# Preface

The Government Performance and Results Act (GPRA) requires federal agencies to report annually on how the agency measured up against the performance targets set in its annual Plan. The Indian Health Service (IHS) GPRA report includes measures for clinical prevention and treatment, quality of care, infrastructure, and administrative efficiency functions.

The IHS Clinical Reporting System (CRS) is a Resource and Patient Management System (RPMS) software application designed for national reporting as well as Area Office and local monitoring of clinical GPRA and developmental measures. CRS was first released for Fiscal Year (FY) 2002 performance measures (as GPRA+) and is based on a design by the Aberdeen Area (GPRA2000).

This manual contains the FY 2017 clinical performance measure definitions and logic for the CRS 2017 Version 17.1 software. CRS is the reporting tool used by the IHS Office of Planning and Evaluation to collect and report clinical performance results annually to the Department of Health and Human Services and to Congress.

Each year, an updated version of CRS software is released to reflect changes in the logic descriptions of the different denominators and numerators. Additional performance measures may also be added. Local facilities can run reports as often as they want to and can also use CRS to transmit data to their Area. The Area Office can use CRS to produce an aggregated Area report for either annual GPRA or Area Director Performance reports.

CRS produces reports on demand from local RPMS databases for both GPRA and developmental clinical measures that are based on RPMS data, thus eliminating the need for manual chart audits for evaluating and reporting clinical measures.

To produce reports with comparable data across every facility, the GPRA measures definitions was "translated" into programming code with the assistance of clinical subject matter experts. CRS uses predefined taxonomies to find data items in the RPMS Patient Care Component (PCC) to determine if a patient meets the performance measure criteria. Taxonomies contain groups of codes (e.g., diagnoses or procedures) or site-specific terms. Each performance measure has one or more defined denominators and numerators.

Administrative and clinical users can produce reports for selected measures at any time to:

• Identify potential data issues in their RPMS, i.e., missing or incorrect data.

- Monitor their site's performance against past national performance and upcoming agency goals.
- Identify specific areas where the facility is not meeting the measure in order to initiate business process or other changes.
- Quickly measure impact of process changes on performance measures.
- Identify areas meeting or exceeding measures to provide lessons learned.

Users of the RPMS CRS include:

- Area Office and site quality improvement staff
- Compliance Officers
- GPRA coordinators
- Clinical staff, such as physicians, nurses, nurse practitioners, and other providers
- Area Office directors
- Any staff involved with quality assurance initiatives
- Staff who run various CRS reports

# 1.0 Introduction

This manual provides information on the performance measure logic used by the Clinical Reporting System (CRS) Version 17.1 Selected Measures (Local) Report (Fiscal Year [FY] 2017 Clinical Performance Measures). For information on system setup, available reports and steps for running the reports, and performing Area Office functions, refer to the CRS Version 17.1 User Manual.

# 2.0 Performance Measure Logic

This section provides the following information for each performance measure topic:

- For Government Performance and Results Act (GPRA) measures, the measure description is provided as stated in the Indian Health Service (IHS) Annual Performance Report to Congress
- Definitions of all denominators and numerators for each performance measure topic
- Detailed description of the logic for the denominator and numerator, including specific codes, fields, taxonomies, and/or values searched
- Key changes to logic from the previous year, if any
- Description of which patients and information are contained on the patient list
- Performance measure source and past IHS performance, if any, and IHS or Healthy People (HP) 2020 targets for the performance measure
- Report examples
- Patient list examples

**Note:** All report examples and patient list examples used in this section were produced from "scrubbed" demonstration databases and do not represent individual patient data.

### 2.1 Performance Measure Logic Basics

### 2.1.1 CRS Denominator Definitions

Each performance measure topic has one or more define denominators and numerators. The denominator is the total population that is being reviewed for a specific measure. For the National GPRA/GPRAMA Report, only one denominator for each topic is reported. These denominators are pre-defined, based on the Active Clinical Population definition. For the Selected Measures reports for local use (CRS Version 17.1 User Manual, Section 5.11), multiple denominators may be reported to provide a complete picture of clinical performance. There are also additional options available to further refine denominator definitions.

#### 2.1.1.1 Denominator Definitions for National GPRA Reporting

The Active Clinical population is the denominator definition used as the basis for *most* GPRA measures. This denominator was developed in FY 2003 specifically for clinical performance measures because it is more representative of the active clinical population.

Prior to FY 2003, the GPRA User Population denominator definition was used for national reporting, similar to the agency's IHS User Population definition.

The *Active Clinical* population for the National GPRA/GPRAMA Report is defined by the following criteria:

- Patients with the name of "DEMO, PATIENT" or who are included in the Resource and Patient Management System (RPMS) Demo/Test Patient Search Template (DPST option located in the PCC Management Reports, Other section) will be automatically excluded from the denominator.
- Patient must have two visits to medical clinics in the past 3 years prior to the end of the Report Period. At least one visit must be to one of the following core medical clinics:

Clinic Code	Clinic Description
01	General
06	Diabetic
10	GYN
12	Immunization
13	Internal Medicine
20	Pediatrics
24	Well Child
28	Family Practice
57	EPSDT
70	Women's Health
80	Urgent Care
89	Evening

The second visit can be either to one of the core medical clinics in the previous list or to one of the following additional medical clinics:

Clinic Code	Clinic Description
02	Cardiac
03	Chest And TB

CRS Clinical Performance Measure Logic Manual for FY 2017 Clinical Measures June 2017

Clinic Code	Clinic Description
05	Dermatology
07	ENT
08	Family Planning
16	Obstetrics
19	Orthopedic
23	Surgical
25	Other
26	High Risk
27	General Preventive
31	Hypertension
32	Postpartum
37	Neurology
38	Rheumatology
49	Nephrology
50	Chronic Disease
69	Endocrinology
75	Urology
81	Men's Health Screening
85	Teen Clinic
88	Sports Medicine
B8	Gastroenterology - Hepatology
B9	Oncology - Hematology
C3	Colposcopy

- Patient must be alive on the last day of the report period.
- Patient must be American Indian/Alaska Native (AI/AN) (defined as Beneficiary 01). This data item is entered and updated during the patient registration process.
- Patient must reside in a community included in the site's "official" GPRA community taxonomy, defined as all communities of residence in the Purchased and Referred Care (PRC) catchment area specified in the community taxonomy specified by the user.

The *Active Clinical Plus Behavioral Health Population* for National GPRA/GPRAMA Reports is defined as follows:

- Patients with the name of "DEMO, PATIENT" or who are included in the RPMS Demo/Test Patient Search Template (DPST option located in the Patient Care Component [PCC] Management Reports, Other section) will be automatically excluded from the denominator.
- Patient must have *two* visits to *medical* clinics in the past three years prior to the end of the Report Period. At least one visit must be to one of the following core medical clinics:

Clinic Code	Clinic Description
01	General
06	Diabetic
10	GYN
12	Immunization
13	Internal Medicine
20	Pediatrics
24	Well Child
28	Family Practice
57	EPSDT
70	Women's Health
80	Urgent Care
89	Evening

The second visit can be *either* to one of the core medical clinics in the previous list *or* to one of the following additional medical clinics:

Clinic Code	Clinic Description
02	Cardiac
03	Chest And TB
05	Dermatology
07	ENT
08	Family Planning
14	Mental Health
16	Obstetrics
19	Orthopedic
23	Surgical
25	Other

CRS Clinical Performance Measure Logic Manual for FY 2017 Clinical Measures June 2017

Clinic Code	Clinic Description
26	High Risk
27	General Preventive
31	Hypertension
32	Postpartum
37	Neurology
38	Rheumatology
43	Alcohol & Substance Abuse
48	Medical Social Services
49	Nephrology
50	Chronic Disease
69	Endocrinology
75	Urology
81	Men's Health Screening
85	Teen Clinic
88	Sports Medicine
B8	Gastroenterology – Hepatology
B9	Oncology – Hematology
C3	Colposcopy
C4	Behavioral Health
C9	Telebehavioral Health

- Patient must be alive on the last day of the report period.
- Patient must be AI/AN (defined as Beneficiary 01). This data item is entered and updated during the patient registration process.
- Patient must reside in a community included in the site's "official" GPRA community taxonomy, defined as all communities of residence in the PRC catchment area specified in the community taxonomy that is specified by the user.

The *GPRA User Population* for the National GPRA/GPRAMA Report is defined by the following criteria:

- Patients with the name of "DEMO, PATIENT" or who are included in the RPMS Demo/Test Patient Search Template (DPST option located in the PCC Management Reports, Other section) will be automatically excluded from the denominator.
- Patient must have been seen at least once in the 3 years prior to the end of the Report Period, regardless of the clinic type.

- Patient must be alive on the last day of the report period.
- Patient must be AI/AN (defined as Beneficiary 01). This data item is entered and updated during the patient registration process.
- Patient must reside in a community included in the site's "official" GPRA community taxonomy, defined as all communities of residence in the PRC catchment area specified in the community taxonomy specified by the user.

**Note:** The GPRA User Population definition is similar, but not identical, to the definition used by IHS headquarters (HQ) for annual user population statistics. GPRA "visits" are not required to be workload reportable as defined by IHS HQ.

#### 2.1.1.2 Denominator Definitions for Selected Measures Reports

In addition to the National GPRA/GPRAMA Report, CRS provides Selected Measures reports intended for local facility use for specific public health and/or performance improvement initiatives (CRS Version 17.1 User Manual, Section 5.11). Multiple denominators and numerators will be reported for each measure (e.g., *both* Active Clinical and GPRA User Population). Users have additional options to define the denominators as explained below.

The Active Clinical Population for Selected Measures (Local) Reports is defined as follows:

- Patients with name "DEMO, PATIENT" or who are included in the RPMS Demo/Test Patient Search Template (DPST option located in the PCC Management Reports, Other section) will be automatically excluded from the denominator.
- Patient must have two visits to medical clinics in the past three years prior to the end of the Report Period. At least one visit must be to one of the following core medical clinics:

Clinic Code	Clinic Description
01	General
06	Diabetic
10	GYN
12	Immunization
13	Internal Medicine
20	Pediatrics
24	Well Child
28	Family Practice

Clinic Code	Clinic Description
57	EPSDT
70	Women's Health
80	Urgent Care
89	Evening

The second visit can be either to one of the core medical clinics in the previous list or to one of the following additional medical clinics:

Clinic Code	Clinic Description
02	Cardiac
03	Chest And TB
05	Dermatology
07	ENT
08	Family Planning
16	Obstetrics
19	Orthopedic
23	Surgical
25	Other
26	High Risk
27	General Preventive
31	Hypertension
32	Postpartum
37	Neurology
38	Rheumatology
49	Nephrology
50	Chronic Disease
69	Endocrinology
75	Urology
81	Men's Health Screening
85	Teen Clinic
88	Sports Medicine
B8	Gastroenterology - Hepatology
В9	Oncology - Hematology
C3	Colposcopy

CRS Clinical Performance Measure Logic Manual for FY 2017 Clinical Measures June 2017

- Patient must be alive on the last day of the Report period.
- User defines population type: AI/AN patients only, non AI/AN, or both. This data item is entered and updated during the patient registration process.
- User defines general population: single community; group of multiple communities (community taxonomy); user-defined list of patient (patient panel); or all patients regardless of community of residence.

The *Active Clinical Plus Behavioral Health Population* for Selected Measures (Local) Reports is defined as follows:

- Patients with the name of "DEMO, PATIENT" or who are included in the RPMS Demo/Test Patient Search Template (DPST option located in the PCC Management Reports, Other section) will be automatically excluded from the denominator.
- Patient must have *two* visits to *medical* clinics in the past three years prior to the end of the Report Period. At least one visit must be to one of the following core medical clinics:

Clinic Code	<b>Clinic Description</b>
01	General
06	Diabetic
10	GYN
12	Immunization
13	Internal Medicine
20	Pediatrics
24	Well Child
28	Family Practice
57	EPSDT
70	Women's Health
80	Urgent Care
89	Evening

The second visit can be *either* to one of the core medical clinics in the previous list *or* to one of the following additional medical clinics:

Clinic Code	Clinic Description
02	Cardiac
03	Chest And TB
05	Dermatology
07	ENT

CRS Clinical Performance Measure Logic Manual for FY 2017 Clinical Measures June 2017

Clinic Code	Clinic Description
08	Family Planning
14	Mental Health
16	Obstetrics
19	Orthopedic
23	Surgical
25	Other
26	High Risk
27	General Preventive
31	Hypertension
38	Rheumatology
43	Alcohol & Substance Abuse
48	Medical Social Services
49	Nephrology
50	Chronic Disease
69	Endocrinology
75	Urology
81	Men's Health Screening
85	Teen Clinic
88	Sports Medicine
B8	Gastroenterology – Hepatology
B9	Oncology – Hematology
C3	Colposcopy

- Patient must be alive on the last day of the report period.
- User defines population type: AI/AN patients only, non-AI/AN, or both. This data item is typed and updated during the patient registration process.
- User defines general population: single community; group of multiple communities (community taxonomy); user-defined list of patients (patient panel); or all patients, regardless of community of residence.

The User Population for Selected Measures (Local) reports is defined as follows:

• Patients with the name of "DEMO, PATIENT" or who are included in the RPMS Demo/Test Patient Search Template (DPST option located in the PCC Management Reports, Other section) will be excluded from the denominator automatically.

- Patient must have been seen at least once in the 3 years prior to the end of the Report Period, regardless of the clinic type.
- Patient must be alive on the last day of the report period.
- User defines population type: AI/AN patients only, non AI/AN, or both.
- User defines general population: single community, group of multiple communities (community taxonomy); user-defined list of patient (patient panel); or all patients regardless of community of residence.

### 2.1.2 Performance Measure Logic Example

**Cancer Screening: Mammogram Rates**: During GPRA Year 2017, achieve the target rate of 56.7% for the proportion of female patients ages 52 through 64 who have had mammography screening within the last 2 years.

For CRS, the GPRA measure definition is defined as:

- Denominator (total number of patients evaluated): Active Clinical female patients ages 52 through 64, excluding those with documented history of bilateral mastectomy. (The clinical owner of the measure has determined based on current medical guidelines that "eligible" women are defined as ages 52 through 64.)
- Numerator (those from the denominator who meet the criteria for the measure): patients with documented mammogram in past 2 years.

For the programmer, the Mammogram measure is described in terms of the following logic:

- 1. Begin with the Active Clinical population definition.
  - Exclude any patients with the name of "DEMO, PATIENT."
  - Exclude any patient records that are included in the RPMS Demo/Test Patient Search Template.
  - Exclude any patients with a date of death in the Patient Registration file.
  - Exclude any patients who do *not* have value 01 (AI/AN) in the Beneficiary field in Patient Registration file.
  - Exclude any patients whose Community of Residence is not included in the site's defined GPRA Community Taxonomy for this report.
  - For the remaining patients, search Visit files for the 3 years prior to the selected report end date; exclude any patient records whose visits do not meet the "two medical clinics" definition.

- 2. From these patients, identify the subset that are female and at least age 52 on the first day of the current report period and less than age 65 on the last day of the report period.
- 3. Exclude patients with documented bilateral mastectomy by searching the V Procedure file for Procedure Codes ICD-9: 85.42, 85.44, 85.46, 85.48; ICD-10: OHBV0ZZ, OHCV0ZZ, OHTV0ZZ, V CPT for CPT Codes 19300.50-19307.50 OR 19300-19307 w/modifier 09950 (50 and 09950 modifiers indicate bilateral), or old codes 19180, 19200, 19220, 19240, w/modifier of 50 or 09950, or POV or Problem List entry where the status is not Deleted of ICD-10: Z90.13 or SNOMED data set PXRM BGP BILAT MASTECTOMY (Problem List only) any time before the end of the report period; *or* who have two separate occurrences for either (1) one code that indicates a right mastectomy and one code that indicates a left mastectomy, or (2) one code that indicates a mastectomy on unknown side and one code that indicates either a right or left mastectomy, or two codes that indicate a mastectomy on unknown side on two different dates of service.
  - Right Mastectomy: Diagnosis (POV or Problem List entry where the status is not Deleted) ICD-10: Z90.11; SNOMED data set PXRM BGP RIGHT MASTECTOMY (Problem List only); Procedure ICD-10: 07T50ZZ, 07T80ZZ, 0HBT0ZZ, 0HCT0ZZ, 0HTT0ZZ.
  - b. Left Mastectomy: Diagnosis (POV or Problem List entry where the status is not Deleted) ICD-10: Z90.12; SNOMED data set PXRM BGP LEFT MASTECTOMY (Problem List only); Procedure ICD-10: 07T60ZZ, 07T90ZZ, 0HBU0ZZ, 0HCU0ZZ, 0HTU0ZZ.
  - c. Mastectomy on unknown side: 1) CPT 19300-19307, or old codes 19180, 19200, 19220, 19240; 2) Procedure ICD-9: 85.41, 85.43, 85.45, 85.47.
- 4. For these patients (the denominator), check for a mammogram in the past 2 years in the following order:
  - a. Check V Radiology or V CPT for the following CPT Codes: 77052 through 77059, 77065 through 77067, 76090 (old code), 76091 (old code), 76092 (old code), G0206; G0204, G0202
  - b. Check the Purpose of Visit file (V POV) for a diagnosis of ICD-9: V76.11 Screening Mammogram for High Risk Patient; V76.12 Other Screening Mammogram; 793.80 Abnormal Mammogram, Unspecified; 793.81 Mammographic Microcalcification; 793.89 Other Abnormal Findings On Radiological Exam of Breast or ICD-10: R92.0, R92.1, R92.8, Z12.31.
  - c. Check V Procedures for a procedure of ICD-9: 87.36 Xerography of Breast, 87.37 Other Mammography or ICD-10: BH00ZZZ, BH01ZZZ, BH02ZZZ.

d. Check the Women's Health Tracking package for documentation of a procedure called Mammogram Screening, Mammogram Dx Bilat, or Mammogram Dx Unilat and where the result does *not* have "ERROR/DISREGARD".

If a visit with any of the specified codes is found, the patient is considered to have met the measure, and the program checks the next patient.

#### 2.1.3 Age Ranges

Unless otherwise noted, for the purposes of CRS reports, the age of a patient is calculated at the beginning of the report period. For example, for a report period of July 1, 2016 through June 30, 2017, Jane Doe is defined as age 74 if her birth date is June 10, 1942, even though she becomes age 75 during the report period.

#### 2.1.4 Standard Health Care Codes

#### 2.1.4.1 Current Procedural Terminology Codes

One of several code sets used by the healthcare industry to standardize data, and allow for comparison and analysis. Current Procedural Terminology (CPT) was developed and is updated annually by the American Medical Association, and is widely used in producing bills for services rendered to patients. CPTs include codes for diagnostic and therapeutic procedures, and specify information that differentiates the codes based on cost. CPT codes are the most widely accepted nomenclature in the United States for reporting physician procedures and services for federal and private insurance third-party reimbursement. CRS searches for CPT and other codes as specified in the logic definition to determine if a patient meets a denominator or numerator definition.

#### 2.1.4.2 International Classification of Disease Codes

One of several code sets used by the healthcare industry to standardize data. The International Classification of Disease (ICD) is an international diagnostic coding scheme. In addition to diseases, ICD also includes several families of terms for medical-specialty diagnoses, health status, disablements, procedure, and reasons for contact with healthcare providers. IHS currently uses ICD, Ninth Revision (ICD-9) for coding, but will be switching to ICD-10 in 2015. CRS searches for ICD and other codes as specified in the logic definition, to determine if a patient meets a denominator or numerator definition.

#### 2.1.4.3 Logical Observation Identifiers Names and Codes

Logical Observation Identifiers Names and Codes (LOINC®). A standard coding system originally initiated for laboratory values, the system is being extended to include non-laboratory observations (electrocardiograms, vital signs, etc.). Standard code sets are used to define individual tests and mitigate variations in local terminologies for laboratory and other healthcare procedures, for example, Glucose or Glucose Test. IHS began integrating LOINC values into RPMS in several pilot sites in 2002.

Refer to the CRS Version 17.1 Technical Guide for a list of specific LOINC codes included in each LOINC taxonomy.

### 2.2 Diabetes Related Measure Topics

#### 2.2.1 Diabetes Prevalence

#### Denominators

*User Population patients*. Broken down by gender and age groups (less than (<) 15, 15 through 19, 20 through 24, 25 through 34, 35 through 44, 45 through 54, 55 through 64, greater than (>) 64 years).

#### Numerators

Patients diagnosed with Diabetes at any time before the end of the Report Period.

Patients diagnosed with Diabetes *during* the Report Period.

#### **Logic Description**

Age is calculated at the beginning of the Report Period.

*Diabetes definition*: At least one POV diagnosis of ICD-9: 250.00 through 250.93 or ICD-10: E10.\* through E13.\*.

#### Key Logic Changes from CRS Version 17.0

None.

#### Patient List Description

List of diabetic patients with most recent diagnosis.

#### **Measure Source**

HP 2010 5-2, 5-3

Performance	Percent
IHS FY 2016 Performance	14.7%

#### Measure Past Performance and Long-Term Targets

DU November 25, 2017 Page 1 \*\*\* IHS 2017 Selected Measures with Community Specified Report \*\*\* DEMO INDIAN HOSPITAL Report Period: Jan 01, 2017 to Dec 31, 2017 Previous Year Period: Jan 01, 2016 to Dec 31, 2016 Baseline Period: Jan 01, 2010 to Dec 31, 2010 Diabetes Prevalence Denominator(s): - User Population patients. Broken down by gender and by age groups: <15, 15-19, 20-24, 25-34, 35-44, 45-54, 55-64, 65+. Numerator(s): - Patients diagnosed with Diabetes at any time before the end of the Report Period. - Patients diagnosed with Diabetes during the Report Period. Logic: Age is calculated at the beginning of the Report Period. Diabetes diagnosis is defined as at least one POV diagnosis ICD-9: 250.00-250.93 or ICD-10: E10.\*-E13.\*. Performance Measure Description: Continue tracking (i.e., data collection and analyses) Area age-specific diabetes prevalence rates to identify trends in the age-specific prevalence of diabetes (as a surrogate marker for diabetes incidence) for the AI/AN population. Past Performance and/or Target:

Figure 2-3: Sample Patient List, Diabetes Prevalence, Patients with Diabetes Diagnosis

#### 2.2.2 Diabetes Comprehensive Care

#### Denominators

Active Diabetic patients, defined as Active Clinical patients diagnosed with diabetes prior to the Report Period, and at least two visits during the Report Period, and two diabetes mellitus- (DM-) related visits ever.

*Active Diabetic patients*, defined as Active Clinical patients diagnosed with diabetes prior to the Report Period, *and* at least two visits during the Report Period, *and* two diabetes mellitus- (DM-) related visits ever, without a documented history of bilateral blindness.

*Active Diabetic patients*, defined as Active Clinical patients diagnosed with diabetes prior to the Report Period, *and* at least two visits during the Report Period, *and* two diabetes mellitus- (DM-) related visits ever, without a documented history of bilateral foot amputation or two separate unilateral foot amputations.

#### Numerators

Patients with hemoglobin A1c documented during the Report Period, regardless of result

Patients with blood pressure (BP) documented during the Report Period

Patients with controlled BP, defined as less than ( <) 140/90, i.e., the mean systolic value is less than (<) 140 and the mean diastolic value is less than (<) 90

Patients with nephropathy assessment, defined as an estimated GFR with result and a urine albumin-to-creatinine ratio (UACR) during the Report Period *or* with the evidence of diagnosis and/or treatment of end-stage renal disease (ESRD) at any time before the end of the Report Period

Patients receiving a qualified retinal evaluation during the Report Period

**Note**: This numerator does *not* include refusals.

Patients with diabetic foot exam during the Report Period

**Note**: This numerator does *not* include refusals.

Patients with comprehensive diabetes care (documented A1c *and* blood pressure *and* nephropathy assessment *and* retinal exam *and* diabetic foot exam).

#### Logic Description

*Diabetes definition*: First Purpose of Visit (POV) ICD-9: 250.00 through 250.93 or ICD-10: E10.\* through E13.\* recorded in the POV file prior to the Report Period.

*A1c definition*: Searches for most recent A1c test with a result during the Report Period. If none found, CRS searches for the most recent A1c test without a result. A1c defined as: CPT 83036, 83037, 3044F through 3046F, 3047F (old code); LOINC taxonomy; or site-populated taxonomy DM AUDIT HGB A1C TAX.

*BP documented definition*: Having a minimum of 1 BP documented during the Report Period.

Exclusions: When calculating all BPs (using vital measurements or CPT codes), the following visits will be excluded: 1) Service Category H (Hospitalization), I (In Hospital), S (Day Surgery), or O (Observation); 2) Clinic code 23 (Surgical), 30 (ER), 44 (Day Surgery), 79 (Triage), C1 (Neurosurgery), or D4 (Anesthesiology).

CRS uses mean of last 3 BPs documented during the Report Period. If 3 BPs are not available, uses mean of last 2 BPs, or one BP if there is only one documented. If a visit contains more than 1 BP, the lowest BP will be used, defined as having the lowest systolic value. The mean Systolic value is calculated by adding the last 3 (or 2) systolic values and dividing by 3 (or 2). The mean Diastolic value is calculated by adding the diastolic values from the last 3 (or 2) BPs and dividing by 3 (or 2).

If CRS is not able to calculate a mean BP, it will search for CPT 0001F, 2000F, 3074F through 3080F, G9273, G9274 or POV ICD-9: V81.1 documented during the Report Period.

*Controlled BP definition*: CRS uses a mean, as described above. If the mean systolic and diastolic values do not *both* meet the criteria for controlled, then the value is considered not controlled.

BP documented and Controlled BP: If CRS is not able to calculate a mean BP from BP measurements, it will search for the most recent of any of the following CPT codes documented during the Report Period: BP Documented: 0001F, 2000F, G9273, G9274 or POV ICD-9: V81.1; *or* Systolic 3074F, 3075F, or 3077F *with* Diastolic: 3078F, 3079F, or 3080F. The systolic and diastolic values do not have to be recorded on the same day. If there are multiple values on the same day, the CPT indicating the lowest value will be used. The following combinations represent BP less than (<) 140/90 and will be included in the Controlled BP numerator: CPT 3074F or 3075F *and* 3078F or 3079F; *or* G9273. All other combinations *will not* be included in the Controlled BP numerator.

*Nephropathy assessment definition*: (1) Estimated GFR with result during the report period, defined as any of the following: (A) Site-populated taxonomy BGP GPRA ESTIMATED GFR TAX or (B) LOINC taxonomy, *and* (2) Urine Albumin-to-Creatinine Ratio (UACR) during the Report Period, defined as any of the following: (A) CPT 82043 WITH 82570; (B) LOINC taxonomy; or (C) site-populated taxonomy BGP QUANT UACR TESTS.

**Note:** Be sure to check with your laboratory supervisor that the names you add to your taxonomy reflect quantitative test values.

(3) ESRD diagnosis/treatment defined as any of the following ever: (A) CPT 36145 (old code), 36147, 36800, 36810, 36815, 36818, 36819, 36820, 36821, 36831 through 36833, 50300, 50320, 50340, 50360, 50365, 50370, 50380, 90951 through 90970 or old codes 90918 through 90925, 90935, 90937, 90939 (old code), 90940, 90945, 90947, 90989, 90993, 90997, 90999, 99512, 3066F, G0257, G0308 through G0327 (old codes), G0392 (old code), G0393 (old code), G9231, S2065, or S9339; (B) Diagnosis (POV or Problem List entry where the status is not Deleted) POV ICD-9: 585.6, V42.0, V45.1 (old code), V45.11, V45.12, or V56.\*; ICD-10: I12.0, I13.11, I13.2, N18.5, N18.6, N19., Z48.22, Z49.\*, Z91.15, Z94.0, Z99.2; SNOMED data set PXRM END STAGE RENAL DISEASE (Problem List only); (C) Procedure ICD-9: 38.95, 39.27, 39.42, 39.43, 39.53, 39.93 through 39.95, 54.98, or 55.6\*.

*Qualified retinal evaluation definition*: (1) diabetic retinal exam or (2) other eye exam. The following methods are qualifying for this measure: (1) dilated retinal evaluation by an optometrist or ophthalmologist, or (2) seven standard fields stereoscopic photos (ETDRS) evaluated by an optometrist or ophthalmologist, or (3) any photographic method formally validated to seven standard fields (ETDRS).

• *Diabetic Retinal Exam*: Any of the following during the Report Period: (1) Exam Code 03 Diabetic Eye Exam (dilated retinal examination or formally validated\* ETDRS photographic equivalent), (2) CPT 2022F Dilated retinal eye exam; 2024F Seven standard field stereoscopic photos with interpretation by an ophthalmologist or optometrist; 2026F Eye imaging formally validated\* to match the diagnosis from seven standard field stereoscopic photos; S0620 Routine ophthalmological examination including refraction; new patient; S0621 Routine ophthalmological examination including refraction; established patient; S3000 Diabetic indicator; retinal eye exam, dilated, bilateral.

• *Other Eye Exam*: Non-DNKA (did not keep appointment) visits to ophthalmology or optometry clinics with an optometrist or ophthalmologist, or visits to formally validated\* tele-ophthalmology retinal evaluation clinics. Searches for the following codes in the following order: CPT 67028, 67038 (old code), 67039, 67040, 92002, 92004, 92012, 92014; Clinic Code A2 (Diabetic Retinopathy)\*\*; Clinic Codes 17 or 18 with Provider Code 08, 24, or 79 where the Service Category is not C (Chart Review) or T (Telecommunications).

\*Validation study properly powered and controlled against the ETDRS gold standard.

\*\*Validated photographic (teleophthalmology) retinal surveillance.

Bilateral blindness defined as Diagnosis (POV or Problem List entry where the status is not Deleted) of any of the following: 1) ICD-9: 369.01, 369.03, 369.04; ICD-10: H54.0; 2) SNOMED data set PXRM BGP BILAT BLINDNESS (Problem List only); 3) SNOMED data set PXRM BGP BLINDNESS UNSPECIFIED with Laterality equal to Bilateral (Problem List only); 4) One code from (SNOMED data set PXRM BGP LEFT EYE BLIND (Problem List only) OR SNOMED data set PXRM BGP BLINDNESS UNSPECIFIED with Laterality equal to Left (Problem List only)) AND one code from (SNOMED data set PXRM BGP RIGHT EYE BLIND (Problem List only) OR SNOMED data set PXRM BGP BLINDNESS UNSPECIFIED with Laterality equal to Right (Problem List only)).

*Diabetic foot exam definition:* (1) Exam Code 28 Diabetic Foot Exam, Complete; (2) non-DNKA visit with a podiatrist (Provider Codes 33, 84 or 25), (3) non-DNKA visit to Podiatry Clinic or Diabetic Foot Clinic (Clinic Codes 65 and B7), or (4) CPT 2028F, G9226.

*Bilateral foot amputation definition:* CPT 27290.50 through 27295.50, 27590.50 through 27592.50, 27598.50, 27880.50 through 27882.50 (50 modifier indicates bilateral), G9224; 2) Procedure ICD-10: 0Y640ZZ.

*Unilateral foot amputation definition:* Must have two separate occurrences on two different dates of service: (1) CPT 27290 through 27295, 27590 through 27592, 27598, 27880 through 27882; (2) Procedure ICD-9: 84.10, 84.13 through 84.19; ICD-10: 0Y620ZZ, 0Y630ZZ, 0Y670ZZ, 0Y680ZZ, 0Y6C0Z\*, 0Y6D0Z\*, 0Y6F0ZZ, 0Y6G0ZZ, 0Y6H0Z\*, 0Y6J0Z\*, 0Y6M0Z0, 0Y6N0Z0, or (3) POV ICD-9: V49.7\*.

#### Key Logic Changes from CRS Version 17.0

1. Added Clinic Code 79 (Triage) to BP exclusions.

Figure 2-5: Sample Patient List, Diabetes Comprehensive Care

#### 2.2.3 Diabetes: Glycemic Control

#### **GPRAMA Measure Description, Good Glycemic Control**

During GPRA Year 2017, achieve the target rate of 48.4% for the proportion of patients with diagnosed diabetes who have good glycemic control (defined as A1c less than (<) 8).

#### Denominators

User Population patients diagnosed with diabetes prior to the report period.

Active Diabetic patients, defined as Active Clinical patients diagnosed with diabetes prior to the Report Period, and at least two visits during the Report Period, and two DM-related visits ever. (GPRAMA Denominator)

Active Adult Diabetic patients, defined by meeting the following criteria: (1) who are age 19 and older at the beginning of the Report Period, (2) whose first ever DM diagnosis occurred prior to the Report Period; (3) who had at least two DM related visits ever; (4) at least one encounter with DM POV in a primary clinic with a primary provider during the Report Period; and (5) never have had a creatinine value greater than (>) 5.

#### Numerators

Patients with a hemoglobin A1c documented during the Report Period, regardless of result.

*Poor Control*: Total of Poor and Very Poor Control: Patients with A1c greater than (>) 9.

*Very Poor Control*: Patients with A1c greater than or equal to (>=) 12.

*Poor Control*: Patients with A1c greater than (>) 9 and less than (<) 12.

*Fair Control*: Patients with A1c greater than or equal to (>=) 8 and less than or equal to (<=) 9.

Patients with A1c greater than or equal to (>=) 7 and less than (<) 8.

*Good Control*: Patients with A1c less than (<) 8. (GPRAMA Numerator)

Patients with A1c less than (<) 7.

Without Result: Patients with A1c documented but no value.

#### **Logic Description**

*Diabetes definition*: First Purpose of Visit ICD-9: 250.00 through 250.93 or ICD-10: E10.\* through E13.\* recorded in the V POV file prior to the Report Period.

*Hemoglobin A1c definition*: Searches for most recent A1c test with a result during the Report Period. If more than one A1c test is found on the same day and/or the same visit and one test has a result and the other does not, the test with the result will be used. If both tests have a result, the last test done on the visit will be used. If an A1c test with a result is not found, CRS searches for the most recent A1c test without a result. Without result is defined as A1c documented but with no value.

