Preface

The Government Performance and Results Act (GPRA) requires federal agencies to report annually on how the agency measured against the performance targets set in its annual plan. The Indian Health Service (IHS) GPRA measures include clinical prevention and treatment, quality of care, infrastructure, and administrative efficiency functions.

The IHS Clinical Reporting System (CRS) is a Resource and Patient Management System (RPMS) software application designed for national reporting, as well as Area Office and local monitoring of clinical GPRA and developmental measures. CRS was first released for FY 2002 performance measures (as GPRA+) and is based on a design by the Aberdeen Area Office (GPRA2000).

This manual provides instructions on using the CRS. Version 12.0 and adds fiscal year (FY) 2012 clinical performance measures to existing FY 2002 through FY 2011 measures.

CRS is the reporting tool used by the IHS Office of Planning and Evaluation to collect and report clinical performance results annually to the Department of Health and Human Services and to Congress.

Each year, an updated version of CRS software is released to reflect changes in the logic descriptions of the different denominators and numerators. Additional performance measures may also be added. Local facilities can run reports as often as they want and can also use CRS to transmit data to their Area Office. The Area Office can use CRS to produce an aggregated Area Office report for either annual GPRA or Area Office director performance reports.

CRS produces reports on demand from local RPMS databases for both GPRA and developmental clinical performance measures that are based on RPMS data, thus eliminating the need for manual chart audits for evaluating and reporting clinical measures.

To produce reports with comparable data across every facility, the GPRA measures definitions were “translated” into programming code with the assistance of clinical subject matter experts. CRS uses predefined taxonomies to find data items in the RPMS Patient Care Component to determine if a patient meets the performance measure criteria. Taxonomies contain groups of codes (e.g., diagnoses or procedures) or site-specific terms. Each performance measure topic has one or more defined denominators and numerators.
Administrative and clinical users can review individual or all measures at any time to:

- Identify potential data issues in their RPMS; for example, missing or incorrect data.
- Monitor their site’s performance against past national performance and upcoming agency goals.
- Identify specific areas where the facility is not meeting the measure in order to initiate business process or other changes.
- Quickly measure impact of process changes on performance measures.
- Identify IHS Area Offices meeting or exceeding measures to provide lessons learned.

Users of the RPMS CRS include:

- Area Office and site quality improvement staff
- Compliance officers
- GPRA coordinators
- Clinical staff, such as physicians, nurses, nurse practitioners, and other providers
- Area Office directors
- Any staff involved with quality assurance initiatives
- Staff who run the various CRS reports
1.0 Introduction

This manual provides user instructions on installing Version 12.0 of the Clinical Reporting System (CRS). The manual provides installation instructions for both the Resource and Patient Management System (RPMS) server side software and the Visual CRS graphical user interface (GUI).

1.1 Key Changes in Version 12.0

1.1.1 Changes to National GPRA Reports

No changes to current National GPRA Reports.

1.1.2 Logic Changes to National GPRA & PART Report Measures

- **GPRA Developmental Measures:**
  - Added the following new GPRA Developmental measures: Diabetes: Blood Pressure Control (BP < 140/90); Diabetic Retinopathy (excluded patients with bilateral blindness); Access to Dental Service (patients with a dental exam who have had all treatment completed); Sexually Transmitted Infection (STI) Screening (added measure for needed HIV screenings)
  - Updated codes in the following measures: Diabetes: Blood Pressure Control; Childhood Immunizations; Comprehensive CVD-Related Assessment

- **Diabetes: Blood Pressure Control:** Added POV code V81.1 to BP Documented definition.

- **Access to Dental Service:** Updated age breakdowns to 0-5, 6-21, 22-34, 35-44, 45-54, 55-74, >74.

- **Influenza:** Added CVX code 144 to Influenza definition.

- **Childhood Immunizations:** (1) Added CVX code 146 to Dtap, IPV, HiB, and Hep B definitions. (2) Changed Hep B definition to require 3 doses of Hep B, and no longer allow 2 doses if documented with CPT 90743. (3) Added refusals of CPT codes to NMI refusal definition.

