Preface

The Government Performance and Results Act (GPRA) requires federal agencies to report annually on how the agency measured against the performance targets set in its annual plan. The Indian Health Service (IHS) GPRA measures include clinical prevention and treatment, quality of care, infrastructure, and administrative efficiency functions.

The IHS Clinical Reporting System (CRS) is a Resource and Patient Management System (RPMS) software application designed for national reporting, as well as Area Office and local monitoring of clinical GPRA and developmental measures. CRS was first released for FY 2002 performance measures (as GPRA+) and is based on a design by the Aberdeen Area Office (GPRA2000).

This manual provides instructions on using the CRS. Version 14.1 adds fiscal year (FY) 2014 clinical performance measures to existing FY 2002 through FY 2013 measures.

CRS is the reporting tool used by the IHS Office of Planning and Evaluation to collect and report clinical performance results annually to the Department of Health and Human Services and to Congress.

Each year, an updated version of CRS software is released to reflect changes in the logic descriptions of the different denominators and numerators. Additional performance measures may also be added. Local facilities can run reports as often as they want and can also use CRS to transmit data to their Area Office. The Area Office can use CRS to produce an aggregated Area Office report for either annual GPRA or Area Office director performance reports.

CRS produces reports on demand from local RPMS databases for both GPRA and developmental clinical performance measures that are based on RPMS data, thus eliminating the need for manual chart audits for evaluating and reporting clinical measures.

To produce reports with comparable data across every facility, the GPRA measures definitions were “translated” into programming code with the assistance of clinical subject matter experts. CRS uses predefined taxonomies to find data items in the RPMS Patient Care Component to determine if a patient meets the performance measure criteria. Taxonomies contain groups of codes (e.g., diagnoses or procedures) or site-specific terms. Each performance measure topic has one or more defined denominators and numerators.

Administrative and clinical users can review individual or all measures at any time to

- Identify potential data issues in their RPMS; for example, missing or incorrect data.
- Monitor their site's performance against past national performance and upcoming agency goals
- Identify specific areas where the facility is not meeting the measure in order to initiate business process or other changes
- Quickly measure impact of process changes on performance measures
- Identify IHS Area Offices meeting or exceeding measures to provide lessons learned

Users of the RPMS CRS include

- Area Office and site quality improvement staff
- Compliance officers
- GPRA coordinators
- Clinical staff, such as physicians, nurses, nurse practitioners, and other providers
- Area Office directors
- Any staff involved with quality assurance initiatives
- Staff who run the various CRS reports

1.0 Introduction

This manual provides user instructions on installing Version 14.1 of the Clinical Reporting System (CRS). The manual provides installation instructions for both the Resource and Patient Management System (RPMS) server side software and the Visual CRS graphical user interface (GUI).

1.1 Key Changes in Version 14.1

1.1.1 Logic Changes to National GPRA/GPRAMA Report Measures

- GPRA Developmental Measures:
 - Added the following new GPRA Developmental measures: Diabetes: Blood Pressure Control (BP less than (<)140/90, or less than (<) 150/90 for ages 60 and older); Adult Immunizations (Tdap/Td, Tdap, Influenza, Zoster, Pneumovax, combination measures); Childhood Immunizations (4:3:1:3*:3:1:3); Controlling High Blood Pressure (BP less than (<) 140/90, or less than (<) 150/90 for ages 60 and older); Chlamydia Testing (added age breakdowns)
 - Changed Childhood Immunizations measure for Hepatitis A to one dose
 - Changed Cancer Screening: Mammogram Rates denominator to ages 52 through 74
 - Updated codes in the following measures: Childhood Immunizations; Comprehensive Cancer Screening
- Diabetes: LDL Assessment: Changed measure from LDL less than or equal to (= <) 100 to LDL less than (<) 100.
- Diabetes: Nephropathy Assessment: Added CPT code S2065 to ESRD definition.
- Access to Dental Service: (1) Added ADA code 0191 to documented dental visit. (2) Added CPT codes D0190 and D0191 to documented dental visit.
- Influenza: Removed Procedure code 99.52 from influenza definition.
- Adult Immunizations: Removed Procedure code 99.55 from Pneumococcal definition.

