THE INDIAN HEALTH SERVICE

VA Health Summaries

Superior Health Information Management
Now and for the Future

Learning Objectives

- Define IHS Health Summary vs VA Health Summary
- Review process for adding new types of Health Summaries (HSs) to EHR Reports tab (i.e., Women's Health Report)
- Create Prenatal Flowsheet using IHS Health Summary, convert flowsheet into VA Health Summary then add report to the EHR GUI
- Convert Prenatal Health Summary into a Data Object

Health Summaries

- Health Summaries allows users to quickly generate a summary of a patient's demographic and clinical information from the PCC of the RPMS database
- Report can be printed on paper or can be generated within EHR
- Report can be very useful for contingency planning, release of information or use during home visits
- Health Summary Components are the building block of Health Summaries

IHS vs VA Health Summaries

- Although the IHS and VA Health Summaries individual components may look the same, these component are not the same and they are not shared between these two packages
- User can generate “on the fly” reports using the VA Ad Hoc component
- Not all IHS Health Summary Components are available within VA Health Summaries

Health Summary Flowsheet

- Health Summary Flowsheet must first be created in the IHS Health Summary
- Once created, it is available within the VA Health Summary
- Edits to the Flowsheet Summary must be done within the IHS Health Summary menu

Supplements

- Health Summary Supplement are not editable
  - If the Supplement is not pulling correct data, site must edit the taxonomies used by the supplement
  - Each supplement, has its own set of taxonomies
- Logic used for these Supplement is found BJPC Health Summary user manual located IHS website

IHS Health Summaries

- Although the IHS Health Summary Menu Option is found under the BEHO menu. I recommend that you use the Health Summary Maintenance Menu option in PCC

HSM Health Summary Maintenance ...

Menu Option: APCHSMAINT

Locked with APCHZMGR Security Key

IHS Health Summary (continues)

- Option available from PCC

```
IS      Inquire About a Health Summary Type
HM      Health Maintenance Reminders ...
PP      Print Health Maintenance Item Protocols
LS      List Health Summary Types
LC      List Health Summary Components
LM      List Measurement Panel Types
LF      List Health Summary Flowsheets
LI      List Health Summary Flowsheet Items
MS      Create/Modify Health Summary Type
MM      Create/Modify Measurement Panel
MF      Create/Modify Flowsheet
MI      Create/Modify Flowsheet Item
DS      Delete Health Summary Type
DM      Delete Measurement Panel Definition
DF      Delete Health Summary Flowsheet
DI      Delete Health Summary Flowsheet Item
HS      Generate Health Summary
BP      Best Practice Prompt Menu ...
FMMT    Create/Modify Health Summary Type using Fileman
HSSP    Update Health Summary Site parameters
IPT     Update the Minor Procedures CPT Taxonomy
MPT     Update the Major Procedures CPT Taxonomy

          Press 'RETURN' to continue, '^' to stop:
PWH     Patient Wellness Handout Menu ...
```

- Option Available from BEHO

```
                    IHS Health Summary Configuration

DF      Delete Health Summary Flowsheet
DI      Delete Health Summary Flowsheet Item
DM      Delete Measurement Panel Definition
DS      Delete Health Summary Type
FMMT    Create/Modify Health Summary Type using Fileman
HM      Health Maintenance Reminders ...
HS      Generate Health Summary
HSSP    Update Health Summary Site Parameters
IS      Inquire About a Health Summary Type
LC      List Health Summary Components
LF      List Health Summary Flowsheets
LI      List Health Summary Flowsheet Items
LM      List Measurement Panel Types
LS      List Health Summary Types
MF      Create/Modify Flowsheet
MI      Create/Modify Flowsheet Item
MM      Create/Modify Measurement Panel
MS      Create/Modify Health Summary Type
PP      Print Health Maintenance Item Protocols
TYP     IHS Health Summary Types
```

Health Maintenance Reminder Best Practice Prompts

- EHR Clinical Reminders utilize logic from either the Health Maintenance Reminder HS or Best Practice Prompts to either activate or resolve reminder
- Access to both logic is found on the IHS Health Summary Menu and not found in the VA Health Summary

Patient Wellness Handout

- Patient Wellness Handout is another Health Summary that has its own unique building blocks (Health Summary Component)
- These building blocks are not shared with either of the IHS or VA Health Summaries
- However, you can create IHS or VA Health Summaries that points to a Patient Wellness Handout