CRS uses the following definitions:

Subject Defined	CPT Codes	LOINC Codes	Taxonomy
Creatinine (for Active Adult Diabetic denominator)	CPT codes are not included since they do not store the result, which is used in this topic	Yes	DM AUDIT CREATININE TAX

Subject Defined	CPT Codes	LOINC Codes	Taxonomy
Hemoglobin A1c	83036, 83037, 3044F-3046F, 3047F (old code) <b>Note</b> : CPT 3044F represents A1c less than (<) 7 and will be included in the A1c less than (<) 7 and A1c less than (<) 8 numerators. CPT 3046F represents A1c > 9 and will be included in the A1c > 9 numerator.	Yes	DM AUDIT HGB A1C TAX

In the CPT Codes column, specific LOINC codes used CRS are located in the CRS Technical Manual.

#### Key Logic Changes from CRS Version 17.0

- 1. Updated Poor Control to be greater than (>) 9 instead of greater than (>) 9.5.
- 2. Added logic for CPT 3046F to indicate A1c greater than (>) 9.

#### **Patient List Description**

List of diabetic patients with most recent A1c value, if any.

#### **Measure Source**

CRS Clinical Performance Measure Logic Manual for FY 2017 Clinical Measures June 2017

# 2.2.4 Diabetes: Blood Pressure Control

#### **GPRA Measure Description**

During GPRA Year 2017, achieve the target rate of 63.8% for the proportion of patients with diagnosed diabetes who have achieved blood pressure control (defined as less than (<) 140/90).

#### Denominators

User Population patients diagnosed with diabetes prior to the Report Period.

Active Diabetic patients, defined as Active Clinical patients diagnosed with diabetes prior to the Report Period, and at least two visits during the Report Period, and two DM-related visits ever. (GPRA Denominator)

Active Adult Diabetic patients, defined by meeting the following criteria: (1) who are age 19 and older at the beginning of the Report Period, (2) whose first ever DM diagnosis occurred prior to the Report Period; (3) who had at least two DM-related visits ever, (4) at least one encounter with DM POV in a primary clinic with a primary provider during the Report Period; and (5) never have had a creatinine value greater than (>) 5.

#### Numerators

Patients with blood pressure documented during the report period.

Patients with controlled blood pressure, defined as less than (<) 140/90, i.e., the mean systolic value is less than 140 and the mean diastolic value is less than 90 (GPRA Numerator).

Patients with blood pressure that is not controlled.

### Logic Description

*Diabetes definition*: First DM POV ICD-9: 250.00 through 250.93 or ICD-10: E10.\* through E13.\* recorded in the V POV file prior to the Report Period.

*Exclusions:* When calculating all BPs (using vital measurements or CPT codes), the following visits will be excluded: 1) Service Category H (Hospitalization), I (In Hospital), S (Day Surgery), or O (Observation); 2) Clinic code 23 (Surgical), 30 (ER), 44 (Day Surgery), 79 (Triage), C1 (Neurosurgery), or D4 (Anesthesiology).

*BP documented definition*: CRS uses mean of last 3 BPs documented during the Report Period. If 3 BPs are not available, uses mean of the last 2 BPs, or one BP if there is only one documented. If a visit contains more than 1 BP, the lowest BP will be used, defined as having the lowest systolic value. The mean Systolic value is calculated by adding the last 3 (or 2) systolic values and dividing by 3 (or 2). The mean Diastolic value is calculated by adding the diastolic values from the last 3 (or 2) blood pressures and dividing by 3 (or 2). If the systolic and diastolic values do not *both* meet the criteria for controlled, then the value is considered not controlled.

If CRS is not able to calculate a mean BP, it will search for CPT 0001F, 2000F, 3074F-3080F, G9273, G9274 or POV ICD-9: V81.1 documented during the Report Period.

*Controlled BP definition*: CRS uses a mean, as described above where BP is less than (<)140/90. If the mean systolic and diastolic values do not *both* meet the criteria for controlled, then the value is considered not controlled.

*BP documented and Controlled BP:* If CRS is not able to calculate a mean BP from blood pressure measurements, it will search for the most recent of any of the following codes documented during the Report Period: BP Documented: CPT 0001F, 2000F, G9273, G9274 or ICD-9: POV V81.1; or Systolic: CPT 3074F, 3075F or 3077F *with* Diastolic: CPT 3078F, 3079F, or 3080F. The systolic and diastolic values do *not* have to be recorded on the same day. If there are multiple values on the same day, the CPT indicating the lowest value will be used. The following combinations represent BP less than (<)140/90 and will be included in the Controlled BP numerator: CPT 3074F or 3075F *and* 3078F or 3079F; *or* G9273. All other combinations will *not* be included in the Controlled BP numerator.

CRS uses the following definition:

Subject Defined	CPT Codes	LOINC Codes	Taxonomy
Creatinine (for Active Adult Diabetic denominator)	CPT codes are not included since they do not store the result, which is used in this topic	Yes	DM AUDIT CREATININE TAX

In the LOINC Codes column, specific LOINC codes by CRS are location in the *CRS Technical Manual*.

Key Logic Changes from CRS Version 17.0

None.

## **Patient List Description**

# 2.2.5 Statin Therapy to Reduce Cardiovascular Disease Risk in Patients with Diabetes

#### **GPRA Measure Description**

During GPRA Year 2017, achieve the target rate of 61.9% for the proportion of patients with diagnosed diabetes and cardiovascular disease who are on statin therapy.

#### Denominators

Active Diabetic patients, defined as Active Clinical patients diagnosed with diabetes prior to the Report Period, and at least two visits during the Report Period, and two DM-related visits ever, ages 40 through 75; and Active Diabetic patients age 21 and older with documented CVD or an LDL greater than or equal to (>=) 190. Broken down by age groups 21 through 39, 40 through 75, 76 and older. (GPRA Denominator)

Active Diabetic patients, defined as Active Clinical patients diagnosed with diabetes prior to the Report Period, and at least 2 visits during the Report Period, and 2 DM-related visits ever, ages 40 through 75.

*Active Diabetic patients*, defined as Active Clinical patients diagnosed with diabetes prior to the Report Period, and at least two visits during the Report Period, and two DM-related visits ever, ages 40 through 75; and *Active Diabetic patients* age 21 and older with documented CVD or an LDL greater than or equal to (>=) 190, including denominator exclusions.

*User Population patients* diagnosed with diabetes prior to the Report Period, ages 40 through 75; and *Active Diabetic patients* age 21 and older with documented CVD or an LDL greater than or equal to (>=) 190.

#### Numerators

Patients who are statin therapy users during the Report Period or who receive an order (prescription) to receive statin therapy at any point during the Report Period. (GPRA Numerator)

Patients with any of the listed denominator exclusions.

a. Patients with documented allergy, intolerance, or other adverse effect to statin medication.

#### Logic Description

Age is calculated at the beginning of the Report Period.

## **Denominator Logic**

*Diabetes definition*: First DM POV ICD-9: 250.00 through 250.93 or ICD-10: E10.\* through E13.\* recorded in the V POV file prior to the Report Period.

Cardiovascular Disease (CVD) diagnosis defined as any of the following:

Subject Defined	ICD and Other Codes
Coronary Heart Disease (CHD)	Diagnosis (POV or Problem List entry where the status is not Inactive or Deleted): ICD-9: 410.0-413.*, 414.0-414.9, 429.2; ICD-10: I20.0-I22.8, I24.0-I25.83, I25.89, I25.9, Z95.5; SNOMED data set PXRM ISCHEMIC HEART DISEASE (Problem List only)
Acute Myocardial Infarction (AMI)	Diagnosis (POV or Problem List entry where the status is not Inactive or Deleted): ICD-9: 410.0*-410.9*, 412; ICD-10: I21.*, I22.*, I23.*, I25.2; SNOMED data set PXRM BGP AMI (Problem List only)
Ischemic Vascular Disease (IVD)	Diagnosis (POV or Problem List entry where the status is not Inactive or Deleted): ICD-9: 411.*, 413.*, 414.0*, 414.2, 414.8, 414.9, 429.2, 433.*-434.*, 440.1, 440.2*, 440.4, 444.*, 445.*; ICD-10: I20.*, I24.*, I25.1*, I25.5-I25.812, I65.*, I66.*, I70.1, I70.201-I70.299, I70.92, I74.*, I75.*; SNOMED data set PXRM BGP IVD (Problem List only)

Subject Defined	ICD and Other Codes
Ischemic Stroke or Transient Ischemic Attack (TIA)	Diagnosis (POV or Problem List entry where the status is not Inactive or Deleted): ICD-9: 433.01, 433.11, 433.21, 433.31, 433.81, 433.91, 434.01, 434.11, 434.91, 435.0, 435.1, 435.2, 435.3, 435.8, 435.9; ICD-10: G45.0-G45.2, G45.8, G45.9, G46.0-G46.2, I63.*; SNOMED data set PXRM BGP ISCHEMIC STROKE TIA (Problem List only)
CABG	POV: ICD-9: V45.81; ICD-10: Z95.1 CPT: 33510-33514, 33516-33519, 33521- 33523, 33530, 33533-33536, 33572, 35500, 35600, S2205-S2209 Procedure: ICD-9: 36.1*, 36.2*; ICD-10: 02100**, 021049*, 02104A*, 02104J*, 02104K*, 02104Z*, 02110**, 021149*, 02114A*, 02114J*, 02114K*, 02114Z*, 02120**, 021249*, 02124A*, 02124J*, 02124K*, 02124Z*, 02130**, 021349*, 02134A*, 02134J*, 02134K*, 02134Z*
PCI	<b>POV:</b> ICD-9: V45.82; ICD-10: Z95.5, Z98.61 <b>CPT:</b> 92920, 92924, 92928, 92933, 92937, 92941, 92943, 92980 (old code), 92982 (old code), 92995 (old code), G0290, C9600, C9602, C9604, C9606, C9607 <b>Procedure:</b> ICD-9: 00.66, 36.01 (old code), 36.02 (old code), 36.05 (old code), 36.06- 36.07; ICD-10: 02703**, 02704**, 02713**, 02714**, 02723**, 02724**, 02733**, 02734**
Other Revascularization	CPT: 37220, 37221, 37224-37231

CRS uses the following to define the tests:

Subject Defined	LOINC Codes	Taxonomy
LDL Done	Yes	DM AUDIT LDL CHOLESTEROL TAX
LDL greater than or equal to (=>) 190		Tests in above taxonomy with LDL greater than or equal to (=>) 190
LDL less than (<) 70		Tests in above taxonomy with LDL less than (<) 70

CRS Clinical Performance Measure Logic Manual for FY 2017 Clinical Measures June 2017

In the LOINC Codes column, specific LOINC codes used by CRS are located in the *CRS Technical Manual*.

Denominator Exclusions

Patients meeting any of the following conditions will be excluded from the denominator.

- 1. Patients with documented allergy, intolerance, or other adverse effect to statin medication.
- 2. Patients who have an active diagnosis of pregnancy or who are breastfeeding.
- 3. Patients with a diagnosis of cirrhosis of the liver during the Report Period or the year prior to the Report Period.
- 4. Patients who are receiving palliative care during the Report Period.
- 5. Patients with end-stage renal disease (ESRD).
- 6. Patients with diabetes whose most recent LDL result is less than (<) 70 and who have never had an LDL result greater than or equal to (>=) 190 and who are not taking statin therapy.

CRS uses the following codes to define contraindications to statins.

Contraindication to Statins (any of the codes occurring ever unless otherwise noted)	CPT Codes	ICD and Other Codes
Pregnancy		See below for definition
Breastfeeding		See below for definition
Acute Alcoholic Hepatitis		POV or Problem List entry where the status is not Inactive or Deleted during the Report Period: ICD-9: 571.1; ICD-10: K70.10, K70.11; SNOMED data set PXRM BGP ACUTE ETOH HEPATITIS (Problem List only)
NMI Refusal		<b>Refusal:</b> NMI refusal for any statin at least once during the Report Period

CRS uses the following codes to define adverse drug reactions/documented allergies to statins.

## Adverse Drug Reaction/Allergy to Statins

ICD and Other Codes
Site-Populated Lab Taxonomy or LOINC Taxonomy: DM AUDIT ALT TAX, with ALT and/or AST greater than (>) 3x the Upper Limit of Normal (ULN) (i.e., Reference High) on 2 or more consecutive visits during the Report Period
Site-Populated Lab Taxonomy or LOINC Taxonomy: BGP CREATINE KINASE TAX, with Creatine Kinase (CK) levels greater than (>) 10x ULN or CK greater than (>) 10,000 IU/L during the Report Period
Myopathy/Myalgia, defined as any of the following during the Report Period: <b>POV or Problem List entry</b> <b>where the status is not Inactive or Deleted:</b> ICD-9: 359.0-359.9, 729.1, 710.5, 074.1; ICD-10: G71.14, G71.19, G72.0, G72.2, G72.89, G72.9, M35.8, M60.80- M60.9, M79.1; SNOMED data set PXRM BGP MYOPATHY MYALGIA (Problem List only)
Any of the following occurring anytime ever: POV: ICD-9: 995.0-995.3 AND E942.9
Entry in ART (Patient Allergies File): "statin" or "statins"
Entry in Problem List (where status is not Deleted) or in Provider Narrative for any POV ICD-9: 995.0- 995.3, V14.8; ICD-10: Z88.8: "Statin" or "Statins"
Problem List entry where the status is not Deleted: SNOMED data set PXRM BGP ADR STATIN

Subject Defined	ICD and CPT Codes
Pregnancy	Any of the following: 1) The Currently Pregnant field in Reproductive Factors file set to "Yes" during the Report Period, or 2) At least two visits during the Report Period, where the primary provider is not a CHR (Provider code 53) with:
	<b>POV or Problem List:</b> ICD-9: 640.*3, 641.*3, 642.*3, 643.*3, 644.*3, 645.*3, 646.*3, 647.*3, 648.*3, 649.*3, 651.*3, 652.*3, 653.*3, 654.*3, 655.*3, 656.*3, 657.*3, 658.*3, 659.*3, 660.*3, 661.*3, 662.*3, 663.*3, 665.*3, 668.*3, 669.*3, 671.*3, 673.*3, 678.*3, 679.*3, V22.0-V23.9, V24.*, V27.*, V28.81, V28.82, V28.89, V72.42, V89.01-V89.09; ICD-10: O09.00-O10.02, O10.111-O10.12, O10.211-O10.22, O10.311-O10.32, O10.411-O10.42, O10.911-O10.92, O11.1-O15.1, O15.9-O24.02, O24.111-O24.12, O24.311-O24.32, O24.41*, O24.811-O24.82, O24.911-O24.92, O25.10-O25.2, O26.00-O26.62, O26.711-O26.72, O26.811-O26.93, O29.011-O30.93, O31.*-O48.*, O60.0*, O61.*-O66.*, O68, O69.*, O71.00-O71.1, O71.89, O71.9, O74.0-O75.81, O75.89, O75.9, O76-O77.*, O88.011-O88.02, O88.111-O88.12, O88.211-O88.22, O88.311-O88.32, O88.811-O88.82, O90.3, O91.011-O91.019, O91.111-O91.119, O91.211-O91.219, O92.011-O92.019, O92.20, O92.29, O98.011-O98.02, O98.111-O98.12, O98.211-O98.62, O98.711-O98.72, O98.811-O98.82, O98.911-O98.62, O98.711-O98.72, O98.811-O98.82, O99.310-O99.314, O99.320-O99.324, O99.330-O99.334, O99.340-O99.344, O99.350-O99.354, O99.411-O99.42, O99.511-O99.52, O99.611-O99.62, O99.711-O99.72, O99.810, O99.814, O99.820, O99.824, O99.830, O99.834, O99.840-O99.844, O99.89, O9A.111-O9A.12, O9A.211-O9A.22, O9A.311-O9A.32, O9A.411-O9A.42, O9A.511-O9A.52, Z03.7*, Z32.01, Z33.1, Z34.*, Z36 <b>Procedure:</b> ICD-9: 72.*, 73.*, 74.*

*Cirrhosis of the liver definition*: Diagnosis (POV or Problem List entry where the status is not Deleted) ICD-9: 571.2, 571.5, 571.6; ICD-10: K70.30, K70.31, K71.7, K74.3-K74.5, K74.60, K74.69, P78.81; SNOMED data set PXRM BGP CIRRHOSIS (Problem List only).

Palliative care visit definition: POV ICD-9: V66.7; ICD-10: Z51.5.

*ESRD diagnosis/treatment definition*: Any of the following ever: (A) CPT 36145 (old code), 36147, 36800, 36810, 36815, 36818, 36819, 36820, 36821, 36831 through 36833, 50300, 50320, 50340, 50360, 50365, 50370, 50380, 90951 through 90970 or old codes 90918 through 90925, 90935, 90937, 90939 (old code), 90940, 90945, 90947, 90989, 90993, 90997, 90999, 99512, 3066F, G0257, G0308 through G0327 (old codes), G0392 (old code), G0393 (old code), G9231, S2065, or S9339; (B) Diagnosis (POV or Problem List entry where the status is not Inactive or Deleted) ICD-9: 585.6, V42.0, V45.1 (old code), V45.11, V45.12, or V56.\*; ICD-10: I12.0, I13.11, I13.2, N18.5, N18.6, N19., Z48.22, Z49.\*, Z91.15, Z94.0, Z99.2; SNOMED data set PXRM END STAGE RENAL DISEASE (Problem List only); (C) Procedure ICD-9: 38.95, 39.27, 39.42, 39.43, 39.53, 39.93 through 39.95, 54.98, or 55.6\*.

#### **Numerator Logic**

#### Statin therapy user definition: CPT 4013F

*Statin medication codes* defined with medication taxonomy BGP PQA STATIN MEDS. Statin medications: Atorvostatin (Lipitor), Fluvastatin (Lescol), Lovastatin (Altocor, Altoprev, Mevacor), Pravastatin (Pravachol), Pitavastatin (Livalo), Simvastatin (Zocor), Rosuvastatin (Crestor).

Statin Combination Products: Niacin-lovastatin, Niacin-simvastatin, Ezetimibesimvastatin, Amlodipine-Atorvastatin, Sitagliptin-simvastatin, Ezetimibe-atorvastatin.

Patients must have an active prescription for statin therapy during the Report Period. This includes patients who receive an order during the Report Period, or prior to the Report Period with enough days supply to take them into the Report Period.

Rx Days Supply >= (Report Period Begin Date - Prescription Date)

## Key Logic Changes from CRS Version 17.0

- 1. Changed logic to include prescriptions written prior to the Report Period with enough days' supply to overlap the Report Period.
- 2. Added ICD-10 codes I12.0, I13.11, I13.2, N18.5, N19. to ESRD definition.

#### **Patient List Description**

CRS Clinical Performance Measure Logic Manual for FY 2017 Clinical Measures June 2017

# 2.2.6 Diabetes: Nephropathy Assessment GPRA Measure Description

During GPRA Year 2017, achieve the target rate of 63.3% for the proportion of patients with diagnosed diabetes who are assessed for nephropathy.

## Denominators

User Population patients diagnosed with diabetes prior to the Report Period.

*Active Diabetic patients*, defined as Active Clinical patients diagnosed with diabetes prior to the Report Period, and at least two visits during the Report Period, and two DM-related visits ever (GPRA Denominator).

Active Adult Diabetic patients, defined by meeting the following criteria: (1) who are aged 19 and older at the beginning of the Report Period, (2) whose first ever DM diagnosis occurred prior to the Report Period; (3) who had at least two DM related visits ever, (4) at least one encounter with DM POV in a primary clinic with a primary provider during the Report Period; and (5) never have had a creatinine value greater than (>) 5.

## Numerator

Patients with nephropathy assessment, defined as an estimated GFR with result and a urine albumin-to-creatinine ratio (UACR) during the Report Period or with evidence of diagnosis and/or treatment of ESRD at any time before the end of the Report Period (GPRA Numerator).

## **Logic Description**

*Diabetes definition*: First DM Purpose of Visit ICD-9: 250.00 through 250.93 or ICD-10: E10.\* through E13.\* recorded in the V POV file prior to the Report period.

Nephropathy assessment definition:

- Estimated GFR with result during the Report Period and Urine Albumin-to-Creatinine Ratio (UACR) during the Report Period, *or*
- ESRD diagnosis/treatment defined as any diagnosis ever.

CRS uses the following to define the tests/diagnoses:

Subject Defined	CPT Codes	LOINC Codes	Taxonomy
Creatinine (for Active Adult Diabetic Denominator)	CPT codes are not included since they do not store the result, which is used in this topic	Yes	DM AUDIT CREATININE TAX
Estimated GFR		Yes	BGP GPRA ESTIMATED GFR TAX
Urine Albumin-to- Creatinine Ratio (UACR)	<b>CPT</b> : 82043 WITH 82570	Yes	BGP QUANT UACR TESTS <b>Note</b> : Be sure to check with your laboratory supervisor that the names you add to your taxonomy reflect quantitative test values

Subject Defined	CPT Codes	LOINC Codes	Taxonomy
End Stage Renal Disease	CPT: 36145 (old code), 36147, 36800, 36810, 36815, 36818, 36819, 36820, 36821, 36831 through 36833, 50300, 50320, 50340, 50360, 50365, 50370, 50380, 90951-90970 or old codes 90918 through 90925, 90935, 90937, 90939 (old code), 90940, 90945, 90947, 90989, 90993, 90997, 90999, 99512, 3066F, G0257, G0308 through G0327 (old codes), G0392 (old code), G0393 (old code), G9231, S2065, or S9339 Diagnosis (POV or Problem List entry where the status is not Deleted): ICD-9: 585.6, V42.0, V45.1 (old code), V45.11, V45.12, or V56*; ICD-10: I12.0, I13.11, I13.2, N18.5, N18.6, N19., Z48.22, Z49.*, Z91.15, Z94.0, Z99.2; SNOMED data set PXRM END STAGE RENAL DISEASE (Problem List only) Procedure: ICD-9: 38.95, 39.27, 39.42, 39.43, 39.53, 39.93-39.95, 54.98, or 55.6*		

In the LOINC Codes column, specific LOINC codes used by CRS are located in the *CRS Technical Manual*.

## Key Logic Changes from CRS Version 17.0

1. Added ICD-10 codes I12.0, I13.11, I13.2, N18.5, N19. to ESRD definition.

#### Patient List Description

List of diabetic patients with nephropathy assessment, if any.

## 2.2.7 Diabetic Retinopathy

## **GPRA Measure Description**

During GPRA Year 2017, achieve the target rate of 63.1% for the proportion of patients with diagnosed diabetes who receive an annual retinal examination.

#### Denominators

*User Population patients* diagnosed with diabetes prior to the Report Period, without a documented history of bilateral blindness.

*Active Diabetic patients*, defined as Active Clinical patients diagnosed with diabetes prior to the Report Period, and at least two visits during the Report Period, and two DM-related visits ever, without a documented history of bilateral blindness. (GPRA Denominator)

Active Adult Diabetic patients, defined by meeting the following criteria: (1) who are 19 and older at the beginning of the Report Period, (2) whose first ever DM diagnosis occurred prior to the Report Period; (3) who had at least two DM related visits ever, (4) at least one encounter with DM POV in a primary clinic with a primary provider during the Report Period; and (5) never have had a creatinine value greater than (>) 5, without a documented history of bilateral blindness.

## Numerators

Patients receiving a qualified retinal evaluation during the Report Period.

Note: This numerator does not include refusals. (GPRA Numerator)

- a. Patients receiving diabetic retinal exam during the Report Period
- b. Patients receiving other eye exams during the Report Period
- c. Patients with a JVN visit during the Report Period.
- d. Patients with an Ophthalmology visit during the Report Period.
- e. Patients with an Optometry visit during the Report Period.

## **Logic Description**

*Diabetes definition*: First DM Purpose of Visit ICD-9: 250.00 through 250.93 or ICD-10: E10.\* through E13.\* recorded in the V POV file prior to the Report Period.

*Serum creatinine definition (used with Active Adult Diabetic* denominator): Sitepopulated taxonomy DM AUDIT CREATININE TAX; or LOINC taxonomy (NOTE: CPT codes are not included since they do not store the result, which is used in this topic.).

*Qualified retinal evaluation definition:* (1) Diabetic retinal exam or (2) other eye exam, as shown below. The following methods are qualifying for this measure:

- Dilated retinal evaluation by an optometrist or ophthalmologist
- Seven standard fields stereoscopic photos (ETDRS) evaluated by an optometrist or ophthalmologist
- Any photographic method validated to seven standard fields (ETDRS).

CRS searches in the following order for:

Diabetic Retinal Exam (any of the following during the report period)
---

Exam	CPT Codes	Other Codes
Diabetic Retinal Exam	2022F, 2024F, 2026F, S0620, S0621, S3000	<b>Exam:</b> 03 (dilated retinal examination or formally validated* photographic equivalent)

## Other Eye Exam (any of the following during the report period)

Exam	CPT Codes	Other Codes
Non-DNKA visit to an optometrist or ophthalmologist	67028, 67038 (old code), 67039, 67040, 92002, 92004, 92012, 92014	
Non-Did Not Keep Appointment (DNKA) visit to formally validated* tele-ophthalmology retinal evaluation clinics		<b>Clinic codes:</b> A2 (Diabetic Retinopathy)**
Non-Did Not Keep Appointment (DNKA) visit to ophthalmology or optometry clinics with an optometrist or ophthalmologist where the Service Category is not C (Chart Review) or T (Telecommunications)		Clinic codes: 17 or 18 <i>with</i> Provider Codes: 08, 24, or 79

\*Validation study properly powered and controlled against the ETDRS gold standard.

\*\*Validated photographic (teleophthalmology) retinal surveillance.

JVN visit (a	any of the	following	during the	report period	I)
--------------	------------	-----------	------------	---------------	----

Subject Defined	Other Codes
JVN	Clinic code: A2

Subject Defined	Other Codes
Ophthalmology	Clinic code: 17 with
	Provider Code: 79
	where the Service Category is not C (Chart Review) or T (Telecommunications)

## 2.2.8 Diabetes: Access to Dental Services

#### Denominator

Active Diabetic patients, defined as Active Clinical patients diagnosed with diabetes prior to the Report Period, and at least two visits during the Report Period, and two DM-related visits ever.

#### Numerators

Patients with documented dental visit during the Report Period.

**Note**: This numerator does *not* include refusals.

## Logic Description

*Diabetes definition:* First DM Purpose of Visit ICD-9: 250.00 through 250.93 or ICD-10: E10.\* through E13.\* recorded in the V POV file prior to the Report Period.

*Dental visit definition:* For non-PRC dental visits, searches for Dental ADA codes 0000, 0190, or 0191; CPT codes D0190 or D0191; Exam 30; or POV ICD-9: V72.2; ICD-10: Z01.20, Z01.21. For PRC dental visits, searches for any visit with an ADA code. PRC visit defined as Type code of C in Visit file.

## Key Logic Changes from CRS Version 17.0

None.

## **Patient List Description**

List of diabetic patients with documented dental visit, if any.

#### **Measure Source**

HP 2020 D-8

Past Performance	Percent
IHS FY 2005 Performance	39.0%
IHS FY 2004 Performance	37.0%
IHS FY 2003 Performance	36.0%
IHS FY 2002 Performance	36.0%
HP 2020 Goal	61.2%

#### Measure Past Performance and Long-Term Targets

#### Performance Improvement Tip

If your facility's dental services are paid for with PRC funds, ensure the final payment for each purchase order is posted and the PRC to PCC link is set to the "on" position. Having the PRC to PCC link on will enable the PRC data to be passed from PRC/MIS to PCC, where CRS can find it and include it in your CRS reporting.

# 2.3 Dental Measure Topics

## 2.3.1 Access to Dental Services

## **GPRA Measure Description**

During GPRA Year 2017, achieve the target rate of 29.7% for the proportion of patients who receive dental services.

## Denominators

*User Population* patients. Broken down by age groups (0 through 2, 3 through 5, 0 through 5, 6 through 9, 10 through 12, 13 through 15, 16 through 21, 22 through 34, 35 through 44, 45 through 54, 55 through 74, 75 and older). (GPRA Denominator)

## Numerators

Patients with documented dental visit during the Report Period.

Note: This numerator does *not* include refusals. (GPRA Numerator)

## Logic Description

*Dental visit definition:* For non-PRC dental visits, searches for Dental ADA codes 0000, 0190, or 0191; CPT codes D0190 or D0191; Exam 30; or POV ICD-9: V72.2; ICD-10: Z01.20, Z01.21. For PRC dental visits, searches for any visit with an ADA code. PRC visit defined as Type code of C in Visit file.

## Key Logic Changes from CRS Version 17.0

1. Added age breakdowns: 0 through 2, 3 through 5, 6 through 9, 10 through 12, 13 through 15, 16 through 21 and removed 6 through 21.

## Patient List Description

List of patients with documented dental visit and date.

## 2.3.2 Dental Sealants

## **GPRA Measure Description**

During GPRA Year 2017, achieve the target rate of 16.6% for the proportion of patients with at least one or more intact dental sealants.

#### Denominator

User Population patients ages 2 through 15. Broken down by age groups (2, 3 through 5, 6 through 9, 10 through 12, and 13 through 15) (GPRA Denominator)

#### Numerators

Patients with at least one or more intact dental sealants (GPRA Numerator)

Count only: For patients meeting the *User Population* definition, the total number of dental sealants during the report period.

Note: This numerator does not include refusals.

- a. Dental sealants in patients 2 through 15 years.
- b. Dental sealants in patients greater than (>) 15 yrs.

Age breakouts are based on Healthy People 2020 age groups for dental sealants.

## Logic Description

Age of the patient is calculated at the beginning of the report period.

*Sealants definition:* Dental ADA Code 1351, 1352, 1353 or CPT Code D1351, D1352, D1353 documented during the Report Period or Dental ADA code 0007 documented during the past 3 years from the end of the Report Period, as long as the 007 code is not documented on the same visits as 1351, 1352, 1353, D1351, D1352, or D1353. If both ADA and CPT codes are found on the same visit, only the ADA will be counted.

For the count measure, only two sealants per tooth and only one repair (ADA code 1353 or CPT D1353) per tooth will be counted during the Report Period. Each tooth is identified by the data element Operative Site in RPMS.

## Key Logic Changes from CRS Version 17.0

1. Added age breakdown of age 2 and removed 2 through 5 and 5 through 19.

## **Patient List Description**

List of patients with intact dental sealants.

#### Measure Source

HP 2020 OH-2

## Measure Past Performance and Long-Term Targets:

Performance	Percent
IHS FY 2016 Performance	18.1%

## 2.3.3 Topical Fluoride

## **GPRA Measure Description**

During GPRA Year 2017, achieve the target rate of 29.9% for the proportion of patients who received one or more topical fluoride applications.

#### Denominator

User Population patients ages 1 through 15. Broken down by age groups (1 through 2, 3 through 5, 1 through 5, 6 through 9, 10 through 12, and 13 through 15). (GPRA Denominator)

#### Numerators

Patients who received one or more topical fluoride applications during the report period (GPRA Numerator).

Count only: For patients meeting the *User Population* definition, the total number of patients with at least one topical fluoride treatment during the Report Period.

**Note:** This numerator does *not* include refusals. (GPRA Numerator)

a. Topical fluoride treatment in patients 1 through 15 yrs.

Count only: For patients meeting the *User Population* definition, the total number of appropriate topical fluoride applications based on a maximum of four per patient per year.

#### Logic Description

Age of the patient is calculated at the beginning of the Report Period.

*Topical fluoride application definition:* (1) Dental ADA Codes 1201 (old code), 1203 (old code), 1204 (old code), 1205 (old code), 1206, 1208 or 5986; (2) CPT Codes D1201 (old code), D1203 (old code), D1204 (old code), D1205 (old code), D1206, D1208, D5986, or 99188; 3) POV ICD-9: V07.31; ICD-10: Z29.3.

For the count measure, a maximum of one application per patient per visit is allowed. A maximum of four topical fluoride applications are allowed per patient per year for the applications measure.

## Key Logic Changes from CRS Version 17.0

- 1. Added ICD-10 code Z29.3 to Topical Fluoride definition.
- 2. Added age breakdowns: 1 through 2, 3 through 5, 1 through 5, 6 through 9, 10 through 12, 13 through 15.

## Patient List Description

List of patients who received at least one topical fluoride application during Report Period.

## Measure Source

Not Available

## Measure Past Performance and Long-Term Targets:

Performance	Percent
IHS FY 2016 Performance	31.1%
IHS FY 2015 Performance	29.4%
IHS FY 2014 Performance	27.9%
IHS FY 2013 Performance	26.7%

Performance	Number of Patients
IHS FY 2012 Performance	169,083
IHS FY 2011 Performance	161,461
IHS FY 2010 Performance	145,181
IHS FY 2009 Performance	136,794
IHS FY 2008 Performance	120,754
IHS FY 2007 Performance	107,934
IHS FY 2006 Performance	95,439
IHS FY 2005 Performance	85,318
IHS FY 2005 Performance	113,324

For the IHS FY 2005 Performance, Number of Patients (113,324) is the number of applications.

## Performance Improvement Tip

If your facility's dental visits are paid for with PRC funds, ensure the final payment for each purchase order is posted and the PRC to PCC link is set to the "on" position. Having the PRC to PCC link on will enable the PRC data to be passed from PRC/MIS to PCC, where CRS can find it and include it in your CRS reporting.

# 2.4 Immunization Measure Topics

## 2.4.1 Influenza

#### **GPRA Measure Description**

Children: During GPRA Year 2017, achieve the target rate of 37.1% for the proportion of patients age 6 months to 17 years who receive an influenza immunization.

Adults: During GPRA Year 2017, achieve the target rate of 38.7% for the proportion of patients age 18 years and older who receive an influenza immunization.

## Denominators

Active Clinical patients. Broken down by age groups.

- a. *Active Clinical patients* ages 6 months through 17 years. (GPRA Denominator)
- b. Active Clinical patients ages 18 and older. (GPRA Denominator)
- c. Active Clinical patients ages 18 through 49.
- d. *Active Clinical patients* ages 18 through 49 and considered high risk for influenza.
- e. Active Clinical patients ages 50 through 64.
- f. Active Clinical patients ages 65 and older.

