| Last Dispensed Date | Date the medication was last dispensed.           |
| Prescription Status | The status of the prescription                    |

### A.11.13 Notes

| Column          | Information                     |
|-----------------|---------------------------------|
| Date Entered    | The visit date of the note      |
| Note Title      | The title of the note           |
| Author/Dictator | The person who entered the note |

| Column                | Information  |
|-----------------------|--|
| Expected Cosigner     | The person who is expected to be a cosigner if indicated           |
| Hosp Location         | The clinic location associated with the note                       |
| Site Location         | The facility where the note was entered                            |
| Status                | The status of the note   |
| Additional Signers    | If there were any additional signers to the note                   |
| Cosignature Date/Time | The date/time the note was cosigned.                               |
| Cosigned By           | The person who cosigned the note                                   |
| Expected Signer       | The person who is expected to be the signer of the note.           |
| Signature Date/Time   | The date/time the note was signed.                                 |
| Signed By             | The person who signed the note                                     |
| Subject               | The subject header for the note                                    |
| Visit Date            | The date of the visit that the note is associated with             |
| Visit Type            | The service category of the visit that the note is associated with |

### A.11.14 Orders

| Column                       | Information  |
|------------------------------|--|
| Order Date                   | The date and time that the order was entered into RPMS   |
| Order Number                 | The unique number assigned to the order  |
| Provider                     | The person who requested the order   |
| Class                        | The patient's classification for this order is either Inpatient or Outpatient.                                   |
| Status                       | The status of the order  |
| Group                        | This is the service to which the order is referred that determines the display group in which the order appears. |
| Item                         | The individual items of the class and group that were ordered  |
| Hosp Location                | The internal location associated with the order  |
| Start Date                   | If entered, the date that the Order is to start  |
| Stop Date                    | If entered, the date that the Order is to stop   |
| ICD Indicator                | The ICD code from the Order dialog response  |
| Indicator Text               | The ICD text from the Order dialog response  |
| Most Recent Action Date/Time | The date/time of the most recent action taken on the order   |
| SNOMED Concept ID            | The SNOMED concept ID code from the Order dialog response  |
| Site Location                | The facility where the order was entered   |
| Who Entered                  | The person who entered the order   |

## A.11.15 Patient Education

| Column                 | Information   |
|------------------------|---|
| Date                   | The visit date of the education   |
| Topic                  | The topic on which education was delivered  |
| Time Spent             | The number of minutes that the education topic was provided                         |
| Level of Understanding | The provider's assessment of how well the patient understood the education received |
| Provider               | The provider of the education topic   |
| Comments               | Narrative text about the patient education given.                                   |
| Learning Readiness     | Patient's readiness to learn the education topic                                    |
| Setting                | Whether the education was provided in a group setting or to the individual patient  |

## A.11.16 POV

| Column               | Information  |
|----------------------|--|
| Date                 | The visit date   |
| Purpose of Visit     | The ICD code purpose of the visit  |
| Primary/Secondary    | Whether this purpose of visit is the primary or a secondary reason for the visit |
| First/Revisit        | Is this visit a first visit for this POV or a revisit?                           |
| Encounter Provider   | The provider for the visit   |
| SNOMED Description   | The SNOMED description for the visit   |
| Provider Narrative   | The provider's text describing the diagnosis that was treated at the visit       |
| SNOMED Concept ID    | The SNOMED ID for the visit  |
| Cause of DX          | The cause of the diagnosis   |
| Date Entered         | The date the visit was entered.  |
| Entered By           | The person who entered the visit   |
| External Cause       | An External Cause code for the visit   |
| Last Modified        | When the visit record was last modified  |
| Laterality Qualifier | The laterality attribute/qualifier value   |
| Modified By          | The person who last modified the record  |
| Modifier             | How a provider may modify the diagnosis or problem                               |
| Place of Accident    | If the purpose of the visit was an accident, what is the accident place is       |

| Column               | Information                              |
|----------------------|--|
| Place of Occurrence  | A valid Place of Occurrence code         |
| Present on Admission | Was this diagnosis present on admission? |

