When a patient list is run in Clinical Reporting System (CRS), you always receive the report that accompanies the patient list. Figure 1 is an example of the Selected Measures Report for the Cancer Screening: Pap Smear Rates topic. Each topic contains a denominator(s) and numerator(s) and performance measure logic used to define the denominators and numerators. The patient list for this topic in this report is shown in Figure 2.

Cancer Screening: Pap Smear Rates

Denominator(s):
- GPRA Denominator: Female Active Clinical patients ages 21 through 64 without documented history of Hysterectomy.
- Female User Population patients ages 21 through 64 without a documented history of Hysterectomy.

Numerator(s):
- GPRA Numerator: Patients with a Pap Smear documented in the past 3 years.
  NOTE: This numerator does NOT include refusals.
- Patients with documented Pap smear refusal in past year.

Logic:
Age of the patient is calculated at the beginning of the Report Period. Patients must be at least 21 years of age at the beginning of the Report Period and less than 65 years of age as of the end of the Report Period. Hysterectomy defined as any of the following ever: 1) V Procedure: 68.4-68.8; 2) CPT 51925, 56308 (old code), 58150, 58152, 58200-58294, 58548, 58550-58554, 58570-58573, 58951, 58953-58954, 58956, 59135; or 3) V POV 618.5, V88.01, V88.03; or 4) Women’s Health procedure called Hysterectomy.

Pap Smear definitions: 1) V Lab: Pap Smear; 2) POV: V67.01 Follow-up Vaginal Pap Smear, V76.2 Screen Mal Neop-Cervix, V72.31 Routine Gynecological Examination, V72.32 Encounter for Pap Cervical Smear to Confirm Findings of Recent Normal Smear Following Initial Abnormal Smear, V72.3 Gynecological Examination, Pap Cervical Smear as Part of General Gynecological Exam, Pelvic Exam (annual) (periodic) (old code, to be counted for visits prior to 10/1/04 only), V76.47 Vaginal Pap Smear for Post-Hysterectomy Patients, 795.0*, 795.10-16, 795.19; 3) V Procedure: 91.46; 4) V CPT: 88141-88167, 88174-88175, G0123, G0124, G0141, G0143-G0145, G0147, G0148, P3000, P3001, Q0091; 5) Women’s Health: procedure called Pap Smear and where the result does NOT have "ERROR/DISREGARD"; 6) LOINC taxonomy; 7) site-populated taxonomy BGP PAP SMEAR TAX.
Refusal: Refusal in past year of Lab Test Pap Smear.

Figure 1: Sample report that accompanies the Patient List for the Selected Measures Report (1 of 2)

For this report and performance measure topic, all patients in all denominators are displayed. Patients who are included in the numerator (i.e., who met the measure) have a value in the Numerator column. For example, PATIENT,CRSA1 met the measure because she had a Pap smear documented with a laboratory test on 04/17/10. However, PATIENT,CRS did not meet the measure because CRS did not find a Pap smear or refusal. Thus, the value in the Numerator column is blank.
Figure 2: Sample Patient List, Selected Measures Report (2 of 2)

Figure 3 is an example of the National Government Performance and Results Act (GPRA) & Program Assessment Rating Tool (PART) Patient List, another patient list (menu option LST) that exists within CRS. This option allows you to include: (1) patients who met the measure, (2) patients who did not meet the measure, or (3) all patients. Use the list for patients that did not meet the measure to identify all patients in need of screening. The list looks very similar to the list above except it includes only patients meeting the measure or not meeting the measure, depending on the list selected.

Figure 4: Sample Patient List, National GPRA & PART Patient List Report

Figure 4 is an example of another type of patient list that is available. This list includes all patients included in the National GPRA & PART Report who did not meet at least one GPRA or PART performance measure.
Note: Since there could be many patients who did not meet at least one GPRA measure, this list can be very large and should not be printed.

In Figure 4, the Not Met/Lst Prvdr column shows all of the GPRA and PART performance measures the patient did not meet, the name of the provider who last had a visit with the patient, the provider’s discipline code, and the date of the visit. In Figure 4, the first patient did not meet the following GPRA measures: dental visit, influenza for patients 65 and older, pneumovax for patients 65 and older, and depression screening. The patient’s last visit was on 03/16/10 with the provider named “DEMO, DOCTOR”, who is an MD.