Active Diabetic patients, defined as Active Clinical patients diagnosed with diabetes prior to the Report Period, and at least two visits during the Report Period, and two DM-related visits ever.

User Population patients. Broken down by age groups.

- a. User Population patients ages 6 months through 17 years.
- b. User Population patients ages 18 and older.
- c. User Population patients ages 18 through 49.
- d. *User Population patients* ages 18 through 49 and considered high risk for influenza.

- e. User Population patients ages 50 through 64.
- f. User Population patients ages 65 and older.

#### Numerators

Patients with influenza vaccine documented during the report period or with a contraindication documented at any time before the end of the report period.

**Note:** The only refusals included in this numerator are not medically indicated (NMI) refusals. (GPRA Numerator)

a. Patients with a contraindication or a documented NMI refusal.

#### **Logic Description**

Age of the patient is calculated at the beginning of the report period.

*Diabetes:* First DM POV ICD-9: 250.00 through 250.93 or ICD-10: E10.\* through E13.\* recorded in the V POV file prior to the Report period.

*Influenza definition:* Any of the following documented during the Report Period unless otherwise noted.

1. **Influenza immunization:** Any of the codes in the table below.

Immunization	CPT Codes	ICD and Other Codes
Influenza vaccine	90630, 90654-90662, 90672-90674, 90685- 90688, 90724 (old code), G0008, G8108 (old code)	Immunization (CVX) Codes: 15, 16, 88, 111, 135, 140, 141, 144, 149, 150, 151, 153, 155, 158, 166, 171 POV: ICD-9: V04.8 (old code), V04.81 NOT documented with 90663, 90664, 90666-90668, 90470, G9141 or G9142, V06.6 NOT documented with 90663, 90664, 90666-90668, 90470, G9141 or G9142

- 2. **Contraindication:** Any of the following documented at any time before the end of the Report Period, defined as: (A) Contraindication in the Immunization Package of "Egg Allergy" or "Anaphylaxis" or (B) PCC NMI Refusal.
- 3. **High Risk for Influenza:** Persons considered high risk for influenza are defined as those who have two or more visits in the past 3 years with a POV or Problem diagnosis of any of the following:

High Risk Category	ICD-9 Codes	ICD-10 Codes	
HIV Infection	042, 042.0 through 044.9 (old codes), 079.53, V08	B20, B52.0, B97.35, Z21	
Diabetes	250.00 through 250.93	E08.2*, E09.2*, E10.* through E13.*	
Rheumatic Heart Disease	393. through 398.99	105.* through 109.*	
Hypertensive Heart Disease	402.00 through 402.91	111.*	
Hypertensive Heart/Renal Disease	404.00 through 404.93	113.*	
Ischemic Heart Disease	410.00 through 414.9	120.0 through 122.8, 124.0 through 125.83, 125.89, 125.9	
Pulmonary Heart Disease	415.0 through 416.9	126.* through 127.*

HP 2020 Goal (age 65+)	90.0%

# **Performance Improvement Tips**

- Providers should ask about and record off-site historical immunizations (IZ type, date received and location) on PCC forms. Data entry mnemonic: HIM
- Providers should document refusals; write "Refused" in Influenza Order box on PCC form. Data entry mnemonic: REF (Immunization, Value, Date Refused).

# 2.4.2 Adult Immunizations

#### **GPRA Measure Description**

During GPRA Year 2017, achieve the target rate of 86.7% for the proportion of adult patients age 65 years and older who receive a pneumococcal immunization.

#### Denominators

Active Clinical patients ages 19 through 59.

Active Clinical patients ages 60 through 64.

Active Clinical patients ages 65 and older. (GPRA Denominator)

Active Clinical patients ages 18 through 64 and considered high risk for pneumococcal.

Active Diabetic patients, defined as Active Clinical patients diagnosed with diabetes prior to the Report Period, and at least two visits during the Report Period, and two DM-related visits ever.

Active Clinical patients ages 18 and older. Broken down by age group: 18 through 64.

User Population patients 19 through 59.

User Population patients 60 through 64.

User Population patients ages 65 and older.

*User Population patients* ages 18 through 64 and considered high risk for pneumococcal.

*User Population patients* ages 18 and older. Broken down by age group: 18 through 64.

#### Numerators

Patients who have received 1 dose of Tdap/Td in the past 10 years, including contraindications.

**Note:** The only refusals included in this numerator are NMI refusals.

a. Patients with a contraindication or a documented NMI refusal.

Patients who have received 1 dose of Tdap ever, including contraindications.

**Note**: The only refusals included in this numerator are NMI refusals.

a. Patients with a contraindication or a documented NMI refusal.

Patients with influenza vaccine documented during the Report Period or with a contraindication documented at any time before the end of the Report Period.

**Note:** The only refusals included in this numerator are NMI refusals.

a. Patients with a contraindication or a documented NMI refusal.

Patients who have received 1 dose of Zoster ever, including contraindications.

**Note:** The only refusals included in this numerator are NMI refusals.

a. Patients with a contraindication or a documented NMI refusal.

Patients with Pneumococcal vaccine or contraindication documented ever and, if patient is older than 65 years, either a dose of pneumococcal vaccine after the age of 65 or a dose of pneumococcal vaccine in the past 5 years. (GPRA Numerator)

**Note:** The only refusals included in this numerator are NMI refusals.

a. Patients with a contraindication or a documented NMI refusal.

Patients who have received the 1:1:1 combination (i.e., 1 Tdap/Td in the past 10 years, 1 Tdap ever, 1 influenza during the Report Period), including contraindications.

**Note:** The only refusals included in this numerator are NMI refusals.

a. Patients with a contraindication or a documented NMI refusal.

Patients who have received the 1:1 combination (i.e., 1 Tdap/Td in the past 10 years, 1 Tdap ever), including contraindications.

**Note:** The only refusals included in this numerator are NMI refusals.

a. Patients with a contraindication or a documented NMI refusal.

Patients who have received the 1:1:1:1 combination (i.e., 1 Tdap/Td in the past 10 years, 1 Tdap ever, 1 influenza during the Report Period, 1 Zoster ever), including contraindications.

**Note:** The only refusals included in this numerator are NMI refusals.

a. Patients with a contraindication or a documented NMI refusal.

Patients who have received the 1:1:1 combination (i.e., 1 Tdap/Td in the past 10 years, 1 Tdap ever, 1 Zoster ever), including contraindications.

**Note:** The only refusals included in this numerator are NMI refusals.

a. Patients with a contraindication or a documented NMI refusal.

Patients who have received the 1:1:1:1:1 combination (i.e., 1 Tdap/Td in the past 10 years, 1 Tdap ever, 1 influenza during the Report Period, 1 Zoster ever, 1 up-to-date pneumococcal vaccine), including contraindications.

**Note:** The only refusals included in this numerator are NMI refusals.

a. Patients with a contraindication or a documented NMI refusal.

Patients who have received the 1:1:1:1 combination (i.e., 1 Tdap/Td in the past 10 years, 1 Tdap ever, 1 Zoster ever, 1 up-to-date pneumococcal vaccine), including contraindications.

**Note:** The only refusals included in this numerator are NMI refusals.

a. Patients with a contraindication or a documented NMI refusal.

Patients with Pneumococcal vaccine or contraindication documented at any time before the end of the Report Period.

**Note:** The only refusals included in this numerator are NMI refusals.

# Logic Description

Age of the patient is calculated at the beginning of the Report period.

*Diabetes definition:* First DM POV ICD-9: 250.00 through 250.93 or ICD-10: E10.\* through E13.\* recorded in the V POV file prior to the Report period.

*Pneumococcal Immunization definition:* Any of the following documented any time before the end of the Report Period unless otherwise noted.

1. **Pneumoccocal immunization:** Any of the codes in the table below.

Immunization	CPT Codes	ICD and Other Codes
	, , , ,	Immunization (CVX) Codes:
Vaccine		33, 100, 109, 133, 152 <b>POV:</b> ICD-9: V06.6; V03.82

- 2. **Pneumoccocal Contraindication:** (A) Contraindication in the Immunization Package of "Anaphylaxis" or (B) PCC NMI Refusal.
- 3. **High Risk for Pneumococcal:** Persons considered high risk for pneumococcal are defined as those who have two or more visits in the past 3 years with a POV or Problem diagnosis of any of the following:

High Risk Category	ICD-9 Codes	ICD-10 Codes	
HIV Infection	042, 042.0 through 044.9 (old codes), 079.53, V08	B20, B52.0, B97.35, Z21	
Diabetes	250.00 through 250.93	E08.2*, E09.2*, E10.* through E13.*	
Chronic alcoholism	303.90, 303.91	F10.20, F10.220 through F10.29	
Congestive Heart Failure	428.0 through 428.9, 429.2	I50.1, I50.20, I50.22 through I50.30, I50.32 through I50.40, I50.42 through I50.9	
Emphysema	492.0 through 492.8	J43.*	
Asthma	493.00 through 493.91	J45.21 through J45.902	
Bronchiectasis, CLD, COPD	494.0 through 496.	J44.*, J47.*	
Pneumoconioses	500 through 505	J60 through J64, J66.8 through J67.6, J67.8 through J67.9	
Chronic Liver Disease	571.0 through 571.9	K70.11 through K70.41, K73.0 through K74.5, K74.69, K75.81	
Nephrotic Syndrome	581.0 through 581.9	N02.*, N04.*, N08	
Renal Failure	585.6, 585.9	N18.6 through N19	
Injury to spleen	865.00 through 865.19		
Transplant	996.80 through 996.89	T86.00 through T86.819, T86.83*, T86.850 through T86.899, Z48.21 through Z48.280, Z48.290, Z94.0 through Z94.4, Z94.6, Z94.81 through Z94.84, Z95.3, Z95.4	
Kidney Transplant	V42.0 through V42.89		
Chemotherapy	V58.1	Z51.11, Z51.12	
Chemotherapy follow-up	V67.2	Z08	

*Tdap/Td Immunization definition:* Any of the following documented during the applicable time frame.

1. **Tdap/Td immunization:** Any of the codes in the table below.

Immunization	CPT Codes	ICD and Other Codes
Tdap Vaccine	90715	Immunization (CVX) Codes: 115
Td Vaccine	90714, 90718	Immunization (CVX) Codes:
		9, 113, 138, 139
		<b>POV:</b> ICD-9: V06.5

2. **Tdap/Td Contraindication:** (A) Contraindication in the Immunization Package of "Anaphylaxis" or (B) PCC NMI Refusal.

*Influenza definition:* Any of the following documented during the Report Period unless otherwise noted.

1. Influenza immunization: Any of the codes in the table below.

Immunization	CPT Codes	ICD and Other Codes
Influenza vaccine	90630, 90654-90662, 90672-90674, 90685- 90688, 90724 (old code), G0008, G8108 (old code)	Immunization (CVX) Codes: 15, 16, 88, 111, 135, 140, 141, 144, 149, 150, 151, 153, 155, 158, 166, 171 POV: ICD-9: V04.8 (old code), V04.81 NOT documented with 90663, 90664, 90666-90668, 90470, G9141 or G9142, V06.6 NOT documented with 90663, 90664, 90666-90668, 90470, G9141 or G9142

2. **Contraindication:** Any of the following documented at any time before the end of the Report Period, defined as: (A) Contraindication in the Immunization Package of "Egg Allergy" or "Anaphylaxis" or (B) PCC NMI Refusal.

*Zoster definition:* Any of the following documented any time before the end of the Report Period unless otherwise noted.

1. **Zoster immunization:** Any of the codes in the table below.

Immunization	CPT Codes	ICD and Other Codes
Zoster Vaccine	90736	Immunization (CVX) Codes: 121

2. **Zoster Contraindication:** (A) Contraindication in the Immunization Package of "Immune Deficiency" or "Anaphylaxis" or (B) PCC NMI Refusal.

# Key Logic Changes from CRS Version 17.0

1. Added CVX code 171 and CPT code 90674 to Influenza definition.

#### Measure Past Performance and Long-Term Targets

#### Performance Improvement Tips

- Providers should ask about and record off-site historical immunizations (IZ type, date received and location) on PCC forms. Data entry mnemonic: HIM
- Providers should document refusals; write "Refused" in Pneumo Vax Order box on PCC form. Data entry mnemonic: REF (Immunization, Value, Date Refused).

# 2.4.3 Childhood Immunizations

#### **GPRAMA Measure Description**

During GPRA Year 2017, achieve the target rate of 74.8% for the proportion of American Indian/Alaska Native children ages 19 through 35 months who have received the recommended immunizations.

#### **Denominators**

Active Clinical patients ages 19 through 35 months at end of Report Period.

User Population patients ages 19 through 35 months at end of Report Period.

*User Population patients active in the Immunization Package* who are 19 through 35 months at end of Report Period. (GPRAMA Denominator)

**Note:** Only values for the Current Period will be reported for this denominator since currently there is not a way to determine if a patient was active in the Immunization Package during the Previous Year or Baseline Periods.

#### Numerators

Patients who have received the 4:3:1:3\*:3:1:4 combination (i.e., 4 DTaP, 3 Polio, 1 MMR, 3 or 4 HiB, 3 Hepatitis B, 1 Varicella, and 4 Pneumococcal), including contraindications and evidence of disease.

**Note:** The only refusals included in this numerator are NMI refusals. (GPRAMA Numerator)

Patients who have received 4 doses of DTaP ever, including contraindications.

**Note:** The only refusals included in this numerator are NMI refusals.

Patients who have received 3 doses of Polio ever, including contraindications and evidence of disease.

**Note:** The only refusals included in this numerator are NMI refusals.

Patients who have received 1 dose of MMR ever, including contraindications and evidence of disease.

**Note:** The only refusals included in this numerator are NMI refusals.

Patients who have received 3 or 4 doses of HiB ever, including contraindications.

**Note:** The only refusals included in this numerator are NMI refusals.

Patients who have received 3 doses of Hepatitis B vaccine ever, including contraindications and evidence of disease.

**Note:** The only refusals included in this numerator are NMI refusals.

Patients who have received 1 dose of Varicella ever, including contraindications and evidence of disease.

**Note:** The only refusals included in this numerator are NMI refusals.

Patients who have received 4 doses of Pneumococcal conjugate vaccine ever, including contraindications.

**Note:** The only refusals included in this numerator are NMI refusals.

Patients who have received 1 dose of Hepatitis A vaccine ever, including contraindications and evidence of disease.

**Note:** The only refusals included in this numerator are NMI refusals.

Patients who have received 2 or 3 doses of Rotavirus vaccine ever, including contraindications.

**Note:** The only refusals included in this numerator are NMI refusals.

Patients who have received 2 doses of Influenza vaccine ever, including contraindications.

**Note:** The only refusals included in this numerator are NMI refusals.

For each of the above numerators, the following sub-numerators are included:

a. Patients with either (1) evidence of the disease, (2) a contraindication, or (3) a documented NMI refusal

# Logic Description

*Age definition:* Age of the patient is calculated at the beginning of the Report Period. Therefore the age range will be adjusted to 7 through 23 months, which makes the patient between the ages of 19 through 35 months at the end of the Report Period. Because IZ data comes from multiple sources, any IZ codes documented on dates within 10 days of each other will be considered as the same immunization.

Active Immunization Package Patients denominator definition: Same as User Pop definition except includes only patients flagged as active in the Immunization Package.

**Note:** Only values for the Current Period will be reported for this denominator since currently there is not a way to determine if a patient was active in the Immunization Package during the Previous Year or Baseline Periods.

Dosage and types of immunization definitions:

- 4 doses of DTaP: (1) 4 DTaP/DTP/Tdap; (2) 1 DTaP/DTP/Tdap and 3 DT/td; (3) 1 DTaP/DTP/Tdap and 3 each of Diphtheria and Tetanus; (4) 4 DT and 4 Acellular Pertussis; (5) 4 Td and 4 Acellular Pertussis; or (6) 4 each of Diphtheria, Tetanus, and Acellular Pertussis.
- 3 doses of Polio: (1) v OPV; (2) 3 IPV; or (3) combination of OPV and IPV totaling 3 doses.
- One dose of MMR: (1) MMR; (2) 1 M/R and 1 Mumps; (3) 1 R/M and 1 Measles; or (4) 1 each of Measles, Mumps, and Rubella.
- 3 doses of Hep B
- 3 or 4 doses of HIB, depending on the vaccine administered
- 1 dose of Varicella
- 4 doses of Pneumococcal
- 1 dose of Hepatitis A
- 2 or 3 doses of Rotavirus, depending on the vaccine administered
- 2 doses of Influenza

NMI refusals, evidence of disease, and contraindications for individual immunizations will also count toward meeting the definition, as defined below.

**Note:** NMI refusals are not counted as refusals; rather, they are counted as contraindications.

- For immunizations that allow a different number of doses (e.g. 2 or 3 Rotavirus): To count toward the numerator with the smaller number of doses, all of the patient's vaccinations must be part of the smaller dose series. For example, for a patient to count toward the Rotavirus numerator with only 2 doses, all 2 doses must be included in the 2-dose series codes listed in the Rotavirus definition. A patient with a mix of 2-dose and 3-dose series codes will need 3 doses to count toward the numerator. An exception to this is for the HIB vaccine: if the first 2 doses are part of the 3-dose series, then the patient only needs 3 doses (even if the third dose is included in the 4-dose series).
- Each immunization must be refused and documented separately. For example, if a patient has an NMI refusal for Rubella only, then there must be an immunization, contraindication, or separate NMI refusal for the Measles and Mumps immunizations.
- For immunizations where required number of doses is greater than (>) 1, only one NMI refusal is necessary to be counted in the numerator. For example, if there is a single NMI refusal for Hepatitis B, the patient will be included in the numerator.
- For immunizations where required number of doses is greater than (>)1, only one contraindication is necessary to be counted in the numerator. For example, if there is a single contraindication for HiB, the patient will be included in the numerator.
- Evidence of disease will be checked for at any time in the child's life (prior to the end of the Report Period.)
- To be counted in sub-numerator A, a patient must meet the numerator definition *and* have a REF refusal in PCC or a Parent or Patient Refusal in the IZ program for any of the immunizations in the numerator. For example, if a patient refused Rubella only but had immunizations for Measles and Mumps, the patient would be included in sub-numerator A.

NMI refusals are defined as PCC Refusal type NMI for any of the following IZ codes:

Immunization	Immunization Codes for Refusals	CPT Codes for Refusals
DTaP	20, 50, 102, 106, 107, 110, 120, 130, 132, 146	90696-90698, 90700, 90721, 90723

Rotavirus – 3- dose series	90680	Immunization (CVX) Codes: 74, 116, 122 POV: ICD-9: V05.8 Contraindications: Immunization Package contraindication of "Anaphylaxis" or "Immune Deficiency"
Influenza	90630, 90654- 90658, 90659 (old code), 90660- 90662, 90672- 90674, 90685- 90688, 90724 (old code), G0008, G8108 (old code)	Immunization (CVX) Codes: 15, 16, 88, 111, 135, 140, 141, 144, 149, 150, 151, 153, 155, 158, 166, 171 POV: ICD-9: V04.8 (old code), V04.81, V06.6 Contraindications: Immunization Package contraindication of "Egg Allergy" or "Anaphylaxis"

# Key Logic Changes from CRS Version 17.0

- 1. Added CVX code 171 and CPT code 90674 to Influenza definition.
- 2. Added CPT code 90739 to Hep B definition.
- 3. Added CPT code 90697 to DTaP, IPV, Hib, and Hep B definitions.

#### **Patient List Description**

List of patients 19 through 35 months with IZ, if any. If a patient did not have all doses in a multiple dose vaccine, the IZ will not be listed. For example, if a patient only had 2 DTaP, no IZ will be listed for DTaP.

Notes: Because age is calculated at the beginning of the Report Period, the patient's age on the list will be between 7 through 23 months.

The order of the display for the immunizations is: 4 Dtap/Dtp;3 IPV/OPV;MMR;3 or 4 HIB;3 HEP;Vari;4 PNEUMO. A blank value in the Numerator column means the patient didn't meet the requirements for any of the immunizations. Another example is "MMR; vari;4 PNEUMO," which means the patient did not have 4 Dtap/Dtp, 3 IPV/OPV, 3 or 4 HIB and 3 Hep B immunizations.

#### Measure Past Performance and Long-Term Targets

Performance	Percent
IHS FY 2016 GPRAMA Performance Active Immunization Package 4:3:1:3*:3:1:4 (rate for children age 19 through 35 months)	72.3%
IHS FY 2015 GPRAMA Performance Active Immunization Package 4:3:1:3*:3:1:4 (rate for children age 19 through 35 months)	73.3%
IHS FY 2014 GPRAMA Performance Active Immunization Package 4:3:1:3*:3:1:4 (rate for children age 19 through 35 months)	75.4%
IHS FY 2013 GPRA Performance Active Immunization Package 4:3:1:3*:3:1:4 (rate for children age 19 through 35 months)	74.8%

Performance	Percent
IHS FY 2012 GPRA Performance Active Immunization Package 4:3:1:3:3:1:4	76.8%
(rate for children age 19 through 35 months)	
IHS FY 2011 GPRA Performance Active Immunization Package 4:3:1:3:3:1:4	75.9%
(rate for children age 19 through 35 months)	
IHS FY 2010 GPRA Performance Active Immunization Package 4:3:1:3:3:1	79.0%
(rate for children age 19 through 35 months)	
IHS FY 2009 GPRA Performance Active Immunization Package 4:3:1:3:3	79.0%
(rate for children age 19 through 35 months)	
IHS FY 2008 GPRA Performance Active Immunization Package 4:3:1:3:3	78.0%
(rate for children age 19 through 35 months)	
IHS FY 2008 Non-GPRA Performance Active Clinical 4:3:1:3:3 (rate for children age 19 through 35 months)	68.0%
IHS FY 2007 GPRA Performance Active Immunization Package 4:3:1:3:3(rate for children age 19 through 35 months)	78.0%
IHS FY 2006 Performance (rate for children age 19 through 35 months)	80.0%
IHS FY 2005 Performance (rate for children age 19 through 35 months)	75.0%
IHS FY 2004 Performance(baseline rate for children age 19 through 35 months)	72.0%
IHS FY 2004 Performance(rate for children age 3 through 27 months)	81.0%
IHS FY 2003 Performance(rate for children age 3 through 27 months)	80.0%
IHS FY 2002 Performance(rate for children age 3 through 27 months)	80.0%
HP 2020 goal for % of children age 19 through 35 months with 4:3:1:3:3:4 vaccines	80.0%
HP 2020 goal for % of children age 19 through 35 months with each individual vaccine	90.0%

For the IHS FY 2006 Performance (rate for children 19 through 35 months), the Percent (80.0) please consider: All 2002 through 2006 rates reported on this table were reported by the Immunization Program from the quarterly immunization reports. Effective in 2007, CRS reports the rate and not the Immunization Program. The CRS rate is reported using the CRS Active Immunization Package denominator.

# **Performance Improvement Tips**

• Providers should ask about and record off-site historical immunizations (IZ type, date received and location) on PCC forms. Data entry mnemonic: HIM

• Providers should document refusals; write "Refused" in appropriate vaccine order box on PCC form. Data entry mnemonic: REF (Immunization, Value, Date Refused).

Figure 2-30: Sample Patient List, Childhood Immunizations

#### 2.4.4 Adolescent Immunizations

#### Denominators

Active Clinical patients age 13. Broken down by gender where noted.

Active Clinical patients ages 13 through 17. Broken down by gender where noted.

#### Numerators

Patients who have received the 1:1:3 combination (i.e., 1 Td/Tdap, 1 meningococcal, 3 HPV), including contraindications.

Notes: The only refusals included in this numerator are NMI refusals.

This numerator is broken down by gender.

Patient who have received the 1:1 combination (i.e., 1 Td/Tdap, 1 meningococcal), including contraindications.

**Note:** The only refusals included in this numerator are NMI refusals.

Patients who have received 1 dose of Tdap/Td ever, including contraindications.

- a. Patients with a contraindication or a documented NMI refusal.
- b. Patients who have received 1 dose of Tdap ever, including contraindications.

**Note:** The only refusals included in this numerator are NMI refusals.

Patients who have received 1 dose of meningococcal ever, including contraindications.

**Note:** The only refusals included in this numerator are NMI refusals.

Patients who have received 3 doses of HPV ever, including contraindications.

Notes: The only refusals included in this numerator are NMI refusals.

This numerator is broken down by gender.

For each of the above numerators, the following sub-numerators are included:

a. Patients with a contraindication or a documented NMI refusal.

#### Logic Description

*Age definition:* Age of the patient is calculated at the beginning of the Report Period. Because IZ data comes from multiple sources, any IZ codes documented on dates within ten days of each other will be considered as the same immunization.

Dosage and types of immunization definitions:

• 1 dose of Td or Tdap

- 1 dose of Meningococcal
- 3 doses of HPV

Not Medically Indicated (NMI) refusals and contraindications for individual immunizations will also count toward meeting the definition, as defined below.

**Note:** NMI refusals are not counted as refusals; rather, they are counted as contraindications.

- For immunizations where required number of doses is greater than (>) 1, only one NMI refusal is necessary to be counted in the numerator. For example, if there is a single NMI refusal for HPV, the patient will be included in the numerator.
- For immunizations where required number of doses is greater than (>) 1, only one contraindication is necessary to be counted in the numerator. For example, if there is a single contraindication for HPV, the patient will be included in the numerator.

Immunization	CPT Codes	ICD and Other Codes
Tdap	90715	Immunization code: 115
		NMI Refusals: Immunization code 115
		<b>Contraindications</b> : Immunization Package contraindication of "Anaphylaxis."
Td	90714, 90718	Immunization codes: 9, 113, 138, 139
		<b>POV:</b> ICD-9: V06.5
		NMI Refusals: Immunization codes 9, 113, 138, 139
		<b>Contraindications</b> : Immunization Package contraindication of "Anaphylaxis."
Meningococcal	90733, 90734	Immunization codes: 32, 108, 114, 136, 147
		NMI Refusals: Immunization codes 32, 108, 114, 136, 147
		<b>Contraindications</b> : Immunization Package contraindication of "Anaphylaxis."
HPV	90649, 90650,	Immunization codes: 62, 118, 137, 165
	90651	NMI Refusals: Immunization codes 62, 118, 137, 165
		<b>Contraindications</b> : Immunization Package contraindication of "Anaphylaxis."

Adolescent immunizations are defined in the following ways:

# Key Logic Changes from CRS Version 17.0

None.

#### Patient List Description

List of patients 13 through 17 with IZ, if any. If a patient did not have all doses in a multiple dose vaccine, the IZ will not be listed. For example, if a patient only had 2 HPV, no IZ will be listed for HPV.

**Note:** An absent value in the Numerator column means the patient did not meet the requirements for any of the immunizations. An example for a female patient age 13 with a value of ";3 HPV" which means the patient did not have 1 Td/Tdap and 1 Meningococcal immunizations.

#### Measure Source

HEDIS, HP 2020 IID-11

#### Measure Past Performance and Long-Term Targets:

Target	Percent
HP 2020 goal for each individual IZ: Tdap, Meningococcal, HPV	80.0%
HP 2020 goal for each individual IZ: varicella	90.0%

#### **Performance Improvement Tips**

CRS Clinical Performance Measure Logic Manual for FY 2017 Clinical Measures June 2017

# 2.5 Childhood Diseases Group

# 2.5.1 Appropriate Treatment for Children with Upper Respiratory Infection

# Denominators

Active Clinical patients ages 3 months through 18 years of age who were diagnosed with an *upper respiratory infection* during the period 6 months (182 days) prior to the Report Period through the first 6 months of the Report Period.

*User Population patients* ages 3 months through 18 years of age who were diagnosed with an *upper respiratory infection* during the period 6 months (182 days) prior to the Report Period through the first 6 months of the Report Period.

# Numerator

Patients who were *not* prescribed an antibiotic on or within 3 days after diagnosis. In this measure, appropriate treatment is *not* to receive an antibiotic.

# Logic Description

Age is calculated as follows: Children 3 months as of 6 months (182 days) of the year prior to the Report Period to 18 years as of the first 6 months of the Report Period.

In order to be included in the denominator, *all* of the following conditions must be met:

- 1. Patient's diagnosis of an upper respiratory infection (URI) must have occurred at an outpatient visit. Upper Respiratory Infection defined as POV ICD-9: 460 or 465.\*; ICD-10: J00. Outpatient visit defined as Service Category A, S, or O.
- 2. If outpatient visit was to Clinic Code 30 (Emergency Medicine), it must not have resulted in a hospitalization, defined as Service Category H, either on the same day or the next day with URI diagnosis.
- 3. Patient's visit must only have a diagnosis of URI. If any other diagnosis exists, the visit will be excluded.
- 4. The patient did not have a new or refill prescription for antibiotics within 30 days prior to the URI visit date.
- 5. The patient did not have an active prescription for antibiotics as of the URI visit date. "Active" prescription defined as:

Rx Days Supply greater than or equal to (>=) (URI Visit Date–Prescription Date)

If multiple visits exist that meet the above criteria, the first visit will be used.

Antibiotic medications defined with medication taxonomy BGP HEDIS ANTIBIOTIC MEDS or Procedure ICD-9: 99.21; ICD-10: 3E00X29, 3E01329, 3E02329, 3E03029, 3E03329, 3E04029, 3E04329, 3E05029, 3E05329, 3E06029, 3E06329, 3E0E329, 3E0E729, 3E0E829, 3E0F329, 3E0F729, 3E0F829, 3E0G329, 3E0G729, 3E0G829, 3E0H329, 3E0H729, 3E0H829, 3E0J329, 3E0J729, 3E0J829, 3E0K329, 3E0K729, 3E0K829, 3E0L329, 3E0M329, 3E0N329, 3E0N729, 3E0N829, 3E0P329, 3E0P729, 3E0P829, 3E0Q329, 3E0R329, 3E0S329, 3E0U029, 3E0U329, 3E0V329, 3E0W329, 3E0Y329. Medications are: Aminopenicillins (Amoxicillin, Ampicillin), Beta-lactamase inhibitors (Amoxicillin-clavulanate), First generation cephalosporins (Cefadroxil, Cefazolin, Cephalexin), Folate antagonist (Trimethoprim), Lincomycin derivatives (Clindamycin), Macrolides (Azithromycin, Clarithromycin, Erythromycin Erythromycin ethylsuccinate, Erythromycin lactobionate, Erythromycin stearate), Miscellaneous antibiotics (Erythromycinsulfisoxazole), Natural penicillins (Penicillin G potassium, Penicillin G sodium, Penicillin V potassium), Penicillinase-resistant penicillins (Dicloxacillin), Quinolones (Ciprofloxacin, Levofloxacin, Moxifloxacin, Ofloxacin), Second generation cephalosporins (Cefaclor, Cefprozil, Cefuroxime), Sulfonamides (Sulfamethoxazoletrimethoprim), Tetracyclines (Doxycycline, Minocycline, Tetracycline), Third generation cephalosporins (Cefdinir, Cefixime, Cefpodoxime, Ceftibuten, Cefditoren, Ceftriaxone). Medications must not have a comment of RETURNED TO STOCK.

# Key Logic Changes from CRS Version 17.0

1. Updated BGP HEDIS ANTIBIOTIC MEDS taxonomy.

#### Patient List Description

List of patients 3 months to 18 years of age with upper respiratory infection, with antibiotic prescription, if any.

# 2.5.2 Appropriate Testing for Children with Pharyngitis Denominators

Active Clinical patients ages 3 through 18 years who were diagnosed with *pharyngitis* and prescribed an antibiotic during the period 6 months (182 days) prior to the Report Period through the first 6 months of the Report Period.

*User Population patients* ages 3 through 18 years who were diagnosed with *pharyngitis* and prescribed an antibiotic during the period 6 months (182 days) prior to the Report Period through the first 6 months of the Report Period.

#### Numerator

Patients who received a Group A strep test.

#### Logic Description

Age is calculated as follows: Children three years as of 6 months (182 days) of the year prior to the Report Period to 18 years as of the first 6 months of the Report Period.

In order to be included in the denominator, *all* of the following conditions must be met:

- 1. Patient's diagnosis of pharyngitis must have occurred at an outpatient visit. Pharyngitis defined as POV ICD-9: 462, 463, 034.0; ICD-10: J02.0, J03.\*. Outpatient visit defined as Service Category A, S, or O.
- 2. If outpatient visit was to Clinic Code 30 (Emergency Medicine), it must not have resulted in a hospitalization, defined as Service Category H, either on the same day or the next day with pharyngitis diagnosis.
- 3. Patient's visit must only have a diagnosis of pharyngitis. If any other diagnosis exists, the visit will be excluded.
- 4. The patient did not have a new or refill prescription for antibiotics within 30 days prior to the pharyngitis visit date.
- 5. The patient did not have an active prescription for antibiotics as of the pharyngitis visit date. "Active" prescription defined as:
- Rx Days Supply greater than or equal to (>= )(URI Visit Date Prescription Date)

7. The patient filled a prescription for antibiotics on or within 3 days after the pharyngitis visit.

If multiple visits exist that meet the above criteria, the first visit will be used.