- **Comprehensive CVD-Related Assessment:** Added POV code V81.1 to BP Documented definition.
1.1.3 Key Logic Changes to Non-GPRA Measures

- For key logic changes to non-GPRA measures, please refer to the CRS 2012 (version 12.0) Selected Measures Report Performance Measure List and Definitions document located on the CRS Web site at http://www.ihs.gov/cio/crs/documents/crsv12/SelectedMeasuresV12_0.pdf.

1.1.4 Additional Key Enhancements and Revisions

- A new report has been added: Asthma. This report is a subset of the Selected Measures report.
2.0 Installation Notes

Note: Read the entire Notes File prior to attempting any installation.

Prefix: BGP
Current Version: 12.0

Note: This distribution of the CRS contains Version 12.0 of CRS and the GUI front end to the CRS system. The server-side (i.e. “roll-and-scroll” or backend) version 12.0 of the package can be installed alone or both the GUI and the server-side versions can be installed. Currently, there is no requirement to install the GUI.

Please install version 12.0 of CRS (bgp_1200.k) at all sites regardless of whether the site opts to install and use the GUI portion of the package. Version 12.0 of CRS and the GUI have different requirements so please take note of the requirements section for each piece of the software.

2.1.2 Required Resources

- IHS Clinical Reporting System version 11.1 through Patch 1 (bgp*11.1*1)
- HIV Management System version 2.1 through Patch 2 (bkm*2.1*2)
2.2 Visual CRS (GUI) Distribution Contents and Required Resources

2.2.1 Contents of GUI CRS Distribution

- bgp_1200client.zip

The following two files are contained in the zip file:

- bgp_1200setup.exe
- bgp_1200.msi

2.2.2 Required Resources for GUI CRS

Additional requirements for installing and using Visual CRS on a client’s PC:

- **On the RPMS Server:**
  - BMX v4.0
  - IHS Clinical Reporting System version 12.0

- **On the Client (User’s) PC:**
  - Windows XP Service Pack 3 or higher
  - Microsoft Office 2003 or later
  - .NET Framework v3.5sp1
  - If the CRS GUI is not going to be installed, ignore these requirements.
  - If the .NET Framework v3.5 sp1 is not installed it will automatically be downloaded and installed when the client installation is started.

2.3 Before You Begin

- Make a copy of this distribution for offline storage
- Print all notes/readme files
- Create a printed audit trail, in case there are any problems with the installation

To capture terminal output during the installation, use an auxport printer attached to the terminal on which the installation is being performed.
3.0 Installation Instructions

Note: This installation is a KIDS install. For any questions on how to do a KIDS installation, please contact your Area Office information systems support personnel.

In all UCIs running the IHS CRS:

1. Ensure that users are unable to use the CRS for the duration of this installation.

2. Save all routines (^%RO (CACHE) and globals (^%GO (CACHE) in the BGP2* namespace for use in returning to the prior existing version, if needed.

Notes:

1. Do not delete any of these routines prior to installation.

2. If this is a first install, there will be no routines or globals in this namespace.

3. If no problems are noted with the new installation, remove saved routines from your system 7–10 days after this install.

3. Install bgp_1200.k. This file is the KIDS file for the IHS CRS.
   a. Load the distribution into KIDS using Option 1 on the KIDS Installation menu. The distribution was released in a file named bgp_1200.k
   b. Verify the load using Option 2 on the KIDS Installation menu.
   c. Consider using Options 3 and 4 on the KIDS Installation menu to print and compare the Transport global.
   d. For results, use the KIDS Install File Print option to view/print the IHS CLINICAL REPORTING SYSTEM V12.0 entry.

   Note: For assistance with a KIDS install, call your Area Office support personnel.