- Childhood Immunizations: (1) Removed Procedure code 99.39 from DTP definition. (2) Removed Procedure code 99.36 from Diphtheria definition. (3) Removed Procedure code 99.38 from Tetanus definition. (4) Removed Procedure code 99.37 from Acellular Pertussis definition. (5) Removed Procedure code 99.41 from IPV definition. (6) Removed Procedure code 99.48 from MMR definition. (7) Removed Procedure code 99.45 from Measles definition. (8) Removed Procedure code 99.46 from Mumps definition. (9) Removed Procedure code 99.47 from Rubella definition.
- Cancer Screening: Pap Smear Rates: (1) Removed CPT code 88155 from Pap Smear definition. (2) Removed Procedure code 91.46 from Pap Smear definition. (3) Added ICD-10 code Z12.4 to Pap Smear definition.
- Controlling High Blood Pressure – Million Hearts: (1) Added CPT code S2065 to ESRD definition.
- Comprehensive CVD-Related Assessment: (1) Added CPT codes 92920, 92924, 92928, 92933, 92937, 92941, and 92943 to PCI definition.

1.1.2 Key Logic Changes to Non-GPRA Measures

For key logic changes to non-GPRA measures, please refer to the CRS 2014 (version 14.1) Selected Measures Report Performance Measure List and Definitions document located on the CRS Web site at

http://www.ihs.gov/crs/documents/crsv14/SelectedMeasuresV14_1.pdf.

1.1.3 Additional Key Enhancements and Revisions

Added the ability to run National GPRA/GPRAMA by Designated Provider and GPRA Dashboard reports for multiple primary care providers at once.

2.0 Installation Notes

Note: Read the entire Notes File prior to attempting any installation.

Prefix: BGP

Current Version: 14.1

Note: This distribution of the CRS contains Version 14.1 of CRS and the GUI front end to the CRS system. The server-side (i.e. “roll-and-scroll” or backend) version 14.1 of the package can be installed alone or both the GUI and the server-side versions can be installed. Currently, there is no requirement to install the GUI.

Please install version 14.1 of CRS (bgp_1410.k) at all sites regardless of whether the site opts to install and use the GUI portion of the package. Version 14.1 of CRS and the GUI have different requirements so please take note of the requirements section for each piece of the software.

2.1 CRS Distribution Contents and Required Resources

2.1.1 Contents of Distribution

File	Description
bgp_1410.k	Kernel Installation and Distribution System (KIDS) file containing software
bgp_141i.pdf	Installation guide in PDF format (this manual)
bgp_141t.pdf	Technical Manual in PDF format
bgp_141u.pdf	User Manual in PDF format
bgp_141u_logicselected.pdf	CRS Clinical Performance Measure Logic Manual in PDF format
bgp_141u_visual.pdf	Visual CRS User Manual in PDF format
bgp_1410client.zip	Visual CRS software for Client's PC

2.1.2 Required Resources

IHS Clinical Reporting System version 14.0 (bgp_1400.k) must be installed.

2.2 Visual CRS (GUI) Distribution Contents and Required Resources

2.2.1 Contents of GUI CRS Distribution

- bgp_1410client.zip

The following two files are contained in the zip file:

- bgp_1410setup.exe
- bgp_1410.msi

2.2.2 Required Resources for GUI CRS

Additional requirements for installing and using Visual CRS on a client's PC:

- *On the RPMS Server:*
 - BMX v4.0
 - IHS Clinical Reporting System version 14.1
- *On the Client (User's) PC:*
 - Windows XP Service Pack 3 or higher
 - Microsoft Office 2003 or later
 - .NET Framework v4.0
 - If the CRS GUI is not going to be installed, ignore these requirements.
 - If the .NET Framework v4.0 is not installed it will automatically be downloaded and installed when the client installation is started.