Figure 5: Sample Comprehensive National GPRA & PART Patient List

The GPRA & PART Forecast Patient List is another patient list option. This patient list can be a very effective tool in assisting with improving National GPRA and PART performance. This patient list is linked to the Scheduling package and shows all GPRA and PART performance measures a patient has not met as of the date the list was run. The list can be run for the following four options:

- By a particular clinic(s) for all patients with scheduled appointments to the clinic(s).
- For all patients selected that have at least one scheduled appointment to any clinic during the chosen time period.
• By a particular clinic(s) for all patients with scheduled appointments to the clinic(s), but this list is **limited to one division in a multidivisional site**. This is different from the first option above because the first option includes all patients for all clinics regardless of division.

• For **any patient, even if the patient does not have a scheduled appointment**. This option is good for walk-in patients.

Many facilities run the patient list for each clinic in his/her facility the day before the appointment. The patient lists are then printed out and given to the providers so he/she can see all of the GPRA and PART measures the patient has not met.

In Figure 4, the list contains information for the provider to see what is counted in CRS for each measure. The list also shows the date of the patient’s last screening, if any, and when the patient will be overdue for the screening.

This list is different from the clinical reminders in Electronic Health Record (EHR) or Patient Care Component (PCC) and the other lists available in CRS because it uses revised CRS logic for the denominators. To view the definitions for the revised denominators, run the report “GPRA & PART Forecast Denominator Definitions” (menu option **FORD**).

An example of the difference in the denominators is that the GPRA Forecast does not require patients in the Pap Smear measure to meet the Active Clinical denominator definition, which requires the patient to have two medical visits in the past three years. This is because it is not assumed that the patient will not meet the Active Clinical denominator definition. If the list is run early in the GPRA year, the patient could meet the definition later in the GPRA year. For example if a 24-year old female patient only had one medical visit in the past three years as of July 15, she would not be included in the denominator in the National GPRA & PART Patient List because she did not have two medical visits in the past three years. However, she would be included in the GPRA Forecast list because she might have the second visit during the GPRA year, and then she would be included in the National GPRA & PART Report for this measure.

In Figure 5, the patient “PATIENT,CRS” has a scheduled appointment to the “06 Diabetic” clinic on April 28, 2011. The patient will not meet all of the measures listed in the report. For example, the patient will not meet the DM (Diabetes Mellitus) Glycemic Control measure, which requires the patient to have an A1c value less than 7. This patient’s last A1c was taken on 09/01/10 and the value was determined not to be ideal control. The patient is due for the next A1c on 09/01/11. In order to meet the GPRA measure, the patient must have an A1c taken during 07/01/10–06/30/11 and the A1c value must be less than 7.

<td>01/01/85</td>
<td>BRAGGS</td>
</tr>
</tbody>
</table>

**DM Glycemic Control <7**

- Last A1c: 09/01/10 value: - Not Ideal Control
- Next Due: 09/01/11
- GPRA counts most recent A1c and where A1c is <7, during 7/1/10-6/30/11

**DM Controlled BP <130/80**

- Last Mean BPs: 0 - Not Controlled BP
- GPRA counts mean of last 3 non-ER BPs (2 BPs if there are only 2), where mean is <130/80 or CPT 3074F AND 3078F during 7/1/10-6/30/11

**Annual Dental Exam (All Patients)**

- Last Dental Exam: 03/01/0
- Overdue as of: 03/01/11
- GPRA counts visits with ADA 0000 or 0190, V CPT Codes D0000 or D0190, PCC VExam 30,POV V72.2 or any CHS visit with any ADA code during 7/1/10-6/30/11

**Pap Smear (every 3 years) (21-64)**

- Last Pap: 03/01/08
- Overdue as of: 02/28/11
- GPRA counts Pap past 3 years from 6/30/11 during 7/1/10-6/30/11

**Domestic Violence Screen (Female 15-40)**

- Last DV Screen: 03/01/10
- Overdue as of: 03/01/11
- GPRA counts PCC Exam 34, BHS IPV/DV Exam, IPV/DV Dx, or IPV/DV patient education during 7/1/10-6/30/11

**Depression Screen (18+)**

- Last Depression Screen: 03/01/10
- Overdue as of: 03/01/11
- GPRA counts PCC Exam 36, POV V79.0, BHS problem code 14.1, PCC or BHS V Measurement PHQ2 or PHQ9, or 2 mood disorder visits during 7/1/10-6/30/11

