

How to Optimize RPMS - Checklist

Server information		Current Value	New Value
Server Information	# of RAM		
	# of Processors		
	System type		
Diskspace	C: drive		
	Database location: drive, diskspace?		
	Journal Files location: drive, diskspace?		
	RPMS Application files location: drive, diskspace?		

How to Optimize RPMS - Checklist

Management Portal		Current Value	New Value
Journal Settings	Primary journal directory		
	Secondary journal directory		
	Start new journal file every		
	After this many days		
	After this many successive backups		
	Freeze on error		
	Write image journal directory		
Memory and Startup	Automatically/Manually		
	Memory Allocated for Routine Cache (MB)		
	Memory Allocated for 8KB Database Cache (MB)		
	Maximum per Process Memory		
Advance Memory Settings	ZFSIZE		
	ZFSTRING		
	gmheap (KB)		
	locksiz (bytes)		
Compatibility Settings	DisconnectError		
	FileMode		
	GlobalKillEnabled		
	OpenMode		
	SetZEOF		
Production Database Properties	Name		
	Size (MB)		
	Directory		
	Maximum Size (MB)		
	Expansion Size (MB)		

How to Optimize RPMS - Checklist

RPMS		Recommended Value	New Value
Taskman Site Parameter	Log Tasks	No	
	Default Task Priority	Blank	
	Task Partition Size	Blank	
	Submanager Retention Time	20	
	Taskman Job Limit	1495	
	Taskman Hang Between New Jobs	0	
	Mode of Taskman	General Processor	
	Out of Service	No	
	Min Submanager CNT	10	
	Auto Delete Tasks	Yes	
	Manager Startup Delay	10	
Taskman Task Schedule	Capture Task fields	Review	
TaskMan Monitor	IO Device listed?	No listing	
Kernel System Parameter	Max signon allowed	1500	
Error trap	Document	Resolve