2.3 Before You Begin

- Make a copy of this distribution for offline storage
- Print all notes/readme files
- Create a printed audit trail, in case there are any problems with the installation

To capture terminal output during the installation, use an auxport printer attached to the terminal on which the installation is being performed.

3.0 Installation Instructions

Note: This installation is a KIDS install. For any questions on how to do a KIDS installation, please contact your Area Office information systems support personnel.

In all UCIs running the IHS CRS:

1. Ensure that users are unable to use the CRS for the duration of this installation.
2. Save all routines (^%RO (CACHE) in the BGP4* namespace for use in returning to the prior existing version, if needed.

Note: If no problems are noted with the new installation, remove saved routines from your system 7–10 days after this install.

3. Install bgp_1410.k. This file is the KIDS file for the IHS CRS.
 - a. Load the distribution into KIDS using **Option 1** on the **KIDS Installation menu**. The distribution was released in a file named bgp_1410.k
 - b. Verify the load using **Option 2** on the **KIDS Installation menu**.
 - c. Consider using **Options 3** and **4** on the **KIDS Installation menu** to print and compare the Transport global.
 - d. Install the distribution using option 6 on the Installation menu.
 - e. For results, use the **KIDS Install File Print** option to view/print the IHS CLINICAL REPORTING SYSTEM V14.1 entry.

Note: For assistance with a KIDS install, call your Area Office support personnel.

4. After the install completes, assign security keys, as appropriate, using the following table:

Name	Descriptive Name	Description
BGPZAREA	BGP Area Report	This key unlocks the Area Office report options on the main BGPMENU. Note: This key should be assigned <i>only</i> at the Area Office level.
BGPZMENU	BGP Main Menu–CRS	This key unlocks the main CRS menu. It should be assigned to all users who need to run GPRA/CRS reports.
BGPZ PATIENT LISTS	BGP Patient Lists	This key allows the holder to obtain patient lists. The patient lists contain sensitive patient/clinical information. This key should be given <i>only</i> to those users who have a need for such information.
BGPZ SITE PARAMETERS	BGP Site Parameters	This key should be given to those with authority to update the site parameters.
BGPZ TAXONOMY EDIT	BGP Taxonomy Edit	This key should be given <i>only</i> to users who will need to update taxonomies.

3.1 Installation of the CRS GUI

There are two parts to the CRS GUI install: installation on the RPMS server and installation on the local (client) PC. See the steps below for installation instructions.

3.1.1 Installation on the RPMS server

1. Make sure BMX Version 4.0 has been installed in RPMS on the RPMS Server.
2. Make sure CRS version 14.1 has been installed in RPMS on the RPMS server. (See instructions above.)

Note: If a previous version of Visual CRS is being used you will not need to perform Steps 3 and 4. If this is the first time Visual CRS is being used perform Steps 3 and 4.

3. Assign option BGPGRPC as a secondary menu option with a synonym of **BGPG** for each user.
4. Assign option BMXRPC as a secondary menu option with a synonym of **BMX** for each user.