Antibiotic medications defined with medication taxonomy BGP HEDIS ANTIBIOTIC MEDS or Procedure ICD-9: 99.21; ICD-10: 3E00X29, 3E01329, 3E02329, 3E03029, 3E03329, 3E04029, 3E04329, 3E05029, 3E05329, 3E06029, 3E06329, 3E0E329, 3E0E729, 3E0E829, 3E0F329, 3E0F729, 3E0F829, 3E0G329, 3E0G729, 3E0G829, 3E0H329, 3E0H729, 3E0H829, 3E0J329, 3E0J729, 3E0J829, 3E0K329, 3E0K729, 3E0K829, 3E0L329, 3E0M329, 3E0N329, 3E0N729, 3E0N829, 3E0P329, 3E0P729, 3E0P829, 3E0Q329, 3E0R329, 3E0S329, 3E0U029, 3E0U329, 3E0V329, 3E0W329, 3E0Y329. Medications are: Aminopenicillins (Amoxicillin, Ampicillin), Beta-lactamase inhibitors (Amoxicillin-clavulanate), First generation cephalosporins (Cefadroxil, Cefazolin, Cephalexin), Folate antagonist (Trimethoprim), Lincomycin derivatives (Clindamycin), Macrolides (Azithromycin, Clarithromycin, Erythromycin, Erythromycin ethylsuccinate, Erythromycin lactobionate, Erythromycin stearate), Miscellaneous antibiotics (Erythromycinsulfisoxazole), Natural penicillins (Penicillin G potassium, Penicillin G sodium, Penicillin V potassium), Penicillinase-resistant penicillins (Dicloxacillin), Quinolones (Ciprofloxacin, Levofloxacin, Moxifloxacin, Ofloxacin), Second generation cephalosporins (Cefaclor, Cefprozil, Cefuroxime), Sulfonamides (Sulfamethoxazoletrimethoprim), Tetracyclines (Doxycycline, Minocycline, Tetracycline), Third generation cephalosporins (Cefdinir, Cefixime, Cefpodoxime, Ceftibuten, Cefditoren, Ceftriaxone). Medications must not have a comment of RETURNED TO STOCK.

To be included in the numerator, a patient must have received a Group A Streptococcus test within the 7-day period beginning 3 days prior through 3 days after the Pharyngitis visit date.

*Group A Streptococcus* test defined as: CPT 87430 (by enzyme immunoassay), 87650-87652 (by nucleic acid), 87880 (by direct optical observation), 87081 (by throat culture), 3210F (Group A Strep Test); site-populated taxonomy BGP GROUP A STREP TESTS; and LOINC taxonomy.

# Key Logic Changes from CRS Version 17.0

1. Updated BGP HEDIS ANTIBIOTIC MEDS taxonomy.

#### **Patient List Description**

List of patients 3 through 18 years of age with pharyngitis and a Group A Strep test, if any.

# 2.6 Cancer Related Measure Topics

# 2.6.1 Cancer Screening: Pap Smear Rates

#### **GPRA Measure Description**

During GPRA Year 2017, achieve the target rate of 56.1% for the proportion of female patients ages 24 through 64 without a documented history of hysterectomy who have had a Pap screen within the previous 3 years, or if the patient is over 30, had a Pap screen in the past 3 years or a Pap screen and HPV DNA within the previous 5 years.

#### Denominators

*Female Active Clinical patients* ages 24 through 64 without documented history of hysterectomy. (GPRA Denominator)

*Female Active Clinical patients* ages 24 through 29 without documented history of hysterectomy.

*Female Active Clinical patients* ages 30 through 64 without documented history of hysterectomy.

*Female User Population patients* ages 24 through 64 without documented history of hysterectomy.

*Female User Population patients* ages 24 through 29 without documented history of hysterectomy.

*Female User Population patients* ages 30 through 64 without documented history of hysterectomy.

#### Numerators

Patients with a Pap smear documented in the past 3 years, or if a patient is 30 to 64 years of age, either a Pap Smear documented in the past 3 years or a Pap Smear and an HPV DNA documented in the past 5 years. (GPRA Numerator)

Note: This numerator does *not* include refusals.

Patients with a Pap Smear documented in the past 3 years.

Patients with a Pap Smear documented 3-5 years ago and an HPV DNA documented in the past 5 years

# Logic Description

Age of the patient is calculated at the beginning of the report period. Patients must be at least 24 years of age at the beginning of the report period and less than 65 years of age as of the end of the report period.

Subject Defined	CPT Codes	ICD and Other Codes	LOINC Codes	Taxonomy
Hysterectomy	51925, 56308 (old code), 57540, 57545, 57550, 57555, 57556, 58150, 58152, 58200- 58294, 58548, 58550-58554, 58570-58573, 58951, 58953- 58954, 58956, 59135	Procedure: ICD-9: 68.4- 68.9; ICD-10: 0UT9*ZZ Diagnosis (POV or Problem List entry where the status is not Deleted): ICD-9: 618.5, 752.43, V88.01, V88.03; ICD-10: N99.3, Z12.72, Z90.710, Z90.712, Q51.5; SNOMED data set PXRM BGP HYSTERECTOMY DX (Problem List only) Women's Health: Procedure called Hysterectomy.

# 2.6.2 Cancer Screening: Mammogram Rates GPRA Measure Description

During GPRA Year 2017, achieve the target rate of 56.7% for the proportion of female patients ages 52 through 64 who have had mammography screening within the last 2 years.

#### Denominators

*Female Active Clinical patients* ages 52 through 64 without a documented history of bilateral mastectomy or two separate unilateral mastectomies. (GPRA Denominator)

*Female User Population patients* ages 52 through 64 without a documented history of bilateral mastectomy or two separate unilateral mastectomies.

#### Numerators

All patients who had a Mammogram documented in the past 2 years.

```
Note: This numerator does not include refusals. (GPRA Numerator)
```

Patients with documented mammogram refusal in the past year

## Logic Description

Age of the patient is calculated at the beginning of the Report Period. For all denominators, patients must be at least the minimum age as of the beginning of the Report Period. For the 52 through 64 denominators, the patients must be less than 65 years of age as of the end of the Report Period.

Subject Defined	CPT Codes	ICD and Other Codes
Bilateral Mastectomy	19300.50-19307.50 or old code 19180, 19200, 19220 OR 19300-19307 with modifier 09950 (50 and 09950 modifiers indicate bilateral) OR 19240, with modifier of 50 or 09950	Procedure: ICD-9: 85.42, 85.44, 85.46, 85.48; ICD-10: 0HBV0ZZ, 0HCV0ZZ, 0HTV0ZZ Diagnosis (POV or Problem List entry where the status is not Deleted): ICD- 10: Z90.13; SNOMED data set PXRM BGP BILAT MASTECTOMY (Problem List only)

Subject Defined	CPT Codes	ICD and Other Codes
Unilateral Mastectomy	Two separate unilateral mastectomies defined as either of the following: 1) Must have one code that indicates a right mastectomy and one code that indicates a left mastectomy; or 2) Must have 2 separate occurrences on 2 different dates of service for one code that indicates a mastectomy on unknown side and one code that indicates either a right or left mastectomy, or two codes that indicate a mastectomy on unknown side.	
	<b>Right Mastectomy:</b> Diagnosis (POV or Problem List entry where the status is not Deleted) ICD-10: Z90.11; SNOMED data set PXRM BGP RIGHT MASTECTOMY (Problem List only); Procedure ICD-10: 07T50ZZ, 07T80ZZ, 0HBT0ZZ, 0HCT0ZZ, 0HTT0ZZ.	
	Left Mastectomy: Diagnosis (POV or Problem List entry where the status is not Deleted) ICD-10: Z90.12; SNOMED data set PXRM BGP LEFT MASTECTOMY (Problem List only); Procedure ICD-10: 07T60ZZ, 07T90ZZ, 0HBU0ZZ, 0HCU0ZZ, 0HTU0ZZ.	
	Mastectomy on unknown side: 1) CPT 19300-19307, or old codes 19180, 19200, 19220, 19240; 2) Procedure ICD-9: 85.41, 85.43, 85.45, 85.47.	
Mammogram	Radiology or CPT: 77052-77059, 77065- 77067, 76090 (old code), 76091 (old code), 76092 (old code), G0206, G0204, G0202	POV: ICD-9: V76.11, V76.12, 793.80 Abnormal mammogram, unspecified; 793.81 Mammographic microcalcification; 793.89 Other abnormal findings on radiological exam of breast; ICD-10: R92.0, R92.1, R92.8, Z12.31 Procedure: ICD-9: 87.36-87.37; ICD-10: BH00ZZZ, BH01ZZZ, BH02ZZZ Women's Health: Mammogram

# 2.6.3 Colorectal Cancer Screening

## **GPRA Measure Description**

During GPRA Year 2017, achieve the target rate of 40.2% for the proportion of clinically appropriate patients ages 50-75 who have received colorectal screening.

#### Denominators

Active Clinical patients ages 50 through 75 without a documented diagnosis of colorectal cancer or total colectomy. Broken down by gender. (GPRA Denominator)

*User Population patients* ages 50 through 75 without any documented diagnosis of colorectal cancer or total colectomy.

#### Numerators

Patients who have had any CRC screening, defined as any of the following: (1) Fecal Occult Blood Test (FOBT) or Fecal Immunochemical Test (FIT) during the Report Period; (2) flexible sigmoidoscopy in the past 5 years; or (3) colonoscopy in the past 10 years.

Note: This numerator does *not* include refusals. (GPRA Numerator)

Patients with documented CRC screening refusal during the Report Period.

Patients with FOBT or FIT during the Report Period.

Patients with a flexible sigmoidoscopy in the past 5 years or a colonoscopy in the past 10 years.

## Logic Description

Age is calculated at the beginning of the Report Period.

## Denominator Exclusions

Any diagnosis ever of one of the following:

- 1. Colorectal Cancer: Diagnosis (POV or Problem List entry where the status is not Deleted) ICD-9: 153.\*, 154.0, 154.1, 197.5, V10.05; ICD-10: C18.\*, C19, C20, C78.5, Z85.030, Z85.038; SNOMED data set PXRM COLORECTAL CANCER (Problem List only); CPT G0213–G0215 (old codes), G0231 (old code).
- 2. **Total Colectomy:** CPT 44150 through 44151, 44152 (old code), 44153 (old code), 44155 through 44158, 44210 through 44212; Procedure ICD-9: 45.8\*; ICD-10: 0DTE\*ZZ.

*Colorectal cancer screening definition*: The most recent of any of the following tests and procedures during applicable timeframes. CRS identifies the tests and procedures described in the numerators above with the following codes:

# Colorectal Cancer Screening (CRS looks for the most recent of any of the following during timeframes specified in numerator section above)

#### Refusal definition: Any of the following in the past year

## Key Logic Changes from CRS Version 17.0

None.

## **Patient List Description**

List of patients 50 through 75 with CRC screening or refusal, if any.

#### **Measure Source**

HEDIS, HP 2020 C-16

#### Measure Past Performance and Long-Term Targets

Performance	Percent
IHS FY 2016 Performance	39.6%
IHS FY 2015 Performance	38.6%
IHS FY 2014 Performance	37.5%
IHS FY 2013 Performance	35.0%
Former definition of CRC:	
IHS FY 2012 Performance	46.1%
IHS FY 2011 Performance	41.7%
IHS FY 2010 Performance	37.0%
IHS FY 2009 Performance	33.0%
IHS FY 2008 Performance	29.0%
IHS FY 2007 Performance	26.0%
IHS FY 2006 Performance	22.0%
HP 2020 Goal	70.5%

#### **Performance Improvement Tip**

Providers should ask about and record off-site historical tests (test type, date received and location) on PCC forms. Data entry mnemonics: HBE (barium enema); HCOL (colonoscopy); HFOB (Fecal Occult Blood); HSIG (sigmoidoscopy). Providers should also enter as a refusal if the patient refuses the colorectal cancer screening. Refusals may be entered with the data entry mnemonic of REF (refusal).

# 2.6.4 Comprehensive Cancer Screening

## **GPRA Measure Description**

Increase the proportion of patients ages 24 through 75 who received a comprehensive cancer screening.

#### Denominators

Active Clinical patients ages 24 through 75 who are eligible for cervical cancer, breast cancer, and/or colorectal cancer screening. (GPRA Developmental Denominator)

- a. Active Clinical female patients ages 24 through 75.
- b. Active Clinical male patients ages 50 through 75.

#### Numerators

Patients who have had all screenings for which they are eligible.

**Note:** This numerator does *not* include refusals. (GPRA Developmental Numerator)

- a. Female patients with cervical cancer, breast cancer, and/or colorectal cancer screening.
- b. Male patients with colorectal cancer screening.

## **Logic Description**

Age is calculated at the beginning of the Report Period.

*Cervical Cancer Screening definition:* To be eligible for this screening, patients must be female Active Clinical ages 24 through 64 and not have a documented history of hysterectomy. Patients must be at least 24 years of age at the beginning of the Report Period and less than 65 years of age as of the end of the Report Period. To be counted as having the screening, the patient must have had a Pap Smear documented in the past 3 years, or if the patient is 30 to 64 years of age, either a Pap Smear documented in the past 3 years or a Pap Smear and an HPV DNA documented in the past 5 years.

CRS identifies the tests and procedures described in the numerators above with the following codes:

Subject Defined	CPT Codes	ICD and Other Codes	LOINC Codes	Taxonomy
Hysterectom y	51925, 56308 (old code), 57540, 57545, 57550, 57555, 57556, 58150, 58152, 58200-58294, 58548, 58550- 58554, 58570- 58554, 58570- 58573, 58951, 58953-58954, 58956, 59135	Procedure: ICD-9: 68.4-68.9; ICD-10: 0UT9*ZZ Diagnosis (POV or Problem List entry where the status is not Deleted): ICD-9: 618.5, 752.43, V88.01, V88.03; ICD- 10: N99.3, Z12.72, Z90.710, Z90.712, Q51.5; SNOMED data set PXRM BGP HYSTERECTOMY DX (Problem List only) Women's Health: Procedure called Hysterectomy.		
Pap Smear	88141-88154, 88160-88167, 88174-88175, G0123, G0124, G0141, G0143- G0145, G0147, G0148, P3000, P3001, Q0091	Lab: PAP SMEAR POV: ICD-9: V76.2 Screen Mal Neop-Cervix, V72.32 Encounter for Pap Cervical Smear to Confirm Findings of Recent Normal Smear Following Initial Abnormal Smear, 795.0*; ICD-10: R87.61*, R87.810, R87.820, Z01.42, Z12.4 Women's Health: Procedure called Pap Smear and where the result does NOT have "ERROR/DISREGARD"	Yes	BGP PAP SMEAR TAX
HPV DNA <b>Note:</b> CRS will only search for a documented HPV DNA if the patient had a Pap Smear 3 to 5 years ago.	87620-87622	Lab: HPV POV: ICD-9: V73.81, 079.4, 796.75, 795.05, 795.15, 796.79, 795.09, 795.19; ICD-10: B97.7, R85.618, R85.81, R85.82, R87.628, R87.810, R87.811, R87.820, R87.821, Z11.51 Women's Health: Procedure called HPV Screen and where the result does NOT have "ERROR/DISREGARD"; Procedure called Pap Smear and where the HPV field equals Yes	Yes	BGP HPV TAX

*Breast Cancer Screening definition*: To be eligible for this screening, patients must be female Active Clinical ages 52 through 64 and not have a documented history ever of bilateral mastectomy or two separate unilateral mastectomies. Patients must be at least age 52 as of the beginning of the Report Period and must be less than 65 years of age as of the end of the Report Period. To be counted as having the screening, the patient must have had a Mammogram documented in the past 2 years.

CRS identifies the tests and procedures described in the numerators above with the following codes:

Subject Defined	CPT Codes	ICD and Other Codes
Bilateral Mastectomy	19300.50-19307.50 or old code 19180, 19200, 19220 OR 19300-19307 with modifier 09950 (50 and 09950 modifiers indicate bilateral) OR 19240, with modifier of 50 or 09950	Procedure: ICD-9: 85.42, 85.44, 85.46, 85.48; ICD-10: 0HBV0ZZ, 0HCV0ZZ, 0HTV0ZZ Diagnosis (POV or Problem List entry where the status is not Deleted): ICD- 10: Z90.13; SNOMED data set PXRM BGP BILAT MASTECTOMY (Problem List only)

Subject Defined	CPT Codes	ICD and Other Codes
Unilateral Mastectomy	Two separate unilateral mastectomies defined as either of the following: 1) Must have one code that indicates a right mastectomy and one code that indicates a left mastectomy; or 2) Must have 2 separate occurrences on 2 different dates of service for one code that indicates a mastectomy on unknown side and one code that indicates either a right or left mastectomy, or two codes that indicate a mastectomy on unknown side.	
	<b>Right Mastectomy:</b> Diagnosis (POV or Problem List entry where the status is not Deleted) ICD-10: Z90.11; SNOMED data set PXRM BGP RIGHT MASTECTOMY (Problem List only); Procedure ICD-10: 07T50ZZ, 07T80ZZ, 0HBT0ZZ, 0HCT0ZZ, 0HTT0ZZ.	
	Left Mastectomy: Diagnosis (POV or Problem List entry where the status is not Deleted) ICD-10: Z90.12; SNOMED data set PXRM BGP LEFT MASTECTOMY (Problem List only); Procedure ICD-10: 07T60ZZ, 07T90ZZ, 0HBU0ZZ, 0HCU0ZZ, 0HTU0ZZ.	
	Mastectomy on unknown side: 1) CPT 19300-19307, or old codes 19180, 19200, 19220, 19240; 2) Procedure ICD-9: 85.41, 85.43, 85.45, 85.47.	
Mammogram	Rad or CPT: 77052-77059, 77065-77067, 76090 (old code), 76091 (old code), 76092 (old code), G0206, G0204, G0202	POV: ICD-9: V76.11, V76.12, 793.80 Abnormal mammogram, unspecified; 793.81 Mammographic microcalcification; 793.89 Other abnormal findings on radiological exam of breast; ICD-10: R92.0, R92.1, R92.8, Z12.31 Procedure: ICD-9: 87.36-87.37; ICD-10: BH00ZZZ, BH01ZZZ Women's Health: Mammogram Screening, Mammogram Dx Bilat, Mammogram Dx Unilat and where the mammogram result does NOT have "ERROR/DISREGARD".

*Colorectal cancer screening definition*: To be eligible for this screening, patients must be Active Clinical ages 50 through 75 and not have a documented history ever of colorectal cancer or total colectomy. To be counted as having the screening, patients must have had any of the following: (1) FOBT or FIT during the Report Period; (2) flexible sigmoidoscopy or double contrast barium enema in the past 5 years; or (3) colonoscopy in the past 10 years.

The most recent of any of the following tests and procedures during applicable timeframes. CRS identifies the tests and procedures described in the numerators above with the following codes:

Subject Defined	CPT Codes	ICD and Other Codes	LOINC Codes	Taxonomy
Colorectal Cancer	G0213 through G0215, G0231	Diagnosis (POV or Problem List entry where the status is not Deleted): ICD-9: 153.*, 154.0, 154.1, 197.5, V10.05; ICD-10: C18.*, C19, C20, C78.5, Z85.030, Z85.038; SNOMED data set PXRM COLORECTAL CANCER (Problem List only)		
Total Colectomy	44150 through 44151, 44152 (old code), 44153 (old code), 44155 through 44158, 44210-44212	Procedure: ICD-9: 45.8*; ICD-10: 0DTE*ZZ		
Fecal Occult Blood lab test (FOBT) or Fecal Immuno- chemical Test (FIT)	82270, 82274, 89205 (old code), G0107 (old code), G0328, G0394 (old code)		Yes	BGP GPRA FOB TESTS

Figure 2-44: Sample Patient List, Comprehensive Cancer Screening

# 2.6.5 Tobacco Use and Exposure Assessment Denominators

Active Clinical patients ages 5 and older. Broken down by gender and age groups (5 through 13, 14 through 17, 18 through 24, 25 through 44, 45 through 64, and 65 and older), based on HP 2010 age groups.

*Pregnant female User Population patients* with no documented miscarriage or abortion.

User Population patients ages 5 and older. Broken down by gender.

#### Numerators

Patients who have been screened for tobacco use during the Report Period.

Patients identified as current tobacco users during the Report Period, both smokers and smokeless users.

- a. Patients identified as current smokers during the Report Period.
- b. Patients identified as current smokeless tobacco users during the Report Period.

Patients identified as exposed to environmental tobacco smoke (ETS) (second-hand smoke) during the Report Period.

# Logic Description

Ages are calculated at beginning of Report Period.

For screening, an additional eight months is included for patients who were pregnant during the Report Period but who had their tobacco assessment prior to that.

CRS uses the following codes to define the denominators and numerators:

Subject Defined	CPT Codes	ICD and Other Codes
Pregnancy (Any of the following: 1) The Currently Pregnant field in Reproductive Factors file set to "Yes" during the Report Period, or 2) At least two visits during the past 20 months, where the primary provider is not a CHR (Provider code 53). Pharmacy- only visits (Clinic Code 39) will not count toward these two visits. If the patient has more than two pregnancy-related visits during the past 20 months, CRS will use the first two visits in the 20-month period. In addition, the patient must have at least one pregnancy-related visit occurring during the reporting period. The patient must not have a documented miscarriage or abortion occurring after the second pregnancy-related visit or the date the Currently Pregnant field was set to "Yes". The time period is extended to include patients who were pregnant during the Report Period but who had their tobacco assessment prior to that. Figure 2-47: Sample Patient List, Tobacco Use Assessment

# 2.6.6 Tobacco Cessation

## **GPRA Measure Description**

During GPRA Year 2017, achieve the target rate of 53.2% for the proportion of tobacco-using patients who receive tobacco cessation intervention or quit tobacco use.

#### Denominators

Active Clinical patients identified as current tobacco users or tobacco users in cessation. Broken down by gender and age groups (less than (<) 12, 12 through 17, 18 and older (GPRA Denominator).)

*User Population patients* identified as current tobacco users or tobacco users in cessation.

#### Numerators

Patients who have received tobacco cessation counseling or received a prescription for a smoking cessation aid anytime during the Report Period.

Note: This numerator does *not* include refusals.

Patients identified as having quit their tobacco use anytime during the Report Period.

Patients who received tobacco cessation counseling, received a prescription for a tobacco cessation aid, or quit their tobacco use anytime during the Report Period. (GPRA Numerator)

**Note**: This numerator does *not* include refusals.

## Logic Description

Age is calculated at the beginning of the Report Period.

## **Denominator Logic**

Current Tobacco Users or Tobacco Users in Cessation:

CRS will search first for all health factors in the Tobacco, TOBACCO (SMOKING) and TOBACCO (SMOKELESS – CHEWING/DIP) categories documented during the Report Period.

If health factor(s) are found and at least one of them is one of the health factors listed below, the patient is counted as a current tobacco user or tobacco user in cessation. The patient is not counted as receiving cessation counseling.

Tobacco User Health Factors (TUHFs):

- Cessation-Smoker
- Cessation-Smokeless
- Current Smoker
- Current Smokeless
- Current Smoker and Smokeless
- Current Smoker, status unknown
- Current Smoker, every day
- Current Smoker, some day
- Heavy Tobacco Smoker
- Light Tobacco Smoker

If a health factor is found and it is NOT a TUHF, CRS will then search for CPT 1034F or 1035F documented after the health factor. If one of these codes is found, the patient will be considered a tobacco user.

If no TUHF was found, CRS will then search for any of the following codes documented during the Report Period:

- Tobacco-related diagnoses (POV or Problem List entry where the status is not Inactive or Deleted) ICD-9: 305.1, 305.10-305.12 (old codes), or 649.00-649.04; ICD-10: F17.2\*0, F17.2\*3, F17.2\*8, F17.2\*9, O99.33\*, Z72.0; SNOMED data set PXRM BGP CURRENT TOBACCO (Problem List only).
- CPT 99406, 99407, G0375 (old code), G0376 (old code), 1034F, 1035F, G8455 (old code), G8456 (old code), G8402 (old code), G8453 (old code), G9276.

If any of these codes are found, the patient will be considered a tobacco user.

If no TUHF or other tobacco user-defining code listed above was found during the specified timeframe, CRS will then search for the most recent health factor in both the TOBACCO (SMOKING) and TOBACCO (SMOKELESS – CHEWING/DIP) categories documented during an EXPANDED timeframe of any time prior to the Report Period. For example, a patient with the most recent health factor being documented five years prior to the Report Period. **Note:** If multiple health factors were documented on the same date and if any of them are TUHFs, all of the health factors will be considered as TUHFs.

If a health factor is found during the expanded timeframe, and is a TUHF, the patient will be considered a potential tobacco user.

If a health factor is found during the expanded timeframe and it is not one of the TUHFs, CRS will then search for CPT 1034F or 1035F documented after the health factor. If one of these codes is found, the patient will be considered a potential tobacco user.

If no health factor was found, CRS will then search for any of the following codes documented through the beginning of the Report Period:

- Tobacco-related diagnoses (POV or Problem List entry where the status is not Inactive or Deleted) ICD-9: 305.1, 305.10-305.12 (old codes), or 649.00-649.04; ICD-10: F17.2\*0, F17.2\*3, F17.2\*8, F17.2\*9, O99.33\*, Z72.0; SNOMED data set PXRM BGP CURRENT TOBACCO (Problem List only).
- CPT 99406, 99407, G0375 (old code), G0376 (old code), 1034F, 1035F, G8455 (old code), G8456 (old code), G8402 (old code), G8453 (old code), G9276.

If any of these codes are found, the patient will be considered a potential tobacco user. If one of these codes is not found, the patient is considered a non-tobacco user and will not be included in the denominator.

If the patient is considered a potential tobacco user, CRS will then search for diagnosis (POV or Problem List entry where the status is not Inactive or Deleted) ICD-9: 305.13 Tobacco use in remission (old code), V15.82; ICD-10: F17.2\*1, Z87.891; SNOMED data set PXRM BGP QUIT TOBACCO (Problem List only) with a date occurring after the health factor date and through the beginning of the report period. If one of these diagnoses is found, the patient will be considered as having quit their tobacco use and will not be included in the denominator. If a diagnosis is not found, the patient is included as a current tobacco user and will be included in the denominator.

# **Numerator Logic**

## **Tobacco Cessation Counseling**

Any of the following documented anytime during the Report Period:

- Patient education codes containing "TO-", "-TO", "-SHS", 305.1, 305.1\* (old codes), 649.00-649.04, D1320, 99406, 99407, G0375 (old code), G0376 (old code), 4000F, G8402, G8453, or SNOMED codes 160603005, 160604004, 160605003, 160606002, 160619003, 191887008, 191888003, 191889006, 228494002, 228504007, 228514003, 228515002, 228516001, 228517005, 228518000, 230059006, 230060001, 230062009, 230063004, 230064005, 230065006, 266920004, 428041000124106, 428061000124105, 428071000124103, 449868002, 59978006, 65568007, 77176002, 81703003, 82302008, 89765005
- Clinic code 94 (tobacco cessation clinic)
- Dental code 1320
- CPT code D1320, 99406, 99407, G0375 (old code), G0376 (old code), 4000F, G8402 or G8453

## Prescription for Tobacco Cessation Aid

Any of the following documented anytime during the Report Period:

- Prescription for medication in the site-populated BGP CMS SMOKING CESSATION MEDS taxonomy that does not have a comment of RETURNED TO STOCK.
- Prescription for any medication with name containing "NICOTINE PATCH", "NICOTINE POLACRILEX", "NICOTINE INHALER", or "NICOTINE NASAL SPRAY" that does not have a comment of RETURNED TO STOCK.
- CPT 4001F

# Quit Tobacco Use

Any of the following documented anytime during the Report Period through the end of the Report Period AND after the date of the code found indicating the patient was a current tobacco user.

- Diagnosis (POV or Problem List entry where the status is not Inactive or Deleted) ICD-9: 305.13 Tobacco use in remission (old code), V15.82; ICD-10: F17.2\*1, Z87.891; SNOMED data set PXRM BGP QUIT TOBACCO (Problem List only)
- Health Factor (looks at the last documented health factor): Previous Smoker, Previous Smokeless, Previous (former) smoker, Previous (former) smokeless

# Key Logic Changes from CRS Version 17.0

None.

## **Patient List Description**

List of tobacco users with tobacco cessation intervention, if any, or who have quit tobacco use.

# 2.7 Behavioral Health Related Performance Measure Topics

# 2.7.1 Alcohol Screening

### **GPRA Measure Description**

During GPRA Year 2017, establish a baseline for the proportion of patients ages 12 to 75 who receive screening for alcohol use.

### Denominators

Active Clinical Plus BH patients ages 12 through 75. Broken down by age groups: 12-19, 20-24, 25-34, 35-44, 45-54, and 55-75. (GPRA Denominator)

Active Clinical Plus BH patients ages 12 through 75 screened for alcohol use during the Report Period, not including refusals or patient education. Broken down by age groups: 12-19, 20-24, 25-34, 35-44, 45-54, and 55-75.

**Note**: This denominator does *not* include patients with a screening refusal or an alcohol-related diagnosis, procedure, or patient education.

Active Clinical Plus BH patients ages 9 through 75.

Female Active Clinical patients ages 14 through 46.

*Female Active Clinical patients* ages 14 through 46 screened for alcohol use during the Report Period.

**Note**: This denominator does *not* include patients with a screening refusal or an alcohol-related diagnosis, procedure, or patient education.

User Population patients ages 12 through 75.

User Population patients ages 9 through 75.

#### Numerators

Patients screened for alcohol use or had an alcohol-related diagnosis or procedure during the Report Period.

**Note:** This numerator does *not* include refusals or alcohol-related patient education. (GPRA Numerator)

Patients with alcohol-related patient education during the Report Period.

Patients who were screened positive for alcohol use.

Patients screened for alcohol use, had an alcohol-related diagnosis or procedure, or received alcohol-related patient education during the Report Period.

Note: This numerator does *not* include refusals.

- a. Patients with alcohol screening during the report period.
- b. Patients with alcohol-related diagnosis or procedure during the report period
- c. Patients with alcohol-related patient education during the report period.

### Logic Description

Ages are calculated at beginning of Report Period.

*Alcohol screening definition:* Any of the following during the Report Period: (a) Alcohol Screening Exam, any CAGE Health Factor, or Screening Diagnosis; (b) Alcohol-related diagnosis in POV, Current PCC or BHS Problem List; (c) Alcohol-related procedure; or (d) Patient education.

Subject Defined	ICD and Other Codes
Alcohol Screening	Exam Code: 35
	CPT code: 99408, 99409, G0396, G0397, H0049, H0050, 3016F
	Any CAGE Health Factor
	<b>POV:</b> ICD-9: V11.3 (history of alcoholism), V79.1 (screening for
	alcoholism)
	BHS Problem Code: 29.1 (Screening for Alcoholism)
	Measurement in PCC or BHS: AUDT, AUDC, or CRFT
Alcohol-related Diagnosis	POV, Current PCC or BHS Problem List: ICD-9: 303.*, 305.0*, 291.*, 357.5*; ICD-10: F10.1*, F10.20, F10.220-F10.29, F10.920-F10.982, F10.99, G62.1; SNOMED data set PXRM BGP ETOH RELATED DX (Problem List only)
	BHS POV or Problem Codes: 10, 12.1, 14.2, 17.1, 18.1, 20.1, 22.1, 27, 29
Alcohol-related Procedure	Procedure: ICD-9: 94.46, 94.53, 94.61-94.63, 94.67-94.69
Alcohol-related Education	Patient Education codes: "AOD-" or "-AOD", "CD-" or "-CD" (old codes), or containing V11.3, V79.1, 303.*, 305.0*, 291.* 357.5*, 99408, 99409, G0396, G0397, H0049, H0050, 3016F, or SNOMED codes 15167005, 18653004, 191471000, 191475009, 191476005, 191477001, 191478006, 191480000, 191802004, 191804003, 191805002, 191811004, 191812006, 191813001, 19303008, 281004, 284591009, 288281000119100, 29212009, 30491001, 34938008, 41083005, 42344001, 53936005, 61144001, 66590003, 7052005, 7200002, 73097000, 78524005, 79578000, 8635005
Positive Screen for	Exam Code: 35 Alcohol Screening result of "Positive"
Alcohol Use	Health Factor: CAGE result of 1/4, 2/4, 3/4 or 4/4
	<b>CPT:</b> G0396, G0397, 99408, 99409
	<b>Measurement Result in PCC:</b> AUDT result of greater than or equal to (>=) 8, AUDC result of greater than or equal to (>=) 4 for men and greater than or equal to (>=) 3 for women, CRFT result of 2-6

Alcohol screening may be documented with either an exam code or the CAGE health factor in PCC or BHS. BHS problem codes can also currently be used.

# Recommended Brief Screening Tool

Single Alcohol Screening Question (SASQ) (below).

For Women:

When was the last time you had more than four drinks in one day?

For Men:

When was the last time you had more than five drinks in one day?

Any time in the past 3 months is a positive screen; further evaluation indicated. Provider should note the screening tool used was the SASQ in the COMMENT section of the Exam Code.

# **Alcohol Health Factors**

The existing Health Factors for alcohol screening are based on the CAGE questionnaire, which asks the following four questions:

- 1. Have you ever felt the need to Cut down on your drinking?
- 2. Have people Annoyed you by criticizing your drinking?
- 3. Have you ever felt bad or Guilty about your drinking?
- 4. Have you ever needed an Eye opener the first thing in the morning to steady your nerves or get rid of a hangover?
- 5. Based on how many YES answers are received, document Health Factor:
  - HF–CAGE 0/4 (all "No" answers)
  - HF–CAGE 1/4
  - HF–CAGE 2/4
  - HF–CAGE 3/4
  - HF–CAGE 4/4

Optional values:

- Level/Severity: Mild, Moderate, or Severe
- Quantity: # of drinks daily

# Key Logic Changes from CRS Version 17.0

# 2.7.2 Screening, Brief Intervention, and Referral to Treatment (SBIRT) GPRA Measure Description

During GPRA Year 2017, establish a baseline for the proportion of patients ages 9 through 75 who screened positive for risky or harmful alcohol use and who received a Brief Negotiated Interview (BNI) or Brief Intervention (BI) within 7 days of screen.

### Denominators

*Active Clinical Plus BH patients* ages 9 through 75. Broken down by gender and age groups (9 through 12, 13 through 18, 19 through 24, 25 through 34, 35 through 44, 45 through 54, 55 through 64, and 65 through 75).

*Active Clinical Plus BH patients* age 9 through 75 years screened positive for risky or harmful alcohol use during the Report Period. Broken down by gender and age groups (9 through 12, 13 through 18, 19 through 24, 25 through 34, 35 through 44, 45 through 54, 55 through 64, and 65 through 75). (GPRA Denominator)

*User Population patients* age 9 through 75 years screened positive for risky or harmful alcohol use during the Report Period.

# Numerators

Patients screened in Ambulatory Care for risky or harmful alcohol use.