Figure 6: Sample GPRA & PART Forecast Patient List, selected patient with appointment option
1.0 Patient List Formats

Patient lists can be run for the following reports:

- National GPRA & PART/GPRA & PART Performance reports (LST menu option)
- Selected Measures report (COM, PP, or ALL menu options)
- Other National Measures (OST menu option)
- Executive Order Quality Transparency Measures Report (EO menu option)
- Elder Care (ELD menu option)
- Patient Education (PED menu options PCM and P3)

The Comprehensive National GPRA & PART Patient List (CMP) and the GPRA & PART Forecast Patient List (FOR) can also be run.

The lists display patients who meet the numerator(s), denominator(s), or both, depending on the type of report run and the performance measure. Patient List options include a random list (10% of the total list), a list by primary care provider, and the entire patient list.

For the National GPRA & PART/GPRA & PART Performance and the Other National Measures reports, patient lists can be created for one or more performance measure topics at a time. The patient lists for these reports allow users to include only patients meeting the measure, only patients not meeting the measure, or both for most performance measures.

The GPRA & PART Forecast Patient List identifies all GPRA & PART measures a patient is due for during the current GPRA year as of the report run date and provides information for the provider on how the measures can be met. This list is linked to the Scheduling menu and may be run for the following options:

1. A selected patient with a scheduled appointment
2. All patients with scheduled appointments to a selected clinic(s) or all clinics at a facility
3. All patients with scheduled appointments to an entire facility or division
4. A selected patient or patients even if they do not a scheduled appointment

The Comprehensive National GPRA & PART Patient List shows all patients included in the National GPRA & PART Report who did not meet at least one GPRA & PART measure, and identifies which GPRA & PART measure(s) the patients did not meet. The list also identifies the name of the provider that the patient last had a visit with and the date of the visit.
For the Selected Measures (COM, PP, ALL), Executive Order Quality Transparency Measures, Elder Care, and Patient Education reports, select the performance measure topic(s) for which you want to run patient lists. There is no option to choose to include only patients meeting or not meeting the performance measure.

Patient Lists are organized by:

- Community
- Gender
- Age
- Last name

Key elements of the patient list format are:

1. **Report Type**: Indicates Patient List as the report type.
2. **Patient List Type**: Displays whether the patient list is a Random Patient List, Patient List by Provider, or All Patients, depending on which option you selected.
3. **List Description**: Describes which patients will be included on the list.
4. **List Columns**: All patient lists contain the following columns of information:
   - **Patient Name** displayed as Last, First
   - **Health Record Number** (HRN) of the patient
   - **Community** name
   - **Sex** (M or F) of the patient;
   - **Age** of the patient *as of the first day of the report period*

Patient Lists are organized by (1) Community, (2) gender, (3) age, and (4) last name.

5. **Denominator column**: For most patient lists, displays the denominator of which the patient is a member (e.g., AC for Active Clinical). For measures that provide only a count for the numerator and use no denominator, such as the Dental Sealants measure, the denominator values will be blank.

6. **Numerator Value column**: Displays different information about the numerator, such as the date a test was given and the test code, whether a Health Factor or patient education code was recorded. In Figure 2, the value column identifies the date a Pap smear was documented and the test code. If no date and code information is displayed, this patient is counted in the denominator only.
Note: This column is not included in the Comprehensive National GPRA & PART Patient List report. Instead, it has the Measure Not Met (#7) and Lst Prvdr (#8) columns. In addition, performance measures are not listed separately; each patient is listed only once with all the measures she/he did not meet and is indicated in the Measure Not Met column.

7. **Measure Not Met** column: Displays only for the Comprehensive National GPRA & PART Patient List. Displays all of the applicable National GPRA & PART Report measures a patient did not meet. If there are more measures than can be listed within this column, the measures will be wrapped to the next line, starting in the Patient Name column.

8. **Lst Prvdr** column: Displays only for the Comprehensive National GPRA & PART Patient List. Displays the name, abbreviated discipline of the provider the patient saw at his/her last visit, and the date of the patient’s last visit.

The National GPRA & PART Report also includes the following two columns:

9. **Last Medical Visit** defined as a visit to one of the core or secondary clinics listed in the Active Clinical denominator.

10. **Last Visit** defined as a visit with Service Code of A, H, O, R, or S.