3.1.2 Installation on each user's (client) PC

1. Place **bgp_1410client.zip** into a directory of your choice and unzip the file. There are two files included in the zip file: **bgp_1410.msi** and **bgp_1410setup.exe**.
2. If a previous version of the Visual CRS product is installed it will need to be removed. Go to the **Start** menu. Then go to **Control Panel** then click **Add/Remove Programs** and select and remove **Visual CRS**.
3. Double click the **bgp_1410setup.exe** file that was distributed with Visual CRS. If asked, accept the License Agreement and follow the instructions for downloading and installing Microsoft .Net Framework v4.0 (this will only occur if the most current version of Microsoft.Net Framework v4.0 is not on the local PC). This step takes approximately 20-30 minutes over a DSL connection.
4. Follow the prompts on the **Visual CRS Setup Screens** and accept all of the defaults.
5. Double click the **Visual CRS** shortcut that appears on the desktop.
6. If this is the first install you will need to add a new connection. Please refer to the **BMX 4.0 User Manual** for instructions.
7. When the **RPMS Login** window appears, enter your RPMS access and verify codes, and then click **OK**.
8. If data for multiple facilities is stored on the same RPMS database, the **Select Division** window is displayed. Select a Division, and then click **OK**.
9. You are now in the Visual CRS software.

4.0 Sample Installations

4.1 Sample Installation of CRS on RPMS Server

```

IHS CLINICAL REPORTING 14.1 Installed.
      Apr 23, 2014@12:28:41

Not a VA primary domain

Install Completed
```

Figure 4-1: Sample installation for IHS Clinical Reporting package 14.1

4.2 Sample Installation of the CRS GUI

1. Double click **bgp_1410setup.exe** to launch the **Visual CRS Setup Wizard** (Figure 4-2):

Figure 4-2: **Visual CRS Setup Wizard**, Welcome dialog

2. Click **Next** to display the **Select Installation Folder** dialog (Figure 4-3):

Figure 4-3: **Visual CRS Setup Wizard**, **Select Installation Folder** dialog

3. Click **Next** to display the **Confirm Installation** dialog (Figure 4-4):

Figure 4-4: **Visual CRS Setup Wizard, Confirm Installation** dialog

4. Click **Next** to display the **Installing Visual CRS** dialog (Figure 4-5):

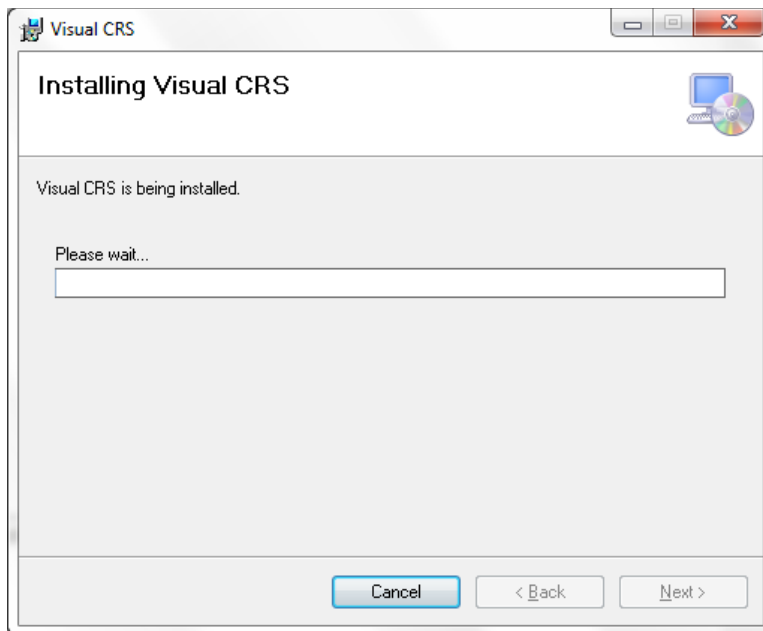

Figure 4-5: **Visual CRS Setup Wizard, Installing Visual CRS** dialog

5. Wait while the application is installed. When the installation is complete, the **Installation Complete** dialog (Figure 4-6) displays:

Figure 4-6: **Visual CRS Setup Wizard, Installation Complete** dialog

6. Click **Close**.

A desktop shortcut named Visual CRS should now be available. Refer to the user manual for instructions on use of the Visual CRS application.

Acronym List

CRS	Clinical Reporting System
GPRA	Government Performance and Results Act
GUI	Graphical User Interface
IHS	Indian Health Service
RPMS	Resource and Patient Management System