- a. Patients screened positive for risky or harmful alcohol use.
- b. Patients provided a Brief Negotiated Interview (BNI) or Brief Intervention (BI) in Ambulatory care within 7 days of screen.

Patients provided a Brief Negotiated Interview (BNI) or Brief Intervention (BI) in Ambulatory Care within 7 days of screen. (GPRA Numerator)

- a. Patients who received a BNI/BI on same day as screen.
- b. Patients who received a BNI/BI 1-3 days after screen.
- c. Patients who received a BNI/BI 4-7 days after screen.
- d. Patients who were referred treatment within 7 days of screen.

### **Logic Description**

Age of the patient is calculated as of the beginning of the Report Period.

Ambulatory Care definition: Service Category A (Ambulatory).

CRS uses the following codes:

Subject Defined	ICD and Other Codes					
Screening for Risky	Any conducted during an Ambulatory Care visit.					
or Harmful Alcohol	Exam Code: 35					
Use	Any Alcohol Health Factor (i.e., CAGE)					
	POV: V79.1 Screening for Alcoholism					
	CPT: G0396, G0397, H0049, H0050, 99408, 99409, 3016F					
	Measurement in PCC: AUDT, AUDC, or CRFT					
Positive Screen for	Any of the following for the screening conducted during an Ambulatory					
Hazardous Alcohol	Care visit:					
Use	Exam Code: 35 Alcohol Screening result of "Positive"					
	Health Factor: CAGE result of 1/4, 2/4, 3/4 or 4/4					
	<b>CPT:</b> G0396, G0397, 99408, 99409					
	Measurement Result in PCC: AUDT result of greater than or equal to					
	(>=) 8, AUDC result of greater than or equal to $(>=)$ 4 for men and					
Drief Negatieta d	greater than or equal to (>=) 3 for women, CRFT result of 2-6					
Brief Negotiated	Any of the following documented at the Ambulatory Care visit or within 7 days of the Ambulatory Care visit at a face-to-face visit, which					
Intervention (BNI/BI)	excludes chart reviews and telecommunication visits:					
	CPT: G0396, G0397, H0050, 99408, 99409, 96150-96155					
	Patient Education Code: AOD-BNI or containing G0396, G0397, H0050, 99408, 99409, 96150-96155					

Subject Defined	ICD and Other Codes
Referral to	Patient Education Code: AOD-TX
treatment	

# Recommended Brief Screening Tool

SASQ (below).

For Women:

When was the last time you had more than four drinks in one day?

For Men:

When was the last time you had more than five drinks in one day?

Any time in the past 3 months is a positive screen; further evaluation indicated. Provider should note the screening tool used was the SASQ in the COMMENT section of the Exam Code.

# **Alcohol Health Factors**

The existing Health Factors for alcohol screening are based on the CAGE questionnaire, which asks the following four questions:

- 1. Have you ever felt the need to Cut down on your drinking?
- 2. Have people Annoyed you by criticizing your drinking?
- 3. Have you ever felt bad or Guilty about your drinking?
- 4. Have you ever needed an Eye opener the first thing in the morning to steady your nerves or get rid of a hangover?

Based on how many YES answers are received, document Health Factor:

- HF–CAGE 0/4 (all No answers)
- HF–CAGE 1/4
- HF–CAGE 2/4
- HF–CAGE 3/4
- HF–CAGE 4/4

Optional values:

- Level/Severity: Mild, Moderate, or Severe
- Quantity: number of drinks daily

# 2.7.3 Intimate Partner (Domestic) Violence Screening

# **GPRA Measure Description**

During GPRA Year 2017, achieve the target rate of 65.3% for the proportion of female patients ages 14 through 46 who receive screening for domestic violence.

# Denominators

Female Active Clinical patients ages 14 through 46. (GPRA Denominator)

Female User Population patients ages 14 through 46.

### Numerators

Patients screened for intimate partner (domestic) violence at any time during the Report Period.

Note:	This numerator does not include refusals. (GPRA
	Numerator)

- a. Patients with documented IPV/DV exam
- b. Patients with IPV/DV related diagnosis
- c. Patients provided with education or counseling about IPV/DV

# Logic Description

Age of the patient is calculated at the beginning of the report period. CRS uses the following codes to define numerators.

Subject Defined	CPT Codes	ICD and Other Codes
IPV/DV Screening		Exam: Code 34
		BHS Exam: IPV/DV
IPV/DV Diagnosis		POV or current PCC or BHS Problem List: ICD-9: 995.80-995.83, 995.85, V15.41, V15.42, V15.49; ICD-10: T74.11XA, T74.21XA, T74.31XA, T74.91XA, T76.11XA, T76.21XA, T76.31XA, T76.91XA, Z91.410; SNOMED data set PXRM BGP IPV DV DX (Problem List only) BHS POV: 43.*, 44.*
IPV/DV Education		Patient education codes: Containing "DV-" or "- DV", 995.80-83, 995.85, V15.41, V15.42, V15.49, or SNOMED 3027571011, 3027627017, 371772001, 406138006, 412732008, 429746005, 431027007, 432527004
IPV/DV Counseling		POV: ICD-9: V61.11; ICD-10: Z69.11

# Key Logic Changes from CRS Version 17.0

None.

# Patient List Description

List of female patients 14-46 with documented IPV/DV screening, if any.

# 2.7.4 Depression Screening

# **GPRAMA/GPRA Measure Description**

Age 12-17: During GPRA Year 2017, establish a baseline for the proportion of patients ages 12 through 17 who receive annual screening for depression.

Age 18 and older: During GPRA Year 2017, achieve the target rate of 70.0% for the proportion of patients ages 18 and older who receive annual screening for depression.

### Denominators

Active Clinical patients ages 12 through 17. Broken down by gender. (GPRA Denominator)

Active Clinical patients ages 18 and older. Broken down by gender and age group: 65 and older. (GPRAMA Denominator)

User Population patients ages 12 through 17. Broken down by gender.

*User Population patients* ages 18 and older. Broken down by gender and age group: 65 and older.

Active Diabetic patients, defined as Active Clinical patients diagnosed with diabetes prior to the Report Period, *and* at least two visits during the Report Period, *and* two DM-related visits ever. Broken down by gender.

Active CHD patients, defined as Active Clinical patients diagnosed with coronary heart disease (CHD) prior to the Report Period, *and* at least two visits during the Report Period, *and* two CHD-related visits ever. Broken down by gender.

# Numerators

Patients screened for depression or diagnosed with a mood disorder at any time during the Report Period.

Note: This numerator does not include refusals. (GPRAMA Numerator)

- a. Patients screened for depression during the Report Period.
- b. Patients with a diagnosis of a mood disorder during the Report Period.
- c. Patients who were screened in a Behavioral Health clinic.

Patients with depression-related education during the Report Period.

**Note:** Depression-related patient education does not count toward the GPRAMA numerator and is included as a separate numerator only.

### Logic Description

Age is calculated at beginning of the Report Period.

CRS uses the following codes and taxonomies to define the denominator and numerators.

Subject Defined	ICD and Other Codes
Diabetes	<b>POV:</b> ICD-9: 250.00–250.93; ICD-10: E10.*-E13.*

Subject Defined	ICD and Other Codes
Coronary Heart Disease	<ul> <li>Any of the following:</li> <li>1) POV: ICD-9: 410.0–413.*, 414.0–414.9, 429.2; ICD-10: I20.0-I22.8, I24.0-I25.83, I25.89, I25.9, Z95.5</li> <li>2) One or more CABG or PCI procedures</li> </ul>
CABG	POV: ICD-9: V45.81; ICD-10: Z95.1 CPT: 33510-33514, 33516-33519, 33521-33523, 33530, 33533- 33536, 33572, 35500, 35600, S2205-S2209 Procedure: ICD-9: 36.1*, 36.2*; ICD-10: 02100**, 021049*, 02104A*, 02104J*, 02104K*, 02104Z*, 02110**, 021149*, 02114A*, 02114J*, 02114K*, 02114Z*, 02120**, 021249*, 02124A*, 02124J*, 02124K*, 02124Z*, 02130**, 021349*, 02134A*, 02134J*, 02134K*, 02134Z*

Depression-related Patient Education (does not count toward GPRA numerator)	Documented education of any of the following during the Report Period: <b>Patient education codes</b> : Containing "DEP-" (depression), 296.2* or 296.3*, "BH-" (behavioral and social health), 290319, 995.5*, or 995.80–995.85, "SB-" (suicidal behavior) or 300.9, or "PDEP-" (postpartum depression) or 648.44, or SNOMED codes 14183003, 15193003, 15639000, 18818009, 191610000, 191611001, 191613003, 191616006, 191659001, 192080009, 19527009, 19694002, 20250007, 231504006, 231542000, 2506003, 25922000, 2618002, 268621008, 28475009, 3109008, 319768000, 320751009, 33078009, 35489007, 36170009, 36474008, 36923009, 370143000, 38451003, 38694004, 39809009, 40379007, 40568001, 42925002, 430852001, 442057004, 48589009, 63778009, 66344007, 67711008, 69392006, 71336009, 73867007, 75084000, 75837004, 76441001, 77486005, 77911002, 78667006, 79298009, 81319007, 83176005, 832007, 84760002, 85080004, 87512008.

# **Recommended Brief Screening Tool**

A sample of a Patient Health Questionnaire (PHQ-2 Scaled Version) appears below.

Over the past 2 weeks, how often have you been bothered by any of the following problems?

- 1. Little interest or pleasure in doing things
  - Not at all Value: 0
  - Several days Value: 1
  - More than half the days Value: 2
  - Nearly every day Value: 3
- 2. Feeling down, depressed, or hopeless
  - Not at all Value: 0
  - Several days Value: 1
  - More than half the days Value: 2
  - Nearly every day Value: 3

Total Possible PHQ-2 Score: Range: 0-6

0–2: Negative

3-6: Positive; further evaluation indicated

Provider should note the screening tool used was the PHQ-2 Scaled in the COMMENT section of the Exam Code.

### Key Logic Changes from CRS Version 17.0

None.

#### **Patient List Description**

# 2.7.5 Antidepressant Medication Management

### **GPRA Measure Description**

Acute Treatment: During GPRA Year 2017, establish a baseline for the proportion of patients ages 18 and older with acute treatment for depression.

Continuous Treatment: During GPRA Year 2017, establish a baseline for the proportion of patients ages 18 and older with continuous treatment for depression.

#### Denominators

As of the 120th day of the Report Period, *Active Clinical Plus BH patients* ages 18 years and older who were diagnosed with a new episode of depression and treated with antidepressant medication in the past year.

As of the 120th day of the Report Period, *User Population patients* ages 18 years and older who were diagnosed with a new episode of depression and treated with antidepressant medication in the past year. (GPRA Denominator)

#### **Numerators**

*Effective Acute Phase Treatment:* Patients who filled a sufficient number of separate prescriptions/refills of antidepressant medication for continuous treatment of at least 84 days (12 weeks). (GPRA Numerator)

*Effective Continuation Phase Treatment:* Patients who filled a sufficient number of separate prescriptions/refills of antidepressant medication treatment to provide continuous treatment for at least 180 days (6 months). (GPRA Numerator)

# **Logic Description**

Age is calculated at the beginning of the Report Period. To be included in the denominator, patient must have filled a prescription for an antidepressant medication (see list of medications below) within the 121st day of the year prior to the Report Period to the 120th day of the Report Period. For example, if Report Period is July 1, 2016 - June 30, 2017, patient must have filled a prescription during 11/1/2015 - 10/29/2016. In V Medication, Date Discontinued must not be equal to the prescription (i.e. visit) date. The Index Prescription Start Date (IPSD) is the date of the earliest prescription for antidepressant medication filled during that time period.

### Denominator Exclusions

Patients who did not have a diagnosis of major depression in an inpatient, outpatient, ED, intensive outpatient or partial hospitalization setting during the 60 days prior to the IPSD (inclusive) through 60 days after the IPSD (inclusive).

Major depression defined as POV ICD-9: 296.20-296.25, 296.30-296.35, 298.0, 311; ICD-10: F32.0-F32.4, F32.8-F33.3, F33.41, F33.9.

Patients who had a new or refill prescription for antidepressant medication (see list of medications below) within 105 days prior to the Index Prescription Start Date are excluded as they do not represent new treatment episodes.

# Effective Acute Phase Treatment Numerator

For all antidepressant medication prescriptions filled (see list of medications below) within 114 days of the Index Prescription Date, from V Medication CRS counts the days prescribed (i.e., treatment days) from the Index Prescription Date until a total of 84 treatment days has been established. If the patient had a total gap exceeding 30 days or if the patient does not have 84 treatment days within the 114-day time frame, the patient is not included in the numerator.

**Note:** If the medication was started and then discontinued, CRS will recalculate the # Days Prescribed by subtracting the prescription date (i.e., visit date) from the V Medication Discontinued Date. Example: Rx Date=11/15/2017, Discontinued Date=11/19/2017, Recalculated # Days Prescribed=4.

# **Example of Patient Included in Numerator:**

- First RX is Index Rx Date: 11/1/2016, # Days Prescribed=30
- Rx covers patient through 12/1/2016
- Second RX: 12/15/2016, # Days Prescribed=30

- Gap #1 = (12/15/2016 12/1/2016) = 14 days
- Rx covers patient through 1/14/2017
- Third RX: 1/10/2017, # Days Prescribed=30
- No gap days
- Rx covers patient through 2/13/2017
- Index Rx Date 11/1/2016 + 114 days = 2/23/2017
- Patient's 84th treatment day occurs on 2/7/2017, which is less than or equal to (<=) 2/23/2017 and # gap days of 14 is less than 30

### **Example of Patient Not Included in Numerator:**

- First Rx is Index Rx Date: 11/1/2016, # Days Prescribed=30
- Rx covers patient through 12/1/2016
- Second Rx: 12/15/2016, # Days Prescribed=30
- Gap #1 = (12/15/2016 12/1/2016) = 14 days
- Rx covers patient through 1/14/2017
- Third Rx: 2/01/2017, # Days Prescribed=30
- Gap #2 = (2/01/2017 through 1/14/2017) = 18, total # gap days = 32, so patient is not included in the numerator

### Effective Continuation Phase Treatment Numerator

For all antidepressant medication prescriptions (see list of medications below) filled within 231 days of the Index Prescription Date, CRS counts the days prescribed (i.e., treatment days) (from V Medication) from the Index Prescription Date until a total of 180 treatment days has been established. If the patient had a total gap exceeding 51 days or if the patient does not have 180 treatment days within the 231 day time frame, the patient is not included in the numerator.

Note:	If the medication was started and then discontinued, CRS
	will recalculate the # Days Prescribed by subtracting the
	prescription date (i.e., visit date) from the V Medication
	Discontinued Date. Example: Rx Date=11/15/2017,
	Discontinued Date=11/19/2017, Recalculated # Days
	Prescribed=4.

Antidepressant medications defined with medication taxonomy BGP HEDIS ANTIDEPRESSANT MEDS. (Medications are: Tricyclic antidepressants (TCA) and other cyclic antidepressants, Selective serotonin reuptake inhibitors (SSRI), Monoamine oxidase inhibitors (MAOI), Serotonin-norepinepherine reuptake inhibitors (SNRI), and other antidepressants.) Medications must not have a comment of RETURNED TO STOCK.

# Key Logic Changes from CRS Version 17.0

1. Updated BGP HEDIS ANTIDEPRESSANT MEDS taxonomy.

#### **Patient List Description**

List of patients with new depression DX and acute phase treatment (APT) and continuation phase treatment (CONPT), if any.

#### Measure Source

# 2.8 Cardiovascular Disease Related Measure Topics

# 2.8.1 Obesity Assessment

#### Denominators

*Active Clinical patients* ages 2 through 74. Broken down by gender and age groups (2 through 5, 6 through 11, 12 through 19, 20 through 24, 25 through 34, 35 through 44, 45 through 54, 55 through 74).

User Population patients ages 2 through 74. Broken down by gender.

#### Numerators

Patients for whom a Body Mass Index (BMI) could be calculated.

Note: This numerator does not include refusals.

- 1. For those with a BMI calculated, those considered overweight but not obese using BMI and standard tables
- 2. For those with a BMI calculated, those considered obese using BMI and standard tables
- 3. Total of overweight and obese

Patients with documented refusal during the Report Period.

# Logic Description

Age is calculated at beginning of the Report Period.

*BMI calculation definition:* CRS calculates BMI at the time the report is run, using NHANES II. For age 18 and under, a height and weight must be taken on the same day any time during the Report Period. For 19 through 50, height and weight must be recorded within last 5 years, not required to be on the same day. For over 50, height and weight within last 2 years, not required to be recorded on same day. Overweight but not obese is defined as BMI of 25 through 29 for adults 19 and older. Obese is defined as BMI of 30 or more for adults 19 and older. For ages 2-18, definitions are based on standard tables. Refusals include REF, NMI, and UAS (unable to screen) and must be documented during the past year. For ages 18 and under, both the height and weight must be refused on the same visit at any time during the past year. For ages 19 and older, the height and weight must be refused during the same visit.

Patients whose BMI either is greater or less than the Data Check Limit range shown in the BMI Standard Reference Data Table in PCC will not be included in the report counts for Overweight or Obese.

# Key Logic Changes from CRS Version 17.0

None.

# **Patient List Description**

List of patients with current BMI, if any.

### Measure Past Performance and Long-Term Targets

### **Performance Improvement Tips**

- 1. A Body Mass Index report can be run from your PCC Management Reports menu. This report can be run for all patients or for a specific template of patients that has been pre-defined with a QMan search. The BMI report will provide you with patient height, weight, date weight taken, BMI and NHANES percentile.
- 2. Recent guidelines indicate that height for adults must be taken at least once every 5 years, rather than once after age 18. Your BMI rates may be lower than anticipated because of height data that is over 5 years old.
- 3. If height and weight measurements are being recorded as cm/kg vs. in/lbs ensure providers are *noting* they are cm/kg *and* that data entry is entering the measurements correctly in PCC, as shown below.
  - Use mnemonics of CHT and KWT (vs. HT and WT), or
  - Add "c" after height value and "k" after weight value (e.g. 100c, 50k)

# 2.8.2 Childhood Weight Control

# **GPRA Measure Description**

During GPRA Year 2017, achieve the long-term target rate of 22.8% for the proportion of children with a BMI of 95% or higher.

### Denominators

*Active Clinical patients* ages 2 through 5 for whom a BMI could be calculated. Broken down by gender and age groups (2, 3, 4, 5). (GPRA Denominator)

User Population patients ages 2 through 5 for whom a BMI could be calculated.

# Numerators

Patients with BMI in the 85th to 94th percentile.

Patients with a BMI at or above the 95th percentile. (GPRA Numerator)

Patients with a BMI at or above the 85th percentile.

# **Logic Description**

*BMI calculation definition:* All patients for whom a BMI could be calculated and who are between the ages of 2 and 5 at the beginning of the Report Period and who do not turn age 6 during the Report Period are included in this measure. Age in the age groups is calculated based on the date of the most current BMI found. For example, a patient may be 2 years of age at the beginning of the time period, but is 3 years old at the time of the most current BMI found. That patient will fall into the age 3 group. CRS looks for the most recent BMI in the Report Period. CRS calculates BMI at the time the report is run using NHANES II. A height and weight must be taken on the same day any time during the Report Period. The BMI values for this measure are reported differently than in Obesity Assessment since this age group is children ages 2 through 5, whose BMI values are age-dependent. The BMI values are categorized as Overweight for patients with a BMI in the 85th to 94th percentile and Obese for patients with a BMI at or above the 95th percentile.

Patients whose BMI either is greater or less than the Data Check Limit range shown below will not be included in the report counts for Overweight or Obese.

Low-High Ages	Sex	BMI >= (OVERWT)	BMI >= (OBESE)		Data Check Limits BMI <
2-2	MALE	17.7	18.7	36.8	7.2
2-2	FEMALE	17.5	18.6	37.0	7.1
3-3	MALE	17.1	18.0	35.6	7.1
3-3	FEMALE	17.0	18.1	35.4	6.8
4-4	MALE	16.8	17.8	36.2	7.0
4-4	FEMALE	16.7	18.1	36.0	6.9
5-5	MALE	16.9	18.1	36.0	6.9
5-5	FEMALE	16.9	18.5	39.2	6.8

# BMI Standard Reference Data

# Key Logic Changes from CRS Version 17.0

None.

# 2.8.3 Weight Assessment and Counseling for Nutrition and Physical Activity

### Denominators

Active Clinical patients ages 3 and older. Broken down by gender and age groups (3 through 11, 12 through 17, 18 and older).

### Numerators

Patients with comprehensive assessment, defined as having BMI documented, counseling for nutrition, and counseling for physical activity during the Report Period.

Patients with BMI documented during the Report Period.

Patients with counseling for nutrition during the Report Period.

Patients with counseling for physical activity during the Report Period.

# Logic Description

Age is calculated at the end of the Report Period.

CRS uses any of the following codes to define the numerators.

Subject Defined	CPT Codes	ICD and Other Codes
BMI Documented		<b>BMI</b> : CRS calculates BMI at the time the report is run, using NHANES II. For age 18 and under, a height and weight must be taken on the same day any time during the Report Period. For 19 through 50, height and weight must be recorded within last 5 years, not required to be on the same day. For over 50, height and weight within last 2 years, not required to be recorded on same day. <b>POV</b> : ICD-9: V85*; ICD-10: Z68.20-Z68.54
Counseling for Nutrition	97802-97804, G0270, G0271, G0447, S9449, S9452, S9470	POV: ICD-9: V65.3; ICD-10: Z71.3 Patient education codes: ending "-N" (nutrition), "-MNT" (medical nutrition therapy), (or old code "-DT" (diet)) or containing V65.3, 97802-97804, G0270, G0271, G0447, S9449, S9452, or S9470.

Subject Defined	CPT Codes	ICD and Other Codes
Counseling for Physical Activity	,	<b>POV</b> : ICD-9: V65.41 <b>Patient education codes</b> : ending "-EX" (exercise) or containing V65.41, G0447, or S9451.

# Key Logic Changes from CRS Version 17.0

None.

### **Patient List Description**

List of patients ages 3 and older with assessments, if any.

# 2.8.4 Nutrition and Exercise Education for At Risk Patients

#### **Denominators**

*Active Clinical patients* ages 6 and older considered overweight (including obese). Broken down by gender.

a. Active Clinical patients ages 6 and older *considered obese*. Broken down by gender and age groups (6 through 11, 12 through 19, 20 through 39, 40 through 59, 60 years and older).

Active Diabetic patients, defined as Active Clinical patients diagnosed with diabetes at least 1 year prior to the end of the Report Period, and at least two visits in the past year, and two diabetes-related visits ever.

#### Numerators

Patients provided with medical nutrition therapy during the Report Period.

Patients provided specific nutrition education during the Report Period.

Patients provided specific exercise education during the Report Period.

Patients provided with other related exercise and nutrition (lifestyle) education.

# Logic Description

Age of the patient is calculated at beginning of Report Period.

*Diabetes:* First DM Purpose of Visit ICD-9: 250.00 through 250.93 or ICD-10: E10.\* through E13.\* recorded in the V POV file prior to the Report period.

*Overweight*: Ages 19 and older, BMI greater than or equal to (>=) 25. Overweight is defined as including both obese and overweight categories calculated by BMI.

*Obese:* Ages 19 and older, BMI greater than or equal to (>=) 30. For ages 18 and under, the definition is based on standard tables. CRS calculates BMI at the time the report is run, using NHANES II. For 18 and under, a height and weight must be taken on the same day any time in the year prior to the end of the Report Period. For 19 through 50, height and weight must be recorded within last 5 years, not required to be on the same day. For over 50, height and weight within last 2 years; not required to be recorded on same day.

CRS uses any of the following codes to define the numerators.

Subject Defined	CPT Codes	ICD and Other Codes
Medical nutrition therapy	97802-97804, G0270, G0271	Primary or secondary provider codes: 07, 29 Clinic codes: 67 (dietary) or 36 (WIC)
Nutrition education		POV: ICD-9: V65.3 dietary surveillance and counseling; ICD-10: Z71.3 Patient education codes: ending "- N" (nutrition), "-MNT" (medical nutrition therapy), (or old code "-DT" (diet)) or containing V65.3, 97802- 97804, G0270, or G0271.
Exercise education		POV: ICD-9: V65.41 exercise counseling Patient education codes: ending "- EX" (exercise) or containing V65.41.
Related exercise and nutrition education	S9449, S9451, S9452, S9470	Patient education codes: ending "- LA" (lifestyle adaptation) or containing "OBS-" (obesity) or 278.00 or 278.01, S9449, S9451, S9452, S9470, or SNOMED codes 111036000, 162863004, 162863004, 162864005, 162864005, 170798000, 190965006, 190966007, 238131007, 238132000, 238133005, 238134004, 238136002, 248311001, 248312008, 270486005, 275947003, 276792008, 290439001, 292464007, 293481008, 294493008, 295509007, 296526005, 297500005, 298464002, 360566006, 363247006, 408512008, 413487000, 414438005, 414916001, 414917005, 414918000, 414919008, 414920002, 415530009, 444862003, 444862003, 44772007, 450451007, 48499001, 5036006, 53146006, 62999006, 703316004, 705131003, 80660001, 82793005.

# 2.8.5 Physical Activity Assessment

#### **Denominators**

*Active Clinical patients* ages 5 and older. Broken down by gender and age groups (5 through 11, 12 through 19, 20 through 24, 25 through 34, 35 through 44, 45 through 54, 55 through 74, 75 and older).

Numerator 1 (Active Clinical Patients assessed for physical activity during the Report Period). Broken down by gender and age groups (5 through 11, 12 through 19, 20 through 24, 25 through 34, 35 through 44, 45 through 54, 55 through 74, 75 and older).

User Population patients ages 5 and older. Broken down by gender.

Numerator 1 (User Population Patients assessed for physical activity during the Report Period). Broken down by gender.

#### **Numerators**

Patients assessed for physical activity during the Report Period.

Patients from Numerator 1 who have received exercise education following their physical activity assessment.

Patients from Numerator 1 who have set at least one exercise goal following their physical activity assessment.

# Logic Description

Age of the patient is calculated at beginning of Report Period.

CRS uses any of the following codes to define the numerators.

Subject Defined	ICD and Other Codes
Physical Activity Assessment	Health Factors: Any health factor for category Activity Level documented during the Report Period.
Exercise education	POV: V65.41 exercise counseling
	Patient education codes: ending "-EX" (exercise) or containing V65.41.
Exercise goal	Patient Goal: Goal Type of "Physical Activity" and Goal Status of "Goal Set"

# Key Logic Changes from CRS Version 17.0

None.

# **Patient List Description**

List of patients with physical activity assessment and any exercise education or goals.

# 2.8.6 Comprehensive Health Screening Denominators

Active Clinical patients ages 2 and older.

Active Clinical patients ages 12 through 75.

Active Clinical patients ages 18 and older.

Female Active Clinical patients ages 14 through 46.

Active Clinical patients ages 5 and older.

Active Clinical patients ages 2 through 74.

Active Clinical patients ages 20 and older.

Active Clinical patients ages 5 and older.

#### Numerators

ALL Comprehensive Health Screening: Patients with Comprehensive Health Screening for which they are eligible, defined as having alcohol, depression, and Intimate Partner Violence/Domestic Violence (IPV/DV) screening, BMI calculated, and tobacco use, blood pressure, and physical activity assessed.

Note: This does *not* include refusals.

Comprehensive Health Screening: Patients with Comprehensive Health Screening minus physical activity assessment for which they are eligible, defined as having alcohol, depression, and IPV/DV screening, BMI calculated, and tobacco use and blood pressure assessed.

**Note:** This does *not* include physical activity assessment and does *not* include refusals.

Alcohol Screening: Patients screened for alcohol use or had an alcohol-related diagnosis or procedure during the Report Period.

**Note:** This numerator does *not* include refusals or alcohol-related patient education.

Depression Screening: Patients screened for depression or diagnosed with a mood disorder at any time during the Report Period.

Note: This numerator does *not* include refusals.

IPV/DV Screening: Patients screened for IPV/DV at any time during the Report Period.

Note: This numerator does not include refusals.

Tobacco Use Assessed: Patients who have been screened for tobacco use during the Report Period.

BMI Available: Patients for whom a BMI could be calculated.

Note: This numerator does *not* include refusals.

BP Assessed: Patients with blood pressure value documented at least twice in prior two years.

Physical Activity Assessed: Patients assessed for physical activity during the Report Period.

## **Logic Description**

Age of the patient is calculated at beginning of Report Period.

*Alcohol screening definition:* Any of the following during the Report Period: (a) Alcohol Screening Exam, any CAGE Health Factor, or Screening Diagnosis; (b) Alcohol-related diagnosis in POV, Current PCC or BHS Problem List; (c) Alcohol-related procedure; or (d) Patient education.

Subject Defined	ICD and Other Codes
Alcohol Screening	Exam Code: 35
	<b>CPT code:</b> 99408, 99409, G0396, G0397, H0049, H0050, 3016F
	Any CAGE Health Factor
	<b>POV:</b> ICD-9: V11.3 (history of alcoholism), V79.1 (screening for
	alcoholism)
	BHS Problem Code: 29.1 (Screening for Alcoholism)
	Measurement in PCC or BHS: AUDT, AUDC, or CRFT
Alcohol-related	POV, Current PCC or BHS Problem List: ICD-9: 303.*, 305.0*,
Diagnosis	291.*, 357.5*; ICD-10: F10.1*, F10.20, F10.220-F10.29, F10.920-
	F10.982, F10.99, G62.1; SNOMED data set PXRM BGP ETOH
	RELATED DX (Problem List only)
	BHS POV: 10, 27, 29
Alcohol-related	Procedure: ICD-9: 94.46, 94.53, 94.61-94.63, 94.67-94.69
Procedure	

Alcohol screening may be documented with either an exam code or the CAGE health factor in PCC or BHS. BHS problem codes can also currently be used.

*Depression screening definition:* CRS uses the following codes to define the numerator.

Subject Defined	ICD and Other Codes
Depression Screening	Exam: Exam Code 36
	<b>POV:</b> ICD-9: V79.0
	<b>CPT:</b> 1220F, 3725F, G0444
	BHS Problem Code: 14.1 (Screening for Depression)
	Measurement in PCC or BHS: PHQ2 or PHQ9
Mood Disorders	At least two visits in PCC or BHS for: Major Depressive Disorder, Dysthymic Disorder, Depressive Disorder NOS, Bipolar I or II Disorder, Cyclothymic Disorder, Bipolar Disorder NOS, Mood Disorder Due to a General Medical Condition, Substance- induced Mood Disorder, or Mood Disorder NOS. <b>POV:</b> ICD-9: 296.*, 291.89, 292.84, 293.83, 300.4, 301.13, 311; ICD-10: F06.31-F06.34, F1*.*4, F10.159, F10.180, F10.181, F10.188, F10.259, F10.280, F10.281, F10.288, F10.959, F10.980, F10.981, F10.988, F30.*, F31.0-F31.71, F31.73, F31.75, F31.77, F31.81-F31.9, F32.*-F39 <b>BHS POV:</b> 14, 15

IPV/DV screening definition: CRS uses the following codes to define the numerator.

Subject Defined	ICD and Other Codes
IPV/DV Screening	Exam: Code 34 BHS Exam: IPV/DV
IPV/DV Diagnosis	POV or current PCC or BHS Problem List: ICD-9: 995.80- 995.83, 995.85, V15.41, V15.42, V15.49; ICD-10: T74.11XA, T74.21XA, T74.31XA, T74.91XA, T76.11XA, T76.21XA, T76.31XA, T76.91XA, Z91.410; SNOMED data set PXRM BGP IPV DV DX (Problem List only) BHS POV: 43.*, 44.*

IPV/DV Counseling	POV: ICD-9: V61.11; ICD-10: Z69.11

Tobacco screening definition: CRS uses the following codes to define the numerator.

Subject Defined	CPT Codes	ICD and Other Codes
Screened for Tobacco Use	D1320, 99406, 99407, G0375 (old code), G0376 (old code), G8455- G8457 (old codes), G8402 (old code), G8453 (old code), G9275, G9276, 1034F (Current Tobacco Smoker), 1035F (Current Smokeless Tobacco User), 1036F (Current Tobacco Non-User), 1000F (Tobacco Use Assessed)	POV or Problem List entry where the status is not Inactive or Deleted: ICD-9: 305.1, 305.1* (old codes), 649.00-649.04, V15.82; ICD-10: F17.2*, O99.33*, Z72.0, Z87.891; SNOMED data set PXRM BGP TOBACCO SCREENED (Problem List only) Patient Education codes: Containing "TO-", "-TO", "-SHS", 305.1, 305.1* (old codes), 649.00- 649.04, V15.82, D1320, 99406, 99407, G0375 (old code), G0376 (old code), 1034F, 1035F, 1036F, 1000F, G8455- G8457 (old codes), G8402 (old code), G8453 (old code), G9275, G9276, or SNOMED codes 160603005, 160604004, 160605003, 160604004, 160605003, 191887008, 191888003, 191887008, 191888003, 191889006, 228494002, 228504007, 228514003, 228515002, 228516001, 230059006, 230060001, 230062009, 230063004, 230064005, 230065006, 266920004, 428041000124106, 428061000124105, 428071000124103, 449868002, 59978006, 65568007, 77176002, 81703003, 82302008, 89765005 Dental code: 1320 Health Factor categories: Tobacco, TOBACCO (SMOKING), TOBACCO (SMOKING), TOBACCO (SMOKELESS – CHEWING/DIP), or TOBACCO (EXPOSURE)

*BMI calculation definition:* CRS calculates BMI at the time the report is run, using NHANES II. For 18 and under, a height and weight must be taken on the same day any time during the report period. For 19 through 50, height and weight must be recorded within last 5 years, not required to be on the same day. For over 50, height and weight within last 2 years, not required to be recorded on same day.

*Blood pressure definition:* Exclusions: When calculating all BPs (using vital measurements or CPT codes), the following visits will be excluded: 1) Service Category H (Hospitalization), I (In Hospital), S (Day Surgery), or O (Observation); 2) Clinic code 23 (Surgical), 30 (ER), 44 (Day Surgery), 79 (Triage), C1 (Neurosurgery), or D4 (Anesthesiology).

