

Inpatient OB-GYN Menu example from Claremore, Oklahoma

This is an example of a menu that can be created for OB-GYN use.

The screenshot shows a software interface for an OB/GYN menu. The title bar at the top contains the text 'OB/GYN' and a 'Done' button on the right. The main content area is a list of medical categories and their associated treatments, organized into three columns. The categories include Antihypertensives, Contraceptives, Hormone Management, Immunizations, Epidural Meds, Cerv Rip/Induction Meds, Circumcision, Pain Meds, GI Meds, PP Hemorrhage Meds, Seizure Prophylaxis, Tocolytics, and Vitamins. Each category lists specific medications, dosages, and routes of administration.