### A.11.17 Problems

| Column             | Information   |
|--------------------|---|
| Problem            | The problem with the ICD code   |
| Date of Onset      | Date of onset, if entered, otherwise it is the date entered.              |
| Status             | Status of the problem   |
| Provider Narrative | The provider's text describing the problem                                |
| Facility           | The facility at which this problem was initially observed and documented. |
| Date Last Modified | Date the problem was last modified.                                       |
| Problem ID         | Serves as a unique identifier for this problem                            |
| Problem Notes      | Notations appended to a problem for further clarification or information. |
| SNOMED Concept     | The SNOMED Concept ID used to identify the problem.                       |
| Severity           | The severity of the problem   |
| Used as Inpatient  | Has this problem been used for an inpatient visit?                        |
| Used as POV        | Has this problem been used for an outpatient visit as a purpose of visit? |
| User Last Modified | The person who last modified the problem                                  |

### A.11.18 Reminder Notifications

| Column              | Information   |
|---------------------|---|
| Reminder Due        | The date that the selected reminder is due by                       |
| Notification Date   | The most recent date that a notification was done for this reminder |
| Notification Method | The method of the notification                                      |
| Completion Date     | If the reminder was completed, the date it was no longer due.       |
| Creator             | Who created the notification  |
| Eligible Provider   | If a particular provider is indicated for the reminder notification |

### A.11.19 Visits

| Column          | Information                    |
|-----------------|--------------------------------|
| Visit Date/Time | The date and time of the visit |

| Column                  | Information   |
|-------------------------|---|
| Location of Encounter   | The facility of the visit   |
| Clinic                  | The clinic stop code associated with the visit                    |
| Hosp Location           | The internal location/clinic/ward associated with the visit       |
| Service Category        | The category of the visit   |
| Providers               | The providers associated with the visit                           |
| Created By              | The person who created the visit                                  |
| Date/Time Last Modified | The date/time the visit was last modified.                        |
| Last Modified By        | The person who last modified the visit                            |
| Outside Location        | If the location of the encounter is OTHER, the free text location |
| Outside Provider        | If the location of the encounter is OTHER, the free text provider |

### A.11.20 Waitlists

| Column                | Information   |
|-----------------------|---|
| Date/Time Added       | The date/time the request was added to the waitlist.                                |
| Priority              | The priority assigned to the waitlist request.                                      |
| Provider              | The provider assigned to the waitlist request.                                      |
| Clinic                | The clinic of the waitlist request  |
| Recall Date           | The date the waitlist request should be reviewed by                                 |
| Comments              | Any comments associated with the waitlist request                                   |
| Add Reason            | The reason the request was added to the waitlist                                    |
| Date Removed          | The date the request was removed from the waitlist                                  |
| Last Appt with Clinic | The most recent appointment of the patient with the clinic of this waitlist request |
| Next Appt with Clinic | The next appointment of the patient with the clinic on this waitlist request        |
| Resolution            | The reason the request was removed from the waitlist                                |
| Who Added             | The person who added the request to the waitlist                                    |
| Who Removed           | The person who removed the request from the waitlist                                |

## Appendix B High-Risk Conditions

### B.1 ALCOHOL ABUSE

## Appendix D Rules of Behavior

The Resource and Patient Management (RPMS) system is a United States Department of Health and Human Services (HHS), Indian Health Service (IHS) information system that is **FOR OFFICIAL USE ONLY**. The RPMS system is subject to monitoring; therefore, no expectation of privacy shall be assumed. Individuals found performing unauthorized activities are subject to disciplinary action, including criminal prosecution.

All users (Contractors and IHS Employees) of RPMS will be provided a copy of the Rules of Behavior (RoB) and must acknowledge that they have received and read them before being granted access to an RPMS system, per IHS policy.

- For a listing of general RoB for all users, see the most recent edition of the *IHS General User Security Handbook* (SOP 06-11a).
- For a listing of system administrators/managers' rules, see the most recent edition of the *IHS Technical and Managerial Handbook* (SOP 06-11b).

Both documents are available at this IHS website:

<https://home.ihs.gov/security/index.cfm/>.

|  |
|--|
| <b>Note:</b> Users must be logged on to the IHS D1 Intranet to access these documents. |
|--|

The RoB listed in the following sections are specific to RPMS.

### D.1 All RPMS Users

In addition to these rules, each application may include additional RoBs that may be defined within that application's documentation (e.g., Dental, Pharmacy).

#### D.1.1 Access

RPMS users shall

- Only use data for which you have been granted authorization.
- Only give information to personnel who have access authority and have a need to know.
- Always verify a caller's identification and job purpose with your supervisor or the entity provided as an employer before providing any information system access, sensitive or nonpublic agency information.
- Be aware that personal use of information resources is authorized on a limited basis within the provisions of *Indian Health Manual* Part 8, "Information Resources Management," Chapter 6, "Limited Personal Use of Information Technology Resources."