4. After the install completes, assign security keys, as appropriate, using the following table.
### Name | Descriptive Name | Description
---|---|---
BGPZAREA | BGP Area Report | This key unlocks the Area Office report options on the main BGPMENU. Note: This key should be assigned only at the Area Office level.
BGPZMENU | BGP Main Menu–CRS | This key unlocks the main CRS menu. It should be assigned to all users who need to run GPRA/CRS reports.
BGPZ PATIENT LISTS | BGP Patient Lists | This key allows the holder to obtain patient lists. The patient lists contain sensitive patient/clinical information. This key should be given only to those users who have a need for such information.
BGPZ SITE PARAMETERS | BGP Site Parameters | This key should be given to those with authority to update the site parameters.
BGPZ TAXONOMY EDIT | BGP Taxonomy Edit | This key should be given only to users who will need to update taxonomies.

### 3.1 Installation of the CRS GUI

There are two parts to the CRS GUI install: installation on the RPMS server and installation on the local (client) PC. See the steps below for installation instructions.

#### 3.1.1 Installation on the RPMS server

1. Make sure BMX Version 4.0 has been installed in RPMS on the RPMS Server.
2. Make sure CRS version 12.0 has been installed in RPMS on the RPMS server. (See instructions above.)

**Note:** If a previous version of Visual CRS is being used you will not need to perform Steps 3 to 5. If this is the first time Visual CRS is being used perform Steps 3 to 5.

3. Assign option BGPGRPC as a secondary menu option with a synonym of **BGPG** for each user.
4. Assign option BMXRPC as a secondary menu option with a synonym of **BMX** for each user.
3.1.2 Installation on each user’s (client) PC

1. Place bgp_1200client.zip into a directory of your choice and unzip the file. There are two files included in the zip file: bgp_1200.msi and bgp_1200setup.exe.

2. If a previous version of the Visual CRS product is installed it will need to be removed. Go to the Start menu. Then go to Control Panel then click Add/Remove Programs and select and remove Visual CRS.

3. Double click the bgp_1200setup.exe file that was distributed with Visual CRS. If asked, accept the License Agreement and follow the instructions for downloading and installing Microsoft .Net Framework 3.5 sp1 (this will only occur if the most current version of Microsoft.Net Framework 3.5 sp1 is not on the local PC). This step takes approximately 20-30 minutes over a DSL connection.

4. Follow the prompts on the Visual CRS Setup Screens and accept all of the defaults.

5. Double click the Visual CRS shortcut that appears on the desktop.

6. If this is the first install you will need to add a new connection. Please refer to the BMX 4.0 User Manual for instructions.

7. When the RPMS Login window appears, enter your RPMS access and verify codes, and then click OK.

8. If data for multiple facilities is stored on the same RPMS database, the Select Division window is displayed. Select a Division, and then click OK.

9. You are now in the Visual CRS software.
4.0 Sample Installations

4.1 Sample Installation of CRS on RPMS Server

Select Kernel Installation & Distribution System Option:

KIDS  Kernel Installation & Distribution System ...
NTEG  Build an 'NTEG' routine for a package
PG  Programmer mode
Calculate and Show Checksum Values
Clean Error Trap
Delete Unreferenced Options
Error Processing ...

4.2 Sample Installation of the CRS GUI

1. Double click `bgp_1200setup.exe` to display the following dialog:

![Welcome to the Visual CRS Setup Wizard](image)

The installer will guide you through the steps required to install Visual CRS on your computer.

WARNING: This computer program is protected by copyright law and international treaties. Unauthorized duplication or distribution of this program, or any portion of it, may result in severe civil or criminal penalties, and will be prosecuted to the maximum extent possible under the law.

2. Click Next.
3. Click **Next**.
Figure 4-4: Visual CRS installation wizard

4. Click **Next**.
5. Wait while the application is installed.
6. When Visual CRS has been successfully installed the **Installation Complete** screen will display. Click **Close**.

A desktop shortcut named Visual CRS should now be available. Refer to the user manual for instructions on use of the Visual CRS application.