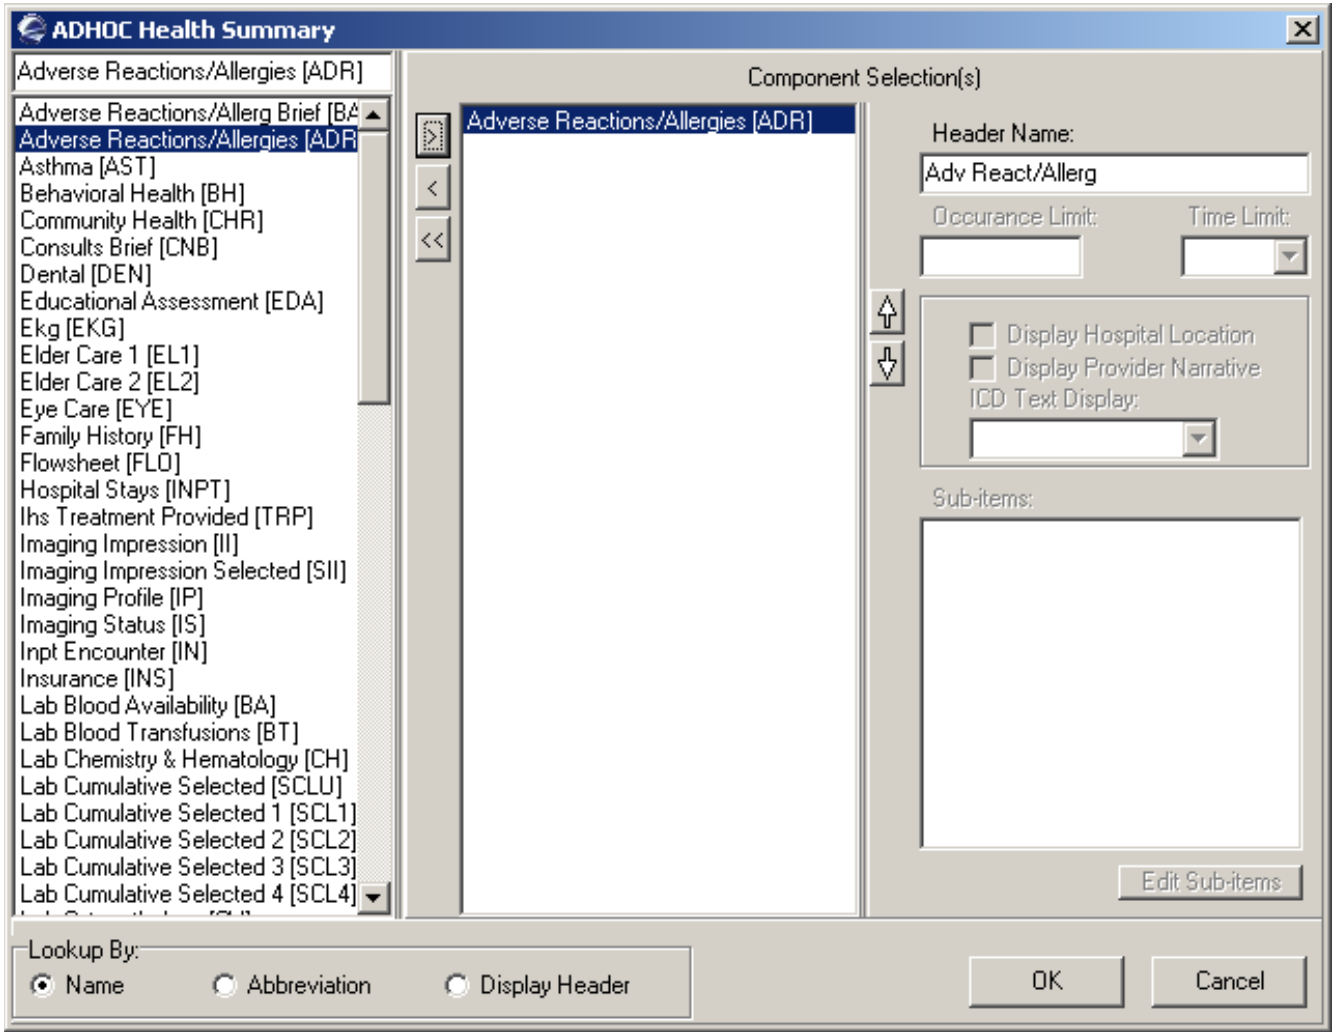
VA Health Summary

- VAHS Health Summary Overall Menu (GMTS Manager)
  - Allows site manager/Clinical Application Coordinator (CAC) the ability Create HS objects not available in document definitions
  - Most IHS and PWH Health Summaries can be pulled by the VA Health Summary
  - Only the VA Health Summary allows users to create reports on the “fly” but these reports are not permanent