RPMS users shall not

- Retrieve information for someone who does not have the authority to access the information.
- Access, research, or change any user account, file, directory, table, or record not required to perform their *official* duties.
- Store sensitive files on a PC hard drive, portable devices, or media if access to the PC or files cannot be physically or technically limited.
- Exceed their authorized access limits in RPMS by changing information or searching databases beyond the responsibilities of their jobs or by divulging information to anyone not authorized to know that information.

### D.1.2 Information Accessibility

RPMS shall restrict access to information based on the type and identity of the user. However, regardless of the type of user, access shall be restricted to the minimum level necessary to perform the job.

RPMS users shall

- Access only those documents they created and those other documents to which they have a valid need-to-know and to which they have expressly granted access through an RPMS application based on their menus (job roles), keys, and FileMan access codes. Some users may be afforded additional privileges based on their functions, such as system administrator or application administrator.
- Acquire a written preauthorization per IHS policies and procedures before interconnection to or transferring data from RPMS.

### D.1.3 Accountability

RPMS users shall

- Behave ethically, technically proficient, informed, and trustworthy.
- Log out of the system whenever they leave the vicinity of their personal computers (PCs).
- Be alert to threats and vulnerabilities in the security of the system.
- Report all security incidents to their local Information System Security Officer (ISSO).
- Differentiate tasks and functions to ensure that no person has sole access to or control of essential resources.
- Protect all sensitive data entrusted to them as part of their government employment.

- Abide by all Department and Agency policies, procedures, and guidelines related to ethics, conduct, behavior, and information technology (IT) information processes.

#### D.1.4 Confidentiality

RPMS users shall

- Be aware of the sensitivity of electronic and hard copy information and protect it accordingly.
- Store hard copy reports/storage media containing confidential information in a locked room or cabinet.
- Erase sensitive data on storage media before reusing or disposing of the media.
- Always protect all RPMS terminals from public viewing.
- Abide by all Health Insurance Portability and Accountability Act (HIPAA) regulations to ensure patient confidentiality.

RPMS users shall not:

- Allow confidential information to remain on the PC screen when someone has unauthorized access to that data nearby.
- Store sensitive files on a portable device or media without encrypting.

#### D.1.5 Integrity

RPMS users shall

- Protect their systems against viruses and similar malicious programs.
- Observe all software license agreements.
- Follow industry standard procedures for maintaining and managing RPMS hardware, operating system software, application software, or database software and database tables.
- Comply with all copyright regulations and license agreements associated with RPMS software.

RPMS users shall not:

- Violate federal copyright laws.
- Install or use unauthorized software within the system libraries or folders.
- Use freeware, shareware, or public domain software on/with the system without their manager's written permission and without scanning it for viruses first.

### D.1.6 System Logon

RPMS users shall

- Have a unique User Identification/Account name and password.
- Be granted access based on authenticating the account name and password entered.
- Be locked out of an account after five successive failed login attempts within a specified period (e.g., one hour).

### D.1.7 Passwords

RPMS users shall

- Change passwords at least every 90 days.
- Create passwords with a minimum of eight characters.
- If the system allows, use a combination of alpha-numeric characters for passwords, with at least one uppercase letter, one lowercase letter, and one number. If possible, it is recommended that a unique character be used in the password.
- Change vendor-supplied passwords immediately.
- Protect passwords by committing them to memory or storing them safely (do not store passwords in login scripts or batch files).
- Change passwords immediately if the password has been seen, guessed, or otherwise compromised, and report the compromise or suspected compromise to their ISSO.
- Keep user identifications (IDs) and passwords confidential.

RPMS users shall not:

- Use common words found in any dictionary as a password.
- Use obvious readable passwords or passwords that incorporate personal data elements (e.g., user's name, date of birth, address, telephone number, or social security number; names of children or spouses; favorite band, sports team, or automobile; or other personal attributes).
- Share passwords/IDs with anyone or accept using another's password/ID, even if offered.
- Reuse passwords. A new password must contain no more than five characters per eight characters from the previous password.
- Post passwords.
- Keep a password list in a prominent place, such as under keyboards, in desk drawers, or in any other location where it might be disclosed.

- Give a password out over the phone.