CRS uses mean of last 3 Blood Pressures documented in the past 2 years. If 3 BPs are not available, use the mean of last 2 BPs. If a visit contains more than one BP, the lowest BP will be used, defined as having the lowest systolic value. The mean Systolic value is calculated by adding the last 3 (or 2) systolic values and dividing by 3 (or 2). The mean Diastolic value is calculated by adding the diastolic values from the last 3 (or 2) blood pressures and dividing by 3 (or 2). If the systolic and diastolic values do not *both* meet the current category, then the value that is least controlled determines the category.

If CRS is not able to calculate a mean BP, it will search for CPT 0001F, 2000F, 3074F through 3080F, G9273, G9274 or POV ICD-9: V81.1 documented during the Report Period.

*Physical Activity Assessment definition:* CRS uses the following codes to define the numerator.

Subject Defined	ICD and Other Codes
5	<b>Health Factors</b> : Any health factor for category Activity Level documented during the Report Period.

#### Key Logic Changes from CRS Version 17.0

1. Added Clinic Code 79 (Triage) to BP exclusions.

#### Patient List Description

List of patients with assessments received, if any.

Figure 2-78: Sample Patient List, Comprehensive Health Screening

# 2.8.7 Cardiovascular Disease and Blood Pressure Control Denominators

Active Clinical patients ages 18 and older. Broken down by gender.

User Population patients ages 18 and older. Broken down by gender.

Active CHD patients, defined as Active Clinical patients diagnosed with coronary heart disease (CHD) prior to the Report Period, *and* at least two visits during the Report Period, *and* two CHD-related visits ever. Broken down by gender.

#### **Numerators**

Patients with blood pressure value documented during the Report Period.

#### **Logic Description**

Age of the patient is calculated at beginning of the Report Period.

CRS uses the following codes to define the CHD denominator.

Subject Defined	ICD and Other Codes
Coronary Heart Disease	Any of the following: <b>1) POV:</b> ICD-9: 410.0–413.*, 414.0–414.9, 429.2; ICD- 10: I20.0-I22.8, I24.0-I25.83, I25.89, I25.9, Z95.5
	2) One or more CABG or PCI procedures
CABG	POV: ICD-9: V45.81; ICD-10: Z95.1 CPT: 33510-33514, 33516-33519, 33521-33523, 33530, 33533-33536, 33572, 35500, 35600, S2205-S2209 Procedure: ICD-9: 36.1*, 36.2*; ICD-10: 02100**, 021049*, 02104A*, 02104J*, 02104K*, 02104Z*, 02110**, 021149*, 02114A*, 02114J*, 02114K*, 02114Z*, 02120**, 021249*, 02124A*, 02124J*, 02124K*, 02124Z*, 02130**, 021349*, 02134A*, 02134J*, 02134K*, 02134Z*
PCI	POV: ICD-9: V45.82; ICD-10: Z95.5, Z98.61 CPT: 92920, 92924, 92928, 92933, 92937, 92941, 92943, 92980 (old code), 92982 (old code), 92995 (old code), G0290, C9600, C9602, C9604, C9606, C9607 Procedure: ICD-9: 00.66, 36.01 (old code), 36.02 (old code), 36.05, (old code), 36.06-36.07; ICD-10: 02703**, 02704**, 02713**, 02714**, 02723**, 02724**, 02733**, 02734**

*Exclusions:* When calculating all BPs (using vital measurements or CPT codes), the following visits will be excluded: 1) Service Category H (Hospitalization), I (In Hospital), S (Day Surgery), or O (Observation); 2) Clinic code 23 (Surgical), 30 (ER), 44 (Day Surgery), 79 (Triage), C1 (Neurosurgery), or D4 (Anesthesiology).

*Blood pressure definition:* CRS uses mean of last 3 Blood Pressures documented during the Report Period. If 3 BPs are not available, uses mean of last 2 BPs, or one BP if there is only one documented. If a visit contains more than one BP, the lowest BP will be used, defined as having the lowest systolic value. The mean Systolic value is calculated by adding the last 3 (or 2) systolic values and dividing by 3 (or 2). The mean Diastolic value is calculated by adding the diastolic values from the last 3 (or 2) blood pressures and dividing by 3 (or 2). If the systolic and diastolic values do not *both* meet the current category, then the value that is least controlled determines the category.

For the BP documented numerator only, if CRS is not able to calculate a mean BP, it will search for CPT 0001F, 2000F, 3074F through 3080F, G9273, G9274 or POV ICD-9: V81.1 documented during the Report Period.

# Key Logic Changes from CRS Version 17.0

1. Added Clinic Code 79 (Triage) to BP exclusions.

Figure 2-80: Sample Patient List, CVD and Blood Pressure Control

# 2.8.8 Controlling High Blood Pressure (Million Hearts) GPRA Measure Description

During GPRA Year 2017, achieve the target rate of 59.7% for the proportion of patients with BP less than (<) 140/90.

#### Denominator

User Population patients ages 18 through 85 diagnosed with hypertension and no documented history of ESRD or current diagnosis of pregnancy. Broken down by age groups 18 through 59 and 60 through 85 (Million Hearts (NQF 0018)).

# Numerators

Patients with blood pressure less than (<) 140/90, i.e., the systolic value is less than (<) 140 AND the diastolic value is less than (<) 90 (Million Hearts (NQF 0018)).

Patients with blood pressure less than (<) 150/90 (i.e., the systolic value is less than (<) 150 AND the diastolic value is less than (<) 90).

## **Logic Description**

Age of the patient is calculated at the end of the Report Period.

*Exclusions:* When calculating all BPs (using vital measurements or CPT codes), the following visits will be excluded: 1) Service Category H (Hospitalization), I (In Hospital), S (Day Surgery), or O (Observation); 2) Clinic code 23 (Surgical), 30 (ER), 44 (Day Surgery), 79 (Triage), C1 (Neurosurgery), or D4 (Anesthesiology).

CRS uses the last blood pressure documented during the Report Period. If a patient has more than one blood pressure documented on the same day, CRS will first look for a blood pressure less than (<) 140/90 on that day, and if not found, will look for a blood pressure less than (<) 150/90.

Subject Defined	CPT Codes	ICD and Other Codes
ESRD	36145 (old code), 36147, 36800, 36810, 36815, 36818, 36819, 36820, 36821, 36831 through 36833, 50300, 50320, 50340, 50360, 50365, 50370, 50380, 90951 through 90970 or old codes 90918-90925, 90935, 90937, 90939 (old code), 90940, 90945, 90947, 90989, 90993, 90997, 90999, 99512, 3066F, G0257, G0308- G0327 (old codes), G0392 (old code), G0393 (old code), G9231, S2065, or S9339	Diagnosis (POV or Problem List entry where the status is not Deleted): ICD-9: 585.6, V42.0, V45.1, (old code), V45.11, V45.12, V56.*; ICD-10: I12.0, I13.11, I13.2, N18.5, N18.6, N19., Z48.22, Z49.*, Z91.15, Z94.0, Z99.2; SNOMED data set PXRM END STAGE RENAL DISEASE (Problem List only) Procedure: ICD-9: 38.95, 39.27, 39.42, 39.43, 39.53, 39.93-39.95, 54.98, 55.6*

CRS uses the following codes to define ESRD, hypertension, and pregnancy.

Subject Defined	CPT Codes	ICD and Other Codes
Hypertension		POV or Problem List entry where the status is not Inactive or Deleted ever through the first 6 months of the Report Period, and at least one hypertension POV during Report Period: ICD-9: 401.*; ICD-10: I10; SNOMED data set PXRM ESSENTIAL HYPERTENSION (Problem List only)
Pregnancy - Any of the following: 1) The Currently Pregnant field in Reproductive Factors file set to "Yes" during the Report Period, or 2) At least two visits during the Report Period, where the primary provider is not a CHR (Provider code 53) with any of the following codes. Pharmacy-only visits (clinic code 39) will not count toward these two visits. If the patient has more than two pregnancy-related visits during the Report Period, CRS will use the first two visits in the Report Period. The patient must not have a documented miscarriage or abortion occurring after the second pregnancy-related visit or the date the Currently Pregnant field was set to "Yes".	<b>CPT</b> : 59000-59076, 59300, 59320, 59400- 59426, 59510, 59514, 59610, 59612, 59618, 59620, 76801-76828	POV or Problem diagnosis:. # 2.8.9 Statin Therapy for the Prevention and Treatment of Cardiovascular Disease

#### **GPRA Measure Description**

During GPRA Year 2017, establish a baseline for the proportion of at-risk patients who receive statin therapy.

#### Denominators

*User Population patients* ages 40 through 75 with diabetes or age 21 and older with documented CVD or an LDL greater than or equal to (>=) 190. Broken down by age groups 21 through 39, 40 through 75, 76 and older. (GPRAMA Denominator)

User Population patients ages 40 through 75 with diabetes.

*User Population patients* ages 40 through 75 with diabetes or age 21 and older with documented CVD or an LDL greater than or equal to (>=) 190, including denominator exclusions.

# Numerators

Patients who are statin therapy users during the Report Period or who receive an order (prescription) to receive statin therapy at any point during the Report Period. (GPRAMA Numerator)

Patients with any of the listed denominator exclusions.

a. Patients with documented allergy, intolerance, or other adverse effect to statin medication.

## Logic Description

Age is calculated at the beginning of the Report Period.

#### Denominator Logic

*Diabetes definition*: First DM POV ICD-9: 250.00 through 250.93 or ICD-10: E10.\* through E13.\* recorded in the V POV file.

Cardiovascular Disease (CVD) diagnosis defined as any of the following:

Subject Defined	ICD and Other Codes
Coronary Heart Disease (CHD)	Diagnosis (POV or Problem List entry where the status is not Inactive or Deleted): ICD-9: 410.0-413.*, 414.0-414.9, 429.2; ICD-10: I20.0-I22.8, I24.0-I25.83, I25.89, I25.9, Z95.5; SNOMED data set PXRM ISCHEMIC HEART DISEASE (Problem List only)
Acute Myocardial Infarction (AMI)	Diagnosis (POV or Problem List entry where the status is not Inactive or Deleted): ICD-9: 410.0*-410.9*, 412; ICD-10: I21.*, I22.*, I23.*, I25.2; SNOMED data set PXRM BGP AMI (Problem List only)
Ischemic Vascular Disease (IVD)	Diagnosis (POV or Problem List entry where the status is not Inactive or Deleted): ICD-9: 411.*, 413.*, 414.0*, 414.2, 414.8, 414.9, 429.2, 433.*-434.*, 440.1, 440.2*, 440.4, 444.*, 445.*; ICD-10: I20.*, I24.*, I25.1*, I25.5-I25.812, I65.*, I66.*, I70.1, I70.201-I70.299, I70.92, I74.*, I75.*; SNOMED data set PXRM BGP IVD (Problem List only)
Ischemic Stroke or Transient Ischemic Attack (TIA)	Diagnosis (POV or Problem List entry where the status is not Inactive or Deleted): ICD-9: 433.01, 433.11, 433.21, 433.31, 433.81, 433.91, 434.01, 434.11, 434.91, 435.0, 435.1, 435.2, 435.3, 435.8, 435.9; ICD-10: G45.0-G45.2, G45.8, G45.9, G46.0-G46.2, I63.*; SNOMED data set PXRM BGP ISCHEMIC STROKE TIA (Problem List only)
CABG	POV: ICD-9: V45.81; ICD-10: Z95.1 CPT: 33510-33514, 33516-33519, 33521-33523, 33530, 33533-33536, 33572, 35500, 35600, S2205-S2209 Procedure: ICD-9: 36.1*, 36.2*; ICD-10: 02100**, 021049*, 02104A*, 02104J*, 02104K*, 02104Z*, 02110**, 021149*, 02114A*, 02114J*, 02114K*, 02114Z*, 02120**, 021249*, 02124A*, 02124J*, 02124K*, 02124Z*, 02130**, 021349*, 02134A*, 02134J*, 02134K*, 02134Z*
PCI	<b>POV:</b> ICD-9: V45.82; ICD-10: Z95.5, Z98.61 <b>CPT:</b> 92920, 92924, 92928, 92933, 92937, 92941, 92943, 92980 (old code), 92982 (old code), 92995 (old code), G0290, C9600, C9602, C9604, C9606, C9607 <b>Procedure:</b> ICD-9: 00.66, 36.01 (old code), 36.02 (old code), 36.05 (old code), 36.06-36.07; ICD-10: 02703**, 02704**, 02713**, 02714**, 02723**, 02724**, 02733**, 02734**
Other Revascularization	<b>CPT:</b> 37220, 37221, 37224-37231

CRS uses the following to define the tests:

Subject Defined	LOINC Codes	Taxonomy
LDL Done	Yes	DM AUDIT LDL CHOLESTEROL TAX
LDL greater than or equal to (=>) 190		Tests in above taxonomy with LDL greater than or equal to (=>) 190
LDL less than (<) 70		Tests in above taxonomy with LDL less than (<) 70

In the LOINC Codes column, specific LOINC codes used by CRS are located in the *CRS Technical Manual*.

#### Denominator Exclusions

Patients meeting any of the following conditions will be excluded from the denominator.

- 1. Patients with documented allergy, intolerance, or other adverse effect to statin medication.
- 2. Patients who have an active diagnosis of pregnancy or who are breastfeeding.
- 3. Patients with a diagnosis of cirrhosis of the liver during the Report Period or the year prior to the Report Period.
- 4. Patients who are receiving palliative care during the Report Period.
- 5. Patients with end-stage renal disease (ESRD).
- 6. Patients with diabetes whose most recent LDL result is less than (<) 70 and who have never had an LDL result greater than or equal to (>=) 190 and who are not taking statin therapy.

CRS uses the following codes to define contraindications to statins.

Contraindication to Statins (any of the codes occurring ever unless otherwise noted)	CPT Codes	ICD and Other Codes
Pregnancy		See below for definition
Breastfeeding		See below for definition

Contraindication to Statins (any of the codes occurring ever unless otherwise noted)	CPT Codes	ICD and Other Codes
Acute Alcoholic Hepatitis		POV or Problem List entry where the status is not Inactive or Deleted during the Report Period: ICD-9: 571.1; ICD-10: K70.10, K70.11; SNOMED data set PXRM BGP ACUTE ETOH HEPATITIS (Problem List only)
NMI Refusal		<b>Refusal:</b> NMI refusal for any statin at least once during the Report Period

CRS uses the following codes to define adverse drug reactions/documented allergies to statins.

# Adverse Drug Reaction/Allergy to Statins

ICD and Other Codes
Site-Populated Lab Taxonomy or LOINC Taxonomy: DM AUDIT ALT TAX, with ALT and/or AST greater than (>) 3x the Upper Limit of Normal (ULN) (i.e., Reference High) on 2 or more consecutive visits during the Report Period
Site-Populated Lab Taxonomy or LOINC Taxonomy: BGP CREATINE KINASE TAX, with Creatine Kinase (CK) levels greater than (>) 10x ULN or CK greater than (>) 10,000 IU/L during the Report Period
Myopathy/Myalgia, defined as any of the following during the Report Period: <b>POV or Problem List entry</b> <b>where the status is not Inactive or Deleted:</b> ICD-9: 359.0-359.9, 729.1, 710.5, 074.1; ICD-10: G71.14, G71.19, G72.0, G72.2, G72.89, G72.9, M35.8, M60.80- M60.9, M79.1; SNOMED data set PXRM BGP MYOPATHY MYALGIA (Problem List only)
Any of the following occurring anytime ever: POV: ICD-9: 995.0-995.3 AND E942.9
Entry in ART (Patient Allergies File): "statin" or "statins"
Entry in Problem List (where status is not Deleted) or in Provider Narrative for any POV ICD-9: 995.0- 995.3, V14.8; ICD-10: Z88.8: "Statin" or "Statins" Problem List entry where the status is not Deleted:
SNOMED data set PXRM BGP ADR STATIN

	ed ICD and CPT Codes
Pregnancy	Any of the following: 1) The Currently Pregnant field in Reproductive Factors file set to "Yes" during the Report Period, or 2) At least two visits during the Report Period, where the primary provider is not a CHR (Provider code 53) with: <b>POV or Problem List</b> : ICD-9: 640.*3, 641.*3, 642.*3, 643.*3, 644.*3, 645.*3, 646.*3, 647.*3, 648.*3, 649.*3, 651.*3, 652.*3, 653.*3, 664.*3, 655.*3, 656.*3, 657.*3, 658.*3, 659.*3, 661.*3, 662.*3, 663.*3, 665.*3, 668.*3, 669.*3, 671.*3, 673.*3, 678.*3, 679.*3, V22.0-V23.9, V24.*, V27.*, V28.81, V28.82, V28.89, V72.42, V89.01-V89.09; ICD- 10: O09.00-O10.02, O10.111-O10.12, O10.211-O10.22, O10.311- O10.32, O10.411-O10.42, O10.911-O10.92, O11.1-O15.1, O15.9- O24.02, O24.111-O24.12, O24.311-O24.32, O24.41*, O24.811- O24.82, O24.911-O24.92, O25.10-O25.2, O26.00-O26.62, O26.711- O26.72, O26.811-O26.93, O29.011-O30.93, O31.*-O48.*, O60.0*, O61.*-O66.*, O68, O69.*, O71.00-O71.1, O71.89, O71.9, O74.0- O75.81, O75.89, O75.9, O76-O77.*, O88.011-O88.02, O88.111- 088.12, O88.211-O88.22, O88.311-O88.32, O88.811-O88.82, O90.3, O91.011-O91.019, O91.111-O91.119, O91.211-O91.219, O92.011- O92.019, O92.20, O92.29, O98.011-O98.02, O98.111-O98.12, O98.211-O98.22, O98.311-O98.32, O98.411-O98.42, O98.511- O98.52, O98.611-O98.62, O98.711-O98.72, O98.811-O98.82, O98.911-O98.92, O99.044, O99.310-O99.314, O99.320-O99.324, O99.330-O99.334, O99.340-O99.344, O99.350-O99.354, O99.314. *Cirrhosis of the liver definition*: Diagnosis (POV or Problem List entry where the status is not Deleted) ICD-9: 571.2, 571.5, 571.6; ICD-10: K70.30, K70.31, K71.7, K74.3-K74.5, K74.60, K74.69, P78.81; SNOMED data set PXRM BGP CIRRHOSIS (Problem List only).

Palliative care visit definition: POV ICD-9: V66.7; ICD-10: Z51.5.

*ESRD diagnosis/treatment definition*: Any of the following ever: (A) CPT 36145 (old code), 36147, 36800, 36810, 36815, 36818, 36819, 36820, 36821, 36831 through 36833, 50300, 50320, 50340, 50360, 50365, 50370, 50380, 90951 through 90970 or old codes 90918 through 90925, 90935, 90937, 90939 (old code), 90940, 90945, 90947, 90989, 90993, 90997, 90999, 99512, 3066F, G0257, G0308 through G0327 (old codes), G0392 (old code), G0393 (old code), G9231, S2065, or S9339; (B) Diagnosis (POV or Problem List entry where the status is not Inactive or Deleted) ICD-9: 585.6, V42.0, V45.1 (old code), V45.11, V45.12, or V56.\*; ICD-10: I12.0, I13.11, I13.2, N18.5, N18.6, N19., Z48.22, Z49.\*, Z91.15, Z94.0, Z99.2; SNOMED data set PXRM END STAGE RENAL DISEASE (Problem List only); (C) Procedure ICD-9: 38.95, 39.27, 39.42, 39.43, 39.53, 39.93 through 39.95, 54.98, or 55.6\*.

# **Numerator Logic**

Statin therapy user definition: CPT 4013F

*Statin medication codes* defined with medication taxonomy BGP PQA STATIN MEDS. Statin medications: Atorvostatin (Lipitor), Fluvastatin (Lescol), Lovastatin (Altocor, Altoprev, Mevacor), Pravastatin (Pravachol), Pitavastatin (Livalo), Simvastatin (Zocor), Rosuvastatin (Crestor).

Statin Combination Products: Niacin-lovastatin, Niacin-simvastatin, Ezetimibesimvastatin, Amlodipine-Atorvastatin, Sitagliptin-simvastatin, Ezetimibe-atorvastatin.

Patients must have an active prescription for statin therapy during the Report Period. This includes patients who receive an order during the Report Period, or prior to the Report Period with enough days supply to take them into the Report Period. Rx Days Supply >= (Report Period Begin Date - Prescription Date)

## Key Logic Changes from CRS Version 17.0

- 1. Changed logic to include prescriptions written prior to the Report Period with enough days' supply to overlap the Report Period.
- 2. Added ICD-10 codes I12.0, I13.11, I13.2, N18.5, N19. to ESRD definition.

#### Patient List Description

List of patients 40 through 75 with diabetes or 21 and older with CVD or LDL greater than or equal to (>=) 190 with statin therapy or exclusion, if any.

#### Measure Source

HHS Statin Therapy eMeasure

CRS Clinical Performance Measure Logic Manual for FY 2017 Clinical Measures June 2017

# 2.8.10 Appropriate Medication Therapy after a Heart Attack Denominator

Active Clinical patients aged 35 and older discharged for an AMI during the first 51 weeks of the Report Period and were not readmitted for any diagnosis within 7 days of discharge. Broken down by gender.

#### Numerators

Patients with active prescription for or who have a contraindication/previous adverse reaction to *beta-blockers*.

Note: This numerator does *not* include refusals.

Patients with active prescription for or who have a contraindication/previous adverse reaction to ASA (aspirin) or other anti-platelet agent.

Note: This numerator does *not* include refusals.

Patients with active prescription for or who have a contraindication/ previous adverse reaction to *ACEIs/ARBs*.

Note: This numerator does *not* include refusals.

Patients with active prescription for or who have a contraindication/ previous adverse reaction to *statins*.

**Note**: This numerator does *not* include refusals.

Also included for the numerators above are sub-numerators:

- a. Patients with active prescription for the specified medication
- b. Patients with contraindication/previous adverse reaction to the specified medication

Patients with active prescriptions for *all post-AMI medications* (i.e., beta-blocker, ASA/anti-platelet, ACEI/ARB, and statin), and/or who have a contraindication/previous adverse reaction.

Note: This numerator does *not* include refusals.

#### Logic Description

Age is calculated at the beginning of the Report Period.

*Acute Myocardial Infarction (AMI) definition:* POV ICD-9: 410.0\*-410.9\*, 412; ICD-10: I21.\*, I22.\*, I23.\*, I25.2 with Service Category H. If patient has more than one episode of AMI during the first 51 weeks of the Report Period, CRS will include only the first discharge.

#### Denominator Exclusions

Patients meeting any of the following conditions will be excluded from the denominator.

- 1. Patients with Discharge Type of Irregular (AMA), Transferred, or contains "Death."
- 2. Patients readmitted for any diagnosis within 7 days of discharge.
- 3. Patients with a Diagnosis Modifier of C (Consider), D (Doubtful), M (Maybe, Possible, Perhaps), O (Rule Out), P (Probable), R (Resolved), S (Suspect, Suspicious), or T (Status Post).
- Patients with a Provider Narrative beginning with "Consider"; "Doubtful"; "Maybe"; "Possible"; "Perhaps"; "Rule Out"; "R/O"; "Probable"; "Resolved"; "Suspect"; "Suspicious"; or "Status Post."

Numerator Logic

In the logic below, "ever" is defined as anytime through the end of the Report Period.

To be included in the numerators, a patient must meet one of the two conditions below:

- An active prescription (not discontinued as of [discharge date plus (+) 7 days] and does not have a comment of RETURNED TO STOCK) that was prescribed prior to admission, during the inpatient stay, or within 7 days after discharge. "Active" prescription defined as: Days Prescribed greater than (>) ((Discharge Date plus (+) 7 days) - Order Date); *or*
- 2. Have a contraindication/previous adverse reaction to the indicated medication.

Contraindications/previous adverse drug reactions (ADR)/allergies are only counted if a patient did not have a prescription for the indicated medication. Patients without a prescription who have a contraindication/ADR/allergy will be counted in sub-numerator B.

**Note:** If the medication was started and then discontinued, CRS will recalculate the # Days Prescribed by subtracting the prescription date (i.e., visit date) from the V Medication Discontinued Date. Example: Rx Date=11/15/2017, Discontinued Date=11/19/2017, Recalculated # Days Prescribed=4.

## **Beta-Blocker Numerator Logic**

*Beta-blocker medication codes* defined with medication taxonomy BGP PQA BETA BLOCKER MEDS. (Medications are: Noncardioselective Beta Blockers: Carvedilol, Labetalol, Nadolol, Penbutolol, Pindolol, Propranolol, Timolol, Sotalol; Cardioselective Beta Blockers: Acebutolol, Atenolol, Betaxolol, Bisoprolol, Metoprolol, Nebivolol; and Antihypertensive Combinations: Atenolol-chlorthalidone, Bendroflumethiazide-nadolol, Bisoprololhydrochlorothiazide, Hydrochlorothiazide-metoprolol, and Hydrochlorothiazidepropranolol.)

Contraindication to Beta- Blockers (any of the codes occurring ever unless otherwise noted)	CPT Codes	ICD and Other Codes
Asthma		<b>POV:</b> 2 diagnoses of ICD-9: 493*; ICD-10: J45.* on different visit dates
Hypotension		POV or Problem List entry where the status is not Deleted: 1 diagnosis of ICD- 9: 458*; ICD-10: I95.*; SNOMED data set PXRM BGP HYPOTENSION (Problem List only)
Heart Block greater than (>)1 Degree		POV or Problem List entry where the status is not Deleted: 1 diagnosis of ICD- 9: 426.0, 426.12, 426.13, 426.2, 426.3, 426.4, 426.51, 426.52, 426.53, 426.54, 426.7; ICD-10: I44.1, I44.2, I45.2, I45.3, I45.6; SNOMED data set PXRM BGP OVER 1 DEG HEART BLK (Problem List only)
Sinus Bradycardia		POV or Problem List entry where the status is not Deleted: 1 diagnosis of ICD- 9: 427.81; ICD-10: I49.5, R00.1; SNOMED data set PXRM BGP SINUS BRADYCARDIA (Problem List only)

CRS uses the following codes to define contraindications to beta-blockers.

Contraindication to Beta- Blockers (any of the codes occurring ever unless otherwise noted)	CPT Codes	ICD and Other Codes
COPD		<b>POV:</b> 2 diagnoses on different visit dates of ICD-9: 491.2*, 496, 506.4; ICD-10: J44.*, J68.4, J68.8, or a combination of any of these codes, such as 1 visit with 491.20 and 1 with 496
NMI Refusal	G8011 (old code), G9190 (Documentation of medical reason(s) for not prescribing beta- blocker therapy (e.g., allergy, intolerance, other medical reasons)) at least once during hospital stay through 7 days after discharge date	<b>Refusal:</b> NMI (not medically indicated) refusal for any beta-blocker at least once during hospital stay through 7 days after discharge date

CRS uses the following codes to define adverse drug reactions/documented allergies to beta-blockers.

#### Adverse Drug Reaction/Allergy to Beta-Blockers

ICD and Other Codes
POV: ICD-9: 995.0-995.3 AND E942.0
Entry in ART (Patient Allergies File): "beta block*"
Entry in Problem List (where status is not Deleted) or in Provider Narrative for any POV ICD-9: 995.0- 995.3, V14.8; ICD-10: Z88.8: "beta block*", "bblock*" or "b block*"
Problem List entry where the status is not Deleted: SNOMED data set PXRM BGP ADR BETA BLOCKER

# ASA (aspirin)/Other Anti-Platelet Numerator Logic

ASA medication codes defined with medication taxonomy DM AUDIT ASPIRIN DRUGS.

*Other anti-platelet medication codes* defined with medication taxonomy site-populated DM AUDIT ANTI-PLATELET DRUGS taxonomy.

CRS uses the following codes to define contraindications to ASA/other anti-platelets.

Contraindication to ASA/Other Anti-Platelets (any of the codes occurring ever unless otherwise noted)	CPT Codes	ICD and Other Codes
Active prescription for Warfarin/Coumadin at time of arrival or prescribed at discharge		Site-Populated Drug Taxonomy: BGP CMS WARFARIN MEDS
Hemorrhage		POV or Problem List entry where the status is not Deleted: ICD-9: 459.0; ICD-10: R58; SNOMED data set PXRM BGP HEMORRHAGE (Problem List only)
NMI Refusal	G8008 (old code) at least once during hospital stay through 7 days after discharge date	<b>Refusal</b> : NMI (not medically indicated) refusal for any aspirin at least once during hospital stay through 7 days after discharge date

CRS uses the following codes to define adverse drug reactions/documented allergies to ASA/other anti-platelets.

#### Adverse Drug Reaction/Allergy to ASA/Other Anti-Platelets

ICD and Other Codes
<b>POV</b> : ICD-9: 995.0-995.3 AND E935.3; ICD-10: T39.015* or T39.095*
Entry in ART (Patient Allergies File): "aspirin"
Entry in Problem List (where status is not Deleted) or in Provider Narrative for any POV ICD-9: 995.0- 995.3, V14.8; ICD-10: Z88.8: "ASA" or "aspirin"
Problem List entry where the status is not Deleted: SNOMED data set PXRM BGP ADR ASA

# **ACEI/ARB Numerator Logic**

*Ace Inhibitor (ACEI) medication codes* defined with medication taxonomy BGP HEDIS ACEI MEDS. ACEI medications are: Angiotensin Converting Enzyme Inhibitors (Benazepril, Captopril, Enalapril, Fosinopril, Lisinopril, Moexipril, Perindopril, Quinapril, Ramipril, Trandolopril).

Antihypertensive Combinations (Amlodipine-benazepril, Benazeprilhydrochlorothiazide, Captopril-hydrochlorothiazide, Enalapril-hydrochlorothiazide, Fosinopril-hydrochlorothiazide, Hydrochlorothiazide-lisinopril, Hydrochlorothiazidemoexipril, Hydrochlorothiazide-quinapril, Trandolapril-verapamil).

CRS uses the following codes to define contraindications to ACE inhibitors.

Contraindication to ACE Inhibitors (any of the codes occurring ever unless otherwise noted)	ICD and Other Codes
Pregnancy	See below for definition
Breastfeeding	<b>POV:</b> ICD-9: V24.1; ICD-10: Z39.1 during the Report Period
	Patient Education: BF-BC, BF-BP, BF-CS, BF-EQ, BF-FU, BF-HC, BF-ON, BF-M, BF- MK, BF-N or containing SNOMED 169745008, 200430001, 405029003, 406213009, 413711008, 413712001 during the Report Period
Moderate or Severe Aortic Stenosis	POV or Problem List entry where the status is not Deleted: ICD-9: 395.0, 395.2, 396.0, 396.2, 396.8, 424.1, 425.1, 747.22; SNOMED data set PXRM BGP MOD SEV AORTIC STEN (Problem List only)
NMI Refusal	<b>Refusal:</b> NMI (not medically indicated) refusal for any ACE inhibitor at least once during hospital stay through 7 days after discharge date

CRS uses the following codes to define adverse drug reactions/documented allergies to ACE inhibitors.

# Adverse Drug Reaction/ Allergy to ACE Inhibitors

ICD and Other Codes
<b>POV:</b> ICD-9: 995.0-995.3 AND E942.6; ICD-10: T46.4X5*
Entry in ART (Patient Allergies File): "ace inhibitor" or "ACEI"
Entry in Problem List (where status is not Deleted) or in Provider Narrative for any POV ICD-9: 995.0-995.3, V14.8; ICD-10: Z88.8: "ace i*" or "ACEI"
Problem List entry where the status is not Deleted: SNOMED data set PXRM BGP ADR ACEI

*ARB (Angiotensin Receptor Blocker) medication codes* defined with medication taxonomy BGP HEDIS ARB MEDS. ARB medications: Angiotensin II Inhibitors (Azilsartan, Candesartan, Eprosartan, Irbesartan, Losartan, Olmesartan, Telmisartan, Valsartan.)

Antihypertensive Combinations (Aliskiren-valsartan, Amlodipinehydrochlorothiazide-olmesartan, Amlodipine-hydrochlorothiazide-valsartan, Amlodipine-olmesartan, Amlodipine-Telmisartan, Amlodipine-valsartan, Azilsartanchlorthalidone, Candesartan-hydrochlorothiazide, Eprosartan-hydrochlorothiazide, Hydrochlorothiazide-Irbesartan, Hydrochlorothiazide-Losartan, Hydrochlorothiazideolmesartan, Hydrochlorothiazide-Telmisartan, Hydrochlorothiazide-Valsartan).

CRS uses the following codes to define contraindications to ARBs.

Contraindication to ARBs (any of the codes occurring ever unless otherwise noted)	ICD and Other Codes
Pregnancy	See below for definition
Breastfeeding	<b>POV:</b> ICD-9: V24.1; ICD-10: Z39.1 during the Report Period
	Patient Education: BF-BC, BF-BP, BF-CS, BF-EQ, BF-FU, BF-HC, BF-ON, BF-M, BF- MK, BF-N or containing SNOMED 169745008, 200430001, 405029003, 406213009, 413711008, 413712001 during the Report Period
Moderate or Severe Aortic Stenosis	POV or Problem List entry where the status is not Deleted: ICD-9: 395.0, 395.2, 396.0, 396.2, 396.8, 424.1, 425.1, 747.22; SNOMED data set PXRM BGP MOD SEV AORTIC STEN (Problem List only)
NMI Refusal	<b>Refusal:</b> NMI refusal for any ARB at least once during hospital stay through 7 days after discharge date

CRS uses the following codes to define adverse drug reactions/documented allergies to ARBs.