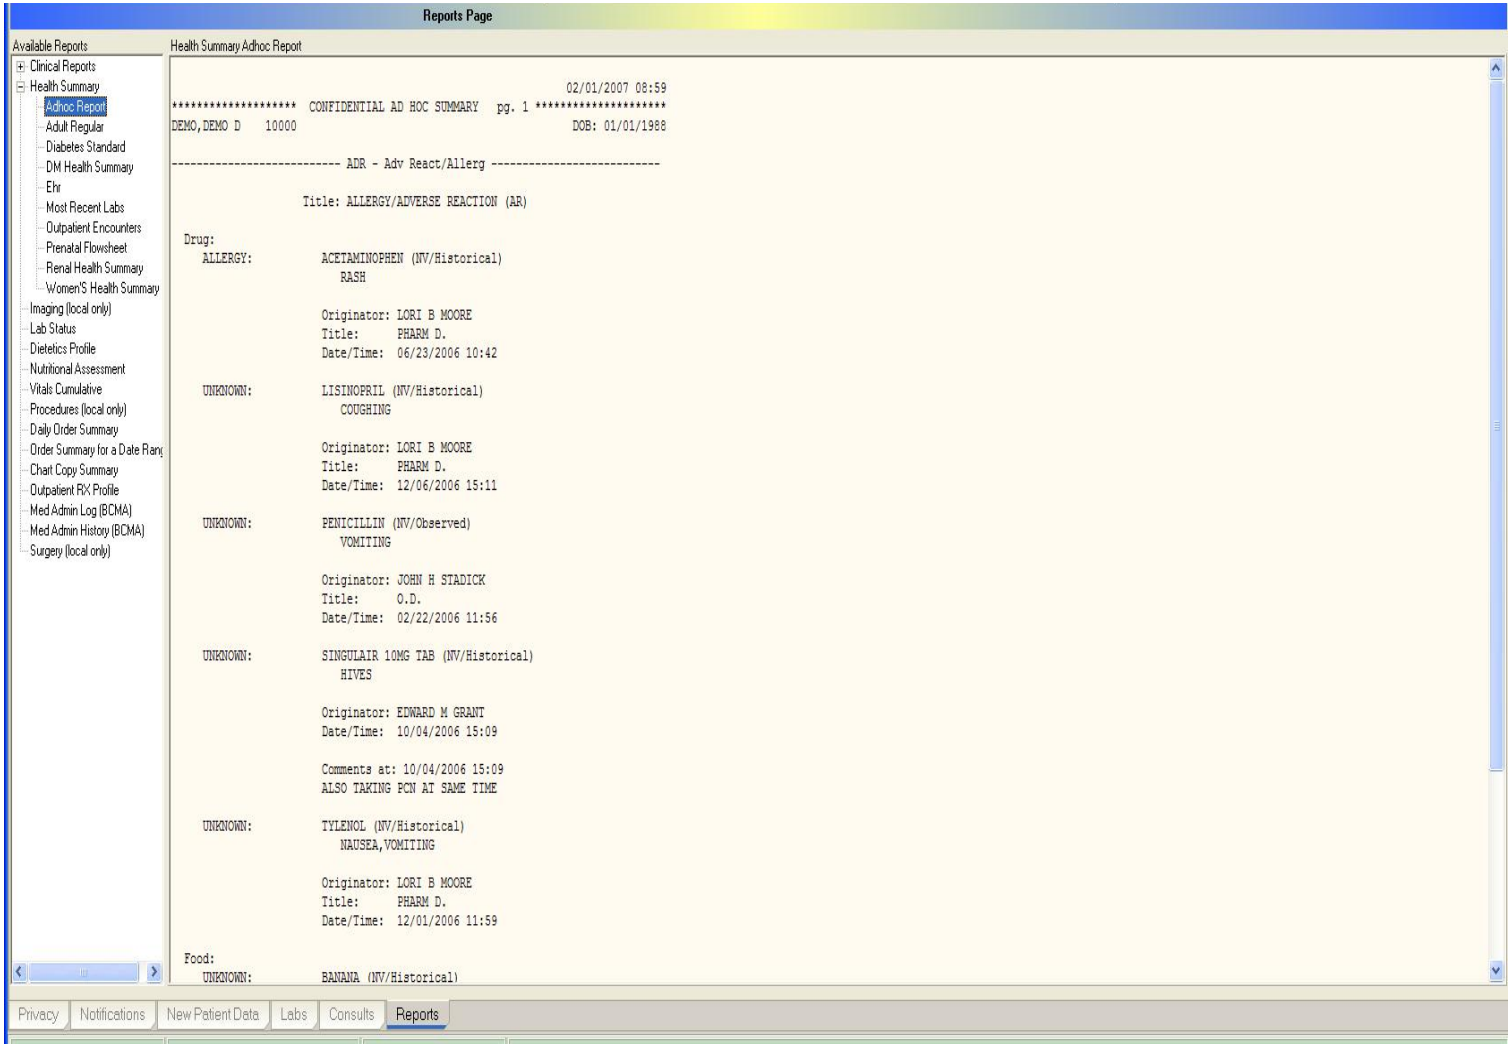
Ad Hoc Report

- Allows the user to create HSs using predefined HS types for a particular patient
- Quick method of looking up information not normally found in the standard Health Summaries
- Data is not saved – if the user wishes to review the same data on the next patient, he/she will have to start at the beginning of the Ad Hoc Report
  - If users look at certain HS type components on a routine basis, they may want to work with site manager/CAC to set up a new HS that would display on the Reports tab

Ad Hoc Report



Ad Hoc Report



Ad Hoc Report

- Add the Ad Hoc HS to the Reports tab
  - Parameters (EP Edit Parameter Values)
    - ORWRP SUMMARY TYPE LIST >> GMTS HS ADHOC OPTION

Values for ORWRP HEALTH SUMMARY TYPE LIST

Parameter	instance	Value
SYS: SFH.ALBUQUERQUE.IHS.GOV	**5**	**GMTS HS ADHOC OPTION**

Ad Hoc Report