### D.1.8 Backups

RPMS users shall

- Plan for contingencies such as physical disasters, loss of processing, and disclosure of information by preparing alternate work strategies and system recovery mechanisms.
- Make backups of systems and files on a regular, defined basis.
- If possible, store backups away from the system in a secure environment.

### D.1.9 Reporting

RPMS users shall

- Contact and inform their ISSO that they have identified an IT security incident and begin the reporting process by providing an IT Incident Reporting Form regarding this incident.
- Report security incidents as detailed in the *IHS Incident Handling Guide* (SOP 05-03).

RPMS users shall not:

- Assume that someone else has already reported an incident. The risk of an incident going unreported far outweighs the possibility that an incident gets reported more than once.

### D.1.10 Session Timeouts

RPMS system implements system-based timeouts that back users out of a prompt after no more than 5 minutes of inactivity.

RPMS users shall:

- Utilize a screen saver with password protection set to suspend operations at no greater than 10 minutes of inactivity. This will prevent inappropriate access and viewing of any material displayed on the screen after some period of inactivity.

### D.1.11 Hardware

RPMS users shall

- Avoid placing system equipment near obvious environmental hazards (e.g., water pipes).
- Keep an inventory of all system equipment.

- Keep records of maintenance/repairs performed on system equipment.

RPMS users shall not

- Eat or drink near the system equipment.

### D.1.12 Awareness

RPMS users shall

- Participate in organization-wide security training as required.
- Read and adhere to security information about system hardware and software.
- Take the annual information security awareness.
- Read all applicable RPMS manuals for the applications used in their jobs.

### D.1.13 Remote Access

Each subscriber organization establishes its policies for determining which employees may work at home or in other remote workplace locations. Any remote work arrangement should include policies that:

- Are in writing.
- Provide remote user authentication using ID and password or other acceptable technical means.
- Outline the work requirements, security safeguards, and procedures the employee must follow.
- Ensure adequate storage of files, removal, and nonrecovery of temporary files created in processing sensitive data, virus protection, and intrusion detection, and provide physical security for government equipment and sensitive data.
- Establish mechanisms to back up data created or stored at alternate work locations.

Remote RPMS users shall

- Remotely access RPMS through a virtual private network (VPN) whenever possible. Direct dial-in access must be justified and approved in writing, and its use must be secured per industry best practices or government procedures.

Remote RPMS users shall not

- Disable any encryption for network, internet, and Web browser communications.

## D.2 RPMS Developers

RPMS developers shall

- Always be mindful of protecting the confidentiality, availability, and integrity of RPMS when writing or revising code.
- Always follow the IHS RPMS Programming Standards and Conventions (SAC) when developing for RPMS.
- Only access information or code within the namespaces they have been assigned as part of their duties.
- Remember that all RPMS code is the property of the U.S. Government, not the developer.
- Not access live production systems without obtaining appropriate written access and shall only retain that access for the shortest period possible to accomplish the task that requires the access.
- Fully observe the separation of duties policies and procedures as possible.
- Document or comment on all changes to any RPMS software when the change or update is made. Documentation shall include the programmer's initials, change date, and reason for the change.
- Use checksums or other integrity mechanisms when releasing their certified applications to assure the integrity of the routines within their RPMS applications.
- Follow the industry's best standards for systems assigned to develop, maintain, and abide by all department and agency policies and procedures.
- Document and implement security processes whenever available.

RPMS developers shall not:

- Write any code that adversely impacts RPMS, such as backdoor access, "Easter eggs," time bombs, or any other malicious code, or make inappropriate comments within the code, manuals, or help frames.
- Grant any user or system administrator access to RPMS unless proper documentation is provided.
- Release any sensitive agency or patient information.

## D.3 Privileged Users

Personnel with significant access to processes and data in RPMS, such as system security administrators, systems administrators, and database administrators, have added responsibilities to ensure the secure operation of RPMS.