#### Adverse Drug Reaction/Allergy to ARBs

ICD and Other Codes
POV: ICD-9: 995.0-995.3 AND E942.6
Entry in ART (Patient Allergies File): "Angiotensin Receptor Blocker" or "ARB"
Entry in Problem List (where status is not Deleted) or in Provider Narrative for any POV ICD-9: 995.0- 995.3, V14.8; ICD-10: Z88.8: "Angiotensin Receptor Blocker" or "ARB"
<b>Problem List entry where the status is not Deleted:</b> SNOMED data set PXRM BGP ADR ARB

CRS Clinical Performance Measure Logic Manual for FY 2017 Clinical Measures June 2017

## Statins Numerator Logic

*Statin medication codes* defined with medication taxonomy BGP PQA STATIN MEDS. Statin medications: Atorvostatin (Lipitor), Fluvastatin (Lescol), Lovastatin (Altocor, Altoprev, Mevacor), Pravastatin (Pravachol), Pitavastatin (Livalo), Simvastatin (Zocor), Rosuvastatin (Crestor).

Statin Combination Products: Niacin-lovastatin, Niacin-simvastatin, Ezetimibesimvastatin, Amlodipine-Atorvastatin, Sitagliptin-simvastatin, Ezetimibe-atorvastatin.

Contraindication to Statins (any of the codes occurring ever unless otherwise noted)	ICD and Other Codes
Pregnancy	See below for definition
Breastfeeding	<b>POV:</b> ICD-9: V24.1; ICD-10: Z39.1 during the Report Period
	Patient Education: BF-BC, BF-BP, BF-CS, BF-EQ, BF-FU, BF-HC, BF-ON, BF-M, BF- MK, BF-N or containing SNOMED 169745008, 200430001, 405029003, 406213009, 413711008, 413712001 during the Report Period
Acute Alcoholic Hepatitis	POV or Problem List entry where the status is not Deleted during the Report Period: ICD-9: 571.1; ICD-10: K70.10, K70.11; SNOMED data set PXRM BGP ACUTE ETOH HEPATITIS (Problem List only)
NMI Refusal	<b>Refusal:</b> NMI refusal for any statin at least once during hospital stay through 7 days after discharge date

CRS uses the following codes to define contraindications to statins.

CRS uses the following codes to define adverse drug reactions/documented allergies to statins.

#### Adverse Drug Reaction/Allergy to Statins

ICD and Other Codes
<b>Site-Populated Lab Taxonomy or LOINC Taxonomy:</b> DM AUDIT ALT TAX, with ALT and/or AST greater than
(>) 3x the Upper Limit of Normal (ULN) (i.e., Reference High) on 2 or more consecutive visits during the Report Period

CRS Clinical Performance Measure Logic Manual for FY 2017 Clinical Measures June 2017

ICD and Other Cod
-------------------

**Site-Populated Lab Taxonomy or LOINC Taxonomy:** BGP CREATINE KINASE TAX, with Creatine Kinase (CK) levels greater than (>) 10x ULN or CK greater than (>) 10,000 IU/L during the Report Period

**POV or Problem List entry where the status is not Deleted:** Myopathy/Myalgia, defined as any of the following during the Report Period: ICD-9: 359.0-359.9, 729.1, 710.5, 074.1; ICD-10: G71.14, G71.19, G72.0, G72.2, G72.89, G72.9, M35.8, M60.80-M60.9, M79.1; SNOMED data set PXRM BGP MYOPATHY MYALGIA (Problem List only)

POV: ICD-9: 995.0-995.3 AND E942.9

Entry in ART (Patient Allergies File): "statin" or "statins"

Entry in Problem List (where status is not Deleted) or in Provider Narrative for any POV ICD-9: 995.0-995.3, V14.8; ICD-10: Z88.8: "Statin" or "Statins"

Problem List entry where the status is not Deleted: SNOMED data set PXRM BGP ADR STATIN

Subject Defined	ICD and CPT Codes
Subject Defined Pregnancy - Any of the following: 1) The Currently Pregnant field in Reproductive Factors file set to "Yes" during the Report Period, or 2) At least two visits during the Report Period, where the primary provider is not a CHR (Provider code 53) with any of the following codes. Pharmacy-only visits (clinic code 39) will not count toward these two visits. If the patient has more than two pregnancy-related visits during the Report Period, CRS will use the first two visits in the Report Period. The patient must not have a documented miscarriage or abortion occurring after the second pregnancy- related visit or the date the Currently Pregnant field was set to "Yes".	POV or Problem List: ICD-9: 640.*3, 641.*3, 642.*3, 643.*3, 644.*3, 645.*3, 646.*3, 647.*3, 648.*3, 649.*3, 651.*3, 652.*3, 653.*3, 656.*3, 657.*3, 658.*3, 659.*3, 660.*3, 661.*3, 662.*3, 663.*3, 665.*3, 668.*3, 669.*3, 671.*3, 673.*3, 678.*3, 679.*3, V22.0-V23.9, V24.*, V27.*, V28.81, V28.82, V28.89, V72.42, V89.01-V89.09; ICD-10: 009.00-010.02, 010.111-010.12, 010.211-010.22, 010.311-010.32, 010.411-010.42, 010.911-010.92, 011.1-015.1, 015.9-024.02, 024.111-024.12, 024.311-024.32, 024.41*, 024.811-024.82, 024.911-024.92, 025.10-025.2, 026.00-026.62, 026.711-026.72, 026.811-026.93, 029.011-030.93, 031.*-048.*, 060.0*, 061.*-066.*, 068, 069.*, 071.00-071.1, 071.89, 071.9, 074.0-075.81, 075.89, 075.9, 076-077.*, 088.011-088.02, 088.111-088.12, 088.211-088.22, 088.311-088.32, 088.811-088.82, 090.3, 091.011-091.019, 091.111-091.119, 091.211-091.219, 092.011-092.019, 092.20, 092.29, 098.011-098.02, 098.111-098.12, 098.52, 098.611-098.62, 098.711-098.72, 098.811-098.82, 090.3, 091.9, 092.20, 092.29, 098.011-098.02, 098.111-098.12, 098.52, 098.611-098.62, 098.711-098.72, 098.811-098.82, 099.330-099.334, 099.340-099.344, 099.350-099.354, 099.411-099.42, 099.511-099.52, 099.611-099.62, 099.711-099.72, 099.810, 099.814, 099.820, 099.834, 099.830, 099.834, 099.840-099.844, 099.89, 09A.111-09A.12, 09A.211-09A.22, 09A.311-09A.32, 09A.411-09A.42, 09A.511-09A.52, Z03.7*, Z32.01, Z33.1, Z34.*, Z36. # 2.8.11 Stroke and Stroke Rehabilitation: Anticoagulant Therapy Prescribed for Atrial Fibrillation

#### Denominator

*User Population patients* ages 18 and older who have a documented diagnosis of ischemic stroke or transient ischemic attack (TIA) with documented permanent, persistent, or paroxysmal atrial fibrillation any time prior to the end of the Report Period.

## Numerators

Patients who received a prescription for anticoagulant during the Report Period.

# Logic Description

Age of the patient is calculated at the beginning of the Report Period.

CRS uses the following codes to define ischemic stroke or transient ischemic attack with atrial fibrillation.

Subject Defined	ICD and Other Codes
Ischemic Stroke or TIA with Atrial Fibrillation	<b>POV:</b> ICD-9: 433.01, 433.11, 433.21, 433.31, 433.81, 433.91, 434.01, 434.11, 434.91, 435.0, 435.1, 435.2, 435.3, 435.8, 435.9; ICD-10: G45.0-G45.2, G45.8, G45.9, G46.0-G46.2, I63.* AND ICD-9: 427.31; ICD-10: I48.0-I48.2, I48.91 (atrial fibrillation)

*Anticoagulant Therapy*: Patient must receive a prescription for Warfarin, aspirin, or other anti-platelet during the Report Period to be counted as receiving anticoagulant therapy. For all prescriptions, medications must not have a comment of RETURNED TO STOCK.

*Warfarin Medication:* Any medication in site-populated BGP CMS WARFARIN MEDS taxonomy.

*Aspirin Medication:* Any medication in site-populated DM AUDIT ASPIRIN DRUGS taxonomy.

*Other Anti-Platelet/Anticoagulant Medication:* Any medication in the site-populated BGP ANTI-PLATELET DRUGS taxonomy, any medication with VA Drug Class BL700.

# 2.8.12 Heart Failure and Evaluation of LVS Function

## Denominator

Active Clinical patients ages 18 and older discharged with heart failure during the Report Period.

#### Numerators

Patients whose LVS function was evaluated before arrival, during hospitalization, or is planned for after discharge.

# Logic Description

Age of the patient is calculated as of the hospital admission date.

Denominator exclusions are defined as any of the following:

- 1. Patients receiving comfort measures only (i.e., patients who received palliative care and usual interventions were not received because a medical decision was made to limit care).
- 2. Patients with a Discharge Type of Transferred or Irregular or containing "Death."
- 3. Patients who had a left ventricular assistive device (LVAD) or heart transplant procedure during hospitalization.

CRS uses the following codes to define the denominator and numerators.

Denom	inator	Exclu	sions	

-

Subject Defined	CPT Codes	ICD and Other Codes
Comfort Measures		<b>POV</b> : ICD-9: V66.7 (Encounter for palliative care); ICD-10: Z51.5 documented during hospital stay
LVAD/Heart Transplant		Procedure: ICD-9: 33.6, 37.41, 37.51–37.54, 37.61–37.66, 37.68; ICD-10: 02HA**Z, 02PA*RZ, 02RK0JZ, 02RL0JZ, 02UA4JZ, 02WA0JZ, 02WA0QZ, 02WA0RZ, 02WA3QZ, 02WA3RZ, 02WA4QZ, 02WA4RZ, 02YA0Z*, 5A02*10, 5A02*16, 5A02*1D documented during hospital stay

#### **Denominator Definition**

Subject Defined	CPT Codes	ICD and Other Codes
Heart Failure		POV (Primary Diagnosis only): ICD-9: 398.91, 402.01, 402.11, 402.91, 404.01, 404.03, 404.11, 404.13, 404.91, 404.93, 428.0, 428.1, 428.20, 428.21, 428.22, 428.23, 428.30, 428.31, 428.32, 428.33, 428.40, 428.41, 428.42, 428.43, 428.9, 429.1, 997.1; ICD-10: I11.0, I13.0, I13.2, I50.* and with Service Category H (hospitalization). NOTE: If a patient has multiple admissions matching these criteria during the Report Period, the earliest admission will be used.

Numerator Definition (Evaluation of LVS Function): Any of the codes listed below

Subject Defined	CPT Codes	ICD and Other Codes
Ejection Fraction (ordered or documented anytime one year prior to discharge date)	78414, 78468, 78472, 78473, 78480, 78481, 78483, 78494, 93303, 93304, 93307, 93308, 93312, 93314–93318, 93350, 93543, 93555	Measurement: "CEF" Procedure: ICD-9: 88.53, 88.54; ICD-10: B205*ZZ, B206*ZZ, B215*ZZ, B216*ZZ
RCIS Order for Cardiovascular Disorders Referral (ordered during the hospital stay but no later than the hospital discharge date)		ICD Diagnostic Category: "Cardiovascular Disorders" AND one of the following: CPT Categories: "Evaluation and/or Management," "Non-surgical Procedures" or "Diagnostic Imaging"
Other Procedures (documented anytime one year prior to discharge date)		Echocardiogram: Procedure ICD-9: 88.72, 37.28, 00.24; ICD-10: B245YZZ, B245ZZ4, B245ZZZ, B246YZZ, B246ZZ4, B246ZZ2, B24BYZZ, B24BZZ4, B24BZZZ Nuclear Medicine Test: Procedure ICD-9: 92.2*; Cardiac Catheterization with a Left Ventriculogram: Procedure ICD-9: 37.22, 37.23, 88.53, 88.54; ICD-10: 4A02*N7, 4A02*N8, B205*ZZ, B206*ZZ, B215*ZZ, B216*ZZ

# 2.9 STD-Related Measure Topics

# 2.9.1 HIV Screening

# GPRA Measure Description

During GPRA Year 2017, achieve the target rate of 41.9% for the proportion of patients who have ever been screened for HIV.

#### Denominators

*Pregnant Active Clinical female patients* with no documented miscarriage or abortion and with no recorded HIV diagnosis ever.

*User Population patients* ages 13 through 64 with no recorded HIV diagnosis prior to the Report Period. (GPRA Denominator).

#### Numerators

Patients who were screened for HIV during the past 20 months.

Note: This numerator does not include refusals.

Patients who were screened for HIV during the Report Period. (GPRA Developmental Numerator)

**Note**: This numerator does *not* include refusals.

Patients who were screened for HIV at any time before the end of the Report Period. (GPRA Numerator)

Note: This numerator does *not* include refusals.

Count only: Number of HIV screens provided to User Population patients during the report period, where the patient was not diagnosed with HIV any time prior to the screen. (GPRA Developmental Numerator)

**Note**: This numerator does not include refusals.

# **Logic Description**

Age of the patient is calculated at the beginning of the Report Period.

*Pregnancy definition*: Any of the following: 1) The Currently Pregnant field in Reproductive Factors file set to "Yes" during the Report Period, or 2) At least two visits during the past 20 months from the end of the Report Period, where the primary provider is not a CHR (Provider code 53). Pharmacy-only visits (Clinic Code 39) will not count toward these two visits. If the patient has more than two pregnancy-related visits during the past 20 months, CRS will use the first two visits in the 20-month period. In addition, the patient must have at least one pregnancy-related visit occurring during the reporting period.

The patient must not have a documented miscarriage or abortion occurring after the second pregnancy-related visit or the date the Currently Pregnant field was set to "Yes". The time period is extended to include patients who were pregnant during the Report Period but whose initial diagnosis (and HIV test) were documented prior to Report Period.

*HIV Screening definition*: For the number of HIV screens provided to User Population patients numerator (count only), a maximum of one HIV screen per patient per day will be counted.

**Notes:** The time frame for screening for the pregnant patients denominator is anytime during the past 20 months and for User Population patients 13–64 is anytime during the Report Period.

CRS uses the following codes and taxonomies to define the denominator and numerators.

Subject Defined	CPT Codes	ICD and Other Codes	LOINC Codes	Taxonomy

# 2.9.2 HIV Quality of Care

#### Denominator

*User Population patients* ages 13 and older with at least two direct care visits (i.e., not Contract/PRC) with HIV diagnosis during the Report Period, including one HIV diagnosis in last 6 months.

#### Numerators

Patients who received CD4 test only (without HIV viral load) during the Report Period.

Patients who received HIV viral load only (without CD4) during the Report Period.

Patients who received both CD4 and HIV viral load during the Report Period.

Total patients receiving any test.

Patients who received at least one prescription for an Antiretroviral medication.

#### Logic Description

Age of the patient is calculated at the beginning of the Report Period.

CRS uses the following codes and taxonomies to define the denominator and numerators.

Subject Defined	CPT Codes	ICD and Other Codes	LOINC Codes	Taxonomy
HIV		<b>POV:</b> ICD-9: 042, 042.0-044.9 (old codes), 079.53, V08, 795.71; ICD- 10: B20, B97.35, R75, Z21, O98.711- O98.73		
CD4	86359, 86360 86361, G9214		Yes	BGP CD4 TAX
HIV Viral Load	87536, 87539, G9242, G9243		Yes	BGP HIV VIRAL LOAD TAX
Antiretroviral medication				BGP PQA ANTIRETROVIRAL MEDS - Medications must not have a comment of RETURNED TO STOCK.

## Key Logic Changes from CRS Version 17.0

# 2.9.3 Hepatitis C Screening

# Denominator

*User Population patients* born between 1945 and 1965 with no recorded Hep C diagnosis.

User Population patients with documented positive Ab result or Hep C diagnosis ever.

*User Population patients* born between 1945-1965 with documented positive Ab result or Hep C diagnosis ever.

User Population patients with positive Hepatitis C confirmation result ever.

*User Population patients* born between 1945-1965 with positive Hepatitis C confirmation result ever.

#### Numerators

Patients screened for Hepatitis C ever (Ab test).

- a. Patients with a positive result.
- b. Patients with a negative result.

Patients with documented positive Ab result ever.

Patients with documented Hep C diagnosis ever.

Patients who were given a Hepatitis C confirmation test.

- a. Patients with a positive result.
- b. Patients with a negative result.

Patients who ever had a negative confirmation test twelve weeks or greater after a positive confirmation test (cured).

a. Patients who had a negative confirmation test twelve weeks or greater after their most recent positive confirmation test (currently cured).

#### **Logic Description**

CRS uses the following codes and taxonomies to define the denominator and numerators.

Subject Defined	CPT Codes	ICD and Other Codes	LOINC Codes	Taxonomy
Hepatitis C diagnosis (documented any time prior to the end of the Report Period)		POV or Problem List entry where the status is not Inactive or Deleted: ICD-9: 070.41, 070.44, 070.51, 070.54, 070.70-070.71, V02.62; ICD-10: B17.10, B17.11,		
		B17.10, B17.11, B18.2, B19.20, B19.21, Z22.52; SNOMED data set PXRM HEPATITIS C (Problem List only)		

Subject Defined	CPT Codes	ICD and Other Codes	LOINC Codes	Taxonomy
Hepatitis C diagnosis (documented any time prior to the end of the Report Period)		POV or Problem List entry where the status is not Inactive or Deleted: ICD-9: 070.41, 070.44, 070.51, 070.54, 070.70-070.71, V02.62; ICD-10: B17.10, B17.11, B18.2, B19.20, B19.21, Z22.52; SNOMED data set PXRM HEPATITIS C (Problem List only)		
Hepatitis C Screening (Ab Test)	86803		Yes	BGP HEP C TEST TAX
Hepatitis C Confirmation Test (documented any time prior to the end of the Report Period)	86804, 87520, 87521, 87522, G9203, G9207, G9209		Yes	BGP HEP C CONF TEST TAX
If patient has more than one confirmatory test, CRS will first look for a test with a positive result, and if none is found, then will look for a test with a negative result. If there is no test with a result, CRS will use the first test documented.				

For patients ever cured numerator, there must be twelve or more weeks between a positive and negative confirmation test result.

Positive Ab test result defined as a result starting with ">" or containing "Pos", "React", or "Detec".

Negative Ab test result defined as a result starting with "<", or containing "Neg", "Non", "Not", or "None".

Positive confirmation test result defined as any number greater than zero, a result starting with ">" or "<", or containing "Pos", "React", or "Detec".

Negative confirmation test result defined as a result containing "Neg", "Non", "Not", or "None".

# Key Logic Changes from CRS Version 17.0

# 2.9.5 Sexually Transmitted Infection Screening Denominators

*HIV/AIDS screenings* needed for key STI incidents for *Active Clinical patients* that occurred during the defined period. Broken down by gender.

## Numerators

Count only: Number of *Active Clinical patients* who were diagnosed with one or more key STIs during the period 60 days prior to the Report Period through the first 300 days of the Report Period. Broken down by gender.

Count only: Number of separate key STI incidents for Active Clinical patients during the defined period.

*Number of needed HIV/AIDS screenings* performed from one month prior to the date of first STI diagnosis of each incident through 2 months after.

**Note**: This numerator does *not* include refusals.

Patients with documented HIV screening refusal during the Report Period.

# Logic Description

Key STIs are Chlamydia, Gonorrhea, HIV/AIDS, and Syphilis. Key STI diagnoses are defined with the following codes.

STI	ICD and Other Codes
Chlamydia	<b>POV</b> : ICD-9: 079.88, 079.98, 099.41, 099.50-099.59; ICD-10: A56.*, A74.81-A74.9
Gonorrhea	POV: ICD-9: 098.0-098.89; ICD-10: A54.*, O98.2*
HIV/AIDS	<b>POV</b> : ICD-9: 042, 042.0-044.9, 079.53, 795.71, V08; ICD-10: B20, B97.35, R75, Z21, O98.711-O98.73
Syphilis	<b>POV</b> : ICD-9: 090.0-093.9, 094.1-097.9; ICD-10: A51.*-A53.*

Logic for Identifying Patients Diagnosed with Key STI:

Any patient with one or more diagnoses of any of the key STIs defined above during the period 60 days prior to the beginning of the Report Period through the first 300 days of the Report Period.

#### Logic for Identifying Separate Incidents of Key STIs:

One patient may have one or multiple occurrences of one or multiple STIs during the year, except for HIV. An occurrence of HIV is only counted if it is the initial HIV diagnosis for the patient ever. Incidents of an STI are identified beginning with the date of the first key STI diagnosis (see definition above) occurring between 60 days prior to the beginning of the Report Period through the first 300 days of the Report Period. A second incident of the same STI (other than HIV) is counted if another diagnosis with the same STI occurs 2 months or more after the initial diagnosis. A different STI diagnosis that occurs during the same 60-day time period as the first STI counts as a separate incident.

Example of Patient with Multiple Incidents of Single STI

Visit	<b>Total Incidents</b>
08/01/16: Patient screened for Chlamydia	0
08/08/16: Patient diagnosed with Chlamydia	1
10/15/16: Patient diagnosed with Chlamydia	2
10/25/16: Follow-up for Chlamydia	2
11/15/16: Patient diagnosed with Chlamydia	2
03/01/17: Patient diagnosed with Chlamydia	3

#### Denominator Logic for Needed Screenings:

One patient may need multiple screening tests based on one or more STI incidents occurring during the time period.

To be included in the needed HIV screening tests denominator, the count will be derived from the number of separate non-HIV STI incidents. HIV screening tests are recommended for the following key STIs: Chlamydia, Gonorrhea, Syphilis.

"Needed" screenings are recommended screenings that are further evaluated for contraindications. The following are reasons that a recommended screening is identified as not needed (i.e., contraindicated).

- 1. Only one screening for HIV is needed during the relevant time period, regardless of the number of different STI incidents identified. For example, if a patient is diagnosed with Chlamydia and Gonorrhea on the same visit, only one screening is needed for HIV/AIDS.
- 2. A patient with HIV/AIDS diagnosis prior to any STI diagnosis that triggers a recommended HIV/AIDS screening does not need the screening ever.

#### *Numerator Logic*:

To be counted in the numerator, each needed screening in the denominator must have a corresponding laboratory test or test refusal documented in the period from one month prior to the relevant STI diagnosis date through 2 months after the STI incident.

Key STI screenings are defined with the following codes.

STI		LOINC Codes	Taxonomy
HIV/AIDS	86689, 86701– 86703, 87390– 87391, 87534– 87539	Yes	BGP HIV TEST TAX
HIV Refusals	86689, 86701- 86703, 87390- 87391, 87534- 87539		V Lab HIV Test

# 2.10 Other Clinical Measures Topics

# 2.10.1 Asthma

#### Denominators

All *Active Clinical patients*. Broken down by age groups (under 14, 15 to 34, 35 to 64, and 65 and older).

*Patients who have had two asthma-related visits* during the Report Period or with persistent asthma. Broken down by age groups (under 14, 15 to 34, 35 to 64, and 65 and older).

#### Numerators

Patients who have had two asthma-related visits during the Report Period or with persistent asthma.

Patients from Numerator 1 who have been hospitalized at any hospital for asthma during the Report Period.

Patients from Numerator 1 who have visited the ER or Urgent Care for asthma during the Report Period.

Patients from Numerator 1 who have a Severity of 1.

Patients from Numerator 1 who have a Severity of 2.

Patients from Numerator 1 who have a Severity of 3.

Patients from Numerator 1 who have a Severity of 4.

Patients from Numerator 1 who have no documented Severity.

# Logic Description

Age is calculated at beginning of Report Period.

Asthma visits definition: Diagnosis (POV) ICD-9: 493.\*; ICD-10: J45.\*.

Persistent asthma definition: Any of the following:

- Problem List entry where the status is not Inactive or Deleted for ICD-9: 493.\*; ICD-10: J45.\*; SNOMED data set PXRM ASTHMA with Severity of 2, 3 or 4 at *any* time before the end of the Report Period
- Problem List entry where the status is not Inactive or Deleted for SNOMED data set PXRM ASTHMA PERSISTENT at ANY time before the end of the Report Period, *or*
- Most recent visit-related asthma entry (i.e., V Asthma) with Severity of 2, 3, or 4 documented *any* time before the end of the Report Period.

*Severity definition:* Severity of 1, 2, 3 or 4 in an active entry in the PCC Problem List for ICD-9: 493.\*; ICD-10: J45.\*; SNOMED data set PXRM ASTHMA or in V Asthma.

*Hospitalizations definition*: Service Category H with primary POV ICD-9: 493.\*; ICD-10: J45.\*.

*ER and Urgent Care definition*: Clinic codes 30 or 80 with primary POV ICD-9: 493.\*; ICD-10: J45.\*.

# Key Logic Changes from CRS Version 17.0

None.

# **Patient List Description**

List of patients diagnosed with asthma and any asthma-related hospitalizations.

# 2.10.2 Asthma Assessments

#### Denominators

Active Clinical patients ages 5 and older with persistent asthma within the year prior to the beginning of the Report Period and during the Report Period, without a documented history of emphysema or chronic obstructive pulmonary disease (COPD). Broken down by age groups (5 through 14, 15 through 34, 35 through 64, and greater than (>) 65).

## Numerator

Patients with asthma management plan during the Report Period.

Patients with severity documented at any time before the end of the Report Period.

Patients with control documented during the Report Period.

Patients who were assessed for number of symptom free days during the Report Period.

Patients with number of symptom free days score of 0 through 5.

Patients with number of symptom free days score of 6 through 12.

Patients with number of symptom free days score of 13 through 14.

Patients who were assessed for number of school/work days missed during the Report Period.

Patients with number of school/work days missed score of 0 through 2.

Patients with number of school/work days missed score of 3 through 7.

Patients with number of school/work days missed score of 8 through 14.

# Logic Description

Age of the patient is calculated at the beginning of the Report Period.

*Emphysema definition:* Any visit at any time on or before the end of the Report Period with POV or Problem List entry where the status is not Deleted: ICD-9: 492.\*, 506.4, 518.1, 518.2; ICD-10: J43.\*, J68.4, J68.8, J98.2, J98.3; SNOMED data set PXRM BGP EMPHYSEMA (Problem List only).

*COPD definition:* Any visit at any time on or before the end of the Report Period with POV or Problem List entry where the status is not Deleted: ICD-9: 491.20, 491.21, 491.22, 493.2\*, 496, 506.4; ICD-10: J44.\*, J68.4, J68.8; SNOMED data set PXRM BGP COPD (Problem List only).

#### Persistent asthma definition:

- 1. Meeting any of the following four criteria below within the year prior to the beginning of the Report Period *and* during the Report Period:
  - a. At least one visit to Clinic Code 30 (Emergency Medicine) with primary diagnosis ICD-9: 493\*; ICD-10: J45.\* (asthma)
  - b. At least one acute inpatient discharge with primary diagnosis ICD-9: 493.\*; ICD-10: J45.\*. Acute inpatient discharge defined as Service Category of H

- c. At least four outpatient visits, defined as Service Categories A, S, or O, with primary or secondary diagnosis of ICD-9: 493.\*; ICD-10: J45.\* *and* at least two asthma medication dispensing events (see definition below)
- d. At least four asthma medication dispensing events (see definition below). If the sole medication was leukotriene modifiers, then *must* also have at least one visit with POV ICD-9: 493.\*; ICD-10: J45.\* in the same year as the leukotriene modifier (i.e., during the Report Period or within the year prior to the beginning of the Report Period.)
- 2. Meeting any of the following criteria below:
  - a. Problem List entry where the status is not Inactive or Deleted for ICD-9: 493.\*; ICD-10: J45.\*; SNOMED data set PXRM ASTHMA with Severity of 2, 3 or 4 at any time before the end of the Report Period
  - b. Problem List entry where the status is not Inactive or Deleted for SNOMED data set PXRM ASTHMA PERSISTENT at ANY time before the end of the Report Period, or
  - c. Most recent visit-related asthma entry (i.e., V Asthma) with Severity of 2, 3, or 4 documented any time before the end of the Report Period.

*Dispensing event definition*: One prescription of an amount lasting 30 days or less. For RXs longer than 30 days, divide the days' supply by 30 and round down to convert. For example, a 100-day RX is equal to three dispensing events (100/30 = 3.33, rounded down to 3). Also, two different RXs dispensed on the same day are counted as two different dispensing events. Inhalers should also be counted as one dispensing event.

**Note:** If the medication was started and then discontinued, CRS will recalculate the # Days Prescribed by subtracting the prescription date (i.e., visit date) from the V Medication Discontinued Date. Example: Rx Date=11/15/2017, Discontinued Date=11/19/2017, Recalculated # Days Prescribed=4.

Asthma medication codes for denominator defined with medication taxonomies: BGP HEDIS ASTHMA MEDS, BGP HEDIS ASTHMA LEUK MEDS, BGP HEDIS ASTHMA INHALED MEDS. Medications are: Antiasthmatic Combinations (Dyphylline-Guaifenesin, Guaifenesin-Theophylline), Antibody Inhibitor (Omalizumab), Inhaled Steroid Combinations (Budesonide-Formoterol, Fluticasone-Salmeterol, Formoterol-Mometasone), Inhaled Corticosteroids (Belclomethasone, Budesonide, Ciclesonide CFC Free, Flunisolide, Fluticasone CFC Free, Mometasone, Triamcinolone), Lekotriene Modifiers (Montelukast, Zafirlukast, Zileuton), Mast Cell Stabilizers (Cromolyn), Methylxanthines (Aminophylline, Dyphylline, Theophylline), Short-Acting, Inhaled Beta-2 Agonists (Albuterol, Levalbuterol, Pirbuterol). Medications must not have a comment of RETURNED TO STOCK.

Asthma management plan definition: Patient Education code ASM-SMP.

Severity documented definition:

Meeting any of the following criteria below:

- Problem List entry where the status is not Inactive or Deleted for ICD-9: 493.\*; ICD-10: J45.\* with Severity of 2, 3 or 4 at ANY time before the end of the Report Period or
- 2. Most recent visit-related asthma entry (i.e., V Asthma) with Severity of 2, 3, or 4 documented ANY time before the end of the Report Period.

*Control documented definition:* POV ICD-9: 493.\*; ICD-10: J45.\* with Asthma Control recorded in the V Asthma file.

*Number of symptom free days definition:* The most recent V Measurement documented during the Report Period.

*Number of school/work days missed definition:* The most recent V Measurement documented during the Report Period.

# Key Logic Changes from CRS Version 17.0

Figure 2-105: Sample Patient List, Asthma Assessments

# 2.10.3 Medication Therapy for Persons with Asthma Denominators

Active Clinical patients ages 5-50 with persistent asthma within the year prior to the beginning of the Report Period and during the Report Period, without a documented history of emphysema or chronic obstructive pulmonary disease (COPD).

Active Clinical patients ages 5 and older with persistent asthma within the year prior to the beginning of the Report Period and during the Report Period, without a documented history of emphysema or chronic obstructive pulmonary disease (COPD). Broken down by age groups (5 through 14, 15 through 34, 35 through 64, and greater than (>) 65).

Active Clinical patients ages 5 and older with persistent asthma within the year prior to the beginning of the Report Period and during the Report Period, without a documented history of emphysema or chronic obstructive pulmonary disease (COPD) who had two or more prescriptions for a LABA during the Report Period. Broken down by age groups (5 through 14, 15 through 34, 35 through 64, and greater than (>) 65).

## Numerators

Suboptimal Control: Patients who were dispensed more than three canisters of a short-acting beta2 agonist inhaler during the same 90-day period during the Report Period.

Absence of Controller Therapy: Patients who were dispensed more than three canisters of short acting beta2 agonist inhalers over a 90-day period and who did not receive controller therapy during the same 90-day period.

Patients who were prescribed two or more controller therapy medications during the Report Period.

Patients who were prescribed two or more inhaled corticosteroid medications during the Report Period.

Patients who were not prescribed two or more inhaled corticosteroid medications during the Report Period.

## Logic Description

Age of the patient is calculated at the beginning of the Report Period.

*Emphysema definition:* Any visit at any time on or before the end of the Report Period with POV or Problem List entry where the status is not Deleted: ICD-9: 492.\*, 506.4, 518.1, 518.2; ICD-10: J43.\*, J68.4, J68.8, J98.2, J98.3; SNOMED data set PXRM BGP EMPHYSEMA (Problem List only).

*COPD definition:* Any visit at any time on or before the end of the Report Period with POV or Problem List entry where the status is not Deleted: ICD-9: 491.20, 491.21, 491.22, 493.2\*, 496, 506.4; ICD-10: J44.\*, J68.4, J68.8; SNOMED data set PXRM BGP COPD (Problem List only).

#### Persistent asthma definition:

- 1. Meeting any of the following four criteria below within the year prior to the beginning of the Report Period *and* during the Report Period:
  - a. At least one visit to Clinic Code 30 (Emergency Medicine) with primary diagnosis ICD-9: 493\*; ICD-10: J45.\* (asthma)
  - b. At least one acute inpatient discharge with Primary Diagnosis ICD-9: 493.\*; ICD-10: J45.\*. Acute inpatient discharge defined as Service Category of H

- c. At least four outpatient visits, defined as Service Categories A, S, or O, with primary or secondary diagnosis of ICD-9: 493.\*; ICD-10: J45.\* *and* at least two asthma medication dispensing events (see definition below)
- d. At least four asthma medication dispensing events (see definition below). If the sole medication was leukotriene modifiers, then *must* also have at least one visit with POV ICD-9: 493.\*; ICD-10: J45.\* in the same year as the leukotriene modifier (i.e., during the Report Period or within the year prior to the beginning of the Report Period.)
- 2. Meeting any of the following criteria below:
  - a. Problem List entry where the status is not Inactive or Deleted for ICD-9: 493.\*; ICD-10: J45.\*; SNOMED data set PXRM ASTHMA with Severity of 2, 3 or 4 at any time before the end of the Report Period
  - b. Problem List entry where the status is not Inactive or Deleted for SNOMED data set PXRM ASTHMA PERSISTENT at ANY time before the end of the Report Period, or
  - c. Most recent visit-related asthma entry (i.e., V Asthma) with Severity of 2, 3, or 4 documented any time before the end of the Report Period.

Dispensing event definition: One prescription of an amount lasting 30 days or less. For RXs longer than 30 days, divide the days' supply by 30 and round down to convert. For example, a 100-day RX is equal to three dispensing events (100/30 = 3.33, rounded down to 3). Also, two different RXs dispensed on the same day are counted as two different dispensing events. Inhalers should also be counted as one dispensing event.

**Note:** If the medication was started and then discontinued, CRS will recalculate the # Days Prescribed by subtracting the prescription date (i.e., visit date) from the V Medication Discontinued Date. Example: Rx Date=11/15/2017, Discontinued Date=11/19/2017, Recalculated # Days Prescribed=4.

Asthma medication codes for denominator defined with medication taxonomies: BGP HEDIS ASTHMA MEDS, BGP HEDIS ASTHMA LEUK MEDS, BGP HEDIS ASTHMA INHALED MEDS. Medications are: Antiasthmatic Combinations (Dyphylline-Guaifenesin, Guaifenesin-Theophylline), Antibody Inhibitor (Omalizumab), Inhaled Steroid Combinations (Budesonide-Formoterol, Fluticasone-Salmeterol, Formoterol-Mometasone), Inhaled Corticosteroids (Belclomethasone, Budesonide, Ciclesonide CFC Free, Flunisolide, Fluticasone CFC Free, Mometasone, Triamcinolone), Lekotriene Modifiers (Montelukast, Zafirlukast, Zileuton), Mast Cell Stabilizers (Cromolyn), Methylxanthines (Aminophylline, Dyphylline, Theophylline), Short-Acting, Inhaled Beta-2 Agonists (Albuterol, Levalbuterol, Pirbuterol). Medications must not have a comment of RETURNED TO STOCK.

*To be included in the Suboptimal Control and Absence of Controller Therapy numerators*, patient must have one or more non-discontinued prescriptions for short acting Beta2 Agonist inhalers totaling at least four canisters in one 90-day period. Short acting Beta2 Agonist inhaler medications defined with medication taxonomy BGP PQA SABA MEDS. (Medications are: Albuterol, Levalbuterol, Pirbuterol). Medications must not have a comment of RETURNED TO STOCK.

#### Controller Therapy definition:

At least one non-discontinued prescription of controller therapy medications during the same 90 day period.

*Controller therapy medications* defined with medication taxonomy BGP PQA CONTROLLER MEDS. (Medications are: Beclomethasone, Budesonide, Budesonide-Formoterol, Ciclesonide, Flunisolide, Fluticasone, Fluticasone-Salmeterol, Formoterol, Mometasone, Mometasone-Formoterol, Montelukast, Salmeterol, Theophylline, Zafirlukast, Zileuton). Medications must not have a comment of RETURNED TO STOCK.

*Inhaled corticosteroid medications* defined with medication taxonomy BGP PQA ASTHMA INHALED STEROIDS. (Medications are: Beclomethasone, Budesonide, Ciclesonide, Fluticasone, Flunisolide, Fluticasone-salmeterol, Mometasone, Triamcinolone, Budesonide-formoterol, Mometasone-formoterol.) Medications must not have a comment of RETURNED TO STOCK. *Long-Acting Beta-2 Agonist (LABA) medications* defined with medication taxonomy BGP ASTHMA LABA MEDS. (Medications are: Formoterol, Salmeterol, Fluticasone-salmeterol, Budesonide-formoterol, Mometasone-formoterol) Medications must not have a comment of RETURNED TO STOCK.

# Key Logic Changes from CRS Version 17.0

1. Updated BGP HEDIS ASTHMA MEDS, BGP HEDIS ASTHMA LEUK MEDS, BGP HEDIS ASTHMA INHALED MEDS taxonomies.

# 2.10.4 Proportion of Days Covered by Medication Therapy

# Denominators

Active Clinical patients ages 18 and older who had two or more prescriptions for *beta-blockers* during the Report Period.

Active Clinical patients ages 18 and older who had two or more prescriptions for RAS Antagonists and no documented history of ESRD or one or more prescriptions for ARB/Neprilysin inhibitor combination medications during the Report Period.

Active Clinical patients ages 18 and older who had two or more prescriptions for *calcium channel blockers (CCB)* during the Report Period.

Active Clinical patients ages 18 and older who had two or more prescriptions for *biguanides* and no documented history of ESRD during the Report Period.

Active Clinical patients ages 18 and older who had two or more prescriptions for *sulfonylureas* and no documented history of ESRD during the Report Period.

Active Clinical patients ages 18 and older who had two or more prescriptions for *thiazolidinediones* and no documented history of ESRD during the Report Period.

Active Clinical patients ages 18 and older who had two or more prescriptions for *DiPeptidyl Peptidase (DPP)-IV Inhibitors* and no documented history of ESRD during the Report Period.

Active Clinical patients ages 18 and older who had two or more prescriptions for *Diabetes All Class medications* and no documented history of ESRD during the Report Period.

Active Clinical patients ages 18 and older who had two or more prescriptions for *statins* during the Report Period

Active Clinical patients ages 18 and older who had two or more prescriptions for nonwarfarin oral anticoagulants during the Report Period.

Active Clinical patients ages 18 and older who had two or more prescriptions for *antiretroviral agents* during the Report Period.

## Numerators

Patients with proportion of days covered (PDC) greater than or equal to (>=)80% during the Report Period.

Patients with a gap in medication therapy greater than or equal to (>=)30 days.

Patients with proportion of days covered (PDC) greater than or equal to (>=)90% during the Report Period.

# Logic Description

Age is calculated at the beginning of the report period.

To be included in the denominator, patients must have at least two prescriptions for that particular type of medication on two unique dates of service at any time during the Report Period. Medications must not have a comment of RETURNED TO STOCK.

For the Non-warfarin anticoagulants measures, the two unique dates of service must be at least 180 days apart and the patient must have received greater than 60 days' supply of the medication during the Report Period. Patients who received one or more prescriptions for warfarin, low molecular weight heparin (LMWH), heparin or an SC Factor Xa inhibitor (defined by medication taxonomy BGP PQA WARFARIN) will be excluded from the denominator.

*The Index Prescription Start Date* is the date when the medication was first dispensed within the Report Period. For all measures except Non-warfarin anticoagulants, this date must be greater than 90 days from the end of the Report Period to be counted in the denominator.

The medications in the measures are defined with medication taxonomies:

- BGP PQA BETA BLOCKER MEDS: Beta-blocker medications (Acebutolol HCL, Atenolol, Betaxolol HCL, Bisoprolol fumarate, Carvedilol, Labetalol HCL, Metoprolol succinate, Metoprolol tartrate, Nadolol, Nebivolol HCL, Penbutolol sulfate, Pindolol, Propranolol HCL, Timolol maleate); Beta-blocker combination products (Atenolol-chlorthalidone, Bisoprolol-HCTZ, Nadololbendroflumethiazide, Metoprolol-HCTZ, Propranolol-HCTZ)
- BGP PQA RASA MEDS: Angiotensin Converting Enzyme Inhibitors
   (Benazepril, Captopril, Enalapril, Fosinopril, Lisinopril, Moexipril, Perindopril, Quinapril, Ramipril, Trandolopril); Antihypertensive Combinations (Amlodipinebenazepril, Benazepril-HCTZ, Captopril-HCTZ, Enalapril-HCTZ, Fosinopril-HCTZ, Lisinopril-HCTZ, Moexipril-HCTZ, Quinapril-HCTZ, Trandolaprilverapamil); Angiotensin II Inhibitors (Azilsartan, Candesartan, Eprosartan, Irbesartan, Losartan, Olmesartan, Telmisartan, Valsartan); Antihypertensive Combinations (Aliskiren-valsartan, Amlodipine-valsartan, Amlodipine-valsartan-HCTZ, Amlodipine-olmesartan, Azilsartan-Chlorthalidone, Candesartan-HCTZ, Eprosartan-HCTZ, Irbesartan-HCTZ, Losartan-HCTZ, Olmesartan-amlodipine-HCTZ, Olmesartan-HCTZ, Telmisartan-amlodipine, Telmisartan-HCTZ, Valsartan-HCTZ); Direct Renin Inhibitors (Aliskiren); Direct Renin Inhibitor Combination Products (Aliskiren-amlodipine, Aliskiren-amlodipine-HCTZ, Aliskiren-HCTZ, Aliskiren-valsartan)
- BGP PQA CCB MEDS: Calcium-Channel Blocker medications (Amlodipine besylate, Diltiazem HCL, Felodipine, Isradipine, Nicardipine HCL, Nifedipine (long acting only), Verapamil HCL, Nisoldipine); CCB Combination Products (Amlodipine besylate-benazepril HCL, Amlodipine-valsartan, Amlodipinevalsartan-HCTZ, Akiskiren-amlodipine, Aliskiren-amlodipine-HCTZ, Telmisartan-amlodipine, Amlodipine-olmesartan, Trandolapril-verapamil HCL, Amlodipine-atorvastatin, Olmesartan-amlodipine-HCTZ)

- BGP PQA BIGUANIDE MEDS: Biguanides (Metformin); Combination Products (Glipizide-metformin, Glyburide-metformin, Rosiglitazone-metformin, Pioglitazone-metformin, Repaglinide-metformin, Sitagliptin-metformin IR-SR, Saxagliptin-metformin SR, Linagliptin-metformin, Alogliptin-metformin, Dapagliflozin-Metformin, Canagliflozin-Metformin)
- BGP PQA SULFONYLUREA MEDS: Sulfonylureas (Chlorpropamide, Glimepiride, Glipizide, Glyburide, Tolazamide, Tolbutamide); Combination Products (Glipizide-metformin, Glyburide-metformin, Rosiglitazone-glimepiride, Pioglitazone-glimepiride)
- BGP PQA THIAZOLIDINEDIONE MEDS: Thiazolidinediones (Pioglitazone, Rosiglitazone); Combination Products (Rosiglitazone-metformin, Pioglitazonemetformin, Rosiglitazone-glimepiride, Pioglitazone-glimepiride, Alogliptinpioglitazone)
- BGP PQA DPP IV MEDS: DPP-IV Inhibitors (Sitagliptin, Linagliptin, Saxagliptin, Alogliptin); Combination Products (Sitagliptin-metformin IR-SR, Saxagliptin-metformin SR, Sitagliptin-simvastatin, Linagliptin-metformin, Alogliptin-metformin, Alogliptin-pioglitazone, Linagliptin-empagliflozin)
- BGP PQA DIABETES ALL CLASS: Biguanide medications (see list above); Sulfonylurea medications (see list above); Thiazolidinedione medications (see list above); DPP-IV Inhibitor medications (see list above); Incretin Mimetic Agents (Albiglutide, Exenatide, Liraglutide, Dulaglutide); Meglitinides (Nateglinide, Repaglinide, Repaglinide-metformin); Sodium glucose co-transporter2 (SGLT2) inhibitors (Canagliflozin, Dapagliflozin, Empagliflozin, Dapagliflozin-Metformin, Linagliptin-empagliflozin, Canagliflozin-Metformin)
- BGP PQA STATIN MEDS: Statins (Lovastatin, Rosuvastatin, Fluvastatin, Atorvastatin, Pravastatin, Pitavastatin); Combination Products (Niacin-lovastatin, Atorvastatin-amlodipine, Niacin-simvastatin, Sitagliptin-simvastatin, Ezetimibe-simvastatin, Ezetimibe-atorvastatin)
- BGP PQA NON-WARFARIN ANTICOAG: (Apixaban, Dabigatran, Rivaroxaban, Edoxaban)
- BGP PQA WARFARIN: (Warfarin, Dalteparin, Fondaparinux, Enoxaparin, Heparin, Tinzaparin)

- BGP PQA ANTIRETROVIRAL MEDS: Single Agents (Enfuvirtide, Maraviroc, Atazanavir, Darunavir, Fosamprenavir, Indinavir, Nelfinavir, Ritonavir, Saquinavir, Tipranavir, Dolutegravir, Raltegravir, Delavirdine, Efavirenz, Etravirine, Nevirapine, Abacavir, Didanosine, Emtricitabine, Lamivudine, Stavudine, Tenofovir, Zidovudine, Rilpivirine, Elvitegravir); Combination Agents (Lopinavir-Ritonavir, Lamivudine-zidovudine, Darunavir-Cobicistat, Atazanavir-Cobicistat, Abacavir-Lamivudine-Zidovudine, Efavirenz-emtricitabine-Tenofovir, Emtricitabine-tenofovir, Abacavir-lamivudine, Emtricitabine-rilpivirine-Tenofovir, Elvitegravir-cobicistat-emtricitabine-tenofovir, Abacavir-dolutegravirlamivudine)
- BGP PQA ARB NEPRILYSIN INHIB: ARB/Neprilysin Inhibitor Combinations (Sacubitril/Valsartan)

#### For each PDC numerator:

Proportion of days covered = # of days the patient was covered by at least one drug in the class / # of days in the patient's measurement period.

#### Measurement Period definition:

The patient's measurement period is defined as the number of days between the Index Prescription Start Date and the end of the Report Period. When calculating the number of days the patient was covered by at least one drug in the class, if prescriptions for the same drug overlap, the prescription start date for the second prescription will be adjusted to be the day after the previous fill has ended.

**Note**: If the medication was started and then discontinued, CRS will recalculate the # Days Prescribed by subtracting the prescription date (i.e. visit date) from the V Medication Discontinued Date. Example: Rx Date=11/15/2017, Discontinued Date=11/19/2017, Recalculated # Days Prescribed=4.

# **Example of Proportion of Days Covered:**

- Report Period: January 1 through December 31, 2017
- 1st Rx is Index Rx Start Date: 3/1/17, Days' Supply=90
- Rx covers patient through 5/29/17
- 2nd Rx: 5/26/17, Days' Supply=90
- Rx covers patient through 8/27/17
- 3rd Rx: 9/11/17, Days' Supply=180
- Gap = (9/11/17 8/27/17) = 15 days
- Rx covers patient through 3/8/18
- Patient's measurement period: 3/1/17 through 12/31/17 = 306 Days
- Days patient was covered: 3/1/17 through 8/27/17 + 9/11/17 through 12/31/17 = 292 Days
- PDC = 292 / 306 = 95%

#### For each Gap numerator:

CRS will calculate whether a gap in medication therapy of 30 or more days has occurred between each consecutive medication dispensing event during the Report Period. A gap is calculated as the days not covered by the days' supply between consecutive medication fills.

#### Example of Medication Gap greater than or equal to (>=) 30 Days:

- Report Period: January 1 through December 31, 2017
- 1st Rx: 4/1/17, Days' Supply=30
- Rx covers patient through 4/30/17
- 2nd Rx: 7/1/17, Days' Supply=90
- Gap #1 = (7/1/17 4/30/17) = 61 days
- Rx covers patient through 9/28/17
- 3rd Rx: 10/1/17, Days' Supply=90
- Gap #2 = (10/1/17 9/28/17) = 2 days
- Rx covers patient through 12/29/17
- Gap #1 greater than or equal to (>=) 30 days, therefore patient will be included in the numerator for that medication.

# Key Logic Changes from CRS Version 17.0

1. Added ICD-10 codes I12.0, I13.11, I13.2, N18.5, N19. to ESRD definition.

## Patient List Description

Figure 2-110: Sample Patient List, Proportion of Days Covered by Medication Therapy

# 2.10.5 Primary Medication Non-adherence

## Denominator

Number of e-prescriptions for newly initiated drug therapy for chronic medications for *Active Clinical patients* ages 18 and older.

#### Numerator

Number of medications returned to stock within 30 days.

#### **Logic Description**

Age is calculated at beginning of the Report Period.

To be included in the denominator, the e-prescription must be for a chronic medication during the Report Period.

#### Denominator Exclusions

- 1. Any prescription where there is a prescription dispensing record in the preceding 180 days for the same drug.
- 2. Any duplicate medications, defined as any medication that has been e-prescribed twice in a 30-day period with no prescription fill in between the e-prescriptions.

3. Any prescription sent to an outside pharmacy, as it is not possible to know if the medication was returned to stock.

Chronic medications are defined with medication taxonomies:

- BGP PQA ASTHMA INHALED STEROIDS: (Beclomethasone, Budesonide, Ciclesonide, Fluticasone, Flunisolide, Fluticasone-salmeterol, Mometasone, Budesonide-formoterol, Mometasone-formoterol)
- BGP PQA COPD: (Tiotropium, Indacaterol, Olodaterol, Umeclidinium, Ipratropium-albuterol, Roflumilast, Fluticasone-vilanterol, Ipratropium, Aclidinium, Umeclidinium-vilanterol, Tiotropium-olodaterol)
- BGP PQA DIABETES ALL CLASS: Biguanides (Metformin); Biguanide • Combination Products (Glipizide-metformin, Glyburide-metformin, Rosiglitazone-metformin, Pioglitazone-metformin, Repaglinide-metformin, Sitagliptin-metformin IR-SR, Saxagliptin-metformin SR, Linagliptin-metformin, Alogliptin-metformin, Dapagliflozin-Metformin, Canagliflozin-Metformin); Sulfonylureas (Chlorpropamide, Glimepiride, Glipizide, Glyburide, Tolazamide, Tolbutamide); Sulfonylurea Combination Products (Glipizide-metformin, Glyburide-metformin, Rosiglitazone-glimepiride, Pioglitazone-glimepiride); Thiazolidinediones (Pioglitazone, Rosiglitazone); Thiazolidinedione Combination Products (Rosiglitazone-metformin, Pioglitazone-metformin, Rosiglitazoneglimepiride, Pioglitazone-glimepiride, Alogliptin-pioglitazone); DPP-IV Inhibitors (Sitagliptin, Linagliptin, Saxagliptin, Alogliptin); DPP-IV Inhibitor Combination Products (Sitagliptin-metformin IR-SR, Saxagliptin-metformin SR, Sitagliptin-simvastatin, Linagliptin-metformin, Alogliptin-metformin, Alogliptinpioglitazone, Linagliptin-empagliflozin); Incretin Mimetic Agents (Albiglutide, Exenatide, Liraglutide, Dulaglutide); Meglitinides (Nateglinide, Repaglinide, Repaglinide-metformin); Sodium glucose co-transporter2 (SGLT2) inhibitors (Canagliflozin, Dapagliflozin, Empagliflozin, Dapagliflozin-Metformin, Linagliptin-empagliflozin, Canagliflozin-Metformin)

- BGP PQA RASA MEDS: Angiotensin Converting Enzyme Inhibitors
   (Benazepril, Captopril, Enalapril, Fosinopril, Lisinopril, Moexipril, Perindopril, Quinapril, Ramipril, Trandolopril); Antihypertensive Combinations (Amlodipinebenazepril, Benazepril-HCTZ, Captopril-HCTZ, Enalapril-HCTZ, Fosinopril-HCTZ, Lisinopril-HCTZ, Moexipril-HCTZ, Quinapril-HCTZ, Trandolaprilverapamil); Angiotensin II Inhibitors (Azilsartan, Candesartan, Eprosartan, Irbesartan, Losartan, Olmesartan, Telmisartan, Valsartan); Antihypertensive Combinations (Aliskiren-valsartan, Amlodipine-valsartan, Amlodipine-valsartan-HCTZ, Amlodipine-olmesartan, Azilsartan-Chlorthalidone, Candesartan-HCTZ, Eprosartan-HCTZ, Irbesartan-HCTZ, Losartan-HCTZ, Olmesartan-amlodipine-HCTZ, Olmesartan-HCTZ, Telmisartan-amlodipine, Telmisartan-HCTZ, Valsartan-HCTZ); Direct Renin Inhibitors (Aliskiren); Direct Renin Inhibitor Combination Products (Aliskiren-valsartan)
- BGP PQA STATIN MEDS: Statins (Lovastatin, Rosuvastatin, Fluvastatin, Atorvastatin, Pravastatin, Pitavastatin); Combination Products (Niacin-lovastatin, Atorvastatin-amlodipine, Niacin-simvastatin, Sitagliptin-simvastatin, Ezetimibe-simvastatin, Ezetimibe-atorvastatin)

To be included in the numerator, the e-prescription medication must have a comment of RETURNED TO STOCK within 30 days of the prescription date (i.e., visit date).

# 2.10.6 Medications Education

# Denominators

Active Clinical patients with medications dispensed at their facility during the Report Period.

All *User Population patients* with medications dispensed at their facility during the Report Period.

#### Numerator

Patients who were provided patient education about their medications in any location.

# Logic Description

Patients receiving medications at their facility are identified by any entry in the VMed file for your facility. The purpose of this definition is to ensure that sites are not being held responsible for educating patients about medications received elsewhere that may be recorded in RPMS. CRS assumes that the appropriate facility is the one the user has logged onto to run the report.

**Note:** If a site's system identifier, i.e., ASUFAC code, has changed during the period between the Baseline start date and the Current Year end date, due to compacting/contracting or other reasons, your report may display zeros (0s) or very low counts for some time periods.

CRS uses the following patient education codes to define the numerator:

Subject	Codes
Medication Education	Any Patient Education code containing "M-" or "-M" (medication)
	or
	DMC-IN (Diabetes Medicine–Insulin)
	FP-DPO (Family Planning–Depot Medroxyprogesterone
	Injections
	FP-OC (Family Planning–Oral Contraceptives)
	FP-TD (Family Planning–Transdermal (Patch))
	*-NEB (*Nebulizer)
	*-MDI (*Metered Dose Inhalers)

# Key Logic Changes from CRS Version 17.0

# 2.10.8 Public Health Nursing

# Denominator

User Population patients.

#### Numerators

*For User Population only*, the number of patients in the denominator served by Public Health Nurses (PHNs) in any setting, including Home.

*For User Population only*, the number of patients in the denominator served by a PHN driver/interpreter in any setting.

*For User Population only*, the number of patients in the denominator served by PHNs in a HOME setting.

*For User Population only*, the number of patients in the denominator served by a PHN driver/interpreter in a HOME Setting.

Count only: *Number of visits to User Population patients* by PHNs in any setting, including Home

- Number of visits to patients ages 0 to 28 days (Neonate) in any setting.
- Number of visits to patients ages 29 days to12 months (infants) in any setting.
- Number of visits to patients ages 1 through 64 years in any setting
- Number of visits to patients ages 65 and older (Elders) in any setting
- Number of PHN driver/interpreter (Provider Code 91) visits

Count only: Number of visits to User Population patients by PHNs in Home setting

- Number of Home visits to patients age 0 to 28 days (Neonate)
- Number of Home visits to patients age 29 days to 12 months (Infants)
- Number of Home visits to patients ages 1 through 64 years
- Number of Home visits to patients aged 65 and over (Elders).
- Number of PHN driver/interpreter (Provider Code 91) visits in a HOME setting.

# Logic Description

PHN visit is defined as any visit with primary or Secondary Provider Code 13 or 91. Home visit defined as: (1) Clinic 11 and a primary or Secondary Provider Code 13 or 91 or (2) Location Home (as defined in Site Parameters) and a primary or Secondary Provider Code 13 or 91.

# Key Logic Changes from CRS Version 17.0

None.

# **Patient List Description**

List of patients with PHN visits documented.

Numerator codes in patient list: All PHN = Number of PHN visits in any setting; Home = Number of PHN visits in home setting; Driver All = Number of PHN driver/interpreter visits in any setting; Driver Home = Number of PHN driver/interpreter visits in home setting.

# 2.10.9 Breastfeeding Rates

#### **GPRA Measure Description**

During GPRA Year 2017, achieve the target rate of 36.4% for the proportion of 2-month olds who are mostly or exclusively breastfeeding.

#### Denominators

Active Clinical patients who are 30 to 394 days old

Active Clinical patients who are 30 to 394 days old who were screened for infant feeding choice at the age of 2 months (38 to 89 days) (GPRA Denominator)

Active Clinical patients who are 30 to 394 days old who were screened for infant feeding choice at the age of 6 months (165 to 209 days)

Active Clinical patients who are 30 to 394 days old who were screened for infant feeding choice at the age of 9 months (255 to 299 days)

Active Clinical patients who are 30 to 394 days old who were screened for infant feeding choice at the age of 1 year (350 to 394 days)

*User Population patients* who are 30 to 394 days old who were screened for infant feeding choice at the age of 2 *months* (38 to 89 days)

#### Numerators

Patients who were screened for infant feeding choice at least once

Patients who were screened for infant feeding choice at the age of 2 months (38 to 89 days)

Patients who were screened for infant feeding choice at the age of 6 months (165 to 209 days)

Patients who were screened for infant feeding choice at the age of 9 months (255 to 299 days)

Patients who were screened for infant feeding choice at the age of *1 year* (350 to 394 days)

Patients who, at the age of 2 months (38 to 89 days), were either exclusively or mostly breastfed (GPRA Numerator)

Patients who, at the age of 6 months (165 to 209 days), were either exclusively or mostly breastfed

Patients who, at the age of 9 months (255–299 days), were either exclusively or mostly breastfed

Patients who, at the age of 1 year (350 to 394 days), were either exclusively or mostly breastfed

# **Logic Description**

Age of the patient is calculated at the beginning of the Report Period. Therefore, this measure may include patients up to 25 months old if they were within the eligible age range on the first day of the report period, and will not include any patients that were born after the first day of the report period. Patients born after the first day of the report period. Patients born after the first day of the report period.

*Infant feeding choice definition*: The documented feeding choice from the file V Infant Feeding Choice that is closest to the exact age that is being assessed will be used. For example, if a patient was assessed at 45 days old as half breastfed and half formula and assessed again at 65 days old as mostly breastfed, the mostly breastfed value will be used since it is closer to the exact age of 2 months (i.e., 60 days). Another example is a patient who was assessed at 67 days as mostly breastfed and again at 80 days as mostly formula. In this case, the 67 days value of mostly breastfed will be used. The other exact ages are 180 days for 6 months, 270 days for 9 months, and 365 days for 1 year.

In order to be included in the age-specific screening numerators, the patient must have been screened at the specific age range. For example, if a patient was screened at 6 months and was exclusively breastfeeding but was not screened at 2 months, then the patient will only be counted in the 6 months numerator.

## Key Logic Changes from CRS Version 17.0

1. Updated age range of 2 months to be 38 through 89 days.

#### **Patient List Description**

List of patients 30 to 394 days old, with infant feeding choice value, if any.

Note: "DO" represents "Days Old."

# 2.10.10 Use of High-Risk Medications in the Elderly

#### Denominators

Active Clinical patients ages 65 and older with no hospice indicator during the Report Period. Broken down by gender and age groups (65 through 74, 75 through 84, greater than (>) 85).

*User Population patients* ages 65 and older with no hospice indicator during the Report Period. Broken down by gender.

#### Numerators

Patients who received at least one high-risk medication for the elderly during the Report Period.

Patients who received at least two different high-risk medications for the elderly during the Report Period.

# Logic Description

Age of the patient is calculated at the beginning of the Report Period.

```
Note: The logic below is a deviation from the logic written by PQA, as PQA requires at least two prescriptions fills for the same high-risk medication during the Report Period, while the logic below only requires one prescription fill.
```

For nitrofurantoin, a patient must have received a cumulative days supply for any nitrofurantoin product greater than 90 days during the Report Period.

For nonbenzodiazepine hypnotics, a patient must have received a cumulative days supply for any nonbenzodiazepine hypnotic products greater than 90 days during the Report Period.

Subject Defined	CPT Codes	SNOMED Codes
Hospice	99377, 99378, G9473 through G9479	170935008, 183919006, 183920000, 183921001, 284546000, 305336008, 305911006, 385763009, 385765002, 444933003, 445449000, 444933003, 428361000124107, 428371000124100

*Medication definitions*: High-risk medications for the elderly defined with medication taxonomies:

- BGP HEDIS ANTICHOLINERGIC MEDS: First-generation antihistamines (Includes combination drugs) (Brompheniramine, Carbinoxamine, Chlorpheniramine, Clemastine, Cyproheptadine, Dexbrompheniramine, Dexchlorpheniramine, Diphenhydramine (oral), Doxylamine, Hydroxyzine, Promethazine, Triprolidine); Antiparkinson agents (Benztropine (oral), Trihexyphenidyl)
- BGP HEDIS ANTITHROMBOTIC MEDS: (Ticlopidine, Dipyridamole, oral short-acting)
- BGP HEDIS ANTI-INFECTIVE MEDS: (Nitrofurantoin)
- BGP HEDIS CARDIOVASCULAR MEDS: Alpha blockers, central (Guanfacine, Methyldopa, Reserpine); Cardiovascular, other (Disopyramide, Digoxin, Nifedipine, immediate release)

- BGP HEDIS CENTRAL NERVOUS MEDS: Tertiary TCAs (Includes combination drugs) (Amitriptyline, Clomipramine, Doxepin, Imipramine, Trimipramine); Antipsychotics, first-generation (conventional) (ThioridazineBarbiturates (Amobarbital, Butabarbital, Butalbital, Pentobarbital, Phenobarbital, Secobarbital); Central Nervous System, other (Chloral hydrate, Meprobamate); Nonbenzodiazepine hypnotics (Eszopiclone, Zolpidem, Zaleplon); Vasodilators (Ergoloid mesylates, Isoxsuprine)
- BGP HEDIS ENDOCRINE MEDS: Endocrine (Desiccated thyroid, Estrogens with or without progesterone (oral and topical patch products only), Megestrol); Sulfonylureas, long-duration (Chlorpropamide, Glyburide)
- BGP HEDIS GASTROINTESTINAL MEDS: (Trimethobenzamide)
- BGP HEDIS PAIN MEDS: Other (Meperidine, Pentazocine); Non-COX-selective NSAIDs (Indomethacin, Ketorolac)
- BGP HEDIS SKL MUSCLE RELAX MED (Includes combination drugs) (Carisoprodol, Chlorzoxazone, Cyclobenzaprine, Metaxalone, Methocarbamol, Orphenadrine)

Note: For each medication, the days' supply must be greater than (>) 0. If the medication was started and then discontinued, CRS will recalculate the # Days Prescribed by subtracting the prescription date (i.e., visit date) from the V Medication Discontinued Date. Example: Rx Date=11/15/2017, Discontinued Date=11/19/2017, Recalculated # Days Prescribed=4. Medications must not have a comment of RETURNED TO STOCK.

# 2.10.11 Use of Benzodiazepine Sedative Hypnotic Medications in the Elderly

#### Denominators

Active Clinical patients ages 65 and older.

User Population patients ages 65 and older.

#### Numerators

Patients who received at least two prescription fills for any benzodiazepine sedative hypnotic medications for more than 90 days.

## Logic Description

Age of the patient is calculated at the beginning of the Report Period.

The patient must have received a cumulative days supply for any benzodiazepine sedative hypnotic products greater than 90 days during the Report Period.

*Medication definitions*: Benzodiazepine sedative hypnotic medications defined with medication taxonomy BGP PQA BENZODIAZ MEDS (Estazolam, Flurazepam, Quazepam, Temazepam, Triazolam).

Note:	For each medication, the days' supply must be greater than
	(>) 0. If the medication was started and then discontinued,
	CRS will recalculate the # Days Prescribed by subtracting
	the prescription date (i.e., visit date) from the V Medication
	Discontinued Date. Example: Rx Date=11/15/2017,
	Discontinued Date=11/19/2017, Recalculated # Days
	Prescribed=4. Medications must not have a comment of
	RETURNED TO STOCK.

#### Key Logic Changes from CRS Version 17.0

None.

#### **Patient List Description**

List of patients 65 and older with two or more prescriptions for benzodiazepine sedative hypnotic medications.

# 2.10.12 Functional Status Assessment in Elders

# Denominator

Active Clinical patients ages 55 and older. Broken down by gender.

#### Numerator

Patients screened for functional status at any time during the Report Period.

## Logic Description

Age is calculated at the beginning of the Report Period.

*Functional status screening definition*: Any non-null values in V Elder Care for (1) at least one of the following ADL fields: toileting, bathing, dressing, transfers, feeding, or continence *and* (2) at least one of the following IADL fields: finances, cooking, shopping, housework/chores, medications or transportation during the Report Period.

# Key Logic Changes from CRS Version 17.0

None.

#### **Patient List Description**

List of patients greater than or equal to (=>) 55 with functional status codes, if any. The following are the abbreviations used in the Numerator column:

- TLT–Toileting
- BATH–Bathing
- DRES–Dressing
- XFER–Transfers
- FEED–Feeding
- CONT–Continence

- FIN–Finances
- COOK–Cooking
- SHOP–Shopping
- HSWK–Housework/Chores
- MEDS–Medications
- TRNS–Transportation

# 2.10.13 Fall Risk Assessment in Elders

## Denominators

Active Clinical patients ages 65 and older. Broken down by gender.

User Population patients ages 65 and older. Broken down by gender.

#### Numerators

Patients who have been screened for fall risk or with a fall-related diagnosis in the past year.

Note: This numerator does *not* include refusals.

- a. Patients who have been screened for fall risk in the past year
- b. Patients with a documented history of falling in the past year
- c. Patients with a fall-related injury diagnosis in the past year
- d. Patients with abnormality of gait/balance or mobility diagnosis in the past year

Patients with a documented refusal of fall risk screening exam in the past year

# Logic Description

Age of the patient is calculated at the beginning of the Report Period.

Fall risk screening/fall related diagnosis is defined as any of the codes in the table below.

Subject Defined	ICD and Other Codes	Exam Code	E Codes (Injury)
Fall Risk Exam	<b>CPT:</b> 1100F, 1101F, 3288F	<b>Exam</b> : 37 (Fall Risk)	
History of Falling	<b>POV</b> : ICD-9: V15.88 (Personal History of Fall); ICD-10: Z91.81		
Fall-related Injury			POV (Cause Codes #1-3): ICD-9: E880.*, E881.*, E883.*, E884.*, E885.*, E886.*, E888.*; ICD-10: (All codes ending in A or D only) W01.*, W06.*-W08.*, W10.*, W18.*, W19.*
Abnormality of Gait/Balance or Mobility	<b>POV</b> : ICD-9: 781.2, 781.3, 719.7, 719.70 (old code), 719.75–719.77 (old codes), 438.84, 333.99, 443.9; ICD- 10: G25.7*, G25.89, G25.9, G26, I69.*93, I73.9, R26.*, R27.*		
Refusal		<b>Exam</b> : 37 (Fall Risk)	

#### Key Logic Changes from CRS Version 17.0

None.

#### Patient List Description

List of patients 65 years or older with fall risk assessment, if any.

#### **Measure Source**