Privileged RPMS users shall

- Verify that any user requesting access to any RPMS system has completed the appropriate access request forms.
- Ensure that government and contractor personnel understand and comply with license requirements. End users, supervisors, and functional managers are ultimately responsible for this compliance.
- Advise the system owner on matters concerning information technology security.
- Assisted the system owner in developing security plans, risk assessments, and supporting documentation for the certification and accreditation process.
- Ensure that any changes to RPMS that affect contingency and disaster recovery plans are conveyed to the person responsible for maintaining continuity of operations plans.
- Ensure that adequate physical and administrative safeguards are operational within their areas of responsibility and that access to information and data is restricted to authorized personnel on a need-to-know basis.
- Verify that users have received appropriate security training before allowing access to RPMS.
- Implement applicable security access procedures and mechanisms, incorporate appropriate levels of system auditing, and review audit logs.
- Document and investigate known or suspected security incidents or violations and report them to the ISSO, Chief Information Security Officer (CISO), and systems owner.
- Protect the supervisor, superuser, or system administrator passwords.
- Avoid instances where the same individual is responsible for several functions (i.e., transaction entry and approval).
- Watch for unscheduled, unusual, and unauthorized programs.
- Help train system users on the appropriate use and security of the system.
- Establish protective controls to ensure the system's accountability, integrity, confidentiality, and availability.
- Replace passwords when a compromise is suspected. Delete user accounts as quickly as possible when the system no longer authorizes the user. Passwords forgotten by their owner should be replaced, not reissued.
- Terminate user accounts when a user transfers or has been terminated. If the user has the authority to grant authorizations to others, review these other authorizations. Retrieve any devices used to gain access to the system or equipment. Cancel login IDs and passwords and delete or reassign related active and backup files.

- Use a suspend program to prevent an unauthorized user from logging on with the current user's ID if the system is left on and unattended.
- Verify the identity of the user when resetting passwords. This can be done in person or by having the user answer a question that can be compared to one in the administrator's database.
- They shall follow the industry's best standards for systems they are assigned to and abide by all department and agency policies and procedures.

Privileged RPMS users shall not

- Access files, records, systems, etc., that are not explicitly needed to perform their duties.
- Grant any user or system administrator access to RPMS unless proper documentation is provided.
- Release any sensitive agency or patient information.

# Glossary

**Aggregated**

A sum of data.

**Context Menu**

The menu of options displays when you right-click on an entity.

**Designated Primary Care Provider (DPCP)**

In RPMS, the provider's name is assigned as the primary care physician for a patient or group at a specific facility. This is not a required function.

**Free Text Field**

A field where the user can type text, just like typing a note to someone.

**iCare Package Manager**

The designated person with authority to manage all information settings for iCare.

**Panel List**

The list of patient panels owned by the user.

**Providers**

Any staff member in an I/T/U facility who provides direct healthcare to patients, e.g., general practice or specialty physicians, registered nurses, social workers, physician assistants, etc.

Within RPMS, the term "provider" has different specific meanings. See definitions for Designated Primary Care Provider (DPCP), Primary Provider, and Visit Providers.

**Reminders**

Health Maintenance Reminders review patient data and alert the provider to procedures that might be overdue for the patient. Reminders can be based on age and gender and include typical clinical prevention measures, such as pap smears.

**Tagging**

A process to review the patient's data and categorize (tag) the patient with one or more clinical diagnoses, such as Known CVD or Diabetes. Tags will provide more accurate reminders prioritized more appropriately for a patient's multiple conditions.

**Taxonomy**

In RPMS, a grouping of functionally related data elements, such as ICD codes, are created and maintained within the RPMS Taxonomy Setup application. Taxonomies will define diagnoses, procedures, lab tests, medications, and other clinical data types.

Please see your CRS coordinator if you need a change or addition to an existing taxonomy.

**Tooltip/Hover Help**

A common GUI element is used to provide additional information to users. To display a Tooltip, hover the mouse pointer, without clicking, over a column heading or field.

**Visit Provider**

In RPMS, the provider(s) who cared for a patient on a specific visit. Each patient's visit must have at least a primary provider entered. Visits can also have one or more secondary providers. The primary visit provider might or might not be the same provider as the patient's DPCP and can change on each visit, depending on the visit type or the clinic staffing.

## Acronym List

| Acronym | Meaning                                |
|---------|--|
| CAC     | Clinical Application Coordinator       |
| CMET    | Care Management Event Tracking         |
| CRS     | Clinical Reporting System              |
| CVD     | Cardiovascular Disease                 |
| DOB     | Date of Birth                          |
| EHR     | Electronic Health Record               |
| ER      | Emergency room                         |
| GPRA    | Government Performance and Results Act |
| GUI     | Graphical User Interface               |
| HRN     | Health Record Number                   |
| HTN     | Hypertension                           |
| IHS     | Indian Health Service                  |
| NLV     | No longer valid                        |
| PCP     | Primary Care Physician                 |
| RPMS    | Resource and Patient Management System |
| SSN     | Social Security Number                 |
| TIU     | Text Integrated Utility                |
